## Revintionary speeches, orations, \&e.

Dran Sta-In my letter of the 25 th 1) ectulac., 1816, 1 merely adverted to the subject smriscit. $i$ hy an annoyminus correspundent, respectinir to
 y. Ononw, c. gice the blab of my letier I gocidentaly reverted to the commumication inf:rior correspondent, and a re-perusal of it gave ine string el impressions than I had at first entertained of its importance, and interest, and essen'ial utility. You ask, "Cun the materials be got" Would the piblication be sufficiently premine t"" and "respectioty solicit alswers to these questions from a'l the fiends of the Rwastra." is a firm friend to the edion and the work, I would respectfully susgeic iny views upon this interesting subject. I arlvanced nu! opinion in my last letter to you, but my reatoms for thit opinion were hit fintly, if at all, einerean-l.

That America is one day tis be a great, a mishty and a powerful nation; that she w 11 make a figure upon the page of future history, which will luz!e the cyes and win the acimatation of finture geatera. tions; that the track which she is destined (t) pursue in her political revolution, tironngh the tate system of nations, will be marked by beans of sol re like effulgence, is not merely the visionaly whins of a bewildered imagination, nor the theoretical suggestions of a prejuticed mind; but is am; ; ly testified by a retrospection of event?, as well as by eristing appearances. But, sir, in order to propel her in that track of splendid illumiastion, and sime to her that character of transcendant हreatness, mincti. and rery math, depends upon the present gencri. tion. To the snail-paced progres of other mations to refinement in the arts; to fame is armi; to walth. grandeur and prosperity, we exhibit a curinus and vivid contrast. If we take a resiro pective hlance at the carly conclitione of (a) rematy, and ditw hat in

 commandics and woblet at ation that st cur iv linalis atnonr tine intion of Ute earth, the mind of the res mhlicen is struck whin the liveti-st entonimen, and iximmediticly pembted to alyutire, what will be her sthation at the cxpir.ution of the mert forty yerars.
It ix not for me, nor wh, nir the most ahg. cims mind, to teil-Bul is it has never yet been iso er-t-imed, that naturs hero acctin fiacil fimits pit. -illet to them, at the End of which, "her his ar. rive, thsymint reirusradr, "te are jutifited in the

 int tire lofties erpoe alinms of Ker mant $p \rightarrow t i$
 itive) in a cratyicto mitimal erlipro, all those petty notimes, that now hoot at lier grandeur ond enfy.
her srowing prosperity:-Great orators and great statemen, have been the pride of every country, and the boart of every age, that have been so for tunate as io produce them. In republics, like ours, they are, in a great measure, the props of the political fabric. Our couniry is yet in her teens:-lint yoting as she is, she has produced her orators, her sages, her heroes, statesmen and philosophers, which would do honor to any nation. If Hingland is proud of her Chathams, her Foxes, and her Shecillans, America can boast of a Henry, a Hamilton, an 1 mes-and it must gladden the heart of every luver thf his eountry, when he views the many splendil constellations that bespangle our present poliLical hemisphere. To keep alive the flame of liberty, we must be careful to keep alive the sentiments and prit ciples that inspired the bosoins of vir fishers, and urged them to put on the armor of resistance to curb tyranuy and arrest oppression. Tiere never was a more favorable juncture, for in stillinir those sentiments, than the present-as your enrep pondent well observes, "the moment and oppartunity may pass and not immediately returnthe evenis of the late war, have imparted a glow of national feeling, for every thing republican."

Char:icterized, then, as is the editor of the Week1. Register, for a strict and steady devotion to the prinniples of republicanism, and promulgating them as he does, through the medinm of a widely circulatis $\mathrm{s}_{\mathrm{y}}$ paper, uninfluenced by the malignant motises of paris zeal, there is no one better qualified to drrange the materials for such a work, as the one in tuestion, and there is no one more highly deselving of the credit that would result from it, than limself. The medium of conveyance too, would be no small considetation. The Regrister, from its vas: cmmprehensiveness and umbounded utility, is destined to survive the short-lived prodnctions of the day; and as it already contains records of the lives and achievinents of the brave and great, of those, (as I have had occasion before to remark) whon have fonght for their comintry, of those who have glorinnsly died for her, and of those who still live to dcfend her, when occasion demands it-I think it ensential, that in it should be recorded the effirsions of those, whose tongues spoke the eloquence of patriotism, and gave uffe to those atchievments which have exalted the honor of the republic, and renclered the names of our heroes "fimmortal in story."

That the materials can be procured, admits not, I presime, of any doubt; and respecting encouragement. I should suppose a very adequate idea could be formel, from the support other supplements lave received. If a sufficient number of revolutionaty speeches and orations cannot be obtained, why wot connect to what you can obtain, the must imprrtant and useful of the great men of our day?

I an very much pleased with the sugreestion concerning the publication of smbscribers' names at the end of the 12 th vol.
The following is from one of the editor's plain, solid friends-writtenz rith latste aud umidst the bustle of a very extensive busincgs. Ite wall be surprised in see it published-bnt it contains some raluable hiuts mil a subject that we have nozv much at heart.
"My FRIEND-I feel mich interested in your excellent plan respecting revolutionary speeches, orations, \&c. It must be interesting, for it belongs to a poris: next to the heart of every man who feels, or reflects, what a blessing it is to be an American. l'erseverance will ensure more success than you calculate upon. The proud monnmeats of the anrient republics bave failed to perpetuate the memo-
ry of men and things as faithtully as it is yet in the power'of the Anerican penple to record the his!ory of their nation's birth and parentage. I question, too, whether any age or nation has produced more men of equal worth, or who might serve as more perfect specimens of patriotic virtue, than our own, upon that occasion. It would be criminal to neglect the duty that the proposition of your plisn now enjoins upon you-posterity will ask the record of this age, and wondel that the immediate successors of the people of ' 76 should have so degenerated in forty yeurs as to forpet to estimate the importanee of that period, and the virtues of those who stamped its character. I do not believe that the age will continue to risk the imputation. We have abroad amongst our people a more truly American, and less of a foreign feeling, than we ever could boast of, since my maturity. A bold and faithfil assertion of this feeling, such as H. Niles has never failed to express with true republican freedom and simpli. city, has contributed to establish for his puhlication a character that must be the most grateful re. ward for his application-I feel proud to believe that I know him well enougli to know how much be esteems the public sentiment, and this sentiment requires that he should use all possible means to accomplish the proposed undertaking. The materials lie scattered in libraries of private citizens, or are preserved as sacred relicts of departed friends -Call them forth and promise them a station in history and in literature, and you will find that they will be liberally lent for the purpose. I do not know that fortune has bequeathed me any that will be wortliy of the collection; but if I find one, I shall feel it a duty that I owe posterity to give it to you."

## Relations with Spain.

We lave a pamphlet of nearly 80 pages containing "the message of the president transmitting the correspondence between the United $S a^{*} t S$ and Spain, relative to the subjects in contriversy between the two nations," complying with ti.e resolution of the senate of the $20 t h$ instant.

W'e have given these documents an entire examination, and do not colssider them of that import. ant character we were led to expect of them; nor indeed of sufficient interest to induce us to der:uge the week's business to give them a place in this paper-but they shall be inserted in course. The following briefremarks on the correspondence from the Vational Inteiligenrer of 'luesday last, may satisfy the general curiosity for the present?
"The documents appeur naturally to divisle them. selves into three chapters.

The first series in chronolngienl order, but se. cond in the order of publication, and arranged under letter B, comprises a continuation of the correspoudence between Mr. secretary Monuor and the Spanish minister, the first part of which, it will be recollected, was communicated to congress at their last session, and was then the subject of nuch public and private remark.
'The second series, in the order of time, but last in that of publication (under the letter C.) comprises the discussion and correspondence bet ween our muistcr in Spain (Mr. Khving,) and the Spanish minister of foreign affairs, which terminated in a transfer of the negociation to Washington by the Spanish government, on the ground of alleged want of time to enter into it a Madrid.

The third series as to date, but first in the order of publication, and first also in importance as shewing the actual pusture of our relations with Spain
comprises the recent correspondence between Mr. Secretary Moxroe and Dor Luts ne Onts, in consequence of the transfer of negociations by the Spanish government to this place. From this corresponlence, which appears to have terminated no Innger ago than on Friday last, it appears that the Spanish minister, though he has his powers from his government to treat, has, after all, no instructions.

Thus, then, the matter rests. The discussion is unreasonably delayed, not to say evaded, of our existing differences with Spain; and every thing respecting them is in suspense. We do not disrover those features of hostility, on the whole view of the case, which report had taught us to expect; but it is quite clear, from the general aspect of these documents, that our relations with Spain are far from being in a satisfactory state.

## Van Wart. Panlding and Williams <br> The fullozoing full, clear and covclustre vindication

 of the three putriotic mitilia-nen, woho arrested mog, ismar, agminst the charges of col. Tattinatge, in the horse of representatives of the United States, is copied from the Jerw-York Courier of the 17 th wlt. We do not regret tlut what roas never before dimbtect by the public is no: unquestionably provered; but are sorry that a man like col. Tallmad se should huve an committed himself, whhile woe rejoice in his disconfft-ture-it wollin mave been a listing stbject of hegret, indeld, if he han sctcebmed in ansihilativg tie faifest page of tie aynals of bremon-in ifcident tendisa, murf thay atr otien we kyow of, to rase up a Nationil CHARACTER, AND to give to the prople-tie convon peoply, 1 just estinite of theyswives. Colonel Benjamia Tallmadge, a member of the house of representatives of the United States, in a speech which lie lately delivered in that boily, ventured to ascribe to the celebrated captors of indre, a claracter the most infamous and detestable; and to their conduct on that occasion, motives the most sordill and odious. He accused those menl of be. ing as ofien in the camp of the ensemies of their country, as in our oun; of being imen, clestitutue not only of patriotism, but of common honesty and honor; of belonging to that detestable gang usually known by the name of Coro-boys. He charged them, in effect, therefore, with being the vilest of thieves and robbers; and in doing so, represented general Washington and the cougress as bestowing the public praise and the public bounty upon wretch es, utterly base and contemptible, from mere ino sixes of policy: There was in this attempt, an intrepidity worthy of a better canse; but at the same time a ralmes which he will never cease to re. pent. Col. Tallmadige has endeavored to tear the fairest leaf from our history, and to deprive the yeo. manry of our country of a theme in which they glo. ried, and of an example, whose influence is not leas extensive and important, than was that of the iremortal William Tcll. If he has done so, when there was the least possaibility that lie might be in error; he conld never upon rehectiou justify him-self:-But if he has done so upon slight, upon vety slight grounds; not from his own knowleclge, but from the calurnie of the envious, and the mere suapicions of an enemy, he has incurred a responsibility, which he must meet: a responsibility fiom which the personal revpect with which he may have been heretofore regarded, onght not to protect him, nor general coincidence of poltitical upinion to release him.Tpon what stounis did t're entonel accuse theac
men of being Coro-boys? of being as often in the enemy's camp, as in our own? Did he know the facts? If he did, he must have seen them steal; he must have seen them in the enemy's camp! But he does not pretend this. What then is the evidence of these facts? At most, hearsay-which might indeed be true-but it might also, be, as in fict it was, false? This evidence was assuredly too loose, for the charge he advanced-against men whose service had certainly been important; and who, absent, were not in a condition to justify themselves. The colonel is a christian.-Did he here observe the golden rule? The colonel has his enemies: how would he feel, if the community should judge of his character, by their calumnies?

The utmost that can be said in palliation of col. Tallmadge's conduct, is, that he believed what he said to be true. He believed them to be Cow boy plunderers, because he heard so! He believed they would have permitted Andre to proceed, if he had had more to give them, because Indre soid he was of that opinion! Upon such grounds the colonel employed the weight of his character, and the attthority of his place, to consign to infamy the three men who had saved West.Point and the army!

There is not a court of justice in clristendom which would not spurn such evilence. There c.un therefore be no fear that it will be reccivel by a grateful people.-And although we are Sully persuaded that nothing has appeared to put the acrused upon their defence, yet we proceed gratnitously, 10 lay before our readers, such conclusive testimony as will satisfy the whole world.

And first, as to these men being Coro-boys. Their neighbors would be, of all others, most likely 10 know the fact, if it were so; and the anmexed certificate from men, aged and venemble, will show that they were not even suspected. But the oath of Mr. Van Wart is decisive.

As to the second point, whether the captors of Andre would have releasel him for a very larre bribe, provided he could immediately have pail It, that is a circumstance which could be known only by themselves.-And $\mathrm{II}_{1}$ : Van Wart expressly dellies the imputation in the amexed affidavit.
The only possible question that can remain $i=$, whether the witness is worthy of credit. Io the point, we bring mean who have known him froin his infancy; men, whose venerable hairs are silveren by age; they speak to us from the verge of the grave: and they unite in the declaration that no man is more entitled to he beliere?, than Iame lian llart.
The nature of the case does not admit of testimony more prcise, perfect and conclusive. The refirtation is solemnly sworn $m$, and by a man wh , in moral and religions deportment diuring a long lifi, hras had no superior.

Isaac V'an Ware's . Pifilutil.
Isaac Vinn Wart, of the town of Mount Pleasant, in the coturty of Westchester, being duly swom, doth depose and say, that he is one of threc persons, who arrested major Ambe during the American revolutionary war, and comducted him in the Amesican camp. That he, this deponent, engetier with D. wid Williams and Jolin Paulding, had secreted thenisclves at the sule of the highway, for the purpese of detecting any persons coming from, or havin, unlawful intercourse with the enemy, being between the two armies; a eervice not uncomnion in those tines. That this deponent and his compunk ins ware armed with muskets; and upon secing in-jor Audre approach the place where they were concealed. they rose and presented their muskets at him, and requised him to stup, which he did. He then
asked them whether they belonged to his party? and then they asked him which was his purty? to which he replied, the lower party:-Upon which they, deeming a litule stratagem, under such circumstances, thit only justifiable, but necessary, gave him to understand that ther were of his party; upon which he joyfully declared himself to be a British officer, and whid them, that he had been out upon very partioular business. Haring ascertained thus muct, this deponent and his companions U: leceived lim as to their characters, declaring themelves in be Americans, and that he must consider himself their prisoner. Upon this, with seeming unc-ncern, le saill he had a pass from gene. ral Amnld, which he exhibited, and then insisted on their permitting lim to proceed. But they told hiin that as he liad confessed himself to be a British oflicer, thay deemed it to be their duty to convey him to the American camp; and then took him into a wnols a shore distance from the highway, in order to guard grinst heings surprised by parties of the enemy, who were frequently reconnoitering in that neigliboriood. That when they had him in the wood, they proceeded to scarch him, for the purpose of ascertaining who and what he was, and found incide of lis stockings and boots next to his bare ficet, papers, which satisfied them, that he was a aply. Major Andre now showed them his gold wotch, and remarked that it was evidence of his being a gentleman, ancl also promised to make them any reward they might name, if they would but permit him to procecd, which they refused. He then told them, that if they doubted the fulliment of his promise, they might conceal him in some sec:et place, and keep him there, until they could scind to New York, and receive their reward. And this deponent expressly declares, that every ofier made liy major Andre to them was piomptly and resolutely refused. Aid for himself he solemily declers that he had not, and he does most sincerely behere that Paulding and Williams had not, any intention of plundering their prisoner; nor did they confer with each other, or even hesitate, whether thicy should accept his promises, but on the contrary they were, in the opinion of this deponent, governed, lile liimself, by a deep interest in the canse of the country, and a strong sense of dutr. And this ciepment firt ther sals, that he never visited the Britis! camp, nor does he believer or suspect that cither Paulding or Williams ever did, excep Wiat l'aulding was once before Andre's capture, and once aficrwards, macle a prisoner by the Bricisish, as this depronciat has been iaformed and believes. And this depment for himself expressiy denies that he ever liel! any unlawful trafic or any interourse whaterer "itu the enemy. And, appealing solomuls on that enm isciert beine, at whoe tribunal he must suna apppent, he dotu expeestyr declare that all accusatime, charging lim hartuvith, are ulterly untri:e.

LSAE VAN WRA:
Swn:n this 20th cing of Juntary, 1817, beiose lacnb Radelif:

We the subseribers, i whahitants of the comnty of Westchestet, do certify, that cluring the revoludomary var we were well accuainted vith Is:te c
 arrested major An!?e; :und that at no time churing the remblutory war, rats alay suspicion ever ent ratised be their neighbors or arquaitumes that they or cither of them leld any nume inter. conrse with the enemy. On the contraty, they wrre miversally esteemend, and taken to be ardent ned taithful in the eanse of the country. We fur
ther certify, that the said Paulding and Williams We not now resiclent amng us, but that Isaac Van Wiart is a respectable frecholder of the town of Momit Pleasant, that we are well arquainted with hin:, and we do not hesitate to declare our belief that there is not an individual in the county of Westchester, acquainted with Issac Van Wart, who would lesitate to describe him as a man of a sober, moral, industrious and religin's life -as a man whose integrity is as unimpeachable as lis veracity is undoubted. In these respects no man in tlie county of Westchester is his superior.

## CHARACTER OF ANDRE.

The preceding refitation of the charges of colonel Tallmadge was sufficient, perhaps, to put the subject at rest without the a:mexed statement affecting major gindre himself. He is dead, and lis faults ought to be forgotten. But as the reputation he obtained (far beyond his deserts), has been brought forward to destroy that of other men, his equals, at least, in honor and honestywe feel it right to inseat the following, from the Philudelphia 'I'me Imerican of Saturday last.
Min. Stiles,-As colonel Tallmadge's attempt in the house of representatives to deprive Van Wart and his companions of the credit usually bestowed on them for the arrest of major Andre, has excited considerably,pull) ic attention, perhaps the follawing anecdote, which is derived from the most undoubted authority, may not be uninteresting. Andre was in Philadelelpha with the English army, and was quartered at the house of Dr. Franklin, in whicli the doctor's furniture and very valuable library had been left. When the British were preparing to eracuate the city, *M. de Simetere, who was an intimate friend of Aidre, called to take leave, and fomed hinn busily engaged in packing up and placing anoongst his own baggage, a number of the most vahuable books, belonging to Dr: Franklia. Shoocked and surprised at the proccdure, he told him, iss orter that he might be infuenced by the higlily toptorable conduct of gen. Kiniphausen, who had h en quistered at gen. Cadwallader's honse, that that oflicer sent for the agent of the latter, gave him an inventory which he had caused his steward to make out on hiis first taking possession; told him he would find every thing in proper order, even to some bottles of wine in the cellar, and paid him rent. tor the tine he occupied it. Not so with Andre, he quietly carried of his plunder. I have often thought his chimacter owes many of the beams which

play round it to the fascination of Miss. Seward's verse and description, of which he was by no means worthy, though there can be no doubt but he was a gallant soldier and in some respects an honest man.

## Legislature of South-Carolina.

The journals of the legislature, on the bill to incorporate the Wiuyaw aud Waado canal compuay, which grauts great clartered righes to the persons peticioning, presents us with the two following proferts, one from a member of tacls house:
The fullowing provest was made, aud urde. od to be entered on the jourisals of the huuse, viz.

Whereas, 1 conceive every $g$ rant of puwer, which gives privile. $k-s$ and exemptions to any man, or set of inen, whieh is delijed to the citizens generally, dangreruas, and on direct violation of the spirit of the constitution--ind whervas, the Wiuyaw and Wando compans, is incorporate in perpetuity, and extropt forever from taration, by a vute of this house; I hereby euter and reserve my prut-st, ins sineom form, upon Ule jouruals of this house, grounded upon the folluwing objectimabl." figtures in the said bill:
ist. An unlimited power to acquire and hold personal and real estate, ebereby cruling a monied aristoeracy; as aristucracy the sfust dangeruus to the liberties of a free governmetut.
ed. The grant of an exclusive right of steain navigation, to the said conupauy, for ten yrars atier the said eanal intunded to the made, is completert: which exclusiou is a monopoly; and against wuade, is completerd: which ex
the spirit of the government.

3d. A perpetual exemption from taxation, and a power to levy uvาm the citizcus, the unusually high interest of tweuty-five per cent.
4th. A grant of these privileges and exemptinas, in perpetuity, thereby reudering the ereature of logislative creation, for ever issdependent of its ereator, and destroying that respotasibility which vught to exist in the premists.

JOHN Ln WILSON, of Wlnyare.
The following prot st was made, and ordered to be entered on Whe journals of the senate, viz.

Whereas monopulies and perpetual charters, granting exelusive priviteges to any body of prosons, are hostile to the true interests of any giverathent, atad are thure especially repugatut to the prisciples of a repulilic, unless subject, ist sume ueasure, to the controling power of the state:
I slo, therefire, sulewaly protegt against chat part of the act, incorporating the Wisyaw asd Wandu canal couspany, which de privers th state of she right tu tax the property of the said company until the members of the smine shall, from the profits of their eatablistument, recive the amount of their capital, and the aumual interrest of fourte-n per ceat. on the samse.
Firsf. B-cause the sad -ve nption armou'its, in efleqt, to a perpetual exemptian fivin taxation; and the clause deprives the state of the conatroling powes that they ought to have retained over a company, who will hold under its control, the inland navigation of a eonviderable part of the state of south Carolina.
Seconilly, i3.canse, as shere is tw limitation to the smount of the capital of this company, a privilege is given, by which property, to an unlinited artount may be holden by individuals, withont the tate pross ssing the right, when it may be deensed just and exper dient to impost on such property; a part of the burfens of the country.

CHAPMAN LEVY.

## District tonnage of the United States.

Letter from the secretary of the treasury, transmit ting the annual statement of the district tonnage of the Linited States, on the 31,t Deceaber, 1815; with an explanatory letter from the register of the treasury.-January 17, 1817. Read and ordered to lie upon the table.

Treasury Deparimen, Juntary 16th, $181 \%$.

Sin-I liave the honor to transmit the annual statement to the 31st December, 1815, of the district tonnage of the United States.

Tons. 95ths.
The registered tonnage, as corrected at this office, for the year 1815 , is
stated at
851,22174

The enrolled and licensed tonnase is stated at

475,665
33,167 57

## Amounting to

1,368,127 78
The tonnage on which duties were collected during the year 1815, amounted as follows:
Registered tonnage paying duty on each voyage
$694,75 \% 59$
Enrolled and licersed tonnage employ. ed in the coasting trade, paying an annual duty
$3.4,8.361 .3$
Fishing vessels, the same
$33,22: 69$
1,102,813 26
Vote.-Duties were also paid on tonnage owned by citizens of the United states, engagel in foreign trade, not registered, Ditto, coasting trade $\quad 11,00895$
$12,2214,3$
Total amount of toanage on which du. ties were collected
$1,115,03471$
The registered tonnage being corrected for the year 1815, according in the morle prencribed for the govem. ment of the collectors of the several districts, as stated in the communi cation made to congress the 271 , Pebruary, 1802, and in conformity: with the intimation contained in the register's letter of the 7 th leecm. ber, 1811, may be consitered nearly the true amount of that description of tomage
The enrolled and licensed tonnage is stated at the amount upon which the annual duty was collected in 1815, on that descript ion of fomage, and may be considered as nearly the true amount
Fishing vessels the same .

854,2945

374,836 13
33,222 69

The district tonnage of the United States is stated at
$1,262,35361$
Of the coralled and licensed in mage amomithg, as before stated, to $475,665+1$ thas there was emr. ployed in the whale fishery 1.239 92 tons.
i beg leave to subjoin a statement, marked $\Lambda$, of the tonnage for the year 1815, comparel wil', the amount thereof as exhibited in the preceding ansntal statement for 1814; with noters in relation in
 respectively, in 1815 . By this siatement it aptears that the total amont of new vessels billt in the several tistricts uf the Unitel States, in 1815 , wae legistered tomage : 106,079 as Finrolled do.

48,545 U6
Total amomet
クine $151.6: 4.39$
thave the honor to be, Very respectfully, sir, Sour obedient humble servant, JOVEPMH NOURSH, Register.
Hon. Him. II. Crareford,
Sccresary of the trcasure.

## Massachusetts' C'iaims.

Letter from the acting secretary of war transmitting informa ion relative to the claims of the staie of Massachusetts for payment of the expences of the militia, ordered int by the executive authrity of the state, cluring the late war. February 20, is17.-Read and ordered to lie on the table.
Deparlment of War, Feb. 18th, 1817.
Sir-In obedience (1) the resolution of the liouse of representatives of the 14 th inst. directing the secretary of war "fol.y before the house any infor. marion in the possession of that department relative to the clims of the state of Massachusetts for payment of the expences of the militia ordered out by the execurive authority of the state, during the late war," I liave the honor to transmit the enclosed documents. That marked A , is a copy of the communication, with the accompanying documents, m.de to this department by Jarres Lloyd, and William 1I. Summer, esquires, agents on the part of the state of Nassachusetts. B, is a copy of the answer given by this department to that convmunication; and C , is a copy of a commmication made by the secretary of war to the chairman of the military committee of the senate, on the 7 th of February, 1815, with the accompanying documents.

I have the fonor to be, with great respect, yeu. GEO GRAHAM, Aeting secretary of waz.

Sin-In the conferences we have had the honor to have with !on, in relation to the clam of the stale of Diassachusetts, for expences incurred, and supplies furnished, for the service of the mili ${ }^{\circ}$ ia of that state, for the general security and protection dyring the late war, with the adjustment of which irm we have been charged, it has been oul wish, - have before made known to you, io conduct the examination and settlement of the account with the respect a d deference always clue to the highest public functimaries of the nation, ank to plirsme that course, $w$ i $h$, while it would do jistice to the sfate we on this occasion have the homor to represent, woud alsu best comport with the conrenience and winhes of the executive of the Unied Statec, o whom, in the first instance, we considered it most pioper in abply.
Ni. Haderstand, from the laws passed in the year's 1795 and 1814 , aththorizing under certain circu:- stances, detachments of the mititia on the recguisition of the president of the United States, hat $t e$ expences incurred, in consequence of such reguisinions, have been liquidated and paid by the general goverament; and that where the militia has beell ordered by state authority into service, withont the request of the president, and the occasion hat, in the opinion of the executive of the United States, justified the call for their services, that a subseguent recognition has been considered as equal to a previous requisition; and tlat on this construction of the powers given, by the laws before mentioned, to the president, very large claims have becn admitted and paicl, in whole or in patt, either by advances or on final adjustment, to several of the states who have presented them.

On this ground, therefore, and justly presuming on the distribution of that equal and exact justice to all the members of this great family of states, which alone could fumish the vital principle of their unio:, and which undoubterlly will govern the comduct of the general foverment on this and on all nilher nccasions, we have hoped, that the accomit we had the honor to present would have been admitted, at least to an investigation on its merits; and that, as the simplest and most easy method of ex amination that presented itself, we should be allowed to take up? the several itens which camposed it in succession, in the order in which they had bern arranged, and to offer them for almission or recestim, accordingly as the jucigrnent or semse of duty oi the head of the cieparment, or the proper officer: designated for the purpose, might determine: $\mathrm{mo}^{\circ}$ expecting that a clainı for any expence would be al lowerl, maless it were shown, that the occasion called for its being incurred-that the service wai both effectually and economically reidered, and that it has becu fully and honorably puin for by the state.
This course we regret extremely to find is not acceptable to the executive, if we were correctly impressed by the conversations which we harl the honor to hold with yon, the result of which, wo understand to be, that the expences not having been incurred under the authority of the United States, and the governor of Massachusetts, having omitted to place the militia of the state under the officers of the general government, no account of this kind could be received for examination at the depart.
arent, without an antecedent recognition by the president of the U:inted States of the several cases un der which the expence arose.

We cannot but lament his corrse being now taken, borause we do not learn that it has been asked in any other instance to be pursued so much in detail, as $\mathbf{w}$. now presume it to be required, in reference to the claim of Massachin,etts; bectange it will unavaiduby entail a considerable delay in classing anew the various expences of the same bodies of militia, asthey were at difforent imes colled into service, uncer separate head. on uccasions; and may require a mituteness of evillence in support of the urgency of thair being employed, which ihe notnsicty of the oceasions at the time they ocetryed, and the line of candict inderstood tio be arlopted towar Is uther cluitas, was not stpposed to require; and which evidence is nut, evell now in all its parts, probably in existence as a matler of recurd, and mast dierefore, in many mstances, still remain to be collected in an ofticial or anthentic shape, if thas rigor in point of furm should be adhered to.

ILi undoubtedly true, and wenther a wish is felt, nor a dincetion been reecived to conce.l the fact, $t$ it a diffirence of ojhaimin has unfortunateiy' existel between the geveral goromoment of the United $S_{4} e^{2}$ an I the sorernment of Mhisuchusetts, re. spectitg the comsti utiont powers in the former in relation to the contrul of the militi.s of the several states in the union; and it is greatly to be deprecated that a difference in the construction of consti iutional powers should ever excie other sentiments than those of a reciprocal respect, and a mutnal disposition, after dispassionate consideration, to amend what may be defective and to provide a reinedy for the evils of the future, from the inconveniencies of the past; and, nore esprecially should this be the cuse in a govermment fuluded on the clioice of enlightened fieemen, to secure the enjoyment of rational liberty to themselves and ther poiterityand the chief preservation of the purity and conseguent duration of which must spring from the jealous vigilaice with which all questionable expansions of power ought to be viewed, either on the part of the general governinent or that of the states -and which disposition, therefore, instead of meeting the frowus, would appear to be entitled to the support and encouragement of every firiend of the present firm of government, and who would wish io maintain and transmit it, resting on its existing fumblations, pure and unimpaired to distant generations. Aud in a inore particular mamer, shontd this disposition of mutial respect and deferchec for conflicting opmions prevail, wlice the crent has happily proved the evils apprelended to fow from them to be those of imaginarion, vather than of reality-and when the proaperons circumstances of the country admit the prople of the Unied states, the legitimate form in of all power, peaccably to adopt that corrective which ticir ardent desire to sectre and preserve their own rights, and those of the gencral and state govermments, as defined by their respective constitutions, will undoubtedly in. duce them to apply, should they consider the occasion as requitimb it.
The point in discuasion, that of the constitutional control of the miltitis, and the extent to which it has been giveis (1) the general govemment, or is retained by the states rewpectively, fras from the first adoptiot of the federal constitition, been perhaps a question more doublful and interesting in its na. ture, and has given rive to a greater diversity of opinion among the most eminent statesment of the fountry and probably allows of a more bonest dif.
ierence of sentiment, that can be brought into coistroversy under any other provision of that constitution.

Without meaning in susiain or scarcely to enter into the argument, it is on the one band conceded, that a denial of the construction given by the general government, would lessen the powers, and: under certain circumstances materially impair the strength of the nation, while on the other, the adhissi, to the fillest extent, of the doctrines, that the executive of the union is to be the only judge of the emergencies, under which the militia is to be brought into the service of the United States, at the time and in the mamer which it might think expedient; and that when so brought into ser. vice, the mibitit can by the junction of a large numa ber of their men, to a mere skeleton of regular troopst, be in fact officered by the Unital States, and that the executives of the several states, conirwy to their urn belief in the existence of such emergencies, would be bound to bow before this tribmal, erected in the breast of a single individual. and to yiedd implicit obedience to such opinion, must, after the survender of the scveral states, of the principle sources of their revente, place thein entirely at the mercy or disposi ion of ally future tenant of power; strip the indivitual states of their physical, as well as fiscal force, and would scarcely leave them in posession of even the remnant of that sovereignty, and self.dependence, which some of them unduubtedly supposed they had retained; but it is repeated, it is not intended Io discuss this question, further than to prove, that with the most correct views, different sentinents may honestly and intelligently exist, with regard to it: and that at any rate, the opinion adopied for the time by Massachusetts, was one, fairly and deliberately. formed by the governor of a large and respect :ble state; himself a statesman of forty year's' experience, in the highest oflices in the country; and! with the advice of his council; was corroborated by a judicial tribunal commanding the highest respect where known, and who are by the constitution of the state, bound to give their opinion "upon imporiant questions of law, and upan solemm on casions," to the execulive; was an opinion contianed by the legislature, and sanctioned by the people, by their reiterated support and election to office of the same public agrents, who atopted and arowed it; an opinion, therefore, entitled to great respect under all circumstances, and meriting every collsideration which the most dehberate judgment could give to it, and perhaps reguiring the shile inent of a point so interesting in itself, and son upen to controversy, in the inude pointed oll by the constitution, by an amendment explanato:y of its powers, as applied to the rights of the general go vermment, and the states, in the employ iwent of the inilitia, in the cases contemplated by tho constituion.

This course has already been recommended by the executive of a highly respectable state, (south. Carolina,) not interested in che inmediate questota (1) be adupted by its legislature, and seems to the that best founded in reason and expediency and the one which might be attented with the happiest effects hercafter, in preventing misconstincthas or collisiuns of opinion, when they might become injurions to the public safely, if the sult ject were left in its present moselled state. At ay rate, in a govermant yet in its infancy-in a goveruinent of experiment, which had never before tested, or alleupted to exercise its powers, in a furcign war, and under a state of public sentiment,
unprecedented in former times, it cannot be wished or expected by any part of the community, that a difference of opinion relative to the extent of constitutional powers, sanctioned as was that formed by the state of Massachusetts, whether correct or erroneous in itself, can be suffered after the services bave been rendered, and the protection wanted, in a great measure, obtained, to remain as a lasting source of irritation, or to operate as a pecuniary mulet upon a brave and free people, who first reared the standard that ultimately, by the common efforts of the nation, waved triumphatly over the established independence of the country, and who in that war, :s well as in the last, furnished their full proportion of those who filled its armies and fought its battles.
Still less, if possible, can it for a moment be believed, that a claim thus founded on a necessary and unavoidable defence for the general safety, against a common enemy, and not amounting in the whole to one third of the sam which is contributed towards the revenues of the United States in a single year, by a single port of the state that advanced it, can be retained as a lure for political subserviency, or its liquidation be withheld for the advancement of party purposes; a doctrine too discreditable to receive a moment's coufidence, and requiring ftom the undersigned an apology for its introduction, only to be derived from the public avowal and recommendation that lias been made of it, and the expression of their perfect conviction, it will meet, both from the high officers of govemment, and from the people of the United States, the reprobation it deserves.

We cannot, therefore, but feel conficlent that the rightful and constitutional remedy before noticeci, if it sloould appear, in the good judgment of congress, to be needful, will be resorted to, and that the claira of the state of Massachusetts will be admitted and repaid by the general government. Under the influence of these impressions, we beg leave to state, as the origin of this claim, and as matter of notoriety, that at the commencement of the war, the regular troops, perbaps not exceed ing, at the time, a man to a mile of the exposed sea-coast of Massachusetts, were, at a very carly period, withdrawn to the northern frontier; that after the first year of the war, the maritime border of the state was frequently threatened by the enemy; llat a part of it was actually invaded, and a very commanding naval and military position in it, unassailable when once furtified and possessed, without a superior naval furce, except with great and nearly inevitable destruction, was secured and retained by the enemy; thus cutting off and keeping in some degree, under his control, a large division of the state, depriving it of the power of military co-operation, or of a safe and easy intercourse with the capital or the government; that the harbors along the cost were fiequently annoyedexperlitions for further conquest menaced, and preparations made for effecting is: that several ports in the state were entered-line vessels in thein, in some instances, burnt: that small, defenceless towns were laid under contribution; that predatory incursions and alarms constantly prevalled; and that the security and protection of the inhabitants of the state, from further aggression and insult, wore derived from the services of the inilitia, in the way in which they were rendicred, and in which, from rarious circumstances, there is reason to believe, the clefence of the state, by the milita, could alune have been made effectual.

The circumstances relative to the calls for the
service of the militia liaving been communicated os congress by the department, and for the great $n^{\circ}$ part printed, we will not trespass upon your tive further, in relation to them, than in remark, tha' the first call was made in consequence of the letyof the honorable William Eustis, written prior to the reclaration of war; and whell that event stid remained suspended in a very doubtful scale, and that none of the constitutional emergencies did at the time, exist, or were expected by the government of Massachusetts speediiy to occur, no did they occur, to any extent of importance, untl two years after the request of general Dearboris on the 22 d of June, under the authority given bim on the 12th of that month. But shortly after the declaration of war, to wit, on the 3 d of July, $18: 2$, the executive of Massachusetts issued the general order, (No. 1,) which accompanies the present communication, for the purpose of placing the militia of the cominonwealth in the most effective possible state, "exciting their love of comntry, and exliorting them to be obedient to the provisions and intentions of the laws in every respect, and to be ready, with alacrity and effect, to defend their constitutional rights and liberties," and apprising then, in case of invasion. or imminent danger thereof, they were to march without delay, and when in the actual service of the United States, to be placed under the orders of the president thereof. This order was sent, the same day it was issued, to general Dearborn, and, shortly after this, a body of militia, consisting of three companies, was placed in the service of the United States, at Eastport, under the orders of general Boyd.
The next request received by the governor was in July, 1814, when the probability of attack having increased, the general requested cleven hundred men might be ordered out for the defence of the more exposed parts of the sea coast. This order was complied with; the troops placed under the authority of the United States, and the service per-formed-part of the said troops, to the number requested by general Dearborn, having been stationed at Castine and Machias, prior to the capture of those places by the enemy.
On the 5th September, 1814, general Dearborn again made a requisition on the governor of Massachusetts for a body of militia, when the general order No. 2, herewith presented, was issued on the 6 th of the same month, and every neasure taken to guard against the attacks of the enemy. A considerable body of the elite of the militia, from the interior, was ordered into immediate service, and marched and encamped on the sea board, and the whole of the militia were enjoined to hold themselves in constant readiness, and were called upon "by every motive of love of country, of honor, and sympathy for their fellow-citizens, who might be suffering the perils of war, to maintain the most perfect state of preparation, and to move, when called to the scene of action, with the utmost celerity." But the difficulties which had arisen, and the complaints that had been inade, from placing the militia in the inumeliate service of the United States, under United States' officers, on former occasions, had been sucli as to induce the belief it would be inexpedient, if not hazardous, to repeat the order without having the power to enforce it. An arrangement wis, however, subsequently made with general Isarborn, to place part of the militia in the forts of the United States, in the harbor of Boston, under the direction of his son, general II. S. Dearborn, and the very efficient borly of troops before mentioned were stationed in
the vicinity of the forts to reinforce and suppori them.
A fourth requisition was made by general Dearborn to guard the prisoners at Pittsfield, but the same causes operated, as in the other case, in addition to the belief that in the midst of a thickly setuled population, the danger of escape from the existing guard, or of insurrection, did not require a compliance with the call: the event verified the soundness of opinion.

These are all the calls for the militia which are known to have been made, and it is believed it can be shown that the omission to place the militia in the service of the United States was a matter of form rather than of fact; that the protection of the country was never for a moment abandoned, and that the militia were assembled and in readiness to act whenever emergencies appeared to require them; that arrangements adopted were judicious, and, in several instances, predicated upon the wishes of the officers of the United States, or of those who had the confidence of the general government, or who were at the tine, or subsequently, taken into its service, as will appear froon the correspondence of generals Dearborn, King, and H. S. Dearborn, and of commodore Baidbridge and captain Hull of the navy, presented in the papers ma:ked $3,4,5,6,7,8,9,10,11,12,13$, 14, 15 , and also from the letter of the honorable Wm. Jones, late secretary of the navy.

It can be demonstrated, also, that the services of the militia, so rendered, were both frugal and effective, as large bodies of troops were never unnecessarily called into service, nor retained in it longer than the occasion required-that the constant appearance, and probable knowledge of preparation and readiness to repel attack, prevented the advances or further depredation of the enemy; while the propriety of this mode of defence has been admitted, as we conceive, not only by the correspondence befure referred to, and by the payments made under similar circmstances to other states, but also by the dictum of a former secretary of war, promulgated at a period when, from the abscnce of all causes of irritation, the most dispassionate judginent could be formed, "that it is lawfull for the governor of a state, when the state may be invarled, or in imminent danger of invasion, to be the judge of the degree and duration of the danger, and to apportion the defence to the exigencies that presented," as appears from the report of general Dearborn, made to the house of represcntatives of the United States, February 3, 1803; and also from the opinion of general Kios, when in the same office, as expressed in his letter of June 10th, 1793, to the geveruor of Georgia.And the utility and necessity of the said services of the militia, as they were rendered, is still more fully and strongly confirmed by the fict thatt, when so ordered into service, they received the recugnition of general Dearborn, by the supplies of nullskets and inunitions of war he, in certain cases and to a considerable extent, furnished them with on Loan, or otherwise, from the stores of the United States; and which had been requested of hime expressly for the use of such budies of militial or. dered into service for the general defence of thic seaboard.

The furegoing embracces the chicf outline of the claim we have been instructed tu present, and we prucced now, in compliance with the suggestion of the department, to state that so far as we have at present at command the means of juilging, it may be classed under the following heads, to wit:

1st. For the expences of the militia who were called out by their respective officers, in consequence of an attack, or threat, to lay small towns and defenceless places under contribution; or who rallied suddenly against the depredatory incursions of the enemy's ships and barges, most of whom were in service only a few days at any one time, having been discliarged as soon as the dange: ceased; and for the pay and subsistence of sinall guards and detacliments, ordered nut at the sun. gestioh of general Dearborn for the defence of several small villages whose slipping and property were much exposed.
2d. For the payment and supplies of the militia, who were detaclied and ordered into the service of the United States, from the time they were mustered in their several companies until they arrived at their places of rendezvous; and for the rations and supplies furnished them, after they were ieceived into the service of the United St:ates, nome having been provided for them at the time.
3d. For the pay and supplies of the militia marcied for, and employed in the defence of the Penobscot frontier, after the country, east that of river, was taken possession of by the eneiny.
4th. For the expence of the militia who were detached, agreeably to the request of the superintendent of the military district, and offered to be placed in the service of the United States, organiz. ed according to law, which offer was accepted but a short time before the period for which they were detached hard expired; by reason of which, and the inability of the contractor on the station, to furnish the supplies, they were retained in the service of the state.
5th. For the expence of the militia at Porthand, which were called into service at the request of the committee of safety of that town, at a time when the enemy's fleet, with troops on board, was Ising on the coast; when great alarm existed in the town, and an attack was momently expected; when the principal reliance for the defence of the town was on the militia; and when the sea-const inust have been protected by them, or abindoned to the will of the enemy.
6 th. For troops employed for the defence of im. portunt exposed places, soine of which were a.tacked, and for the defence of which no troops, were requested to be placed in the service of the United States.
7 th Fur troops which at the request of the cominitlee of safety of various towns, in time of alarm, were marched in for the defncence of those places: more than those which were placed, or offered to be placed in the scrvice of the United states, for the defence of such places, and who were immediately discharged on the cessation of danger.
8th. For troops that were called in for thie defence of Boston, besides those placed in the forts of the United States, and who were stationed in its vicinity to reinforce the garrivons of those forth, in case of attack, and to prevent the cuemy fiom obtaining possession af the hecights acljoinming, which commanded the forts, the to vil, and the United? St:ices' navy yarch.
9 ih. For tronps which, at the request of the several naval cominanders at Buston and Portsmonth. and at the suggeston of gencral D:arhorn, were, called out for ilie protection of the t'nited St:ates' 74 gron ships building at those places, and for the defence of the shipss of war of the United Statc, which werechased into port: part of the evidence: in reference to which, may be secn in the letters of generial Deartorn, commujore Beinbridge, a:A
cuptain Mull, and of adjutant general 13 woks, who, in consequence of the directions of the executive, promptly complied with the requests made-ordered some of the most effective and valuable corps in the state into service, and infurmed the commodore that the governor was "fully disposed to du every thing in his power to aid in defending the navy yard, and the s'ips in the harbor, which his authority br the constitution woukd admit."

10th. For an allowance to the militia for arms and cloiling, and the use of their borses when in service.

11th. For the cost of prociring small allos, which were distributed among thie militia-of mounting and transpo"ting pieces of lien yomance -purchasing ammunition, teuts, militaty stores, and equipage. For barracks lnilt and hiven! for the troops, and damage done to individuals in their property, by erecting forts, and occup?ing their buildi:Igs as barracks.

12th. For the expences of materials furnished for building platforms, magracmes, furnaces, pickets \&c. in furts and batteries erected, i:n contormil! with the advice and susgestions of naval and mitit tary commanders of the Unitell States.

13th. For the pay and supplies of the militia, who were employed in fatigue duty in repainiag, extending, and strengthening the United States' forts in various places, and for the cost of the materials therefor-and for shot, and other supplies of ammunition furmsshed to the commanters of those forts.

14th. For the pay and rations of the militia, in the most exposed and important tuwns on the sea-board, who were called out two days in the week for discipline and exercise, agreeably to the wishes of the officers of the United States.

15 th. For the purchase of several large ships and preparing then to be sunk in the main channel of Bostom harbor, in concurrence with the opinion of naval and military commanders in the service of the Libited States, for the security of the navigation, towns, and navy yard; which vessels were sold afzer the peace, and the proceeds credited to the United States

The preceding specification offers to view, sir, the principal hearls of charges incurred and paid by the state, for the general defence and security during the late war, which at present occur to us. But we will omit, at this tine, to burden you with voluminous doctments in their support, as we understand the judgment, with regard to them, is to reat on principles, and not on detail; and to be determined by the authority given to the existing laws of the United States-the usage under them, aud the opinion of the executive. The vonchers in support of the claim slaall be promptly firmished, as sonn as we can ascertain what may be wanted and can procure them from Massachusetts; but as we came unprepared for the exhibit, under the form that has beell prescribed, and are unwilling longer to delay this note for the receipt of further documents, we ask leave to be considered as reserving to the state, or its agents, the right hereafter to extend, alter or amend it, as a firther development of the circumstances of the several items of the ac count, or the evidence in their support, mat requi.e.

Under this illustration of the clain, we have now the honor to request you wonld be pleased to inform us, whether the expences which have arisen tuder the heads before enumerated, and which have been paid by the state, will be admitted to all examination at the war department? And if the whole should not be so admitted, what part may be considered by the executive as entitled to payment, on the
prout, hereafter to be produced, being satisfactorily stablished?
We will only extend the present letter by making known onl readiness and desirc to afford any furv ther personal or other explamation on the subject to which it reiates, whenever you may have the groodness tu inform us it would be acceptable tos you to reccive it. And we also avail oursclves of the occ.abon to express the due semse we entertain of the urbanity and courresy we have individually expe rienced, both fiom the state and war depariments, in the interconrse we have had with them oal the business comnitted th our charge.

Regtestiang from you, sir, the favor of an answer as sexin as the importance of the stibject and youm other varions avocations will permit,

We have the honor to be, with sen'iments of great conssideration, your respectful and obedsent se:valts,
(Signed)
JAUE: LLOYD,
WM. II. SUASNER
Hashington, Frbunary 3, 1817
The lumorabio Geo. Graham, aeting secretary of wato
Defartment of H ar, FPb, 9, 1817.
Gentlemen- Your communication of the Sd inst. ins relation to the claim of the state of Mass:chusetts for the reimbursement of expences incurrent, and for supplies furnished fir the service of the militia during the late war, has received the consideration clue to it.

As it appears that, with one exception, the militia on whose account the expences were incurred were c:lled out and hept in service by the state anthorities, ind pendently of the anthorities of the United States: and were withlied from the command of the officers of the Linited States, placed by the president within the military districi of which Massachu: setts formed a part, with authority to call for and t:lke militia in!o the service of the United States: the claim with which you have been charged is excluded from the recognition of the executive authority of the United States, by the principles explained in the answer of the secretary of war to the communication of the governor of Massachusets, of the 7 th of September, 1814, copies of which are herewith enclosed. Those principles have been kept in view by the executive of the United States, in all cases where expences incurred by a state on account of militia services have been assumed.
It follows from these observations, that no part of the claim presented by you in behalf of the state of Massachusetts, can be assumed by the executive, except for such expences as were incurred "for the pryment and supplies of the militia, who were detached and ordered into the service of the United States, from the time they were mustered in their several companies, until they arrived at the places of rendezvous, and for the rations and supplies furnished them afier they were received into the United States, none having been provided for them at the time."

I have the honor to be, \&c.
GEO, GRAHAM.
Messrs. James Lloyd and Win. II. Sumner.

## Roads and Canals.

in senate of tie uniten states, feb. 14, 1817
I'he committee appointel on so much of the president's message as.relutes to rouds and canals,

## meport in palit. -

That on the general utility and national importance of roads and canals, little remains to be added to the stock of information now in possession of the
sernate, and to be found in the several reports made on that subject. The committee, however, would observe in addition, that the present peritul appears to them pecnliarly propitious and strongly invites to the commencement and prosecution of such a sys. tem of public imparement. To the pleasing pros. pect of peace abroad, we enjoy muttial confidence and tranquility at home; our resources are abundant; our public revenue ample; our citizens at all times evincing a willingness to make every sacrifice for the public good and on whom perfect reliance may be placed, more especially when the contributions required inust, when obtained and judiciously ap. plied, promote their own interest, and add in an eminent tlegree to the wealth, comfort and safety of the nation; and it appears to your committee that the experience, dearly purchased in the laie war, should not be rerarded with indifference; much of the money expended in the necessary defence of the sea-board, 䟚; well as the lives of many valuable citizens, would have been saved to the nation, had a good inland water communication been made on our Atlantic frontier-the transportation of our armies, with all the mumitions of war to the most vulnerable points would have been facilitated, and the advantages of the enemy arising from the celerity of his movements by water greatly diminished; moreover, the products of the west and south, consumed in the east and north, could have been transported secure from the common hazards of a sea voyage, and in defiance of blockading squadrons, and thus the inhabitants of the United States dispersed over a vast territory, embracing various climates suited to the productions of all the necessaries and many of the luxuries of life, might even, in a state of war; rely with comfort and security on her own internal resources.

To these advantages that refer themselves more especially to a state of war, must be addied those, if possible, of a more imperative character that will at all times arise to the nation from an improved state of her roads and inland navigation. The penple of these United States are spread over an extensive territory, and that dispersion of inhabi tants is keeping full pace with the increase of population; and by a people thus dispersed, of different hahits and pursuits, and, in mally in stances, with discordant views, is the national sovereignty exercised, and its fundamental powers directed; for, politically speaking, there is in the United States but one order or grade known-thot of the preople; and hence arises the imperions necessity, in a govemment thus constituted, of tying toge ther the whole comimunity by the atrongest ligatures. This, sour commitfe believe, can be beat effecied by the conatruction of roads and canals; hy these newans commercial and sucial in eronurse will be made casy-industry, in all its branches erocouraged by the increased rewards bestowed on every exerion-the love of couthty will be awakeneci, and a laulable spirit of na ion il pride substitnted in place of sectional jeadonsi 4 -a commanity of interest ant feeling will prodnce muttai conflitiance and affiretion. Thus, being the perple, the na'ten ct have but one object in vi w -the continuaveanl premirlation of a giverimemt fonnded in efuily and justice, silminsiered fin the advantage of ath, and calentated in the calm ot prace to call firth, taents and indastry for the arcluth ion of property, anl in was the sureat guarantec for its. securaty and proleclim.

Will. these hencent olaservations on the wational up ertaree of interial impluvements, gour come mitice will endeavor tis liy before the senate a
general outtine of such public works, embracing the United States generally, and consulting, as far as praclicable, the interest of each section of the union; and which they conceive, in a further improved state of our national industry, may be completed without embarrassment to the operations of the treasury, or imposing additional burdens on the pcople.
On the subject of national roads, the first that presents itself, and of primary importance, is a turnpike from Maine to Louisiana, passing through the seat of the national government, and the principal citics and towns on this route.

Secondly; roads to connect the lighest navigable points on the Atlantic rivers, with such points on the corresponding streams that fall into the northern and western lakes, and the Mississippi river and its branches. And lastly, such military or other roads as may serve to comnect the scattered settlements in our states or terrioories, with the more compact population of the interior, and thereby secure the frontier settlements, in a great measure, from hostile annoyance, and ewhance the value of the public lands by inducing a more dense popu. lation.

The other branch of this system of public improvement, and equal, if not superior in importance, is the construction of canals, and the improvemens of the navigation of our rivers.

1st. An illand ur sline navigation from the harhor of Boston, to the river St. Mary's, in Feorgia -to connect these points, it is ascertained that not more than 100 iniles will neel the aid of canals, and from an estimate made by Mr. Gallatin when secretary of the treasury, wiil incur an expence little exceeding $3,000,000$ of dollars, less it is belicved than 200 dollars per mile, taking the whole distance of this water commurication.
21. A canal from the Iludson or North river to lake Eric, and from that lake to some of the many navigable witers of the Ohio river, which approach within a few iniles of its margin or intermix with its navigable waters.
3 d . The improvement of the navigation of the Ohin river, more particularly the falls at Loniswille. 4th The improvement of the several Allantic rivers, and the corresponding streams that empty into the Mississippi and Ohio rivers.

## CONGRESS.

SENATE.
Wedresdcy, Feb . 19.-The bill for establishing a bank in the city of Washington was postponed to a day beyond the session.

The bill "respecting the transportation of persons of color for sale, or to be held to labor," was read a third time, and passed.

The bill to provide for reports of the decisions of supreme court, (the blank for the annual compensa tion of the reporter having been filled with one thousand dollars) was read a third time and passed by the following vote.
YEAS. - Messrs. Ashmun, Barbour, Brown, Camphell, Chace, Daggett. Dana, Fromentin, Gaillard, Guldsborough, Hanson, Hardin, Horves, Howell, Hunter, King, Mason, of N. H. Mason, of Va, Morrow, Soble, Ruggles, Sintord, Smith, Stokes, Talbot Tais, Taslor, Thumpson, Tichenor, Truup-30.
III S.-Messrso Condit, Lacock, Macon, Roberts, Varnum, Wil-$\operatorname{son}-6$.

The senate resumed the consideration of the bill "respecting persons escaping from the service of their inasters."

On motion of Mr. Talbot, that the further consideration thereof be postponed to to-morrow week, it was decided as follows :

YEAS.-Messrs. Barbour, Brown, Camphell, Condit, Dagjett, Dana, Fromentin, Gaillard, Goldshorough, Hardin, Hunter, King, Macun, Mason, of Va. Sauford, Sinith, Stokes, Talbut, Tait, Thompson, Troup-31.
NAYS.-Messis. Ashmun, Chase, Hanson, Horspy, Howell, Lacock. Murruw, Noble, Ruberts, Ruggles, raylur, Ticlenor, Varnum, Wil$3 \times 1-14$.

The bill to incorporate the Columbian Institute was postponed to a day beyond the session. The hill to establish a separate territorial government in the Mississippi territory was ordered to a third reading-[passed next day.]

Thursoluy, Fel. 20.-The motion yesterday submitted by M:. Williams, calling for papers respectjug Spanish affairs, was considered and agreed to.

The bill to set apart and dispose of certain lands for: the encouragement of the cultivation of the vine and other exotic plants, was considered and ordered to be read a third time, [passed next day] 29 yeas to 5 nays.
[Those who voted in the negative were Messrs Dagget, Hardin, Mason, of N. H. Ruggles, and Smith.]

Friday, Feb. 21.-The proposition to reduce the army was postponed until Monday. Eight bills from the house of representatives were read.

The bill concerning the navigation of the United States, was read a third time and passed.
[The amendments to this bill yet require the concurrence of the other house.]

The bill to provide for the appointment of hospital surgeons, \&c. in the navy, was postponed to a day beyond the session.

Saturday, Feb. 22-Mr. Williams, from the military committee, reported a bill to amend the act organizing a general staff, and making further pro vision for the ariny of the United States.

Mr. Afuson, of Va. reported a bill to incorporate the subscribers to certain banks in the district of Columbia, and also a bill to extend the charters of certain banks in the district of Columbia.

Mr. 'Tuit, agreeably to notice, leave being given, introduced a bill to alter the time for the next meeting of congress.

The bill to set apart certain lands for the purpose of securing a supply of live oak timber for the navy, was resumed, and ordered to a third reading, as were two or three other small bills.

The bill from the other house, directing the ap plication of the bomss and profits of the United states stock in the national bank, to tl:e purpose of
internal improvement, was set apart and inade the order of the day for Theaday next.
[Every senator of the United States is, at the present moinent, at his post; in number thirty eight. This is an evidence of exclusive attention to public duties, not of iell witnessed.]

Monday, Feb. 24.-Among the bills passed were the following:

A bill to provide for the punishment of crimes and offences committed within the Indian boundaries. [On this bill the vote, by yeas and nays, was 17 to 13.]

A bill making reservation of certain public lands to supply timber for naval purposes.
A bill relating to the ransom of American captives in the late war.
The bill more effectually to preserve our neutral relations, was reported by Mr: Burbour, from the committee on foreign relations, with sundry amendments.
T'uesclay, Yeb. 25.-The senate resumed the consideration of the resolution to direct the military committee to report a bill to relluce the army; and, Mr. Burbour, having moved to postpone the same indefinitely, the question thereon was decided as follows.
YEAS. - Messrs. Barbour, Brown, Campbell, Chace, Condit, Fromentin, Gaillard, Hansum, Howell,' Hunter, King, Lacock, Mason, of Va. Morrow, Noble, Roherts, Ruggles, Sanford, Stokes, Tait, Taylor, Troup, Willians, Wilson-24.
NA YS. - Messrs. Ashmun, Daggett, Dana, Goldshorough, Hurses, Macon, Mason, of N. H. Smith, Tlompson, Tichenor, Varnun-11. So the resolution was rejected.
The bill freeing from postage all letters and packets to and from James Madison, was read a thiid time and passed.

Wednesllay, Feb. 26.-After a variety of other business, tise senate spent some time on the bill to set apart the bonns, \&cc. of the United States bank, as a fund for internal inprovements. A motion to postpone it indefinitely was negatived-18 to 19 .

## house of hepresentatives.

Friday, Feb. 21.-Mr Jackson offered the following resolution, which he stated grew out of the report made a few days ago by the committee on the part of this house on the subject.

Resolved, 'That a committee be appointed on the part of the house of representatives, to notify the holl. James Monroe, of his election to the office of presi dent of the United States for the ensuing four years; and that the speaker cause a similar notice to be given to the hon. Daniel D. Tompkins, of his election to the office of vice president of the United States for the same term.

The resolution being read, was agreed to and a committee appointed accordingly.

M1. Hulbert, from the select committee to whom the petition of the Berkshire agricultural association had been referred, reporced a bill to establish a national board of agriculture; which was twice read and committed.

The house proceeded to the order of the clay, being the proposition to repeal the internal taxes. The previous question was called, but negatived; and finally the resolution was postponed to the 2nd day of March, or laid on the table for the session. On the postponement the yeas and nays were as follows:
Yeas-Messrs. Adgate, Alexander, Archer, Atherton, Baker, Barbour, Bassett, Bateman, Bennett, Betts, Birdseye, Breckenridge, Brown, Caldwell Calhoun, Carr, Mass. Chappell, Clark, N. Y. Clark, N. C. Condict, Conner, Creighton, Croeheron, Findley, Forney, Forsyth, Ciaston, Gold, Giriffin, Hahn, Harrison, Heister, Hopkinson, Huger, Hulbert, Ing-
ham, Irving, N. Y. Jackson, Johnson, Ǩy. Kent, Kierr, Va. Little, Lowndes, Lumpkin, M•Lean, Middleton, Miller, Mills, Milnor, Jer. Nelson, Thos. M. Nelson, Newton, Or-nsby, Pickering, Pleasants, Rice, Robertson, Tloss, Ruggles, Savage, Schenck, Smith, Penn. Southard, Stearns, Taggart, Tallmadge, Taul, Taylor, N. Y. Taylor, S. C. Telfair, Thomas, Townsend, Ward, Mass Webster, Wendover, Wilde, Wil kin, Willoughby, Thos. Wilson, Woodward, Yancey, Yates-82.
Nars-Messrs. Adams, Baylies, Birdsall, Blount, Boss, Bradbury, Bryan, Burwell, Cady, Cannon, Champion, Cilley, Clayton, Clendennin, Comstock, Cook, Cooper, Crawforl, Culpepper, Davenport, Desha, Dickens, Edwards, Fletcher, Goldsborough, Bale, Henderson, Hendricks, Herbert, Hooks, Hungerfird, Jewett, Johnson, Va. Kilbourn, King, Langdon, Law, Lewis, Love, Lyle, Lyon, Wm. Macklay, Wm. I'. Maclay, Marsh, Mason, M'Coy, M'Kee, Moffit, More, Mosely, Mug's Nelson, Noyes, Parris, P'eter, Pitkins, Piper, Powell, Reed, Roane, Sharp, Smith, Va. Strong, Stuart, Sturges, TJler, Fose, Wallace, Ward, N. Y. Ward, N. J. Wheaton, Whiteside, Wilcox, Williams-73.

The following engrossed hills were severally read the third time, passed and sent to the senate for concurrence, to wit: the bill making provision for the support of the military establishment of the United States for the year 1817; the bill making additional appropriations to defray the expences of the army and military during the late war; the bill making approprintions for the support of the navg for the year 1817; the hill freeing from postage, hereafter, all letters and packets to and from James Madison; the bill supplementary to the act further to amend the several acts for the establishment of the treasury, war, and navy departiments; the bill to repeal the act providing tor the safe keeping and accommodation of prisoners of war; the bill con cerning the compensation of the district attorney for the district of Massachusetts; and the bill to authorise the extension of the Columbian turnpike within the District of Columbia.

The bill respecting the establishment of an armory on the Ohio, or its branches, was postponcd in-definitely-ayes 70.

Miny reports were received from different committees, and much other business was transacted, which shall be noticed in its progress.

Saturlay, Feb. 52-Mr. Forsyth, from the committee on foreign nolations, reported their agreement in the anendments made by the senate to the bill comecrning the navigation of the United States, and they were then concurred in by the honse.

Mr. Cannon inoved that the several orders of the day be postponed io Monday, and that the house proceed 10 the consideration of the resolution offered by him soine weeks ago, to reduce the armywhich motion was negativell, ases 39 , noes 69.

The following engrossed bills weleseverally read the third time, prassed and sent to the semate, io wik:

The hill concerning invalid pensioner4:
The bill io amend the act making further provi. sion for military services during the late war; and

The bill concerning the pay and emoluments of brevet officers.

The last was warmly opposed by Mr Hirrison.
The bill concerning invalids of the revelutinary war, and of the widows and clitdren of the militia, abd of the soldiers of the ariny churing the late war, was indefiniely postponed, after cupsiderable dis. cusquon.

The bill for opening a road through the Chickasaw country was ordered to be engrossed for a third reading.
Mr. Goldsborough, from $t^{\prime}$ e crimmittee appointed on the 20 th instant, to present a resolution to the president of the United States, requesting him to report to the next session of congress the best practicable mode of defending the waters of the Cliesa. peake, reported that the committee liad perforined that duty, and that the president answered it would not be in his power to comply with the request of the resolution, but that he had no doubt his successor would pay all due attention to it.

- Monday, Feb. 24.-The bill for the establishment of an invalid corps and the bill making provision for three additional military acallemies were inclefinitely postponed; as was also the bill to ablish an uniform system of bankruptcy.
The bill from the senate to enable the people of the western part of the Mississippi territory to form a constitntion and state governinent, \&c. was after considerable opposition, ordered to be engross: ed for a third reading.
Among the bills passed were the following:
A bill to amend the act entitled "an act granting bounties in land and extra pay to certain Canadian volunteers" passed on the sth March, 1316.
And the bill fiom the semate for the relief of the representatives of Jonn $\mathbf{V}$. larnall.

Tiuesday, Freb. 25. Much business was done. The most important regarded the sinking fund as follows:
The house resolved itself into a committee of the Whole, Mr. Jackson in the chair, on the bill for the redemption of the public dlebt. [Providing, suthstantially, to make the sinking fund ten millions aunually ; and 10 add to the fund of ten millons, the further sum of nine millions, (the existing surplus in the treasury;) thus making the whole sum applied this year to the reduction of the debt, amount to nineteen millions of dollars. Also, authorising the secretary of the treastury, at any time during the present year, io pay the coinmissioners of the sinking fund the firther sum of four millions, to be considered as an advance to that anount on the appropriation of ten millions, payable in the next year. Alin, vesting in the commissioners of the sinking fimd, to be applied to the redemption of the debt, any sirplus wlich may hereafter accrue, over and above :he suin of two millions, to be always retained in the treasit. ry.]
The blanks were filled up-it was afierwards tak. en up hy the honse and afier some opposition, and the rejection of some propoved amenlments, ordesed to be engrossed for a thind reading.

Hedmesiduy, Feh. 26. - The bill from the senate, respectung the Vississippi öcrritory was pased. I great deal of other business, preparatory to a close of the sessinn was transacied, unt necessitry to detail it at present.
Thursday, Feb. 27. The committee on the charg ${ }^{-}$ es against judige Toulmin, an the ground that there was un proof of the charges made against himb, were discharged from the further consideration if the subject. The repurt shall be inserted hereafter.
Sicveral bills were ordered in be read the thir l time: among thein was the bill fir diypnsing of four townahips of land, onf favorable trius in emigrants, ti) encourage the cultuvation of the tine and olive. kc.

Many privabe bills were passe it.

## Foreign Articles.

There have been several arrivals from Europe since our last, by which, English papers of about the iniddle of December, and French of the latter end of that month have been received. We hat prepared a distinct acconnt of their contents, but so the necessity of the case is, that the matter must be deferred. They contain, however, nothing important. There had been a great riot, or "insurrec. tion" in Lomton on the 2nd of Dec. Which was quelled in the usual way-by the military. The city of London has addressed the prince regent in a manner so bold and explicit as to cause liun to say in his reply thit he received the address "with surprise and regret." The duke of Wellington has suddenly arrived in Fingland, even unknown to his wife, and speculation is afloat as to the object of his journey-but all appears trançuil in France, and the most important feature of the news fiom that comutry seems to be, that-the king, by overeatine. or from some other cause, was sick.

Whiscever is useful for record shall be attended to next week.

## CHRONICLE.

Q. 1). Tomphins resigned the office of governor of tiue state of New. York, about the 20th instant, being elected vice-president of the United States.
Iearl. - The valuable lear mines, on inth sides of Whe Misisippi are now worked very extensively, and to great profit.

Faxchange.-At New York, Feb. 22-on London, 101 to $101 \frac{1}{2}$; on Boston, 1 per cent. advance. Philadelphia, par to $\ddagger$ dis.; Baltimore, $\frac{3}{4}$ dis.; Virginia and North-Carolina, $\frac{1}{2}$ dis.; South-Carolina and Georfia, par; New-Orle:uns, 2 dis.

- Mediterranean squalron.-Our last accounts state that our squadron was at Syracuse.

The brig Tom Bowline is reported in the Mississippi, proceedinf to New-Orleans, in company with a Carthagenian privateer, as her prize. No particulars stated.

One 74 gun ship is building at Washington City, and $i t$ is stated that the keels of two others will be laid at New-York and Norfolk. Some frigates are also to be built.

The spacious tavern and stage house, at Havre de Frace, oceupied by Mr. Gilbert, recently took fire at $20^{\prime}$ clock in the morning, and was entirely consumed. There were in all about 40 lodgers in the house, some of whom escaped with great difficulty, and with ennsiderable damage, by leaping from wimdows, \&c. Among the lodgers was maj. gen. Brozm and his suit, who lost all his baggage.

Mr. Milligan, of Georgetown, D. C. has advertised A 'rreatise on Political Econom!, translated from an unpublished work, by the count Destutt Tracy, nember of the senate and institute of France. The rason given for publishing this work in a translation, and in this comntry, is that the alithor corld not safely publish it, at present, in France without mutilation. He preferred first giving it to a comm try, "which is afriaid to read nothing, and which may be entrusted with any thing."

Baltimore city. The lerislature, at its late sitting, passed an act to annex the Precincts, as they were called, to the city of Baltimore, against the consent of nine-tentis, perhaps, of the people of both. By this procedure the city acquires a pounlation of 16 or 17,000 souls; and still has only two members in the house of delegates-a fortict? part of the pow. er of legislation, and a fif $h$, if not a fourth, of all the white persons in the whole state.

The mere adrition thus marie to Foltimere cits, for population or value of property, is far greater than that of any one of seven or ei,hit of the counties of the state, aid equal, of superior, to that of two several p-irs of milited coumties-. 33 ut each county sends funr members to the legislatula. This is Maryland representation.

Of the political motives thet $1 \mathrm{Cl}^{1}$ in this pracedure, it does not belongr to this work to say aos thing.

Pennsyizania-At the late clection fir state trea. surer, the joint ballot of the legishature stond thins -for" Wm. Vindlay, "rep.," 82; James Brady, "fed." 20; James Whitelill, "(old-school," 10.

Imprisnmment for dobe. -1 bill is before the legislature of New- York for abolishing imprisonment for debt. The cerlificates published abont the hardships suffered by this class of society in that slate are ahmost beroid beliei-it appears that they are dependent wholly on charity for subsistence aud the means of keeping them from perishing with the cold. In the year 1816 there were confince! in the jail of New- York 579 debtors, for clebts under the sum of 25 dollars-all, or nearly all of whom must have starved, but for charitable donations- 1100 deluors in that year were fed by the Humane socie-ty!-Such is the substance of certificates of the sheriffs, \&c.

## Senate of the United States.

According to the theory of our grovernment, and the general impression on that subject, the senate of the United States, whose members are clinen for six years, should be the most permanent and least changeable of the branches of the government. On this ground hostility to the senate has been entert:ined by many good men, as possessing greater power, and being more permanent in its character than is consistent with the democratic prind ciples of our government. A few facts on this subject, will shew what in practice, is the character of this branch of the government.
It is well known that the senators are arranged into three classes; one of which goes out of office at the end of each congress. Of the class whose term of service expires on the Sd of March next, but one will take a seat in the senate on the 4th of March next (Mr. Williams of Temessee) and that one temporarily appointed by the exccutive of the state which he represents.
Of those who composed the senate on the 4 th of March, 1813, four years ago, but five will tal:e their seats as senators on the 4 th day of next month.
From the fourth day of March, 1813, th the 4 .th March 1817, inchusive, there will have been the number of persons which follow in the office of senator from the respective states, each state being entitled to two representatives in the senate. There will have been, fir example, from

## New-Hampshire

## Vermont

Massachusetts
Rhode Island
Conmecticut
New-York
New Jersey
Pennsylvania
Delaware
It is presumed our readers will find in these facts the evidence of a inore frequent rmovation of the senate, of a more continued rotation in oflice in that. body, than any of them without inquiring would have supposed. - Nat. Fint.

# NILES' WEEKLI REGISTER 

## The Inanguration.

washtvgtor, marrh 3.
The fillowing letter was received by the sellate froin the president elect, and read:

Cimof Mashington, - Warch 1, 1817.
Sir-I beg lese through you to inform the lionovable senate of the United States, that I propose in take the oath which the constitntion prescribes in the president of the United States before he enters on the execution of lis oflice, on Thesclay, the 4 th int at 13 rolook, in the chamber of the tronge of representatives.

I h.ve the linnor to be, with the greatest respect, vir, zour most obedient humble servant.

> NAMES MOVROF.

The hone John Gaillard, presidens of che senate of the UU. Stares.
Order of arrangement on the fourth of March, 1817 : determined on by the committee of the senate.
The senate will meet and be arganizerl in the senate chamber at 11 o'clock, A. M. and remove to the chamber of the house of representatives in time to receive the president elect at the appointed hour of $12 o^{\prime}$ clock.

The committee of arrangement will receive the president eiect at the door of the chamber of the botse of representatives, and conduct him to the cbair.

The president elect will be attended by hearls of departments, marshal of the district, inarshats of the day, and the mayors of the district.
The president of the senate, with his secretary, to be seated on the right of the chair, the ex-president on his right, and the speaker of the house of representatives on his left.
The heads of departments to be seated on the right, and the foreign ministers, with their suites, on the left of the chair.
The jurlges of the supreme court to be seated at the table in front of the chair.

The senate to till the seats iminediately in front.
Members of congress, and such persons as, by the standi:ig rules of congress, are admitted in a seat within the chambers, will occupy seats on the Hoor.
Lidies will be aceommodated with seats in the chamber to the utmost extent, consisient with the preceding arrangements.

The end door of the gallery will be open for the accommodation of cilizems gencrally.
No other persons than those before specified can be recrived on the floor of the cliamber; and offieers will be appointed to enforce these rigulations. If ashingion, - larchi 5.
Under the autpicen of a delightifil day, jesterday tork place the interesting cercinony attendant on the entrance of the president elect of the Unit ed Stases, on the duties of his ardimus station. The ceremony and lise pectacle were simple, but grand, animating and impressive
At hatf uf er 11 w'clock, the prenitent, with him the zuce presilknt clect, Icfi his private residence, zetended hy a large cavalemle of citizenw on horse back, marshalled by the gemilemen appointed to that iluty.

Vos. K

The president reacheal the congreas-liall a litele before 12 ; and at the same tine the ex-presilent arrived, and the judges of the supreme court. All haviug entered the chamber of the senate, then in session, the vice-president took the chair, amd :lie oath of office was ad:ministere l in him. A pertinent addreas was delivered on the occavion by the vice president.

This ceremony haviug ended, the senate actjourned, and the presilemt and virce ?mesiden, the judiges of the supreme court, the senise gotic rally. the marshals, \&cc. attended the pren lent io the elevated portion temprorarily e:ected for the oce cion, where, in the presence of an immense concourse or officers of the government, foreign officers, st-angers, (ladies as well as genilement) and citizens. the president rose and dolivered the following

SPEECH.
I shonld he destitute of $f$ eling if $I$ was $n 0$ deen. Iy affected by the strong propf whic. inv f. 11 ow-citizens have given me of their confidence, in call. ing me to the high office, whose fimctin:s 1 am abont to a-sume. As the expression of their gron opinion of iny conduct in the public service, I derive from it a gratification, which those who are conscious of having clone all that they could to merit it, can alone feel. My sensibility is increased by a just es'imate of the importance of the trust, and of the nature and extent of its duties: with the proper ciischarge of which the highent interests of a great and free perple are intimately connected. Conscious of my own deficiency, I callnot enter on these duries without great anxiely for the result. From a just resnonsibility I wiid never shrink; calculating with confilence, that in iny be-t efforts to promote the public welfare, iny nintivey will always be duly appreciated, and my conluct he viewed with that candor and indulgence which I have experienced in other stations.

In commencing the dutses of the chicf executive office, it has been the practice of the distingnisha! inch who have gone before me, to explain the principles which would govern them in their respectiv administrations. In following their vereratwl er ample, iny attention is naturally crawn to the gre it calses which have contributed in a princinal dgree, to produce the present happy con lition of tios United States. They will best explain the natura of our duties, and shed much light on the policy which ouglit to be pursued in future.
From the commencement of our rerolition in th present day, nlmost forty years have clapsel, ant from the extablishment of this constitution, twente eight. Through this whole term, the governmem has been, what inay emphatically be callo, solf government; and what has been the effect' ' $\%$ whatever object we tura our attention, whelo it relates 10 our forcign or domestic concerns, W- fiy ubuadant cause to felicitate ourscoes in the esu tence of our institutions. Waring a perlot frame. with difficulties, and marked by reis extrao dia eventr, vie Lintel Staten have flourision! bevan example. Tieir cilizens, individh.ald, have b happy, and the nation prospresous
Under this constitution our commerce hats be wisely regulated with foreign nations, and betwe:-
the states; new states have been admitted into our union; our territory has been enlarged, by fair and honorable treaty, and with great advantage to the original states; the states respectively, protected by the national government, under a mild parental system, agains: foreign dangers, and enjoying with. in their separate spheres, by a wise partition of power, a just proportion of the sovereignty, have improved their police, extended their settlements, and aitained a strength and maturity which are the hest proofs of wholesme laws, well administered. And if we look to the condition of individuals, what a proud spectacle does it exhibit! on whom has oppression fallen in any quarter of our Union? Who has been cleprived of any right of person or propeety? Who restrained from offering his vows, in the saode which he prefers, to the Divine Author of his being? It is well known that all these blessings have been entored in then fillest extent; and I acd, wilh pecu!ive sitisfaction, that there has been nh example of a capital punishment being inflicted on any one for the crime of high treason.

Sune, who might admit the competency of our各: emment to these beneficent duties, might doubt $i$, in trials, whici put to the test its strength and efiiciency, as a member of the great community of nations. Here, too, experience has afforded is the most satisfactory proof in its favor. Just as this constitution was put into action, several of the principal states of Europe had become much agitated, and some of them seriously convulsed. Destructive wars ensued, which have, of late only, been termiminated. In the course of these conflicts, the United States received great injury from several of the parties. It was their interest to stand aloof from the contest, to demand justice from the party committing the injury, and to cultivate, by a fair and honorable conduct, the friendship of all. War became at length ineritable, and the result has shewn that our govermment is equal to that, the greatest of trials, under the most unfavorable circumstances. Of the virtue of the people, and of the heroic explits of the army, the navy, and the militia, I need not speak.

Such, then, is the happy government under which we live; a government adequate to every purpose for which the social compact is formed; a government elective in all its branches, under which every citizen may, by his merit, obtain the highest trust recognized by the constitution; which contains within it no cause of discord; none to put at variance one portion of the community with another; a government which protects every citizen in the full enjoyment of his rights and is able to protect the nation against injustice from foreign powers.

Other considerations, of the highest importance, adinonish us to cherrsh our mion, and to cling to the government which supports it. Fortunate as we are, in our political institutions, we have not been less so in other circumstances, on which our prosperity and happiness essentially depend. Situated within the temperate zone, and extending through many degrees of latitude along the Allantic, the United States enjoy all the varieties of climate, and every production incident to that portion of the globe. Penetrating, internally, to the great lakes, and beyond the sources of the great rivels which communicate through our whole interior, no country was ever happier with respect to its domain. Blessed too with a fertile soil, our produce has always been very abundant, leaving, even in years the least favorable, a surplus for the wants of our fellow-men in other countries. Such is our peculiar felicity, that there is not a part of our
union that is not particularly interested in preser*ing it. The great agricultural interest of the nation prospers under its protection. Local intereste are not less fostered by it. Our fellow citizens of the north, engaged in navigation, find great encouragement in being made the favored carriers of the vast productions of the other portions of the United States, while the inhabitants of these are amply recompensed, in their turn, by the nursery for seamen and naval force, thus formed and reared up for the support of our common rights. Our manufacturers find a generous encouragement by the policy which patronizes domestic industry; and the surplins of our produce, a steady and profitable market by local wants, in less favored parts, at home.

Such, then, being the highly favored condition of our country, it is the interest of every citizen te maintain it. What are the dangers which menace us? If any exist, they ought to be ascertained and guarded against.
In explaining my sentiments on this subject, it may be asked, what raised us to the present happy staie? How did we accommplish the revolution! How remedy the defects of the first instrument of our union, by infusing into the national government sufficient power for national purposes, without impairing the just rights of the states, or affecting those of individuals? How sustain, and pass with glory through the late war? The government has been in the hands of the people. To the people, therefore, and to the faithful and able depositories of their trust, is the credit due. Had the people of the United States been educated in different principles; had they been less intelligent, less independent, or less virtuous, can it be believed that we should have maintained the same steady and consistent career, or been blessed with the same success? While then, the constituent body retains its present sound and healthful state, every thing will be safe. - They will choose competent and faith. ful representatives for every department. It is only when the people become ignorant and corrupt; when they degenerate into a populace, that they are incapable of exercising the sovereignty. Usurpation is then an easy attainment, and an usurper soon found. The people themselves become the willing instruments of their own debasement and ruin. Let us then look to the great cause, and endeavor to preserve it in full force. Let us, by all wise and constitutional measures, promote intelligence amoug the people, as the best means of preserving our liberties.
Dangers from abroad are not less deserving of attention. Experiencing the fortune of other nations, the Uniterl States may again be involved in war, and it may in that event be the object of the adverse palty to overset oul government, to break our union and demolish us as a nation. Our distance from E,urope, and the just, moderate and pacific policy of our government may form some security against these dangers, but they ought to be anticipated and guarded against. Many of our citizens are engaged in commerce and navigation, and all of them are in a certain degree dependent on their prosperous state. Many are engaged in the fisheries. These interests are exposed to invasion in the wars between other powers, and we should disregard the faithful admonitions of experience if we did not expect it. We inust support our rights or lose our character, and with it perhaps our liberties. A people who fail to do it, can scarcely be said to hold a place among independent nations. National honor is nationat property of the

## NILES' WEEKIY REGISTER-THE INAUGURATION.

Lighest value. The sentiment in the mind of every citizen, is national strength. It ought thereforc to be cherished.
To secure us against these dangers, our coast and inkind frontiers should be fortified, our army and navy regulated upon just principles as to the force of each, be kept in perfect order, and our militia be placed on the best practicable footing To put our extensive coast i:a such a state of defence, as to secure our cities and interior from invasion, will be attended with cxpence, but the work when finished will be permanent, and it is fair to presume that a single campaign of invasion, by a naval force, superior tc our own, aided by a few thousand land troops, would expose us to a greater expence, without takirg into the estimate the loss of property and distress of our citizens, than would be sufficient for this great work. Our land and naval forces stoould be inoderate, but adequate to the necessary purposes. The former to garrison and preserve our forlifications and to meet the first invasions of a foreigu foe; and, while constituting the elements of a greater force, to preserve the science, as well as all the necessary implements of war, in a state to be brought into activity in the event of war. The latter, retained within the limits proper in a state of peace, might aid in maintuining the neutrality of the United States vith dignity in the wars of other powcrs and in saving the pro. perty of their citizens from spoliation. In time of war, with the enlargement, of which the great naval resources of the country render it susceptible, and which should be duly fostered in time of peace, it would contribute essentially, both as an auxiliary of defence, and as a powerful engiae of annoyance, to diminish the calamities of war, and to bring the war to a speedy and honorable termination.
But it ought always to-be held prominen tly in view, that the safety of these state3, and of every thing dear to a free people, inust depend, in an eminent degree, on the militia. Invas:ons may be made too formidable to be resisted by any land and maval force, which it would comport, either with the principles of our government, or the circumstances of the United States, to maintain. In such cases, recourse must :e had to the great body of the people, and in a manner to produce the best effiect. It is of the highest importance, therefore, that they be so organized and trained, as to be prepared fo any emergency. The arrangement should be sucl: as to put at the command of the government the ardent patriotisin, and youthful vigor of the country. If formed on equal and just principles, it camot be oppressive. It is the crisis whiclı makes the pressure, and not tire laws, which provide a remody fur ii. This arrangement should be formed, too, in time of peace, to be the better prepared for war. With such an organization, of such a people, the United States have nothing to aread from forrign invasion. At its approach, an overwhiclming force of gallant men might always be put in motion.
Other interests, of ligh impurtance, will clain attention; among which, the improvement of our country, by roads and canals, proceeding always with a constitutional sanction, holds a distinguished place. By thus facilitating the intercourse between the stater, we shall add much to the convenience and comfort of our fellow.citizens, much to the ornament of the commery; and, what is of greater in portance, we shall shorten distances, and by making each part more accessible to and dependent on the other, we shall bind the union more closely together. Nature han dane ss mucte fop ur by inter.
secting the country with so many great rivers. and lakes, approaching from distant points so ne: each other, that the inducement to complete th Work seems to be peculiarly strong. A more interesting spectacle was, perlhaps, never scen, than is exhibited within the limits of the United States; a territory so vast, and advantageously situated, containing objects so grand, so useful, so happily connected in all their parts.
Our manufactures will, likewise, require the systematic and fostering care of the government. Poissessing, as we do, all the raw materials, the fruit of our own soil and industry, we ought not to depend, in the degree we have done, on supplies from other countries. While we are thus dependent, the sudden event of war, unsought and unespec:ed, cannot fail to plunge us into the most serious dif. ficulties. It is important, too, that the capital which nourishes our manufactures should be domestic, as its influence in that case, instead of exhaustings, as it may do in foreign hands, would be felt adviauta. geously on agriculture, and every other branch of industry. Equally important is it, to provide at home a market for our raw inaterials, as by extending the competition, it will enhance the price, and protect the cultivator against the casualties incident to fo. reign markets.
With the Indian tribes it is olir cunty to cultivate friendly relations, and to act with kirdness and liberality in all our transactions. Equally proper is it, to persevere in our efforts to extend to thein the advantages of civilization.
The great amount of our revenue, and the flourishing state of the treasury, aro a full proof of the competency of the national resources, for any emergency, as they are of the willingness of our fellow. citizens to bear the burthens which the public neeessities require. The vast amount of vacant lands, the value of which daily augments, firms an addlitional resource of great extent and duration. These resources, besides accomplishing every other necessary purpose, puts it completely in the power of the United States to discharge the national debt at an early period. Peace is the best time for improve. ment, and preparation of every kind: it is in peace that our commerce flourishes most, that taxes are most easily paid, and that the revenue is most pro. ductive.
The executive is charged, officially, in the departments under it, with the distursiment of the public money, and is responsible for the faitliful ap. plication of it, to the purposes for which it is raised. The legislature is the watelfoll gurrdi..n over the pubiic purse. It is its duty to see that the disbursetnent has been hunestly made. To muct the requi. site responsibility, every facility ohould be affond ed to the executive, to enable it to hring the public agents entrusted with the public mones, striculy and promptly to account. Nothing should be presimed against them; but if, with the requisite ficilities, the public money is suffered to lie long and :selessly, in Ueir hands, they will not be the only defaulters, 110r will the demoralizing effect be confineri to them. If will evince a relaxation, and want of tone in the aid. ministration; whichs will be felt by the whole community. I shall do all that I can to secure ecomomy and fidelity in this important branch of the adminis. tration, and I doubt not, that the legialature will perforin its duty with equal zeal. A thorough examination should be regularly made, and I will proinnte it.
It is particularly gratifying to me, to enter on lle clischarge of these duties, at a time when the

## NILES' WEEKLY REGISTER-SATURDAY, MAたCH 8, 1817.

ited States are blessed with peace. It is a se e mili ary nonors, by the marine corps, by tiae Geor te

It will be my sincere devire to preserve it, so far as derends on the cxecutive, on just principles, with all ndtions, claiming nothing unreasonable of anr, and rendering to e.ch what is its due.
Equally sratifying is it to witness the increased framony of opinion which pervades oun mion. Discord Jues not belong to orir system. "ninn is reemmmended, as well by the fiec and benizn priaciples of our government, extending is blessings to every individual, as by the other eminent advantarges at. tending it. The American people have encomered together great dangers, and sustained severe trials with success. They cons'itute one great family, with a common interest. Experience has enlight ened us on sume questions of essential importance to the country. The progress lias been slow, dic tited by a just reflection, and a faithful regard to every interest connec ed with it. To promite this harmony, in accord with the principles of our repuls lican government, and in a manner to give then the most complete effect, and to advance, in all other respects, the best interests of our country, will be t.ie object of my constant and zealous exertions.

Never did a government commence under suspices so farorable, nor ever was success so complete. If we look to the history of other nations, ancient or modern, we find no example of a growth so rapid so sigantic; of a people so prosperous and happy. In contemplating what we hive still to perform, the heart of every citizen must expand with joy, when he reflects how near our government has approached to perfection; that in respect to it we have no essen tial improvement to make; that the great ohiect is to preserve it in the essential principles and features which characterize it, and that that is to be done by preserving the virtue and enlightening the minds of the people; and, as a security agsinst foreign dangers, to adopt such arrangements as wre indispensable to the support of our independence, our rights and liberties. If we persevere in the career in which we have advanced so far, and in the path already traced, we cannot fail, under the fa vor of a gracious Providence, to attain the high des tiny which seems to await us.

In the arlministration of the illustrions men who have preceded me in this high station, with some of whom I have been comneoted by the closest ties from early life, examples are presented which will always be found highly instructive and useful to their successors. From these I shali endeavor to derive all the advantases which they may afford. Of my immediate predecessor, under whom so important a portion of this great and successful experiment has been made, i slall be parioned for expressing my earnest wishes, that he may long enjoy in his retirement the affections of a groteful contiry, we best reward of exalted talents, and the most failhfitl and incritorions services. Relying on the aich to br derived from the other departinents of government, 1 enter on the trust to which I have been called by the snftiages of my fellow cilizens, with my fervent prayers to the Almighty thit he wi be fraciously pleased to continue to lis that protection which lie
has already eo conspicuonsly displayed in our favor.

Having enncluded his address, the oath of ofice
was administered to lim by the chief justice of te United Sates. The oath was announced by a single gun, and followe $l$ by salutess from the nas yryard, the battery, from fo:t Warburton, and from several pieces of artillery on the ground.

The president was reccived on his arriral, with
town riflemen, a company of artillery; and two companies of infantry from Alexandria; and on his return was saluted in like manner.
It is impossible to compate with any thing like accuracy the number of carriages, horses, and persons present. Such a concourse was never befnre seen in Washington; the number of persons present being estimated at from five to eight thousand. Tie mildness and ralliance of the day cast a brilliant lime on the complexion of the whole cercmony; and it is satisfactory to say, that we heard of no accident during the day, notwithstanding the magnitude of the assemblage.
The president and his lady, afier his return, received at their dwelling the risits of their friends, of the heads of clepartments, most of the senators and representatrer, of all the foreign ininisters at the seat of governinent, of strangers and cilizens; who aloo generally paict the tribute of their unabated respect to Mr. and Mrs. Madison.
The evening concluded with a splendid ball at Davis's ho el; at which were present the president and ex-president and their ladies, the heads of de. partments, foreign minist ers, and an immense throng of strangers and citizens.

Address of the vice-president to the senate, after having taken the oath of office on the fourth day of March.

## Gentlenen of the senate:

In entering the office of vice-president, I bes leave to offer a public acknosvledgement of the honor conferred upon me by the people of the United States, by placing me next in their confidence In that illustrious citizen whose patriotism, virtue, and eminent pulflic selvices, receive this day the highest reward that a free people can bestow.
I assume the duties assigned me in the senate, with the greatest diffidence, arising from a conciousness of my inexperience in the forms of deliberate assemblies; and when, at the same time, I reflect that this chair has hitherto been adorned by men of the first distinction for experience, talents and character, I am oppressed by the magnitude of the responsibility which now devolves upon me.
My heart assures me that I may promise upright intentions, zealous industry and rigid impartiality. If aught beyond these shall merit approbation, it will be justly ascribed to the wisdom and mag. nanimity of the members of this dignified bodyand upon that wisdorn and magnanimity I entirely repose myself for guidance and support.

## Vice-presis.ent Tompkins.

The governor of New- York announced his election to the vice-presidency of the United States to the legislature and militia of the state, in the actdress and general order inserted below.

## Gentlemen of the senate and of the

Hssenuly of the siate of New Iork-
Having reccived afficial information of my election to the office of vice-president of the United States, I surrender, through their representatives, to the people of thisstate, the office of their chief masistrate.

Whether the influence of my official conduct on the prosperity, the securits, and the character of New-York may be regarded in a favorable or unfavorable light, I slall always hear with the highest gratification, that those who may succeed to the ad gratification, inat those who may succced to
ministration of its government sliall have far excelled
me in advancing the interests and the honor of the state.
A crowd of sensations are awakened by announcing this, my separation, from officers, legislators, and citizens, wh whom I have been so long associated, and who have yielded to me , on all occasions, the gre itest kindness, assistance and respect. When I call to mind that I was distinguished at an early age by a preference far beyond my merits, and reflect on the violent party collisions with which this state has been, unfortunately, too of en agitated during my administration; when I recollect the national difficulties and distress occasioned by the war in whic! we have been engaged, and call to mind the unbounded confidence, support, and indeed, parental solicitude, with which they sustained me in the midst of those most try ing scenes of my public life, and at the same time, reflect kow inarlequate and feeble have been my greatest exertions and my utmost devotions to their interests to repay the ob. ligation, my heart is overwhelmed with emotions which I have no power to express.
I shall bear with me through life a glowing recollection of the affection and gratitude I owe to the people of the state of New York; and that they may be blessed with perpetual happiness, prosperity and liberty, will ever be the warmest wish of my beart.

DANLEL D. TOALPKINS.
Albany, February 24, 1817.

```
state of new-rork. -Geseral orderg.
``` Head-nuarters, -9tbuny, 20th Feh 1817.
On the eve of his scparation from the officers and soldiers of the militia, the commander in chief of fers a sincere acknowledgrent for the confidence and support he has always received from them, and for the patriotism they have ex!ibited in the whole course of the late war. Deeply sensible how much the subordination and zeal of the militia of this state have contributed to advance its honor and fame, he would do injustice to himself and them were he not on this occasion publicly to proclaim his high sense of gratitude.

The conduct displayed at Plattsburg, Sackett's Harbor, and on the Niagara frontier, and especially in the sortie from fort Erie, has given the militury in this state a high rank amongst tite bravert ue. fenders of the country. The commander in chief entreats them to cherish and transmit to posterity that patriotic spirit which animated them to such noble deeds.
He will ever retain a lively recollection of their services in the most trying periorls, and of the respect and regard lie has uniformly received from them, and with the most devout prayers for the future prosperity and happiness of his fellow officers and soldiers of the militia of the state of New York, he bids them an sffectionate farewelf.
By arder of the commander in chief,
SOL. VAN BEXSSELEAR,
Adjutant-general.

\section*{Relations with Spain.}

Message from the president of the United States, transmitting the correspondence between the \(U\). States and the gove:nment of Spain, relative to the sibjects of controversy between the two na-tions.-February 22, 1817. Read and ordered to be printed for use of the senate.
To the semule of the United States-
I transmit to the senate a report of the secretary of state, complying with their resolution of the 20 th instant.

JIMES M I UISON
F'ebruatiy 22, 181~.

Departmest ot state, Feb. 22 c ,
The secretary of state, to who:n wis refeiz resolution of the senate of the 2uth instant, \(r\). ing "the president to lay befure the senate a of the correspondence between the governmen the United States and the goverameat of Spain relative to the subjects of controversy between the two nations, except such part as he may deen im. proper to disclose," has the honor to submit to the president the accompanyings papers, marked .1. B, and C. as containing the information which is sup). posed to be wanted.
All which is respectfully submitted.
J.IS. MONROE.

Copy of a letter from the secrevary of state to the Cheralier de Onis, dated
Department of state, Jan. 14, 1817.
Sru-Having understood, in 0.tr late conferevice, that you would not agoce to an arrangement, by which Spain should cede her claims to the territory eastward of the Mississippi, unless the: United States ceded their claims to all the territory westward of that river, and that ever? then, your agrcement would be restricted to a recommendation to your government to adopt an arrangement to that eff ect; it is deemed unnecessary to make you auy further proposition, or to prolong the negociation on the subject of limits.
I have now to request, liat you will have the goodness to inform me, whethery you are williner to enter into a convention to provide enmpensation for spolintions, and for the injury resulting to the Unit. ed States from the suppression of the deposite at New-Orleans.

I have the honor to be, \&o.
JA IEES MONROE.
[Translation.]
Mr. Onis to the secretury of atate.
16 th January, 1817.
Sir-I have received your official letter of the 14th inst. in which you are pleased to mike known to me, that, having understorl in our last conference, that I would not accede to a: arrangement, by which Spain should cede her pretensions to the territory east of the Mississippi, if the United States did not relinquish theirs to the west of that river, and that, even in this case, my accession would be limited to recommending to my govern ment the adoption of this project, it appeared to you uscless to make me more propositions to prolong the negociation on the subject of limits between the two governments, and you only desired to know if I was clisposed to sign a convention, to provide compensation for the injories occasioned to the United States by the cruizers of his anajesty in the late war, and for those which resulted to the United States from the suppression of the deposite at New Orleans.

In answer to this letter, you will permit me to observe, that, in the conferenee referred to I had the honor to exhibit to you the fu!l powers of my sovereign, in which he authotizes me in me gociate, aljust and sign a treaty, or convention, with the United Siates, in which should be arranged not only the indemnities due to the subjects and citizens of both nations, for the injuries they had sattered from the last war between liis majesty and freat Iritain to the present, in contravention of the law of putions, and the existing treaty between the two puwers, but also to fix the respective limits to the karis. faction of both. The inteltion of his majesty (and in this I believe tho two governments agree) is no confined to a partial arrangement, which ing it ter

\section*{NILES' WEEKLY' REGISTER-SATURDAY, MARCH 8, 1817.}
nce the disagreements which have unhapen between them from the effiect of circumHis majesty, fully convinced that no treaty onvention can be durable, unless it is founded equality and mutual convenience, has particularly sirected me, that keeping in mind the reciprocal, political and commercial interests, which unite the two nations, I should so adjust the definitive arrangement with the person whom the presilent should authorize to that effect, that no controversy could ever again arise between them.
I cannot conceal from \(\}\) ou, that, to arrive at this end, it is indispensable to begin by amicably discussing and agreeing upon the rights of each of the two powers, and that the result of this discussion is, what ought to guide us in arranging the indemnities and fixing the limits which may be just and mutnally convenient to the two nations. You hatl the goodness to say to me, that this method had been adopted hy you and Mr. Cevallos, and that, if we renewed it, precious time would be lost without our being able to agree. In such a dilemma, and anxious to contribute on my part to accelerate the negociation, I took the liberty to propose to you the only other method which appeared to me to exist, besides the one which 1 have just mentioned, to arrange these differences, which is this: that the two powers, throwing off all idea of aggrandizement, and sacrificing resentinents and complaints of little importance, should proceed, with good faith, to fix limits between them which should be mutuany convenient, which should nat be liable to controversy, or be unknown to, or violated by, the sespective subjects of éach.

You did me the honor to appland a proposition 00 frank and liberal, as dictated by equity and good faith-and made known to me, with the same frankness, that the Unitel States desired to unite to its dominjons all the territories which belong to Spain to the east of the Mississippi; and that, for them, they would offer to Spain those which were between the rio del Norte and the Colorado. But as not only these lands, but all those which lie between the Colorado and cape North, drawing a line by the river Mermento, or Mermentao, towards the Tresidio of Adlais, and from thence by the Arroyo Onda towards Natchitoches, are a part of the proYince of Texas, belonging to, and in the uninterrupted possession of his majesty, without there having been, in relation thereto, any dispute between France and Spain, that dispute being solely as to Natchitoches, which fort the Freneh raised, unjustly, in the territory of his catholic majesty; it results that this proposition not only does not offer compensation to his majesty fur West and East Folorida, whose cession the United States intimate would be very agreeable to them, but it involves the relinquish ment of the property and possession which his majesty has of the ecritory in the province of Texas, which lies between the Colorado and the vicinity of Natchitoches.

To propnsitions so distant from the equality and reciprocal convenience in which we have agreed to treat these affairs, I answered, that, as the powers of his majes: \(y\) had been hastily sent to me, by Mr Cevallos, 10 take advantage of the departure of Mr Brent, I have not received express instructions usching the entire cession of the two lloridas, Wlich the United States wished: and, although they prope to me the desire of his majesty to accommo date them in all arrangements which nay be compatible with lis interests, I saw myself obliged to wait for instructions on this point, of so much the reater importance, as it relates to the cession by majesty to the United States of the port of

Pensacola, which was the key of the Gulf of Mexico, the best port of that Guif, and which was the more necessary to his majesty for the security o his possessions; but that, in the mean time, if you should propose to me, on the part of this goverinment, to make the Mississippi the frontier, I should see in that proposition a disposition on the part of the United States to offer some equivalent, and I would recommend it to the cousideration of his majesty as a fixed and stable limit, to assure the peace and tranquility of the two nations.

I hope that you will recognise in this exposition the sincerity and ingenuousness with which 1 proceed, and that you will, on a view of it, adopt, of the two modes proposed for setting on foot the negociation, that which will be inost agreable to the United States. The first, that is to say, that of discussing and agreeing upon the reciprocal rights and pretensions of the two nations, is the safest, and that which ought in conduct us with the greatest precision, to the indemnities and to the establishment of limits between them, since nothing is more easy than that, each point of justice being agreed upon, the equivalent to it should be arranged npon principles of equality and reciprocal conyenience. The second is shorter, but it requires a relinquish. ment of all views of aggrandizement on both sides, and that each government, adopting as a basis the uti possidetis, either of the year 1792, which is the one fixed on by the allied courts in the general pacification for the recognition of the right of property in their possessions, or that of the year 1763, after the conclusion of the treaty of peace between Spain, France and England, in which treaty the limits of their provinces were fixed, and the two Fioridas were separated, the East from Spain and the West from France, by transferving them in full sovereignty to England, they may come to a just and friendly understanding, so as to do away these disagreements. I am ready to discuss with you in the first mode just referred to. I am, also, reidy to treat with you by adopting the second: and I fitter myself that I shall, in either case, give jou pioofs that I will not depart from what is due to justice, equity, and the mutual convenience of the two na. tions. I renew to you, \&c.

\section*{LUIS DE ONIS.}

Copy of a letter from the secretary of state, to the Cheralier de Onis, duted
Department of state, Jan. 25, 1817
Sir-t have had the honor to recoive your let. ter of the 16 th , in reply to mine of the 14 th of this month.
It liaving been the invariable desire of the United Slates to settle all differences with Spain on just and fiir conditions; it is seen with much regret, that a similar disposition is not manifested on the part of your government.
Fiuding by your letter, that I had distinctly understood the views of your government, as explained by yon, in our late conference, aid stated in my last letter; and perceiving also, that you still adhere to those views, which, being altogether inconsistent with the rights of the United States, are inadmissible; I have to repeat, that this government lias no motive to continue the negociation, on the subject of boundaries.
In makins this frank declaration, I cannot avoid expressing my surprise, that you should now find it necessary to refer again to your government, for instructions on any part of this subject. These differences have long existed, and, as far back as 1805, were fully discussed, as you readily admitted, in every were fully discussed, as young to, or cqunected in every circumstançe appertaining to, or cqunected

\section*{NILES' WEEKLY REGISTER-RELATIONS WITL SPAIN.}
with them, in a special mission to Madrid fo: the purpose. It was hoped and expected, on the restor? tion of the diplomatic intercourse between the two nations, that you would have been investel, with full power to settle them; and it was in accord with your views, when this was found not to be the case, that the requisite authority was given to the minister plenipoteniary of the United States at Madrid It could not have been doubtel, as your govern ment had not authorized its minister here to bring these controversies to a conclusion, that the minis. ter of the United States would lave been prompily met in his offers to effect it at Madrid. I need not repeat to you the great dissppointment which the president felt, when, after the lapse of so much time, he was inforined, that an expression of regret in my letter to you of the 10 th of June, at the delay resulting from vour want of powers, and from the necessity of tranaferring the negociation to Madrid, had been misconstrued into a desire that it should be transferred again to the United States. On oxamining, huwever, the tenor of your commission, and the communictations between Mr. Erving and Mr. Cevallos, both of which seemed to contemplate a prumpt conclusion of the business here; the idea now brought forward in your letter, of a further re sort to your government for other instructions, was surely the last to enter into the anticipations of this government.

It is proper to add :hat I understood you to conceive in our late confercnce, fully with ine, in the sentiments, that any further discussion of subjects, which had been already so of en discussed and completely exhausted, would be uscless, since it could not be presumed that any change of opinion on any point, would take place on either side. Each party understands its rights, and has, doubtless, made up its mind as to the conditions it is willing to atopt. To those suggested by you, as being worthy the consideration of your government, this government cannot agree.

Under these circumstances I have again to re quest that you will do me the honor to inform me, whether you are willing to conclinde a convention, to provide indemnity for spoliations, and the suppres. sion of the deposite at New-Orleans as mentioned in my last letter.
I have the honor to be, with the most perfect consideration, sir, your very obedient servant,

JAMES MONHOE.

\section*{[Translation.]}

Nfr. Onis to the secretary of state.
10th February, 1817.
Sir-I have received the official letter which you did me the honor to address to me, under the date of the 25 th of last month, stating that notwithstanding the desire the president had to adjust all differences between Spain and the United Stater on just conditions, and to their mutual convenience, it was seen, with great regret, that a like clisposition was not manifested on the part of Spain.

You support this opinion on the ground that I ad. liere to the same sentiments which my foverninent manifested in former times; and also, that the pre. sident, seeing the powers with which his majesty had been pleased to honor me, could unt comprehend why I should think it necessary to recur to my sovereign to obtain new instructions. You will permit me to observe, that the number of privateers urmed in the ports of this country, in eruise under an unknown flag against the Spanish commerce, have obstructed in such a manner the communications betireen the penins wa and thege atatce, that the ar.
cidental circumstance of Mr. Bient's having taken charge of the duplicates of his majesty's power', has alone obtained for me the receipt of thers, anci that I am even yet without the origials: with wicich, doubtless, his majesty sent me instructions, and conmunicated to me lisis reasons for transfering the negociation luere. I can assure yous I am entirely innorant of what has passed in Madvid between Mr. Frving and Me. Cevallos, and that I am not less so of the motives which have induced his majesty to transfer the discussion here, notwithstandiag I had infurmed him, that I had inyself proposed in you that authority and instructions should be given to Mr. Erving in relation to it, it being clear to me, that his majesty desired nothing with more anxiety than to see an :iffair terminated, which must be the precursor of the reciprocal intimacy, which should be established between the two governments, fir the mutual benefit of their respective subjects and citizens.
If I might be permitted to conjecture the motives which have induced his majesty to transfer the negociation here, I believe I should unt mistake in designating, as the principal one of them, the knowd ledge his majesty has of your talents, of your justice, (justification) and of the conciliatory disposition Which you inanifested in your conferences with Mr. Cevallos, to concur in the settlement of these dis. ellsions; and, as the second, this: that, in the mo. ment of the arrival f the queen, his august spouse, and of the festivities incident to this happy event, his majesty could not give the attention which was requisite to these affairs, which he considered of the first importance. You are too just not to appreciate these motives, and not to see in them any thing but a new proof of the ansiety of his majesty to avoid all delay or inactivity. The president, infirmed by you of these motives, will, I flatier mysclf, form the same opinion, and see the necessity of my waiting for the necesary instructions from my sovereign, before 1 atibscribe to the points which ought to filin tie basis of this treaty. The short delay which inay result from this, will be amply compensated for and with mutual advantage, if you would place me in a situs. tion to inform my gorernment of the principal points on which the government of the United States wish to see this negociation turn. You know that as yet you have only made kuown to me, in our first conference, that if we were to go intu a diecassion of the rights of the two puwers, as was done by yon and Mr. Cevallos, much time would be last, ind each of us would retsin his opinion. Jouknow that I agreed to this: but at the same time intionat. ed, that I saw no other more certain mode of acco:nplishing the object which the two powers had its riew, since it must he with a knowlelge of the res. pective rights of each party that we outg't :o begin in fixing the indemmitios aud compenationt, w! tith belonged to each, on the primeipies of eqtrity, jurtice, and conveniences und that the only why of avoidiag this and of shortening the nexg tution, would be, that ithe wo powers, fiving up at pre tonsions and all idea rivatship) of achranciasemate shoubl agree beeween theinselse, in gernd faitt, in fix their lumits accorihof to eqg tiv, juchior, and mutnal convenience, so that they should not bo liable to be vilatet by the silticots of the zitie or the other, and in a tray to avonet vire renewal of the complaints wheh had given rive in enisunderstandings. You approved an iden so hberal, so gee nerous and so demonstrative of the disposition. of the king, my master, to wecommodate the Uivited States in whatever inight be agrecable to them, if not incompatible with his interests; and in conse?
qu nence, you made known to me, that the Umited \(\mathrm{S}_{1}\)-s wished to unite to their dominions the two Fori las is, in the former negociations, the ces stor of Wesi Florida, to the rio Perdido, was alone spiken of, aind as his majesty was ignorant of the new desires of this government, I said to you, that although I did not positively know whether his majesty would deprive himsclf of East Florida, and of the important port of I'ensacula, which was the key of the gulf of Mexico, yet the desire of his inajes ry to gratify this government was great, and that i. Was very probable he might agree to do it, provided that, on the part of the United States, there should be offered to him a just equivalent, and one of reciprocal convenience.

I leave to your impartiality and justice, and to that of the whole world, to say, if, on the part of his majesty, a more positive proof is wanting of the interes! which he t.kes in arranging these affaire in a friendly mamer, and, if I should not find myself inore authorized to doubt of equal dispositions on the part of the United States, in consequence of the proposition which you made me, nut only of not giving any thing in exchange for the two provinces, and the cession of which the U. States desire, but requiring that his im.ijesty should cede to them a part of annther, which has been in the unintertupted possession of his majesty for more than two imndred years.

I \(\ddagger \mathrm{m}\), nevertheless, very far from judging it thus A tirm and permanent arrangenent of all points of difference, is equally nseful and necessary to both nations. It ought to fix the basis of the happiness of their respective subjects and citizens; and to obtain thir, it orght necessarily to be founded in justice, equity and mutual convenience. His majesty is disposed to conclude it on these terms; and he has too much confidence in the well known rectitude of this a ministration to think that it could suncit it on other terms.
lon are pleased also to inform me, in your esteemed note, that to the propositions which I have suggested as worthy of the consideration of my government, that of the United States camot agree; and that abandoning the arrangement of limils, you desire only to know if I am disposed to sign a con vention for setlling the inguly sustained by the American commerce, and for the suppression of the depositeat \(\mathrm{N}+\mathrm{ll}\) Orleans

As the propasitions which I have made to you were confined solely to the leaving to your election whether we should treat, by discussing and firing in a friendly manner the respective rights of each power, to the end that, having agreed to them, and the obligations of each upon the other being known, the compensation to which each may be entitled might be setuled: or that, leaving things to remain in the state they were, we might agree in a friendly manner as to what would suit each-1 cannot conceive that the United States should he of opipion that they Gannot agree to any of these points.

I would offend my own delicacy if, after beius asmured by you that the United States were disposed to terminate all the differences which exist between the two nations by a treaty founded on justice, equity, and mutual convenience, I could believe that the United States would repel the only means which, in my opinion, exist to arrive at this end. I judge, then, that I have not explained myself with sufficient clearness, or that I have not well comprehended you; and I again renew my propositions in a plan, clear and demonstralive manner, giving you an example which you cannot but find just.

Let us suppose (and it is a very proper suppositiou) that you and I are intimate friends; you hive purchased an estate a ljeining one of inine; (I do not now inquire whether you puichassed it from a person who had a right to sell it or not-but you purchased it;) and, be it bec:llse some officious person said so, or because you thonght so, you were of opinion that there was included in this purchase a part of my estate which I worked, took care of, and possessed As sonil as you liad made this purchase, and ohserved that possession was not given you of the land I worked, and which you believed to belong to you, you asked me to give it up to you. 1 observed to your that it was inine, that the land which you had purchased hat also belonged to me formerly, that I had ceded it to him who had sold it, such as he had delivered it, and in no greater extent; and that, consequently. he could not tranafer to yoin more than I had given to him. You and I retier to the seller, and he tells us that he never sold the land to you which vou requine, and never obtained it from me, nor had an intention of acquiring it. Notwithstand. ing this declaration, which is decisive and irrevoctable, 1 , fion motives of firiendship, for yon, and to do away all doubt on the point, propose to you that we shonld discuss the affin in a friendly manner, a : assure you, that if you present to ne unquestionable dicuments to prove that it belongs to you, I am ready to give it up. I ask yoll, dispassionately, if this proposition could be considered as inadmissible. 1 go turther. 1, who am anxious to accommodate you because you are my friend and a food neighbor, knowing that you desire to get parl of my tersitory to round out yours, and to facslitate the exp rtation of your produce, as there is a navigabie river passing through it, carry my fivendship and condescension so far as to say to you, that we will agree between ourselves, by a friendiy investigation, what belongs to each; and, this being setiled, I am ready to cede to you the lands yon desire, for an equivalent founded in quity, justice, and reciproc.l convenience, fixing the limits between us in such a way that our servants should not engage us in quarrels and contests, as, it being our clesire to live in the grealest hamony, we were equally interested in woichng every subject of difference. Will you say to ine that these friendly propositions, are inarlmissible? I belíeve not. St:ch, then, neither more nor less, are those which I have suggested to youl in my former official note, and-renew to you. hy this, loping that, taking them into serious con: sideration, jou will view them as just, equitable, and evell generous.

You cannot but know that the convention you propose, limited to the indemuification for injuries done to the Americ:an commerce, by the critizers and tribunals of Spain, and by the suppression of. the deposite at New.Orleans, will not accomplish frilly the object which the two nations propose to themselves, of extinguishing all disagreements, Nevertheless, to give another proof of the deference of his majesty to the wishes of this republic, I agree to the negrociation with you on these two prints, and to conclude a convention as to them, in which slatl be embraced the just reclamations which his majesty shall produce against this government, and the various arrangements he desires to place in it for the encouragement of the commerce between the two nations, and to avoid injuries, such as those, which, from the want of explicitness in the last treaty, have been experienced by the respective subjects of both. I will add more,
and it is, that the first poiat to which you refer, heing founded in the treaty which exists between the two nations, I will subscribe to it without difficul. ty; and as to the second, it is of so small an amount, that if I do not succeed in demnenstrating to you that these iajuries have not existat, or that they are much exaggerated, and that the Unitel S ates have already admitted that they were satisfied for them, I will have no difficulty even as to them. I ought likewise to observe to you, that it will be easy to include in this same convention or treaty, a provisional arraggement of linits, without detaining us to fix them with exactitude. If the United Stutes do not desire to make an essential change in the establisherl linits, fined by the treaties of \(1763,1764,1783,1795\), and 1800 , and that this a1rangement should only apply to the uncultivated 1 unds to the north of the Missouri, the houndaries of which were never settled between Fratuce and Spain, this question might be left for commissionars, named by each party, and their decision might be considered as part of the convention: But in any case, the most efficient method of concluding these affairs will be, that you should have the goodness to say to rwe, with frankness, what are the seal views of the United States, what are the real and true compensations they are disposed to offer for the country they desire to obtain from his majesty. You may be assured that I will support, earnestly, proposals that are just and reciprocally conrenieat, and that, on the return of the courier, I shall be able to sign, under the powers I now have, a treaty mutually satisfactory to both parties, we, in the mean time, agreeing upon all the articles or minor considerations. You cannot but know that the instructions ought to be adapted to the greater or lesser territory of his majesty which the United States may desire to add to their dominions; and that, if they desire none, little difficulty can occur on the subject of indemnities between two powers animated by conciliatory and just sentiments. 1 renew to you my respecis, \&cc.

I,UIS DE ONIS.
Gop: of a letter from the secretary of state to the chevalier de Onis, dated departmevt of state, February, 20, 1817.
Sin-I have had the honor to receive your letter of the \(10 \mathrm{H}_{\mathrm{h}}\) instant.

From full consideration of the contents of this letter, it appears, that, allhough you expect instructions at an early date, to negociate and conciude a treaty, for the adjustment of all differen. ces between the United States and Spain, which you manifest a desire to accomplish, you do not consider yourself authorised to dost ou any one point, at this time. I will thank you to state whether I have understoud correctly the idea which you intend to convey. In case I have, I have only in remark, thut aliloough the delay is particularly to be regretted, it is not perceived, that any advantage can be derived from entering into the negociation, before you have received your instructions.

Jhave the honor to be, \&c.

\section*{JAMES SONROL:}

I'runslation of a lester from the chevalier de Onis so the secretary of stute, dubed,

Washington, February 21, 1817.
Sin-In the official letter which you did we the honor to direct to me yesterduy, you state that you had taken into consideration the contents of mine of the \(10 / \mathrm{h}\) instant, and, confining yourself to one point anly unt of many on which it couclies, of the
greatest importance, as I think to the interest of both nations, you say, that if you had correctly unders ood the me:ining of my letter, at the same time that I manifest a desire in conclude a treaty for the adjustment of all the differences existing between Spain and the United States, I do not consider myself anthorised to do no, until I receive the instructions from \(m y\) sovereig', of which I am in daily expectation. You ask me if this is the true idea yhich I had wished io give you, and add, that if it is, althongh we must both liment the delar, it is not perceived that any advantage can be derived from entaring into the negrociation until I receive my instructions.

In my note above mentioned, I made known to you, with the candor and sincerity which characterise me, the canses to which I attributed the delay in recerving the instructions consequent on the powers which his majesty had given ine; and I do not tonbt that the president will have found them as just, as the reasons I stated to you demonstrating that a partial negociation, which did not embrace all the points of lisagreement between the two nations, cannot accomplish the one or the otherwhich is to get clear of these disagreements, and to take care that they are not renewed in thture. The treaty in question ought to provide for the just reclamations of the subjects and citizens of the respective parties; that the limits between the two powers should be fixed agreeably to their resnective rifhts, to justice and recipmeal convenience. linally, it ought io comprehend different stipulations atrala. gous to the new state of relations of intimacy which is about to be established between the two govemments for the greater encomragement of theiv reciprocal commerce. You know that all these poin s have so intimate a connection with each other, that it is not easy to separate them, and on the other hand they are of such importance that I consider it necessary to wait the arrival of my instructions, before I conclude definitely a treaty involving affairs of such magnitude. Nerertheless, as we cannot but feel this delay very sensibly, which most probably will be short, anxious on my part to lessen it so far as depended on me, I have suggested to you that we might begin to discuss the points of least importance, to the end of having the work in a state of forwardness when the instructions should arrive; but, since you prefer waiting for their arrival, I will agree to what you may resolve on; persuaded that you do not take less interest uian I do, in fixing the relations of amity between the iwo countries on a footing the most solid and durable.

LUIS DE ONIS.

\section*{CONGRESS}
uJ We are compelled to postpone for our next paper the usual journal of the proceedings of congress, when every thing useful for record shall be inserted. The lise of acts, however, shews what was done. The following is immediately and extensively interesting:
house of representatives.
The following is the message of the president, transmitting to the house of representatives his ob. jections to the bank bonus bill:
To the house of refresentatives of the United States:
Having considered the bill this day presented to me entilled "an act to set apart and pledge certain mands for interinal improvements," and which sets aputt aml pledges funds, "for constructing mads and canals, and improving the navigation of water courses, in orter to ficilitate, proinote and giva
security to internal commerce among the several states, and to render more easy and less expensive the means and provisions for the common defence," I am constrained, by the insuperable difficulty 1 feel in reconciling the bill with the constitution of the United States, to returnit, with that objection to the house of representatives, in which it originated.

The legislative powers, vested in congress, are specified and enumerated in the 8th section of the first article of the constitution; and it cloes not appear that the power, proposed to be exercised by tlee biil, is among the enumerated powers; or that it fulls, by any just interpretation, with in the power to make laws necessary and proper for carrying into execution those or other powers vested by the constitution in the government of the United States.
"The power ta regulate commerce among the several states," cannot include a power to construct roads and canals, and to improve the navigation of water courses, in order to facilitate, promote and sec:ire, such a coinmerce, without a lattitude of construction, departing fiom the ordinary import of the terms, strengthened by the known inconveniences which, doubtless, led to the grant of this remedial power to congress. To refer the power, in question, to the clause "to provide for the common defence and general weltare," would be contrary to the established and consistent rules of interpretation; as reudering the special and careful enumeration of powers, which follow the clause, nugatory and improper. Such a view of the constitution would have the eficct of giving to congress a general power of legislation, instead of the defined and limited one hitherto understood to belong io them; the terms "common defence and general welfare," embracing cevery object and act within the purview of a legislative trust. It would have the effect of subjecting, both the constitution and laws of the several states, in a'l cases not specifically exempted, to be superseded by laws of congress; it being ex. pressly declared, "that the constitution of the United States, and laws made in pursuance thereof, shall be the supreme law of the land, and the judges of every state shall be bound thereby, any thing in the eonstitution or laws of any state to the contrary notwithstanding." Such a view of the constitution, fiually, would have the effect of excluding the judicial authority of the United States from its participation in guarding the boundary between the legislative powicrs of the general and of the state governmeats; inasmuch as questions relating to the gensral welfare, being questions of policy and expediency, are unsusceptible of judicial cognizance and decision.

A restrictin of the power "to provide for the common defence and general welfare," to cases which are to be provided for by the expenditure of money, would still leave within the legislative powcr of congress all the great and mast important measures of government; money being the orcinary and necessary means of carrying them into execution.

If a general power to construct roads and canals, and to improve the navigation of water courses, with the train of porvers incident thereto, be not possessed by congress, the assent of the states, in the inode provided by the bill, cannot confer the power. The only cases in which the consent and cession of particular states can extend the power of congress are those specified and provided for in the oonstitution.

I am not unaware of the great importance of roads and canals, and the improved narigation of water courses; and that a power in the national le.
gislature to'provide for them, might be exercised "ith signal advantage to the general prosperity.But seeing that such a power is not expressly given by the constitution; and believing it cannot be deduced from any part of it, without an inadmissable lattitude of construction, and a reliance on insufficient precedents; believing, also, that the permanent successof the constitution depends on a definite partition of powers between the general and the state governments, and that no adequate landmarks would be left by the constructive extension of the powers of congress, as proposed in the bill, I have no option but to withhold my signature from it; cherishing the hope, that its beneficial objects may be attained, by a resort for the necessary powers, to the same wisdom and virtue in the nation, which established the constitution in its actual form, and providently marked out, in the instrument itself, a safe and practicable mode of improving it, as experience might suggest.

JAMES MADISON.
March 3, 1817.
On the question "shall this bill pass, the president's objections notwithstanding?" the rote stood as follows:
YEAS-Spcaker, * (Mr. Clay) Messrs. Alexander, Archer. Betts, Birdseye, Breckenridge, Brooks, Cady, Calhoun, Chappell, Clendennern, Comstock, Conner, Creighton, Culpepper, Forsyth, Gaston, Griffin, Hahn, Hall, Harrison, Henderson, Herbert, Hophinson, Huger. Hulbert. Ingham, Irving, N. Y. Johnson, Ky. Kent, Kerr, Va. Kilbourn, Little, Lovett, Ljle, Middleton. Milnor, Jer. Nelson, Ormshy, Peter, Pickering, Reynolds, Ross, Savage, Schenck, Sharp, Sheffer, Tate, Taylor, N. Y. Telfair, Wullace, Webster, Wendover, Whiteside, Wilde, Wilkin, Thos. Wilson, Wm. Wilson, Yancey, Yates-60.
NAYS-Messrs. Adains, Atherton, Baer, Baker, Barbour, Bassett, Blount, Boss, Bradbury, Carr, Ms. Clark, N. C. Clayton, Davenport, Desha, Dickens, Edwarls, Fletcher, Forney, Golds: borough, Goodwyn, Hale, Hawes, Hungerford, Irwin, Peun. Jewett, Johnson of Va. King. Jaw, Lowndes, Lyon, William Maclay, Marsh, Mason, M.Coy, Mills, Hugh Nelson, Nuyes, Parris, Pitkin, Pleasants, Reed, Root, Ruggles, Smith Md. Southard, Stearns, Strong, Sturges, Tallmadge, Taul, Yose, Ward, Ms. Ward. N. Y. Ward, N. J. Wilcox, Williams-56.
Two thirds being required to decide the ques. tion affirmatively, the bill did not pass.

\section*{List of Acts}
passed at the secend segsion of the founteenth CONGMESS, JUST CLOSED.
An act to repeal the second section of the act, concerning the pay of the officers, seamen and marines of the navy.

of the Mississippi temitoly to forin a state govern ment and for the admission of the same into the union.

An act for erecting a territorial grovernment in the eastern part of the Mississippi territory.

Resolution for admitting the state of fadiana into the union.

Resolution to employ John Trumbull to compose and execute certain paintings.

\section*{Foreign Articles.}
eveland, \&c.
The most prominent article of intelligence in our papers is an account of an alarming riot, or "insurrection," as the Coarier calls i., at London, on the 2 d of December. A large budy of the peo ple met at Spa-Fields, to liear the report of Mr. Hunt, who had been depited by a previous meet. ing to deliver ain address to the prince regrent. The peport was far from satisfictory, and the crowd inanifested a determination to obtain that redress by fiorce which they had petitioned for in vain. A mumber of flag, were displayed, on which were inscribed, "Niature, truth and justice"-"Feed the hangry" -"Protect the oppressed" - "Punish crimes;" two of These were tri-colorell; 'a white thag had this motto, "I'le brave soldiers are our brother"; treat thens kindly." After being addressed in warm and intemperate language, to whir the people replied in the most earnest nud determined maner, they marched into the city in three grand divisions, where the police, supported by the military, wer: prepared to receive them. They, however, pushed forward, and in a short time, by breaking open arm shops, were pretty well supplied with muskets, pistols and swords; and inany were armed with bludgeons. All sorts of business were suspended-many of the pub lic offices, and most of the stores in the principal streets, were shut up-a report prevailed that these rioters were acting in concert with others in different parts of the kingdon, and all was tumult and consternation. An at lack upon the tower was ex pected-the gates were shut, the drums beat to arms, the cannon loaded, and every thing prepared for a siege.

The details of the proceedings on this occasion would fill hatf our paper. The lord mayor exhibited astonishing firmness and perseverance, and it was probably owing to his populavity, more than any thing else, that the mobs were dispersed. Tine populacecheered him wherever he appeared, though they fired upon his party for making prisoners of some of their corrades. Many persons were wounded in the various rencontres, but it does not ap. pear that any were killed on the spot. The Bank, India House, Exchange, \&c. were garrisoned with soldiers, and detachments of troops were passing through the city in every direction. The military
does not appear to have been used with so littlo ceremony as heretofore-they rather overawed than forced the mobs: a happy policy for the occasion, and probably pursued at the requinition of the lord mayor-for violence would only have increased the fury of the populice.

At 10 o'clock in the evening all was quiet-some few of the rioters were made prisoners-a chief of them, mained Watson, escaped. Many houses were injured-London has not, for many years, exhibited such a scene of outrage and thmult. The stocks had a momentary fall in consequence.

An American ship has recently arrived at Lon: don, with \(£ 50.000\) worth of British goods, from Philadelphia-another, so laden, had arrived at Liverpool, from New York.
The bank of England is about (partially) to resume specie payments.

A recpuisition has been presented to the high sheriff of Westminster, desiring him to convene a meeting of the inhabitants of Westminster, to take into consideration the sentence passed by the court of king's bench on lord Cochrane. Tothis requisition, the high bailiff has felt it his duty to reply, that he does not think the proceedings of a court of judicature a fit subject on which to assemble the inhabitants for public discussion.

Lord Cocirane's fine of \(£ 100\), for breaking priv son, has been paid by his friends, at one penny each. This was the limit of the subscription.

Riot at Dinulee.-About the 51.1 Dee. a mob of 2400 persons collected at Dmalee, and destroyed and pillaged upwards of 100 shops, chiefly of meal. sellers, befure they were quieted. They also fired a house.
At Chippenham, in Wiltshire, a mob destroyed a very extensive mill, with a large quantity of grain.
At Sheffield a mob paraded the streets with a loaf of bread, soaked in blood, stuck on a pole.
At Bristul a very large neeting of the people was hold, at which resolutions, of a very decided character, against the administration of affiairs, were passed.

The riot in London appears to liave liad a much more alarming claracier than was represented in tho papers.

The duke of Wellington as suddenly returned to France as he arrived fiom there. His mission is understool to have had some connection with the fact that France was unable any longer to pay her "deliverers."
The Ludulites are still in great force at Notting-ham-committing occasional depredations.

Grain has not risen in price in England so much as was expected. There had been considerable supplies from the continent. Duntzic wheat, however, sold as high as 1322 . per quarter.

The lord mayor of London has purchased in Smithfield market a bullock, to have it slaughtered and cut up in joints, in order to judge of the profits of the retail bitchers. He lias likewise purchased a sack of flour, to be made in loaves, for the purpose of ascertaining the actual gains of the bakers.

A letter from a gent!eman who resides in Devonshire, states, that his family is supplied wita the best butchers' meat at \(3 \frac{1}{2} d\). per pound, and he has a right of making choice of whatever joints lie wislies to have.
Stacks, Dec. 31.-3 per cent. consols. shut; do. for opening, \(6334-48\) ths; red. 6215 -28ths.

Hepresentation-In the town of Kilmarnock, Scotland, containing 13,000 inhabitants, there is only one person who has a right to vote for a member of parliamen:!

The reform of parliament is warmly discussed in England; and we hope the spirit of the people may extort justice from their oppressors.

London, Dec. 10.-Yesterday the lord mayor, at tended by Mr. Alterman Goodbehere, the recorder, sheriff's, city officers, and several members of the common council, proceeded in Carlton house, where they presented the following address to his royal highness the prince regent seated on the throne.
To his royal highness, the prince of Wales, regent of the united Kingdom of Great-Britain and Ireland.
The humble address and petition of the lord mayor, aldermen, and the common council of the ofty of London, in common council assembled. May it plense your royal hizghness,

We, his majesty's most faithful and loyal subjects, the lord major, and common council of the city of London, in common council assembled, humbly approach your royal highness, to represent our national sufferings and gricvances, and respectfully to suggest the adoption of measures which we conecive to be indispensably necessary for the safety, the greatness and the prosperity of the realm.

We forbear to enter into the details of the affict. ing privations and sufferings that every where exist; the distress and misery which, for so many years, has been progressively accumulating, has at length become insupportable. It is no longer partially felt, nor limited to one portion of the empire, the commercial, the manufacturing and the agricultural interests, are equally sinking under its irresistable pressure, and it has become impossible to find employment.

We beg to impress upon your royal highness that our present co:nplicated evils have not arisen from a mere transition from war to peace, nor from any sudden or accidental causes, neither can they be semoved by any partial or temporary expedients.

Our grievances are the natural effect of a rash and suinous war, unjustly commenced and pertinaciously persisted in, when no rational object was to be ob. tained.-Of immense subsidies to foreign powers to defend their own territories, or to commit aggressions on these of theır neighbors-of a clelusive paper currency-of an unconstilutional and muprecedented military force in time of peace-of the unexampled and increasing magnitude of the civil list - of the enormous sums paid for unmerited pensions and sinecures, and of a long course of the most lavish and improvident expenditure of the public money throughout every branch of the go-vernment:-all arising from the corrupt and inarle. quate state of the people in parliament, whereby all constitttional control over the servants of the crown has been lost and parliament have become subservient to the will of ministers.
We cannot forbear expressing our grief and dis appointment, that notwithstanding your 12 . II's gracious recommendation of ecomuny, at the opell ing of the last sesaion of parliament, your ministers should have been found apposing every proposition for lessening the national expenditure, and that they should have been able to suppurt and sanciona their conduct in defiance of your If . \(\mathrm{I}^{\prime}\) s. recommendation, and the declared sense of the nali in, affording amother pront of the coriupt slate of the represertation, in addtition to thore facis son often stated and ofiered to be provel at the bir of the house of commons, in a pectifion presented in 17 ? 3 , by the hon. Cliarles, now lond rirey, whereloy it ap peared that the great bouly of tie peopple we.t
 and that the majority of the l:omorible botite wery tatumed hy the propricturt of troten brough
the influence of the treasury, and a few porre:ful families.

We can, sir, no longer support out of our dilapidated resources, an overwhelming load of taxation, and we humbly submit to your royal highness, that nothing but a reformation of these abuses, and restoring the people to their just and constitutional right in the election of members of parliament can affiord a security against their recurrence, calm the apprchensions of the people, allay their irritated feelings, and prevent those misfortunes in which the nation must inevitable be involved, by an obstinate and infituated adherence to the present system of corruption and extravagance.
We therefore humbly pray your royal highness to assemble parliament as early as possible; and you will be graciously pleased to recommend to their immediate consideration these important matters, and the adoption of measures for abolishing all useless places and sinecures; for the reduction of our present enormous military establishment; for making every practical reduction in the public expenditures, and restoring to the people their just share and weight in the legislature.
Signed by order of the court,

\section*{HENRY WOODTIIORPE.}

To wisich his royal hig!ıness was pleased to make the following answer:-
It is with strong feelings of surprise and regret, that I receive this acddress and petition of the lord mayor, alderman and commons of the city of London, in =ommon council assembled.
Deeply as I deplore the prevailing distress and difficulties of the country, 1 derive consolation from the persuasion that :he great body of his majesty's subjects, notwithstanding the various attempts which have been made to irritate and mislead them, are well convinced that the severe trials which they sustain with such exemplary patience and fortitude, are chicfly to be attributed to unavoidable causes, and I contemplate with the most cordial satisfaction, the eflorts of that enlightened benevolence which is so useful and laudably exerting itself throughout the kingdom.

I shall resort with the utinost confidence, to the tried wisdom of parliament, at the time, which, upon the fuliest consideration, I have thought most advisable under the present circunstances of the country; and 1 entertain a perfect conviction that a firm and temperate udeninistration of the government, assisted and supported by the good sense, public spirit, and loyalty of the nation, will effectually counteract those proceedings, which, from whatever motive they mal, originate, are calculated to render temporary difficulties the mieans of produc. ing permanent and irreparable calamity.

\section*{fuaver.}

The king is unwell with the gout-great efforts are m.kimg to negociute loans to supply the enormous d-ficit in the budget of 1817 -discmitents an I seditions are spoken of, in which gent. Vand:m. me is siphosed to have a part. But other accounis ay that all is quitt.

A cunspir cy in maid to have been deteced at Romenus. If a sad to hove been be in cution to drue ont the 13 urbons, ant declate Maria louisa regent of liraice.
The es rerta ion of corn foum Irance is prohiobitel.
forn. Sivary his beer tried athd candemnes? to dealn, per eminentace.
irance, like 1:ighan, is filed with riols for the *at of tiread anl implogment. Ilat goveinmed.
it seems, cannot pay, and yet is afraid to ask the retirement of, the allied troops.

The French press seems even yet too free for the clemency of the Bourbons-new decrees have been introduced to regulate it.

The journal of Grenoble, of the 19th, publishes the following article.
"Tie emperor of Morocco has just written' to the king, ofering to permit corn to be exported from the ports of his kingdom to Marseilles, in any quantity that should be necessary. His majesty has answered this prince with his own hand, thankng him, and accepting his offer. This fuct has been communicated to us by a person in this city, wor thy of faith, and well informed."

The French pspers almost made the late riots in Londion to amount to a revolution!
The following is extracted from a London paper of 1)ec. 19-"On the 8th inst. the festival of the conception of the virgin Mary was observed with its usual solemnities among the French Catholics, On this occasion the figure of the virgin Mary was placed in the open court opposite the museum, at Rouen, according to immemorial custom, to which the people flocked in numbers. But, to the astonishment of every worehipper, the statue had been decorated, by some unknowi persons, with a beautiful tri-colored cap, and the sash which Napoleon Bonaparte usually wore suspended over the shoulder. The device occasioned an electric sensation throughout the city; and for some time not one would dare to remove the revolutionary emblems for fear of defiling the sacred figure."

\section*{NLTHERLANDS.}

The further exportation of corn from Holland, Sec. is said to be prohibited.

> SPAIN.

An extensive conspiracy in Spain is said to have been detected. Several of the alleged conspirators are confined in the fortress of Pampaluna. The most sloomy despotism reigns in Spain.

Great complaints are made by the British against Ferdinand for his regnlations about their manufactures; the duties on many of which amount to a prohibition. Besides those of British manufacture it appears that his edicts extend to all East India cottons, with nankeens \&c. The supply of Spain with these is granted as a monopoly to the Philippine company, who receive their stock from Manilla.

The imbecile state of this kingdom is manifested by the contimued blockade of Cadiz by a few patriot privateers, by whom many rich captures continue to be made. The long talked of expedition against the colanies remains in stutu quo for want of money, and it seems that the merchants are themselves about oo fit out a firigate to protect the trade at their own expence-the king being unable to do it!

Nobility. The king has granted to a community of Dominician .Monks the privilege of selling, for their own profits, four titles of nobility, those of marquis and count.

\section*{Itealy.}

The senate of Turin have ordered all the people to make a return of the quantity of grain and bread stuffs they have on hand, on pain of confiscation of all the property detected.

The lioman states ate over-run with armies of robbers, one of which lately defeated the troops of the pope in a regular battle. Their depredations are very extensive.

\section*{NuTTEELNEUROPE.}

Some "foolish war reports," at Vienna, lowered the exchange in one day 20 per cent. It was re
ported that Russia was going to war with Turker, and that Austria was to "assist."
"Conscription"-worse than the "French."-In "delivered" Puland every man, without distinction of rank, origin or religion, is to perform military service as required by his master, the emperor of Russia, for the space of ten years-beginning at the age of 20 and ending with that of \(S J\).

The new king of Wirtemberg is.spoken of highly as being a gentleman. He is actively employing his power to ameliorate the condition of his people. By abolishing some of the trappings of his court, he has done more than all the boasted charities of the British royal family, with the bench of bishops ant? train of placemen and pensioners, amount to. It is really pleasant to find an honest man among the breed of kings.

East-ivmirs.
The British forces in Celebes have obtained a decisive victory over the natives at Macassar.
1500 houses were destroyed by fire in the town of Port loulis, isle of France, in Sept. last.

Bonaparte.- 1 London paper of the 2nd of Dec. mentions, that Bonaparte is actually engaged in composing the "annals of his life;" and that he employs count de les Casas as his amanuensis.-The count has informed a Mr. Warden, that the campains of Egypt and Italy, and what Bonaparte calls, "rny reign of a hundred days," were already completed, and that the intermediate periods were in a progressive state.
barbary fowers.
There are reports that the craisers of Moroceo have captured some Dutch ships, and that, in consequence, admiral Capellan, with lris squadron, had proceeded to Tangiers to demand satisfaction.
west-indies.
A famine seems to be apprehended in Martinique, yet "colonial" regulations appear to preponde rate. Flour will be admitted on a duty of 6 per cent. and wheat may be brought "directly from the United States" in "French vessels," on a duty of 4 per cent.

The Canada papers have many details of the petic guerre carrying on in the north west, between the the Hudson bay and North West companies.

\section*{"SPANLSH AMERICA."}

It is said that both the Englisl) and Spanish charge des affaires, at Rin Janeiro, have protested against the expedition of the Portuguese against the provinces of the Rio de la Plata!-which, it is probable, will amount to nothing. Their force had, at the last accounts, accomplished-nothing.

A general action is said to have talker. place near Barcelona, on the 23d December, in which the poatriots under general liar were completely defeated, losing about 4000 men, a remnant only escaping into Barcelona, where they were closely blockaded; as it appears by land and sea.
Gen. Bolivar and admiral Biron, however, have declared the whole coast of the main in a state of blockade. Their force is said to amount to 2500 or 3000 men.

\section*{mexico.}

It is reported that 16 millions of dollars havere. cently arrived at Vera Cruz, under a strong escort. The celcbrated Dr. W. D. Robinson said to have been killed at Boquilla, is a prisoncr with the Spaniards.

\section*{Bills of Mortality.}

For the year 1816. Boston.
Total deaths 904-smallest number in June, 53; greatest in February, 98. Under 1 year 186; 1 to 5 years 127; above 60, 112. Diseaser-consumption 180; fevers 120; infantile 195; apoplexy 18; dropsy 12; still born 31; old age 37; mirasmus 37, \&c. \&c. Newport, IR. I.
Deaths in the Rhode.Island monthly mecting of the society of Friends, or Quakers, residing at Newport and consisting of more than 400 persons.
In 1812-8 persons, the youngest 60 , the oldest 84 years of age.
In 1813-8 persons; the youngest 49, the oldest 85 years of age.
In 1814-1 person only, aged 87 years.
In 1815-5 persons; the youngest 49, the oldest 90 yeaps of age.

In 1816-9 persons; the goungest 58 , the oldest 94 years of age.
Total amount of the ages of the above 31 persons, 2298 years, giving an average of 74 years and up. wards to each.

During these five years not a single child died, nor any other person under 48 years of age.

The above statement, perhaps, is without a parallel, and argues, like an angel "trumpet-tongucu," in favor of temperance and regularity of life.

New-Yorx.
Total deaths 2739-the months not stated. Under 1 year 522 ; 1 to 5 years 396 ; above 60,286 , of whom 7 were from 90 to 100. Disecases, generally, not given. Increase of deaths, compared with the last year, 232. Ninery-eight persons died of the small-pox in the month of January, among whom was a woman aged 97 years! The cases of consump. tion are given at 678 .

Is the citt and libehties of Puladelphia.
Total deaths 2040 -smallest number in February, 122; greatest in August, 226 . Under 1 year 455: 1 to 5 years 302; above 60, 240. Disecases-consumption of the lungs 347; convulsions 180; pleurisy 126; cholera morbus 94; varinus fevers 176 , of whom 84 of typhus; dropsy 53, in the breast 19, in the brain 65 ; still bom 97; decay 63; wld age 60; elebility 52; apoplexy 50; inflamniations 101; childbed 7 , \&sc. \&ec.

\section*{Baltimone.}

City and firecincts.
Total deaths 1317-smallest number in October, 80; greatest in August, 212. Unier 1 year, 477 ; 1 to 5 year, 117; above 60, 71, of whom 1 above 100. Discases-corsumption 250; cholera morbu3 132; fits 91; fevers 91; hooping congh 105; pleurisy 75; still born 78; worms 76 ; Aropsy 33, in the brain 3; child bed 26; smail pox 2 ; spoplexy 52, icc. The city and precincts are supposed to have a population of ahout 60,000 souls-the deaths were 32 less than last year.

\section*{CHRONICLE.}

Ippointments, by the president of the United Stutes, with the advise and comoent of the nemult:
To be secretary for the lepartment of atate. Jowr Roisct Amans, of Massachusetls.

To be secretary for the department of the trea. anty, Willias 11. Chawroun.

To be secretary for the departmatrio of Var, Isaxc sustans, of Kentuch!.
 at the head nf the bitry difirtinent.

United States adjourned yesterday at an early hour. Previous to the adjutriment, the zice president retired from the chair, according to the usage at the close of a session, and Mr. Gaillard was again chosen president pro-tempore of the senate.

James Roane, to be 2 d lieut. 7 th inf.
D. Shelton, to be 2il lieut 7th inf.

Chirles Retts, to be 2d lieut. 7th inf.
Isnac W. Snowden, in be surgeon's mate 7th inf.
13) order,
1). PARKER,

Adjutant and inspector general.
Specie. Large quantities of specie have arrived in tie United States within the last two or three weiks. Much of it from the West Indies, and sume from Europe. We cannot suppose there i at present any real scarcity of the precious metals in our country.

Mr. Hughes, charge des affairs at Stockholm, arrived in London on the 15 th of December on his way to Sweden.
Maruland Penitentiary.-A fire broke out in the eakum loft of t is fine establishment, on Wednesday evening last, by which the roof of the wing and some consinlerable part of the floors, in parts not arched, were destroyed. The centre building, with the work shops, \&c. were uninjured. It is supposed to have been caused by design. Not a single criminal escaped. The loss estimated at 12 or 15,000 dollars.

Died, suddenly, on Tuesday last, Joset,h H. Nichoison esq. chief justice of the 6 th judicial district of the state of Maryland, (of which Baltimore furms a part) and president of the Commercial and Farmers' bank of Baltimore. On the death of this great and good man, the gentlemen of the bar immediately assembled, judgre Bland in the chair, and resolved to wear crape as a tribute of respect to his memory until the end of the ensuing session of the cumrt; and the city councils of B.alimore passed a resolve 'o attend his funeral, headed by the mayor. A ling procession of our most respectable citizens, follnwed his body to the "nalrow house," "appointcd '0.all the living:"

The decease of this man is a public calamity-he Was ponseused of fine talents, well cultivated, which wore applied with a just discrimination and inflexible integrity. But his character as a judge, as president of one of our most respectable monied institutions, as captain of a most reputable artillery companv, which assisted in the glorious defence of Fort . WV.Henry, on the memorable 13 th of September, 1814-however honorable they may have been to him for an enlightened independence, liberal deportment, or mindanted courage-were eclipsed by the gencrons qualities that endeared him to a large circle of relatives and friends- \(t n\) the former, thoug his means were limitted, hestood as a common futher and protector; a:d he was the pride of the latter. He died in the meridian of his usefuiness, being aged only 47 years.

\section*{Virginia Legislature.}

The following may be wseful to our friends in Virginia ior reference.
In the house of delegates, Feb. 11.-The house took up the engrossed bill for equalizing the representation in the senate, and equalizing the land tax. A long and interesting debate ensued-Messrs Hay and Tucker being in opposition to the bill; Mr. Tazewell in favor of it-Mr. Mercer, (of L.) made some remarks on certain incidental points. The debate tonk a wide range, both on the ground of ex. pediency and coustitutionality. The opponents of the bill contending that it was contrary to the state constitution-the latter repelling the idea. The question was finally taken, by ayes and noes, and the bill passed-ayes \(\overline{7} 5\), noes 71 , as follows:
AYES-Messrs. Wise, Maury, Pem, [Aniherst] Anderson, Blackhuru, Jordan, Csampbell, Pate, Colston, Wilsun, (Motetourt,] Cuols, [Butetourt,] Hill, [Brunswick,] Austin, Yancey, [Buckinghann, \({ }^{\text {d }}\) Bataile, Denoville, Wyatt, Rielnarlson, Taylor, [Cliesterfield t Thweatt, Wilson, [Cumikerland,] Barrette, Hardawny, King. Armistrad, [Elizaleetl-City:] Buckner, Marshall, Payne, Cary, [Fluvanna,] Cook, [Fraililin,] Mutthews, Hyde, Lemd, Johusou [Giles,] Clarke, [Hulifax.] Jacksun. Mc Whorter, Chamberlayne: Atkiuson, Brown, Hanhiins, Stuart, Braxton, Mereer, [Inutduna.-) Taylor, [Lunenhirg.] A lexander, jr. Brafforl, Graves, Christian, Cook, [Norfolk,] Pollard, Wilson, [Northanptonl,] Jonws, Junr. [Nottoway,] Pincham, Sheltun, Martin, Clarke, [Powhotan.] Hooker. Linulsay, Martene, Booth, Mitcllelll Johnson, [Southampton,] Beeclese, Mercerr. [Spotislvania,] Judking, Jas, 'Thompsol, [Tazewell,] Rees, B. Thonıpson, [Tazewell.] Pescurl, Cary, [Warwick,] Estill, Sniyth, [Wythe Scott, Shieck, Tazewrill-75.
NOES-Mestrs, Stanard [Spraker, Yancey [Albemarle] Lane Edie, Dodilridge, Lewis [Campheli, Armisteal [Chailes.City,] Raker, Turner, Smifh, [cisbell,] Lataule, Gariuet, Thompsori, [Fairfiax.] Hunter, Williams, Sexton, Jones, [Gloucester.] S-awell, Currin, Cooley, Starke, [Greensvillc,] Smith, [Giles,] Mc'Carty; Starke' [Hanover.] Hay, Hairston, Allen, [Heury:] Morganl. Wilson, Starke [Hanover.] Hay, Hairston, Allent, [Hewri] Morgall Wisol,
[Kanawha,] Ruster [Kanawha.] Harwour, Hill, [King-Williann.] Biscoe, Crabtree, Fleming, Danicl, Banks, Allen [Madison,] Cleni: dinnen, Ransome. Tarry, Healy, Gray Thomas [Mouroe,] Wilson' [Monongalia,] McHenry, Charlton, Borland, Black nell, Edwards, Irwin, Mallors, Staples, Hiner. Hinhle, Tucker. Melare, Foster. Belfield, Bowyer, Bryan, Fugate, Colidwell, [Russell,] Fullen, Rinker, Stcenbergen, MeCoy, Hungerford, Stokely, Bukey Robertsan, \([\) Richninonil \(]\) ] 71 .

A motion was then made by Mr. Sexton to re-consider the bill "to incurporate the Manchester turnpike company." \&c.- declaring that he had voted against the bill yesterday, and was dissatisfied with the vote he had given. Mr. Clarke (of Powhatan) stated, that this was a strong case; that one of the majority had already stated that he was dissatisfied. with his vote, and that other gentleman had stated the same. Mr. Mercer (of L.) opposed the motion - Messrs. Blackburn, Doddridge, Smith and Hay followed on the same side-Messrs. Baker, Lane, and Thwaett enforced the motion. The question, however, was finally taken, by ayes and noes, and the motion was lost-Ayes 61, Noes 66.
In the senate, reb. 11.-The bill "requiring the sheriff's of the different counties and corporations within this commonwealth, to take the sense of the people upon the propriety of calling a convention," which was, on Friday last, reported from the committee with an amendment, which was read, and with the bill laid tupon the table, on motion of Mr. A. H. Powell, was taken up.

The amendment proposed by the committee being again read, and, on motion, amended was on the question put thereupon, agreed to by the house.
And, on the question being put on the \(3 d\) reading of the said bill, as amended, it was rejected by house-Ayes 9, Noes 12.

The Ayes and Noes being required on that ques. tion, were as follows:
A YKS-Edward Watts, [Speaker] Chapman Johnson, John W. Green. Cuthbert Powell, Alfrel II. Powell, Francis Preston, George Grernh Cuthbert Powell, Alred i. Yuwell, rancis Preston,
1. Davison, Thoulns C . Hoomes, and Joseph C. Cabell-9.
Noes-Jamers Rolertson, jr. Tho thas Taylor, William Cliamberlayue, Willian Lee Bail. Bartholonew D. Henley, Juhn Hill, Richaril Jones, Johun Cargill Armistead Hoomes, Brazure W. Pryor John Hooe, and John Cropper,-12.

\section*{The state of our country.}

Although we in the United States are not exempted from : portion of the common suffering that belongs to our nature as men and onr condition in society, and those engaged, either in foreign or home trad?, generally experience consilerable difficulty in getting through with their ordinary transactions of busimess-atthough things are tull, and money is said to be scarce for the want of sonnething to make it plenty by circulation, ant our country, inundated by foreign gonds, was overwhelmed by debt, to the app.rrent destruction of our own sources of wealth in manufactures-how manifold are the causes for exultation when we take in extended view of the situation of the people of this republic, and conuast their general prosperity and happiness with the conmon inisery and distress uttached to those of other incio is! It is here, and here only, that the friend of freedom finds a state of safe repose, and honest industry meets its proper reward in enjoy ment and ease.

We have the most profound peace-incleed, the people seem hardly to have any public matter 10 talk about, and the ingenuity of the politician is strained to the utmost to discover any thing to which to draw the public attention. So much does the government possess the confidence, and so completely does it meet the wishes of the people, that if it had not been for the famous compensation lawo, we should, truly, have had a dull winter, of it. But every boly grew tired of that, and it was "put on the sheif \(;\), and we seen absolutely in want of something-any thing, to keep up what may, perhaps, be deemed a wholenome degiree of excitennent. Whell it was sail that our relations with Spuin were about to be disclosed, the parizan dipped his pen into the inkstind and placed himself in an attitide to write;-but behold!-the case was so plain as harlly to beqr an explanatory paragraph, much less afford caluses for collumas of comment. It is hard "tere for thost who delight in "wordy war." Hap. pily, the appormac!ang elections in some of the states give some stuch a litle to do!

In nur mational capacity, there is much for the pul riol to be proud of. The population and resources of the republic, every hout increasing, are going on muat rapidly to fullwess and power commenbur:' e with the ligh-tomed rational feeling now so generslly prevalent in every rank of socie:y -3 feelIng of intstimable value, atid inore important to us, in a niere cafouldion of dotlars ant cents, than the mines of Merico and Peru; affording the bent pos. sible reliance for a long cominuatoon of our present aytem of government; a rampart against ussaults from without or encroachments from within. Our finances ure in the most prosperous condition; we have, the present year, appropriated nivetcen millions of dollars to reduce the debt incured to maintain our inlependence and sovereignty, and also ad. vanced fur millions more for the same purpose, in atiticipation of the regular appropriation for 1818: let Ule law for levying a direct tux way suffered to expire by its own limitation, and the prospect is that all the indernal dutiee will be taken off, at the next session of congrese! The gadlant army, Hiat dately

Vez. x 正
snatched victory from the hands of the brave. though rednced in numbers, retains a prosperous sufficiency for every puipose of peace, and rests in glorions ease without burthening the people that it tately defended. The navy, illustrions .und unrival led for deeds of courage and skill, is silenty, bu certainly, approaching the state of power reguire 1 by the wishes of the nation, and carry the "rtar spangled banner" to command the respect of the workl. But an event has just happened w'ich is calculated as much to mise a delighiful sensation in the patriot's breast as any thing else: "The pilot that weathered the storm," the great and good Uidison, has refurned to the rank of a private ci(izen, and Mr. Mrnroe has succeerled to his place, with less bustle and national coafusion than betongs to a Westminsier election for a member uf parliament, in England! Such is the order ond laarmonv of our constitution, duly appreciated by the people and faithfilly adininistered by respnisible agents. How different is the lively gquet that we enjoy from the state of dead repuse liat belongs (0) 2 lespotic governmes. ! We hear of no plots, conn spiracies or mobs-nor do we fear them: 13,.wl men may cause a temporary, or local, agitation of the public mind, in the United States, but there is, in the good sense of the people - in their reffection on the necessity "at the call of the law, of rallying romind the standard of the law, to unite in comimon efforts for the common good." an assurance of safety that cannot be disturbexl; and the late mighty Vipoleon, or even the arch-breeder of miscitief, Casblereagh, would bave as litile iufluence here to destroy the pubhic tranquility us the village smith, whose shop is the political head-quarters of the neighboring country. When we look at these lling: and see langling freedom make every part sud corner of our country smile-how great cause have we daily to renew otle vows to ginard the cons itution, and preserve, with vestal purity, the "...ered flame"-which, not confined within walls, cxtenls and warms this great and justly prond repu lice'

We are, also, rapidly riniug from the state oidepreision which to us, as individuals, fullown the termination of the furced condition of conimerce that grew up out of the late general warfare in Europe. This was so extensive and lasted so longr, that it seemec. to come to the home of almost every man, and so great a clatige, as its anninidtion cans: ed, could not have been expected without nuell derangement of business and clistress. Hut we are seltling down better than was hopod for, and shall reon gret into a prace establishment. However, if there is any consolation in the prusect, we may res. somubly conclude that there will ab ain be an uproats in Eiurope-a little peciod of time will prove chas: the chaining of Somaforte to the reck of St. Ilelema has not extingniahed the ambition of kingn. A mithy. the pleasing evidences of the fact just utated, wi: may notice the general resumption of specie payments by our nunerous banks: this important inel. sure has beenseted upon without the occurrence ur any of the difficulties that were uppreliended, ani it is recuived as a fact, that these institutions were never better prepared, in reality, to mect their or. gagements than they are now.

Our manufacturers, too, are raising their heads a little-just beginning to breath again. Some of their establishments, perhaps, grew up too suddenly, or were undertaken without sufficient capital or intelligence, and many of the most important seemed to be crushed by the weight of "the enemy." But we know that many are now in full operation, and hear that others are preparing for \(i t\); with the prospect, it is said, of reduced profits, but with a certainty of Hsing the capital invested in them to advantage. What they seem chiefly to require is steadiness in our government; and this, we trust, will be afforded to them. It was always, however, upon the househotd mamufactures that we mainiy relied to arrive at the independence desired; these bring into the gentral stock of wealth the labor of the people, and we know that they were always extending will:out the least interruption, from outward causes. It is the increased force of household industry, that, in all probability, has given tio new impulse to the large establishments, and here is a hame market that may be depended upon-a source of incalculable wealth not to be affected while liberty waves her eacle-standard over the land.
I.tt us go on, then, with courage and confidence -the trial of zoar and the trial of peace have passed: It remains that we add to the stock of intelligence the result of our experience in these, and march steadily on to the high clestinies that await our country. The name of an American is a prond one every where; and it should always be remembered that "national honor is national streng th." May it never be sullied by an act of injustice! May it never be lost by an act of submission !

\section*{"Rebellion."}

At writer at Madrid, speaking of certain reports that liad prevailed there as to the United States being about to declare war against Spain, and lend their assistance to the colonies struggling for independence, observes, after some compliments on our condition,-"thr Uniten States will not espouse the cause of rebelliox," \&c.
Whether it is politic for us, in the present unsettled state of the world, to be the first to disturb its drearlful calm, portenting storms more destructive, perhaps, than any we have yet witnessed, by attempting to gain that redress of Spain for wrongs committed by her, by the argument of arms, which has been refused, in the most pitiful and prevaricating manner, to honest negociation-is not the question that presents itself at this time; but we may profitably offer some remarks upon the principle of the sentence just quoted.
- The United States will not espouse the cause of rebellion?" What is "rebellign?" A resistance of the legal authority. What is legrel autherity? The "divine right of kings" to govern the people! What caused these states to unite? A resistance of the right of the king to bind them in all cases whatsoever, or, a rebellion. Yet they, who have themselves profited so much by it -who have thereby given themselves a name and rank among the nations of the earth-who, in their childhrod have performed deeds of highest renown, and, by their resistance of "legal auhhority," have arrived at a state of unrivalled prosperity and glory, marehing rapidly in the fullness of strength and power, "will not espouve the cause of rebellion" (so called), the grand source of their own happiness and fame-will be unwilling that other countries, by like means, may reach the same state of liberty, safety and independencewill rather have the friendship of a thing like Fer-
dinand, than obtain the gratitude of a world of frec. men !-Verily, the writer must have supposed that we liad already forgotten our own origin; or meant to libel us by believing us capable of condemning the generaticn just passed; which, with Washington at its head, "rebclled" against the king. The case of South America, in relation to Spain, is precisely that which the present United States liad in relation to Great. Britain, in what the world [because it succeeded] now calls our "revolution;" except, indeed, that where rue liad one just cause for complaint they have a hundred-and, perhaps, a thousand.

But as to "rebellion"-what is it? Is not Ferdinand, himself, as well a rebel to his king and his father, as to common sense and common justice? And shall he, or his friends. who by intrigue or force, divested the father of the throne of Spain, charge the transatlantic colonies with "rebellion" akainst himself? We wish the knsvery of monarchy to become a tbing to be hooted at by erery one, and ask aguin, if a "divine right" canl be abrocated by a human act-what change of circumatances amongst men can alter the decrees of Alyiguty God?-and yet on this is established the foundation of every throne in Europe, thast of the "illustrious house of Brunswick" not excepted-for this house obtained it through force in "rebellion;" which uncourtly phrase, however, is changed for that of a "glorious revolution."
Turning over a volume a few days ago, I was much diverted by an edict of Catharine, of Russia, in the year 1793, on the oceasion of the revolution in France. That mild advocate of "regular government," alluding to the National Assembly, said"seven hundred monsters have laid their paricidal hands on the life of the Lord's anointed, their lawful master;" she ordered a suspension of all intercourse with France, until "his most christian majesty should be re-established in those rights and prero. gatives assigned to him by human and clivine law,'" calling the republicans "usurpers of government and legitinate authorities."

What impudent hypocricy !-But the history of Catharine is too well known to require a detail here. Of an obscure beginning and a stranger in Russia-and placed near to the throne by her marriage with the "Lord's anointed"-she snatched, with blood-stained hands, the sceptre from her husbund and "lawful master," and marched over his dead body to "usurp" the "legitimate authorities" of lussia, having also put out of the way alk his relatives and adherents! We may admire the talents of this woman; yet a mure ambitions, more wicked, more profligate creature, never lived. But she, of all persons in the world, ought to have been the last to lint at the killing of a king, or speak of the usurpation of a government-she had no claim whatever to the throne of Russia, except that built upon the true principle by which all thrones are supported; the bayonets of the soldiery, that she prostituted herself to debauch.

Nor is it less impudent in the friends of Ferdinand to speak about "legitimacy" than it was in Catharine. He was proclaimed by his own mother. not to be the son of her husband, king Charles, and he stands to us as nuturully illegitimate; that he is politically so is more easy of demonstration. He mounted the throne by a forced retirement of his reputed father, and re-gained it by a violation of his oaths to the Cortes; rewarding them for his "re, storation" by killing some, imprisoning otherssending many to the gallies and banishing the rest for life. "Rebellion," as it is called, against this per-
jured and ungrateful man, must be a virtue-and to every attempt against hiun to which he can possibly be liable, except that of assassination or murder, we wish complete success. Ming he take the oar of the galley from the hand of some member of the cortes that he himself chained to it-or occupy the dark and dreary dungeon where he confined the enemies of the inquisition!

\section*{Uniformity in the currency}

The chairman of the commitiee of finance, of the senate, addressed a letter to the secretary of the treasury, requesting his opilition as to what further legal provisions were necessary to aid the trea. sury in restoring uniformity in the circulating currency of the different sections of the union; and also expressive of a wish to be informed of the places in which the balance remaining in the treasiry on the 1st February was deposited and the currency in which it consists.
The secretary under date of the 20th ult. repiies, that the Eanks of the cities of New- York, PhiIn! Hphia, Ba!timore, District of Coiumbia, state of Virginia; and bank of Meskinguin and Miami Ex porting company of Ohio, have notified the department that "ilhey will on this day restme and con tinue specie payments" - liat the banks sonth and west have intimated their eapacity and disposition to discharge their notes with gold and silver, when specie payments were resumed in the middlestates, and that the banks in the interior of the latier have frenerally pledged themselves to resume tiem, \&c so that there is no necessity for any further legal provision to restore uniformity to the circulating currency. Instructions have been issued to the receivers of public monies to conform to the resolution of the 30th April 1816. And as to the balanecs of public money depusited in the several baniss employed by the treasury; the secetary gives their amount as being more than fourteen miliions of clol lars: stating however, his belief "Unat no serions difliculiy will nocur in rendering the whole available on the operations of the treasury at least belore the last quarter of the year."

There is a "comfortible" report-and by what we hearfrom all quarters, there lias been much less difficulty in the resumption of specie payments than was apprehended. In Baltimore, it is pumbable, thist quite as much specic fias been deposited in the banks as las been drawn from cliem. It is to be lroped that while these institutions manifest a doign and determination to do all that they con to relitve the people of the incolivenience and loss. es necationed by the late derangement of our curreacy, that the people will discountenance all un. reasomable demands upon them, and support them in revisting every attemfit to thwart theil vitus of bringing us back to the good old static of things.

\section*{Record of Cold.}

The winter just pait, until about the middle of January, was uncominonly mild an! pleanan?. Al about that time there wis a considerabte fill of sาow, and the fields are pensrally covered thth it se, (Mareh 8) from which fine irups of grain are anticipated in Ule ensuing simmer. The cold wea. ther came on suddenly and severely, and continuel with very litte intermission until tile lill. and 1 bth of Puhruary, when it appears crery where in the Unitod States and parts adjacint io have arrived at its extreme.

The following memorandoms may be tiveful for fithure reforence -

On the 17 th of January, the crew of a trading vessel on lake Ponchartrain were frozen to death.

On the 22 nd of the same month, the thermome. ter at Augusta, Georgia, stood at 21 degrees below freezing point.

On the 30 th, the St. Lawrence was frozen lower down than it had been for half a century.

On the 13th and 14th of february, the degries on the thermometer were given about as follows:
\begin{tabular}{ll} 
At Montreal & \(30^{\circ}\) below zero. \\
Porland, Maine & 19 \\
Porlsmouth, N. H. & 14 \\
Newburyport & 20 \\
Providence & 15 \\
Hartford & \(1 \frac{1}{4}\) \\
New-York & 7 \\
Albany & 13 \\
Trenton, N. J. & 3 \\
Newark & 6 \\
Philadelphia & \(2 \frac{1}{2}\) \\
Baltimore & 4 \\
Washington City & ai zern.
\end{tabular}

At Hanover, in N. H. it is said to dave f.llen to 30 beiow 0 .

The werrimack was frozen over as far as the piers -sleighs passed and re passed with saiety.

Seven loaded !orscteams, pruceed ci on the ice. from Boston to fort Indejenclence, nis the 15th of February, and on the saice day to men catne y/p from Deer island, os the ice, and \(r^{-1}\) umed rgain.This island is about \(S\) miles fion Bnosimp. Horseteams, with wood, passing from Derehester point to fort Independence.

A party from New-Ynrik set out on a sleigh-ride from Flushing to Riker's island, and perfornted the route safely. This island is 7 miles liom the haro bor of Flus! ing, Long-Island.

The Chosapeabe bay was firmly frozen several inites below Annapolis.
The Ohin, at Merietta, was compietely brijered from the 20 th of January, and, abuit the 15 th of February, was passed with loadal vaggons is a comson lighwity, the ice beint 19 irelies thick.

T: the edztors of the . Aliany Cia-erte.
The singular facts stated beloir, oppear to me deserving of being preserved smt roticed. The cold of this day is severe. it \(915^{\circ} \mathrm{A} .9\). Wind N trot a cloud to be sem, and the mernary in a is win. dow on the \(S\) side of 1liviiion strect, st 3 below sero. I mention the position particul rly, bccatue a range of high brick houses, on the opposile sille, berides breaking the force of the \(\%\) wind, subjects the riace cury to the action of rellected light, from these trousca. At 1 p. 2s. going into a baek ronn 1 nit. ticed that the water was falling from the caye tremgh of a kitchen, in which there hod been no fire for some dars. The niercury in the N . Wiedow stood now, at \(\$\) abonve rero. I placed it in a \(S\) window and in 18 minutes, it rose to 58 . Fropi rell in the N wimbsw it fell, it 20 teihutes. 10 ? The houses oprosite, are, painted will, Sparis, browh, painlad in whicelead, and have white winder shimters. The puskion of the sun is sichel, at this loour, as to reilect a goal deal of light sind ligat, mind very eersibly tu diect the temperature of ilis potion. Xit a cloud to be ween, wind still \(X\)
From the greathe of this diflimerice of tempara. twer, in neritser: of tuthern expmiture, which is e-rtionly very unustel, I infer tine the atmos. plere, especially in thes \(S\). is overladed with rapor which increasen the retiaction and the power of the solar rayy, and that a change of temperature and of lieather nay be esprected swon, with sterma of
snow or rain. This is taking the averuge temperature of the open air, the coldest day of the present winter, by near \(5^{\circ}\) and colder than any other we have had here within 5 rears-though the water is falling fiom the caves of many of the bouses, and the sun has such power that many may be disposed to doubt the accuracy of these remarks, without attending to the singolar facts noticed above.

I have only further to add that the perple do not in their themmometrieal observations, pay sufficient attention to the position of their thermometers. In your last Gazette, 1 noticed observations on the Siberian severity of the cold of the present winter, at Montreal, and at Gardiner, in the district of Maine At Gardiner, on Jan. 14, it is sisid to have been 24 below zern, and on the 15, at 32; both observations at 7 A. m. The observer has noi samd whether his thermometer was a mercurial one-but as these are by far the most common I take it for granted that it was: nor has he described the position of the instrumen. It should be observed, that mercury is congealed to a solid at 39 to 40 below zero, of Falyenlicit's scule; and that at any degree of cold, below 16 to 18 , below zero, the indicutions of the mercurial thermometers are not to be relied on. The spirit of \(w\) ine endures a much greater degree of cold; and people in high northern lattitudes should always use their thermometers filled with this in preference to mercury. By placing two instruments side by side, in such a degree of cold as that noticed at Cardiner, or at Montreal, people, would soon discover the propriety of these remarks.

But I am too tedious; you will abridge at pleasure and may use what 1 have written in your own way. 1 : is now half past 2 o'clock p. 3. and the mercury has risen to \(8 \frac{3^{3}}{3}\) in the \(\mathbf{N}\). window. Were the houses opposite, removed, and the space open to the N. I presume the temperature of this position would now te from 3 to 5 lower-A remark that 1 add only to invite people to be more careful in noting positions of observation. Very respectfully, your friend,

HORATIO GATES SPAFFORD.
Albany, 2d mo. 5, 1817.

\section*{CONGRESS.}

\section*{SFiNATE.}

The following history and account of the bill "to set apart and pledge as a permanent fund for internal infnovennents the bonas of the national bank, and the U'uated Stutes' share of its dividends," cannot fail of interesting our readers:

The following is the bill as it came up from the house of representatives:
A bill to set apart and pledge, as a permanent fund for internal improvemens, the bonus of the natinnal bank, and the United States' share of its dividends.
Be it enacterl, Ec. 'That the bonus secured to the United States by the "act to incorporate the subscribers to the bank of the United Sta es," and tie dividends which slall arise from their shares in its capital stock during the present term of twenty years for which the proprietors theref have bee is incor porated, be, and the same are lrereby set apart and pledged as a fund for constructing roads and canals, and improving the navigation of water cour ses, in order to facilit:ite, promote and give security (1) internd conmerce among the several states, and Wo render more easy and less expensive the means and provisions necessary for their common defence.

Scc. 2. . Ind be it further enactoll, That the monies constiluling the said fund shall, from time to time, be applied in constructing such rouds or canals, or
(2: bu) 1. . 111 each state, as congress, with the assent of such state, shail by liw direct, and in the manner innst conducive to the gencral welfare; and the proportiun of the said money to be expended on the ohjects aforesaid, in e.ch state, slaal be in the ratio of its representation, at the time of such exp.andifure, in the most numarous branch of the national legislature.

Sec. 3. And be it further enacterl, That the said fund be put under the care of the secretary of the treasury for the time being; and that it shati be his duty, unless otherwise directed, to vest the said dividend, if not siecific liy appropriated by congress, in the stock of the Uni ed States; vhich tock shatl accrue to, and is herby constituted a pirt of the said fund.

Sec 4. Ind be it firther enacted. That it shall also be the duty of the sairl ssciet. ry, unlens ollerwise directed, io vest the hoo us for He charser of s: id batik, as it may fall duc, in the stock of the trited States; and also to lay before conkress, at the ir annual session, the condtion of nid \(f_{1}\) d.

Frbrugry 26.-A motion was Di..d, in piss pone the bill in' efintitely-leqatived as fill : y -
IEAS-Mr ssrs. Aslmiun, Brownn. Caruphell, Ch ce, Condit. Dago gett, Dana, Fromentits, Gailiard, Howe II. Hunter. Incun, Simeth, Thompson, Tichenur, Tromi, Varnum, Willians-1
NA YS-Mcsors. Barhour. Guhlsbir rough, Hardin, Hurs F.ig, Iacuck, Masom, of N. H. Masom, of Va. Morrow, Nu'J., Rumers Huggles, Sanford, Stukes, Talbut, Tait. Taylor wi \(11 \mathrm{~s}-19\)

February 27. - The bill being moler considera ion - Mr Ashmun offered the following provion:
"Provided, however, that no par" of aid fund shall be expended on any of the objects aforesaid within the state, without the assent of the legislature thereof: And provided also, that if any state shall refuse its assent as oforesaid, there shall be paid to such state such proportion of s.id money, as would be expended thertin, on the objects afiresaid, if such state had assented to said expenditure."
The question thereon was decided by yeas and nays as follow:
YEAS-Messrs. Ashmun, Condit, Daggett, Dana, Tichenor-5. NAYS-33.
A motion was made by Mr. Goldsborongh to strike out of the third section, after the word "duty" to the end of the section, and in lieu thereof to insert the following words:
"To apportion and divide the said fund, as it annually accrues, among the several states, now existmg, and such as may hereafier be admitted into the union, according to the then existing ratio of representation as before directed; and to invest the same, so apportioned and divide., in fimded deht of the United Slates; an dthe funded debt so set ip. rt in the names of the respective states, shall be applied to the aforesaid objects, under the concurrent direction of congress, and the legistature of the state interested, and he shall also lay before congress at their annual session the condition of the said fund."

The question whereupon was determined by tke folluwing vote:
YEAS-Messrs. Barbour, Brown, Fromentin, Goldsborough,Hanson. Horsty, King. Lacock, Mason, of N. H. Masoni. of Va. Morrow, Noble, Ruberts, Ruggles, Santurd, Stuk's, 'Tabot, 'rait, 'Taylor;' Thompsim, Wells-21.
NAYS-M.ssrs. Ashmun, Campbell, Chace, Condit, Drggett, 1)ana, Gaillard, Hardin, Howth1, Huhter, Macon, Smith, Tichenor, Troup, Varnam, Williams, Wilsun-17.

Many additional amendments were proposedby Mr. Campbell, limitting the appropriation of the divicends to the excess beyond the payment of the interest of the United States stock constituting the shares: negatived, ayes 17 , nays 21 .

Mr. liursey moved to add to the end of the secMr. Vursey movcd to adu to the en
tion a proviso in the following words:
"Provided, That the propow inn of said find to be issigned to anv state, ol any part thereof, may by the assent of such state be applied to the purposes aforesaid in any o her state."

This in "as decit br the following vote:
YE IS.-Messrso Harkour, Browh, Chaow. Frumentin, Guhdo boruugh, Howson, Ilardin, Horsery, Hunt.r, King, Leeock, Mavon, of y H Muson, of Va. Morr w Nohir, Rolwres, Ruggles, Sand rd, Stuken Tel'sut, Tait, Tnylor, Thorapsorh Tiehewor, Welles Wilson -25
NilS - If.aers. shmun, Caroptall. Candic, Duegert, Da:1a, Gail hard, How, l1, Micun, Smith, Trult, Varusua, Williaus-12.

Mr. Whzgeit offered a pravision which: had forits purpose a privilecre of diverting this fund in case of war-negratived, ayes 18 , noes 19.

The question inf realing the bill with the amend. merts, the thind ime, was decilerl as fnllows:

IFAS-Messrs. Rurbour, Bruwn, Frormatin, Gollahorough, Han son, Harilin, Horsey, Ki=G. Lurock, Mayyn, of N. H. Mawn, of Va. Murr iw, Nohl, Ruherte. Kuggles, Salliurd, Stuke Talbie, Tait, Taylor, iv lis, Wilson-22.

NAYY - Mesurso Ahrueui, Camphell, Chace, Condie. Dageitt, Dana. Guillard, if, well. Munter. Marou, Sinith, Thompeosh, Iivie. bor Troup, Varnum, Williams-16.

Ifter another proposition for amendinent, by Vr \(D\) itegett, which was negatived-yeas 14 , nsys 21. the q Iestion on the passage of the bill was cleciderl as \(\mathrm{f} \| \mathrm{H} w\) :

YE IS-II wrs. Barbutr, Brown, Fromeatil, Colds'wrough, Hamson. Hinti Hors Fing. Lacoch, Mason, of N. H Masoli, of Va. Mores is. Roherts, fuggles, Sonfurl, Stokia, Tait, Taylor, Wells, Wiite of - 0 .
 Pari, Howell, Ithier, İacon, Nuble, Smith, Thomesow, Tichenor, Troup, Var sum, Williaws-15.

\section*{Other procpedings of the senate.}

The bill on allthorize the state of Tennessee in issu* grants ind perfect fitles on certain entries and loctions of lands therein described, rogether with the amendments renorted thereto by the se. lect commit ee, wa nodered to a third readmg by th foll win rente:

YP: A\&- Sqessre, Ashmun, Prown, Campb-ll, Dngert, Fromentin, Goldsbumugh, Hardin. Horey, Hiow HI, Lacock, Morruw, Nuble. Roberte Reneel of Sanforl. Stok a Tathat. Taic Taylor, Thompson. Tich.nur, Trump. Willia ns- 83.

NAYצ-M asr: Conslit, Dima, Gaillard, Nacon, Mason, of N. H. Bmith Varnum, Wilson-8.

T' e sensto took up the hill to incorporate the unchartered honks in this district: and a motion was marte hy Irr. King, to mosipone the further colvileration of the bill indefinitely.

Tha ries"ion was, after debate, decided as fol lowe.

Fifis. - M sura. Ashmur, Cowlip, Hunter, King. Maenn, Mason, of ₹. H. Mownow, Smith, Tait, Thomsuson, Tichenor, Wit Sinv
XAYS - Meors. Borhour, Browis, Camplafll. Chace. Dageit 11 Du in Fio it I Gi-ill Ir!. Gollthoruugh, 1 Fanmon, Horsey, How ell. IV ient of Vh. Nolte. Rohherte, Ruğles, Sanfiord, Stokes. Tayo Jor, Tronij, Virnium, Welle. Wilvin-23.

The senate then proceeded tu consider the details of \(t^{\prime}\), Rill

Before the senate adjourred, this hill was ordered wine \({ }^{\prime \prime}\) ems ed for a third rearting in-morrow.

Fph is \&s Mitrch 1.-The hill concerning per. sons escaping from the service of their masters, W \&, nin minn of Mr. Traif, postponcit to a dav be. yon I the session. [The ohject of this bill, was io prevent kidnapping free perwins as slaves; the ols. jer in" was, that it woull afforl impunitr almont absolute to slaves deserting the service of their owners !

The bill to extend the charters of the chartered banks in 11p Wiatrict of Columlia, was, on mntinn of Mr. Cioldaborough, postponed to a day beyoud the session.

The bill more effectually to preserve the neutral relations of the United States, being before the senate, a motion was marle by Mr. Smish to post. pone it to a day beyond the session; which motion failed. Ieas 8 , nays 28.

Tre fill heing amended, finally passe 1 as follows: YEAS,-Messrs. Ashmuin, Barhour, Camplyell, Daec-tt, Goldsborough, Hanson. Hartin, Howell, Hunter, King. Lacerek, "ticon, Morrow, Ruhorts, Ruggles, Sauturd, Stoles, Tialhot, Tait, Paylor, Ticheror, Proup, w Its- 23.
NAYC-Messrs. Bruwn. Chacr. Dana, Fromentin, Gailisrd, Mae0n, of N. H. Nohle, Smith, Varnuus, Wilsotı-10.

Tice fislowing resolusinn was reported hy the committee, to whom was referred so much of the president's message as relates to an unifirmity of wrights and measures, and was adopted by the senate:

Resolvon, That it be referred to the secretary of atate to prepare and report to the senate a state \({ }_{2}\) ment relative to the regulation sud standards for weights and measures in the several states, and reIative proceedings in foreign conntries for establishing uniformity in weights and measures; together with such propositions, relative thereto, as may be proper to be arlopted in the United Siates.

The bill to repulate the tratle in piaster of Paris, haviug been so anended as to take effect on the \(4: l_{2}\) day of July (instead of the 1st day of May next) pasced hy the following votp:
YEAS,-Moars. Ashmun, Bwrbour, Brown, Camphell, Chace Co dit, Dackurt, Dama, Fromentiu, Gaillard. Turlin, IIomes, How oll, Hatuer, Kingo Laeock, Macull, Morrow, Nolle, Roberic Ru5
 Truup, Varuino, Willia lis, Wilsun- 32.
NAY. - M ars. Hausrih, Mason, of Va. Taylur.-3
, March 3.-The following \(r\) solution, movell by Mr Goldsboronigh, was afreed to:

Resolved mwanimgusly, That the thanks of the scnate be presentented to the honorabie Jous Gars. Laxn, for the ableand satisfactory manner in which he has discharged the duties of the president prote:npore of the senste since his appointment to that affice, and that this testimonial of their approbation and respect be entered upon their journal.

Whereupon Mr. Gailard rose, and addressed the senate as follows:
GENTLENEN OF TAE AFTATB,
The approbation of a body so respectable and distingrished as that which I have now the honor to address, is received with the most profound respect, and will ever be 10 me a source of pleasing and of grueful recoliection. "To the habits of order, of decorum, and attention io business, which so strongly mark the character of this finnorable boily, I have felt myself to be greatly indebied, Tul more, much more so, to that spirit of iibcrality and indulgence which has been extended to me 0.1 alt occasions, and which has been ever ready to overlouk my many deficienci-s and errors, uid to overrate my fceble lumble effinss which have been directeal with anxious solicitude to the faithful and impartial discharge of the duties of the chair. If, in the course of my official conduct, it should have been my aisfortume to have womded the feelings of any, honorable members, or in anght in have of. fended, I cau assure them that such affence was unintentional on my part, and \(t\) pray then to accept this apology as an atnacment. Lermit the now, gentlemen, in tender to you collectively, as weli as individuslly, iny grateful acknowledreinents for vour kindness, and my warmest wishes for your prosperity aud lappiness.
- March 4-About 11 n'clock Mr. Gaillavel, the president pro tempore of the senate, took the chair, and the fiollowiss trew members apponed (hesides those whose term of service did not expire yester day) were qualifict and took their seats:

From thode Indatid-Itumes Nurrill, jr.
From New.J rscy-. Muhion Jickerson.
From Massachusetts-Murrizon G: Oirs.
From Delawarc--Nicholas Fan Jyke.

Meisrs. Stokes, Sinish, Troup and Willia- 18, members of the last congress, re-appeared and also took their seats.

Mr. Fipes, from Virginia, Mr. Crittenden, from Kentucky, and Mr. Claborme from Louisiana, three other jew members, did not attend.

The vimepnesidest having appenred and taken bis seat, \&c. the senate adjourned to to-morrow. hotsif of ripresentatives.
Friday, February 23- Mr. Harrison submitted for consideratio: tlee following proposition to amend the constiution of the United Siates:

Resolved, by the senate and house of representatives of the ITritell Siates, in contgress ussenibleal, tzoo-thirdis of bosth honses conc:uring therein, ' That the following an endment to the constitution of the United States, be proposed to the lecrislature; of the several states, which, when ratified by the legislatures of threefom his of said sates, shall be valid to all intents and purposes, as a part of the said constitation:
"Congress shail, concurrent with the s'ates, have power to provide for training the mititix according to the discipline prescribed for that pirpose, and, whilst enfaged in that service, they shall be subject to the rules and regulations prescribed for the government of the militia when in the military ser vice of the United Siates, and also to provide for teaching in the primary schools, and otler semmaries of learning in the several states, the system of discipline prescribed for the militia."

The sidid proposition was read and ordered to lie on the lable.

Mr. Wurd, of N Y. offered a resolution to authorise the employment of col. Trimbull, to execuie, in addition to the painings already antho ised, a paining to commemorate the patriotic conduct of Paulding, Van Wart sud Wiliims, in capturing mijor Andre, 2 Irritish spy, during the American re-volution-read arid laid on the trible.

The bill to eaplain the act respecting military bounty lands, was indefinitely postponed.

Many bills were ordered to a third reading tomorrow.

Saturduy, DGaratz i.-ivany bills (which appear in the list of acts) were passed.

The house took up the ramendments of the senate to the bill seat fom this luuse, to amend the claims law of las? session-which amendments go to change altofether the character of the bill.

All which, after considera'sle opposition, were agreed to.

Ifs amenciments propored by the scate to the ameidments of the house to the bill from th:e senate "to provis'e for the promp: ecttiement of the public accounts," were read and concurred in by the house.

The amendments propored by the senatef to the bill "to set apart and pledge, as a permanens fund for internal improvement, the bonus of the national bank, and the United Sitates' slare of its diridends," were read.

A motion was made to postpone the bill indes. nitciy-negutived, ayc 61, liays \(63:\) and then to post. pone it until Wonday-rigatived, syes 66 , nays 68. The amendments of the senale were then agreerl to.

The bill to incorporate sundry banks in the District of Columbia was read the first and second time, and referred to a committec of the whole, by the casting vote of the speaker.

Several bills were oldered to a third readiar. Mr. Forsyth's resolutions about the conduct of the U S bank, were, on lis own motion, for want of time, indefinitely postponcd.

A motion was made io adjourn to to-morrow (Sunday) at \(110^{\circ}\) clocls, and negatived-yeas 68 , nays 48 .

Several bills passed through different states, and the house adjourned for one hour.

Ervining session, March 1.-Some time was spent on the bill making appropriations for claims for militia services by the state of Geo"gia, ag vinst the Indians, 25 years ago-laid on the table; tine to examine the bill heing wanting. As was also the bill, and for the same reason, from the senate, authorising the state of Tennessee to issue grants and perfect titles, \&c. Several bills were ordered to be engrnssed for at third reading on Monday.
. March 3.-Both houses adjourned afier midnight, after an ardunus session, with only one hour's cecess for the whole day. We have iot seen a detail of the proceedings, but much business was varionsly disposed of. See the list of acts, published in our last.

Immediately after the opening of the evenine sitting of the house of representatives, Mr. . Mitls, of Massachusettts, moved a resolution in the following words:
Resolved, That the thanks of this house be presented to the honorable Henry Clat, for the ability and impartiality with which he has presided over its deliberations, and the correctness with which he has performed the arduous duties of the chair."

This vote was carried with an unanimity the most flattering. [Mr. Mr pkinson observed that the only obj ction he had to it was, hat the house was thin, and that it would, therefore, not be seen that, if the house had been full, there would not have been a dissenting vote.] The motion was unanimously agreed to.
On adjowsing the house,
Sfr. Clay said, that, before he performed the last duty of the presiding officer of the house, he would avail himself of the occasion to make his respectful acknowledgements, for the flattering expression of fivorable opinion which had been recently made and whic! was rendered more interesting by the quarier from which it proceeded. Nezt to the approbation of one's own conscience, and one's sountiy, that of the immediate representatioe of the people must ever be most acceptable. But he felt that, in the instance of that just bestowed on him, he was more indebted to the kinlness than to the justice of the house. For he was quite sensible that, in the conrse of his administration of the duties of the chair, called upon as he frequently was, pomptly to decide conplicated and embarrassing questions, as they suddenly arose, he must have committed many error. And if he had been able, in any dicgree, to satisfy the just expectations of the hmuse, it was owing to that liberal support which had been, on all sides, generously accorded to him.

In legislation, Mr. C continued, there were three periods of extraordinary difficulty, and requiring great fortitude. The first was that which inmediately precedes a war, and in which preparation is made for the event. The second, that which accompanies the war'; and the third, that which imme. diately follows the war. During the two first, how. ever, there were animating circunstances, always existing, which invigorated the legislative function. buring the last the stimulus is gone, and being replaced by relasation, the legislator needs more icritude. He has to survey the whole fabric of the stric; to accommodate it to the new circumstances in which it is placed; to provide a revenne for releeming the debt of the war; to retrench; und, by the reduction of estathishments, to dismiss from the service of the comitry many of those who have nobly contributed to sustain its glory.
It has been your lot, gentlemen, to be cast in the
last of the three periods mentioned. And I take great pleasure, regarilless of the motives which may be ascribed to me, in testifying to the patience, the diligence, and the zeal which you have manifested in the public service. I am greatly deceived if, as the result of your labors, at no distant day, there will not be ackowledged to have been laid by you the deepest foundations of the national prosperity. That you may long continue to live to witness and to participate in that prosperity; and that you may experience, on your return to your respective homes, every blessing of which our nature is susceptible, is the ardent wish of one who, wherever lie may be, will never cease to cherish of all of you the most agreeable and affec ionate recollections.

It remained for him only to announce that the house stood adjourned sine die.

\section*{Legislature of Penusylvania.}

\section*{smatiz of perisigfania.-reb. 14, 1817.}

The following preamble and resolution were offered by Mr. Lowrie, and adopted, and a committee accordingly appointed.

The United States, remote from the governments of Europe, possessing a territory enriched with natural advantages and rescources, amply sufficient not only to supply the wants of the inhabitants, butalso to furnish in abundance the elegancies of civilized society; are by these circumstances favorably situated to become a manufacturing nation.

To assist in calling these advantages and resources into action-thereby rendering the United States independent of other nations-is a duty enfirceत by interest, patriotism and the love of independence.

The citizens of this state have already embarked extersive capitals in manufactures, particularly in iron and glass, woollen and cotton goods. But the late large and unprecedented importation of foreign articles, has given a shock to our infant manufactures, unprotected as they now are by discriminating duties; which, without the interposition of governinent, must result in the ruin of numbers of meritorious individuals, and also threatens the most serious and lasting injury to the future comforts and rising prospects of the commumity.

During this pressure, which militates against the best interests of the state, the fostering hand of government, as far as the same can bo extended, becomes necessary.

Therefore,
Resolved, That a committee be appointed to taike into view the situation of the manufactures of this state, and make report.
reb. 19, 1817.-Mr. Lowrie, from the committee to whom was referred the foreguing resolution, made report, which was read as fullows, viz.
The committce appointed on the 14 th inst. to take into view the situation of the manufactures of the state,

\section*{REPOLTT:}

That the short time allotted to them in the intervals of their logislative duties, has not enabled them to go into a detsiled investigation of the sub. ject committed to them. They have given to it all the attention in their power: the result las been, a strong conviction of the vital inpportance of mannfactures to this state and the nation.

The conunittec caunot believe that establish. ments to which other nations owe their greathess, can be injurious to ours. That the great powers of Europe, during five hundred sears, have been inattentive to the true sources of national great.
ness; that they would during that period have con. tinued with one uniform perseverance to which a!l other views of policy have been subservient, to promote, encourage, and eveli force into miturity their manufactures, if experience had not led thein to a coaviction of their vast importance. A vecurrence to history, and the present state of kiurope, witl most abundantly shew, that with manufactures mations rise and fall. The committee appreliend that the true course of national policy is foliowing the lessons of experience, and the example and practice of every nation which has risen to greatness. We think it not sound policy to persevere in those errors which have proved ruinots to others, and in the face of conviction which ought to flow from history, experience and our own obsurvation, to trust to the visionary expectation that the same c.uses which led to power in Europe will produce ruin here. That by crossing the Atlantic every maxim of national policy is reversed; that the connexion between causes and effects is dissolved; that every great and enlightened prince and nation in the old world have for centuries mistaken their vital interest, by not adhering to theories which have been exploded by practical experience.

Man and all his works are helpless in infancy. The noblest then require the protection and nourishment of a parent. Secing establislıments in their greatness, we are apt to forget the humble beginning from wtich they have risen; but when traced to their origin it will be found that in every enlightened government, they have been its nu:slings in their infancy. In such governments, manufactures have been the favorite and almost peculiar objects of their protection; the history of all the inamifacturing nations is full of proofs, that when. ever a manufacture is in its infancy, it is protected by duties, bounties, and premiums on the article; privileges, protection and encouragement, to the artisan; until the mounfacture has progresscal so as to supply the wante of the country. Tlien the exportation of the raw material, the importation of the manufactured article, the emigration of the workmen, and the communication of the knowletge of the art are prohibited under severe penalties, in some cases extending to the forfeiture of life. 'ive history of none of these nations can furnibh an instance of a manufacture being left to take care of itself, or of its success wheu unaided by government. The committee can discern no grod reason why this nation should not follow in the path which has been lighted by the experience ofothers, and inore especially where our own teaches us the immense advantage flowing from manafactures to the places where tiey have been established.
A memorable instance in our own state, is fire nished by the umexampled prosperity of litishmy its manufactures have given to it its imphrt mee. They have increased the value of every farm within 40 miles of it, by the market which it has affind. ed for the productions of the earth. The prossperity of this place, and the growing inportance of the country round it, leads nu to the true chuse why foreign governments are so zealous in protect. ing their own, ant endeavoring to ornsh our manufactures; they are known to be the real sources of nationa! life and power.
'The commi tee would ask, whether during the late war the estabhitunent of mambinctures liad an unjurions effict ont the value of land aljoining, or on the price of provitions? The farmer who adjuins a mamifacturing town cannot surely procure a betler price for his produce as the number of constmers dinninish. He cunnot be benefited by being
obliged to seek a more distant market; it must be all advantage to find a mark w it lome, withnut the experce of transportation. One hundred men employed in a manufacture, must add to the Immand for the produce of a farm, as there is that addi ional number to feed. A rumpike road or a country town, is of advantage to the farmer; it gives him a market at his door, and he there procures the prices of Gre distant market.

The saine effects flow finm manufactures; thei increase the demand and afford a market on the spot We believe there is no farmer who thinks his intereat, as an agricul'uralist, is injured by his contiguity to roads, towns, mills, iron works, cot ton, woolten or ghiss mamufactories. Oal the contrary, he knows and feels th.t his land produce rises in valle; that he is emiched, while ne spends no capial and cuns no risk. The committee think that all the errors which have atfected public opi nion on this subject have arisen from viewing it in the abstract, and not bringing it home to practical observition.

I will be probahly impossible to point ont one sput in the country which has heen injured hy the pospe \(i\) ' \(y\) and bencif ed by the destruc ion of mamfactures and the substitnion of foreign goots. It would require much refined and theorielis réasoning to convince our farmers that they will grow rich by purchusing their families' olothing at a store, and poor if it was made at home. The knitling needle, the wheel and the loom have been deemed useful arricles of household furniture. What yeoman deres not display with pride and pleasure the clothing made by his wife and daughters? Can such a man be convinced, that he would be more respected and richer if his farnily remained in idleness? Are heavy merclaat's bills clogs or aids to agricilture? Would it not require the same reasoning to con vince a farmer that it was as much his interest tr, buy his bread as his stockings? The committee can perceive no difference between family manufac tures and more extensive unes, other than in the extent of the benefits; for what is profitable on a small scale must be so on a large one, as machinery with half the labor prodices louble the profits.

By thus testing these priuciples and making a practicable application to families, we come to a result which carnot be crronerous. The family whic buys more than it sells, must be in : lebt and becom poir, and it matters not whether the deht is con traced for food or miment. The family which sells more thall it buys must becume rich. Theve effecis inis be the sime, whether the family consists of \(10,100.1000\), or a nation; for the aggregate cannot prosper by pursuing measures which ruin all the component individuals Prudence and economy are as nece sary to a nation as an individual, and thus we find that the indivilhat and the nation whict manufactures most, are alike distinguished among their neigition's for wealth, influence and honor; and thus are the lessons of history and experience confirmed by the observation of every man in his own family.

It surely cannot be safe to disregard such moni tors: this should be to every one that hears \(i\), the voice of conviction. Folly in an individual canno be wisdom in a nation; the same conduct whic would inpoverish the one canmot emrich the other To he statesman who says that it is true polic on export the raw material and import the m mufacined, the question may be put, would not the famer be in the road to ruin who woutd sell his grain an I buy his flour; his flax, and buy his linen; his milk, and buy his butter and cheese? If he would, it is
stranse \(\cdot\).at the nation is enriched by exporting tox b, co and importing snuff; cotton and wool, and impring cioti; irn, and importing nails and cutlery The same profit which the farmer makes ol: the labor emploved in converting his flax or wool into cloth, is made by the nation on a great scale in converting the raw material into manufactures. Cotton is exported at 20 cents a prumd; it is imported \(m\) inufac ured at frimm 1 dollar io 10 us inllars a pound, according to the fineness of the fahric. The difference in the price, is the profit which we pay and Englan! receives. If it injured them, it is strange they would mainufacture it. If a profit aftends it, it ough to be ours, If manufactures \(h\) id an injurious effect on agriculture, it must be in the depression of the prices of provisions; but experience nroves the reverse. We feed the mamifictures of Ewope-the reason is ohvions; the produce of the earth commands a better price.

This fact we think affords a salutary lesson; the manufactures of Eugland afford to their farmers a market at home, wrile ours are obligerl to seek it across the ocean. Their's pay no transrortation and :un no i \(k\); we are obliged to enconnter the perils of n.wigution, of enemies, of orders in council, decrees \(n-1\) pirates. If the export of the raw material is inore advantageous than the manufacture, we cannot comprehend the policy of all enlightened governments, except unrs, which prohibits the export of one and the import of the other; and still less can we comprehend the wisdom of those statesmen who contend, that to convert into money those productions of the earth which calnot be exported and for all purposes except manufactures, are of no value, (as iron ore) is bad policy. By these means, millions are annually added to the produce of this state; and the cammittee believe that it equally couduces to national wealth, whether money is extracied from the bowels of the earth or from its surface; each mode adds to the public stock as it adds to the value of property, produce and the sum of wealth.
It is certain that population, industry and wealth, are efficient sources of national wealth. How fal manufuctures conduce to these objects, the opinion of this nation expressed through the fathers of our independence, the immortal congress of 1774 , seems to the commitlee conclusive. They recommended by a solemn resolntion, that no manufacture of Fingland should be used or worn If in their opinion this was then necessary to rescue us from colonial bondage, if it was adopted as one of the means the most effectual to resist the tyranny of the mother conntry, it was becanse experience and reflection nad convinced them, that she was most vulnerable through her manufictures. For the same reason the continental system of France has in latter days been directed, not against the territory or the agriculture of Eugland, but her manufactures, the known and acknowledged source of her supremacy.
The committee cannot believe that the great principles of national policy can have been so sonn reverserd, und think that the same principles which were in 1774 necessary to rescue us, are now the only ones which can prevent us from relapsing into - virtual bendage to the parent country-that the comsess of that year were not ignorant of the true interest of the conntry-that manufactures were hen, now are, and ever will be, the vital sources of national life and power; and that it is not reserved to the theorist of the present day to teach our own, and the enlightened statesmen of all other count ries, that the true principle of legislation has been hither. to undiscovered.

Prom personal knowlelgre and undoubted inform. tion. the committee believe, that in all parts of the country our mausufictu-es are rapidly declining and sinking unter a foreign combination and forced imporlaim, a:nd the unvillinguess of the government to protect and uphold them. The in'ensios to crush our manufactures has been publicly avowed in Engl and, and has un been resisted here; thoy are lof to contenct unakled anct urprotecte I, g inst confc lerac a'road ant iudifferer ce at linme. Tine combnittee think that the sttemtinn of hovem'ne ut has been drawn to smaller, an ! directell frou the more important concerns of the coultr!-the! thisk manufictures the primary one, and tha before the are finally crushed, some effints should be mile to revive them; once abudoned they are gone for many years. The committee are aware, and leepis regrel, that the state governments can afford us efficient protection; but they can do something: they can exempt them from taxation, and workmen while actually employed therein, fom milivia dut! -and they can recommend the subject to the attention of the members of the legislature of the union.

The committ \(e\) e therefore offer the following resorlutions:

Resolved, That a commiltee be appointed to bring in a bill embracing the above principies.

Resolved, by the senate and t.onse of representatives of the commonweatth of Pensylvania, in gene. ral assembly met, that our senators in congress be instructed and our members in the luouse of repre sentatives requested, to use their endeavors to have such measures adopted, as will effectually protec. and encourage the manafactures of the United States.

In the house of representatives, the fillowing proposition was moved some days ago by Dr. Rogers: DR. hogilus' resolutions.
Whereas, we most solemnly believe in the exist. ence of a God and a Provilence, who created and sustains the universe, in whose hand are the des tinies of kingiloms, of empires, and all created be-ings-that it was the angel of Divine Providence. who walked with our fathers through the fiery fin. nace of the revolutionary war, and gave us a name among the nations of the earth, the most free, in dependent and bappy; that through the benignity of the same Providence, we have beell protected, through a recent bloody conflict, in the enjoyment of the inestimable privileges of religious and civil liberty; and that it is to the sume Providence we must look for the preservation of those blessings. Under these serious and solemn impressions, we recollect with deep regrat, that in so important an instrument as the "constitution of the Cruitcod States," there is no recognition of the existence of a Goul or acknowledgment of the benignity of a Irovidence.

To remedy this material defect, we feel it our indispensable duty to submit the following resolu tions:

Hesolved, By the senate and house of representatives of the commonwealth of Pennsylvania, that our senators in the congress of the United States be instructed, and our representatives requested, to use their earnest endeavors to have the preamble to the constitution of the United States sis ancuded as to read as follown, viz.

In the name of Gort most holy and moss mercifnlWe the penple of the United states, in order in form a more perfect union, establish justice, insure domestic iranquility, provide for the common defence, promote the general welfare, an I secure the
b singrs of liberty to ourselves and our posterity, \(g\) trfilly uckenozviedging the benign Providence by zo'ich we hroe bren ruised to the rank of an inclepen. dent nati \(n\), and insploring fo our belavied country its centinued protection: Do ordain and establish the folloving constitution for the United States of Ame. rica

Resolved. That the governor be requested to forward a cups of the foregoing preamble and reso. lution in eac'l of our senstors and representatives in the congress of the United States, and to the executives of the several states in the union, with 4 req:test that the same may be laid before the legislatures thereof.

The question was taken on agreeing to the foresoing proposition, and decided in the negative, by a large majority.

\section*{Legislature of New York.}

A reference will probably often be made to the vote below, we insert it for the convenience of our friends in New-Yolk.

\section*{Uegislature of Delaware. GOVERNOR'S ADDRESS.}

Gentlemen of the senute, and Genulemen of the house of representatives:
In obedience to the voice of my fellow citizens, 1 appear before you this tay, for the purpose of entering on the exercise of the duties of the first ma. gistrate of the state. Permit me to tender, through you, to my fellow citizens, my grateful acknowleilgements for their partiality and kindness. The ho. nor they have conferred upon me, I will endeavor to merit by constant and umremitted exertions in perform the duties of the station to which their suflrages have called me. My only object shall be to act, with a single eve for the public good and the happiness and prosperity of the people. I shall indeed be most happry, if my exertions should be crowned with success and lie favorably re. ccived. But I cannot flitter myself, that my ad. ministration will be excmpt from errors. Such an expectation would be presuinituous. lielying how.
ever for support, on the goodness of that Almighty being, who has so peculiarly blessed the American people; on the rectitude of my own intentions, and on your co-operation and assistance, I hope that the errors I may commit, may reither be many nor injurious. And I trust that all my public acts may be examined dispassionately and judged of charitably.

A!low me, gentlemen, on this occasion to suggest to you the great importance of inculcating the highest regard and veneration for the constitution of the United States. That sacred instrument was formed by the best and wisest men, at a time peculiarly favorable. It was the result of a spirit of amity and of mutual deference and concession among the several states. It is the bond of their union, and that whic! alone renders the American nation powerful and respectable. It contains all the great essentials of a free government, and on it depends in a very particular manner the independence of this state and the freedom and happiness of its citizens. Amendments, therefore, that may be proposed to it should be received by us with great coidness and caution, and should not be acceded to without the very fullest conviction of their absolute necessity, let then: come from what source they may. If alterations be lightly made ther may succeed one another till the great principies whicis it contains are entirely departed from and all respect for it is totally lost. Let us then chenish it as "the palladium of our political safety and prosperity"-let us "watch for its preservation wili jeaious anxiety" and "discountenance whatever hay sugsest even a suspicion that it can in any event be abandoned."

Our state constitution is also entitled to the highest respect and reverence, and its provisions slould be fatithfulty observed. There is not however the same danfer to be apprehended from examining into its provisions and amending them where amendinents may be found necessary, that there is it regard to tire constitution of the United States. Amendinents to our state constitution ought, though, to be made with great caution and only for sound and weighty reasons. The provision contuined in it respecting amendments, is wise and jucicious, and prevents rash and precipitate alterations.

It is our duty, gentlemen, at the same time, that we protect and guard with the greatest care and circumspection the sovereignty and rights of this state, to cultivate harmony and a good understand ing with the government of the United States. As a member of the union, it is incumbent on us faithfuily to perform all our duties to the general government and our sister states, and to contribute as far as lies in our power to the strength, prosperity and glory of the American empire. In the performance of these duties, and the advancement of these objects, the people of Delaware will add to the respectability of their state and increase their own prosperity and happiness; for as we inerease the strength, prosperity and glory of our own state, so do we contribute to the strength, prosperity and glory of the United States. Let us all then, both as public and private citizens, be extremely cautions not to excite the spirit of party. It has been the destroying angel of republics. "In governments of a popular character and purely elec tive, it is a spirit not to be encouraged. From their natural tendency, it is certain, there will always be enough of that spirit for every salutary purpose; and there being constant danger of excess, the effort sught to be, by force of public opinion, to mitigate
and assuage it."-L.et us entertain no partialities for foreign nations; but let us be Americans only in affection, in sentiment and deerl. L.et us encourage a manly, patriotic and enterprising spirit.-l.et us cherish the agriculture, manufactures and commerce of our own country and endeavor to render her really independent of all other nations. Let us be careful and assiduous in the education of our youth; and in the dissemination of knowledge and the useful arts among us, and by all means let us cultivate the most sincere regard and reverence for morality, virtue and religion; those main pillars which support the fabric of republicanisin: destitute of these, our free constitutions and laws will become as waste paper, the people will cease to be true to themselves; liberty will be banished the land, and slavery and oppression will triumpls in its stead.

I proceed gentlemen, to take the naths of office; and if I deem it necessary during the continuance of your session to direct your attention to any particular objects of legislation, in addition to those already suggested by your own wisdom and intelligence and the recommendation of my predecessor, it shall be done by message. And may the supreme ruler of the Universe preside over your deliberations, and so direct all your proceedings, that they may redound to lis glory and the safety and happiness of the people.

JOHN CLARK
Dover, January 21, 1817.

\section*{Legislature of Kentucky.}

The yeas and nays on the question relative to the election of a neve governor to supply the vacancy oceavioned by the decease of the lseloved Madison, may be useful to our friends in that state, and are therefore given.
For a newo election.- [Mr. Speaker,] Messrs. Armstrong, Baro bour, Breckenridge, Clarke, Cobuin, Dallam, Davenport, Duncan [of Daviess], Fleming, Gaines, Hart, Hickman, Hopson, Hunter, James, I. Jones, Irvine, Laekey, Metealfe, Owings. Parker, Kice, Jannes, I. Jones, Irvine, Laekey, Metealfe, Owin
South, Trigg, Turner, Wall, and D. White-28.

Against \& nerv election.-Messrs. Brrrett, Birney, Blackburn Booker, Bowinan, Caldweम, Carson, Cook, Cotton, Cox, Cunimins Cunuingham, Davidson, Davis, Dollahide, Duncau [of Lincoln] Eeglestun, Ewing, Ford, Gaither, Garrison, Gilmore, Given, Guod, Gramt, Green, Grundy, Harrison, Hawkins, Helm, Holeıan1, Hornbeck, H. Jones, Logan, Love, Marshall, Mercer, Mills, Moorman, Munrue, M•Cown, M•Hattan, M'Maban, M'Milien, Reeves, Rubertson, Rowan, Rudd, Shepherd, Slanghter, Spillman, S. Stephenson Stapp, T. Stevenson, Todd, True, Underwoud, Ward, P. White, Wier, Wickliff, Woods, and Yantis-62.

ADDHESS TO JAMES MADISON.
The legislature of this state adopted the following address, and respectfully solicited his excellency Gabriel Slaughter, lieutenant governor, to transmit it to the president:-

Sin-The legislature of Kentucky present your with an expression of their feelings and sentiments on the close of your administration. We know that the approbation of republican citizens is the noblest reward that can be conferred on their chief magistrate, and your approaching retirement will soon exhibit you on a level with other private citızens, distinguished for your virtues and past services-a situation where no congratulatory address can be supposed to elicit in retuen the favors of executive patronage. Your services in advocating the constitution of your country; in filling with fidelity many important offices under that government, and thereby promoting its welfare-in approaching the presidential chair-in conducting that archous and important office with correct policy-in managing the helm of state through a just and necessary, but a tempestuous and boisterous war, ditficult on ac. count of the power of the enemy, but rendered more dangrerous by faction af home-recommended sy your patiotism, prosecuied under your auspices,
and terminated gloriously by your undeviating perseveraice, presenti \(g\) a cris is cuknown to any other chief m.git tite since the adoption of our consti-tutiun-all dennand of us an unequivocal deciaration of your title to the lasting gratitude of the people of Kentucky; and while we cuntemplate with delight the elevated attitude of his natin anong the civilized governments of the age, we wil c erish with ple sture the memory of the man, who e talents and aricen th ve so eminently contributed to bis country's character and unsullied hono:

Mr liowan offered an amendment excepting from the ajprobation of the legislature so much of the president's conduct as related to his approbation and signiture of the compensation law, and the af. fuir at Bladensburg The question being taking on so much of the amendment as related to the compensation law, it passed in the negative-ayes 9noes 66. The:i on the affair at Bladensburg, and negatived-ayes 5 -noes 70 .
The following are the yeas and nays, on the passinge nf the witress-

Tit se ate cuscurred-those opposed to the address on the yeas and meys being called for, withdieew their opposilio:1 (say's the Argus) and the vote was entcred "unanir.ously."

\section*{General Armstrong privatcer. \\ The Weshingron City Weekly Gazelie, remark-} ing on the claim for indemnity, and the report of the comimittee of the senate oh the petition of the owners, observes:
"The report is unfavorable to the prayer of the petitioners, and the reasons set forth are just and conclusive. There is no fixed principle of law or equity under which the United States can be called upon to make goorla loss sustained under the circuinstances of the present case. In the attack and destruction of the general Armstrong, a flagrant violation of the nentrality of a port, was committed, and the law of nations and usages of civilized powers unite in pointing out the correct and acknow. ledged course in obtaining indemnification; and from the peculiar circumstances of this transaction, thers is no donbt but the Portugnese government will, on prompt representations, make good all the loss sus:ained on this occavion, and althonst not a subject pioper to be delated upon, we feel no dolbt that the Bri ish government will also reimburse the Portuguese government for the assumption of this clain, brought on by the imprudent zeal and culpable coaduct of her officers. It is, then, through the goverumint of the Unitad States, that the owners of the General Armstrong must seck redreas fiom Por. tugnl, and there can be little hessitation in declaring that nee effurts will be wanting to command jus. tice.
"The committee of the senate would not permit thimbelves to report without payig a just cribute to the gallane cfforts of capt. Recd, and his lithle crew, in repelling an attack made inder such dis-
an object of assonishment and just pride to the nation; anil the more that defence and its awful effecto ave examined, the more securel; we may rely on the skill and bravery of our officers and seamen. Captain Reed, we understand, is not interested in the General Armstrong, nor does he petition forindemnification or relief; he lise, however, no lesk, claims on the liberal consideration of his comntry."

\section*{The naval committee of the senate, to whom bas} been referred the memorial of Frederick Jenkins and Rensselar havens, in behalf of the owneps, officers and crew, of the late private ammed brig General Armistrons-

\section*{report-}

That the memorialists state, that on the 26 th of Scp. in the year 1814, while the private armed brig General Armstrong was lying at anchor in the port of Fayal, she was attacked by a superior British force, and, after a brave resistance by her commander, Samuel C. Reed and his valiant crew, was destroyed. They also state, that the vessel and armament cost forty-two thousand dollars, and pray that such relief, indemnity, or compensation, may. be extended to the owners, officers, and crew of lic privateer, as, under the peculiar circumstances attending her destruction, may be deemed by congress just and equitable.
The committee are left to conjecture the grounds on which the inemozialists rely for a remuneration or indemnity from their own government. It is presumed, however, that if the claim must be supported at all, on one of the two grounds. 1st. Because the vessel and armament were destroy ed by the public enemy, in a neutral port, and in violaof the laws of nations; or 2dly. Because the brave and gallant defence of captain Reed, his officers and crew, entitle them to the bounty of the government.
Thie committec are unable to perceive what rights of indemnity the citizens of the United States can acquire ayainst their own government for losses sustained in consequence of the violated rights of a third party. It is the duty, no doubt, of all governments to extend to the person and property of the citizen all the protection in their power. It is the end of all goveruments to do sn. It is the right of the citizen to make known his wrongs to his goverument, and it is the duty of the goverument to seek redress by such means as it may deem ex. pedient. The ncutrality of Portugal was grossly violated in the case of the private armed ship General Armstrong. It was the duty of that government to preserve her nentral character, und to protect the brig and all on board, from any hostile attack while in her port. Either from want of ability or inclination she failed to do so; but can this failute to support its own rights, and perform is dinty towards us, vest a right in an individual to come on his own govermment for indemnity on account of a pecuniary loss? The United States it is believed lave done or will do, what comports with their rights und their claaracter. That indemnity from Portugal for the loss of this property, shoild be insisted on as an affiair of state, is perhapes lighily proper; but the cornmittee cansot perceive how tho weakness or the delinquency of Portugal can impose on the United States the cluty of indemnifying the memorialists fur the loss of the brig and lier armament.
The committee believe that this opinion is in conformity with the practice of his government, and perhaps of all governments. Antccelent in the year 180\%, much property belonging to citizens of
the United States, has been wrongfully seized by the cruisers of France. In no case, kmown to the committee, did this government indemnify is citi zens from its own treasury. Incemnity was sought from France by negocistion, and obtained in the Louisiana convention. Citizens of the United States, at this muluent, have claims to 2 vast amount against the governments of France, Spain and Naples, for property seized in violalion of all right. On principle, all these claimants have the same right to demand indemnity from their own government as the memorialists in the present case; for, iv principle, the committee ean see no distinction between a private armed ship and a merchant ship; nor between property captured and converted to the use of the captors, and property clestroyed by a third party omitting to do its detty.

If this is a mere appeal to the liberality of con gress; if the memorialists rely for the success of their application on the bravery, gallaniry, and good conduct of captain Reed, his officers and crew, in the defence of the vesscl, then the cominittee are sensible that a stronger case of the kind could not present itself. The stubborn bravery, the cool intrepidity and presence of mind displayed by captain Reed and his associates, in the defence of the ship, was, perhaps, never equalled, certainly never surpassed, by any private armed vessel, in the annals of naval warfare. It has excited the admiration of the nation, and cannot fail to immortalize those concerned. If actions like this are to be rewarded with money, too much could not be given; but goverument is but the trustee of the nation and is bound, deliberately, to examine into the prinrip!e on which the treasure of the nation is bestowed, and the extent of the precedent which is set in bestowing it. It is unknown to the committee that congress, as yet, has ever dispensed its bonnty, or in any way bestowed a gratuity for any achieve ment, except to its own peculiar force; nor in any case except there was victory. The committee are of opinion that it would be inexpedient to do so. It would open the treasury to a class of cases, arising out of the last war, which would be extensive and erroneous. The effect of such a measure nust be counted on, for they would be felt in all future wars.

The case of the Essex, attacked also in a neutral situation, was a strong one. The defence there ton was valiant, persevering, and highly honorable to all on board, as well as to the nation, yet congress has done nothing, for the essential quality of victesy was wanting to the transaction. The committee therefore, in whatever aspect they view the applica tion of the memorialists, are of opinion, that it would be unsafe and inexpedient to grant it, and recommend the following resolution :

Resolved, That the committee on naval affairs be discharged from the further consideration of the memorial of Frederick Jenkins and Rensselaer Havens.

\section*{Appointments and Promotions.}

By the president and senate, previous to the 4 th of March, and not heretofore announced.
Willian C. Bralley, of Vermont, to be agent under the fifth article of the treaty of peace with Great Britian.

Charles Pelham, of Kentucky, to be surveyor of the port of limestone, in Kentucky.

\section*{Foreign Articles.}
nNOLAND, \& c.
The city of London has taken a rery decided stand in favor of pariamentary reform, and against the present administration of the government; of which dhe people at large speak with uncommon freedom.

The papers teem with essays, which, by enlightening the people, must alarm their oppressors-whose whole reliance nou seens on the bayonel. If that fails them, as it failed in France, they must go.
.The magistrates in some parts of England have sgreed to represent to the chancellor of the exche quer the reduced state of the country by taxes anc rates, and the impossibility of paying those becoming due.

In Spitalfield's district, late famous for its prosperous manufactures, it is stated that nearly twu thirds of the people are unemployed. Many that used to live respectably have parted with their very beds and clothing to procure food for their fani-lies-after having sacrificed their looms and tools
\& Luddite, named James Towles, has been execut ed at Leicester. He conducted himself, says the account, with great propriety during his confine ment, "but elicited nothing that would at all impli. cate the Luddites, in whose dark and diabolical system he lias been the first to suffer."

The arrival of Mr. Hughes in Fingland is honorably noticed in the Lomdon papers, on account of his benevolence at Carthagena.

American stocks at London, December 30.-6 per cents 94.

The receipts of the British government, for the year past, however heavily the people are taxed, are about, or almost, an hundred millions of dollars less than its expenditures, and this amount must be borrowed to keep the wheels a-going.
Now, the whole debt of the United States amounts to about as much as this deficiency of the British revenue, in a time of peace, and after the "glorious victory of Waterloo"-and our debt will be reduced by nearly one-fourth of its amount in the present year, though the direct tax has ceased!
To relieve the people, the prince regent has recommended the general use of shoe-buckles, as a common article of dress. If the fashiont prevails in England, it will no doubt reach the United States, where we have fools enough ready to pay their portion of tribute to support the dignity of the British crown. Let us take it in time, and every head of a family resolve to resist this useless, tax gruther. ing fashion.

The Nazy. The state of the British navy stood thus on the 1st of January-at sea, 92 vessels, of which 10 were of the line and 30 frigates; in port and fitting 53 , of which 12 were of the line; guard ships 0 ; hospital and receiving ships 25-13 of them of the line; in commission 170, of which 35 were of the line, 4 from 50 to 44 guns, and 44 frigates; in ordinary and repairing 370, of these 115 were of the line, 16 from 50 to 44 guns, and 96 frigates; building 30,16 being of the line. Grand total of every descriptie: 570

The cry of distress is heard from all quarters hut circulars, from the department of state, call upon the lord lieutenants of the counties, to encourage the enrollment of respectable householders; to serve as special constables, and direct that the yenmanry corps s'tould always be held in readiness.

We see a pompous account of a ball given on hoard a Russian frigate lying off Woolwich, (Eng.) on the amiversary of the emperor's birth-we notice it on account of the following paragraph:
"The double ssund of a trumpet announced the arrival of the patriot Francis, who fought so gloriously in our cause in America: he was dressed in a most splenslid suit of red and gold, and by his side he wore a tomahawk, mounted in gold, presented to him by the prisce regent; he appeared much delighted with the appearance of the frigate."

We suppose this "pati iot Francis" is a savage.
In the parish of St. Leonard's, Shoreditch (says the "Statesman") there have been issued three thousandsix liundred warran ts of distress against inhabi-tant-householders, for default of the last quarter's poor-rate.
france, \&c.
Filure in an attempt at "restoration." We have a long and laughable account of an affiair between the priests and the people at Chatellerault, in France. The amount is, that the chief physician of the place lied without having received the sacrament, and the priests refused the customary rites to his, remains, the grand vicar approving their resolution.But the people, by whola the deceased was belored, forced the doors of the church, and caused the funeral procession to enter as usual, and compelled a few priests they laid hold of, to perform the common service for the dead. The inilitary was called out to stop this terrible outrage; but the people kept the soldiers at bay until the ceremony was completed! The affair made a great noise. Since then the people of the place have manifested a disposition to treat the priests-as they deserve.
There is a report that Carnot is confmed in the dungeons of Magdeburg, which, however, is doubted by some on account of the flattering treatment he had received from the allied sovereigns.

A London paper of the 18th of January, says king Louis has the dropsy, and that his case is hopeless.
The loan.-The French have succeeded in negociting a loan of 12 millions of?pounds sterling to meet the deficiency of the revenue for the yeur. The contractors are Baring \& Hope, of London; Parish \& Co. of Hamburg, and a banker at Paris. The terms are not stated-one half of the amount is to be paid in money, and one half in supplies for the allied troops in France; of whom, it is said, all but 30,000 are to be immediately withdrawn.

Paris Dec. 18.-From the establishment of the decimal system to August, 1816, the money coined amounts to \(1,629,666,538\) francs, of which 150 mil lions were gold. The moncy corined with the head of Louis XVIII. amounts already to \(213,815,4,75\) francs, of which 116 millions were in gold.

\section*{spain.}

The deficits of the Spanish revenue for 1815 and 1816 amount to thirty five millions of dollars. The estimated revenue for \(181 \%\) is not more promising, and there is a talk of attacking the fat incomes of the priests. But this will not do.

> portugal.

This country suffers exceedingly from the departure of men of capital and enterprize for Brazil.The British had better, at once, take it wholly under their "protection"-that is, make a colony of it. It is said, however, that the king is about to visit the country.

\section*{East indies.}

The loss by the late fire at the isle of France is estimated at ten millions of dollars- 1482 houses were burnt. The port is to remain open for 18 months, if sanctioned by the government of England.

A conspiracy of the natives against the Europeans in Java, is said to have been detected, for which many were put out of the way.
chiva.
Some new difficulties appear to exist between the Chinese and British at Canton. The latter have trespassed on the regulations of the former-the "security merchants" are orderec into the city, and the lighters are not permitted to go down with cargoes. The mandarin of Canton will bring the British commander to reason.
The purpose of the British embassy to China has
entirely failed. The emperor refused all the presents except the portraits of the king and queen of Eugland.

\section*{"spanish america."}

The defeat of the patriots near Barcelona, menfioned in our last paper, is now understood to be totally false-a thing of royal manufacture. On the contrary, they uppear to be generally successful, and steadily pushing towards the great end of their labors, in achieving the independence of their country.

Tise government of the united provinces of the Rio de la Plata have issued a decree to encourage privateering against the Spaniards. Particular rewards are promised to cruisers that shall intercept despatches or take transports with troops or munitions of war. The mode of boarding neutral vessels is prescribed. All prizes are to be free of duty and all articles of war. Negroes between 12 and 40 years of age, taken, are to be paid ror by govern-ment-to serve in the apuy, and after a certain period to be free. All not fit for service to be free at onoe. All ressels of little value, taken on the high seas are to be burned. In Peru the patriot warrior Don Manuel Ascensio Padella has deceased.
Our accounts from this country are pleasant. The cause of liberty, and hatred to tyranny, prospers. The Portuguese expedition does not appear in the least to alarm the people.

The disputes between the British and Spanish at Havana, relative to the specie saved from the British sloop of war Tay, have assumed a pretty serious appearance. The latter will not give up the cashthey also treated the captain and crew of the Tay most ignominiously, and trampled upon the British colors, \&ic.

It is again siated that the patriots contemplate the capiure of Pensacola. It lias a very fine harbor, and on that account would be of great importance to them. They ought to take it.

\section*{Agricultural. \\ [hovo dereaued.]}

The following report of the committee of agriailture and of clomestic inanufactures, are extracted from the Pittsfield Sun.

They were read in the order of procecdings of the late cattle shove and fuir in Pittsfield, and are deserving the attention of our agricultural readers. Probably the organzation of a visiting committes of farmers, to inspect crops standing in the field, is altogether original, and the eflect, we are told, very interesting liteven of the most respectable farmers of Berkshire, are sumanlly selected as a coinmitlee in award premiuins on crops. They meet at Pittsfield the carly part of July; receive from the ecerctary of the suciety all alstract of the names of candidates; their residence, and ivticles offerel for premium. The committee then sestle their route, and proceed from fasm to farm, usual ly followed by a train of anxio's spectatory. "The candidates being apprized of the day and route of the cominittee are well proviled with silhstantial home ennde fare to grect them under their roofs,The committee then enter juto the mille of their fields of grain, sticadal by the arxiout candelates: this proceeding from town to town till they have filfilled the duty assigned to them which reguirco sereral days.

The chairman of the enmmitee is tho fomer whon has producet the beit farm the yar preced. ins. and reccived the soctety's diplutia and an ea. emption from all taxes in the society thercafter.

Reronts.
The committee of the Berkshire agricultural society appointed for viewing crops standing in the fields, have faithfully attended to the discharge of their important trust and beg leave, respectfully, to report:

That they noticed with peculiar pleasure a growing attention to improvements in agriculture in every part of the county, where their duty calle them, which was gratifying to them especially 35 it Was manifest that these interesting results of ous own enquiries were principally owing to the efferis of your society in diffusing a laudable spinit of emulation among our farmers, which has stimulated a general ambition to excel, not only in rasing good. crops but keeping buildings and fences in hetter repair. It is, therefore, our earmect ini.. ... 3 , 1 , treaty, that a. memulrs or the society, and the somuliunty at large, will contribute liberally to the support of an institution so eminently calculated to do good to the whole corntry.
We will not, on this occasion, trespass on the time of the public by going into a detail as to the best method of fencing, of collecting and creating manures, or of raising and preserving fruit trees, and many other objects interesting to every furmer. It the same time we beg leave sirongly to recommend a gencral attention to these interesting o'sjects, that the society and posterity may derive knowledge and bencei from our experience.
Your committee cannot refrain from expressing their deep sense of gratitude and praise to Almigh. ty God, in blessing this people with such abundant crops of wheat, rye, oats, flas and pease, notwithstanding the uncominon coll, and severe drought, they were never greater. Indian corn having, for the same reasons, generally failed, the applicants on this article generously waved their premiums and are entitled to the thanks of the society. The candidates were numerous, and had the season been favorable, the whole community would have been sensible of the visible effects of your premiums.
On the suggestion of the president, your committee examined a mill, erected by capt. Merrills, for grinding Pluister of Pariy on an exiensive scale; and they beg leave to recommend it from its promised utility, as an object worthy of promium.
By order of the vievins committee of agriculture.
JUEL, BRADLEVY, Chairman.
The cominitlee of domestic manuf.ctures, afie: awarding the several preuiums made the follow ing remarks:
It is with regret your cominittcenntice an evident diminution of domestic manufactures the present yoar, probsbly occasioned by the peculiar situation of the times; but we notice with pleasue, a yarice ty of articles exhibied by sundry persous which though not namell in the list of premiuns, diseover a superior style of workinanship, the manufactures. of which, are entitled in the highest praise.

SOLOMUN WARRINER, ClO.

\section*{CHRONTCLE.}

Piovesyeravia. J'ublic ordanice and arms, in the arsenal at Philadelphia, ke. Onduanee, chie fly brase, 35 picces, \(12,9,6\) and 4 pounders; imuskets. 20,875 ; , flles, 1,2.35.

Nomination for Gurevor. At a convention of de. Iegates from the respective counties of the com. minwerlth of t'ansylvania, eiegted by the people for nominating a suitable person for the office of gavemor, present a representution for all but thece
counties. Jacob IFolgate was called to the chair, and Andrew Stewart and 1. D. Barnard appointed secretaries.

After an examination into the election of the delegates, William Finluy, V. B. Boileut and Isuac Weaver were put in nomination for goverhur, and a ballot being had, Mr. Finlay had 99, and Mr. Boileau 14 votes.
So it was agreed that William Finlay be recommended to the republicans of Pemnsylvania, to be 3pported as their candidate for governor at the ensuing eiection.
There has also been a convention at Curlisle for the same purpose-present, delegrates for thirteen counties and the city of Philadelphia. Hamiltan Humes in the chair, F. A. Muhlenburg, Presley C. Lane, Isaak ,..... -1 ralin Sleal, were pit in nomination, but all withdrawn except mefirst named, who was agreed upon unanimously to be re commended to the freemen of Pennsylvania for their support at the election in October next.
Both candidates are republicans.
Toust, drank at Piniladelphia on the 4th of March -"Cominerce-The jolly boat of the American seventy-four, called s.gricniture and manufactures."
Prisoners. In a brig lately arrived at Charleston, from London, there was brought twenty eight ne grnes, "taken prisoners during the late war," some of whom were supposed to be slaves.

The 4th of . March has been observed at many places with public feasts and toasts. The venerable John Adams was a guest at one of these at Bosson.
Niaval - The U. S. frigate Java, captain Perry, has arrived at Newport, and the slonp of var Ontarir, capt. Downes at Amapolis, from the Moditerranean, bearing dispatches from com. Chauncey, who, it is understood, has persuaded the dey of Hlgiers to recognize the treaty he made with com Derutur, with some unimportant modification. The dey, it is said, respects our nation very highly, but has given com. Chauncey rather to suppose hat he wil! not ubserve the treaty any longer than he can help Exmouth's attack seems, (as we supposed it would) to have been of real service to him-his works for defence are in a much better condition than ever they were, and he was preparing a new navy. Our squadron, generally, was at Port -Muhon, when these vessels left it.

We have thead noticed the decease of lient. Elliot. He died on board the Ontario in October tast.

\section*{MEDITERGANEAN APFAIRS.}

A vessel, arrived at Norfolk, brings the following mpy of a circular from commodore Chauncey to the Bediterranean consuls:
(cthcular.)
U. S. ship Wachington, Mahon, Jan. 1, 1817.

Sin-I am happy to inform you that the treaty of peace and amity was concluded with the dey and regency of Algiers, on the 25 th ult. which, in its principal features, is the same as the treaty of June, 1815.

Our relations with the other Barbary powers re. main as we could wish them, and the American trade has nothing to apprehend from the cruizers of either of those powers.

Be pleased to communicate this information to all the American merchants and ship masters within your district.

I have the honor to be, sir, very respectfully, your most obedient humble servant,
1. CLIAUNCEY.

To Bernard Henry, esq. U, S. consul, Gibraltar.

Com. .Macdonough. - The sword voted to tire he ro of Champlain by the state of New York, has beer presented to Irim in ample form, at Hartford, by a cosmit ee of gentlemen appointed by governor Tompkins for the purpose.

Gen. Juckson-Thomas Lee, Thomas Bennett and J. S. Richa:dson, escu is es, for he lalies of Charlest , \& C. haver"esentel (o the "rran of Orleans,'s t|rougl col. Hoyne and mil Gadnien, the elegant silver Vase propared at the il cost for lim.
D.fenow of the Delaweare.-Catp B.beock, of the U. S. corps of engineers, is dveriving for 24.000 perches of huilding s one and 60,060 bushels of lime; to be delivered at the Pea P ch.

Steam-hocits.-Sundry persons concerned in the Stad in 1 lerring fishery on the Potomac, have presented a petition to the Virginia legislature, praying that s ean boats may be forbidden to run in the month of April; bocause, they say, that the nuse of these Dnata, which may be heard several iniles, and the agitation of the air and water drive away thie fish.

Cum. Burney.-At the entertainment, by the citizens of Fraukfort, Ky. of com. Burney, the following loast wis given-
"Ow welcome g'uest, commodore Barney-So long' as bravery shali coristitute a tr it in the Aniericar charac er, so long will his fame rank high in the anmals of his coun ry."

On which he arose and addressed the company wi h-
"Fien!lemen-The honor which you have just conferred on me, claims my sincere thanks. It is the only rewaid a republican soldier should ask: that independence which 1 contributed to establish in the revoluion, and to maintain in the late war, \(y\) am ready to support with the last drop of my blond."

Ai the enter'ainment by the members of the legis \(\alpha\) lature, the tnasis given at which were, indeed, cx. cellent, the following was drank-
"Cominodore Bhirney, our gillant guest-Two wars, the land and the ocean, beal. witness that he is a patrint and soldier."

When this toast was drank, the commodore rose and said,
"Gentlemen-The testimony of respect whicl. you have this day given, is doubly dear to me, as commg from the legislature of Kentucky. I had the good fortume to the in seventeen batules during the revo. lution, in all of which the star pangle d bamer triumphed over the bloody cross, and in the late was I had the honor of being angrged in nine battles, with the same glorious result, except in the last, in which I was unfortunate, although not in fault. If there had been with me 200.1 Kentuckians insteacl of 7000 Mlarylanders, Washington Cily would not have been sacked, nor our country disgraced.
"If my arrangements shall permit, it is my intention to become a citizen of Kentucky-and when I die, I know that my bones will repose amons congenial spirits."

Treaseliy depaitment, March \(13 t h, 1817\).
Notice is hereby given, that funds have been assigned for the payment of such treasury notes, and the interest thereon, as are now due at the loan office in Boston, in the state of Massachuselts.

And the said treasury notes will accordingly be paid, upon the application of the holders thercof respectively, at the said loan office in Boiton, at any time prior to the 1 st day of May, 1817, after which day, interest will cease to be payable upot* the said treasury notes.

WM. H. CEAWFORD, Secretary of the treasury

After some rough calculations, I lave conclucled that the whole amount of taxes, assessments and dhties, directly or indirectly paid by the people of the Eniied States,for the actual support of their ge neral and state governments, including county and township rates of every description, may be esti:nated at about or under twenty five millions of dollars per annum-this takes in the payments for inte vest of the national and state debts; and contains in it a surplus sufficient for the support of all the clercy, \&c. Any that will take the trouble to examine Lhis will discover that Ihave probably rated it high (Houglh. The amount, supposing our eight millions of productive classes as being only equal to the \(8 i x\) millions in England, and rat ing them as six millions, requires an annual contribution of four dullars and ficencents from each, to answer all the purposes of covernment-and allowing one of every tive of these os be a mate capable of earning a dollar a day, there is required of him a little more than twenty clays \(i a\) sor per amnum.

The expenditures of England (proper) may be thus ro:tshly estimated-,
For the payment of the interest of the
matinnal debt, civil list, army and
naiv, \&c. \&c.
s'oor rates
T) thes

County raies
260,000,000
8,000,000
5,000,000
5,000,000
\&78,000,000
I beliere this is below the amount required. The lyst item is entirely a ghess. The aggregate is three innudred and forty-six millions of dollars, per an. rum, or fifty-seven dollars sixty-seven cents for each person of the productive classes, or for every 1a: ale, (as before, one in five of the whole popula(ivon) troo hundreel and eighty-eight days labor per an\(r \cdot m m\), at one dollar per day, without inchating the amount paid by dissenters for the support of their churches, \&c.
It is admittel, as a fact, by ministerial writers in Iingland, that one half of the zuages paid for labor is riized, in one zoay or another, by the government, and fiom this statement, it appears undeniably that it :nust be so.
Let the American ponder on these things-and find in them new motives to love his country and guard its institutions.
given befow. The amounts are only guessed at; but perhaps, they are not far from the truth-certainly not sufficiently so to affect a general result.

\section*{Io the editor-"modern antiquities."}

The following letter is from a gentleman of the society of Friends, or Quakers. Though we have no personal acquaintance with him, we have long heen familiar with his excellent character. The facts staterl are very interesting; especially as tending to establish the period when the calling of the yeas and nays in legislative bodies(a very important measure, bringing the representative immediately to the view of the constitnent) first begun. This has been considered an Americun practice; but when or where first used is not yet, perhaps, ascertained.
Respected citizen,
In the 10th vol. page 336,I observe the fol-lowing-"about the year 1683, or 1684, the legislature of Pemsylvania passed a resolution, that no member thereof should come to the house barefoot, or eat his bread and cheese on the steps"-1 know not where thee could have got the information, but believe it to be utterly false.* I have their votes and proccedings from the first to the revolutionary war, and know it is not to be found in them; nor is it probable that there were steps to the house-the rent of it annually was only \(£ 10-\mathrm{a}\) rent for 24 members, very moderate even in those happy days of simplicity and frugality.
Members of assembly had at that time six shillings per diem-in 1683, the house met at 7 o'clock \(^{\prime}\) in the morning; in 1690, at 6 o'clock in the morning, all present, and in 1693, at 5 o'clock in the morn-ing-if some of the information I give is not want. ed, it can do no injury and will be cheap. \(\dagger\)
In 1685, the first protest against the proceedings of the house, was entered on their votes, or journal.

In the same vol. I find that thee wishes to know, "when the practice of calling the yeas and nays in legislative bodies was first begun." In 1745, the legislature of Pennsylvania were requested to enter the yeas and nays on the votes of the liousethe request, it appears, was not granted. In 1754, is found the first instance of entering the yeas and nays on the said votes or journals.

In 1722, paper money was first made in Pennsylvania, and agreed that it should be lent to the people in small sums at 5 per cent. interest, and repaid in installments-the interest accruing to the province; which almost supported the government.

The issuing of paper money was (under Providence) a greater benefit to the province that any other act or proceeding ever had in it. How different from the bank mania now so prevalent, and which will bring down ruin sooner or later.

I am pleased to find so useful a book as thy Register edited by a whig.
II. Nïles, edl. Reg. Baltimore.

\section*{Manufactures.}

Copy of a letter from the hon. Thomas R. Gold, a representative in congress from Oneida county,
N. Y. to Charles Shaler, esq. dated

Washington, Feb. 21, 1816.
Dear Sir-I have read with much satisfaction

\section*{Productive classes,}

5,926,343
These items are taken from Colquhoun, except in respect to the paupers-which nozv is, probably, moder the real amount estimated, by at least half a niillion.

There ought, also, to be made a great deduction in the comparative amount of labor that the remaini'g classes can contribute, from the fact that the ar\(\because y\) and navy, in all parts of the world, employs about , ن0,000 mert.
the Pittsburg report on the subject of manufactures
*I do not recollect where the article alluded to first appeared. It was copied from some other paper, after running through the United States uncontradicted; having been originally published as in apposition to some of the "blue laws" of the New-Eingland states.

The gentleman paid the postage of his letter.
[E.bitor.

It discovers research; and that attention to the subject, fur want of which, it has suffered much. Inveterate prejudize is to be conquered, and the merits of the question unfolded to the public eye; this being done, the contest is at an end.

It has been a settled course with Englishmen to hold up to America bugbears to deter fiom manufuc. turing. Her writers on political economy insist that industry should be left to its own course, and government take no part, while her legislators have swelled the statute book with regulations on trade. Those writers proclaim inadufacturing destructive to the human constitution! while her historians and war annalists proclaim the British arms, notwithstanding all their manufactures, as invincible, as unpalsied by manufactures. In fine, Britain's oreed is short: to manufacture for the whole zoorld and smfer no nation to munufucture for her; and I am sorry to see too many Americans bending themselves to British policy. It is impossible to shut our eyes on the fact, and it is time for every friend to his country to rouse himself and diffuse an American spirit.

Would our own government do for manufactures Dne half Great Britain has done for hers, to raise them to the present pinacle, we inight soon bid defiance to all the efforts to cruslo our establishments.

Based as nur government is on popular feeling, I behold with pleasure that inanufactures are becoming the people's cause, and I will never believe that the people will manifest less wisdom and attachment to manufactures than what we now witness in the continental kingdoms of Europe. Great as their obligations are to Great Britain, those governments are not disposed to sacrifice to Euglish masufactures the interests of their own kingdoms.

I am, sir, very sincerely, yours.
BIIEF REMARK BY THE EDITOR.
The preceding is one of the most pithy and best pointed things we ever saw on the important subject to which it refers, and contains a volune for reflection. We trust that the cause of manufactures will be made the "people's callse"-for the home freling, abnut which we have said so much, gathers strengil every day; not omly becanse it is right in itself; but also because every day furnishes some new inducement or necessity for it.

The "Pitshurg report" alluded to is a very able one in cvery respect. We have it on our files for publiention, and it shall be inserted in the Register when we have firnished the public documents we believe it needful to publish.

\section*{Laws of the United States.}

An act more effectually to preserve the neutral relations of the United States.
Be is enacted by the senute and house of represensatives of the United States of America, in congress assemblecl, That if any person shall, within the limits of the U'nited States, fit out and arm, or altempt in fit out and arm, or procure to be fitted out and armed, or aliall knowingly be concerned in the fur. nisling, fitting out or arming of any such ship or reisel with intent that auch ship shall lee employed in the service of any forcign prince or state, or of a \(y\) colon!, district or peuple, to cruise or commit, hostilities, or to aid or cosplerate in any warlike measure whatever against the sulyjects, citizens or prop rty of any prince or state, or of any colnay, district or people with whom the Uniled Staten are at peace, every such person so offonding shall, upan convicsion, he adjudged guilty of a bigh mise
demeanor, and shall be punished and imprisoned at the discretion of the court in which the conviction shall be had, so as the fine to be imposed, shall in no case, be more than ten thousand dollars, and the term of imprisonment shall not exceed ten years; and every such ship or vessel, with her tackle, apparel and furniture, together with all ma* terials, arms, ammunition and stores, which may have been procured for the building and equipment thereof, shall be forfeited, one half to the use of any person who ahall give information, and the other half to the use of the United States.

Sec. 2. And be it further enacted, That the owners of all armed ships, sailing out of the ports of the United States, and owned wholly or in part by citizens thereof, slall enter into bond to the United States, with sufficient sureties, prior to clearing out the same, in double the amount of the value of the vessel and cargo on board, including her armament, that the said ship or vessel shall not be employed by such owners, in cruising or committing hostilities or in aiding or co-operating in any war. like measure against the subjects, citizens or pro. perty of any prince or state, or of any colony, dis. trict or people with whom the United States are at peace.

Sec. 3. And be it further enacted, That the collectors of the customs be, and they are hereby respectively authorised and required to detain any ves. sel manifestly btiilt for warlike purposes and about to depart from the United States, of which the cargo shall principally consist of arms and munitions of war, when the number of men shipped on boarl, or other circumstances, shall render it probable that such vessel is intended to be employed by the owner or owners to cruise or commit hostilities upon the subjects, citizetis or property of any prince or state, or of any colony, district or people, with whom the United states are at peace, until the decision of the president be had thereupon, or until the owner enters into bond, and sureties to tho United States, prior to clearing out the same, in double the amount of the value of the ressel and cargo on board, including her armament, that the said ship or vessel shall not be employed by the owier or owners, in cruising or committing hostilities, or aiding or co-operating in any warlike ineasure against the subjects, citizens or property of any prince or state, or of any colony, district of \({ }^{\circ}\) prople, with whom the United Siates are at peace.
Sec. 4. And be it further enacted, That if any person shall within the territory or jurisdiction of the C'nited States, increase or augment, or procure to be increased or angmented, of shall be knowingly concerned in increasing, or augmenting the force of any ship of war, cruiser, or other armed vessel, which at the time of her arrival within the United States, was a ship of war, cruiser, or armed vessel. in the service of a foreign prince, or state, or of any colony, district or people, or belonging to the sub)jects or citizens of any such prince, state, colony, divtrict or people, the same heing at war with aly foreign prince or state, with whom the United States are at peace, by adding to the number of size of the glus of such vessels prepared for usc, or by the addition thereto of any equipment, sole Iy applicable to war, every such person, so offend. iag. slafl upon conviction be adjudged guilty of a mixidemeanor, and shall be fined, and imprisoncel at the discretion of the court in which the convic. tion shall be had, so as that anch fines shall nung exccel one thousand dollars, nor the tera of tine prisonment be more thon one year.

Sec. 5. Ind be it furfher enarted. That this act shall continue in force for the term of two years. II. CLAY,

Speaker of the house of representatives. JOHN GALLL 1 RD.
President of the senate, pro tempore.
March 3, 1817.-Approved,
JAMES MADISON.

\section*{An act concerning the navigation of the United States.}

Pe it enacted by the senate and house of representa. tives of tise United Stutes of America, in congress as sembled. That after the thirtieth day of September nex. no goods, wares, or merchandise shall be impor ed ima the I'nited States from any foreign port or nlare, except in vessels of the Unitedi States, or in such foreign ressels as truly and wholly belong to the citizens, or subjects, of that country of which the goods are the growth, production, or manufacture; or from which such goods, wares, or merchandise ern only be, or most ustally are, first shipped for transportation: Provided, wevertheless, That this regulation shall not extend to the vessels of any fo. reign nation which has not adopted, and which shall not adopt, a similar regulation.

Sec. 2. And be it further enacted, That all goods, wares, or merchandise, imported into the United States contrary to the true intent and meaning of this act, and the ship or vessel, wherein the same shall be imported, together with her cargo, tackle, apparel, and furniture, shall be forfeited to the United States: and such good, wares, or merchandise, ehip, or vessel, and cargo, shall be liable to be seizell, prosecuted, and condemned, in like nanner, and under the same regulations, restrictions and p:ovisions, as have been heretofore established for the recovery, collection, distribution and remission of forfeitures to the United States by the several re verue laws.

Sec. 3. And be it further enacted, That after the thirtieth day of September next, the bounties and allowance now granted by law to the owners of boats or resseIs, engaged in the fisheries, shall be paid only on boats or vessels, the officers and at least three fourths of the crews of which shall be proved to the satisf. ction of the collector of the district where such boat or vessel shall belong, to be citizens of the United States, or persons not the subjects of any fureign prince or state.

Sec. 4. Aud be it further enacted, That no goods, wares, or merchandise, shall he imported, under penalty of forfeiture thereof, from one port of the United States to another port of the United States, in a vessel belonging wholly or in part to a subject of any foreign power; but this clause shall not be construed to prohibit the sailing of any forcign vessel from one to another port of the United States, provided no goods, wares, of merchandise, other than those imported in such vessel from some foreign port, and which shall not have been miladen, shall be carried from one port or place to another in the United States.
Sec. 5. And be it further enacted, That after the thirtieth day of Septembernext, there slall be paid a duty of fifty cents per ton upon every ship or vessel of the United States which shall be entered in a district in one state, from a distric in another state, except it be an adjoining state on the sea coast, or on a navigable rivel or lake, and except also it be a coasting vessel going from Long Islan!, in the state of New York, to the state of Jitiode Island or from the state of Rhote Island, to the stidl Long Island, having on board goods, wares, and merchandise,
taken in one state, to be delivered in another state: Prozided, That it shall not be paid, on any ship or vessel having a licence to trade between the different districts of the United States, or to carry on the bank or whale fisheries more than unce a year: Ind provided also, That if the owner of any such vessel or his agent, shall prove to the satisfaction of the collector, that three fourths at least of the crew thereof are American citizens, or persons not the subjects of any fareign prince or state, the duty to be paid in such case shall be only at the rate of six cents per ton; but nothing in this section shall be construed to repeal or affect an e:smption from tomage duty given by the eighth section of the act, entitled "An act to provide for the establishment of certain districts," and therein to amend an act entitled "An act to regulate the collection of duties on imports and tonnage, and for other purposes."
Sec. 6. And be it further enacted, That after the thirtieth day of September next, there shall be paid upon every ship or vessel of the United States, which shall be entered in the United States, from any foreign port or place, unless the officers and at least two thirds oîthe crew thereof shall be proved citizens of the United States, or persons not the subjects of any foreign prince or state, to the satisfaction of the collector, fifty cents per ton: And provided also, That this sectionshall not extend to ships or vessels of the United States, which are now on foreign voyages, or which may depart from the United States, prior to the first day of May next, until after their return to some port of the United States.
Sec. 7. Ind be it further enacterl, That the several bounties or remissions, or abatements of duty allowed by this act, in the case of a vessels having a certain proportion of seamen, who are American citizens, or persons not the snbjects of any foreign power, shall be allowed only in the case of vessels having such proportion of American seamen during their whole voyage, unless in case of sickness, death or desertion, or where the whole or part of the crew shall have been taken prisoners in the voyage.

\section*{Speaker of the house of representatives}

JOHN GAILLARD,

\section*{President of the senate pro tempore.}

March 1, 1817.-Approved,

\section*{JAMES MADISON.}

\section*{Legislature of Ohio.}
gotrbnon's missack.
[Accidentally omitted, heretofore]
Gentlemen of the senate, and house of representativess It will no doubt be highly gratifying to you, that your first meeting at the permanent seat of government, under the dispensation of a Divine providence, should be attended with many favorable circurastances. With a few exceptions the whole world is now freed fiom the turmoil and desolation of war, and restored to a state of tranquility and comfort; and even where war does exist, we find a people strugling to establish that independence and liberty, which our forefathers, afier similar efforts, established in this our happy country.

As neighbors, inhabiting the same continent, enlitled by every principle of justice to self government, the people of Sonth America merit our best wishes.

Our cointry generally, but particularly the state of Ohin, has been highly faroured.
We have been blessed with health; and although the scason appeared mo:e unpromising than any before experieneed, yet the earth brought forth hes
fruits in abundance, not only for our nwn \&ip i, but enough for the immense increase of population, and even a large excess for exportation. These, with many other blessings which we enjov in an eminent degree give that Almighty l3eing from whom they \(2 l l\) proceed, the highest claim to our most sincere and thankful acknowledgments.

Ohio posesses advantages that will, by the application of proper means, enable it to become a great agricultural and manufacturing state; and from the excellence of its soil and climate, perhaps no tract of country of the same extent on the globe is capable of supporting a greater population. This is now increasing beyond any former example, and no doubt at this time exceeds half a millions.

Such gentlemen, is the country, and its growing population which you now represent, and whose present prosperity and fiture destinies are measurable committed to your care and guidance.

The stations whi-h liave been assignerl to you, gentlemen, are no less responsible than honorible. A wide field is open for tha exercise of the talents, patriotism, and industry which will te found in yous honorable body, and the present state of the country will claim your particular zitention. The im. mence importation and consequent corsumption of articles of foreign mannfacture since the war, with other causes connerted with the suspention of specie payments and the restrictive system aclopted by the banking institutions; the disadvantages in the course of exchange with the Allantic states; and the uncertainty of the paper currency of the cointry, have, altogether, produced a scarcity of circulating medium, a state of embarrassment, inconvenience, and loss to the country seldom experienced.

Most of these evils will be done away by the adoption of economy and industry on the part of the community at large, aided by such wise legis. lative regulations as you, gentlemen, coming from every part of the state, with an intimate know. ledge of the wants and interests of your constitu. ents, may think proper to adopt.

Among the objects which claim your particular attentinn, are the public schools and the means of improving the mind of the rising generation, the navigable rivers and the public roads of the state.

The opportunity of acruiring an education in Ohio, has hitherto been confined to the few; and as a general dissemination of learning necessarily conduces to the improvement of morals and behavior, whilst, in effect, it gives to the people a more extensive knowledge of their rights, it becomes the legislature of a free state to adopt measures co extensive with their means to accomplish these objects.

The uavigable rivers and public roads, as the means of conveying the surplus pronluce of the country to market, are of the first imporlance to the state. Notwithstanding the great fertility of our soil, if the surplus produced from it, bcyond our own consumption, does not command a price sufficient to reward the husbandman, the spring to industry is in a great measure destroyed.

Ohio abounds in beantiful and ureful navigable rivers; these, however, require artificial aid to rencler their navigation safe; besides, many of them are almost entirely obstructed by mill-dams, which, under proper regulations, and with eflicient locks and slopes, miglat facilitate the navigution, lut, without, may be strictly considered public nui sances.

I recommed to your consideration the propricty of levving such a tax on the lands of the countrics
or. . hich ilie several navigable streams pess, as will be snfficient to render the navimi ion of them more safe and certain, and thap the sime be expended under the authority of a boand of commissioners appointed for that purpose, or such other authority as you may deem politic and proper.

The great advantages derived by the community at large from good roards, is self-evident. 'They promote convenience and facilitate intercmurse; thev give an additional value to the adjacent lands, and at all times increase the wealils of the country.

In proportion to the fertility of snil, is the difficulty generally of improving the rnads, especially if the country be level. A great pmportion nf this state is this situated, and hence much more labor is required in keeping the roads in repair, than where the ground is more uneven and less fertile.

It is evident, from past experience, that the present system for making and improving the roads, is defective, and does not praduce tlat result which the best interests of the state require. The advantage to the landholler, through or near whose land a good road passes, greatly exceeds the inconsiderable sum required of hito in tases. I therefore recommend to your consideration 2 revision of the present ro:d laws, and that suck a sysiem of taxation be adopted as will best suit the different parts of the state, and which, together with sich propor. tion of personal labnr as may be deemed necessary, will put and keep the roads in best repair.
The manner of expending the three per cent. on the net proceeds of the sale of public lands in O!ho, seems to be universally condemned; and experience has proved to every reflecting mind, that a bettes disposition may be made of it. Firmly persuade. of this, I again recommend to the consideration of the legislature the propriety of confining its expen. diture to the leading roads of the state, and, for that purpose, recommend the incorporation of companies, authorised to make permanent roads in such directions tlirough the state, as will best promote the general interest therenf; and that the legislature take, for the bencfit of the state, such propor tion of the capital stock as may be deemed proper to be paid out of the three per cent. fund; always applying the proceeds of such stock in like manner.

I am persuaded, gentlemen, that at a time so favorable as tine present, the infernal improvement of the state, generally, will reccive your particular attention. The amount reccived from the ponple in taxes, properly applied in this way, is returned to them with a compound interest, and their good sense will always lead them in apporse such a course. It is the improper application or waste, by false economy, of public monies, of which the people have a right in complain. It is mistaken connomy to refrain from taxing the community, when these tares can be applicd in the most piufita: ble manner to their advantage. Under these con. siderations, I recommend to jour cunsideration the propricty of continuing the present rate of tax lets on lands, even if the direct tax of the Uuited States should be discoulinued, anil that the surplus of tho revenue, beyond the ordinary expence of the go:em. ment, be applied towarils making such shbstantial and permanent improvements as the legislature shall direct.

The people of Indiana lave formed a coustitu. tion, and become a sovereign independent state. and no doubs will be firm supporters of the rights, liberties, and union of the gencral government.T'lie constitution they have arlopted in most of its provisions is very similar to our own, and I fee
hichly gratified that they have in the most unqualified manner prohibited slavery. From a similarity in our civil institutions, soil and climate, our habits, manners and customs will be nearly the same, which affords the best security for the most lasting harmony, between the two states.

The beauty and advantage of the site fixed on as the permanent seat of goverument of the state are more apparent as it progresses in improvement. You may for the present be subjected to some inconveliiences, but fron the fertility of the surrounding country and the extraordinary improvements made since its establishment, there is every reason to expect that in a short time the growih of the town will remedy these inconveniences.

Having set that example of piety to God, integrity, industry, larmony and economy in dis. clarge of the important duties committed to you, which your fellow citizens have a right to expect and your stations in society require at your hands, and having implored the blessings of that Almighty Being who governs the universe, on the result of your labours, you wvill return to your homes; with the pleasing reflection of having used all the means in your power to promote the best interests of your constituents, and will carry with you the highest claims to their approbation.
I sincerely hope that this your first session at the permanent seat of government may be attended with the most beneficial consequences to the good people of the state, and be held up as an example worthy the imitation of future legislatures. It will afford me the most sincere pleasure to co-operate with you in every measure tending to promote the welfare and happiness of the inhabitants of the state.

\section*{T. WORTHINGTON.}
columbes, dec. 3, 1816.

\section*{Legislature of Virginia.}

The following address to the presidient of the United States passel the house of delegates on the day of its date, 90 to 19, and was unanimously concyrred in tir the senate.
To James riludison, president of the Uniterl States.
Bсимомд, (V.) Feb. 21, 1817.
Sir,-At the moment when you are about to lay down the power with which the voluntary suffiages of an enlightened country have invested you, and to retire to that peaceful calm, which your devotion to the public service has hitherto denied you, the general assembly of Virginia cannot forbear to tender you in belialf of the good people of your native state, a brief expression of their esteem, their confidence, and their cordial wishes for your future happiness.

The present prosperous condition of the American republic, sheds a greater lustre on your administration, from the difficulties and embarrassınents which encountered you at the outset, and which peranacionsly attended you through the greater part of the same eventful period. When you enter ed on the duties of your ligh office, you found the two great rival powers of Europe in their unprincipled effurts at mutual annoyance, trampling on our dearest principles and violating our most indisputable rights. The policy which we adopted in preference to war, for which we were so ill prepared, and by which we must so greatly suffer, though it inflicted some punishment on our adversaries, did, also of necessity, iuflict the severest sufferings on ourselves: And when at length the utmost point of forbearance was reached, and your countrymen in-
dignantly appealed to arms, they encountered, with: out an ally or auxiliary, the nation of all others, to whose power they were most vulnerable.
The glorious events of that conflict are fresh in the minds, and deep in the hearts of all. Whatever may be the difference of opinion on the policy of war-lowever humanity and patrintism may deplore some of its disasters, every candid mind mulst admit that it affords abundant cause of national joy and exultation. It has taught us many valuable lessons in the science of government, by observation and experience, the only sure tests of political the. ory. It las proved to a doubting world that this confederation of republics, cemented only by the ties of love and cominon interest, can stand the rude shock of war-of war, too, made against the consent of a numerous, a zealous, and a compact minority. It has called forth a fervor of patriotism, which is at once the surest proof of the beneficence of our government and the best guard of its safety. The achievments of your gallant countrymen, by land and on the ocean, will make your administration a proud era in the annals of these states. They have given us our proper rank and character among the nations of the earth; have covered the American name with the glory of such solidity, that the passing current of time will but serve to increase its brightness.
The storm has passed away, and we are left with a serener sky and a purer atmosphere, to grow, to improve, to cherish those arts, which can give comfort or embellishment to human lite-and to enjoy, under the favor of heaven, the noble fruits of that government, which your wisdom contributed to form, your eloquence recommended to the confidence of your countrymen, and which your integrity and talents have so often, and so signally aided in carrying into successful operation.

In a few days, you, sir, like ourselves, will have surrendered up the power which has been entrusted to yoll, and return to the station of a private citizen. In that station, your example will still teach a most sulutary lesson to your conutry; and as your exaltation to the chair of state, has shewn that genius and talents, and virtue, are not the less appreciated for the veil which modesty has thrown around them, so it will be found that when divested of the splendor and power of office, you will continue to enjoy that richest reward of every generous mind, the affections and applause of a just and grateful people. Partaking of these sentiments in common with those we represent, in the lionest language of truth, we tender you our thanks for your long and faithful services, our admiration of your talents, our coufiflence in your integrity and devotion to the national welfare, and our ardent wish, that still illumining the public mind with the lights of your wisdom and experience, you may in healtlı and hap'. piness live many years, all ornainent and benefactor of your country.
Resolved by the general assembly of Virginia, That the governor of this commonwealth be requested to transmit, on behalf of the said general assem. bly, a copy of the preceding address to James Madison, the president of the United States.

\section*{On Indian Affairs.}

A letter addressed to the committee appointed on so much of the president's message, as relates to Indian affairs, by the superintendent of Indian trade.
Office of the Indian Trade, Georgeturon, Dec. 14, 1816. Sul,-I have had the honor of receiving your let.
ter of yesterday, wherein, "according to the instructions given you by the committee to whom was referred so much of the president's message as relates to the amelioration of the condition of the Indian tribes, you call upon me for any information that I may possess, in relation to the particular situations; and for a plan, if any has been thought of, best calculated to effect the liumane object recommended to congress."

Ihave the honor to state, in reply, that, so far as I have been able during the short period of my superintendence of this department, to gather information respecting the particular situation of the Aborigines of our country, it appears to ine, to remain nearly the same with that of the former periods of their history, excepting those tribes that inhabit the portions of country bordering on our frontier settlements and those that have for a lunger period been engaged in commerce with the United States' tralling hoouses.

The same devotion to the chace, and all those irregular habits, which from the beginning characterised the sons of our forests, yet predominateStill, however, there is no evidence of the existence of any principles in their nature, that might not be corrected by an enlarged and liberal policy, and this opinion is founded in the exception already taken to those tribes, who, from their proximity to the settlements of the whites, have learined those lessons which form the elements of a transition from 2 savage, to a civilized state. Those Creeks for example, who reside on Cha-ta-how-chee, near fort Mitchill, and east ward to Flint river, cultivate the soil with considerable success; and inany of them are clad in cloth, manufacured by theinselves. The same may be said of the Cherokees and Chickasaws. Those of the Chawanoes and Delaware tribes that resort to St. Louis to trade are mostly attired as we are; and by their conduct and manner of transacting business, furnish satisfactory evidence, as well in belialf of their tractableness, under even this sort of initiatory discipline as of their capacity for the pursuits of civil life. But in all cases of advancement, whecher it relates to the cultivation of the soil, or to manufacturing, we may trace their contiguity 10 , and intercourse with the whites.

The benevolent policy which organized this department, through which articles of the first ne. cessity are sent to the Indiant tribes, so far at least as they are embraced by the number of trading houses now established, and which are furnishisd to them in their own country, at an advance on their original cost, sufficient only to cover the expence of transportation: and given at those rates in exclange for their furs, and peltries, and whatever else of a mercliantable nature they have in dispose of, and for which a fair valuation is allowed. although it may not liave produced a cliange, to an extent as great as might liave been expecied as it respects their manner of life, yet it is manifest that greater bencfits would have resulted to them from this policy even in this view of the subject, but for the countervailing influence of avaricious traders, whose object is gain, and with many the means of acquiring it are perfectly indifferent. Those men, aware of the propensity of the Intlians, make the intoxicating beverage a leading article in the supplies, by which the Indian is first debancled, and then plundered, or if the traders offer payment at all, it is at such, rates as they shall fix; and then it is often made in spurious money, nor is it unusual for the respectable and sober Indians to be defrauded by their having passed upon them for genuine, that
which is counterfeit paper. One of the respectable delcgates from the Creek nation, now here, showed me a parcel of this counterfeit paper money, a few days ago, which he had received as genuine.
I have referred to these impositions, loping that suitable checks may be devised, which sliall lessen. if they do not destroy, the almost boundless extent to which they are now carried. They are called for, as well to secure the Indians in the er joyment of their rights, as to allay the vengeance which this system of fraud cannot but excite in them against even the likeness of their despoilers.
Well organized ageucies, and trading houses, appear to me to be annongst the best means for the management of the Indian tribes, whether in peace or wat; and if those which have heretofore been established, and those which are now in actual operation, have not produced, and do not produce a more visible alteration in their manner of life; and if the trap and the spear are not yet exchanged more generally for the hoe and the plough: yet 1 am not prepared to admit that this is owing to any radical defect in the system itself, but rather to the cliecks that have retarded the activity of its effects; to a want of its enlargement; and to the omission of what I conceive to be an important auxiliary, and which \(\mathbf{I}\) will presently refer to.
\(1 t\) must be admitted, that if the policy pursued by the goverument have not produced marks of a more civilized character (and it has not been entirely without success in that point of view) it has subserved the great principles of lumamity and jusfrice. Without its interference, and aid, articlea of the first necessity must have been dispensed with by those indians who have been served with them. Or, possessed by them at all, they must have been procured under circumstances of the most oppressive character, and which would certainly exist, were the aborigines dependent for their supplies, upon the unchecked avarice of private traders. Nor is this all-: he respectability and intellgence of the agents and factors; their attachment to our goverument and country; and we interest they take in whatever tends to the serurity of our frontier citizens, all serve to breath an in. fluence, which, when exercised in the indian seltlements, counteracts much of the evil that would otherwise result, as well from the excitements oc casioned by the conduct of private traders, as from the machinations of disaffected and desir,ning men. The very calling of a factor is concilistory in its tendency - and the representations of afents are of. ten required to cool the inflamable materials, turowin in amongst the indians, whether by accident or de. sign. United they cannot fail to promnte those friendly relations which it is so desirable should be kept up with nur border ueighbors

This view of the subject is sustained by the phcific disposition manifested annong thore iriber lias have a more constant intercourse with the whites and with the factorics, aloove that whiche exists monong those whose settlements are bejord the reach of this influence.
Proin this is may be inferred, that in increase the number of agencies and factories, by extent ling them farther to the north, and en the went, would be to promote these pacific dixpositions, and serve the great olyject of huin inity.
1 would recominend thereffire, as a part of a pl in which is in iny opinion well "calculated to elfect the humane objects recommended to conkrens," ati increase of the number of factories, which, in proportion to the extent that it may be tho't prope: io carry then, will require a correspondent appro
pri ion - the capital now employed bume wi sulticient to sustain the trade already establisied.

Fior a deaaited account of the firms, incteding the ino!e of accounting at this office; a state of its fuacs, dind for the principles in generat which go. ve.t it, 1 beg leave to refer you to a report made to \(w:\) honcmable the secretary of war by my pre. decersor, and which accompanied that gentleman's abie expmition of Indian affars, to the United Stales' stnate at its lasi session.

The fusts remain, in amount, much the same as they were at that time-lhey "ill vary in their resu: \(\delta\), when these shall be known on!y as the prices whic I may be able to obtain for the firs, and pel tries, \&e may be more or loss, than the cost of merchatlize sivell in excitange for them since that period.

Tl." factories at that time were eight in number -hey remain so now, and all except two are on the s.ame seses- That at Nitchioches has been remulel nine miles above that post, on licd river, and that is fort Micthell, on the Cha-ta-how.chee river, ard in the midst of the Cowela and Cusset... towns, immediately at the intersection of the two leading roads to the southern territory.

At present they stand thus:
1st. Fowi Micthill-Georgia.
2d. Chickasaw-At the Chickasaw Biuffs, Mis. sissippi territory.

3d. Fort Confederation-on the Tombigbee river
4ti. Fort Usage-on the Missouri, near the mouth of (Isage river.

5th. Prainie du Clien-on the Missisippi, near the mouth of the Ouinconsin river.

6th. Late at Narchitoches-now nine miles above thal village-scite not named.
7 th. G"een bay-Gree:s bay of lake Michigan. 81h. Caicago-lake Michigan.
The great ability displayed in the report of the late secretary of war, as above referred to, super cedes the nectssity of my letaining you with a de tailed plan for the amelioration of the condition of the India: tribes. I cannot forbear however, accurdins 10 my purpose, heretnfore expressed, to sug. gest, in addition to the views taken by that gentleman, the advantages that would in my opinion result from the establishment of public schools in the Indian settlements. However ineffectual this means of instruction might be, in its operation on the adult Indians, the rising generations would insensibly imbibe from such a scource of improvement, and transinit them to their successors, those ingredients without which it seems impossible, with any thing like human exertion, to teach them a knowledge of or make them familiar with (at least in any reasonable time) the excellent principles of our governmeut; the ties which mite and bind society together, with the great advantages of that state over that of the savege, or impress them with the importance of the observance of those great moral lessons, in the practice of which results so much security and happiness to man. To impart a knowledge of those principles to the aboriginies of our country, would be an advantage to the United States, exceed ed only by that which wonld result to them. Out of these elements a foundation might be prepared on which to place the great axiom of human happiness. Make a patli in the desert by the agency of schools of instruction and the holy doctrine-"as ye would that man should do unto you, do ye even so to them," will soon follow and consequences, similar to those which this kind of teaching has produced In all those parts of the kirown world where the elements for its admission have been prepared \({ }_{2}\) might
reasomably be expected in How to the nations of omz forests-unless indeed they are made of materiais different fiom those, ont of which it has pleasced Gud to constrint the rest of the human fimity.
If this anxiliary be colopeel and. I recommend it with a fill conviction of its ucces.s, I wo:tid re--pecfully suggesi that the lancustriun mode of instructed be adopted, as wels ona account of its simplicity, as its econony. Universal experience having proved the superion facilit! wilh which it conmuncates the firs priaciples of learuing
The present appears \(t\), be a t ime peciltaly farorahle for a generous exertion in behalf of the Atonrigines of our country. The war spint slumbers, and the peacefulness of the calm prev intes cevell our forests. But amidst this scene of general trang aili-iv-and whinch the citizens of I merica enjon with such peculiar fecility, how comforless remains the condition, and how cheerless the anticipations of those unfortunate people! Pained at the recoliection of the past; disheartened at the prospect of t'e fin ure; shut out by a destiny which they hid no !a, ind 111 creatmg, from all that is decmed great and food annugst men, they feel themselves jet v rappeat ins thie gloum of their native forests, and are ieft ic moum over the severity of their tate!

What consol:tion would mingle with the cup of their hitcerness, were they roused from this distress. ing reverie, to witness a display of an enlargened and liberal policy, ordained in their behalf! Hope, that never failing friend to mun, however rayless it has been io them for the past, would lighten up their prospects for the fiture; and if any thing could vie with the pleasure i: would impart to them, it would be the gratifying reflections of hose who might contribuie to the relief of so much wretchedness.

1 have the honor to be, «c.
'THO. L. M' KENNEL,

\section*{Loss of the Chippewa.}

Copy of a letter from captain George C. Read, to the secretary of the nuvy, dated NEW-YoRк, Jan. 16th, 1817.
Sir-In conformity to your orders of the 6th No. vember, I left Boston on the 27 th of that month, to proceed to the bay of Mexico, and on the 12th December, at balf past 2 P . M. intending to take the Caycos passage, made one of the Islands by the same name, bearing S. S. W. Upon discovering the land, I immediately hauled up for it, in order to ascertain what part of this group it was, being under the impression, as well from its appearance, as from the latitude and supposed longitude, it might be the N. W. extremity.
At 15 minutes past 4 P. M. having approaohed within nine miles, as I judged, of the shore, and having satisfied myself it was the north or middle Caycos, bore up W. S. W. no land to the westward, at this time, being visible.

The best chart on board representel the north and N. W. shores perfectly clear of all impediments, and the course I was then steering as not only safe, but one tending to draw off froin the land. At half past 5 , night coming on, the bearings of the eastern and western extremities of the land were taken, made the middle Caycos bear east and the north west point, which was plain in sight, S. W. each distant ten miles. To be certain, however, that the land which we took for the N. W. point, was the most western land in sight, I directed the master to go aloft, who, on getting there, reported in the affirmative. Under these circumstances, with a chart on which no danger was delineated; steering a course upon which I had no accident to apprehend; with the point, round which I wished to double, distinctly in view, I could not feel otherwise, than in possession of the fullest confidence.

At 35 minutes past six, liaving ran eight and a half miles, I deemed myself abreast of the above point, with an offing of at least ten miles, and directed the brig hauled up one point on S. W. by W. My hauling up sooner than may by considered prudent, (which quite as unfortunately as unexpectly proved so) was dictated by the apprehen. sion of getting too far to the westward, thereby rendering it diffieult to lie through the passage.
on account of the trade winds at this season of the year, inclining much to the southward.
At 10 minutes past 7 , whilst steering the latter course, heard the noise of breakers on the larboard beam, when the helm was ordered up, but scarcely had the order been issued when stie struck with much violence upon a rocky bottom. In this situation, without being immediately able to discover the shore; or to form the most distant ides of the position of our danger, the sails were trimmed, the hands set to lighten the ship, and an exertion inade to force her off with her head to the northward and westward. This effort, at first, wore a favorable aspect, and \(I\) felt sanguine in being able to extricate her in a few minutes; but, after having forced ahead some fathoms, she was again brought up with redoubled violence, and lost the use of her rudder. The boats were now got out, and an anchor carried and let go in an easterly direction. The sails were furled, and with as much expedition as possible we commenced heaving, and again light. ing ship. About this time, a boat which I had sounding round the vessel, returned, when I was informed the reef on which we were, appeared to extend from the shore; that it ran some distance outside of us, and that it was a bottom composed of sharp rocks, upon which there was but thirteen feet water, for upwards of a cable's length in every direction: the brig drawing sisten feet and an half. The carpenter also, reported the water in the hold having made its appearance above the birthdeck. The getting off now would have been use less, even though it had been practicable. Ithere fore turned the attention of the officers to getting as many of the crew into the boats as they would carry, and sent them to find the shore Shortly after their departure the brig being in the act of turning over on her starboard bilge, I was under the necessity of having the masts cut away. The preservation of those left on the wreck had now becone somewhat precarious. The wind and sea had increased considerably from the period of her first taking the ground, and there were no boats to take them off. Luckily, however, the boats had effected a landing about 3 A . M. when the remaining part of the crew, the officers and myself abandoned the wreck and reached the shore.
It gratifies me to say that better conduct could not have been exhibited by any officers in a similar situation. All orders from me were promptly obey. ed by the executive officer (lieut. Edward Shubrick) and such was the zeal manifested by the of ficers and crew generally for the preservation of the vessel, that had it been an ordinary bottom upon which we struck, their exertions inust have been erowned with success. My proceedings from the date of this unlappy event, until I left the above island, shall be the subject of another communication, and in the hope that no unfavorable impres. sion may be received until an investigation of my conduct, which 1 trust will speedily take place.

I have the honor to be, sir, with great respect, y our obedient servant,

\section*{GEORGE C. READ.}

\section*{The lion. W. B. Crowninahield,}

Secretary of the nary of the United States.
A court of enquiry was recently held in New York, in pursuance of an order of the secretary of the navy, issued on receipt of the preceding letter, to investigate the causes and circumstances which produced the loss of the U. S. brig Cluppewa, under the combuand of George C. Reaul, esy. a master commandant in the navy of the United states. The
court Was composed of captain Samuel Evans, as. president, captann Sanuel Angus and master com:mandant Edward Trenchard, as members, and James A. Hamilton, esq. as judge advocate. If.er a minute enquiry into all the facts and circumstances connected with the loss of the brig Chippewa, it was satisfictorily established, that no blame whatever attached to the conmmander; and that captain Read, his officers and crew, made every possible exertion to save the vessel.
The proceedings of the court of enquiry were. approved by the secretary of the navy, and cantain George C. Read was urdered to report himself for duty.

It is stated that a party of lower Creeks have tilled and scalped a woman and two children in St. Mary's county, Geo.

Many barges and boats left Cincinnati on the 1 st. of March, the ice in the river being broken up, la den with flour \&c. for New Orleans.

The assembly of New York, by a large majority, has passed the bill declaring all negroes and mulattoes and mustees within that state, to be free after the 4th of July 1827.

An Havana paper of Feb. 15, mentions the arrival there of three vessels from Africa with upwards of 1200 slaves!-Surely this dreadful traffic must have an end.
B. Smead, of Bath, has announced his having in the press, a pamphlet of sixty pages, entit! \(=d\) ©Causes of the destruction of the Americun tozons on Nagara frontier, and failure of the campaign of 1813 -by George M'Clure, brigadier-general of the NewYork Militia.

The Carlisle convention.-A strange error and omission occurred in our last number in an attempt *o give an account of the proceedings of the convention at Carlisle, Pa . for the nominatinn of a suitable person to be supported by the "Independent Republicans" of that state for governor, at the ensuing election. Such things are among the "miseries" of editors. The article ought to have read thus-
"There has also been a convention at Carlisle for the same purpnse-present, lelegates from thirteen counties and the city of Philadelphia. Thomus Forrest in the chair; Hamilton Humes and F. A. Muthlenberg, secretaries. In examination into the election of the delegnates being had, Joseph Heister, Dr. Genr'ge Logan, Indiew Gregs, Presley C. Lane, Isaac Weaver and John Steel, were put in nomination, but all withdrawn except the first named, who was agreed upon unanimously to be recommended to the freemen of Pennsylvania for their support at the election in October next.
0 The lines and words in italic were left out, or transposed from their proper places, and the paragraph was made to say that Mr. Muhlenberg, instead of Mr. Heister, had been agreed upon as the candidate for governor.
andak captivity. Extract of a letter from col.
Richard Johnson to his friend in Scott county, dated January 29.
Dear Sir-We have received information from several gentlemen in Kentucky, that one of our citizen soldiers has lately returned from indian cap. tivity, and has given information that a number of our fellow-citizens remain behind in the same situation, captives to the indians, and that our neighbor Fant, the musician, was near Quebec held as the property of an Indian in the British service, as a musician. I have seen the president and the secretary and most of the members from Kentucky, who have taken an interest in this thing. Col. Monroe has made a communication of these facts to Mr. Bagot, who
ril firtl with furnish all the facilities in his power to release \(F\) unt and others from their present condl"ion, by calling on the local anthorities of Canada. Besides this, the president will employ a special messerger to traverse the wilderness and search after those infortunate captives who are deprived of liberty, by risking their lives in defence of their countig:-[. 7 -ghes.

Purlec, Fé. 26. - Custle of St. Louis.-A report having reached his excellency the governor in chief that an American ci'jzen narned Thomas Vance or Vant, who was laken prisoner in the action at river Raisin, on the 22d Jume, 181.3, is cletained in captivity by an incian in Quebec, or its vicinity, and his excellency having cansed every irquiry to be made, though without s'ocess, to diecover the said American citizen, has direc'ed a public notice to be hereby given that of the said Thomas Vance or Vant is in any part of the province in captivity and will make known lis situation to his excellency, measures will be aken for his immediate release and restoration to his friends. - And any person possessing information respecting the cletention or present situation of the said Thomas Vance or Vant, are requested to communicate the same to his excellency,

By his excellency's command,
ANDRE, W WM. COC!IRAN, Secretary.
The laurel.- We have had the pleasure to notice many of our herees reposing on their lanels won in the late war-and maj. gen. Scotl has just married Miss Mayo, at Richmond, and capt. Hurrington, of the navy, united his fortune with that of Miss King, of Norfolk. Who does not "wish them joy?"

Specie. The arrival of M:. Sergeant, an agent from the bank of the United States, is mentioned in the London papers-and dollars are said to have risen in consequence. But we think we have seen the arrival of at least a million, at various ports of the United States, mentioned within the last two weeks, apparently reaching us in the regular course of trade.

T'reaty zotth Sweden.-There is a report that the senate refused to ratify the treaty with Sweden, concluded by Mr. Kussell.

Sagacity of a dog.-Yesterday, a small dog fell into the river at Coenties slip (New-York) and went down with the tide, yelling for assistance. A large water dog jumped into the river from a vessel, seized the one in distress by the ear, and brought him within the reach of several by-standers on the dock, who pulled him out of the water; and the dog, refusing assistance, swam back to the vessel he had left.

his majesty. It was he who introduced himself into the interial provinces ts seduce their inhabitants-it was he who sowed the seeds of insurrection-it was he who procured intelligence in Saint
Antonio de Bexas for Bernardo Gutierrez, that he might poss Anconio de Bexas for B.ryardo Gutierre7, that he might posse:ss
himself of the place, and afterwards innrder fourteell Spanish chiefs himself ot the place, and afterwards innede r fourtern Spanish chiefs -and it was he who published in these Linited States procilamafuris an arny, pointing ont the places of enhsting men, and the pay of those colisted: and, in one word, declaring war hiniself, ill a crrain mode, against the Spanish nation, frum the very bosom of this remblic, as yon will find more in detall in the authenticated cops (No. 7) which accoupanies this, the original of which is in my possession
lucherde in the second class those individuals who, seduced by The inpposture of the principal authors of these hostile expeditions, have assisted, from the bosom of this republic, the revolutionists of Mexico, some by farmshing the em arms and munituns of war, others by enlisting themselves, in this country, in the army of the insmigents, which passed over to subvert all order in the provinces of the king my master. In this number are thuse orher persens, whom I have mentioned to yott in this and my former notes. The information which I gave you respecting some persons who were preparing hostile expeditions from Geurgia, agaiust the possession of the king winy master, you will find established, oflicially, by the governor of Eiast Florida in hisletter (No. 8) which accompanies this; in which he advises me, that John 31 - Intosh and William Crinch, who supported the last insurrection in that province, in the year 1812 are now recruiting in Georgia, a couside rable number of vagabonds, again to invade the territory under his connmand.

Hlatter myself that this series of acts, so circumstantial, the in formation of which has been acquired through channels so respece tatile, will be sutficient to call the attention of the president to the necessity of cutting \(n p\) by the rools these melanchuly abuses, and to slint the door against the contmual violent movements of these inrbulent people, who from the buson of this republic, make war on a friemlly and neighboring powre. It has never been the intelltion of the king, my master, 10 request that the pubishment of the laws should le: inflictud on these distarbers of sucial order, when their guilt is not fully proven. On the contrary, I have informed you that the object of his majesty is not to take vengeance on these high-way rubbers, but to sheher his subjects from-their harbarity. His majesty has on, thought proper to sulicit from the rectitude and circumspectiun of this government, what might prevent the crimes which ar mertitated from taking effect, as other wise it might be ton late to prevent them, as the offenders will be beyond the territory of a friend, and at a distance from the arm of the law. Good order requires, not only the offences already committed shonld he punished, bint that those whicitare contempiated
should be prevented: and this is the casc of the individuals I have should be prevented: and this is the case of the indivinuals have
comprehended in the second class. The personal knowledge I have of the rectitude of the president inspires me with a confidence that he will view the acts I have just stated, as I do; and, proceed ing in this particular case, with that integrity and humanity which is the most glorious distinction of the American character, he wil be ple:ased to adopt those ineasures which he may beheve mist amalogors to the system which, you tell me, this governmenthas adiopt of this republic to take part in them, nor to permit its territory to be a shelter to foreigners, who try to make war ou a friendly power

To the third point in my notes, intended to solicit from your government, that vessels from the insurgent or revolted provinces republic, as well becouse none of those provinces are recegnize by any power in the world, as becanse the obligations of fricudship and good neighborhood demand that we should not in any way conribute to protect provinces or subjects who have revolted, you have beeu pleased to make known to me, that the president, otserv ing the change of governnent which had taken place among the revolutionists in Spanish Amcrica, had adopted the measure of or dering the collectors of the customs to adinit every description of vessel, without regard to her character or flag, provided she paid the duties, and observed the laws of the country during the time she was in port.

With dae respect for the measires adopted by the clicf of this confederation, I cannot do less than state to you, that the changes of government which have taken place among the revoluithists motive tor America do not appear to ine to alford a sumcien whom one is in pee rinnly conduet towaras a power, wit this measure places these factionists not only on a fuoting of equality with the Spanis'! nation, but gives them advantages over sll independent powers, since, according to the laws of neutrality the United States would not permit any independent nation to arn its vessels in their ports, nor to sell prizes in them as is permitted to these revolutionisis.

By the two acts of congress, one of the 28th of February, 1806 and the other of the 24th of the same month in 1807, all commerce with the rebels of St. Domingo, was prohibited at the request of France. As the treati s subsisting hetween Spain and the United states place Spain on the footing o1 the most fivvored nations, his majesty cunsiders himself entitled to expeet that this republic will now adopt in bis favor a like measure during the disturhance in Spanis'1 Aur-rica, or for such other period as it may le considererl popar \(t\) desiguate. Such is the spirit in which I have made the rbret requests to yoctr goverument, stated in my former notes. 1 hope that the present observations wilt merit a favorahle resep: tion from the rectitude and wiston of the president and yourself. 1 have given alt account to my governnient of all these particulars, seading it a topy of my nutes, and of the answer I had the honor (1) recollr from yonl. And in the mean time I ongh of the ling
my master, to maintain and to strengthen the ties of friendship and At understanding with these states.
At the coulclusion of your note, which 1 am uow answering. you are pleased to inake kucwn to me that this govermment is auxious to terminate, by means of a friendly negociation with the hing my master, all pending differences. and that it will he very satisfactory to the president to know that I an vested with powers to that effeet. I have not list any time in conmmicating to miy sovereigu this elisire of the presilent, and I will have the satisfac tion of munoancing to you what his inajesty mas deternine on thi point: meverthrless, 1 ooght to state to you, (Mlthough it wonld be highly flattering with me to treat with you, as ywir penetration and rectitude would facilitate the arrangement of these affairs, yet it appears to me, that, as Mr. Erving has not yet sailed from the United States, that the businrss would br expeditial if the president wonld give him power and instructions to terminate the negociations at Mulrid. This arrangement cannot present great difleulties; thr respective rights of each power being once setted by common agreement, a friendly understanding bring had on each point in discussion, and it bring determined what arr the reciprocal ohligations of Sprain and the United States, they would be still fiuther obviated if youl would have the goorhiess to infurm me, frankly and flanly, as I requested in a furmer letter, what are the pretensions of right, which the United States haver, what Spain, and what ar" those fir their own convenience, which they desire to resliz. for an pquivale nt which may be advantagerms to the two nations, to the end that with the knowledge I have acquired of the mutnal intirests of both, 1 mas recommend to the attention of his majesty these particular points.
I renew to you tuy respects, and pray Gorl to preserve your life many years.
(Signed)
LUIS DE ONIS.
Philadelphia, 22d Yebruary. 1818.
\(f\) state, to the Cheralier de Onis, dlated state. June 10, 1816
SIR -I hall the hnnor to receive your letter of F-bruary 22 d , soon fter its date, and to communicate it to the president.
Anxious as this government has bepn to terminate all differences with his catholic majesty, on conditiens of recivroral advantage and with equal honor ta both parties; it would have heen very satisfactory to the president, to have found that youl had beel vestird with full power to negociate and conchede a treaty for these burposes.
I have the honor now to state, that Mr. Frring, minister plenipotelliary of the United Statrs to his catholic majesty, has been mstructed on these important subjects; and that his government are jnst and libcral, a strug hope is entertained hat your government, bringing to the negociation a sinilar dis-
position, will agree to such an arrang \(\cdot m e n t-a s ~ w i l l ~ b e ~ m u t u a l l y ~ a d-~\) vantageous and satistactory to brth nations.
However agteeable it might he to leave thrse high concerns in uris train, without further discussion here, it is nevartheless, proper to norice some passages in your letter of Fehruary 221, not withstanding the clear light in wbich the subjects, to which they relate, have been placed in former communicatious. You intimate in your late letter of May 30 th, a desire to rective a particular answer to that of February 221l, and it is just, that yon should sre that my silence was imputable to the caitse only, which is above uggested
You state that as that portion of Lonisiana, which lies eastward of the Mississippi and the Iberville, had been cedled by France to Great Britain in 1763, and by Great Britain to Spain in 1783; it could not be comprised in the cession of Spain to France in 1800 hor of the latter to the United States in 1803; and you draw this conclusion from the supposed import of the term "retrocessim" used in the two latter treaties; which yon \(34 y\), applies to that portion only which Spain had received from Fratice. My interpritation of these treaties, taking intu view so much thercof. as rulates to this subject, is very different. As to the term "r, trocession," it is evident, that it was not the intention of the parties. that it should have any efficet whatever on the uxtent of the territory ceried. The import of this torm is ton vagne, and the term itself was ased in a
mamer too casual to admit sueh an infertnce, even had therr been manmer too casuait o admit meth an inference, even hat therr, been
nothing else in the treaty between Spain and France of 1800 , to show that the construction you coutend for, is altogether inconsisten with the manifest intention of the parties. The import of this term would, in my opinion, be satisticd, if the wholp province hat passed in the first instance, from France w Great Britain, and becll conveyed afterwards hy Great Britain to Spain, fand by Spain back again to France. In regard to France, this last conveyance would have been a "retrocession," as, by it, the territory would have been culed back to her. It was very matural therefore that thi term should be used, being applicable in the most limited sense, in which it can be taken, to at least nineteen twentieths of the province, and in a qualified sense, to the whole.
Had it been iutended to exr-mpt any portion of the province in the possession of Spain, from the operation of the treaty, of Si. Ildeplonso, it wolld have been easy to have done it, anil in a mat: ner to preclude all doubt of the intention of the parties. It might, for example, have been stated, that Spain ceded back to France such part of the province as France had ceded to Spain. A stipula tion to this effect, would have bren concise, simple, and viry per spicuous; it would have rendered useless and umecessary the other provisions of the article, in regard to the point in discussion, and for any purpose whatever, the first of those provisions; or they might have defined the extent of the cesssion by a natural boundary which would have been equally distinet and satisfactory. Hac Spain ceded to France all that portion of Louisiana, which lie westward of the Mississippi, the Lherville and the lakes Manrepas and Y'outchartrain, no controversy conld ever have arisen between France and Spain, resuecting the custern litwits; as to wbat Spair
diad ceded in that quarter, and what she had retainel; nor could there have been one between the United States and Spain. 13y declining to define the boundaries of Louisiana, eastward, in some one of these obvious and perspicuous modes, it is just to conelmine, that it was intentional; that there was an object in it; and what that object was, is suthicielutly apparent, from
the provisions of the article alrady noticed.
By the treaty of St. Ildephonso, in 1800 , the province of Lonisiana is ceded to France by Spain. "with the same extent that it now has in the hands of Spain, and that it had when France possessed it; and such as it should be after the treaties subse quently eutere
into betwreen Spain and other stater." And by the treaty of 1803 between the United States aum France, this article of y of 1803, betweet. France and Spain, is inserted verbutinh by which the Cinited States are placed precisely on the same ground on whiel France hernelf stond.
If werecur in the surersl provisions, we shall find that each hes a distinct object, fur which it would not have been uecessany to provitle, especially is that mod, if it had been the intentiun on the partirs that no portion of West Fiorida, in question, sinut bave boen exe upted fmin the cession. By stipulating first, that
the province was cedfed 'with the samie extent that it now has in the the provinct was cerle- "with the same extent that it now has in the What Flanda lyine bect reen the Mississippi, the Iberville, the lakes Maurepms and Puntchartrain, and the Perlide. This provivion cannut be construed, as alludinf to any other part of the provisce, and its sole oftect was intenderl to be to inctude it in the cession en France. The second provision is equally explicit, ugligt it had when France pussessed it." It is known that France had held the province to that exturn, before the treaties of 1703 , by which ohe had eerled it tu Spain aud Great Britain, and hy this stijulstion it nas reded hack to ber in the same extent, so far as Spain could do The thind provision has an object equally distiuct, and is the more imporennt, because by giviug it its intender effect, the construction given to the otbres is fully coufirmet. "Suel, as it should be after the envaties subsequently entered into betwerll Spa in and othe states, By the treaty between the United States and Spain, in 1795, the boundaries, as estahlished betwien the United State and Great Britsin, in 1783, and the free navigation of the Misvissippl, are contirmed, with the addition of the right of de thewise to the traty of 1783 , betweell Great Britain and Spain by which West Florida was ceded to the latter, whereby she was enabled to restore it, in the extent contended for, to France. In regard to is operation on the treaty of 1795 , hetween the Unitec States and Spain, it was a provivioll which the United States had a right to expect from the good farth of Spain

This view of the subject, which was, in substance, taken by the ministers of the U. S, in 1805 , in a netociation with your government at Aranjuez, appears to me, a sit thell did, to be conclusive. Yoll urge however, against it, that the Firenels govetnmeut had stated tha it was nut its intention to cerde to the United States that portion ul Louisiana *lich France had ceded to Great Britain by the treaty of 1763. The same declaration wias made to the ministers of the United States at Aranjucz, in 1805, for the same purpase that it is now rop-ated. A just rigard to the rights of the United States founded on the cession which Frange had made to them, with a tborough know ledge of all the circumstances atemuling the trums action, combinel with a due respet to the governmunt of France dectated the answr. Your governmeut whs inforined that the Ame ricancuves: had proposet to the French government, in the negociation which terminated in the ecession of Lonitiana by France to the U'nised Status, in 1803, that its fumularies should be defiued by the teraty, to which the Firench guvermment did not aceede, prefer ing to insert in it an exiract frum the treaty of St. Iblephorso, by which the province lisd bern ceded by Spain to France, with inteln fion to ploce the U'niterl Statet, in rugarl to Spain, on the same gmund, precisely, thut France ho Id leraelf under the treaty ol St.
Idephonso, unprofudived by any opinion of her own. Nothing I ldephonso, unprriudived by any opinion of her own. Nothing that the Perdido was the ravtern boumbary of Louisiana. It hat bren the boundars of the protince \(w\) lien helld hy France, betur the treatios of 1733 , and it was unacle so a main by the treaty of St Ildeplugiso which rittored it to ber. Such wan the comsurvetiat which the Americall ministere gave to that ireaty, who were enfgagest in the argocialion with Framee, and anch their representaeon of it to ihwir guternment, afier the treaty with Frunce was eovinturded. it merits particular atterition that ulien your governithey wore d-tiryus of ecrle to the Comited states such tetritory ad thry Wore d-tiryus of obtaining, prior ten their acquisition of Laiaimas, it replied to their mamisterat Asulfid, by a leter of the 3o, of Ma5. 1803, "that by the meroervoiun nuade to Erabee of Junisama, that pou er rexpincil the province whls ilse limits it hat, saving the raphes mequirelt by oiher puowerni and that the Linited Stetes conli ampis themwhes to the Fresioh, governhueut to negocinte the
 States, the fair colutruction of the pournment of the Clitephomen, manatained by the American miniserrs in their oflicial conn manication accumpanyink the treaty, mactonod, as it rvideruly wan hy the lever of our minister of state, the treaty of Paric of woild appral, unilir these cireumstancere, to Yrance for imforita. ton, us to the extelnt of the acquistion which they had mante, we the Ger rnmil by any uginion which ber government might express, in ge, inspreting it.
 of the that it kovernmient has never donlited, silice the trial rloims of the twn natious were submittel to an inguortial fribution who, observing the principles sppplicable to the eamer, and erseine Who, abserving the priseiples eprplicable to the eame, and erseine
farfo so to distorery and ectbement, on either sile, that sum
would be its decision. The discovery of the Mississippi, as low down as the Arkansas.i n 1673, and to its mouth in 1680, and thet establishalent of settements on that river, and on the bay of St, Bernard, on the westera sitle of the Culurado, in 1685 , ind. \(r\) the authority of Erance, when the nearest sethlentelnt of Suain was in he province of Paunco, are facts which place the clains of the United States on ground not to be shak in. II is huow that moshine occurrml afterwards on the part of Franev to wewhew this claim The difference which afternands took place bel ween France ane Spain, respecting Spanish encruachments there, and the war which ensued, to which they contributed, trad to cunfirm it.
I have thonght it proper to make these remarks in reply to your Inteer of February \(22 d\), nespecting the castern and western benmedary of lonisiona. The subject haviog been tully treated in several notes to your government in 1805 , and partieularly in those of March 8 th , and A pril 20th of that year, I berg to refer you to them for a further view of the sentiments of this government on the uhject.
In adverting to the parts of your letter which relate to the re volteel provinces of Spain in Anieriee, and che aid, which yon state. he revoluticonary party havi- derived from the United Siates: cannot avoid expressing equally my surprize aud regret. I stater ia my letter to you of Junuary i9th, that no aid had ever betn af forld them, either in men, money; or supplies of any kind by thy goverument, not jresuming that the gratuituus supply of provi sions to the unfortunate people of Carracas, in const quence of the calamity with which they were visiterl, would be vitwed in that light, and ihat aid to thera froun our cirizens, imconsistent with the laws of the United States, and with the law of nations, had been prohibited, and that the prohibition had bepn enforced with care and attention. You stated in your letter of Jamisry 24, that furces were collecting in different parts of our western and sunherm conntry, particularly in Kemtheliy, Tennessee and Louisiana, for the purpose of invading the Spanish provinces. I stated to you in reply, that I knew of in such collection of troops in any quinter and that from information derived from the hagheot autiouritics, was satisfied that wone suels had bren made. 1 reqursted you to state at what puints these troops were collected, anf whowire the commanders! lou have sent me, in reply, extracts of letters from persuns whase names are withield, which establish none of the iacts alledged as to the raising of trouns in the United Statem but recite only vague runiors to that effect. I have the honor to trans mit to you a copy of a letter on this suhject, from Mr. Bich, the attorney of the Uiiited Stares for the district of Louisiana, by whith you will see how attentive the puhlic authorities have berin to the execution of the laws of the United Stak 3 , and to the orders of the government, and how little they have deserved the charges made ganast them
As I cannot donbe that jort have taken erroneous improssions from the misrepresentution of partial or misinforiard individuals and that you have communicated the sane to your govertumemt, rely on your caudor to adopt such measures as may appear lxast calculated to place the whole suliject beforr it in a trie light. It is important that the effirt which the pr sident is now mahius to adjust onr liflierences with Suain, should have th. desired resule: and it is presumable that a correct knowletge of the conduct of the United States, in these circumstances, wanld promote it.
\(t\) have the honor to be, \&c.
Copy of a letfer from Mr. Dick, attorney of the Unieid States for thie district of Louisinna, to Mr, Monror, enilased to Mr. Onus, in the secretar'y of state's letter of June \(10,1810\).

New-Orlomns, March 1, 1810.
SIR-I have just had an opportunity of perusing th lefters of the chevalier de Onis, elloy extrandimary and ministe 8 plonipeo tentiary of his catholic majcegty, mele'ressed to yun, mule ridate of clue 30th of Deeember and the 20 of Jwiwary. As the we letters dwell largely upon transactions aliketugg the ne utrality of the Uniterl States, whish are suid to have orectrred, and to be oftll oweevirrint here-and as they charge the putilic authoritios of this city with giviug, in the fuer of th pret wilkem's proclamation of the first of Saptember last, prutection wind suppert sa the enermies of his canhalic majest!, i blijuk it wut inguropar to adilress gou in rilutiou to these chargers.
It is aftirmal ly the chevalier do. Onis, "anul it is," anys he, "univeraally public and motorions, that a fuctions hand of inenreconts
 siana, ant copecinlly in Nu.w.Orloans and Natclitiow-live, the minn terrupted system of raising and arning troups to lighe the fatue- of ervolution in the kingdotin of Ni w.Spaine Ali lamsiann," he evintinnes, "has wituersed these armiamesto-the puhlie culisimertesthe transportation of armo-ryinurtion of the livergrems-atid the if hostile anal warlike miarel, from the cerritory of this repmblie agnimt the poserssions of a friendly and moughboring purw re."
Nu troupa at preacht are, or at any furmer periend were, uppoly raised, arnierl or emhistisl ot Nistchituchem or at New.Orivans or ne huy other point within the stote of Loniciana. Arme have bevil transportorl trum this place by eca and olle rwioc, as nigrets of ane r hamliee, and prolahlily have liven divpoost of to some of the

 Nate hitoch s, fir an tscort to bring in sonle specie, which was inm diat. Is granted.
Iol dun, whu, at ihe time of its defeat. commanded the party that pen, trat d 10 San Amonion, eame to this city in the antumn of 1314. When he was immete iately arrested and \(r\) cognine do to answer at th. sucee ding e-rim of the tederal court, to a charge of setting on f:ot, withi., the territory of the United States, a nilitary expedisio or ent rprize, to be carried on from thence against the territorie, or fomminus of the king of Spain: six months having passed, an I In testimeny whatever appearng against him, his recugnizance as delivered up.
Atier the discumfiture of the party under Toledo, no enterprize destinud to aid the re volntionishs of Ni.W-Spain, appears to have been sri un fout from the vicininy of the United Shates, until late in the smmmer of last year, when it was rumored that a party under a person of the name of Pirry, was turming fior that purpose, som where unt the western coast of lonishana. Upon che first ins cimation that this enterprize was ine ditated, steps w' re taken here to frustrat- it. Nuthug ocenred to justify prosi eutions or arrests; a larg: quantity of arms, how:ver, supposey tu be intended for this party, were seized on the river, and drtained at the custom-honse for geveral months; and commodore Patt.rsun, emmanding hava officer on this station, instructed the iffic is mader his command ornizang tit the ueightrorhood of the snspe eted place of rendez vous, (Betle Isle, at the musth of bayon Peechi) to uscertain the truth of dit rmmors in circulatios, and is verified. to use the force mader their respective con nmands in dispersing the persons assembled, and in irustrating their illegal intentions. In obedioniee to thest: orders, the cuast, as far as th. Saline, was xaminet, and no persol:s discovered. It is now aseertained that P. rry, Humbert, and their ful lowers, inconsiderahle in uumber, passed separat-15, through Attakidpas, andjassembled abont two leagues to the wirst of the Sabine. 7 helic. they embarked for some plate whe the coast oi Mcaico, wer. wriekerd, dispersed, and their plans, whatever they were totaily defiated.

I have, in the foregoing detail, sir, given partly from information entitled to pretiect confidence, and partly liom iny owis know lenge, a brief and hurried wuline of two finitless attempts of a hatidtul of restess and minstuential individnals, stinsulated by the desire of aiding the canse of M xican inderpendenet, or thrat of bettering their uwn formnis. These are the only military ent.rprizes against the dominions of the Splanshe crown, that have drawn any portion of their aid or support from Lornsima. In lroth, the mass of sdventururs was conuposed of Spaniards, Frenchmen and Inslians. Inerd wot say these enterprizes, whether in aid of the revilutionists, or herely predatory, were not ouly feeble and insigsificant, but that they wire formed under circminstances which forbid a surmise of their being sanctioned or commited at. Wv. ry man acquainted with the state of public feeling thronghout the sonthern and west-rin sections of the. United States, knows, that had our goverument bat namifested the slightest disposinion to sanction
 of these provinces would not at this day be donbtiul
It is said that troops have been recents enlisted, and that expeditions liave bern prepared in this eity, to invade the dominions of Spain. The enlisting of nefn, and the preparing of enterurizes, of the hind spoknen ot, caunot be accomplished withut means, or be carried on in the midst of a populous city, in solinide and silence. Yet it is known, in the first place, that urither Mr. Toledo ur Mr. H rrera had or have pecmiary mians fir such purpuses; and, in the second, so faras negative proof can go, or so far as the ahsene of ore thing implies another, it is most certain that no enlistment have taken place, anel that no expeditious, or the means of expedi tions, have been prepared or are preparing liere.
A regard to trnth makes it neeressary tu say, that what is alleged resp cting the arming and fitting out of vessels within the waters
of Loosisians, to be ensplored in she service of the revolntinnary of Lodisians, to be enployen in she service of the revolutimary gos-rumeuts, against the sublects or propity of the king of spain ghe between the Spanish colonits and the mother country, have

Irsuith, to be emplnyed in the service of the colonies, been narmát
 or ris.where, Within the stute of Lomisiana.
O. the cofth iry, it is nuturiuns, that to mone point of dity have the civil sund uilary unthorities of the U'mbed Siates dire cted more strennonsly, or is is h-lit vif, more shecesstinly, their attention, Ifan to the diseovering ami surperession of all ntiemphs to violate the laws in th se reancets. Aumble to violate them, hy finting out and arming, anl by mementing the force of vessels, have no donbt been frequent, but certantiy in no justance suce oslint, ex etpt where cuncheted muder cirenmistances of concealount, that ela led discovery, und almosh suspicime or were carried on ut some remate point of the coast, beypud the reach uf atetretion wr diseo v Iy. In every instance where it was known that these illegnl achs wire att mpting, or where it was afterwards discovered that they had bern committ. d. the personsengared, as lar as shey were hown, have heell grosecureal, while the vissels fittell int, ar at(wimper to he fisted ont, lonve Ineen seized and tibelled, muder the act of the. th of Jume, 170.4 ; and whell enpenres have berell made. by vesse is thans fited and armed, in which she ir force was angnimted or inereased within our watros, whe re the prmporty taken was brought wishin onr jurishlietion, or even foumd npan the higis st ns l:y our crnizers, and bronght in, it has luen ristured to the. origimal Spanish wwintr, and lin some instances, dannages an arded against the captors.

An enimucration! of the eases in which individuals have been proscented for infringing, or attempting to infringe cur nentrality, prat of the guvermathts of Now-Spain, and in which vess-ls have brell seized and tithelld, under the act of the 5th June, 179 s , tugethir with a list of the vissets and prupery restored to the curiginal Spanish owners (confluithe th.. whole of the operations of the y-arcommencing March, i815, and endine Felonary, 1815) will show more exchasively. pi rhaps than any thing flse cant, hav totully without fomandion are the complaints of Spain on this lhead.

The names of indivifuals presented in the district court of the UnitudStates, for the Lutuisiana district, dering the gear 1815, for violating or atrempting to violate, the nintrality of the United States, in nid of the governments of the United Prosinces of New Granala, ane the United Provinces of Mexice:

Emmeratson of vessels and property brought within the Loni siana district, captured under the flags, and by the anthority of the governments of New. Grenada and of Mexico, libelled on the part of the original Spanish owners, and restured upon the gromind that the eapthring vessels liad heell fitted out and wrmed, or liad their forces augniented within th. waters ol the Unitell States. 1. Selr. Cometa, restored A pril, 1815.
2. Selir. Dorada, proceels resturd 16th May, 1815, dolls. 3,050 of 3. Schr. Amiable Maria, do. do.
4. Selir. Fxp primente, restored 3d Angast.
5. The Polacre hrig de Regla and cargo, proceeds restered 28th De cember, 1815,
Schr. Alesta and cargo, being the proceeds of the
eapture of about 18 small vessels, restured- 18th Dec.
1815,
Dathages awarded to the original owners against the
captors in the two forig going eases,
7. The cargo of the schooncr Petit Milan, restored Febru-
ary, 1816,
55,272 97
8. The eargo of the schnoner Presidente, 1st February,

1816,
2,444 31

The preceding account of Spanish property restored th the original prourneturs, after being in pussession of the theynies of Spain, is defective, inasmuch as it does not comprehent the whole of thr casts of restoration that have taken place within the periuit to which the detail is confined; the very hasty mammer in which I have made this emmneratim, did not adnit of a more accurate statement. The principal cases however, are included in it. In sevtral other eases, where the property was claimed for the original Spanish owners. the claims were dismissel beranse it did dot appear that any violation of unr nentrality had taken place.

The capturing vessels were nut armed, hor was their force augnemed, within our juridictisa; nor had the captures brell made within; a narine lagne ol our shorc. The principles that guided the decisions of the court, as well in restoring the property captured, where our neural means had been used, as in declinins all inturierence, where that was not the case, marifist I think, a dispusition th, and at: excreis: of, the most righd neutrality wetween the partirs.
I have the humer to be, with sentiments of the lighest consideration and respect, sir, sur most ohenlient servant,
(': sued)
JOHN DICK.

GEORGE W. ERVING.
F.etrat of a letter from SiIr. Frving \(t\) the secretary of state, dated yitember 22, 1816.
'I u rote to Mr. Cevallos, on the 13th instant, a note, of which ue elicluserl paper (Ni.2) is a copy, inviling liss attention to ing 1 T. of Augnst 2ath; and on the 14th instant I again waitel on t steministo 1 , tar the purpose of again urging him wreply to my siade. no lhe nade the same eacuses fur his delay he had befor made.
"On the 15 H instant I recciverl from Mr. Cevallus a note of the samer date; a eupy of it (No.3) is lerte with eneloset; I also submit 11 you (NO.4) a copy of ny resly, of the l9th instant, to that note.
"Iucu will ribs rve, sir, that moder the circumstances of this sud den and une pected determination of has kilig, as commmicakn li) Sr. Cevallos, I thooght it indispencalily necessary (and my reasuns Wib. 1 presime, be obvions to you) that my answer shonh 111 e!ute abl thet passed of somplitance intervitw for the purpose of ob"ith that minister. Isomglt the intervit wor the purpose of ob-
 ing. es marly as might be, the ral views of this goverument in the mothares a ouptid, and, us lar as possible, of fixing Mr. Cevallos in It aircet ans foyal coorsc; in lime, of foreing onr bosiness ont, by whe riode or another, 10 a conclasion of soine sort. Indeed, it was the recelit of the the anl timg more than course to my govern suent; unless I could hann whether the measmre which it proposet, was or was mot tikily to be acceptable to you; for 1 have not scen tum note of Jont io, tu which Mr. Cevallus refers, and as the words of his nutc, "que el citado don Luis csttrviese autorizado para seguci \(\cdot \boldsymbol{r}\) " are altugether equivocal, and may recefve either a past or liture construction, I did not feel eonffilent that you had really isivited Mr. Onis to send for powers; thus I couhd not but bre niprehensive, that the object of this government, it the measure propesed, was merely to relieve itself from pressure here, to grint time, and inderinitely to procrastinate the settlement of our dilli rences: and this suspicion was strengthened by many collateral conside rations
"You will perceive, sir, that Mr. Cevallos says, in his note, that "correspoasdenf orlers' have been sent to Mr. Onis, by which I inust und- rstand, uriers eorrespondin:g to the inkentiun of the hing to salisly the pro sidelit, hy conforming to the desire expr ssed in your nute io AIr. Onis, which mist be nimerstood to mean full powers; anl : 0 , in eonversation, he allowed that such powers had not been sent, and accepted of my proposal to t,ansmit them. However, this apparmit ciscer paice may have been mere inadv-rt -ney; he may hatl jur nded diplieat-s of his powers: I resort to this shiphosition, Licause 1 lave just now been inturmed, throngh another chamsel that "Full pozelis" have lecen serit to Mr. Onis; how the fact may he, jon wil be able to ascorting ty the date of the powers; if is: fowers hate beell stint (onlus indeed viry latily) it is surprising tilat Mr. C. whios din nut parliser commmmieate die measure to int The ubservat oars which Imare-tusale. of a splecial commission; tuese were it w.nnied rath r to test his sincerity, than to alter his professed plan. I said only what mader ciremmistaners it la:! lwen ex:raurdinary to have onnited; uy carmestncss naturaily risulted from the position in which I was placed by the propused urasure, but I relrained from pushing to the exteot, of which they wer atserf tide, what might be considered as my own pretensims; for iudep. ndent of the doutut in which I was as to the rual intentifon wi your nete to Mr. Onis, or that out of question, of what mizlit test suit th" views ol government, my own decided npimon wiss, that the negociation might be carried on to much greater adva.1 rafe, and brought to a ennclusion much mare expeditivasly at Wa shington than here; not ouly becausc it would be is much abler tunds than my own, but becanse Mr. Onis is there in a situation to ser, and to ferl with infinitily more furee, than Mr. Cevallos cant, in the midst of a!l his distractions here, the real inportance nay, absolute necessity of a speedy arljustment of aur dititerences.

Cerminly what fell from the minister tended to strengthen that ponion; and it has been still further confirned in a subsequen conversntion. On the 21stinst. having reasun to believe that lie did
 diatcly calted un lim; 1 tionid, in fact, that the measure which he had aumounced tu nee, has ing beell delinitely de termined on by the sing, lir cansidered any furtier correspontence on the matter as ale igether superthous; indeed, that he laal but the most soperlicial, it any, accinaintatice with the contionts of that note; ithell rad tu him a copy of it, and haring urged all the reasons which inducid me to wish for his nnswer, he finally cousented to give it--I now wait for that answrr."
[NO. 2.]
To his excellency don Pedro Cevallos, first minister of state, ơco dre. Madrid. September 13, 1816.
SIR-It is my indispensable duty agsin to invite your excellenc)'s attention to my note of Angust 26th. The importance and the argeney of the: matters of whel it treats will, I am persuaded, omectuty explain my camosthess ont this occasion: and I most ardenty desire that the determinations of his majest y upon it mas arrespund to the just expectanions of the Ameriean gov:rnment, and tead to the c-stiblighment of lasting peace and harmony between two counties.
I rencw 10 your excellency the assurances of \(m y\) very distinguished consideration

GEORGE W. ERVING
Translation of a letter from [Nu. 3.]
September, 1816.
SIR-Having laid before the king a note, noder dute of the inth Juue last, addressed by Mr. Mouroe to don Louis de Onis, in which he manitests the desire of his governmollt t'ast Mr. Onis should be aothurised to negociate with him; his majisty has acecded to it to gratif) the president; and I have given die currespondent orzers to the said Onis, to the emi, that he may immediately enter into ungociation with Mr. Momrue, and employ all the means that are within his reach to secure a sulid and durable peace and mood intellis. ne between the two nations. I renew, \&ce. PEDRO CEVALLOS.

\section*{[No. 4.]}

To his excellency ilon Pcelro Cetallos, first minister of state, drco dr. Madrisl, Stept. 19, 816.
SIR \(-\mathrm{By}^{\text {y }}\) your excelleney 's commutheation of the 15 th instant, \(\bar{x}\) Itarn, that a hote of Mr. Monror, seretary of state of the United States, under date of Jume loth, addre swed to don Lonis de Onis in which nute the desire of the Am rican goverument is exjuressed that the said don Lotus should be anthorised to hegociate with it having heen taketu into consideration ly the king, his anjestr, with view of conforming to the wishes of the president, has arcided to the desire expressed in said note, and that you have scitt , he corres pondent order's to don Louis, to the end that he may immediately ener into the negociation with Mr. MIonroc.
I received this, your excell-ncy's impurtant comnaunication, on the day of its date, but before finally acknowledging the reci ipt of t, thonght proper to sfek, in an interview with yon, soch explanaions as it seented to require-for that purpose I waited o:a yoll on Iuesday, the 17 th instint. I predieated what I then stid to you, on the smpposition, that the American govermment might not have expressed a particular desire to change the seat of negociation-but that the secretary of state, in the note of June 10th, referred to by our exerlleney, had bit renewed the expression of his regret, What Mr. Onis should continne to arge matters of complaint, on which he had not sncls tull powers to negociate, as he was undertood to be in possession of previons to his reception ly the president. As I have the comportent aothurity from my government to treat - 1 m in possession of all the documents necessary to be referred to in whatever discussions may arise;-hs your excell-ney is perfectly Versed in all the questions which exist betwern the two go vermmentsi-for these reasons it appeared to me that an arrangemont might be made liere at Madrid mor expeditiously thans as Washington. I stated exprissly to yon that 1 conhl in no case be under a necessity of referring to my govemment for further intructions, reguesting at the same fine to know whether it was his majesty's intention to place Mr. Onis in a position egually favor able to a specely ardjustment af our differences. I concladed by exening the warmih with which I pressed the suhject, assuring yon that was very far from seeking my personal gratification in this matter of high public interest, hut that I lookial only to the desired resolt and that if this could be abtaimed more promptly hy transferring the ni-goriation to Washington than hy porsuing it here, I shouk incercly r-juice at the transfer.
It reply to these observations, I understond your exe-lleney to state, that cuning to your heing retually charged with the business of three minishries, besides the direction of the posts; and to the saricty of other ocenpations incident 10 your high employ, it was impossible for you to give the lime to the affairs to he disenssed Whel would be nee-ssary to a satisfactury and speedy arrangement of them : that Mr. Onis was alre fully acquaintud with those affair and was in pussessic:n of all the ducuments relating to them : and chough you'could not ssy but that it inight be necessary for tha minister to consmlt with lris government, yet even the loss of three months'tive on such an occasinu windd not jpolong the negoria ions to the extent which the una voidable delays here would carry

These reasons itrged by your excellency for transferring the sea of ne gociation to Washington, induced the to propose that his maiesty would apponint a special minister or a commission to treat with mi. I muderstoud your exeellency to reply, that as soel minister or comnission would be entirely maintorned, and would have every thing to Ifarn on the matters to be discussed, ant hence continalal necessily of referriug to you, this mode could in tho wise expedite the result.

On my asking your excellency if full powers and instructions had been already sellt to Mr. Ouis, I understoud you to say that they had not.
I then informed you, that after replying to your communication of the 15 th ingtani. I should prepuare to send a gentlemant of my legation to the United States with my despatches; and I othired bis serviess to be at the same time bearet of juir despatcle's to Dos! Luis de Ons; whieh offit jull were ple essid to aceept.
If I masy have made miy mistake in this statement of the substance of what passed in the intervicu which I land the hoowr of having with your exeelloucy on Tiresdas the 17th instant beg that jour exertlency will be so obligung as to correet it.

Ihave further to request that! ou will the pheased to inform me whether it is jour inteltion to reply to liys notes of 20 th Augnst and Septemiser 13 th, or whether 1 ant to considet your conamumeaion of the 15th instant as supereding the incessity of any special reply to thase hoies.
I have to requett, also, that your excellenc! woull! enable me to unforma my government wherther it is his majest)'s intention to send rfall poavers" to donk Luis de Onis to irent uproul all the mate is in question between the iwo conntries, and whether the is arnetion to be semt to him will entrace all the poitts aifverted to in my above mentionerl ante of Angust 26.
As sown as prossible atter I shall be honlured with your reply to this iote, I shall exad a messemger to my government; he shall wait, however, to beat the saue time the beare of your despatches to Mr. Othiso
1 relurw to your exc.llency asssuranees of very distinguished consideration.

L, ztract of a leter from SIr. Erving in the secretary of state, dated at Madich, Sepicmber 27, 1810
4 You will perceive, sir, hy my thit counumnications that there is now very fintie prubutility that 1 shail have neemsion to use the ample dociments with which 1 have beell furuished.-Whate ver conuplants this governmont mas have to make, these originating in Mr. Guis's reports will of collme be sellt back tu hith to bring weyghe into lis ueguciatiuns. Is is equally probable that lie may he masuructed to answer at Washington to wilaterer representationa 1 may find it my duty womake hrer; for it is now pertectly evident that a principal mutive with Mr. Cevallos in remuving the neguciatoun to Washingtoth, has been to get rid altugether of the weight oind trouble of is here, and of whatevir belungsto, or inay any liow bee conprised init. I hopee that thes was lis only motive.
I see with sutisfaction shat your nute of June 10, to Mr. Onis, duw not adinit of any other coustruction than that which I cunjecturally gave to it in my conversation with Mr. Cevallos. It i Very evident 100 by Mr. Onis' n.ply ol July 3d, that he has not minumdersteot yow; after this, is it tole innarined that Mr. Cevallos hat fiallon into a misconceptinn? Certainly not. I prestame then sir, thes jon wall approve of my determination nut \(\omega\) make any atkempt to alu r his jlant and that you will agree nith me in opinion that the only elance of aceommetation with this government is by acgociatson at Washingtern."

Extract of a letter from Mr. Erving to the secretary of state, inted 8 th of Oct. 1616.
4in my despatch, No. 18, 1 mentiuned that Mr. Cevallor, in convernation on che 21 st of Septemher, hanl promisan so answer ms) inute in him of Sicpteminer 19ih. He was afterwards, for several days, so whally oecupied with the inarriuge cercmumjes that not 2 lar kase aterntion 10 any other hund uf business could bee expectedi
 note, of whent the enelusel propr r (Nu. 1.) is a copy; and on the sith fin waited on him to prese hom for the answor which he had preait d. Out this oersioul I shaerved to hill that since, by his sote of \(11=1\) sth Secuember, he hail not asaigned any snfilient motuve fir the determinarion at han meats to cramfir the nemeiz: thous to \(W\) ast ingtou, it had herll ineambent onf mee to asenteain -hat thiry be ghat be, maxd so oulonit them to my governmento
It was wift this intrit that 1 brat ougin ife interview of Sc p nember 17 th , aut hal atateal the outbance of our convernanou in toy wiet to has of the 19 th, which with hio reply would be sutt evelit bor iny phrposio. That withone iaplanatioin, the buere notifi-

Erratiom. - The following error is in the print-1) dacumouts, from Which we copied. In page 2 ; in the iohlithe of the lual phapraph wf Mr. Onis letter ol Febriary 21, the words "ohier of che" shmint be insirtid. vo as to read "cannot accomaslish the dfiect of the one or the olicer."

\section*{Constitational principles.}

President Madison's rejection of the hill that lately passed both houses of congress to apprnpriate the bonts, \&c. of the United States liank 10 internal improvements, such as roads and canslshas been highly conmended by some, and os severely reprehended by others. The details of this till were objected to by many who deemed it in he cin-stitulional-on the ground that a fund, capable of accomplishing splendid national ohjects, mi mhit thereby be squandered in pieces of patch-woork, "here a litlle and there a little," withont perfecting any thing of importance. But it was not on this account that the president refused his sanction to it-he considered it unconstitutional in its principle, and here the matter rests. It is not prolyable that any bill of the sort will hereafter becume a law of the United States, unless the powers of congress ure enlarged by an amendment of the constitution:

Without having examined the constitutionality of that bill-and, if we liad, perhaps, without fecline ourselves competent to decide upon it-we supposed that it was in accordance with the principles of the national compact, from the frequent recommendations of such suhjects in congress by the several presidents of the United States, and from the able report of Mr. Gallatin, while secresary of tho treasury, on roads and canals; and we knew that the general government was making the Cumbrrland porsh. We, therefore, felt surprised at is rejection:, and were induced to examone some of our presidents \({ }^{\circ}\) messages in sec how far Uhey agreed vill this act of Mr. Madison. The following extracts immelliately bear on the subject:
Fitrace fiom ilr, Jcfiraon's measage to congirsx, at the openins of the session, Decewber 2, 18) 6.
"Their patriotism [1hat of the people no the linited Staten] Would certaily prefer is [the duty on in. poriol continuance, and applioation in the great purpuses of public education, roads, rivers and cabals, and sucb other objects of public imprivement an if mity be thought priper in aidel so the constietusionul

[He then suggests an amendment to the constitu tioul for the grinposes just lated.]

Estracts from Mr. Mudison's messaige of Deccubler 3, 1816, on opiening the session of cong-ess.
"The importance which 1 lave attacled to the establishment of a t'vivensitr within this district on a scale, and for objects worthy the Americin nation, induces me to retien niy recommetidation of it to the farorable cousideration of congress" - \(\qquad\)
"And I particularly invite their" attention to the expediency uf exercising their existi: g powers, cost zoliere neccessury of resorting th the prescibed mode of eniarging them, in order ueffectuate a cons reliensive system of rouls and cunuls," Sic.
[A amilar opilion, of the want of consiautional poner to make roads and canals, is expressed in his message of December 5,1815 .]

From these extracts it certainly appears, that the rejection of the "bumus bill," by Mr. . Madison, entirely agrees wilh the former opinions oil that gett lieman, anci with those of his predecessor it oftice.

As to the Cumberisud Road-In the act of congress prasscd April 30, 1802, establishing the state of Ohis, it is provided that a certain part of the proceeds of the sales of land in that state shall be applied to the making of public roads, leading firom the navisable waters eluptying into the Allantic to the Oivio, to the said state, and through the gamc; such roads to be laid out under the authority of congress, with the consent of the several states through which they shall pass, \&c. The "Cumberlund Moarlw is, therefore, a matter of special agreemont betweeas the general government and the peopie of the state of Ulio.

There is something very melancholy in the idea that to mpeat matzonal work of internal improvement call be effected by the broad patronage of the fro ve:ument of the United States; which, superior to fros liews and conmanding such ample means, wisht accomplish things to mark the age and chain tise admild ion and sratitude of posierity. IBut such is the fict-iat least in the opinion of the two last Presicicuts, whose talenis as statesmen must be re-spected- hat the constitution must be anended before :ory work of the kind can be done. We do mot despar, however, of secing the constitution so amended as to meet these views of it ; and the "honts bili," thongh rejected, may be the happy cause of it. Many were under the impression that Mr. Matison, in the rejection of that bill, laad acter! inconsistent wi'h his former recommendations of sheh strbjuets; this is easily accounted for-they secoliecued the great points of the fact, but furgut the cuntition on which those points rested

I like diversity of opinion has existed, and yet exi.ts, as to the power of congress to establish at motioncil bint. No suclı powcr is exprecsty delegrated, and the powers wot delegrated are reserved to the states respectively, or to the peopic. Jut congress have power "to jrov:' for the gencmi welfime," which, we lumbly beation, woukl be much better lromoted by roats and camals than it wal be by the eobathishment of that bank.- "Time proves all things:" -if such ail cngine as that is had l een in the hands of those who endeavored to bankript the Unital States i i lie !ate war, and who, with their (omphratively snabll means, really did so much to cepress the public credit-wlat would have been ne conseguenee? Might they not hate stoppeciand would they not hise s:opped, if they could"hice wifels of the govermment?" On the uther leand, if the govermment had retained more power i: the direcion of the atfairs of this institution, it right be used to persecute and ruin the state banks, and individuals, whuse politicul sentinents slould
not be considered orthodox. What has hapfened may happen again.
'Hat corgress has power to establish a nationai unizersity, within the district of Columbia, is fairly presumed foom their right io make i.ll laws relating to it-it ma!, however, be questioned whether the pribic money can be applopriated for i. Some may esteem it mpudent in me to express ath opinion in opposition to the often-repeated and vey e rrest recommendations of 11 ashanglon, . Aclams, \(J\) fir sun and Afudison, in favor of a national u iversit!: But, although I may respect the opinions of allese to a dogree bordering upun voncration, if. I that I ave a ligh and a ciucy, not only to tl ink lin nyself, hut a:so to express iny thought frecty, lipul any subject that I please; aud hare no hemation in decl ring in opposition 10 such an establis'ment, at the seat of the national govronment; a govemunent cons tuted, at present, very muct? io thy wis! es, but which, I seriously desile, may mueri h ve atly o.her influence over the penple ihur properly attaches to it by its virthe. In tine of war, or seas.ms of danger, when threatened hy enenics zuithotht, or trators within, 1 hold it right io bolstar the adninis ration of a firee couniry to the utmost of our power, an : in every way possible to support it, the same not beinsf inconsistent with inoral rectitude: but in a settled statco of things-in a condi.ion of suciety calculated to be permanent, I esteem it not less correct to watch the governing anthority, and to retain in the hands of the people every method of reforning its errors, if any shoukl unhappily creep in. In the emphatic language of Mr. Jefferson, "we have not found angels in the form "f men to govern us," and, until his comes to pass, I trust that all the great powers of govermment, or, at least, the pnwer of changing the governors, will remain undiminished to the citizens of this republic. I am unvilling that government should have any thingr to do with the elliccution of the youth; for on this, more than any thing else, dopends the liberties of the country. It is better to leave it to the people at large, or to the slatc's, if the latier please to take it up-and then, by rival institutions, the public will be better served; and each institution, cmulous of reputation and depending for existence on the number of its students, will be zealous to conduct its affairs asthey ought to be conducted; and if any ar'e silly enough to indulge in politicul dogmas that the people are opposed to, they will fall to the ground. But there are many and very powerful arguments in favor of a national establishment. Among them, it may be said, that it wonid command the best talents of the country, and miglit produce all miformity of sentiment and of action by the uniformity of the insiruction received and the early friendships formed thereat. IBnt would cren these be really advantageous? IVould it be expedient to collect the rays of light to a point, and leave all out of its focus in darkness and solitude, seeing that few, and only the sons of the very wealthy, colld be lenefitted by it? Shall we enlighten one at tie explnce of is thousand; and imitate, in this respect, the policy of Cireat Britain-who, to pamper a matn beyond hmman wants, packs off five or ten thousand others, as good as he is, to the pror-honse, to make room for him? It may reasonably be calculated tha the grants and annmitics to the duke of Wellington, over. and beyond the pay received as field maislaal, \&c. have added, at least, 10,000 souls to the stock of parpers, and the money friven 10 him is of many limes the amount of all the subscriptions for the relief of the poir, about which there has been such

Foud trumpetings.* And how great would be the evil of an unifurmity of sen ionen', if that sentiment, among the rich and the learned, slinuld happen in be erroneons-for neither the professors of universities, nor those edacated by tirem, are more likety to be "angels" , han other persons; indeed, from "feeling power," they are niore apt in forget that they are men The best fastoning of these states is a commanity of interests, in all their parts, for pri vate fricndship might grant what public goor! would refuse. Tie doors of thas univerity would be virtually closed to all but the sins of the great, ready enongh is play the part of aristocrats without b cing led to it bi e rly pre-eninence. Nor would all, even of such, have a clunce of being educated therethere must be cone limit oo the namber of students, and a preference may ustly be supposed, if the applicants shorid exced the umber allowed to be received. Take a case hat now exists - we have never lieard it most remorely insimusted that politics bave had aily thing to tho with the nomination of culets, to be educate 1 at the public expence at the military academy at I eat Point; but manv have complained that whilst some are able to get hirths in it fire twe of their sons, that others plead for a single child in rain. The number is fixed-all that are applied for canno the accep:ed, and personal favor and personal feelings mins be supposed to give a preference. This is natural-it is the result of the commol faw that governs the actions of ment, and cal hardly be avoided. It is maderstood that there are many applic nts, from all parts of the tmion, for situations in this acalemy, where the whole number of strdents is ahout \(250-\mathrm{vet}\) of these nearly onedenth are fiom the District of Columbat!

Thits, and to a mich more ruinous extent it mirgt b: if we harl a natimbl mivensity; which wortd also, in my opinion, have a destructive tendency on the present equality that exists anong the people, b! rearing up certain persons, as it were, to be governors of the rest; and just fears might also be entertained of its becomng a chief seat of immorality and political corruption. Seats of grverninens, from that of the meanest couniy to that of the anos' powerful nation, are unt the places best calculated in inspure the youth with virtuons wentimen's-they are calculateld rather to make runnang men than honest men, and carly impres. yiont are the minst lasting. This establishment would probably send forth some few of splendid ialents, at the cost of the many: I prefer the in. terent of the many to that of the few. Framkline and Rittenkianes will work their way to eminence with. out it, at Broon and Juchsous "hewed a path to fathe" wh hout laving studied at the military acndems; whieh, however, is an institution that ought to be zealously supported as a seeding phace for accomplished soliliers. Leet is profit hy eaperience -we hase heard is frecpuen ly stated, and fiom the
- The cluke of Weiling on is naid to be worth a millow of pounds sterling, ard, perhaps, wish mbre. Sas a million The miterent of this, at 6 per
 tish labor (Ser lath nimber of the keginter.) If the fimlly of a poor m of comsista of five persons, it would give \(30 \mathcal{L}\). or \(1: 13\) clollaris a year for the support of 2,000 families, ar \(15,0 \%)\) pertorins. H -rein we easily sce, what we ronunler linw the people of Fingland ure overturthened, that the buitionig up of the fortume of thes mar, must lave made, at least, 10,000 terints for the poor houses. The weighe of a feether miy break a horse's back Thr-i grantas urs imilepondiat of hus pay or lemolusents of ytice.
very nature of things are inclinel io believe \(i t\), that the private colleges of Eingland are fur unve pro ductive of learnel men, and eminentls inore so of u-eful citizens, than the national universities of Oxford and Cambrilge, where the professora. inlling in fat and independent of the people, sre indolent and careless. 1t is the great business in monarchies first to grasp the mind of youth, at school, wrough the fear of corporal punisliment, and thell eachain it by a pensiouted priestlomen, holding up eternal torments for those who donbt the divine rights of kings ; who are as much indebted to these mancuvres for their crowns as to the bayonets at heir command, and perhatps more so. I ilo not Want political schouls, poitical priesis or servile bayoners to be called in to support the governmient of the United States-yet I slomld like to sec a set of school-books compiled, which, withont reference to our parties, should excite a love for the constitutimal principles of the republic, to supercede the kingly stuff that was lianded in us while colanists and subjects of England, yet used in so many of our seminaries of learning. It will be rectillected that the famons Illuminati proposed, as the only sure means of effecting their purposes, to obtain situa. tions as instructors of youll -they were charged eith a devigu of overturning the olll monarchies, and their power, at one time, was. reported to be very formi.lable:-there was no wbjection to their project becanse of \(\dot{i}\) s laudable enrl; but the fact shews us that it is safest to deposit the pourer of employing tutors in the hands of the people at large-making them chiefly dependent on their own grod conduct for success and profit in it.
These are the outlines of my objections to a national university-but the subject is of a nature to command talents infinitely superior to any that I have to bestow upon it.
Un the whole, then, I conclule-that if it is constitutional to establish a natmal bank and found a mational university, and monstitutional in make roads and lig canals, that it would be mach lelter for the people to recal the power delegated for the first and second anal grant it for the third, than to let the matter rest as itnow is The lateer would assist honest imelustry in its stmaggle in arrive at independence-the otirers seem particularly devign. ed to make the rich rinher and the poor pourer; the immediale advautages of them being sectred in the wealti,y. Riches are apt enoush in gron men lusti-

It is the alpha and the omega of byy politics, in the langulie of the late venerath. Jhetims.". "7ill ir AN ARME:I PROMLK ANH is UNARME:S

Total of vessels cleared, 312 , of which 117 ships; 122 brigs; 56 schooners, 37 sloops; giving a total ton alage 59033

937 vessels of all denominations departed within the expired year from the Bayou St. John, a port of delivery in the district of Mississippi; the tonnage of these vessels is calculated at 16,000 ; they are chiefly employed in carrying the produce of that part of he Forridas belonging to the United States, consisting in barks, coals, cotton, corn, furs, hides; pitch, plan'ss, rosin, skins, tar, timber, turpentine, sarid, sliclli, lime, se.

594 flat buttomed boats and 300 barges have arrived within the expired year from the western states and teritories, with the following articles of produce viz:-Apples 4253 bbls; bacon and hams 13600 cwt. bagating 2579 pieces; beef 2459 bbls. beer 439 do. butter 509 do. candles 3.58 boxes; cheene 30 cwt. cider 646 bbls. cordage 400 cwt. cordage bailing 4798 coils; corn 13775 bushets; corn m 'al \(107 \mathrm{j}^{3}\) bbls. cotton 37371 bales; flaxseed oil 85 bbls fiown 97419 do; ginsetif 957 do; hay 356 bundles; l.emp yarns 1095 reels; hides 5000 ; hogs 500; horses \(3755^{\text {; }}\) lead 5500 cwt . white lead 183 bbls. linens, coarse 2500 pieces; lard 2458 bbls. oats 4065 bushels; pajce: 750 reams; peltries 2450 packs; pork 9725 bbls; potatoes 3750 bushels; powder, gun 294 bbls. salt petre 175 cwt. soap 1538
boxes; tallow 160 ewt. tobacco 7282 hhds. do. mai. nuffactured 711 bbls. du. carrots 8200; whiskey 320,000 gallons; bear skins 2000 . Besites a quantity of horned cattle, castings, frind stones, indiK0, inuskets, merchandize, pacan nuts, peas, beans,

The schedule of the above produce is indopen dent of what is called Lower Losuisiana, consisting of cotton, coin, indigu, molasses, masts and spars, planks, gunpowder, rice, sugar, shingles, soap, taffia, tallow, timber, bees was, \&ic. which are generally brought to market in planters crafts, or taken from off the plantation by foreign bound vessels. canamian exponts and imponts.
Fxports fir the yeur 1816, from Quebec.
Lumber, furs, ashes \((70,609\). cwt.) with small quantities of grain, flour and provisions, in all hav. ing an official value of \(\mathbf{\& 4 8 0 , 0 0 0}\) or \(\$ 1,920,000\).This amount is said to be 140,000 l. greater than it was last year, principally owing to the export of ashes, about one half of which is from the United States. The export of furs has been very much diminished, owing to the zuar between the north west and Hudson bay companies.

Imports, for 1816, at Quelec.
Dry goods, official value, \(£ 1,556,296\). Wines 300,000 galls. rum \(1,092,500\); brandy 31,600 ; gin 30,100 ; whiskey 107,745; molasses 135,241. Sugar, refined \(438,673 \mathrm{lbs}\). Muscovado, 1,809,422; coffee, 335,441 ; tobacco, 46,562 ; tea 218,969. Salt 219,826 minots, \&c. \&c. making a total official value of \(£ 2,174,796\), equal to \(\$ 8,699,184\)-leaving an apparent balance against the colony of about \(\$ 6,500,000\). westenn commerce.
Cincinnuti, March 7.-Came to anchor off this place on Monday morning last, the fine brig Cinicinnatus, 170 tons burthen, from the ship yard Columbia, where she was built.

This beatiful vessel, in the elegance of her model and workmanship, probably surpasses any vessel heretofore built on the Ohio; she is pronounced by seafaring men (of whom by the by we are not destitute, although our port is situated some sixteen hundred miles from the sea) a handsome specimen of the art of ship building. She is now receiving her cargo and will sail in all next week, wind and tide permitting, for Boston.

The moderate weather of the last ten or fifteen days has wrought a very great change in the appearance of our wharves. Previous to that time, every species of craft was locked up by the ice, exposed to imminent danger, or had sought shelter in some friendly inlet or mouth of a creek. Since the opening of the river, our shores afford a most interesting appearance-crowded with almost every species of vessels, from the brig down to the ordinary flat boat; all bustle and activity, loading and preparing to improve the oppurtunity of descending the river on a good tide.
The following vessels have sailed within the last week for New Orleans, with cargoes principally of pork and flour, besides a number of flat boats.

The barge Expedition, of 80 tons, on Saturday, Willian Aclams, maste:-- onners Jeremiah Reeder and Idam Moore.

The barge Adventurer, 60 tons, on Tuesday-60e barrels flour, owners Jumes W. Byrne and co.
The barge Cincinnaii, 120 tons, on Thursday, Jonathan Ilortoi, master-1300 barrels pork and Hour, owners J. and W. Teatman.
Other similar vessels ate preparing and will sail in a short time.
The steam boat iEtna left Natches on the Fthult. with a heavy cargo from N゙piv-Qrleans bound to

Louisville. The Franklin passed Natchez about the saine time for New Orleans.
cotton and ashes.
Commercial letters from Liverpool (says the Boston Daily Advertiser) to Jan. 7 th, cointain a varicte of statements of imports there, and at other ports of the kingdom during the year 1816, compared with those of the preceeding years: The following are some of the results exhibited by these statements,

Inports of cotion for the last six years.
American N. Orleans Liverpool G. Britain
\begin{tabular}{lrrrr}
1811 & 72,653 & 24,749 & 171,429 & 324,724 \\
1812 & 62.701 & 16,827 & 171.774 & 260,168 \\
1813 & 14.174 & 2,988 & 141,666 & 250,430 \\
1814 & 3,624 & & 181,773 & 283,024 \\
1815 & 129,410 & 31,343 & 271,087 & 373,500 \\
1816 & 125,387 & 17,435 & 276,525 & 373,656 \\
The two first columns rive the number of bus
\end{tabular}

The two first columns give the number of bags of the several kinds specified, imported at Liverpool. The third column gives the total imported at Liverpool, and the fourth imported in the king. dom. The imports from India, at Liverpool in 1815, 1484 bags-in 1816, 12,414 bags.

The imports of ashes at Liverpool, during the last three years have been as follows

Bbls. \(\quad 4.400 \quad 18,000 \quad 27.000\)
of which, in 1816, 20,6\% barrels were from the United States, 9900 from Montreal, and 470 from the Baltic. The quantity on liand on the 1st of January, was 9000 barrels. The stock of cotton remaining 50,000 bags. The weekly consumption about 5500 bags.

BALTIC THADE.
Floinetr, Jan. 4.-Last year there passed the Sound, 8871 ships, among which were, from the north sea, 1097 Swedish, 408 Danish, 396 Norwegian, 208 Russian, 525 Prussian, 942 English, 83 A merican, 8 Frencl, \&ec. and from the 13 litic, 906 Kinflish, 85 American, 8 French, 4 Spanish, 23 Portu friese, \&ic.

AMSTERTAM.
In 1816, no less than 2563 vessels of various tonnage, arrived at the port of Amsterdam.

\section*{Law of the United States.}

An act to provide for the redempsion of the public debt.
B is entected by the semate and house of representawey of the linited Stuten of America, in congress as suabid. That so muct of any act or acts of congiess as makes appropriations for the purchase or rimburtement of the principal, or for the pajatient of the interest of the finded debt of the tivied States be, and the same is hereby repealed.

See 2 . Ind be it fursher enasted, That from the procesds of the duties on merchandise imported and on the somatre of vessels, and from the prit C-At of thm internal dutties, and of the valen of w' C t ern buils, now belonging, or which may liereafier beling to the Cinted Stales, the smual sum of ten gillionis of clollars be, and the same is yearly appro. pratest oo the sinking fund; and the lian sum is here. by drclaied to be vested in the compiestioness of the sinking funt in the same manner at the inoness lieretofore appropialed to the said fuath, to be ap. phient by the said commintionery in the parmate of the intereiti ans clatges, and in the reimburse. mtm of purchase of the priticipal of the moblic detbe mind it shall te the duty of therere ewy of the treitury amplatly to eaume to bom moit the the

ten millio:ts of dollars in sucl payments, and al such times in each year as the situation of the weasury will best admit. Prorided, Tlast all such payments as may necessary to enable the said cormmissioners to discharge or reimburse any demands against the United States, on accomnt of the primcipal or interest of the debt which shall be actually due in coifurmity to the engagements of the said United Sta es, shall (may) be made at such times in each year as shall enable said commisstoners fait 1 . fully and purctually to comply with such ensige. ment. Prozided also, That any money which muy have been paid befure the passige of this act, to tilc commissioners of the sinki:1g fund for the year one Thousand eight hundred and seventeen, as a part of the annual appropriation herelofore made by law to that fund, shall be lield to be a payment for the year one thousand eight hundred and seventeen, 21 account of the appropriation of ten millions, herimbefore directed.
Scc. 3. Ind be it further enacted, That in addition to the sum of ten millions of dollars, hereinbefore anmally appropriaied to the sinking find, there shall be appropriated for the year one thu. sand eight hundred and seventcen, to the sinki:g firnd, the further sum of nine millions of dollars, to be paid out of any moneys in the treasury, not cotherwise appropiated, at such time within the war, as the secretary of the treasury shall deem mici con ducive to the public interest; to be applied by the cormmisssioners of the sinking fund, to the purchase or redemption of the public debt, and it shall be lawful for the secretary of the treasury, at :uy tine during the year one thousand eight hundred and seventeen, if he shail deem it expedient to do so, it cause to be paid to the commissioners of the si:k. ing fund a further sum not exceeding four millions ofdollars; which shall be considered as an advance to that amount, on the appropriation of ten millions payable in the nest rear, and the saill ammont shall also be applied by the said commiscioners, to the purchase, or redemption of the public debe, and tie commissioners aforesaid are authorised an ! directed to apply the sums by this act appropriated to the purchase and redemption of the ptiblic debt, hatden by the bank of the United States, if not other. wise to be obtained on the terms stated in this art
Sec. 4. Ind be it further emacterd, That after the year one thousand cight hundred and seventcen, whenever there shall be, at any lime after an atl. jourminent of congress, in any year, a surplis of min. ney in the 'reasury, ubove the sums appropriatel for the service of such year, the payment of which in the commisvioncrs of the sinking fiml will yet Icave in the tressury at the enel of the year, a bas tance equal to two millinus of dillars, thet sith surplus shatl be, whed the stme i, licieby appereptrice ted to the siaking fimid. to the paill at sish litats avthe situation of the tre sury "ill be t permin and shall be applied by the commissioners theren, to the purohase, or relemption of the pmblis it bit

Sec. 5. Ind be il firther enactell. That whenever, in any year, there s!all he a surplus in the rimheng finul, beyand the umporme of inforest al pricip) which inay be se uiliy duc anit puable in the em. ed States, in suci year, in comfumity thith the ir
 shall lie atd the \(y\) on licrats. metharlail vith the approbation of the iwetilait or the Enital sitt-4, I? juenchane zle delt of the thinibl Siates, it is

 bearing an intepest if chrce per celtuin ur intom, there thall rombe gsil meed that sis'? in Jallars
for every hundred dullars of the principal thereof; for slock hearing an allumal interist of six per centum per aumum, there sliall not be paid more than the par or true value hareof; and for stock bearing anl annual interest of seven per centum, there shall not be paid an advance above the par value thereof, which slabll exceed for every hundred dollars of stock, the computed value of an annnity of one dol. lar fur a number of years, equally to that during which the stock so purchased will not be reimbursable at the pleasure of ihe governinent, estimatirg, in such computation, the interest of money at six per centum jer anıum.

Sec. 6. And be it further enacted, that all certificates of public debt which by payment or purcliase have become, or hereafter shall become the property of the United States shall be cancelled or de. stroyed, at such time and under such regulaions and securities as the commissioners of the sinking fund, with the approbation of the president, shall estab. lish and determine. And roo interest shall be considered as accruing and no further payment shall be made on sccount of such debt, ilie certificates of which have been so cancelled and destroyed.

Sec. 7. Ind be it further enacted, That nothing in this act contained shall be consirued to prevent the congress of the United Stotes, if war shall occur with a \(y\) foreign power, froin applying, to any object of puinlic service, any surplus of the amount herein approp iated to the smking fund, which may be lefi in a y year after pasing the interest and primciral which may be acualiy due and payable by the United \(S\) ates in conformity with their engagements. Nor statil any thing in this at be construed to repeal, alter, or ffect, any of the provisions of any former act, pledging the faith of the United States, to the payment of the interest or principal of the public debt, but all such payments shall continue to be made at the time heretofore prescribed by law, ex cepting only as before provided, that no payments shall be made on certificates which have become the property of the Unted States.

\section*{H. CL.AY}

Speaker of the house of representatives JOHN GAILL IRI,
President of the senate, pro tempore. March 3, 1817.-Approved
J.MES MADSON.

\section*{Claims for property destroyed, \&c.}
in sesate of the uniten states-ffib. 27, 1817 The committee of claims to whom las been referred the petition of William 13. Stokes,
REPORI-That the petitionce was owner of a house in the town of II vie de Girace, in the state of Maryland, when the B.itish detachment arrived at that place in May, 1813, at which time it was destroyed by them.

The petitioner represents his said house as of the value of \(\$ 7,500\). The evidence laid before the committee, ppears 10 have beeen taken under cominissions issued by Richard Bland L.ce. It is set fortlo in the deposition of John C. Ridgely, a lieutenant of dragoons, at said time in the service of the United States, that on the Suturday before the British arriv. ed at Havre de Grace, he reached there with a detachment of dragoons in pursuit of deserters, and asked for quarters. Mrs. Sears who keeps the holise of Mr. Stokes as a tavern, objected, but he insitted and did quarter there from Saturday until Monday, when the British landed, and at that time had two deserters under guard in the said house. subsequently he bore a fliag to the enemy and re.
monstrated against the destruction of said house an: was answered that it was a militury depot. Abratham fiarret another wi ness examined, swears that he accompranied the Alag, and on remonstrating against the conduct of the British in burning lie town, he was told by the admiral that many of the houses burnt rotre occupied fur military purpuses; that it was his determination to burn every house vccupied for military purposes, \&c.

The deposition of Kidgely and Guret, are those only that \(g\) go to touch the catuse of the birning, and all they state amounts to no more than this wats the vague excuse of a vindictive freebooter for a disgracefil ourrage on the usarges of rivilized warfare. The detachment of cavalry, it appears, were evidently sojourned in a public liouse over the siabbath only, that they were there as persons passing casnally, not in a military station, nor exercising any control over the lonse. The attempt to estahlish a milita. ry occupancy from the presence of militia, is still more objectionable, as they were, th is helieved, only The local militia present, and many of them residents. That a British ardniral comnitting acts of tle most flagitions desolation should, when carnestly expostulated with agsinst it, offer' some pretence of justification at the expence of candor and \(1141 /\), was to be expected - it was pefectly in character. IBnt the committee think it would be erroneous to admit such authority, to establish the fact of public occupancy. Mr. Garret says, that many of the loouses were alleged by the enemy to be occupicd for military purposes. This would seem to convey the idea, that Mrs. Sears' honse was the strongest case, and that others are considered as eligible to allowance even on slighter pretances. Some, howevers, it is admitted, hive been burnt wantonly.

The whole transaction, the committee have no doubt, was of the most lawless character, and they cannot admit for a moment that this flagitiously incendiary act, should be at all palliated by the admission of such evidence, to sanction it as an act of excusable warfare.

The committee believe this to be the first claim of a similar nature, presented for the decision of congress; and they apprehend that the extent in which like claims may be made, gives to the decision that may now be had an importance that does not belong to the value claimed. While they regret an enemy styling themselves Christians, coukd commit acts of such aggravated turpitude, and that their fellow cilyiens have been made the victims of such heinnus depravity, they cannot feel the obligation on the goverument to inake inclemnity, ron discover a!ıy jractical priuciple of justice that would allow it. They submitrespecifully the following, to wit;

Resolved, That the priyer of the petitioner ought not to be granted.

\section*{Memorial of the Peace Society.}

To the honorable the senate and loonse of representa \({ }^{-}\) tives of the United States, in congress assembled, The memorial of the members of the Pence Society of Massachusetts, respectfully represents:-

That the society, which now solicits the attention of our national rulers, was instiuted for the single purpose of diffusing pacific and benevolent sen. timents through this country, and through the world. Impressed with a deep and sorrowful conviction that the spirit of christisnity, which is a spirit of mercy, peace and kind affection, is imperfectly understood; afflicted by the accumulating miseries and extensive desulations which war las lately
spread over the fairest, most fruitful, and mosi enLinilecel regions of the earth; and at the same time encoura red by many decisive proofs of the revival of purer, and more benevolent principles among christian nations, your memorialists have for net this association, with the solemn and deliberate purpose of co -operating with the philanthropints of every country, in promoting the cuse of peace and charity; in stripping war of its false ghory, and in uniting different communities in the lmads of amity and mutnal good will. We are sensible that from the nature of our object, it is chiefy to be acom plished by a silent and gradual inftrence ont the minds of men athl acenrlingly we have limited o:rr operations to the circulation of usefill treatises, is which, the pacific spirit of onr religion has been exhribited with clearness, and we hope with s coce-s We believe, however, the present moment lemands a cleparture from our usual ccurse, and we cherish the hope, that by an application to the government under which we live, important service miv be rendered to the cause of humanity, in which we are engraned.

The present memorial is founded on two necurrences, which we hail as anspicious on the pacification of the world. The first occurrence to which we refer, is the well known and unprecedented mion of everal of the most illustrinus powers of Europe, in declaring before "the miverse their unwuvering determination to adopt, for the only rule of their conduct, both in the administration of their respective states, and in their political relations with every other government, the precepts of christianity, the precepts of justice, of charity, and of peace."

The second occurrence to which we refer, is the decided expression of pacific sentiments and anticipations in the conclusion of the late message of the president of the United States, in which his parting wishes for his comntry are expressed with ienderness and power. In this remarkable passage, wortly the chief magistrate of a christian commnnity, he expresses his conviction that "the destined career of his country will ex ibit a govermment, which, whilst it refies its domestic code from every ingredient not congenial with the precepts of an enlightened age, and the sentiments of a virtuons people, seeks, by appeals to reasom, and by its libe ral exumples, to infuse into the law which roverns the civilizel world, a spirit which may diminish the freyucney, or circumscribe the calamities of war, and ineliorate the social and bensficent relaioms of peace; a gnvermment, in a word, whose condoct, within and without, may bespeak the most noble of all ambitions, that of prometimg peace on earth, and gool will to man."

On the recurrences now stated, your inemmial ivts reapectfully beg leave to found the following suggestions and solicitations:

First- We respecifully solicit, if it be consistent with the principles of the comstintion, that the solemm profession of pracific principles, lately manle by several distingnislied sovereigns of Eurnpe, ra ay be met by corresponding professions on the part of oir own goverminent. Whilst we are sensible that a melancholy discordance has often csivterl between the language and the conduct of rulers, we still be. liere that the solemn as ertion of great aud important principles, by men of diftinguished ramk and inthuence, has a beneficial operation on sociely, by giving to these proseiples an increascil authority over the consciences of those by whom they are profresed. by reviving and diffusing a reverence for them in the community, and by thus exalting the standard
of pub'ic opinion, that invisible sovereign, to whose power the most absolute prince is often compelled to bow, and to which the measures of a free goverument are entirely subjected. When we consider the support which is now derived to war, from the p-rversion of public sentiment, we are desirnus that our government shouid unite with the governments of Europe in a distinct and religious acknowledgement of those principles of peace and charity, iil) which the prosperity of the states, and the hap. pitess of families anil individuals are alike sus. pended.

Seconclly-W' We respecifully solicit that congress "ill institute a deliberate enquiry, for the purpose of uscertaining the methods by which this government may exert on human affairs, that happy influeare which is anticipated by the president of the United States: the methods by which it "may infuse into the law which governs the civilized world," a pacific spirit "may diminish the frequency, or cipcumscribe the calamities of war," and may express "ile most noble of all ambitions, that of promoting prace on earth, and grood will to man" We are persuaded that a government, sincerely disposed to sustain the august and sublime character which is liere described, of the pacificator of the world, will not want means of promoting its end. We trust, that under the persevering and well directed efforts of such a government, milder principles would be introduced into the conduct of national hostilities: that the reference of national controversies in an impartial umpire, would gradually be established as the law of the christian world; and that national compacts would be formed for the express purpose of relucing the enormons and ruinons extent of military establishments, and of abolishing that outward splendor which has so long been thrown around, war, and which has contributed so largely to corrupt the moral sentiments of mankind.

When we represent to nurselves a christian government sustaining this beneficent relation to the world; mediating between contending states; recommending peaceful methods of deciding the jarring claims of nations; laboring to strip war of its pernicious glare, and to diminish the numbers of those Who are interested in its support; lliffusing new and generous sentiments in regard to the mutual duties and obligations of diferent communities; and inculcating, by its own example, a frank and benevolent policy, and a sincere regard to the interests of the world; when we represent to ourselves such a government, we want language to express our conceptions of the lappy amil magnificent results of its operations. It would form a new and illustrions era in human affairs, whilst, by the blessings which it would spreat, and by the honor and confidence Which it would enjoy, it would obtain a moral empire, more enviable than the widest dominion ever foundel nu violence and crime.

Loving our country with temiciness and zeal; accustonned to regard her as destinced in an exalted rank, and to great purposes; and desirons io behold. in her institutions and policy, increasing clains in our reveremee and affection, we are anlicitons that whe shonld cuter first on the career of ghory which has now been deveribet, and that all her connection "ith foreign states slionld be employed to difiuse the spirit of phalanthropy, and to diminish the occa. siuns and miseries of war. Of such a country, we shall exilt to be the chilitren, and we pledge to it ais attachment, vencration and support, which can mily be accorded in a virturous community.
it is our lappomess that we live in an uge when m ny moble schemes of benevolence lave been ace-
complished; when the idea of a great amelioration of human affairs is no longer rejected as a dream of fincy; when statesmen are beginning to learn that all nations lave a common interest; when philanthropy is extending its views to distant countries. and is executing purposes which would once have been regarded as the offspring of a blind and extravagant zeal. In this age of enlarged views, of generous excitement, of unparalleled activity for the good of mankind, it is hoped that the idea of a nation, espousing the cause of peace and humanity, will not he dismissed as visionary and impracticable Linlightened and benevolent statesmen will discern that we do not live in ordinary times, but that a new and powerful impulse has been given to the human mind, which, under judicious influences, may issue in great and permanent improvements of the social state.
In presenting this memorial, we solemnly declare, in the presence of God, that we have no private or narrow views. On this subject we belong to no sect, no party. As lovers of our country, as friends of mankind, as disciples of Jesus Christ, with the spirit of peace in our breasts, and with a deep impression of the miseries of war, we are only solicitous to prevent the effusion of human blood by human hands, and to recal men to the conviction that they are brethren. We trust that the warmth with which we have spoken, will not be construed into a want of deference towards our rulers. On such a subject coldness would be a crime. Our convictions are deep, and no language but that of zeal and earnestness, would do them justice.
We hope that we are addressing rulers who are sensible to the responsibility imposed by the possession of power; who regard the influence which is granted them on human affairs as a solemn trust; who consider themselves as belonging to their count.ty and to mankind, and who desire to treasure up for themselves consolations in that hour when human applause will be an unavailing sound, and when no recollection will be so dear as that of having aided with a disinterested zeal the cause of peace and humanity.

By order of said society,

\section*{Legislature of New York.}

We deen the publication of the following act of the New York legislature a curiosity well worth the prescrvation.
in semate, marcie 10 .
An act concerning the Shutkers.
Whereas, Eunice Chapman, in the year one thousand eight humdred and four, was lawfully married to James Chapman, by whom she had three children, and with whom she lived until the year one thousand eight hundred and eleven, when the said James Ghapman abandoned his said wife, without leaving her any means of support, and soon after joined the socicty of Shakers, in Neskauna, in the county of Alba:y): Alud zuhereas the said Jarnes Chay man, since joining the society of Shakers, has taken from his wife her children and now hecps them concealed from her, and insists that the marriage contract betweea him and his said wife is aunulled, and that he is not bound to support her, snd las publicly forbid
all persons from harboring her, and declared that ho would not be responsible for her debts:- And whereas the Shakers hold, that whenever marrierl persons unite with their society they are absolved from the marriage contract and profess to believe that the said contract is unlawful and immoral, and that it is sinful for a member of their society to maintain any in'ercourse with those who are not members, withont what they term a gift from their elders: And whereas a propagation of these principles is utterly subversive of the peace and happiness of families and the order of society-Therefore,

Be it enacterl by the people of the state of Neirv- York, refresented in senate and assembly, That the mar. riage contract between the said Eunice Chapman and her said hushand James Chapinan, be and the same is hereby declared to be dissolved, and the said Eunice Chapman entirely freed from the same; but nothing in this act contained shall be construed to give the said James Chapman a right to marry, during the life time of the said Eunice: Provided, that the dissolution of such marriage shall in no wise affect the legitimacy of the children therenf.
II. And be it further enacted, That any married person being an inhabitant of this state, who shall hereaiter attach him or herself to any society of Shakers in this state, shall be deemed and taken to be civilly dead, to all intents and purposes in the law, and his or her property may be disposeci of in the same manner as if such person was really dead; and such person shall forever thereaf'er be incapable of taking any estate, real or personal, by inheritance.
III. And be it further enacted, That whenever any married person, being an inlabitant of this state, shall hereafter attach him or herself to the said socicty of Shakers, it shall and may be lawful for: the husband or wife, not belonging to the said society, to file a bill in the court of chancery, setting forth and alleging that the husbaad or wife (as the case may be) of the person filing such bill, has joined him or herself to the said society of Shakers, and the like proceedings shall and may thereupon be liad as are prescribed by the act, entitled "an act concerning divorces, and for other purposes," and if it shall appear on trial or enquiry, in the manner directed by that act, that such allegation is true, the chancellor shall pronounce and deem such persons, so joining the Shakers, to be civilly dead; and it shall not be law ful for such person thercafter to marry, if a man, during the life time of his former wife-and if a woman, during the life time of her former husband.
IV. And be it further enacterl, That in all cases where any husband or wife, having any child or children of the marriage, shall hereafter separate, or may at any time heretofore have separated the one from the other, and shall or have attached him or herself to the said Shakers, and shall also take or have taken, with him or her, such child or children, being under age, the chancellor or any judge of the supreme court, for the time being, on the application of the husband or wife, not having joined the said Shakers, and being an inhabitant of this state, may allow a habeas corpus to bring such child or children before him; and if on the return thereof, such chitd or children cannot be found, and it shall appear that such child or children is or are concealed and secreted, by and among any society of Shakers in this state, it shall be lawful for the chancellor or judge, as the case may be, in his cliscretion, to issue a warrant directing the sheriff or other proper officer of the county where the said
socicty reside, in the very time to search the dwelling houses and other buildings of the said society, or any members thereof for such child or children, and on bringing such child or children before the chancellor or judge, he may on due considers. tion, away the charge and custody of such child o: children, so to be brought before him, or any of them to that parent who shall not have joined the said society of S!akers,for such time and under such regulations, and with such provisions and di. rections, as to the said clancellor or judge shall seem proper, and as the case may require; and the chancellor or any judge of the supreme court, shall at all times thereafter, have power on sufficient catuse shewn, to annul, vary or modify the order so to be made; and such warrant of the chancellor or judge shall justify the sheriff or other officer, and those who by their order shall come to their aid, in miking such search os aturesaid, and sued there. for, may plead the general issue, and give this act and the special matter in eridence.

\section*{American Manufactures.}

Great and simultaneous exertions appear to be made at the presellt moment to awaken public attension to the subject of home manufactures. The following queries are calculated to produce information important to the great interest of the nation; and we therefore laj; them before our readers that iuch as have it in their power may give the answers. (circulake.).
Philudelphia, JIGrch 6, 1817.
Sin-The committee appointed on the part of the "Piniladelphia society for the promotion of American manufactures," to report a plan in aid of the internal industry of the country, take the liberty to cill upon you for infurmation on this important subject.

That our manufactures are in a state of great depression, is a fact, unfortunately, too well known, and too severely felt: but the nature and extent of the evils which press on particular manufaciures are not so obvions.
For the purpose of obtaining an intimate view of the manufacturing interests, and of strengthening our application to the legislatures, by the most powerful of all means, a well digested statement of facts, we request of you the fullest answers in your pow. er to the following queries.
1. Is your manufactories in a depressed state? If it be, to what canse do you ascribe its situation?
2. What measures in your view, will contribute so its relie?
3. What proportion does the price of your manufactures bear to the present price of articles in your lime, of foreign fabric? What to the heretofore regular import price, and to the cost in the foreign country in which they are made?
4. What is the national consumption of articies of yorr manufacture, and how far chat the demand be supplied firm internal sources?
5. What are now, or have been heretofore the quantity and value of goorls manuf.ctured by youl
6. Itiw many hands do you cinploy, when your manufictory is in full operation? What is their state of mental cultivation, and what their moral habits.

F Tho the habits contracted by the people of your manufactory rendor them less profitable in other employments?

8 Is your business conductel by manalal labor, or abor saving maclinery, in whole or in part? What is the rrlative propotion of each?
9. Are the people employed by you principally sdults capable of field labor, o: nimora, femaics, or
persons whose infirmities unfit them for stich emtployments?
10. What is the quality of your manufacture, compared with those of a similarkind imported? Illuswate this by instances.
11. If the arvicles manufictured by you are more serviceable than the imported, please state the reasons; if less substantial, inferm by what means these imperfections can be removed.
12. How far is your minufacture dependent up ou forcipn materials, and by what means can they be suppliced from internal sources?
13. What is the cost of the raw materials? Com. pared with the prices of the same quality in forcigia countries, and if higher, say by what ineans you suppose the prices can be reduced?
14. What is the difference of profit from hands employed in your manufactory, and from liands em. ployed in the pursuits of the yeomanary?
15. What is the national gain from the difference of the raw materials employell in your manufacture, and the value of the articles when manufactured? \({ }^{2}\)
16. What is the difference between the wages paid! to laborers in your manufactory, and those paid to laborers in similar foreign manufactories? Woes this difference operate favorable or unfavorable?
17. Is the establishments of your mantuacture favorable or unfavorable to the extension of agricul. ture ?
18. Do the present duties on import afford a suf. ficient encouragement to your establishment? If not, what rate of duty will be necessary ?

19 Has your manufacture been the cause of increase of the wages, paid to the laboring part of the community, or upon what principle do jou account for the increase paid for daily labor?
20. Is the increase of paupers owing to the establishment of manufactories? If not, to what cause do you ascribe the increase of the number तf the poor, and by what means do you suppose the number can be reduced, and their condition rendered more comfortable?
You swill particularly oblige the society, by furwarding without delay your answers to such of the ahove queries, as you consider within your knowledge, and in such terms as you shall consider best calculated to give the most useful information.
Address to William Young, choirman, No. 10, South Third Street, Philadelphia.

\section*{Relations with Russia.}
foom tile national beteliligetera.
Our readers have seen, by extracts from Finglisha papers, and verbal advices from Europe, that the difierence between the Uniterl States and the Rus. sian government is said to have been satisfactorily adjusted. It has given us plealure to learn, that this report is not without foumdation, and that information lias been receivel by government, in d!rectly from Mr. Harris, our claarge d'aftaires in Aussis, thas, immediately on being made acoprainten with the true state of the case, by means of the dispatches of which Mr. Co!es was the beatec;
the emperor expressed his conviction that not the government of the United S ates, but t'. e R:Issian officers in this country, had been to blame in the trai action, which had been incurrectly represented to him.

The conduct of the emperor, in yielding his first impressions at once to just explanations from our government, is an eviclence of the continuance of the disposition, which that sovereign has always shewn, to maintain amicable relations with the United States. The frankness and promptitude of the executive in making these explanations directly to the government of Russia, bas secured the honora ble termination of a controversy, which, however absurd in its origin, might by the intrigues of those disposed to foment it, have becone important in its consequences.

It is stated in the New. York papers that the Rus sian minister has been recalled by the emperor, with marks of his displeasure. We do not believe that anv information to that effect has been reeeived in this country from any official source.

\section*{Curran's Speech.}
from the london obsenveit of javeary 18.
A select but numerous meeting of the friends of economy, reduction and parliamentary reform, on Friday, dined together at the freemason's tavern, Wim. Lucas, esq in the chair.
The assembly was most respectable, and through. out the whole of the proceedings never for a moment overlooked the great cause for which it was convened. When the cloth was removed, the following toasts were given from the chair:

The king-The regent, and may he never lose sight of the principles which seated his family up. on the throne-The queen, and all other members of the royal funily - The constitution of king, lords and commons. May all the efforts to endanger it be rendered abortive by the timely exartions of all gond Engli hmen to correct such errors and abuses as time and design have introduced-The triends of economy, public order and reform, throughout the united kingdom-Civil and religious liberty to all mankind-The liberty of the press-May the present twanquility of Europe be neither disiumbed by the injustice of princes, nor by the vinlence of in-dividuals-The navy and army-The lord mayor, the friends of reform, and the city of London.

The Cmammas said he should propose the health of an illustrinus man then present, the right hon. John Philpot Curran, which was drank with great applause.

Mr. CURRAN then rose, and spoke to this effect -Mr. Chairman, and you, gentlemen, be pleased to accept my most respectful thanks for the honor you have done me; an honor peculiarly great on an occasion awful as the present. On ordinary occasions, a superficial civility is sufficiently rewarded by an insolvent bow. But something more is necessary in return for the introduction of my name, at a moment when the liberty of England is in question. I come foom a conintry which has no liberty Io be proud of, and if I go back to it, it will be as to the ruins of Babylon, to weep. Youl have been pleased, however, to give one toast-the canse of civil and religious liberty all over the world. When you drank that toast, I felt my heart embrace the negro-I felt also that it sympathised with iny own poor country. Ireland, if it heard that toast, would bless that generons prospect of your's, from which alone can grow our human existence-(applause)I am enthtisiastic for my countrymen, but my en-
thusiasm for them is not surpri-ing. My youth bas been spent amongst them-my sympathy has been exercised for them-1 might have sold myself at the market of corruption, and grown into pride, and wealth, and reniorse, at their expence; but I preferred to stay below with them in their humiliation -to mourn their condition-to defend them if could-in chide and rcbuke them, when a bold \(f_{1}\) iend ought to do so. O:1 their behalf I thank you for the generous sympathy which has rlictated that toast. You will not find them unworthy coadjutor's in the vineyard of liberty.- (Applause.) - I might be disposed, perhaps, 10 trespass too mucli on your indulgence, on a subject towards which my lieart will never ficeze-the subject which brought you together; but the sentiments I entertain have been so much better expressed by the member who spoke last, my old friend, if he will allow me to call hin so (Mr. Waithman,) that I shall only deface them if I attempt to rub then over. They are sentiments which alonger life then he has yet passed has rivetted more firmly on my judginent. The awful subject of nur mecting is that policy which, by its miclancholy restits, we perceive has approached a crisis. It is written in tears in this country-it has been written abroad in blood (applause.) I remember the A merican war-I am not sorry that I am old enough to have witnessed its crimes and follies, because I shall soon be removed from these scenss altogether. I saw then the graceless contempt of human rights. I heard the assertion that men were represented when they were not represented; they behaved to a nation as a petty solicitor to a man when he enterss his appearance in a court bo order that judgment may proceed against him (applause); the admonition of Providence, the admonition of the waves, which she had interposed, was of no avail. We displayed our antic force and mimic ferocity; we kindled the fire of liberty in America, and at that blaze was the spirit of France kindled. Let no man dare to say when he weaves his wel) of policy-tush, there is no find! Yes, there is-and by his law the crimes of men fenerate in their own consequences their own punisiment (applause.) The French revolution began-the French would have been at peace with us-as a man from them was on lis knees in this comintry-(Chauvelin,) but he was kicked out. It will be tedious to read a clincical lecture on the progress of this disease-we have brought it to an end-but how? As the most ignorant quack might have closed it; we have bottled up the infection (appluse.) Hive we done any more ? What have we done? The most glorious circumstance for this country took place at the time of our revolution, when we decided, that in the time of national calamity, the monarch should not cling for his defence to the base and scurvy tie of legitimacy [applause.] Your ancestors saw what the monarch woukd be, if he only could commit crime with impunity. They repealed that odious law. The last war was to repeal that repeal, to establish the primciple that the nation has no power to judge of right or wrong; that their decusions shall be set aside by a gang of despots who have restored a faded-no! not a faded-an exhausted-ho! ! not an exhausted, but a bloated, extravasated dynasty-merely because they had a mind to do so [applause.] It is not that i have any semtments of enmity to the members of the exccutive in this country-they are misguided, misadvised, but they do not want good intentions; but is there nothing alarming in itself in the establishment of 150,000 men? Where think you this establismenit was formed-in the cabl.
net of St James' Are you sure of that? - Was it not curise in be forlowed in the attainment of reat the congress of Vienna? [applanse.] We see its form, and uroceeded]-There should be no spirit effects, universal distress, universal beggary. Ihave of acrimony in yom proceerlings. There are many been shocked in your streets with what I had never persons of the hingest honor int the house of comwinessed before in this country-men well dresser! inous. 'Tincre are in the direction of his majesty's approach me, and, in the under voice of suffi ving and conncils-I do mok know them-but blessed are shame, ber we to give them something Remember those, we are told, hat believe, though they have one thing. It was the number of public mendicants in France which cansed the horrors of the revolution. When man, who has been accustomed to suppori his family, is no longer able to fiad them bread, the social tic which binds him is brakell, and famine beconnes the recruiting officer of rebellion (applanse.) Let me remind you of another thing: a country does uot f.ll to pieces in a moinent; but when it begins to fall, like other falling boulies, it descents with a constantly increasing velocity of precupitation! How far are we from the earth? How long will it take to pass the space which re. matas? If youlhave now 40,000 star wing men (you see 1 dm absurdly minute in my calculation) burs iagwiler want and oppiression, what boud of allegi arce remsins for them? The true bond of allegiance is, when the subject feels that he durives blessings from it which he lad better die than part witis But where is the John the B.aptist? Where is the baice, lusinan or divine, which call preach to the exasperntion which finnine and oppression procluces in the minds of men (applause, and I will even atd in Finghsh minds? You are not like tie French apes and dancers. You cannot pipe or sing athidst your misery, and then run from jour litue ordinary ganbols into blood and cruelty. You are of a grave habit; nature has made it more difficull i) rouse you, but remember that oppression will make even a wise man mad. You feel what your gricvance is-but what is the remedy. Neither the patient or sloctor know our evils; we feel in pending famine and the dread of a military des protism. Military establishments are uscful whell rabsed to oppose our enemies, not to trample on our livends. But even in the streets now we see nothing lout spurs, and cockades, and whiskers and feathers.-Fine birds of show, but odious bards of prey in a country like yours. What has been dome hy this arny? It should almost seem that honur Wat in longer a part of the profession of a soldier. faish has not beenkept in any part of Europe. How lisre yon behaved to Norway, how to Puland (which thas been treated almost as badly as Ireland, ) how to ltsly? To aid rubers akainst the people, you wore cvery where Did the blesed Virgin lay you in sterp, while the horrors of the lugubation were ratared? (applante) My unfortuntate cotury you provaled on to sell her life, and when she lay dead, andead of aftiording her decent rites of sepulture, yon thed lier corpres to what remained of vitul re: joretentation in thay country, and jou have lecon pewarded aceordingly. You have not beell hatited hy lier ghol, but you have been rotting with hits eireale You have been eugaged in a war contraly Is the intereats of your counir)-not one war il a thonsand is undertaknon for the sake of nutional in-termit-thry are nimulated by the eonrly pandern to the pastiont of princes. The war witi Ametica lad werer been prppular in Iramind we war will France thad never bect pupular there. I do no
 Roylish inumsh; liad lefe it litite to be proul of in the way of weallh-but still the voice of a mation wa comsthing, and the bare -prostates who git *Frael 1, thonght better to will the ir cannay, and

When youlhold up the citustion of the country to their view, they will havo so much acquiescence as to say, as Nathan said to D.vid, "thou art the man;" they must ncknowledge ure justice of your picture. I cannot suppose that if your claims are stated fairly and moderately, they cannot have an effect. When the penple are unrepresented beyond a certain point, the system is worse than no representationat all. (Applanse.) The executive is unt only without combterpoise but without apprehension.Thuse brihin:" and those hribed degenerate into a protligate fraternity, drawing and vedrawing, without funds of their own, on the solvency of the couniry. The ruler is not ashamed, and the betrayer is not afraid. There is a kind of competition in vice. If one man will keep within bounds, another will be found to dress hiunself out in all the ribbons of his prostituion. I ain not for giving voles to the beggar on the bridge, nor for the constant rout of aunual parliaments, but for a xubstantive representatin! of the peonlle. In thas cause 1 wish to see all distinghished, ersons come forward to pull an oar. Th is socictr, I a:n persuaded, will set 2 good example, it will show the people that parliamientary returin dues not con-ist in breaking windows, or getting drunk in thestreets. It will rally every man of good sense and decent fieling-behaving with resplect evell to those who have done you wrong. Go on-and fioll give jou the success Which, if it be not blasphemons to say, you have merited by the noble proncipies of your cu-operation (loud and long coatinued applainse.)
The hemiths of the mover and recomiler of the resolutions were drank, who relurned thanks.Several toasts were drauk, as trial by jury-The I. berty of the press-Success to the calne of the society. Abrut 10 o'clock the chairman left the chair, and most of the company separated.

Sidepmalence of farlonoment. It is puiblicly averred in a Britill paper, that a certain ineasure will be corried itt the ensting sescion of parliament, be cause lord Liverpool has signified lis intentions of sup. porsing is !
The meeting for refirm, at Cork, was attonde! by 20,000 persons. The state of Ireland is most filoomy-tenants are denerting their farms, anml they, with their lamidortsare involved in a common ruin. In oise harony of the cisunty of Clare, 18,000 acres, deterted by their late tenants, retnain as wasie latil, and so it is in other parts of the country:

A foudon paper ntates that 13,00 ) distressed woikuen from Stafiontahire, were patrolling the kingtoin in all directiuns as beggrare, to ingung with thein printed papers nigmal by the magistrates certiffing who and what they wered Thirteen thousund men forn one colmitry made lo ggarn of, besides the usual vast stiock of pulpersand raerants. -ts this prostible? And why should it nut be-it is sail thit suay land liolders are willing for a teres of geark, tio gire their property rent free in ath that will frive Eecurity to pay the tence:

\section*{fraxce.}
"S"ating."-The following account of the new Trench Inan is given in the Buston Centinel:
"The Indon papers are in error respecting the exient of the loan which Messrs. Barivg \& Co. have lately made to the French govermment. We have seen letters from intelligent gentlemen in Trance, which give correct particulars respecting it. The amount of the loan is four hundred and twenty mil lons of francs, [nearly serenty-nine milions of ciollars, and upreards of secenteen millions sterling.] The tenders were to take five per cent. stork at 70 francs, payable at the expiration of ien years, at par. It is estimated in Paris, that the loan will produce nearly eleven and a haif per cent. per ammum, for the ten vears. It is added, that only one half the amount is to be paid in money, and the other in clothing and supplies for the allied army; which unquestionably will be supplied from the workshops at Sheffield, Manchester, \&c."

SPAIN.
The Spanish consul at New-York has officially notified the public, "that all and every description of foreign manufactures, composed wholly or in part of cotton, are totally and strictly prohibited" an entry into the kingdom of Spain.

\section*{AFRICA.}

The captain of a Tripolitan vessel of war captured an Anglo-Hanoverian ship, and entered port with her flag at half-mast. A representation of the case being made to the bashaw, he ordered the vessel restored, \&c. and caused her flag to be hoisted to the mast-head, under a salute of cannon-the captain of the vessel of war, at the same time, being hung fiom the mast at the height that the flag liad just occupied.

ST. MFLENA.
A letter from the marquis de Montchenn, commissioner of the king of lirance to guard the person of Napokeon Bonaparte, in St. Helema, has been widely circulated through Europe to shew the impossibility of the escape of that man-and, indeed, if only one half of what the marquis says is true, and we have no reason to doubt any part of his statement, an army of 10,000 men and a fleet of 20 sail of the line would not be sufficient to release the captive, if opposed according to the means possessed for the purpose. The littse island, or rather rock, of St. Helena has been fully clescribed in the Register. A landing is practicable only at one point, and there "ten men with stones only," says the marquis, "might stop) a thousand well armed." The garrison consists of 2500 men , with upwards of 500 hundred pieces of artillery and about 20 mortars. The only plain on the island is that where Bonaparte resides, on which a regiment is also encamped. This plain is surrounded by tremendous precipices, on which are stationed centinels and telegraphs. An hourly report is inade with these to the governor of what the prisoner is doing; and in two minutes he can be apprized of any particular occurrence, as well at nisht as in the day time. In addition to all these, 2 frigates and 2 brigs are constantly sailing round the istand, and at night the whole coast is patrolled hy armed boats, \&c. Such are the preparations deemed necesfary to guard against the infuence and pow\&r of one man-ever represented to us a monster, to be hated rather than loved.

\section*{"SPanisit america."}

We have Bolivar's proclamation of Jan. 7, declaring the cities of Guayano, Cumana, La Guira, and Puerto Bello "in a state of strict blockade," according to the usages and curtoms of civilized nations.

Bolivar has had several hard battles with the royalists and tories, and has finally succeeded, after sufficing one defeat himself, in nearly amililating: a royal force of 3000 men, near and in the city of Barcelona, while they were in the act of murdering the people of that place, without respect to age. sex or condition. He killed, and captured 1000 of them in the city, and the fugitives were happily intercepted by gen. Arismendi, who, harl 800 civalry, and literally cut them in pieces. It seems as if mone but solitary individuals could have escaped him. Bolivar led the royalists into harcelona by a stratagem, and fell upon them at the moment they were engaged in their butcheries. The probability is that Cumana has fallen into his hands, where there was a king's sloop of war, 3 gun brigc, and a schooner, reported to be only half manned, tem med in by a division of Brion's havy, competent to beat them with ease. Admiral Brion is using eve. ry means in his power to detect and bring to conalign punishment those who, under the patriotic flag, have latterly commitied so many piracies in the West Indies. He liad several such in close confinement, waiting for trial.

\section*{CHRONICLE.}

Both houses of the legislature of New York have agreed to a resolution requiring the members at the next session, to appear dressed in American manufactures.

Mr. Werwag's extensive nail fictory, not far from Dowingstown, Pa . was partially destroyed by fire on the 14 th inst. It comtained 43 machines, each of which cut and headed a nail, or brad, at a single operation, turming off an average quantity, each, of half a ton per week. The works are to be immediately repaired. The fire is supposed to have originated in design.
The steam boat Ontario, capable of carrying 2000 barrels, is prepared for the lake, and will leave Sackett's Harbor' every Monday, and make a rout from Ogdensburg to Niagara, stopping at several places to land or receive passengers. The fare for cabin passengers from Sackett's Harbor to Ogdensburg is \(\$ 5\)-fiom the same to Niagara, \(\$ 10\).

Mr. Le Ray de Chammont is offering for sale 120,000 acres of land, in the state of New- Iork, situated on or near the St. Lawrence, and watered by many other fine streams. These lands make a part of "M'Comb's purchase"-there are now upon them 3000 inhabitants, 12 saw mills, 5 grist mills, \&c. and the proprietor is about to erect many large buildings, and to establish iron works and other manufactures upon them.
New. York inspections.-Flour and meal inspected within the city of New-York, and county of Kings, from the 16ih of February, 1816, to the 15 th of F'et bruary, 1817 , both days inclusive:

236,326 barrels superfine flour,
11,552 half barrels do.
11,552 half barrels do.
14,161 barrels fine do.
2,444 barrels fine middlings,
1,526 barrels common do.
14,303 barrels bad flour,
22,902 barrels rye do.
7,486 hiluds. corn meal,
7,064 barrels do.
24.3 barrels bad meal,

137 half barrels do.
[Official,reporí.
Virginia refresentation.-The senate of Virginia is elected by districts of counties. The late propasition to call a convention was rejected therein by layes and noes-nyes 9 , noes 12 . The nine represent?
at certain comaties containing 347,328 white inhabitants, and the tivelve certain other counties containing \(15^{0}, 080^{\prime}\) ! This a burlesque on the raght of suftirage.

Fusehoad-Licut. Crabb, of the United States navy, under his own proper signature, has refuted the story from the Gibrajuar Chronic'e, headed, "Fracas between the British and Americans at Messina." As the article had internal evidence in itself of its f.alsehood, we did not think it worthy of notice in the Kfarstra; aird mention the subject now only because it has been extensively circulated through the United States.

Our ships. A letter from commodore Chauncey to his friend in Boston, describes the Washington 74, "as the finest ship that ever floated," and the oroiflest that he ever was in, and the best sea-boat -She has been completely tried, and proved to be the fastest sinip in the Heet on a wind, and beats all but the Jervis before it. The Spark, so famous for her sailing quali ies, was beaten by lier, both by and large. The Washingtonswims with the lower cills of her lower ports five feet clear, with four months provisions and water on board, \&c.

We have observed before, that our slips of the line are the happiest combinations of celerity with force ever belore produced. - And they have atootier advantage, which has not escaped the ubstrvation of every British officer who has had an opportunity of examining them-they sit so light on the water and look so small, that, at a litthe distance, they canant be distinguished from a large fingate. This may as well facilitate the escapre of our own frigates from a superior force, as lead larger vessels into a snare.

Sugar, made in South Carolina, has been refined at Charleston.
- Vers-Hanpshare. William Plumer, esq. has been re-elected governor of the state of New-I iampshire, by a lage and increased majowity. All the branch Es of the government of this state are republican.

Mr. Iolin Ranilolph, it is understood, retires altosether froun public life.

The tate bishof, labury. A committee was appointed at the late conference of the Methodist Epmerpal church, held in Haltimore, to superintemil the publishing of a correct life of the late re. berent bushop Asbury-who have notified the pub. lie that they are about io appoint a suitable person to write the sime.

II estern I'auter.- It appears filly ascertained, by actial experiment, that the Piaster of Paris, from Mandius, it the state of New. York, is an excellent whamire for lands near the sea coast, cxlasusted by erople of cotton and indigo; on which the Nova Scotia plaster is of uo value at all.

Iiverpoortution. - Lit assoriation is spoken of at Philatelphia to establish a line of waggons between that city and Piusturg - 10 start at lised periods, \&ic. anil, by travelting day and night, like the mail shages, make the journey in seven days. This may be easily accomplished when the great turnpike is fintilied.

The l'ucific-Our hardy and adventurous brethren of Nantucket, \&e. are very sucecssfully and very ex tensticly engeget in the Pacofic whate fitllery.

Consle - The canal commivsioners lave maile a repart to the legistatire of New- Jork. They estimate the cost of a canal from lake Ohamplain to the Hhulson at 800,000 dullars. They propose to borrow 1, 510,000 dollars to cumplete that canal, and the forat weatern canal from liome to the Serieca river, fur whith thistum is supposed adequato it is prothale thet thete great works will soon be commerc.
ed and prosecuted with vigor. The rise in the value of property they would occasion in the state of New York would, of itself, pay for them many times over. The state of Ohio has resolved, as far as the resources of the state will justify, to assist in making the canal between lake krie and the lludson.
Tuegreat fasal-The report of the canal commissioners on the contemplated western canal, makes an octaro pamphlet of 90 pages. It contains a minute survey of the routc.

"Ship chawdlery." We were agreeably surprised 10 see in a Buffalo paper, an advertisement headed with "ship chandlery"-Wherein is offered for sale cables, and all sorts of rigging, \&c. with sail duck, anchors, tar, isc. needful for the equipment of vessels.

Masor-genmbal Harrison.-This estimable officer and accomplished gentleman, has been entertained with a sumptuous public dimner by the patriotic people of l'eteraburg, Va. and the survivors of the gallant corps of volunteers from that place who served under his command in the late war, through whom the citizens at large harl bec-me familiar with his arduous services and exalted character. The general, being on a visit to his relations in Virginia, was sought after and invited by a joint committee of the citizens and the volunteers, which he accepted. The town seems to have been quite alive when he approachert-he was received with a salute of 16 guns and the general hilarity, of the people. It was a proud day for the gencral, that those whe ought to know him bevt, men of high and honorable minds, should thus respec:fully and joyously receive him, not withytanding the many persecutions he had sufferel, for causes unknown to the public. The account of the affair in the "eteribreg Intellizenser is delightful, and we would cory it but for its great length.
After ditiner the usual number of tonsis were drank, thear beatly will plead an apology, if one is necessary, for giving them entire:

\section*{Captain Gordon．}

The following notice of the late captain Condong of he navy，is from the Philadelphia Political Re－ gister， 28 ih ult．

Obituary．－The village Hampden sleeps with his fathers，but lives embalmed in the afficcionate rad inembrance of those who afe to rest by his side．

The great and the good，receive their last and parting breath in the same air that animated their early clay．In the land that gave them birth，they pass awdy；but are hallowed in the gratitude and veneration of the ficnds they have loved and of the country they have served．＇The pompous obituary swells the note of admiring recollection for those， n＇er whom the turf is warmed by the same ray that saw their incubate and their declini，ghour．

Shall then，no requiem be said for those who in their country＇s cause，sleep in a land their sires lad never seen？Shall the ardent friend，the intrepid sol－ dier，the good and virtuous man，pass from a world we adorned，and to his memory be given no sigh， but from those he cherished，no tear but from thos： he loved．

The lieroic bravery，and generous soul of the de pitted Gordon，from a people，whose distinction he raced，might have claimed a more extended splicre Hhose feelings，which highest glow in the bosollis of the noble，made him in early youth misfortune＇s target，but the spotless honor of his name even ca－ lumny has not dured to tarnish．

By those who knew him beloved，hy those whon ic commanded almost adored－his ashes moulder beneath the reads of a stranger，and unworthy de traction，has essayed to darken the lustre of his fame．－Siname on the soul，who would forgct to re－ verence the dead，because it saw not the ascent of his spirit－l3ut scoin on him，who admired，loved or feared the virtues of Gurdon，and veils the mirror of recollection，when it would retrace the existence that．has been closed afar．

Cui pudur \＆z justiciz soror，
Inemmipta Fides，uudaque v．ritns，
Quando ullum invenjent pareas．

Interval duthes. - The statistical enquirer will find much io amuse and instruct him in the interesi ing view of the internal duties, given in the present number.

The foldiva of tife register. - Measures have been recently adopted that will secure for the Register a much greater degree of accuracy in folding it than heretnfure-and, we hope, will silence the juat complaints that have been luade on that account.

\section*{"Cashiering of Kings."}

The number of the "Edinburg Review" for June last, has an arricle on ". narrative of events which Lave recently occurred in the island of Ceylon, written by a gentleman on the spot." The tract is understind! to come from ligh anthority; and, as the reviewers justly observe, "there is, perhaps, in pasgage in the history of [British] oriental policy which exluibits so strong a contrast to the ostensible principles of [British] conduct in Europe," \(2 s\) is describ ed in there pages.

Afier the "legitimate" king had been clefeated, through the teachery and defection of his people and the superior discipline of the British troops, the British government issued a proclamation declaring that the Kandian king, "by the hatitual violts"simn of the chirf and nost sacred duties of asovereign, "hal firfeiterl all claims io that tille, or the powers an"nered to the same, and is declareds fallen and deposed "from the office of king; hin fomily and relatives, whe"ther in she ascienting, deacending or cullateral line. " und whether by affinity of blood, are also forever ex. "cluded from the throne"-and said relatives, being males, "are hereby cleclared enemies of the Kundian "provinces," and excluded and prohibited from en tering the same "woithout a nemilten permission for that "parpose by sheanthority of the British governn ent"anil 'Whe ilomiminns of she 'Kinntian provinces is vested "he tie norieign of the British empure," \&c.
These extructs are from the official paper, and eleasly colvince us that there is one "dizune rishlis" fint Strope and another for Asia! The narrative nakes it appear that the king of Candy was a very ba! min, excecetingly despolic and yery severe, es. z*ialle to the fimuly of a certain chief who look up four Falnest 1 im , wind resisted his royal authorily thin what of that! Who gave an linglish general riatt in ast in julgment on the "Lord's anointed," sath thet only cushicer him, but illegitimatize lis Whaly kinilred, and declare them enemies of their \(0=\) aprovilices? There is a superiority of ispudence it the transaction, when it is siewed in connection with the clamors of the British iff Firrope about Irance, Spain, lic, that is truly laushable. If will be recollected that the throne of the deposed mo . iarch was transported in london, and received by suvernment all lawful epoil.
It may be well here 16 insert an extract from Fo o Hn's "Ancient listory:" une of the innst usefal and molt interesting works in the world, but which, unhappily, abounds with stuff like the followiog Spraking of rehellions that tnok place in cet latin grovinces of t'ersia in conseguonce of tho rices, of.

You Xill.
feminacy and ompression of the goverumell, he a.ws: "Their just complaints, long time despise t, were followed by an open rebellion of several \(n\) ite \(s\), who endeavored to do thenselves that justice by force which had been denied to their remonstr:ncers. In such conduct they failed in the submission ad filelity which su'jecis owe to their suwereigns; but poganism did not carry its lights so far, and was not capable of so sublime a perfection, which was reserved for a mbligion that teaclies that un protert, no injustice, no vexation, call ever authorise the rebellion of a people aganst their prince"

Now-the British-"the bulwark of that religion" Mr. Rollin alludes to, not only matle use of the Kindian "rehels" 10 subdie their king, but appr pria ed his kingdom, with all his privute srensules, to heir own uses. [See the Rogal Catechism, page 92.]

\section*{The Federalist.}

T!is celcbrated work is well known to have been produced by the joint labors of . Ilexander Hunil on, James Madison and Juin Jay-we mention them in the order in which they appear to have comrihuted to it. Some doubt has latterly arisen as to the Nos. from the several pens of these great men. A writer in the National Intelligencer, in March last, sairl"I take upon me to state, from indubitable authority, that Mr. Madison wrote Nos. \(10,14,18,19,20\), \(37,38,39,40,41,42,43,44,45,46,47,48,49,50\), \(51,52,53,54,55,56,57,58,62,63\), and 64 . II r . Jay wrote Nos. 2, 3, 4, and 5; and Mr. Hamilton the residue.
"I have been for several years in possession of the information upon which this statement is predicated; and, if it be doubted or denied, I will venture to appeal to the papers of general Hamilton for the confirmation of my assertion."
Another writer, in the New York Evening Post, contradicts this statement, saying-"General H.smilton, a day or two previous to his deatl, strpped into the office of his friend judse Benson, then absent, and in the presence of his clerks If \(f\) a paper in a book lying there and eleparted. Af ep his fall this paper was ohserved, and deposited by judge Benson in the sity library, with a certific. . \(c\), that it was the hand writing of A. Hamilon. The following is a cupe.
"Nos. \(2,3,4, \dot{5}, 54\), Mr J. Ju: Nos. \(10,14,37^{4}\) ' 18 inelusive, Mr. Madisent No4. 18, 19,20 , Mr Man I. ton ant Vr. Macison, jomtly, all the rest by Mir. Hamil.on."
"This is a sacerel refict: call it not in quicstion."

\section*{Soldiers' bounty lands.}
vrov the \$isirilith (tevr) whin.
Thut part of the moldiers bouny 1 nds lifing in the Missouri ant lllincis terntories, bemge five "itleone of acres, are in a raporl state of pritiration, and will soon be ready to be allotted among tire soldiers.

Gineral lector, the surveyor general, following the instructions of the govirumellt, has emplosed more than eighty companies of surve onrs, compriso ing uijwards of four hundred men, and bound tiem
in contracts to complete their surveys by the first day of June next.
To make sure of five millions of acres fit for cultivation upwards of eight millions are ordered to be surveyed. None will be offered to the soldiers which is not fit for cultivation, and the surveys now include large bodies superior in fertility to the riciest lands of Kentucky or Illinois.

Two and an half millions of acres will lay in the Illinois territory, in the fork of Mississipp and I1lituis rivers, between the latitude 39 and 41 degrees north; in parallels corresponding with Washington city', Philadelphia and the middle parts of Pemnsylvania. This tract is washed by the Mississ ppi on the west and the Illinois on the southeas, and has an easy communication with lake Michigur by Caicago, and may carry its commerce to New Orleans or to New lork, when the canal of that state is finished. Slarery is not admitted in the Illinois territory.
The other two and a half millions will lay in the Missouri territory, between latitudes 35 and 40 degrees north, and longtitude 12 and 16 degrees west from Washington city. This tract is watered by the Mississippi, the Missouri and its tributaries the fireat Usage and the Gasconade; slavery is admitted in the Missouri territury.

These lands are the first of the western country for richness of soil, healthiness of climate, and navigable waters; allvantages enhanced by a position near the centre of the great valley of Mississippi, where the union of the great rivers and the centre of territory combine to fix so many interests, commercial and political. The staples will be wheat, hemp and tobacco; lead salt and fur.

Besides the bounty lands, upwards of five millions of acres of other public land will also be surreyed by the first of June next; making in all, in the territories of Missouri and Illinois, about fourteen millions of acres subject at that time, to the disposition of the govermment. The drawing of lots for the soldiers bounties, and the public sales, may be expected to come on soon after.

The Indian title has been extinguished in the Missouri territory to about seventy thousand square miles; that is to say, to a tract of country about as large as the state of Virginia, and embracing all the latitude of that state.

The line between the whites and the Indians begins three hundred miles up the Missouri river, at the mouth of the Kiunxus, in latitude 39 degrees 5 ininutes north, and runs north over a rich country, one hundred miles, to the head of the little river Plattc; then east, over naked sterile ridges, one hundred and fifty miles and a half, to the cles Moines (river of the Monks;) U位 down that river, 16 bniles, to the Mississippi south of the Missouri, the line begins at I'rairie de Free (fire prairie) thirty miles below the rcouth of the Kanxus, and runs south two hundred and fifty-four miles down that river to Arkinsas; then down that river, supposed two hundred and furty miles to the Mississippi.

The two aral a half millions of acres intended for the soldiers in the Missouri territory, are surveyed within those boundaries.
[We have this information fiom col. Benton, and give it as such, that those interested may rely upon it.]- Frenklin Monitor.

\section*{Americans in prison.}

From the Nerfulk Beacon.
The following petition iddressed to tine president of tlie United States, by fourteen Ancricans, now
confined in the Spanish prisons at St. Jaro cle Cubas Was handed to us by a gentleman who arrived here from that island, about ten days since, with a request that we would publish and then transmit it to the president. Not knowing the gentleman who was the bearer of the letter, and having no evilence of the authenticity of the document, induced us to delay its publication until we could satisfy ourselves on these points. Having received such assurances touching its genuine character as we required, and having the stateinent which it contains verified by a subsequent arrival from the same quarter, we give it insertion with pleasure, forwarding the original as directed, to the department of state, where we doubt not it will receive that attention to which it is entitled.
to tige president of the united states.
Petition of fourteen Americans now confined in the pri. son of St. Jago de Cuba.

\section*{Howored sir,}

We take the liberty to inform yon of our sad misfortunes, conifined in Cuba prison, at the inhuman mercy of the cruel \(\mathrm{S}_{\mathrm{i}}\) )aniards.- Our first misfortunes are as follow: Our vessel being sold for the purposes of privateering, we were obliged to take passage in the schooner Margaretta, Peter Anchor, commander, bound to Jamaica. To our sorrow, atter being on our passage two days, the captain brought up his Carthagenian commission, and said he was bound on a cruize. Finding ourselves taken in in this shameful manner, we concerted each other to leave her the first opportunity. On the \(2 d\) September we captured the schr. Sophia, under Spanish colors, bound to Jamaica, with cattle on board; on the 3 d of the same month, captured a Spanish brig from the coast, with one hundred and eighty negroes on board; tlie captain anc owner ransomed the brig, Ec. for \(\$ 1600\); we allowed the boat to take the captain on shore at Cuba under a promise that he would return with the money; the unjust agreement of the Spaniards, in place of the money, sent out a king's schooner of superior force and captured us: at the time of the capture, four of the men got clear in the boat. Honored Sir, now began the inhuman usage of the cruel Spaniards-cut and mangled to pieces with cutlasses, bound back to back till the blood run from under our finger-nails; we are at present in Cuba jail on the allowance of this savage nation, on half a pint of rice and beans, half cooked, for to content the sons of Columbia for 24 hours; without clothing, or any thing to hide our nakedness, in iron strong, \&c.-No friends allowed to see us.

Honored Sir-We the unhappy petitioners, do humbly beg for the mercies of a free country, for which we have fought and valiantly conquered ous enemies.

\section*{notes.}

There remain to be received partial returns from five districts, by which, when received, this siate. ment will be in a small degree varied. Is, moreover, it is formed from the accounts of the collectors as transmitted to this office, wionrrected by the revision of the accounting officers of the treasury, the several items of which it consists will not precisely balance or correspond with the restalis of the accuunts as finally scltled.
Nore 1. This sum consists principally of repay. ments to distillers, under the 17 th section of the act of December 21s1, 1814.
Nore 2. The wholesum allowed by the president for the collection of the direct tax and the internal duties, for the year 1815, amounts to 23,940 dollars. There having been received from the direct uax 833,111 41 dollars, and from the duties \(4.936,26223\) dollars, in the foregning general view a proportionate part of the whole allowance is charged to the duties, viz: 20,51271 dollars, the residue being properly chargeable to the collec. tion of the direct tax As the whole of these al. lowances were made after the close of the year 1815, and after the accounts of the collectors were rendered, they were satisfied out of the duries accruing in 1816, io which, of the booky of the trea. sury, they will appear to be charged.

A like apportioument lias been marle of the alInwances proviled by the second section of the act of March 3d, 1815, in cases where the annual corminissions of a collector do not exceed 1000 dollars. 14,827 85 Revenve office, Niovember 29, 1816.

Of the amount of duties which have acciued on rarious goods，wares and merchandise manufactured in the United States，from the 18 th day of Aprif，

\section*{Champlain and the Hudsou.}

We have already published many reports of the cominissioners, \&c. respecting the noble work of uniting the great lakes of Enrie, Huron, Michigan and Superior, \&c. \&ce, with the Atlimtic, by meanoff a canal from the first named to the Hudson, to the city of New York, and the ocean, but we do not recollect to have seen and published any thin:respecting 'lie "worthern canal," so called, design. ed to unite lake Champlain and lake George with the said river-an object of less ultimate inpor:ance than the other, but easier accompli-heil and of more immediate interest. The foilowing, beif. a late report to the legislature, is very interesting. There seems to be no doubt of its practicability: and as it is entirely within the present means of the state and people of New York, we liope to see it commenced at the earliest day possible. Suc cess in it, would secure the speedy accomplishment of the greater and mone important work.

\section*{iteport of the boarth of commissioners on the northern,}

\section*{or Champluin conal}

The advantages which will result from the ennnexion of lake Erie with the mavigable waters of the Hudson, by means of a canal, have been so frequently eiucidated, and are indeed so obvious in every one who possesses a correct geographical knowledge of the west, that it has been deemed unnecessary to enumerate them. But presuming that the benefits to be derived from a similar coinminication with lake Champlain, are not fully understuod or duly appreciated, the commissioners ask the indulgence of brietly pointing out a few of the inost prominen! of these benefits.
'That part of this state which is contiguous in lakes George and Champlain, abounds in wood, timber, inasts, spars, and lumber of all kinds, which, samsported by the northern canal, would fiad a pr fitable sale along the Hudson, and in the city of New York, instead of being driven, as much of hone articles have lieretofore been, to a precarious market, by a long and hazardous navigation to Quebec.

Some idlea may be formed of the immense quanti ly of tumber which would be conveyed on the con templated canal, from the fullowing statement, matle on the best authority, and which embraces only that sinall section of the northern part of this the, from whence the transportation is carried on to the city of New York, or to intermediate makets.

Within that tract of country, embracing the bof. Sers of like George, and the timber land north and west of the great falls in Luzerue, there are amnually made, and transported to the south, two millions of boarts and plank; one million feet of square timber, consisting of oak, white and ycllow pine, besi les dock \(\log\) s, scantling, and other timber to a great amount.

A considerable portion of the northern part of this state is rougli and mountainous, and, in a great measure, unfit for agricultural inprovements. These broken tracts are covered with native forests which, by the contemplated canal, would furnish vast supplies of woxd wull lumber for thany years: and thus the great and increasing population which occupies the margin of the Hudsom, would be sup. plied with boarts, plank, timber, fencing materials, and even fuel, with less expence, than from any pther quarter; while, at the same time, the lands to the nurth, consiterable tracts of which belung to the people of this sfate, would be greatly increased in value.

The notma ins in the vicinity of lakes George ans Champlai , produce a v riety of minerals, among which are found, in inexhaustible quantities, the richest of iron ores. Several forges are in operation in the counties of Washington, Warren, Fssex and Clinion, the number of which may be indefintely increased; and the iron which they prodnce is very little, if at all, inferior in quality to the best iron manufactured in the Linited States: nor can it be doubted that, afier the completion of the coutemplated canals, the milille and weitern parts of this state would be furnished with this necess.ry article on more advantagcous terms than it can at present be procured.

The inhabitants of a large tract of country on both sides of lake Clamplain, embracing a considerable portion of the slate of Vermont would find, by the northern canal, a permanent market in the city of Yew York, or at int ermediate places, for their pot and pearl-ashes, and also for all their surplus agricultural productions, from whence they would also be cheaply supplied with all the neces. sary articles of foreign growth.

The iron of the northern part of this state, which at present is unwrought in the mine, and the fine marble of Vermont, which now lies useless in the quarry, would beconverted to useful and ornamental purnses, in the west, in exchange for salt am! typsum; and thus the large sums which are annual!! sent abroad for the purchase of irnn, of salt, and \(0^{-1}\) gypsum, would be retained among our citizens, and added to the permanent wealils of the state.

In sloort, the counexion of lake Cliamplain with the Hudson, hy means of a canal, would greatly enhance the value of the northern lands; it would save vast sums in the price of transportation; it would open new and increasing sources of wealth; it would divert from the province of Lower Canada, and turn to the south, the profits of the trade of lake Clam plain; and, by imparting activity and enterprise to agricultural, commercial, and mechanical pursuits, it would add to our industry and resources, and thereby augment the substantial wealth and prowperity of the state.
The examination and levels for this canal, have been made, under the direction of the commission. ers, by col. Lewis Garim, and the line for the same has becn marked out upon the maps herewith presented. There are two places of depurture from the Ilndson, in orider to connect that river with lake Champlain, each of which nffords a very favorable route, in point of soil, to be excavated, and of materials for the artificial works. One of these routes, by commencing at the mnuth of fort Edward creek, and pursuing the valley of that creek to the summit level, and then following the ravine of Woodcreck, will reach Whitchall, in the distance of twenty-two miles. This route was formerly deemed most cligible by a board of commissioners, consposed of general Schimbler, and others. It is, how. ever, supposed, by the engineer, that the other route may be preferable, which commences about six miles further down the river, near the nonth of Moses' kill, and of Dead-creck joined to a short length of artificial canal, forms the summit level from whence it proceeds-partly hy the natural channel of Wood creck, and partly by artificial cuts. which greatly shorten the distance to Whitchall. The lengts of this route in twenty-cight miles, and it passes over a suil which is, in general, remarkahly favorable, consisting primcipally of vegetable mould, loam and clay. At the northern termination of the canal, a fow yards of limestone excavation will be necessary; this however, it not decmed an unfavo
able circumstance, as the stone are of such a quality as will be useful in the construction of locks, and it may be remarked that the materials for the construction of the locks, between lake Champlain and the Ifudson, can be proeured with little difficulty.
leetween the Hudson and lake Champlain, nine locks will be necessary, viz. three at the Mudson, require eight locks. The excavation of this canal, of 7,779 feet lift each, by which the summit level for some distance near the upper end, will be conwiil be attained, and by a cleep cutting, the greatest siderably expensive as it passes through a slate depth of which will he 12,465 feet, and the length rock, the middle and lower parts, however, are veof which is about two miles; the summit level will ry favorable.
be extended fifteen miles, and will terminate about The expences from Stillwater to Waterford, may one mile south of fort Ann. At this place, two locks be estimated as follows:-
will be necessary, of \(6,2: 7\) feet lift each. Between 76 feet lockage, at 1000 dolls. per foot, 76,000 this point and Whitehall, two locks, the first of 12 miles of excavation and towing path, with 8223 feet lift, and the next of 9,243 feet lift, are to be made. At Whitehall, the canal is to be connected with lake Cinamplain, by two locks of 8,550 feet lift each. About fifteen miles of this route will need no excavation, as the canal, for that disrance, will occupy the natural channels of Moses' kill, D =ad-creek, and Wood-creek. In order to turn off, as much as possible, the superfluous waters of freshets, and to ensure, at all times, a sufficiency of water on the summit-level, it is proposed to erect a dain across Half-way brook, of eighteen feet in height, half a mile above the mouth of said brook, and by a natural ravine leading to the south, to direct so much of the water of said brook to the summit-level, and from thence, by several wastewiers, into the Hudson, as may be necessary for the converience of the canal.

The water, in the canal, is not to be less than thirly feet wide at the surface, twenty feet at the bottom and three feet deep; and the locks to be seventy five feet long, and ten feet wide in the clear.

By the mode of calculation heretofore adopted by the commissioners, the whole expence, between lake Clamplain and the Hudson, at the mouth of Moses' kill, will not exceed two hundred and' fifty thousand dollars.

From the mouth of Moses' kill it is proposed to improve the channel of the Hudson, for the purpose of navigation, as far south as the village of Stillwater, at the head of Stillwater fabls. This may be effected in the following manner: By erecting a dam of three feet in height across the Hudson, at the head of fort Miller falls, the river above, as far as fort Ed. ward, would at all tirres afford a sufficiency of water for boats drawing three feet. To overcome the descent of fort Miller falls, a side cut or artificial canal, of about one mile in length, and with two lucks of 10,321 feet lift each, will be necessary. 'These works, including the dam, locks, excavation, towing path, and all other expenses, may be estimated at fify thousand dollars.

Two and a half miles below the south end of this canal, at the head of Saratoga falls, a dam three feet in height is to be made across the river, and a side cut round the falls, similar to the above, of about one mile in length, with two locks of 8,198 feet lift each. It is believerl, that all the artificial works, at this place, may be constructed for thirty fire thousand dollars.

Thirteen miles below this place, at the head of Stillwater falls, another dam of three feet in height, will, in like manner, insure a good boat navigation up to the Saratnga ©ills.

The cost of this dam, the construction of a towing path, with several bridges, the purchase of Schuyler's mill which it is supposed will he necessary, together with all the other expences of this section, are estimated at fifty thonsand dollars.

From the village of Stillwater, at a point above
the dam last mentioned, it is proposed to cut an artificial canal, to the village of Waterford, where it is to be connected with the Hudson. This canal will be supplied with water from the river, at its upper end. Its length will be nearly twelve miles, upper end. Its length will be nearly twelve miles,
and the whole descent is 76,464 feet; which will siderably expensive as it passes through a slate
rock, the middle and lower parts, however, are vebridges, culverts, and other necessary works, at an average of 30,000 dolls. per mile,

360,000 Recupitulation of Expences.
From Whitehall to the Hudson,
Dam, side cut, and other works, at fort Mil-
ler falls,
\$250,000

To Stillwater, including dam, \&c.
35,000
From Stillwater 50,000
From Stillwater to Waterford including lockage,

456,000
Add for contingencies, engineers, and su-
perintendance,
50,000
Total,
S. 8871,000

Whether the canal from lake Champlain, enters the Indson at fort Edward creek, or at Moses' kill, is not very material in the estimate of expence; and the commissioners wish to be explicitly understood, that they consider this question as still open, and as one which will require mature deliberation. It is ascertained that both routes are equally practicable.
The termination of the northern canal in the Hudson, at Waterford, will afford the cities of Albany and Troy, and the villages of Lansingburgh and Waterford, a full participation of its, benefits; and its approximation to the great western canal, will open the most beneficial channels of communication between every great section of the country, and furnish every facility for promoting the activity, and enlarging the sphere of inland trade, which constitutes one of the principal elements of national opulence, prosperity and greatness. And before the lapse of half a century, those who succeed us, will witness, in the consolidation of those cities and villages into one great city, a union of interests and sympathies which will totally dissipate the apprehensions and jealousies that may now exist.

All which is respectfully submitted.

> DF. WITT CLINTON, S. VAN RENSSELAER, MYRON HOELEY, SAMUEI YOUNG.

Albany, 18th JFarch, 1817.

\section*{Battle of Tippecanoc.}

\section*{from the national intelligincer.}

Messrs. Gales and Seaton,
In Dr. Ramsay's history of the American revolution continued by Dr. Smith, to the treaty of Chent, I find in pages 142,3 , and 4 , of the \(3 d\) volume, an accomnt of the transactions which preceded the battle of Tippecanoe, so essentially different from the facts, particularly that part which states that general IIarrison encamped his troups on ground selected or pointed out by the Indians, that 1 am linduced, from regard to historic trnth, and the
reputation of a distinguished officer to request the publication of the following extract from M'Affee's history of the war in the Western country, and the subjoined statements of the honorable Waller Taylor, now a senator from Indiana, and 1t. col. Snelling, of the, army, then a captain in the 4 th United States' regiment of infintry. JUSTICE. the exthact.
"To this it was observed, that as the Indians seen hovering about the army, had been frequently invited to a parley by the interpreters, who had pro. ceeded some distance from the lines for the purpose; and as these overtures had universally been answered by menace and insuls, it was very evident that it was their intention in figit; that the troops were in high spirits and full of confidence; and that advantage ought to be taken of their ardor to lead them inmediately to the enemy. To this the gov. (Harrison) answered, that he was fully sensible of the eagerness of the tronps; and admitting the determined hostility of the Indians, and that their insolence was full evidence of their intention to fight, yet he knew them tno well to believe that they would ever do this, but by surprize, or on ground which was entirely favorable to their mode of fighting. He was therefure determined not to advance with the troops, until he knew precisely the situation of the town, and the ground adjacent tn it, particularly that which intervened between it and the place where the army then was-that it was their duty to fight when they came in contact with the enemy-it was his to take care that they should not engage in a sittuation where their valor would be useless, and where a corps upon which he placed great reliance would be unable to act; that the experience of the last two hours onght to convince every officer, that no reliance ought to be placed upon the guides, as to the topography of the country; that relying on their information, the troops had been led into a situation so unfavorable, that but for the celerity with which they changed their position, a few Indians iniglit have destroyed them: He was therefore determined not to advance to the town, until he hid previously reconnoitered, either in person, or by some one, on whose judgment he conld rely. Miajor Daveiss immediately replied, that from the right of the position of the dragoons, which was still in fromt, the opening made by the low grounds of the Wabash could be seen; that with his adjt. 1). Floyd, he hail advanced to the bank, which descends to the low grounds, and had a fuir view of the cultivated fields and the houses of the town and that the open woods, in which the troops then were, comtinued withont interruption to the town. - Upou this information, the governor said he would advance, provided lie could get any proper person to go to the town with a flag. Captaiin T. Dubuis of V'meenses having offered his services, he was diypatched with an interpreter to the Pro. phet, desirng to know whether he would now comply with the ierms that had been so ofien proposed to 1 him . The army was moved slowly after in order of trattle. In a few moinents a messenger came from captain Dubois, informing the governor that Uie Indians were near him in considerahbe num. bers, but that they would return no answer to the interpreter, although thicy were sufficiently near in hear what was sald to them, and that upon his advancing, they conviantly endeavored to cut him off from the army. Gov. Harrison during this last effort to open a netrociation, which was sufficient to shetw his wish for an accummondation, resolved no longer to hesitate in treating the Indians as ene. mies. He tharefirs recelleal captain Dibhia, a:n!
moved on with a determination to attack them. He had not proceeded far however, before he was met by three Indians, one of them a principal connsellor to the Prophet. They were sent, they said, to know why the army was advancing upon them-that the Prophet wished if possible to avoil hosstilities; thiat he had sent a pacific message by the Miami and Potawatamie chiefs, who had come to him on the part of the governor-and that those chiefs haxt .unfortunately gone down on the south side of the Wabash. A suspension of hostilities was aconrc! ingly agreed upon; and a meeting was to take plice the next day between Harrison and the chicf, to agree upon the terms of peace. The governor fiuther informed them, that he would go on to the Wabss,1 and encamp there for the night. Upon mircliing a short distance further he came i.a vicw of the town, which was seen at some distance up the river upon a commanding eminence. Mujor Daveies and adjt. Floyd, bad mistaken some scat:ered houses in the fields below, for the town itself. The ground below the town beine unfavorable for an eneampment, the army marched on in the direction of the town, with a view to obtain a better situation beyond it. The troops were in an order of march. calculated by a single conversion of compranies, to form the order of battle, which it had last assumed, the dragoons being in front. This corps however soon becane entangicd in ground covered with brush and tops of fatien trees. A halt was ordered, and major Daveiss directed to change pasition with Spencer's rifle corps, which occirisied the epen fields adjacent to the river.-The Indians seeing this mancuure, at the approacli of the tronps the wards the town, supposed that they intempled to attack it and immediately prepared for deferce. Some of them sallied out, and called to the adrnice corps to halt. The governor upon this rotle furward, and requested some of the Indians in cone to him, assured them, that nothing was farther from his thoughts, than to attack them - that the ground below the town on the river, was not calculated fir an encampment, and that it was his intention to search for a better one above. He asked if there was any other water convenient beside that wlich the river aflorded; and an Indian with whom he was well acquainted, answered, that the creck. which had been crossed two miles back, ran through the prairie to the north of the village. A hath was then ordered, and some officers sent back to examine the creek, as well as the river above the town. Ia half an hour, hrigade major Marston Clarke a:nd major Waller Taylor returned, and reported that they had found on the creek, every thing that could be desired in an encampment-an clevated spme, nearly surrounded by an open prairic, with water convenient, and a suificiency of wood for fiel. An idea was propagated by the enemins of governor Harrison, anter the batele of Tippecanne, that the tadians had foreed him to encamp on a place, chosen by them as sumtable for the allack they intended. The place however was ckosen by majors Taylor and Clarke, aner examining all the environs of the town; and when the army of genl. Hoykins was there in the following year, they ail united in the opinion, that a botter Ejpot to resist Inclians, was unt to be found in "fo whole comury."

The uhove account taken fromi Macaffec's hivio. ry of the war in the western country, as it relites to the situation of the camp occupical by the army under the command of gov. Harrison, oni the night hetween the \(6 \mathrm{th}_{\mathrm{h}}\) and 7 th of Nov. 1811, is entire ly correct. The spot fire encamipinent was aclectel hy col Clark, (who arlied an brigetle maine to
general Royd) ant myself. We were directed by the so Uarrison o ex amine the cuuntry up and down the creek until we sthonld find a snitable place for an enc:ampment. In a short time we discovered the place on which the arm: encamped, and to which it was conducted by us. Nu intimation was given by the lu lians of the wish that we s oild encamp there nor could they possibly have known where the arny would encamp until it took its position. The oniy error in the above extract is, in saying that major Clark and myself were sent buck, by which it would appear that the army retrogaded to take up its encampment; this is nit the fact, the army filed off in front of the town at right angles to the Wabash to reach its encampnent. It has ever been ing belief that the position we occupied was the best that could be found any where near us, and I believe that nine tenths of the offiecrs were of that opinion. We did not go on the Wabash ahove the town, but 1 am certain that there was no position below it that was eligible for an encampment.

\section*{WALLER. TAYLOR.}

\section*{February 22, 1817.}

My situation as a platoon officer prevented my having personal kowledge of the transactions above related, so far is respects the selcction of the en campment of the army inder general Horison by hi staff inficers; but having carefully purused the ex. tract from Mcaffee's history, I have no hesitation in saying that I believe it to be substani ially correct; and that in my opinion the ground on which the army encamped combined the advantages of wood, water, and a defensible position, in a greater degree than any 0 :her spot in that section of the country; the ground on the Wabash was wholly unfit, the hishl nd being destitute of water, and the intervale (or battom luid ac it is calle.l) being without wood, and incapable of being defender.
J. SNELLI G,

Lieut. colonel 6th Infantry.
Washington, February 28, 1817.

\section*{Royal Catechism of Ferdinand VII. \\ fhom tie londor morying chromicle.}

At a certain period of 13 -itish history, marked by the rapid strides of ininisterial influence and court persecution, and thence justly called the plot-liscovering age, Swifi, writing to Pope, sportively observed, "that indeed he had often wished, for some time past, that a political catechism might be published by authority four times a year, in order to instruct us how we are to speak, write and act, during the current quarter." The present enlightened minister of Spain, whose familiarity with British works caunot be doubted, has atvailed himself of the dean's advice, and on behalf of his master, as well as for the spiritual ard political good of the people, whose destinies are in his hands, has caused the reverend bishops to step forward, with all their zeal, to eradicate from their respective flocks the dreadful principles they imbibed during the late revolution, and to cleanse then from the contamination with which: they had been infected by their past intercourse with foreigners, particularly British heretics. The bishops of Badajoz and St. Andero have been foremust to comply with the wishes of the Madrid cabinet, and we now lay before our readers the royal catechism of the first, to which we shall on another occasion subjoin its accompanying pastoral charge. These two precious documents were distributed among the faithful on king Ferdinand seventh's last birth day, and of them we offer no other than a lite zal translation, without comment, for the benefit of
the preople of England, and as a most illustrative specimen of that beautiful system we have establisherl on the continent. In alluding to the transac ions of Spain, we have frequently met with more severe than merited animadversions from a certain class of our cotemporaries, who possibly might wish a sinilir catechism gazetted among ourselves, but infortunately we are fully warranted by authentic papers, of which the decrees to restore the Inquisition and to place public educ.ation in the bands of fitiars and nums, are not the least remarkable. Things have advanced in Spain so repidly, since the overtirrow of the cortes, that nothing is now wanting to complete the existivy system than the building of snother Dionysius's earr; and undoubtedly if the treasures from Spanish A merica could only flow in a litlle faster, this would be the next laudable undertaking, for which the ruins and site of La Cassa de lat China would exactly suit. It ouglit, however, to be observed, that the bishop of Badajoz was one of the most active prelates in wriing pastoral letters in favor of the French, formerly a flatterer of Gorloy. and his present pronduction is one of the hest proofs of what kings and ministers would do, if they were int checked by the voice of the people, and thie pub tic press.

\section*{ROYAL CATECHISM.}

\section*{chap. 1.}

What a king is, and by whiat means it is possible to become one.
Q. What is the king? -A. A temporal and supreme power, instituted by Gorl, to govern nations with equity, justice and tranquility.
Q. By low many means cin a man attain to be a king?-A. By adoption, gift, exchange and the right of war.
Q. To how many may the above means be rediced? A To two, viz. by election and by hereditary succession.
Q. Which of the two is the oldest?-A. That of election.
Q. Which of the two is the most convenient?-A, That of hereditary succession, for three reasons.
Q. Which is the first reason'-A. Because it is the most natural to the perpetuity of the kingdom.
Q. Which is the second?-A. Because it is the most interesting to its conservation.
Q. Which is the third?-A. Because the dignity of families adds glory and splendor to the kingdom.
Q. From whom does he, who is king by succession, hold his power?-A. From fiod.
Q. And lie who is so by election or conquest?- \(\Lambda\). From God also.
Q. On what authority is this proved?-A. That of the scriptures, which say, speaking of all kings, without distinction, "Ciod is he who gave ye your power."
Q. Who is now king of Spain?-A. Our lord Ferdinand seventh, whom God miraculously preserved, and may he preserve him to us many years.

CHAP. II.
Of various names which kings have in the scriptures. Q. What names do the scriptures give to kings? A. Many, and all magnificent and mysterious.
Q. Sdy hew many and what?-A. They call them Gods, Christs, Powers, Princes and Father's.
Q. Why are they called Gods?-A. Because, in their kingdoms, they are the visible images of God. Q. Why are they called Christs?-A. Because they are annointed, or may be so at the time of their co. ronation.
Q. Why are they called Powers?-A. Because such they are, and in therr kingdoms they hold this power over every thing temporal.
Q. Why are they called Princes?-A. Because they have the principal and first place in their king. dom.
Q. Why are they called Fathers? - A. Because they attend to the good of their vassals, as fathers do to that of their children.
Q. Why are the kings of Spain callod Catholic? A. In consequence of the distinguished zeal with which they have and do defend the faith and chris. tian religion.

CHAP. IIT.
Of the superiority of the king and his attributes.
Q. Who is superior to the king? - A. Only God, in the civil and temporal matters of his kingdom.
Q. Is the king subject to the people? A. No: since this would be for the head to be subject to the fet.
R. How then is it that Godsays, that in the multitude of the nation the dignity of the king consists? A. Because his glory is greater when the nation is most numerous.
\(Q\). Which are the employments of a king?-A. Four principal ones, in which many others are included.
Q. Which is the first?-A. To gorern the kingdom with justice and equity.
Q. Which is the secondi-A. To sustain the rights of his crown.
Q. Which is the third?-A. To defend the kingdom from his enemies.
Q. Which is the fourth?-A. To protect the poor, the orphan and the widow, from the violence of the powerful.
Q. According to this, the whole superiority of the king yields in favor of his vassals?-A. So it is, whence they ought to venerate and uphold him.

\section*{chap. IV.}

Of the legislative power of the kinc.
Q. Can the king impose laws on his vafsals?-A. Yes; because Grod has given him legislative power over them.
Q. Can he impose laws which biad from a principle of conscience'-A. Yes; accurding to that of the apostle: "be subject, not only througli dread of the anger, but also throught the obligation of conscience."
Q. For laws to be binding, is it necessary for them to reach the hearing of all?-A. No: since if it was so, they seldom would be binding.
Q. And is it necessary that they should be promulgated' -1 . Yes: because lawis are then made when they are promulgated.
Q. And is this promulgation to be performed in all the cities of the kinglom'-A. This is not necessary; it is sufficient if it is done at court, or in any other customary place.

Q And is any time to elapue after their promul-gation'-A. Ves: and this is conformable to natural reason.
Q. In order that royal law' may be binding, is it necesvary for the people to accept them? - I Nu: because this would be tu governacending to thoir wil!, rither than that of the sovereign.
Q. When the law appears burtinensume, what is it the vassal is to do-A. To obey, atul humbly to sup. plicate.

CMAP. P .
Of the coecive power of s\%oking
Q. Can the king impose laws whath bind under a penalty? - . . Yes: because he holds corrcire power, and not without reavon does lie hold tie sward.
Q. Can he impose mixe. 1 lows, which hind jointly, throurh conscience and penalty'-A. Yes: becausc
these two things are not incompatible in one and the same law.
Q. Does ignorance exempt from penalty?-A. No: because this would be a pretext for no one to be subject to it.
\(Q\) If the law commands that not grain or arms should be carried out of the kingdom, can the vassal lawfully export them for once? - A. No: because the exercise of this discretion would leave the kingdom without arms and provisions.
Q. Is the vassal bound to accept and endure the penalties imposed'-A. Yes: because they are just and established by law.

> CBAP. VF.

Of the protection of the king over the chutch.
Q. Is the king protector of the church? - A. Yes in the quality of a good son, as is affirmed by the councils and fathers.
\(Q\) When is it they give him this protection?A. When they give him the power to govern his kingdom.
Q. Can the king make use of the authority and severity of his laws, to defend and cause those of the church to be observed?-A. He can: because in this consists his protection over it.
Q. Is this to place his hand in the sanctuary? A. No; it is merely taking care that abominations do not enter into the sanctuary.
\(Q\). Is this to exercise power in spiritual and sacred inatters? - A. Nori it is only to defend the rights of this same spiritual jurisdiction.

> ciap. rif.
Q. What kinds of vassals has the king?-A. Two; the ones exempt, and the others who are not so.
\(Q\). How are the exempt vassels called in the scriptures?-A. They are called children.
Q. Who are these exempt vassals?-A. The ecclesiastical persons of both clergies.
Q. And why are they called exempt? - A. Because they are so, so far as regards their persons, property, and controversies.
Q. In what does the exemption of their persons consist?-In that they cannot be judlyed nor punished by a secular judge.

Q \(\ln\) what cloes the exemption of their property consist?-A. In that they do not pay tributes or imposts.
Q. In what does the exemption of their contrnversies contsists?-A. In that they cannot be carried before a profane tribunal.
Q. And is this exemption of divine or human right?- I. It is most conformable to divine right.
Q. Why'-Becanse God, in the ancient law, excrnpted l'siests and lievites from similar bonds.
```

PHAP. FITI.

```

Of the honor velich vusale onve to the king.
Q. What is it vassals owe so the ir king? - A. Hon r: accorling to that of St. Deter, FEAR GOD AND HONOH THE KIVG.
Q. And is this a precept or an exortation? - 1 It is a matural aud divine precept
Q. Ant where is this containced)-A. In the fortath of the law of God.
Q What is it this honor which we gwe to the king binds us in - I . To love him, fear him, re--pect him, obey him, ind keep fideli'y to him.
Q. How did the Girnt Christians conduct themsilven towarts the lieathen emperors'- A. 13y bonnorthy them in a innst exeinplary marner.

Q i)lly they ever mix in any conspiracy amaine: the empern 3'一A. Never; they were alwa!, the most faithful vastals.

\section*{CHAP. IX.}

Of the respect vassals uzve to their king.
(2. Are vassals bound to respect the king?-A. Yes, becatuse he is their superior father, and the MAAE OF GOD.
\&. Ind for what other reasons?-A. Hecause the king is a sacred and anointed person and Clirist of the L.ard,
Q. Is it a \(\sin\) to murmur, curse, or speak ill of them?-A. Yes; because God says, "Do not murmur it your Gods, nor curse the prince of your nation"
Q. And what kind of \(\sin\) is it?-A. A mortal \(\sin\), if it is in weighty matters, and a venial one if in ligint affairs.
\&. Does he who murmurs against the government, murmur against the king?-A. Yes, because they are correlatives.
Q. Dues he who speaks ill of the ministers, speak ill of the king?-A. Yes, because they are his ent voys, and represent his person.
Q. He who despises the king or his ministers, whom does he despise?-A. God, who says, "He who despises you despises me."

Chap. x.
Of the Love which vassals owe their king.
B. What more is it vassals owe to their king?-A. Love.
Q. In conformity to what precept?-1. Both to the divine and natural one.
Q. Where is this contained?-A. In the same that commands us to honor our parents.
Q. Will the rassal comply in only not abhorring him?-A. No, it is requisite he should positively love him.
Q. What sin is it to abhor the king?-A. A grievous sin, owing to two distinct motives.
Q. To what virtues is this then opposed?-A. To clarity and piety.
Q. Why so to charity?-A. Because the king is our neighbor.
Q. And why so to piety?-A. Because he is our superior and father.
Q. Why is the king called father of his vassals? -A. Because he acts towards them as a father towards his children.
Q. How, does he give them their being or their lite?-A. No, but he defends and preserves it.

\section*{chap. Xi.}

Of the obligutions on the part of vassals to pray for - their king.
Q. Is the vassal bound to pray for his king?-A. Yes, because he is bound to bear love towards him.
Q. On what anthority is this obligation proved? -A. On that of St. Paul, who says, "Let prayers be said for kings."
Q. What is it that is \(t u\) be prayed for in their behalf?-A. All kinds of happiness, spinitual and temporal.
Q. What did the primitive Christians do?-A. To beseech God, publicly and privately, for the healths of the Emperors.

CHAP. XII.
Of the frar which rolsisuls swe to their king.
Q. Are vassals bound to fear their king?-A. Yes, because this is part of the honor they owe him.
Q. Where is this obligation found?-A. In Cicclesiastics, where it is said, "Som, fear" Good and 1.e king."

ฉ. What is feari- - T. To avoid the evil by which "e are threatened.
(2. How then is king any evil with regard to his vassals?-A. Neither is ciod, nor can he be so -yet we fear him.
Q. And why does a man fear God?-A. Because he believes him to be the author of the punishments prepired for the wicked.
Q. Why is the vassal bound to fear the kingi-A. Because in his hands are the punishments established for the guilty.
Q. Ought he io fear being wanting to his oath of tidelity?-A. Yes: because there is nothing secret which eventually in no reveated.
Q. Ought he to fear the repetition of the sin for which he had pardoned him?-A. les, because this is to abuse his clemency, and make himself unworthy of it .

\section*{CHAP. Xili.}
Q. Is there any obligation to obey the king?-A. Yes: because fiod his given him power to command.
Q. On what authority is this obligation proved?A. On that of St. Paul, who says, "obey princes and powers."

Q Is there any obligation to obey their minis-ters?-A. Yes: because they act for and represent them.
Q Where is this obligation proved?-A. In St. Paul, who says, "Obey the king and his envoys."
Q. And if the king or his ministers should be bad ones?-A. In the same manner, because their poweris always good.
Q. Where is this proved?-A. By the same aposthe, who says, "Obey your lords, although they be refractory."
Q. And if what they command is certainly bad? - A. No; because we are to obey God before any one else.
Q. And if there is any doubt of what they command being bad or goodl?-A. It is to be obeyed; because in case of doubt, justice is on the part of the superior.
chap. XIT.
Of the fuldity which vassals owe their king.
\(\boldsymbol{Q}\). Is the vassal bound to he faithful to his king ?
A. Yes, because he owes and swore it.
Q. When did he swear it ? A. When the king* dom-adjured him in the name of all.
Q. In what does this fidelity consist? A. In not injuring or plotting, directlv or indirectly, against the person, ife, or rights of the sovereign.
Q. Where is this obligation proved ? A. In the scriptures where God says "do not be disposed to touch my Christs."
\(Q\). If any one knows of a conspiracy, is he bound to disclose it? A. Yes; and not to do it, is to render himself an accomplice in it.
Q. And if he knows it under natural secrecy? A. All the same, because the general good is to be preferred to that of individuals.
R. And if lie lias sworn to keep the secret? A. Still the same, because an oath can never be made he bond of iniquity.
(l. And if the conspirators are brothers or parents? A. Notwithstanding they are, because the good of the monarchy is above all.
Q. And ought any fraterual admonition recede ? A. No; because in similar crimes no amendment is to be expected.
Q. Is that proposition condemned which says, It is lawful to kill a king who is a tyrant ? - A. It is, for being erroneous, heretical, seditious and scandalous. chap. xv.

> Of the obligations of vassals to pay tributes.
Q. Are vassals bound to pay tributes to the king ?
A. Yes because they are bound to aid him with their property.
Q. What do you understand by tributes ? A. A
small portion of one's property paid to the prince in
orler to supply him with the means of saving it 211.
Q. And on what authority is this obligation proved" A. On that of Christ himself when he said; "give so Ciesar that which is Casar's."
Q. And on what is this founded? A. On the same submission due to the king.
Q. What \(\sin\) is it not to pay these tributes? A. Grevious or light according to the matter.
Q. To what virtue is this sin opposed? A. To obedience and piety.
Q. Why is it opposed to obedience? A. Because the king counmands them to be paid. 12. Why is it opposed to piety? A. Because he is our superior and father, and thence we are bound to provide for him.
Q. And if the tribute should be unjust? A. To judge of this does not belong to the vassal; and he ought to support it just till the contrary is proved. casp. xtr.
Of the obligrations of vassuls to aid the king stith their persons in case of zuar.
Q. What thing is war? A. A dissention among princes, endiag in battle between armed multitudes.
Q. Is war lawful? A. It is so when the causes are just.
Q. Which are these? A. Self-defence, vindication from injury, or the recovery of usurped lands.
Q. Can vassals of themselves stir up war? A. No; they cannot, because they do not enjoy supreme aut thority.

Q Are they bound to serve in them with their persons? A. Even with their lives if it should be necessury, owing to the support they owe the king.
Q. Dues he who is balloted for the war, or cited for an expectition, sin if he flies away, or avoids it without just motives? A. He sins against obedience, against piety, and against justice, if it is in detriment to a third person
Q. Dines it belong to a soldier to ascertain whether wie war is just or not? A. No; he is to suppose it is, and obey.
Q. What is the obligation of the soldier? To ex. pose his life, du no injury or violence, and to be saisfied with his pay.
Q. Whes a soldier sin who passes over to the enemy's army' A. Yes; against obedience and fidelity, and lie ought to be punished as a trator.

Flour.-The price of flour at Liverpool was at firm 73 to \(75 n\). per barrel, and was expected to fall io 70 -less than 16 dollars.

A ficet of 21 sail of the line is said to be fitting ont in lingland; report gives it a destination to China.

Prom a lute Ioondon priper.-On Munday thrce or fiur poor seamen were cullected under one of the alenves of Westminster-brille.-One man heggeds the others were lying upon the benches. A ludy gave him a penny; the poor creature instantly rall in a barmw with dog's meat, which had just passo ell by, bought a piece and swallowed it in a minute. A haval licusenant, whosaw this, one who had himself filt wome hardships, and sect some hard sceties. was actually overemic by che sifhe, und could int prevent the tears from rimning down his cheeks.He gave the man a 3 e. piece. A sort of dintracted adoration of his benefacton ensied. Whik hiow wobly This poos ffllow behaved! He went directly to the
other seamen, said a few words, and was going off with them. His benefactor asked him where?-lle said he was going to a cook's shop with his followers; but all he knew of them was, that they had been without food as long as he had.

London, December S1. - I new and dreadful instiu: ment of war was tried on Wednesday last, at Chatham; and the experiment completely succeeded. It is designed for the purpose of amoying an enemy entrenched before a fortified town. It consists of a box, or barrel, filled with grenades, and charged with powder sufficient to burst the barrel, and scatter its other contents. The fuse of this machine being lighted, it was rolled down the slope of the parapet into the trenches, where it exploded, and threw the grenades in every direction. The invention is said to be col. Paisley's, of the corps of Sayrpers and Miners.

FRANCE.
Advices from Bordeaux state that grain of every description has experienced a great fall.

We have had two reports of an insurrection in France and the flight of the Bourbous. One of them came from the Buenos Ayrean commodore, Taylor, cruising off Cuba, who said he had the news from a British packet; the other comes from Curracoa to New-York in 19 days, said to have been brought to St. Bart's by a packet in 26 day's. This would bring otu accounts from England to the 10th or 12th of February, 12 or 14 days the latest; and there is a possibility that there may be something in these reports.

An Finglish paper says that 14,000 persons were implicated in the conspiracy lately detuc:ed at Bordeaux.

\section*{CHRUNICLE.}

The sudden and very numerous emigrations into the Al hama colmtry threaten many with absolute stirvation, unless they are shortly relieved by supplies from other parts.

The chief of the Caddo tribe of Indians, residing near Natchitoches, is said to be invested by the ageats of Ferdinand of Spain, with the title of generalissino of the Indians resident beyond the Arrayo Honde-specially charged to detain all travellers and suspicious persons.

The n quase in the city of New-York, heretofore c:tled si. Gearge's squure, has, by order of the corporat.on, been changed to that of Franklin squarf.

The new steam boat "Chancellor Livingston," a packet between New-York and Albany, is of 500 tons burthen, an 1 cost \(\$ 110,000\). Her average speed is esimatet at 8 miles per hour.
Oliver Fivans' s eam engine, used for raising water to supply Philadelphia, is calculated to raise ferrly 4 millions of gallows in 24 hours.

The fourth of July, last year, was duly observed at the Wortshos, one of the Sandwich islands, by the A nericans there, and others. At meredian, a grand salute was fired from the A!nerican ship Enterprize, w rich was repeated by a brig from Boston, by a Ru-sian ship and brig and by an English brig. Afte. winich the Americans gave a dinner to the gen-th- \(n\) nen helonging to the place, and those from the \(s\) in the harbor. In the evening, there was a d bhay if fire works.

Licie proyments.- The old banking institutions in t: © inerior, and many of the more modern establi winents, have resumed, or are just about to resume, specie payments.

Panks. A law has passed tlie legislature of New Youk subjecting the banks that do not pay specie afien the first of June next, to pay an interest to the holders of their notes of 12 per cent.

Hinter.-A New:York paper of the 25 th ult. says the ice remained firm at Alhany-being "from 22 to 24 inches thick, on Saturday morning last."
1)j-.d, on the 21st ult, at Burlington, N. J. Istac Colinins, the oldest printer in the state. The public was indebted to him (I believe) for the first quartn - itiun of the Bible ever printed in America; which, by 1 is great accuracy, is regarded as a standard.

Neze-York.-At a convention of the republican mernbers of the legislature of New-York, and of de le gates from several counties represented therein by feleralists, at Aibany on the 25 th ult.-present 2 V senaiors, 75 members of the assembly and 32 dele gaces-held for the purpose of nominating a suitabie person to be supported for the office of governor of the slate, \&c. in pursuance of a resolve of the republican members of the legislalure of the 28 th
tof Feb. last-Gen. P. Swift, speaker of the senate. in the chair, and Elisha, lenkins, secretary.

And, after some previous business, the votes of the convention being ascertained, and it appearing that. De IVitt Clinton had a large majority of them as candlidate for the oflice of governor, and Johna Tuyler having an unanimous vote for that of lieut: governor-it was
Unanimously resolved, That the members of the convention do pledge thenselves to support said persons as nominated.

The votes were-for Mr. Clinton 85, for general Peter B. Porter, 45, for governor.

Light houses. The commissioner of the revenne is advertising for proposals for the erection of light houses at Buffalo and Erie, on lake Erie.

Gen. Peter Curtenius lately died at New-York. He was much esteemed. He was buried with military honors, and the procession was the largest that had been witnessed on such an occasion for many years. Among the pall bearers were vice-president Tompkins, maj. gen. Brown, U. S. A and maj generals Stevens and Morton, of the New-York militia.
Niss Hamillon-The mysterious murder of a youns lady, named Hamillon, after a violation of her person, in the state of New-York, some years ago, seems at last developed. It was the act of two men, one of whom has confessed the crime, and both are \(i_{11}\) custody. It appears that they accidentally met with Miss 1.. and, in mere watonness of cruelty, first violated, and then murdered her, on account of her strugglings and agonizing resistance. We have rarely heard of two more abandoned villains.

Delazvare and Raritan canal.-The cost of this great national work is estimated at 836,824 dollars: which, we are told, is a very liberal one. We hope yet to see something done, as well as talked of, to profit by the incalculable advantages to be derived from such improvements.

Wilkinson's memoirs are published. This puts to rest a very silly story about their being suppressed by an officer of the government. We have not yet seen a copy of the work; which, doubtless, is highly interesting.

The zvilderness.- A new town, called Terre Hunte, is laying ont near fort Marrison, Indiana. Lots therein were sold to the amount of 21,000 dollars. in one day.

\section*{Ingenious Mechanism.}

\section*{From a Philadclphia paper.}

Mr. Dow, from Boston, has now in this city a machine invented and constructed by himself and Mr. Treadwell, for cutting and finishing wood screws. The only manual labor required is that of coiling the wire from which the screws are to be made, upon a reel and applying one end to the machine. The machine, which may be driven by water, steam, ol a horse power, will then continue to supply itself; until the whole of the wire, which may be of any indefinite length, shall be converted into complete and highly finished screws. The wire is cut and headed, the thread of the screw cut, the head grooved and polished, and the finished screw delivered simply by the operation of the machine. Ten of these screws are thus made in a minute. The editor has had an opportunity for only a slight inspection of the machine and of its operation, which, however, was highly satisfactory; but he has been informed many ingenius and accomplished artists and-mechanics have exanined it thoroughly and given ample testimony to the merits of it.

}
these Jines form the bases upon which f're suress commence, they are run and measure I wils live greatest accnracy. At the distance of every six miles on these standard lines, from heir inter-ction, toonship corners are establistied; at the distance of every inile, between the township corne ts, section corne:s are established; and half-mile or quarter-section posts are set between the section curners, equi-distant therefrom. The country is then laid off into townslips oft six miles square, the lines dividing them from each other commencing from the corners for townships established on the siandard lines. For the sake of distinction, the north and south lines dividing the townships are called range lines; those rumbing east and weat, towns ip lines. A ranse consists of any number of towns ijus. and embraces all those belonging to the sane ys: tem, which lie north or south of eamh other. The ranlyes are numbered, progressively, eavtward snil westward from the principal meridian; and the lownships northward and southward from the base-line. The following diagram will serve to illistrate die principle more fully:

Each of the squares in this f/plee tuat ropresen a cownship; the Roman numbera at tive heat, the numbers of the ranges: and the figureg is the stjuares the mmbers of the townships. It will he observed that in ant iwo ranges numberet? like, wn rast and one west of the meridian, there mus be for iown-

If immaterial how of vinitaly a chitrici or :race

inumus its boundary may be, the lines of survey are comtinued to every part of it, by offsets, by traverse, or by trigonometry, where necessary; and the fractional an. detached parts of townships and ranges are numbered from the base-line and the principal mericlian, in the same manner, respectively, that they would be if the district was bounded by straight lines, coinciding with the cardinal points. A town:hip or range may be separated by the irregularities of the bunndary of the district into two or more detached paris; yet all the parts together form but one in wnship or range, and bear the same numbers, respectively, that they would if entire.

All the public surveys are now made by the true meridian; fur which purpose the variation of the compass, at the place where the survers are made, is aseertained by celestial observation, and the sights of the compass adjusted to the true meridian. The compasses used, therefore, are required by the sur-reyor-general to be of Rittenlouse's construction, having a nonits division and moveable sights.
The townships are subdivided by lines, running parallei to the town bundaries, into thirty-six lots or sections, each section containing one mile square, or six humetred and forty acres. The secions are distinguished by numbers, from one to thirty-six. p:norcisively, beginning at the north-east corner of the :ownslup, and numbering westward and eastward, alternately, as shewn in the following example:

In fractional townships on the boundary of the district, the sections and fractional sections bear the same numbers that they would if the townships were entire. Alhoogh the townships are surveyed into sections of 640 acres, yet they may be sold in quarter sections or tracts of 160 acres, or half a mile square. On the sectional lines, equi-distant from the corners, there are corners established for quarter sections; and when a section is subdivided into quarters by a parchaser, the subdivisional lines are run from those curners :o the corvesponding opposite corners. Very few of the sections contain exsclly 640 acres; but vary a fraction of an acre, or sometimes even a few acres over or under the quantity. This is occasioned by the measure of the closing lines of the sections being more or less than 80 clains or one mile. The law, however, requires that all entire sections, excepting those adjoining the north and west sides of the townslip, "sliall be held to contain 640 acres." It frequently happens, that in laying off the townships, they are several clains more on less than six miles square, which excess or reficicney is always carried into the last half mile
on the north and west sides of the townships; and in subdividing them into sections, this excess or deficiency is likewise thrown into the tier of quarter sections on the north and west sides of the townships. These quarter sections, logether with the fractional sections on navigable waters, and on the external boundary of the district, are calculated and sold for what they may contsin.
The sections numbered sixteen in each township are reserved and given, in perpetuity, to the inhabitants thereof, for the support of scbools. And three townships in the state of Ohio, one in Indiana, one nn Louisiana, and one in each of the territories of Michigan, lllinois and Mississippi, have been reserved and given, in perpetuity, for the support of semiuaries of learning. Two of the townships reserved for the state of Ohio, are locared at Athens, about 58 miles east of Chillicothe, where the "University of Athens" has been organized, and is in successful operation. The "Miani Uni rersity" las not yet been organized. A township has been located for it adjoining the westeru boundary of the state. I ain not infurmed of the measures adopted in the other states und territories for availing themselves of these liberal donations; but belipve there 10 ana university at Vincennes, in ladiana, and one at St. Stephen's, in the Mississippi terriiory, both receiving incomes from the reserved towns i, ips.
Of the mumner in zolich the priblic surveys are executed. -The north ant south lines are run by the true meridiap, and the east and west lines at right angles thereffiom, ac far as practicable in clowing. But as the exst, find wreat lines are made the closing lines of The sectiops' oi townships, they frequently vary a little fiom thoses pionts; being run from one section or township corner to another. The lines are well marked by having all those trees which fall in the line notched, with two notches on each side where the line cuts, and all! or most of the trees on each side of the "iine áe ance near it blazed on two sides, dioganally or quartering towards the line.
At the sectice curiners there are posts set, having as many rotiches cut on two sides of them as they are miles distant from the township boundary, where tlic, seitional lines commenced. At the township corne-s the posts have six notches made on each of the four sides facing the lines. Wherever a tree falls exactly in the corner, it supplies the place of a post, and is marked in the same manner. The places of the posts are perpetuated thus: at each corner the courses are taken to two trees, in opposite directions as nearly as may be, and their distance from the post measured. These trees are called "bearing trees," and are blazed on the side next the post, and one notch made with an axe in the blaze. But in prairies, or other places where there are no trees within a convenient distance for bearings, a mound of earth is raised at each corner, not less than two and a half feet highl, uor less than that in diameier at the base, in which mound-posts are placed.
At the section corners, the numbers of each section, togetlier with the numbers of the townslip and range, are marked with a marking iron (such as are used in mills and warehouses) on a bearing or other tree standiug within the section and near to the corner, thas:- A blaze, large enough for the purpose, is made on the tree, and on the blaze the letter it . is made, with the number of the range aunexed; below this the letter T. with the nunber of the tovnship; and under that the number of the section, without any letter to denote it. To the number of the townslip the letter N. or S. is added, according as the township lies nurth or south of the base-line.j.
and to the number of the range, the letter E. or W . of the survers thus made, a complete innorlecige as the ranse may be east or west of the principal meridian. By proper attention to these numbers and marks, a purchaser is enabled to know the quarter and number of the section he wishes to enter, and the number of the township and range in which it lies. The following example of the method of numberw, and marking at the section corners, may serve to explain \(\mathrm{i}^{\prime}\) more fully:
\begin{tabular}{|c|c|}
\hline Sec. 26. & Sec. 25. \\
\hline \[
\begin{aligned}
& \text { 12. } 10 . \mathrm{W} . \\
& \mathrm{T} .5 . \mathrm{N.} \\
& 26
\end{aligned}
\] & \[
\begin{aligned}
& \text { R. } 10 . \mathrm{W} . \\
& \text { T. } 5 . \mathrm{N} . \\
& \text { \&5 }
\end{aligned}
\] \\
\hline \[
\begin{gathered}
\text { R. 10. IV } \\
\text { T. 5. N. } \\

\end{gathered}
\] & \[
\left\lvert\, \begin{gathered}
\text { R. } 10 . W . \\
\text { T. } 5 . \mathrm{N} . \\
36
\end{gathered}\right.
\] \\
\hline Sec. 35. & Sec. 36. \\
\hline
\end{tabular}

The quirter section corners are established in the sume manner that the section corners are, but nn marks are made for the numbers of the section, tovnshup and range; "f S." only, is marked on the pos.
(O) the township and range lines, the section corners are eat ablistied and marked only for the townships arljuining on the north and west of those lines respectively: because in the subblivisions of the townsnips into sections, the lines are run out from the south and east, to thre north and west boundsrees of the townstipis, and the corners established tinereon at the intersection, for those sections between which the lines are thus run. These lines gonerally intersect the north and west boundaries of the townships a few linkd distant from the corners, thereon, of sections in the aljacent townships; in all which cases there are two comers adjacent to each other, and bearing trees and posts for each; and, withont proper attention to the marks, and to the courses of the lines, it might be somewhat difficult for persons exploring the land, to distinguish them from each other. But where the section lines jusersect the township boumdaries at the corners thereon, such corners becume commun to the sectimas in buth ints nships, the proper marks and num. bers being ma le for and within each.

The teputy surveyors are required to note particulirly, wind to emter in their field books, the oursetian dirtancer of all lines which they may rua; the names and estimated diameters of ill corner or bearing trees, and all those trees which fati in the lines, caltet wtation, or line trees, together with the courses and distunces, of the beantig tres, from their resplective comers, with the proper leluers and umbers marked on them; all rivers, er-cks, prings and minaller streams of water, with thir with, aud she course they run in crossing the line, and whether usvigable, rapisl, or therwise: alwo the fice of the country, whether Icvel, hilly or manatainous, the kinds of timber and undergroxth with which the lan! myy he coveped, und tise flatity of the eil; all likes, ponls, swamps, plat or tuif grourds. enal bedy, stone rguarties; tincummon natival or ar ibcial produc iuns, stich as peruains of antient farlifir cunn, mbunds, pracipicea, cale, \&c. all rapirds, casc.ades or f.ans of water; n.1. nerals, ores, fostifa de. The trise sithation of all mines, satt licks, salt prumgs and mill sehts which may corac to thot knowledre. Irom the resurn
of the country may be obtained, and maps therait drawn with the greatest accuracy. The field nutes ot t \(^{\text {t }}\) the surveyors, together with the plats and descriptions, made ont therefrom, are filed in the office of the surveyor general of the United States, or of the principal survevors fir the territories of Missis. sippi, Illinois and Missouri.

\section*{Hints to purchasers of pubic lands.}

When the lands of a disirict are surveyed and prepared for sale, three months public notice of the time and place of sale is given, by proclamation of the president of the Cinited States. All the lands in such district are, at the time and place appointed, offered at public sale to the highest bidder, after which all tracts not sold are open for entry, at private sale, at two dollars per licre. They are sold either in sections, half sections, or quaricre, at the option of the purchaser; but fractinnal sections on navigalhle waters or Indian boumdaries, are sold entire. An act of congress, passed at the late session, authorises from and afier the 1st of September next, the sale of sections numbered \(2,5,20,23,30\) and \(33^{\circ}\). in hulf quarter sections, or tracis of eighty acres; the quarier sections being divided into two equal parts by lines rumning north and sunth.
When a purchaser has selected the tract be proposes to enter, and ascertained at the register's affice that such tract is not alrearly sol.1, he must apply to the regis er for the purchase thereof, by a written applicationplesignating the number of the sectim, township and range, which munt be signed by the person applying. The purchaser mist then pay to the receiver of public monies, a deposit of one-twentieth part of the purchase money for the tract entered, which for a quarter section of 160 acres, is sixteen dollars. For this payment the receiver will isstue a receipt, which must be filed with the register, who will make an entry on his books of the application, and the payment masde; and, if the purcliaser requires it, will give him a copy of such entry, and also a copy of the plat, with a description of the tract purchased. Before the expiration of forty days from the date of the purchase, the remainder of the first instalment of one-fourth part of the purchase mone must be paid to the receiver of public monies, and his receipt therefo: filed with the register, or on failure to dosic, the tract will be again exposed to sale and may he entered liy any other persun. But if the pasmient of the first instalment is not completed within three mon:hg from the time of purcliase, the tract severts to the United States, and the innmey paid as deposit forfeited. On producins to the regiater the receipt of the recciver of public monies, for the payment of the first instalment, the propore entries therefor wit be made by him on his hooks; and lie will issue in the purchaser, a cortificate of the purchase, describing the tract sold, the amume of purchain money, the amosut paid on acconent, the halance remaning due, an t the time when the remating three instalments shall hecome dre; and that if it shath be duly dicharged, the purchaser, or his as oigmee. or other legal regresentative aliall be catilied oo pilent for the saill land. On the parment of cacio the renuining instalinerts, the receipts of the reccicer of pultie moties milut be filtil with the ree giver, and thu cer.ificute uf purchase pentuced io him, on whieh he will endurse the painicats. The phirchaser may, if is be more entiveliem to : ins, phay the romainng instalments, ar any of them, in the ith lirer of the I nited states at Washingion, hav. ing lioxt ancertaine l nt the general lund office, tho
make, where he will receire the necessary instruc- troduction" prefixed to an edition of the land law** tíons.

Lesser payments than the amount of an instalment may be made at any time when it may suit the convenience of a purchaser, and the amount so paid vill be creclited as "on account." Or the whole of the facuase money may be paid at the time of purcitisse, or at any time before it becomes due.No interest is required upon the credits allowed, if the instalments are punctually puid at or before the times when they become due; but if they are not Uns paid, interest is charged on such instalments, from the date of the purchase to the time when paid. 13nt when payments are made in advance, either at the time of purchase, or before they become due, a discount at the rate of eight per cent. per annum is allowed on such payments, estimated from the time paid to the time when it would become dueIf the tract be completely paid for at the time of purchase, the price of the land would be reduced to one dollar and sixty-four cents per acre

If the payments are not completed within five years from the date of purchase (being one year after the last instalment becomes due) the tract is then onferen at publicsale to the highest bidd-r, and it soid, the surp! us, if any, afi er cieducting the bulance due, and defraying the expences of sate, \&oc. is paid over to the original purchaser. But if the tract is not soid at public sale, it reverts to the United States, and may be again entered by any persch at the original price of two dollars; and all the payments made by the original purchaser are forfeited.

When the whole amount of purchase money is paid, the accounts therefor on the books of the land officers are balanced and closed, and a "final cer:ifica \(e\) " theroot granted by the register to the purchaser, exlabiting a transcript of the account from his buoks; and stating that on presentation of such certificate to the commissioner of the general land office, a patent will be grantexd for the land.These ccr:!ficates, however, are usually transmited by the register, to the general land office, where the "fiaal certificates," and the aecounts kept in that office are strictly examined and compared; and if found correct, patents are issued by the president of the U. S. countersigned by the commissioner of the gencral land office, by whom they are trans mitted to the register of the land office, to be by him welivered to the patentees. There are no fees paid oy purchasers of public lands at any of the of fires trausacling the business in relation thereto.

If a purchaser sells his land before he has completed the payments, i.e must make an assignment on the "first certificate," transferring his right, title and claim :o the land described therein, to the assignee. The assignment must be acknowledged before a justice of the peace, or other judicial ufti cer, whose official capacity must be authenticated by the certificate, undcr seal, of the clerk of the eounty (or district) in which such justice of peace, or other judicial officer, resides. The "first certi ficate," with the assignnent, acknowledgment and authentication thereon, must be deposited with the register of the land office, by the assignee, when he completes the payments for the tract, by whom it will, together with the "final certiñcate," be transimilted to the commissioner of the general Jumi other, is Whahngoil city, who will issue a patent 'o the assinner
If persins proposing to purchase mublic land and uliacquain:ted with the mode if proceeding, the foregeing may, perlaps, affort information that will be usefui to them. Is a recapitulation of the +p:incipal paints, I subjoin an extract from the "in.
of the Uniteu States, published in 1810, in pursuance of an act of congress, exlibiting the "general outlines" of the system of the puplic surreys, now in force. [See land laws-Introduction, p. Xix.]
"1. All the lands are surveyed before they are offered for sale; being actually divided into townships six miles square, and these subdivided into 36 sections one mile square, and containing each 640 acres. All the dividing lines rumning according to the cardinal points, cut one another at right angles: except where fractionable sections are formefl by the navigable rivers or by an Indian boundary line. The subrlividing lines of quarter sections are not artually surveyed, but the corners, boundaries and contents of these are designated and ascertained by fixed rules prescribed by law. This branck of the business is conducted under the superintendance of two principal surveyors, who appoint theip own deputies. The powers and duties of the first, who is called surveyor general, extend over all the public lands north of the river Ohio, and over the territory of Louisiana. The nther known by the name of surveyor of the public lands south of the state of Temmessee, superintends the surveys in the lississippi and Orleans territories. Both make returns of the surveys to the proper land office, and to the treasury.*
"2. The following tracts are excepted from the sales, viz: 1. One thirty-sixth part of the lands, ora section of 640 acres in each township, is uniformly reserved and given in perpetuity for the support of schools in the township. 2. Seven entire townships, containing each 23,000 acres, viz? two in the state of Ohin, and one in each of the territories of Michigan, Indiana, Illinois, Mississippī and Orleans, have been also reserved and given in perpetuity for the support of seminaries of learning. 3. All salt springs and lead mines are also reserved, but may be leased by the president of the United States. Three other sections were formerly reserved in each township for the future disposition of congress; but this reservation has, since the act of 26 th March 1804, been discontinued. One section was also reserved in each township within the boundaries of the tracts respectivly sold to the Ohis company, and to John Cleves Symmes, and was given in perpetuity for religious purposes; but this reservation has not been extended to any other part of the public lands.
"The Mississippi, the Ohio, and all the navigable rivers and waters leading into either, or into the river SL. Lawrence, remain common highways, and forever free to all the citizens of the United States, willrout any tax, import or dity therefor.
"3. All the other public lands not thus excepteci, are, after the righifill private claims have been ascertyined and confirmed, offered for sale at public sale in quarter sections of 160 acres each, but cannot be sold for less than two dollars an acre. The
* Since the publication of the volume from which Unis extract is taken, there has been two additional st:veyor's appointed; the first of whom is called the "survevor of the public lands in the territories of Ilinois and Missouri," and superintends the public survers in those territories. Since the creation off this ottice the powers and duties of the surveyor general exicnd only over the states of Ohin and hindiana al ! "e territory of Michigan. The other principal anceyor, who has been appointed at the chose of the late session of enngress, has, it appears, the direrion of the surveys in the northern part of the Mississippi territory.
zands not purchase lat public sale, may at any time after be purchased in quarter sections at privare sale, and at the rate of two dollaps an acre, and without paying any fees whatever. The purchase money, whether the land be bought at public or at private sale, is puyable in four equal instalinents, the first within forty days, and the three others within two years, three jears and four years ufter the date of the purchase. No interest is charged if the payments be punctually made; but it mast be paid from the date of the purchase, at the rate of six per cent. a year, on each instalment not paid un the day on which it becomes due. A disconnt at the raie of eight per cent. a year, is allowed for prompt payment; which, if the whole purchase menev be paid at the time of purchasing the land, reduces its price to one dollar and sixty-four cents peracre. Tracts not completely paid for within five years af er the date of purchase, are oflered for sale at public sale, for a price not less than the principal and interest due thereon; if the land cannot be sold for that sum, it reverts to the United States, and the partial pyyments made therefor are forfeit ed: if it sells for more, the surplus is returned to the original purchaser"

In iny next I expect to give you some aocount of the several systems of the public surveys, and of the land offices established for the sale of the public lands, in the states of Ohio and Indiana, and the zerritories of Michigan, Illinois and Missouri
lours \&c.

\section*{Memorial on Manufactures.}

To the homorable she serute and house of representatives of the United Stases in congreas assemblet,
The memorial of the subscribers, citizens of Bal simore, respectfully represents,

That during the interruption of the foreign trade of the United States, by embargo, non-intercourse and war, a great and salutary stimulus was given so manufacturing estublishments. Extensive and expensive works were erected in various parts of the unton, multitudes of hands employed, some remaneration received by the propprietorn, and essential service rendered to the nutum. But the conclusion of peace, and the conseguent free inter course with Europe, and more particularly with Britain, soon deluged our market with foreign manufactures; the products of old and highly im proved eatablishments, by which the infant rising mammfactures of this country have sulfered such a check, as shreatens to be fital wo them, and destruc. sire of the immense capital employed in them, un-
less supported and upheld by the energy and wisdom of the national govermment.
We believe it now to be the general conviction of the American people, that froin the experiunce already obtained, we are ripe for manufacturing for our own consumption; that nothing farther is necessary for accomplishing this impertant ohject, but the fostering hand of lie governanent, in perprotually wa:ching over and aiding the mufacturing system; in imposing such protecting duties as will secure to our manufacturers the home market; that such laws should be unlimited in duration and that they should be so framed as to make evasion next to impossible.- For no doubt remains in our minds, that by the ingenuity and fraud of many importers, the officers of our customs are deceived, the revenue injured, and the duties wisely imposed to protect American manufactures, rendered of no a vail.

We believe manufacturing establishments to be essential to our prosperity. We do not know that the annals of history afford any instance of a nation being great, powerful, and happy, unless where agriculture, manufactures \({ }^{\circ}\) and commerce flourished.
England is indebted to this combination for her great wealth, population, and political power; but perlaps to none of the three so much as to her manufactures. Their gross annual value, previous to the establishment of her cotton works, were estimated at sixty Eillions sterling. The cotton manufacture, which for several years after the reign of the present king, Genrge the third, did not exceed in annual value two hundred thousand pounds, has reached the enormous amount of seventeen millions sterling; nearly equal to her staple manufacture, the woolen: which has been long stated at nineteen millions, making a grand total of the annual value of English manufactures of nearly eighty millions sterling.
When we contemplate the number of people provided for by such establishments, the mechanics employed in the construction of the various works, and in keeping them in repair, miners, and wool growers, the number of farmers, and the (1)antity of cultivation necessary fur their support, the ruads, the bridges, and canals nocessary for their circulation, the shipping fir the importation of raw material and for export of the manufactures, we banit at nuce see the national importance and ralue of such works.
Borrowing information from history and experience, we see how adinirably the United States are fitted fur participating in such advantages. Living under a really free goverminent, becuase purely representative, with a territory almost unlimited, possessing the adrantages of all clitiates, a soil in many places lusuriantly fertile, a popnlation munc. rous, active, and ingenions, augmenting with a colerity of which history affords no exainple; and now abounding in capital, we only wont the aid of our national government to put insaction the encrgies of our people, by a constant, uninterinitted, assiduous support and protection.

As the best of friends to agriculture, we wish the establislumene of manufactures, because in many places of our extensive territory, lam?s are so situated, that the proprictors have no in lucement in extend their cullivatian begond th-ir own support; for all their neiglibors raise enounth of provisions for their own consumplion, consequatly there are no purchasers; and the articles they raise will not bear the expence of distant land carri.age. and they have no convegance by water.- What is
the consequence' excellent lands remain in a state of nature, the farmer and his fanily have boo motive to industry, and idleness in the pareitit of vice.lintoxication, gapbling, and irregularity prevail, and spread through the district more destructivel! than the pestitence. let manufactures be establistied in such neighborhoods, a demand will neces. sarilv arise fragreul'ural produce; lands will be iniproved ant extensivelı culivated; industry, gona order, anll ricl es with abound, and the whole fice of tie counlry ;itt on the appearauce of a garden 13. such meais, if you camot bring the fariner to mithrt, you c. \(n\) brang the market to the farmer; sell change and improve the whole state of society, you geve orign to good roads, to bridges, navigahle rivers, and canais; give celerity to exchanges, the life and sotil of commerce; and facilitate the interconrne of every part of the country, with ever! other.

To aecure a regular und constant market to our agriculurist, is of the last importance. All politic ecommical writers agree, in considering the home market and the liome tracle as very superior to the fore gn trade, becanse, the returns are more freQueth, and the risks less, and every profit remains with the nation. In Britain, they es imate the superior benefits of the home trade to that of the for ign, as 28 to 12 In times of peace we have no reason to expect a steady deniand, nor conse. quently a good price for our agricultural products. If these producis remain on hand, or sell for little or no profit, the cultivation will necessarily decline, and intolerable dis'ress will ensue. To prevent suct occtarrences, ho:me manufactures afford a substantial remedy: We are of opinion that the necessary hands eniployed at home to manufacture for tue population of the United States would consume more provisions than all we export.

It has been alledget, that wages were too high in America to adnit of our entering intu competitio." in mantufactires with the older comentries of Eumpe, particularly Britain We believe the opinom is not well fuillied. The wages of the persons employed in the upper depariments of manufactures, ure high in Eugland. Calico printers, chief spinners of co ion \(n\) e woolen, or superintendants, principal d!crs and finishers, fonerally eam wages equal ofroin ten to fifeeen dollars per week; womell and children who perform a great part of the wirk, can be lired neariy as low here as in-England; and there is nn reason to donbt that our culored people can be extensively and advantagerusly ellphoyed in many manufuctures. Lowness of wiger, and low price of raw material, do not necessarily proluce cheap manufacture; for it is well ascertainel, that though the colton spinners of Bengal buy ibeir colton at two pence per pomml and get a man's day labur for two pence more, yet the lifitish spimier can underscll the Asiatic, becanse by the intervention of labor-saving inachinery, he can spin as much by one person? as requives in India sixty persons; but allowng for the superior expence of this machinery and other contingencies, tweniy persons, still it will be as one man in Britain to forty in India.

In tiee United States we have the knowledge of the lahor-saving machinery, the raw material, and provisions cheaper than in Brisain; but the overgenwn capital of the British manufacturer and the dextcrity acguived by loige experience, make a considerable time, heavy duties necessary for our protection.- IVe have beaten Eugland out of our market in hats, shoes, boots, and all manufactures of leather; we are very much her superior in ship
huilding; these are all the works of the hands, where labor saving machinery gives no aid; so that her superiority over us in namufactures, consists, more in the excellence and nicety of the labor saving machinery, than in the wages of labor. With ull their jealously, and restrictious upon the emigrations of workmen, the distresses and misfortunes of Eugland will, by due encouragement, send much of her skill and knowledge to nur shores; let us be ready to take full benftit of such events as Englind herself did when despotic laws in Germany, and other parts of Firrope, drove their manuficturers into Britain, which laid the foundation of her present eminerce.

So sensible is the British government of the necessity, and advantage of completely securing their markets to their own manufacturers that, although no other country can enter into competition with thein on their own soil, in the greatest part of their manufactures, yet, laws either absolutely prolibib tory, or duties tantanuomt to prohibition exists upon every article capable of being made in England: and the severest penalies are inflicted upo: the exportation of any kind of machinery, or the emigration of any workman. Nevertheless, the competition among their own manufacturers, keeps down the price to the consumer, in general, lower: than he could otherwise obtain it.

We also beg leave to remark, that sales at auction are extremely injurious to our. manufacturing and mercantile interests. This mode of sale, besides affording to foreign agents an immediate reward for frauds, gives to them advantages in which the regular and honest merchant canot participate. Advantages we believe, denied to them in their own country, the policy of which is said to interdict, (except in a few inatances) all sales at auction, on acccunt of their evil effects upon their mercantile and manufacturing interests! hy this mocle of sale, the fair merchan' is stripped of the the advantages, which, by a necessary establishment, iarge advances, and a long course of honorable deal. ing, he bad acquired; while sirangers, bound by no tic to this country, who bear none of its burthens, perforin no civil duties, nor any services in peace or War; who are not even at the expence of store rent, nor clerk hire; who are so transitory, as scarcely to be amenable to our laws; are enabled to monopolize our markets, by which our merchants are in many instances obliged to sacrifice their goods through the same process, in order to pay their duties to the government. And too many are com. pelled, by the stagnation of their trade, in inoments of pecuniary distress, to resurt to these destructive anction sales, by which insolvencies are produced, and a circle of connertions are involved in ruin.

Tos promote the rbjects of this inemorial, we wonhl, with due deference to the national legis. lature, suggest a revision of their protecting \(1 . \mathrm{ws}\), with such enactments as would make them effecthal; as well as an assurance that they would be permanent, and that the maniufacturing interests never would be neglected. No isdividual can with justice alledge, that to lay protecting duties, is to take money out of the pockets of the farmers, to place it in that of the merchant or manufacturer. - The necessary taxes for the wants of the state must be provided; if they are obtained in one way, they will not be required in another, and what ever enriches one description of citizens, relatively emriches all. The United States do not consist of parts, they are a whole; whatever emriches one part, enriches all; if not directly, indirectly? "In veste varietas sit, scis sura non sit." "Ihe coat
is without seam, woven from the top throughour, let us not rend it."
To secure the imposed duties, reliance slould not be placed on custom house oaths, nor should oaths be multiplied: the frequency of them destroys their solemnity, sports with the most sacred obligations, and is unfriendly to religion and morality.

Inspectors, acquainted with the quality of the goods, should be appointed; whose duty it should be to ascertain by actual examination of the goods, the correspondence of the denomination, or value, to the entry; if frauds are practised, heavy penalties should be inflicted. Goods of foreign manufacture, passing coastwise, from one port to another, should be accompanied with permits, certifying to the col. lector of the port at which they are to be landed, by definite descriptions, that, entry had been fairly made on them at the port of entry. Severe laws and disabilities should be enacted against smuggling, and every fraud committed against the revenue laws.

We believe that a duty of ten per cent should be imposed on sules by auction, of all linen, cotton, woolen, and silk goods, and of all those made of metal, with the exception of the estates of bankrupts, insolvent persons deceased, and sheriffs and marshals sales.

We pray that it may be the practice of the president, and vice prisident of the United States, and of the members of congress, as well as governors of respective states and their legislatures, with all their civil, military, and naval officers, to wear and use the manufactures of their own country of every description, by which, we think, they will effectually promote its best interests, exhibit their patriotic principles, and excite a just principle of imitation.

And your memorialists further request, in behalf of your mercantile and manufacturing interests, such aid and protection as from time to time may appear necessary; and as may place them beyoid the reach of such foreigu, domestic, or inimical influence, as intends them injury or ains at their destruction.

And your memorialists, as in duty bound, will ever pray.

\section*{Free people of color.}

Beport on colonizing the free people of color of the Unised Stutes.
hocse of hephegentatives, ted. 11.
The committee to whom was referred the memorial of the president and board of managers of the "American society for colonizing the frie people of color of the United States," have had the same under their deliberate consideration. The subject is of such magnitude, and attended with so many difficulties, it is with much diffidence they present their views of it to the honse.

Were it simply a question of fonuding a colony; numerous and well known precedents show with what facility the work might be accomplished. Every new territory established by our govermment, constitutes, indeed, a colony, formed with great euse; because it is only an exteusion of homogeneous set. tlements. But in contemplating the colonizatiou of the free people of color, it seemed obvionsly necessary to take a different course.- Their distinct character and relative condition, render an entire separation from our own states and territories indis. pens.able. And this separation inust be such as to admit of an indefinite continuance. Hence, it seems inanifest that these people cannot be colonized with. in the limits of the United States. If they were
not far distant, the rapidly extending settlements of our white inhabitants would soon reach them; and the evil now felt would be renewed; probably with aggravated mischief. Were the colony to be remote, it must be planted on lands now owned and occupied by the native tribes of the country. And could a territory be purchased, the tranisporting of the colonists thither, would be vastly expensive, their subsistence for a time difficult, and a body of troops would be required for their prolection. And after all, should these dificulties be overcome, the origiral evil would at length recur, by the extension of our white population. In the mean time, should the colony so increase as to become a nation, it is not difficult to foresee the quarrels and destructive wars which would ensue; especially if the slavery of people of color shouli continue, and accompany the whites in their migrations.

Turning our eyes from our own country, no other, adapted to the colony in contemplation, presented itself to our view, nearer than Africa, the natire land of negroes; and probably that is the onlv country on the globe 10 which it would be practicable to transfer our free people of color with safety, sind advantage to themselves and the civilized world. It is the country which, in the order of Providence, seems to have been appropriated to that tlistinct family of mankind. And while it presents the fittest asylum for the free people of color, it opens a wide field fc: the improvements in civiliza. tion, morals and religion, which the humane and enlightened memorialists have conceived it pussible, in process of time, to spread over that great continent.
Should the measure suggested be approved, an important question occurs.-In what way shall its execution be essayed ?

A preliminary step would be, to provide for the perfect neutrality of the colony, by the explicit assent and engagement of all the civilized powers, whatever dissensions may at any time arise among themselves.

The next important question is-will it be expedient to attempt the establishnent of a new colony in Africa, or to make to Great Britail a proposal to receive the emigrants from the linited States into her colony of Sierra Lemie?
At Slerra Leone, the first difficulties have been surmounted; and a few free people of color from the United Stat es have been admitted. A gradnal addition from the same source (and such would be the natural progress) would occasion no embarrassment, either in regard to their sustenance or govern-ment.-Would the British government consent to receive such un accession of emigrants, however eventually considerable, from the United States?Would that government agree that, at the period when that colony shall be capable of self-governraent and self.protection, it shall be declared inde. pendent? In the mean time, will it desire to monopolize the commerce of the colony? This would be injurious to the colonists, as well as to the Enited States.-Should that conntry from the nature of its soil and other circuinstances, hold out sulficient al. lurements, and draw to it from the United States, the great body of the free people of color, these would form its strength, and its ability to render its com. morce all object of consideration. Now as the great and permanent benefi: of the colonists, was the fundamental principle of the establishmentwill the British governunent decline a proposition calculated to give to that benefit the important ex tension which will arise from a frecdom of coin.
me ce; to those, at least, at whose expence, and by whuse means, the colony shall be essentially extericied? should all agreement with Great Britain be effected, no further negociation, nur any extraon linary expenditure of money, will be required The work already commenced will be continuedsimply of currying to Sierra Leone, all who are whling to einbark.

It would seem highly desirable to confine the migrations to a single colony. The two distinct and indenment colonies, established and protected by two independent powers, would naturally imbibe the spirit and distinctions of their patrons and piontectors, and put in jeopardy the peace and prosperity of hoth. Eiven the simple fact of separate in dependence, would eventually, tend to produce collisions and wars between the two establishment. (unless, indeed, they were far removed from each other) and purh.ips defeat the further humane a:ld exal ed views of those who projected them. The spiri which animated the founders of the colony of sierra leome, wourd be exerted to effect a union of design, and the cordial co-nperation of the British government with our own, and it might be hoved not without success. It woיld be in ac-cor-lance with the spirit of a stipulation in the last treaty of peace; by which the two governaments stands pledzed to each other, to use their best endeavors to effect the entire abolition of the traffic in siaves, while the proposed institution wowld tend to diminish the quantity of slavery actually exisiing.

If, however, such enlarged and liberal views should be wanting, then the design of forming senarate colony might be announced by the Americall ministers, to the maritime powers; and their grarantee of the neutrality of the colony obtained.

Your committee do not think it proper to pursue the subject any further at this time; but that the government should wait the result of the suggested negociations; on which ulterior measures must depend.

In conclusion, your committee beg leave to report a joint resolution, embracing the views herein before exlibited.

Resolved, by the semate and house of representatives of the United Stutes of Anerica, in csngress assembled. That the president be, and is herehy auhorized to consult and negociate witi. all the governments where milusters of the United Slates are, or shall be accredited, on the means of effecting an entire and immediate abnlition of the traffic in slaves.Aud, also, to enter intu a convention with the government of cireat Britain, for receiving into the colony of Sierra Leone, such of the free people of color of the United States, as, with their own consent, shall be carijed thither; stipulating such terms as shall be mont beneficial the cotonists, whule it promotes the peaceful interests of Gireat Britain and the United States. And should this pro-po-tion not be accepted, then to obtain from freat Tritain, and the ather maritime powers, a stipalation, or a furmal declaration to the same effect, gu ranteeing a permanent neutrality for any colony of free people of color, which, at the expence and under the auspices of the United States, shall be established on the African cuast.

Resolved, That adequate provision shall hereafter be made to rlefray any necessary expences which may be incurred in carrying the jreceding resolution into effeet.

London dates to I'ebruury 7, inclusive.
The state of things in lingland afpea's to have approached a very alarming crisis. The prince rerent, ni his way to parliament to open the session. by a speech fiom the throne, was insulted with the hootings and hisses of an immense mulitude of people, and in returning was attacked by another nob with stones, and, as lord Murray supposes. with bwllets fired from an air gun. Sce lis cxaminution b:fore the house of commons. The regent escaped without injury, but lord Mirray was wounded.\(1,000 \varepsilon\). reward are offered by proclamation for the "pprehension of the person or persons who were guilty of the "attempl upon the life" of the prince, and it is said that several have been arrested and committed to trial on a charge of high treason. A bullet much battered, so as to be nearly flat, has been picked up near the place where the regents coach was attacked. The person who found it way examined by lord sídnouth.
After the king was attacked in his coach in 1795, very much in the same manher that the prince regent has been, the habeas corprus act was suspended. and the power of the ministers exceedingly in-creased-and advantage was taken of the circumstance to alarm the people wi:h ten thonsand tales of "tubs" and conspiracies, whereby they were warmed into loyalty and forgot their then sufierings in anticipating greater evils. On that occasion one man was sentenced to seven year's' imprisonment for having "made months" at the royal carriage!
But the regent's mesisage to parliament of the \(29 \mathrm{th}_{1}\) of January, inser ed belo", is of more importance than the a tack upon his person, if the oftenrepeated declarations of the ministers may be believed, that that message had no comection with or reference to the a tick. It goes ios siew the prevalence of a revolutionary spirit to a much greater extent than we apprehended to exist in that comtry, and evinces to us that the governmen, is exceedingly alarnied-minless, indecd, the whole hifsmess, even the mob-scene itself, has been got up by the ministers themsclves to cozen the people out of their just demands.

The apprehensions of a scarcity of grain has sub. sided. The supplies from the continent have becin very extensive. Fine old wheat, however, was at 6\&. to \(6 \&\). 10 s. per quarter. Average for England and Wales 1u3s. 11 d.

Stocks.-Fieb. 4. cons. 64 a 642 2.
Lord Custlereagh.- The oid Corry packet, (says a Dublin papere) in a recent passage from this port to Newry, had on board a fine Arabian horse, belonging to his lordship, which some of our readers might have lately seen in this port. A most violent siom anose; and it, was with difficulty that the captain and crew prevented the passengers fiom throwing the poor animal overboatd; as they persisted in: attributing their danger to having any hing belunging to that popular nobleman on board.
It is staled that C'astereagit's care of the people of England has enabled his father to pay off an old debt of \(50,000 \mathcal{E}\). and to purciase new estates which cost him 250,000, - logether equal w, \(\$ 1,332,000\). A man ought 10 "provide fur his fumily.".
Some of the British troops will be immediately drawis from France for "liome service"- 25 wanbports have been taken up for the purpose.

Cunning's impudence in talking about the wholesome plans of the ministers, \&c. was handsomely rebuked by sir Robert Heror, who said, "that he (Canning) himsclf was one of the most flagrant and
dameful instances of the wonderful profusion and corruption of the ministers." - Caming"s wages for supporting the ninistry, are about \(£ 12,000\) a year. Double the amount of our president's salary.

At the commencement of the present year, the collectors of the revenue in freland received no:ices for the discontinunce of 395 four-wheeled carriuges, 2565 two-w'celed do. 1785 horses, 624 servants, 2226 windows, curd 5564 hearths.

Royalty in the strazo. - The fillowing comical ar. vicle from as London paper of Junuary 29, is well worth a record, for it will afford many a laugh to our readers -
"We lave the happiness to announce that her royal hishness the dutcliess of Cumberland is safely bruught to bed. Vesterday moming early her royal highness was unwell, and between nine and ien "'cliock she was taken in labor; orders were giv. enfor issuing the summonses which had been in readiuess for several days to the archbishop of Canter. bury, the bishop of london, the lord chancellor, and the rest of the cabinet ministers, who all attended. Her royal lighness was brought to bed soon after their arriva!, which was about one o'clock The child was still-bovn.

In a sliort time afterwards the following bulletin Was issued:-
"St. James' Monday, Jan: 27.
"Her royal highness the dutchess of Cumberland was delivered at one o'clock this day, of a still-born female child, and is as well as can be expected.
"H. HALFORD.
"C. M. CLARKE."
Col. Thornton waited upon the prince regent to inform him of the event. Messengers were sent off to the queen at Windsor, the princess Charlotte at Claremont, the dutchess of Gloucester, and the other branches of the royal family; also the dutch. ess's family abruad."
os The debates in the British parliament had alrearly assumed uncommon inportance-the state of the country was freely discussed and exposed. Petitions for reform were pouring in at a great rate. On the reply to the address of the prince regent which, according to custorn, is a mere echo-the votes for it were 264, against it 112 , which shews the majority of the ministers.

\section*{IMPERBAL PARLAMAENT. \\ hours of coans.}

I'uesday, Junurry 28, 1817.-This being the day appointed by the prince regent for the mecting of both houses of parliament, his royal highness came down in state, and entered the liouse of peers at two o'clock. Hs royal highness was attended by all the great officers of state; the earll of Liverponl carried the sword of state on his royal highmess's rifht liand, and the marguis of Wincliester carried slie crown on a cuslion on lis left.

In a lew minutes after the regent land taken his seat oll the throne, the commons having been sun noned by the ushicr of the black roil, appeared at the bar of the honse of peers, with their speak. er at their licad, when his royal hishmess delivered so buth houses of partiament the fo!lowing speech: - Vy lards and gevide nen,

It is with devp reoset iliat \(t\) am akuin ubliged to announce to you, thont wo alterasion has necurred in the state uf tis majesty's lamentable indisporsition.

I continue to reccive fions foreign powers the 3frong gest a alspalice of thicir friendly disponition tu. wards this country; and of their earnest desure to Anatitain the general toanyuility.

Cise Instilities to which I was compelleal to re of, in badication of ilic homur of Uic cuuntry
ascianst the goverument of Algiers, have been atr tended with the inos complete success.

The splendid uchievement of his majesty's fleet in conjunction with a squadron of the king of the Netiverlands, nuder t'ie gallant and able conduct of acimiral visconmt Fixmonth, led to the immediate and uncondicional liberation of all clıristian captives, then within the erriury of Algiers, and to the renumciation by its goverament of the practice of christian slavery.

I am persuarled that you will be duly sensible of the inportance of an arrangenient so interesting to hunanity, and reflecting, from the manner in which it was accomplished, such signal honor on the British nation.

In India, the refisal of the government of Nepaul to ratify a treaty of peace which had been signed by its plenipolentiaries, occasioned a renewal of military operations.

The judicious arrangements of the governorgeneral, seconded by the hravery and perseverance of his inajesty"s forces and those of the Fast India company, brought the campaign to a speedy and successful issue; and peace has been finally established upon the just, the honurable terms of the original treaty.

Gentlemen of the house of commons,
I have directed the estimates of the current year to be laid before you.

They lave been formed upon a full consideration of all the present circumstances of the country. with an anxious desire to make every reduction in our establishments which the safety of the empire and sound policy allow.

I recommend the state of the pulic income and expenditure to your early and serious attention.

I regret to be under the necessity of informing: you, that there has been a deficiency in the produce of the revenue of the last year; but I trust that it is to be ascribed to temporary causes; and I have. the consolation to believe, that you will find it practicable to provide for the public service of the year, without making any addition to the burthens of the people, and without adopting any measure injurious to that system by which the public credit of ihe country has been hitherto sustained.

My lords and gentlemen,
I have the satisfaction to inform yon, that the arrangements which were made in the last sessiou of parliament, with a view to a new silver coinage, have been completed with unprecedented expedition.

I have given directions for the inmediate issue of the new coin, and I trust that this measure will be productive of consilerable advantages in the trade and internal transactions of the country.

The distresses consequent upon the termination of a war of such unusual extent and duration, have been felt with greater or less severity, throughout all the nations of Europe; and have bcen consider. ably agitravated by the unfalurabic state of the season.

Deeply as I lament the pressure of these evi!s upon this country, I an sensible that they are of and curc not to adinit of an inumcdiate remed!: but Whilst I ohserve with pectular satisfaction tise fut. titude with which so many privations have been borne, and the active bonevolence which has been employed to initigate thein, I am persuaded that the freat sources of our uational prosperity are es. sentially unimpaired; and I cutertain a cuifident expectation that the native energy of the cosuntry will. at no distant period, surinoust all difliculties in which we are involyed.

In considering our internal situation, you wilh, I doubt not, foel a just indignation at the attempts which have been made to take advantage of the distresses of the country, for the purpose of exciting a spirit of sedition and violence.

I am too well convinced of the loyalty and sense of the great body of his majesty's subjects, to believe them capable of being perverted by the arts which are employed to seduce them; but 1 am determined to omit no precautions for counteracting the designs of the disaffected: And I rely with the utmost confidence on your cordial support and cooperation, in upholding a system of law and government, from which we have derived inestimable advantages, whioh has enabled us to conclude with anexampled glory, a contest whereon depended the best interests of mankind, and which has been hitherto felt by ourselves, as it is acknowledged by other nations, to be the most perfect that has ever fallen to the lot of any people.
hoese of cemnons-janualive 28.
While the house was debating about a motion for an address to the regent on his most gracious speech -

Two messengers from the lords appeared at the bar, with a communication; being adinitted to the table-they stated, that they were commanded by their lordships, to desire a present conference with this house, in the painted chamber, on a subject materially affecting the safety of his royal highness the prince regent, and the honor and dig. nity of parliament; and was directed to inform the house, that in the absence of the usual messengers, the clerk assistant, and reading clerk, were depu. ted to convey the message.

The chancellor of the exchequer moved, "that the house do acquiesce in the message sent by the lords." -This motion was unanimously agreed to

The speaker then said, that as the house had agreed to the message requesting a conference, it would be proper to name their messengers.

The following members were accordingly deputed: the chancellor of the exchequer, Mr. Canning, Mr. Ponsonby, Mr. Tierney, sir S. Romilly, lord Arch Hamilton, lord Lascelles, Mr. Freemantlée, and several others, who repaired to conference. After a short interval they returned to the house, when

The chancellor of the exchequer reported, that the lords had communicated to them that several daring outrages had been committed on the person of his royal highness the prince regent, on his return from parliament this day; that they had agreed upon an address to his royal highness; and requested the concurrence of the commons house in the same. The lords had likewise informed them, that they had received the evidence of a witness, the right hon. James Murry.

The chancellor of the exchequer then moved, that the further consideration of the debate on the address should be adjourned till tomorrow.

This being agreed to, the right hon. gentleman moved, that the message of the lords be now taken into consideration, and that lord James Murry be called in and examined as to the fact stated in the address.

Lord J. Murry was then called to the bar, and in answer to certain questions put to them by the chancellor of the exchequer, Mr. Curwen, Mr. Wayne, and some other members stated, that he is a lord of the bedchamber to the prince regent, and was in attendance on his royal highness in the car. riage on their passage from the house of lords; on their return between Carlton house and St. James', the glass of the carriage was fractured; it was the
glass on the prince's left hand. The fracture appeared to be produced by two bullets, for round apertures had been made in the glass, and the remainder of it was unt broken, \(h \in\) had not the slightest doubt that the fracture was caused by bullets. About a minute after this happened a very large stone was thrown at the ather glass, and then three or four other stones with great violence; he had examined the first glass that was broken minutely; there was no crowd near the carriage at the time; but if a pistol had been fired with gunpowder, the person firing it, he thinks must have been recogrized; he supposes, as no report was heard by him, they came from an air gun. There was no bullets found in the carriage; he supposes they were shot from some one of the trees; the opposite glass was up, it was not broke at all; he got out of the carriage immediately after the prince regent, did not search the carriage; nor did he know whether any bullets were found at the bottom of it. The master of the horse was in the carriage; splinters of the glass were found; the stone which struck the opposite glass did not enter the carriage, the glass was very thick.

In answer to a question from lord Milon, the witness said, that his royal highness sat in the middle, between the master of the lorse and the witness.The stone smashed the window and pounded the glass which was remarkable thick. There was a footman and a life guards man by the side of the carriage. He could not say whether the supposed bullets perforated any part of the carriage.

The witness having withdrawn, Mr. Vansittart conceived that no further information could be necessary, after the testimony they had just heards to induce the house to concur in the address-llear Hear! He therefore moved that the address be read.

The address was then read, to the following effect; "We your royal highness' dutiful and lnyal subjects, the commons house of parliament, beg leave humbly to express our abhorence of the outrage offered this day to the person of your royal highness, and regret that there should be found a person in these dominions capable of committing so daring and flagitious an act. It is the earnest wishes of your faithful commons in which they must be joined by all descriptions of faithful subjects that your royal highness would be pleased to direct such measures to be taken, as should lead to the apprehension of the authors and abettors of the outrage."
The address was then agreed to nem. con
Mr. Vansittart gave notice that he should to-morrow move for a vote of thanks to lord Moira, for his conduct in India; and on Monday to lord viscount Exmouth, for his gallant conduct at Algiers.

Sir F. Burdett gave notice, that he should on this day month subinit a motion on the subject of reform in parliament.

January 29.-Lord Sidmouth presented a message to the house from the prince regent.

The message was read by the lord chancellor, and was as follows:-
"His royal highness the prince regent, acting in the name and on the behalf of his majesty, lias thought proper to order to be laid before the honse of lords, papers containing an account of, certain meetings and combinations held in different parts of the country, tending to the disturbance of the public tranquility, the alienation of the affections of the people from lig majesty's person and government, and to the overthrow of the whole frame and system of the lazo and constitution; and his royal highness recommends these papers to the immediate and serious consideration of the house.

His lordship moved that the prince regent's most
gracious message be taken into consicleration tomorrow; and stated that he should then present the papers alluded to in the message, which be should move to refer, 0 a secret committee-Or. dered.

F'ebruary 4.-The order being read for taking into consideration the message of his royal higliness the prince regent, on the state of the country, the message was accordingly read.

Lord Castlereagh, in rising on the present occasion to submit a motion tu the house, was happy to think that the proposition he had to offer to night, was one on whic! ! fe could n't apprehend the slight. est difference of op nion would exist, as it merely went to ackuowicd; e the receipt of the prince re. gent's mos'gracious message, and to assure his royal highness tbat the horse would take into its mnst serious consideration the papers be had order. ed to be communicated to them, withont delay. W latever the situation of ilangs might be at pre. sent, uothing conkl be further from his wish, than \(t 0\) say one worl that might on this recasion, learl to a debate on the present state of the country, as the very nature of the conmunication which lad been made indicated secrecy to be desirable, as the luruse were not yet in possession of what mi. nisters co:sid roorl to be necessary to give them a proper kniswledjre of the present state of the coun. try. It would cause greal embarrassment to him, and to the horise itself, were this subject now to be entered upon. All he should at present request of thein was, thit they would keep their minds free and unembarrassed that they might then act as slould be necessary on the report of the committee. There was only one other point on which he would offer a single word. He-thought it necessary to oppose the idea winich had got abroad that this communication arose out of the late atrocious attack on the person of the prince regent, on which he was sure but one opinion could be entertained by every member of that house and by every friend to the British constitution. He begged distincily to state that the present proceedin!rs did not arise in any shape out of that outrage. The communication which had been maile was founded on information which he thought it would be felt tixat the govemment, without abandoning their duty to the country and to the constitution, could not but adrise his royal highness to submit to the louse. Having said this much, lie finped it would be most consonant with the feelings of the house not to enter upon the views which any genileman might take of the present situation of the country, from the information which they already possested. He hoped they would keep their minds free and unbiassed, that they might act on the information which the prince regent had ciaus. ed to be communicated as circumstances mightrequire. He concluded by moving-
"That an humble address be presented to his myal highness the prince regent, to return his royal highness the thanks of this hoase fur his inust gra. cious message, ant to sesure his royal highiness, that this house will proceed to take the information lainl by lis royal higliness' command before this houst, into its innediate and most serivus consi. deration."

Mr. l'onsonby professed his unwillingmess to make the slightest objection to the address unw proposed, but begged to ask the noble lord what course his majesiys govermit ent meant to pursue In consequence of the address.

Loral Castlereagh sjogice in so low a tone of poice that we could not distincily collect what he suid, but si wre cudcratoo! Linn, he answered dibi it vus
proposed to follow the precedent of 1795 . (Hear,
hear)
The question on the address was then pitt aris carried-nem. con.

Lord Catlereagh then moved successively. 1. That the papers containing the communicatinn from the crown be referred to a commitee. 2. That this committee be secret. 3. That it consist of 21 members. 4. That it be chosen by ballnt. 5. That the members of the house prepare a list of 21 , to \(n\) it into a class to compose said committee. 6. That the papers remain on the table as they are, till the said committee be chosen. All which motions were agreed 10.

11 The debate on the regent's address in the house of lords, equally s!ews the agitation of the g.vernment at the alarming state of the conntry. The deficiency of the revenue is twenty millions sterling, or about 81 millions of dollars fiss the list year; and the iciea of a retrenchment, to cover this sum. is spoken of as an absurdity. The taxes already levied cannot be collected, and there seems no resnilre from new requisitions-the deficit will probably be met for the moment by further isatues of excliequer bills. One of the lurds said, "the calanities of the country had now come to that heichit, that no vain and idle hyperboles could concéal ca. lamities which threatened to overwhelm the cot.ntry. This was no common necasion, in which they used to bandy compliments with the crown, or to rejoice with it on the trimmph of our arms." Lord Sidmouth said, "He had concurred with his crl. leagues in recommending reduction, although he knew that the military establishment at home was necessctry for the support of the civil power, and although he knew that they had aggtravated the general distress by the reductions which had already taken place."

OJIn the remarks on the regent's messase, lnrd Sidmouth said, that that message had no connection with the late attack upon the person of the regent -if that outrage had not been committed, ininis!ers would equally have felt it their duty in bring the subject before parliament. From what lorl fiver. pool said, some strong mensures are contemplated to keep down the people-the ordinary laws a?pearing inefticient for the purpose. The message was refer. red to a secret committee of eleven lords, closen by ballot.

If these combinations are as extensive as they are intimated to be, who shall calculate their conserjuences? But ma!! not the zehole be a mere puse de guerre of the ministers-a plot 10 divert t'se probile
from the great object of ohtuining a refurm of prorthement? But, in cillier cive, we arc presented willd a dreadful view of things.

Laseat from Englamul.
Another vessel has arrived at New- Yonk which left liverposel on the 17 tho of February; b.ut brought no papers later than of the 12 th . They don nut firm. nish us with any thing important-ihey are filled with elebates in parliament about reform, \&*

Another mectumg had been held at Si,... tields, which broke up peaceably-all the troop at the west end of the town gave their attembne e The state of sociely seems very unsettled ahe! uncasy.

It is intimatel that the prince ragent wi!l surrender one-fifth of his income, as connected with his personal services, estimated at e50,000; and minis. ters, it is said, lave sliewn an intention to fullow lars example:

The following is the adriress of the eity uf Iano don on the escape of the prince regrut -it wi l pire bably be follow e I by many of a similar cliaractor:

6To his royal highnese the binure of IEales, reaent \(f\)
the united hingelom of Great Britain and Irrlund. "The humble and dutiful address of the lord mayor and aldermen of the city of Loindon:
- 'MIAy it please your royal hiziness,
"We, the lord mayor and aldermen of the sity of London, beg leave to approach youp royal \}ighuess with profound sentiments of luty and reepect, to express nur lurror and indiguation at the most daving and thatitious outrage nfiered to jom soyal person at the moment of your re'urn from the hou ie of parliament, on the occasion of your royal highness exercising the sacred duties of the crown, and fulfilling, in the name and on the behalf of lis majesty, the very important function of one of the estates of the realm.
"With the deepest concern we have to deplore that any one should be found within his majesty's dominions capable of violence so atrocions, so dis graceful to human nature, so foreign to the \(13-i+i s h\) character, and we most fervently hope, that the loyalty of the subjects of the united empire will manifest itself to prevent a reperition of an attempt so base against the sacred person of your royal highness. We beg permission to add, that nothing sitall be wanting on our part, as magistrates of the metropolis of the empire, to promote on all occasions the general tranquility, and to evince our steady loyalty and attachment to y ur royal honse and person, and our determination to support the crown and dignity of these realms.
"Signed, by order of the court,
"Henry Woodrhorpe."
To which his royal highness was pleased to return the following most gracious answer:
"I thank you for this loyal and dutiful address. It is highly satisfactory for me to receive, upon this oceasion, and at the present conjuncture, the asQurances of your steady attachment to me and my family, and of your determination to promote obedience to the laws, and to afford a firm support to the crown and the prerogatives which are inseparably connected with the liberties and best interests of the people."

The merchants, bankers and traders of London, have likewise come forward, and subscribed to very boyal resnlutions.

Lundon, Feb. 8.-Price of stucks this day at 12 -'Arick.

Reduced 65 7-8 66-Cons. mo. 65 1.4 3.8-Cons. for acc. 65 3 8 1-2.

4 per cent. 85 1-4 7-8-5 per cent. navy 975.8 3-4.

Exchequer bills, 15s. 17s. pr.-India bonds, 31s. 32s. pre.

Lurd Castlereagh last night brought forward a statement of our naval and nilitary establishments, ond the reductions that have already taken place and are in progress in these sources of expence; and moved for the appointment of a committee to enquile into the public income and expenditures for the year 1817.

The army, in 1816, was 149,445 men; in 1817, it is 123,702 -rechuction 25,743. The expence last ycar, exclusively of ordinance, was \(£ 10,56 \cdot 4,000-\) this year it is \(\mathfrak{E} 9,280,000\). The nrlinance last year cost \(£ 1,696,000\)-this year it is \(£ 1,246,000\). Total saving on army, \(£ 1,784,000\).
Navy, la3t year, 33,000 men; this year 19,000reduction, 14,000 . It cost for last year \(10,114,000 \mathrm{l}\). this year it will be \(6,397,0001\) - -saving 3,717,000l.

Miscellanenus services in \(1816, £ 2,500,000\); ditto this year, \(£ 1,500,000\)-saving \(£ 1,000,000\).
aecapitelation.
trmy saving
\&1,784,000
Navy ditto.
3,717,000
Miseellancous
1,000;000

> Total saving, \(\mathfrak{£} 6,501,000\) ouppı.

Army
£7,050,000
Commissariat and barracks, Great Britain 580,000
Dittn,
ditto, lreland
310.000

Extraordinaries . . . . 1,300,000
Orduance . . . . . . 1,246.000
Navy . 6,397,000
Miscellaneous, Great Britain and Ireland \(1,500,000\)
£18:373,000
Thus it appears that the armv has been reduced about one-sixth - the navy almonst one haif. The expences for this year exceed eighteen millions; and, lamentable to tell, the comitry camot coment on half the amount of permanent revenue, after paying the interest on our debt!
puance.
The prices of grain in F'rance have generally declined, Bur there was a great sedition at Bor, eaux, where the people opposed the embarkation of corn destined for the other departments. The military were called in, who fired unon the people, and killed several of them on the spot.

The royal guards being required to quell a riot at Rouen, the national guards interposed themselves between the former and the people. The Swiss guards then reinforced the royal guards, but the national guards, supported by the people, were too strong for the allied forces; who were defeated with oome loss. After their defeat, the national guard exerted themselves, and with success, to protect the discomfited royalists from the fury of the populace. In France, as in England, the public funds are inadequate to the expences, and the laboring classes want employment.

The French loyal newspapers express great indignation at the late assault upon the prince regent of England-which they say is calculated "to excite the indignation of all Europeans attached to the cause of justice and legitimacy."
netherlanus.
The price of corn is exceedingly complained of. A Brussels article gives the estimate of the ninister of finance for 1817. The income is calculated at \(73,700,000\) florins [ a florin is about 1 s .8 d . sterling? and the expences at \(73,400,000\) florins.
"spanish amemica"
The defeat of the royalists by Bolivar, near Bans celona, noticed in our paper of the 29 th ult. see page 73 , appeurs amply contirmed. The chief battle lasted a whole day-he was five times furiously attacked by the royalists, 4,000 strong, under Mcrillo, assisted by all the Spanish naval force on the station-this happened on the 16th of February; on the 17 th Bolivar attacked the royalists, sword in hand, and defeated them with great alaughter. His success had considerably strengthened his force.

Petion has lately seized several of the patrint privateers and their prizes, at Port au Prince. It is thought that "he wants money and must liave it." But a large privateer commanded by capt, Champlin, being ordered to be seized, the inen were called to quarters, and Petion's officers refused an entry into their vessel.

Capt. Douglass, of the British brig Elizabeth, who arri:ed at New York on the 7 th instant, in 63 days from Buenos Ayres, informs, that the Portuguese expedition had taken Monte Video, with very
little fighting. He alse states that the troops of Buenos Ayres, comprising an army of 6000 men, had marched for the province of Chilito induce or compel the people of that province to unite in the common carse against the Portuguese. In case of the innion of the troops of Chili with those of Buenns Ayres, no doub: was entertained of their success. Four Portuguese brigs, laden with tallow and hides, bad been seized by the government of Buenos Ayres.
british AyERICA.
At a late session of the court of king's bench, at Montreal, bills of indictment, with several counts, were found against D. Cameron and others of the North West company. The zar between this company and the Hudson Bay company has not yet terminated.

\section*{IIATII.}

A large order has been received at Bielefield, in Westplialia, famous for its linen and damask manufactures, of king INenry of Jiayti. The arms of the sable monarch are to appear on the table linen, with the motto, "God, my cause, and my sword." Large orders of jewelry, \&c. for the queen, have been exocuted at Hamburg and Bremen; and if splendor and magnificence constitutes the attributes by which royalty is distinguished, king Henry seems to have as good a claim to the rank he has assumed as any of his brother sovereigns on this side of the At Pantic.

London T'raveller.

\section*{Battle of Waterloo.}

The following is given in the public papers as an ex tract from a volume just published at New. York, entitled, "Letters on the revolution in France," by a French general officer. It details some circumstances of great importance in considering the merits of the famous battle of Waterloo-which, it was always our opinion, was rather by the purse than the surord.
"I'revious to the 13 th of June, the French army ball been recruited with the greatest celerity and secrecy behind the forest of Fagne, between the Sambre and the Steuse, without the enemy being apprised of it. Blucher and Wellington thought that the emperor designed to begin bis operations between the Sclieldt and the Sambre: Wellington even believed that Napoleon would not act on the - ffensive.

But on the night of the 13th, Monsieur l.e Comte de llomrmiont, col. Clouct, formerly aid de camp to marshal Xey, colonel Gordon, and the secretary of Mr. Avbernon, commissary ordonnateur deserted to the l'rusainls: Adrim, major to the imperial guards, also deseried, whon had been bribed at l'aris by the royalist cominitee.

The irators adriset the Pruasian generals that the Prench artiy was geing to operate on the Uyle.

The emperor's project was not in begin the campaign by regulor operations, but to surprise the Prusian ariny in is eantorments from Charleroi to Liegre and the Finglish army in its contorments form Aons to Brusseis.

The enemies being put upon their gtard at all points, and having been thus enabled io urite two seatered armice, the Prosstans and the Roglith nore than double in ybuthors to the l'tench, the shie mol but litgrestions of is proleon were marle ahontive tirough the treas m of liourmont, Clotut. fiordont, \&ec.

Phenaperor had chonemf his ẹrat mivinent bolutat tie forest of f'she the very same day that tienttehess of Cumbertan I was 10 give a ball to the afficers of the staff of the firg lisharmy at Brubsels.

Hat it had not been for the treason of Bourmone. \&c. the Irussian knd English armies would have been surprised in their castosmests; they would have been beaten in detail, and no general battlo could have taken place. The spirit and opinions of the lielgians and of the department of the Rhine are well known; they would have risen in favor of the Frencli; Austria was then lukewarm in the coalin tion, and would have secedel from it. Mark the consequences to the French and the rest of Eu. rope.-

Bourmont was formerly a Chouan chief, for whom marshal G-ouchy had obtained the pardon of Napoleon, when first consul. The emperor had made him a general of brigade; he stuck to his cause until his first abdication, then was made lientenant-general by La Proege, and commanded in Franche Comte under marshal Ney, governor of that province. When the emperor returned from Eliba, the marshal being sent by the king to Franche Comte, Bourmont, as well as the marshal, abandoned the royal cause, when they saw how irresistible was the tide of opinion in the country in favor of Napoleon. Hence he affected the greatest zeal for Napoleon. He hastened to Paris to paj him his court, and from the 28 th or 29 th of March he was to be seen alminst every day at the emperor's levee who nerertheless was very reluctant io trust him with a oommand. However, through the interest and solicitations of general Girard and Labarlore, whose doors he besieged every morning, and to whom he engrged this word of honor, he obtained the command of a division. When Napoleon heard of his defection, so fatal to him and 'o France, lie told general Girard, "Well my dear Girucd, his is a death war between the blues and the whites," [the republicans and the royalists.] Happy would it have been for France had he been conscious of that truth before, and had he acted accordingly towards that cowardly and treacherous party !

Here follows a statement of the numerical forces of the French, Prussian and English arnies, such as they were on the \(16 \mathrm{th}, 17 \mathrm{th}\), and 18 th of June. \(\mathrm{O}_{n}\) the 16 th , at the affair of Fleures, in which the French made some hundred Prussian prisoners, the French were,
Under the emperar on the eft sitent he Dyl Men. On the right side under marshal Grouchy \(\quad 36,000\) The Prussians, Saxons, \&c. under Blucher and Bulow

130,000
At the battle of Waterloo, Wellington had,
Under his command, English, Hanoverians,
Hessians, Dutch, \&c.
84,000
And Blincher upwards of
40,000
During that time marshal firnuchy was trying to cross the Dyle at Vabre, and was fighting to effecuate that object with the corps of Bulow. On the \(12 \mathrm{~h}_{\mathrm{h}}\) or 1 Sj of June, the emperor had appointed marshal Groucly commander in chief over the corps of Girarrl, Vandamme, Excelmads and I'jul.
Orrlers had been sent at nonn to marshal Grouchy to inake his junction with the emperor; but the of. fiecer sent to carry that order deserted to the ene. iIy.

Tlu, ;ou *ee, my dear sir, that it was neither Wellingion now Blichar who gained the batele of Watel lox, but Gncianau, chicf of the general staft of the Pruwiallatmy. It was he who nrilered gence ral thulow, whilst fighting with marshal Cisouchy, in detact the greatest part uf his forem in the evenisg, to support Bluclice. At \(40^{\circ} \mathrm{c}\) lock evety thing amouruced the battle way gaiset by the

French, notwithstanding marshal Ney refused twice obeying the emperor's order, not from any bad motive, but because he could not be persualed in change a position in which he had been, for some hou's beating the enemy to atoms.

When a fair and liberal accoumt of that celebrated battle shall be given by Prussian and French military men of candor and abilities, and of the events which preceded it, it will be seen, that never has Napoleon's military genius shone in brighter lustre and that his defeat is owing principally to the treason of Boummont and others-a new kind of disgrace the French name owes to the return of the Bourbons to France. Some commanders, too, made futul blunders; and let them not apologize at the expence of Napolenn-of Napoleon, who loarled them with favors and dignities. Foriune or treason may oppress a great man, but incorruptible histo:y is always there to preserve his glory inviolable.

Having handled rather roughly the author of Paul's letters, candor obliges me to declare, that 1 have learned lately, from unquestionable authority, that his account of the battle of Waterloo is fair and correct, as far as relates to the dispositions and execution of the English commander in chief.

If marshal Wellington did not exhibit great mi litary foresight in thinking thet Napoleon would not act on the offensive, the French generals who have had an opportunity of observing his conduct during the battle, do him the justice to say, that from the beginning to the end of the battle of the 18 th , or of Waterloo, he displayed a great ability and wisdum in the manner he disposed of the divers corps untler! !is command.

But I will repeat it, had it not been for Bourmont and Co's treason, the emperor would have cut and destroyed the Prussian and English forces in their cuntonments before they could have time to assem. ble and unite.

These are the only authentic documents I can, for the present, communicate to you on that catastrophe.
\(I \mathrm{am}\), dear sir, yours, \&c."

\section*{Arts, sciences and improvements.}

Inniasa. - We are glad to find, by an advertisement in a Chilicothe paper, that Mir. Samuel \(\mathbf{H i l}\) Liams, of that place, has completed his map of the state of Indiana. From a knowledge of Mr. Williums, (to whom, more than to agy other man, the readers of the Veekli Register have been indebted for correct information fiom the western country) we renture to say, that in the execution of this work all that could be cexpected from faithful industry, aided by a discriminating and intelligent mind, will be realized. He has had many and the best opportunities to accomplish this work; and which, we have no doubt, have been improved to their utmost extent.
-Ver Jersey Canal.-A canal, the object of which is to connect the waters of the Delaware with those of the Raritan, passing through the state of New Jerscy, appear's to be seriously contemplated. By a very able and well digested report of three commissioners, appointed by the legislature upon this subject, the question is very fairly stated to the public. The various old projected plans are abansloned as impracucable. The distance from the hanks of the Delaware, or Croswick's creek to Longhridge farm, and thence to the banks of the Raritan, between New Brunswick and Washington, is about 29 miles, and the canal can be constincted upor a dead lerel, without the necessity of a lock. The
ronte will not deviate two miles to the N. W or S. E. of a straight line, and the only assent or descent, which, is about 1.56 feet, is on the banks of the river between the tide waters and the canal. The estimated cost is 836,824 dollary, and the two important items of expeuditure are, first, for 29 miles 418,528 dollars; and, second, the amount of locks 1250 dollar's per foot, 170,000 dollars.

Iron parement.-The experiment of paving London str e s wih iron, has been tried on the sonth side of Black friars B:idre, and has so far succeeded hat we learn it is intended to pare some strects in the city in this manner, under the auspicce of the lord mayor. It is computed that an iron pavement, wel adjusted will endure for twenty years in a great thorough fare; whereas it is too well known that a stone pavement requires repairs and re-adjusting two or three times a year, and reneving every three or four years. The pieces laid down in Blackfriar's road resemble a batch of eight or nine rolls as taken from the oven. During maly weeks, under every kind of load and the rougbest usage, the firmness of this mass lias been undisturbed, and no doubt remains of the success of this experiment.- Repercory of trts, NHanufactures and Agricalture.

Expeditious painting.-Paris, among other novelties, has litely boasted of a mosi expeditions painter. The rapidity of his pencil is really astonishing He paints a portrait in water colors in rwo hoursgive him three hours he will finish one in oils. He will complete a profice in a quarter of an hour, and a slight sketch in a minute. He can finish a pic'ure of two or three feet in two days. The ladies of fashion visit him with their fanilies at ten in the moming, and carry with thern to dinner finished likenes-ses.-Juurnal des Dames.

\section*{Legislature of Suuth Carolina.}

\section*{Fellozv citizens of the senate,} and of the house of representutives:
I regret much that it has, so soon, become necescessary to call you from your donestic retreats, at a time when your attention to agriculture and civil pursuits is so interesting and important to the siate and to yourselves. I have no doubt however, that you will cheerfully submit to personal inconvenience, if your attendance can be made conducive to the public good.

At the last session of the legislature, "A bill to alter the 3 d section of the tenth article of the contitution of the state of Suntl' Carolina," was passed agreeably to the constitution, and ratified on the 19th December, 1816. There was also an act entitled, "An act to provide a more expeditions mode for disposing of the causes on the dockets of the constitutional courts at Charleston and Columbia," passed and ratified on the same day, viz, on the 19th December, 1816. This act, making provision for the sittings of the conslitutional court at Charleston and Columbis, a najorily of the judges of the courts of sessions and of common pleas has adjuiged to be unconstitutional, and that therefore they had no power to hold that court.

This being the only court heretofore provided by our costitution or laws, before which, motions for new trial, or in arrest ofe judgement could be brought up from our courts of scasions or common pleas, we are by this decision of the judses, deprived of a court indispensible in the steady ardministration of justice. To restore this link in the system of our jurisprudence, there is no poiver adequate but that of the legislature. - It is therefore
that I have thought proper to convene the legisla.
ture, that there may be neither delay nor denial of plague itself, so they could procure abundance of
justice. To this subject, which is of great importance, your early a tention is invited at this time.

I will further ask your indulgence, in submitting for your consideration one other subject \(y\) hich, if neglected, until the constitutional meeting of the legislalure, will be too late for your interposition. At your last session, an act was passed to confirm the treaty between the state of South.Carolina and the Cherokee Inclians, and providing for the survey of the lands ceded by the Cherokees to this state. This act reguires that all the lands so ceded, shall be surveyed and plated off into tracts not less than 10 nor more than 500 acres. I would beg leave to subinit whether the law slould not be so altered as to req'ire the commissiouers to survey into tracts only such parts of the ceded territory as will be fit for cuitivation, and which alone rill indemnify the state for the survey. It is well known that a rery great proportion of this accession, consists of barren, rugged, and almost inaccessible mountains, which will ouly attract the attemtion of the wander. ing herdsman or shepherd. The survey of these mountains will require much time, and cost much money to the state, which wilt never be refunded from the saie of them. If the whole territory be lail out into iracts according to the provision of the exioting law, it is probable the sums arising from the sales will not reimburse the expenditure.

At the time when it was thought expedient to onnvene the legislature, it was believed that it would be necessary to recommend an appropriation, authorising the comptroller to pay into the treasury of the general government, our quota of the direct tax which bad been imposed by congress for the last year, and which it was believed would be again imposed for this year. - The national legislaiure has, however, not thought proper to re-enact the law imposing the direct tax.

Although our civil and religious privileges, as a people, demand our most devout acknowledgments to twe Author of all good; yet we should be humbled by his chastening hand, which is felt in the unusual scarcity which prevails in most parts of our country. This scarcity proceeds, not only from the unpropitious seasons of the last year, but from our grater attention to the productions of our coun. iry which procure us wealth than to those which are intrinsically valuable. We should profit by our experience and devote ourselves more to those purouts which will promote our present comforts and fulure welfare, looking unto Him who is the attior of every good and perfect gift for the bless. Alle

Coluunbia, . March 25, 1817.

\section*{A pleasant little story.}

\section*{A L.ADY WITI DE.」TH'S HEAD.}

An end is put to the enjema which has so long excited public curiosity. The young lady with denth's head in distinguished forever: but before we relate the happy and singular denotement of thin anast extrawdinary arlventure, we shall describe a few of the persons who aspired to the homore of lier lowd. They ralculate among her lovers 5.67 reform. el rakes, and 155 ruined gamesters. She received twenty fire or thirty letters from Helgium, (not pont puil) writlew by certuin well kitww charncters, who said they never would revolt, thmithth she should prove to be the zuost hideoun object in the world. they were dimpused to fatler, carens and wet the
plague itself, so they could procure abundance of
gold; all their letters remained unanswered, but the generous girl ordere \(d\) her servant to return thanks to a few poor devils who had solicited her hand in a gillant style. We were perinitted to tako a copy of the following:-
"Miss,-Report has doubtless painted you less handsome than you are, at least none will refuse to admit that your physingnomy is expressive. I should have had the honor of presenting inyself before you, and of declaring my passion, had not pitiless credi:ors detained nie in the conciergerie. I must beg you will have the goodness to pay me a visit to receive the proposition I am so anxious to make.Though you may have sliewn a little of the coquette, to set yourself off to the best advantage, that is not the fault of nature; consequently, it can frake no difference in my intentions-No aspect can be more hicleous in the eyes of a prisoner, than his prisonBring me liberty, and you will appear charming indeed! If you should favor me with a visit, you will see 2 young man, 25 years of age, who has, among other advantages, that of a tolerable person, with a mind proper to meet wordly success. He has, moreover the honor to declare to you his most arrlent vows.

FOLLEVILLE:."
"P. S.-Be so good as to request the gaoler of the Conciergerie to lend his parlor for our interview."

The mind of the yonng lauly did not tend to a union in pursuance of the above invitations, but her heart was not insenoible. She desired to find in France a husband to answer one she had drawn in her mind. In the brilliant society she attended cosstantly in a mask of wax: she distinguished a young man of moble and interesting countenance. whose mind had been well cultivated. He had a fortune which placed him above interested view's. The young man, on his part, was clarmed with the graces and delicate sentiments which the young lady with invisible features displayed in lier conversation. In short, he declared, that all his happiness depended on a union. She did not deny the impression lie had made on her heart nor conceal the pleasure she would feel in acceding to his proposal, but she expressed to him, at the same time, the dread that he would repent on beholding her face, which she described to be that of death in its most terrific form. She urged him to beware of rasluness, and consider well, whether he could bear the wretched disappointment he might incur. "Well, well!" said the young man, in a tone of penetration, "accept imy hand, and never unmask to any but the eyes of your husband." "I consent;" replied she, "but remember, hat I shall not survive the appearance of affright and di-gust, and perhaps contompht, yous inay feel after marriage." "I will not shrink from the proof; it is your heart, and not your figure I love." "In cight days," sxid the laty, "you shall the satisfied." They preparel for the marriage, and, notwithstanding the refusal of the generous young man to accept a million in bank hills, she setlled all her property on him. "If you have not courage enough to suffer," said she, "fore your compauion, I sliall, at least, be consolech by the reflection that I have enriched him I love, and he will perhaps drop a tear to noy memory." Returning from the altar ahe threw herself nin her knees belite her spouso. and placed her hand upon her misk-What a situ. ation for the lusband! Ilis heart palpitated; his f.ce turned pale-the mask fell-he betrild an anç of beauty! She then erelaimed affectionately"You have not cieverv ed deformity; ?ont merit the Inve ~f beanty"

The happy couple left Paris the day before yes. serday for Livonia, where the imınense property of the lady is sitmied. There will be no more talk at Paris respecting the lady with death's head.
[ \(\dot{G}:\) zette de France Jun. 6.

\section*{CIIRUNICLE.}

Mr. Marlison left Washington City on the 6th inst. for is seat in Virginia-a private citizen; "deposed" 'in, the oflice of president of the United States by a vontray retivement fromit.

Col. . Ippiang, distinguished for his gallantry in the late war, recently died at Fort Montgomery, in the Missivipppi erritory.

Sinceturive vew.-Jonathan Russell, (to use a yank ee phixse) lately "doublec'" with a Miss Smith. The approaching nuptials were thus announced in the lbuston Cientriel: - "' is fo:enuon, the hon. Imathan Russell, late mirris er to Sweden, will be married to Miss Lydia Snitsh, clagh er of Baruey Sinith, estq. The nuptials wilt he solemnized in the King's Chapel, by the rev. Dr. Firecruan.

We are told that the "King's chapel was crowded so suc. an excess that great exertions were necessary to prevent injury to the spectators"-and as \(h \cdot i v\) the bridegroom was beclecked with a nuptial favor-as how the coachmen, the horses, and the surriages were ornamented with ribbands \&c.-as hou the penple were fools enough to salute the speciucle-makers with three cheers, to which Mr. R. pulitcly returned a bow, and the like. We have laughed at the gossippings of the Londoners about Churiotte and Coburg; but really this tale about "brother Jouathan" exceeds the whole; for it was not o have been calculated upon The scene exhibited has no part in the character of a republican \(-t\) verican, and we hope never to hear of its repetition in the United States. It has met with due reprchension every where.

True beau'iful and very superior brig, "Cleopatra's Burge," capt. Benjamin Crowninshield, has sailed fromi Salem on a voyage of pieasure, observation and improvement.

\section*{WAR DEPARTMENT,}

Sections of bounty lands.
All persons entitled to military bounty hands for services rendered the United States during the late war, would do well to recollect the notice given from this brauch of the war department, so long siace as the 22 d of August, 1815 , and which has been repeated in the puilic newspapers many times since thitit date, viz:
"A land warrant will not be issuta to an execretor n2r to an administrutor. The government of the United \(S\) ales has not authorised any person to act as an ageat for the purpose of transacting any part of the business relative to the obtainiag military land warrants; whicis will, as ustal, be issued gratis at the war department: nor does it recognize any pretended land office for such purposes, nor any other asency of that nature, in any state of the American union.
"Aurust 22, 1815."
In a dtition to the above, it may be proper to renind applicants of the classes above referred to, that their letters and documents need not be addrest to any individual at the seat of governinent, by name, but simply to "rie secretaby of wab, Wushington cily, IV. C." Their comnunication should contain the address to which the reply orgat to be transmitted.

Chanleston, April 29.-A gentleman of veracitr. Who arrived this morning in the Southern Stage, from st. Augustine, informs us that a new governor is daily expected there, who has power and antthority from the government of Old Spuin, to sell the Florillas to the Americans.

The gentleman alluded to, derived this information from the highest authority at St. Augustine.
03 It is rumored, says the Augusta Chronicle of the 29 th ult. that the governor of Pensacola has requested general Gaines to take possession of that place, in order to secure it against the contemplated attack of the patriots. It is certain that our brave general and the Don have had an intervicw; and there is little doubt but a solicitation of the kind has been made, and received, as it should, a prompt but respectful negative.

The paucity of Ferdinand's resources, and his inability to protect his colonies, appear to be daily manifesting themselves-while the patriots, slowly but sarely advancing, are reconciling their discordant materials, increasing their numerical force, and giving a more bold and respectable tone to the character of the revolution.
division ormers.
Adjit. Gen's. Office, N: Y. March 22.
The following changes in the command of the departments will take place on the first of the ensuing month. Brig. gen. Porter is assigned to the command of the fourth department, and after his arrival therein, will report the place he may select for his head-quarters. Brigadier general Miller is assigned to the second dcpartment. Colonel Mitchill, on being relieved, will wait orders of the general of division, who regrets that circumstances in the regulation of commands have arisen which prevent him, in the assignment to a similar station, from availing himself of the high degree of ability and zeal which the colonel has ever displayed in the command of the fourth department, and in every other while serving under his orders.

By order of major-general Brown,
C. K. GARDNER, Adj. Gen.

Iept. No. 4-A true copy.

\section*{By order, G. DEARBORNE, Adjt.}

Milledgerille, March 25.-Early in this month two or three murders are reported to have been committed on the borders of Cainden county, by the indians. Complaints have been made to the executive of this slate, from time to time, during the last six months, of injury sustained by them from the whites; these murders are more likely to be in retuliation, agreeable to savage custom of seeking pedress. The Seminole indians, we are assured from high authority, have been plundered, and one or two of them murdered, by a banditti (a remnant of the self-stiled patriots) who infest a part of Fiast Florida, adjacent to this state. The atrocities of these miscreants have probably brouglit on our citizens the liorrors of the tomahawk and scalping knife; and a renewal of such scenes may be anticipated, until that nest of thieves shall be broken up. The depredation on the indians being committed in Fast Florida, the perpetrators when they can be idemtified, are not amenable to our laws; and the gover:ior of East Florida either has not the means, or wants the disposition to punish them. A small imlitary force at Trader's hill, would, it is believed, give security to that part of the southern frontier, and our gove:nment we hope will see the propriety of staioning there, such number of troops as will secure the peaceful citizens against violence fiom red or white savages.

\section*{"Modern Antiquities."}

Having eommenced a search formativials to make a bultine of resoiutimary :pircliey, oration and papers, we have thought that inany otd things, atready unticed, can hardly fail of arresting the attention of the cireful observer of the present day, which do not come exactly within the plan of our proposed underiaking: but they shall not, on that account, be lost-having resolved in revive some of them by a republication in this work.

\section*{MARYLAND STATISTICS.}

On the Sth of December 1774, a meeting of depu tics, firm all the counties of the colony of Margland, was hel! at Annapolis, chiefly for the noble purpose of abouting measures to support the proceetlings of the "continental congress"-present 81 gentlemen; Johu IInt, in the chair, John Duckell, clerk.
After passing several patriotic resolutions, the coitvention agreed to recommend to the several counties to'raise the suth of 10,000 l. for public purposes, by subscription, or "such other voluntary tanmer" as might be thought most proper. The apportionmen ' of this sum amongst the coumties at that period, according to their then supposed wealth, erom pared witl their quotas of the United States; tax, as determined by congress in the act levying then wame in 1813, is a statistical curiusity.

The scound columil she e's the sums assessed on the weral countios, by the convention, in 1774, and the ollird the alsessment made by the act of congroes in 1615 .
\begin{tabular}{|c|c|c|}
\hline encertis. & Insessnent in 164. & Assess. ment in 1813. \\
\hline Bt M1iry's & \$600 & 83,950 \\
\hline Elarles. & 8100 & 6,740 \\
\hline Erituert & 366 & 2,410 \\
\hline Priper fieurge's & 833 & 7,690 \\
\hline Anhe Arundle & 866 & 9,810 \\
\hline Mhatirnmery & & 5,110 \\
\hline Fridirick. & 1,333 & 11,170 \\
\hline Windingian & & 7373 \\
\hline - 1 lic hemay . & & 2,210 \\
\hline IL Ifimmre & 933 & 48,670 \\
\hline tlirford & 406 & 5,35 \\
\hline Warcester . . & 5,3 & 4,910 \\
\hline Sumerset. & 53:i & \(5,2.80\) \\
\hline D).ecliequer & 480 & 5,510 \\

\hline
\end{tabular}

The counties printed in Itulic were formed sin ce 1774. Mon!gomery was erected from Inne A rundle and Frederick counties-and Haslington and . Illeghany were taken entirely from livelerick.
Th ascessment made b; congress i. 1813 was very f.r from correct-for while a majority of the counties painl as muchas as 16 cents on the real valuation, one stood as high as 39, and another as low as 5 cents-but we have preferred to put estimate against est Imate, as the best way of arriving at the opmions beld in the periods stated. Worchesier, Charle and St 11, ry's were assensed ton high, and Whishingion, Fredericis wat Monigomery too low, in 1813. The rest were toler bly accura e.

The vasinus coinparisons growing out of this table, every one will make for himself. The rapid rise of lsultimore, however, claims attention. In \(1774, \mathrm{Si}\). Vary's and Caroline, together, were supposed more valuable lı 1813 , Baltimore was es. teemed about eisht limet more valuable than these counties, and was asevessed for more tax than St. Mry.s, Ch iles, CIVert, Prince (ieorge's, Annc Aruinlie, Montgomery and Fielerick, Wich were rated at five imies lier value, by the convention.
The actual valuation of St. Mar's's, Carnline and Baltimore, as cietermined by the board of principal assessors of the United States' direct tax, in 1S14, were as follows:
\begin{tabular}{l} 
St. Mary's . . . \(1,902,122\) \\
\(\begin{array}{l}\text { Caroline . . . } \\
\text { Baltimore }\end{array}, 255,097-3,155,219\) \\
\hline \(1,276,269\)
\end{tabular}
Having a ten-fold increase of value in the latter, compared with the said two councles, in 40 years.

\section*{Life of Fulton.}

Propotalx are isis d at Yew. Yark for publisling by subscmption PIII:I.IFF, OF ROBE:RT FILTON, bi his firient, Twit alader: D. Colden; read befire the Literaty Mall Nrilowphied enciety of tive state nt New Yorl; comprising some accoume of the invention, progress and establishment of stesm boate, of his improvements in the construction and navigation of comals, and nether oljecets of public utility.

The work will be publisbed in an octavo wol. of about 400 pages, embellished with a likenem of Mr. F. from ant original painting-at 250 conts A few copies will be printed on large paper, with prouf impressions of the portrait, at S 1 .

Fixtrict from the addrete to the pubtic.
"So species of literary composition is, perlaps calculated to excite a livelier interest, or to afford more valuable informskin, that the inemuirs of thote distinguishet claracters, wbose superior ta. oents have placed them on the sumbnit of homan life, and whose enliphiened reacarches have tendrd to adorn the character, or to increase the happinesa of matn.
"If the claims of defurtent benefactors on the jus. lice and admmationt of thest in whom liey kave
bequeathel the rich inheritance of their intellectu- ; \(2 l\) treasures, should be estimated in propartion to the ralue an!! ertent of the bencfits they have co:nferre 1 , t!:e neople of these United States have a vast anl sacret debt of gratitude to discharge.
"Few, indeed, are the nations, that in the same space of time, have produce 1 so great a number of beneficent and enlightened men, whose ardent and invariable pursuits through life hare been to advance the interest of useful sciences, and to extend the bo:ardaries of social happiness. If to particularize would not appear incidinus, how justly should ine inscribel on the fairest pillare of the temple of fime, as benefactors of mankind, the names of Iramkin, Rittenlıouse, Rumford, foolfrey, Bivingsso", iFest and Muray; names of which America shonble, and it is hoped ever will be proud.
"Ro this splendid list of eminent an. 1 distinguishcul Imericans, must be addel the name of Robert Fulton; a man who, by the powers of :ative genits and a spirit of adventurbus perseverance, from which no difficulties could deter, nor discouragements dishearten, finally succeeded in bringing to pericction the greatest, hecause the most valuable, invention of modern times; an incention, the im. mense importance of which had secured him, while lioing, a well earned celebrity in both hemispheres, and which will transmit his memory with grateful recollections to the latest posterity. Always oce!!pied with plans of public utility, his fertile genius has achieverl what, before he appeared was considered as equally impracticable to realize as the vision of the en hisistst or the dreams of the Alchymist. By the wonderfin combination of mechanical po wers, this A merican Arrhimedes has constructerl, for the pro:ec ion of his country, a bulwark of defence, more p.werfal than the machines of the -hnothemmici in of SyPacuse."
of The literary and Philosophical society of New-Yo:k, deplori: \({ }^{\text {r }}\) the decease of Mr. Fulton, cut off in the mits of his usefulness, as a national loss, and respecting the memory of so valuable and distinguisheid a member of their institution, selected C. I) Collen, esq. to compile a memoir of his life; which being read to the suciety and highly ap. proved, has been given up, by request, for publi-cation-the proceeds of the work, after defraying expences, are to be appropriated to the erection of a mmument to the hono of the late Mr. F.
aS Suloscripions for the life of Fulton will be received at the office of the Wherey Register.

\section*{The Shakers.}

In page 74 , of the present volume, we published a bill before the legisiaure of New York, respeciing Fumice Crapman and the S'akers, icc.
We have since received a simall panphlet containing an addiess to the legislature of that state, by James Chapman, husband of Eunice, with a similar address from certain persons on behalf of the socicty of shakers, at Watervlict.
Chapman ascribes his separation from his wife to her bad temper, and lescribes her as a perfect ter-magant-and gives a long narrative of particulars to do alvay the impression she had made in her favoi; entreating that the legislature will not attribute to an innerent society the acts of individuals with whic! they had nothing whatever to do. And the Shakers disclain any erency in parting man and wife, and say it is not a principle of their faith that the joining of their society disannuls the marriage con-tract-which however does not prohibit a separation provided it be voluntary and lawful. No marricd
woinan is received without the consent of her has-bant-and a married man may not put his wife away "if she conducts herself ds the law and marriage covenant require." But if a man provides for his wife and children, and the "ife refuses to live with him "unless he will consent to violate his religious faith," it is both lawful and necessary for him to separate himself from her. Declares that a wife or child ought not to be deprived of any part of their just interest in the man's property or estate, Scc. They state that the quarrel between Chapman and his wife originated before they knew either of them; and express a hope that they may "not be scandalized at the instance of a censorions and defamatory woman;" remonstrating, in very forcible terms, against the passage of the law, which goes to consider them as "civilly dead;" saying there is no canse for such a law, \&c. and passing over. the allegation of their abatinence from "sexual co. habitatio: for conscience sake," by asserting that such an imputation cannol isjure them, \&c.
The pamphlet has an interest in diveloping some of the points of doctrine held by this people, and we could not do less than taice this notice of it, afte having inserted a copy of the law affecting Lhem.

In the debate on the bill above alluded to in the house of assembly, it seems to have been admitted that the Shakers consider marriage, or sexual intercourse, unlawful. The bill, however, was warmly opposed on the ground that it was unconstitutional -that the Shakers, as a religions society, soher, industrious and inoffensive, had an undoubted right to the cominon protecion of the laws, as long as they did not distur! the public peace, \&c. B'h the bill was passed, as inserted in this paper, without material alteration.

\section*{Highly important Law Case.}
communicatei for the webkly register.
The case which drew forth the following opinion gave rise to three very important questions; first, Whether the judicial officers of Maryland could, in any way whatever, take cognizance of a criminal infraction of the laws of the United States? The opinion is confned exclusively to the consideration and determination of this question. Secondly: Whether any offence at all had been committed against the United States, of which the federal courts could take cognizance, supposing all that had been state! to be entirely true as stated? As to this question it was strongly urged, that by the treaty between the United States and Spain, of the \(20 t h_{1}\) of October, 1795 , article 14, it is declared, "Nor shall any citizen, sulbject or in! 1 . bitant of the said U. States, apply for, or take, any commission or letters of marque. for arming any ship or ships, to act as privateers against the subjects of his Catholic majesty, or the property of any of them, from any prince or state, with which the said king shall be at war. And if any person, of either nation, shall take such commis. sions or letters of marque, he shall be punished as a pirate"- that the true and only correct construction of this article was, that the offender might be punished, by the injured rution, as a pirate; not that the offence, in itself, should be deemed and held to be piracy; and that it could not be presumed, that the United States had or would stipulate to treat any of their own citizens as pirates for doing what was so very common among all nations; that is, the citizens of a neutral entering into the military or the naval service of one of the belligerents And, consequently, that the most which could have been in-
iencled by the treaty was, that a citizen of the United States, who should be taken in such kind of naval service, should not be entitled to the protection of the nation to which he belonged; but might be punished by his captors us a pirate. And thirdly: Whether the thirteenth article of the amendments to the constitution of the United States had not virtually repealed this provision in the treaty with Spain, which could ónly affect the prisoner as being : citizen of the United States? The amendment declares, that if any citizen of the United States shall, without the consent of congress, accept and retain any office, or emolument of any kind wha' ever, from any foreign power, such person shall rense to be co citizen of the United Siales.

In the following opinion, the question relative i the juriscliction of a state officer, appears to have been investignted and decided, in the only way in Which any such ennstitutional question ought to be determined, that is according to the meaning of the constitution itself, collected ex viscribus suis. thit this investigation will naturally suggest other considerations relative to sotmb policy and eaperdien\(e v\), which are foreign in their nature, to a rifich jus. dicial enquiry-and these are, whether it would be monst politic and expredient, or otherwise, to have the gereral government more dependent than it now feally is upon those of the states? Or the same subjects might be presented to the mind in another form; so as more distinctly to recall to our recollec. tions the discussions which took place when the constitution was laid before the people for their monsideration and ratification, that is to say, "is the government of the confederacy, in its present formp, preferable to that which existed under the old articles of confederation, and in what respects?

The present constitution, it will be recollected, was advocated, opposed and canvassed in two great leading points of view-first; whether the powers therein specified should be givell at all or in any shape rehaterer? \({ }^{2}\)-And secondly; as to those powers which it was conceded the government of the confederacy ought (1) have, it was questioned, whether they onght to be given as to a confederacy; to be exercifed in the shape of requisitions upon independent suvereignties: or be invested in a national gozernment cndowed with the power and the means to act inrependently of, amb superior to the will and pleasure of the atule sovereigntien?

But, it the general government could exercise the growers with thich it is invested by requisitions on[y, und not by ies own agentsi its very essential and mbariatiel principles would be changed. It is liot the iltention, however, in these few preliminary reminths to undertake to consider, or to deternine, whether it would be safest and best in this, or in anty other instance, to limit the powers of the gencral goveminent to a right of peremptory re quantion, or to invest it with the powers and ateri butes of in indefiendent soveragnty. The subject is no teo impontant than extelwive. It is, Hertfore, thoughe mo advisuble merely to make a few suggeations and leave it to the invextigation and inedt zatwo of the reader.

In answer io the anguments of inconvetience, that have been inged by those who contend, that it is \#ecravary, in eertain enser, in invest state officers with a portion of the judicial power of the union, it a 11 the sufficient to eliserve, that there in modetiect ar deficiency of power, in this respect, in the fide at eotstitition; but, if there be a fante, it is attribuable solely in obugtis, in mut ex cuting the atwery which love been thast clearly and unques. whably ins paed in thein. Fior congresn may con.
stituie such inferior tribunals or magistrates as they may think proper. And, consequently, the 0.1 y questions worthy of consideration are, whether onot it be expedient, that congress should expcuto this power, and in what manner they should constitute inferior tribunals and officers; or wheiher it would be best that the interests of the nation should continue to swing along by the skirts of the stite authorities, until some great crisis shall arrire whoch shall expose our imbecility to the worlt, and cause every state of the union to feel the absolute neces. sity of bracing the judicial arm of the nation.

The state nf. Maryland vr's. Thiomas Rutter esq. acting as marshal of the Narylund disitict.
Buand, judge.-This case has been brought before this court by a writ of habeas corpus dieocted in Thomas Rutter, esq. acting as marshal of the district of Maryland, commanding him in have the budy of Joseph Almeida before this court, together vith the canse of his caption and detention -In obedience to which he has returned, that he detains Almeida by virtue of a warran issued by Thomas W. Griffich, a justice of the peace of the state of Maryland, in and for the body of Ealtimore county, of which the following is a copy:

\section*{"Ba'timore connty ss:-}

Whereas information upon oath has been given to me, that Josepls I/meida, a citisen of the United States, has been encraged in cruizing and capturing the property of the subjects of the king of Spain: and has taken a cominission from a prince or state, with whom the king of spain is at war, in act as a privatcer against the subjects of the said king of Spain; which act is, by the treaty between the ''mied States and the king of Spain, an act of piracy: you are, therefore, hereby, required to arrest the said Joseph Almeida, for the sald oflence, and him safe keep, so that you hiave his body before the judges of the circuit court of the United States, for the district of Maryland, on the first day of May next, to be dealt with according to laws and for so doir. है this shall be your sufficient authority.

Given under my hand and seal this 2nd day of April, 1817.
(Signed) THOMAS W. GRIFFITH, Lo so

\section*{To Thomas Rutter, esq.}

Marshal of M.rylund district."
The petition of Al:neida, praying to be relieved by labeas corpas, was presented to me during the last short recess of this court; and conceiving that the case was likely o give rise to some questions of great importance, f, therefore, made the writ re. tirmuble to court
I have always felt, as I have heretofore had ne. cacion to express, the greatest reluctance to entertain jurisdiction in any case, which was likely to lead to a cinflict between the judicial power of this state, and that of the union-But w!eth necess sity pressen such cases upon me, and there is no alternative, 1 inust endeavor to act in a manner bed coming my station; for in sue.a cases, homever diftio cult, or painful the duty may be, I feel that I ant bound to make an effiort to surmount the difficulty and in discharge the disaggrecable task.
As all urrest, or a commitment, or a trial presuppaser an authornts, power, and juristictom; it will, therefore, he necessary, in the first place, to dis: pose of the question relative to jurimliction. Por. If the judicial officers of the stsie cannot liave atyy jurishiction whatever, invested in them, by cons. greas, in any criminal case; it is evidently uscless in inquire, whether there be such procf of criminalf. fy, for which the accused may, or may not be cuns.

Filted for trial, before the proper tribunal of the tited sates-1 shall, therefore, lay aside all the usceptions, that have been taken to the warrant of conmitnent; becanse, there can be no doubt, that it the judicial functionaries of the state have been constitutionally invested with jurisdiction, in cases of this surt, by the 33d section of the act of congiess of the 24th September, 1789; and it appears from the whole return, that the laws of the nation bave been violated, this court would take care to recommil the accused with a due degree of legal furmality.

As to the legality of this court's entertaining jutistiction, in any way, in this case, circumstanced as it now is, i will be sufficient to observe, that, the right to speedy relief from illegal imprisonment, by means of the writ of habens corpus, is one of the most valuabie of the rights of the civizen; and the authorit! of the siate tribunals to grant such writ is, e.crtain'y, as impurtant as any other which they exercise. Any restraint of such right, therefori, s outd be clearly shewn. It is acknowledged, then is no express qualification of the authority of the state courts, in this respect, contained in the corstitution of the union; nor is their jurisdiction impliedly circunctibed in any manner whatever; except by the exclusive powers vested in the tribunals of the United states. Therefore, this court has an unquestionable jurisdiction in this case; unless it appears by the return, that it has been cons.hutishally placed under the exclusive cognizance of the United Stutes' couzts. It is not enough, that the theer, who bas the prisoner in custody, be a le sal officer of the Unined States; it must also appear, that his anthority 20 arrest and detain is legr Hy derived from the United Siates; for if, on his autho, ity being shewn, it shall be found to be unconsulutionai and void, the prisoner must be dis. charged. But, in queationable cases, where a person wats in the custorly of a legal officer of the United States, and there was a doubt whether the case was embraced by a treaty, or law, according to its true construction, or not; or whether the courts of the United States might or might not take cognizanct of the matter, with which the prisoner was charged; and the like, 1 should deem it proper to lque the determination of such dubious point to the f-deral courts-7 Niles' H. R2. suipp. 96-5 Nîtes II: Reg. \(81 \mu_{1} ;_{i}\). 14.1 -because, they are undoubtedly the consti:utional tribunals for the decision of all such questions, arising under the constitution, laus, and theates of the nation: add in whose wisdom and integrity, we are bound, as pubic officers, by those pronciples of comity which come in ait of the grat ligathes, that hold the state governments oggctier, to repose the most unlimited confidence, unit such confivence slatl be expressly shewn to be m.spliced.

The great question, then, is; Con congress, consitithinally, znvest the judicial aficers of this state with cuny portion of the judicial prower of the United Stateo, in any crimital case whatezer??

In the consideration of questions of this nature it is of no consequence, to determine, whence the government of the Un ted States sprang; whether frem the people, of the states of the union, or from both, as the only principle necessary to be borne crnstantly in mind is, that laid down in the tenth, : ish of the amonhmeats; by which, i : is declar. ed, that, "the porers, not delegated to the Uniced States by the constitution, nor prolibited by it to the stalles, ure reserved to the states respectively, or to the people." The government of the United States, bing thus defmed to be a restrictive and
limited one; to prove, therefore, that it has juristr diction in any particalar case, it is reguisile that arr express grant of power. slontid be stiewn, of else, that the power cluined shoul 1 be she sin to be essentially incident to one expressly priveiz.

Kieeping this leading feature of the constitution of the union cons'ant!y in view, I sh. Il first clear away some questions apparently of a simila: natire, and then investirate the ote before us singly, and tin associated with those of iis ki dred, which, wh en taken together seerr, to have occ:asioned much ditriculty and confusion, ath well ats sone degree of alarin, at the probable consequences of havis g this whole famly of presume 1 rights and constructive powers banished from the constitution of the United States.

The first class of cases, w: ich have sone . halnsy to that now under discurssion, are thone in wi, h the state courts claim a concurrent jursthe ion with the couris of the ullion. Tr; thi cl so laticy be assigned all those civil cases, of which the stinte tribunals pray take ongnizance; if the parties concerned choose to resort to them; and which cases are nol, by the constitution, exclusivel! vested in the tribumals of the United States. Such, it is admitted, are cases of controversies between citizens of different states, between citizens of the same state, claiming lands under grants of different states, and between citizens and foreipners. In all cases of this kind, until legally removed from before them, it is conceded that the state tribunals have complete juriscliction; because, to all such cases the jurisdiction of the state coun"s extended before the adoption of the federal constitution; and there is nothing in that instrument, which can well be consirued to have excluded them from the exercise of such authority; and therefore, their powers are said to be so far concurrent with the courts of the United States. Questions, relative to a concmrrency of jurjdiction, alyays give rise to all el quiry, as to what cases the judicial power of the union shall extend; and what is the nature of the powers with which those tribunals are clothed. But, the question now before us, involves no such inquiries, it is, whether or not cong, ess may authorise the state courts to exercise a juri-dicion, simil.ir to that of the United States courts, and in tie name of the United States. A single exarple will sufficiently illustrate this distincion as regare's crminal cases. The act of congress of the 21st April 13U6, which provides for the punishment of counterfeiting the current coin of the United St: \(e\); in t: e fourth section, recognizes and preserves : - is co 2 . curvency of jurisdiction, by declaring;, "thn:t in .i. ing thercin contained, shall be constmel :o deprive the courts of the iadividual states of juriselic i, in, under the laws of the ser-ral stales, orer uffences made punishable by that act"-1.1 Januat 1816, the court of appeals of Somh Carohn. disimed in the c ise of The State vrs Josepin An onio, that the state judiciary wan not deprived of a con current juristicuon to hear, try, and condemm umber the state luzus, (making the comberfeiting the current coin flony) by any thing cont ined in the consti ution or the laws of the Uni ed States; becanse, before the establisliment of the general government, they had jurisliction in such cases, and not being divested of such authority by any express, or necensarity implied provision of the constitution, it romaincl, and \(m\) ight be concurrenly excicised widu the corrts of the Uisited \(S\) ates. A id Antunio being convic cal was acoordi g y con lemmet and exccuier. Ifut it was not picte d d, that a state court could hear, try, and condemn for that
offence under the act of congress; and in the nump if the United States. Fron, which, it clesrly appears, that in act upon the case, the jurisdic ion may be concurrent; but to sact in the character and name of the United States, is an aff:ir of a cotally difierent nature. Hence, it is evident, llat a question concerning concurrent, original, judicial power is totally different from that respecting the right of cong ess to confer such power up in certain state officers. The questions relative to the exercise of powers concurrently, are, therefore, foreign to the present enquiry,

But there are certain legal principles laid down by tho constitution itself; or which it directly, or indir caly, sutionrises congress to prescribe, to all th- tribunals of all the states of the union, as mules of julicature, which are conclusive and binding; becuse all the judicin! officers of the several states are bound, by t.e explicit provision of the sccond section of the sixth article, 10 regard tie constitu tion, as well as the laws and ireaties made in pursuance therenf, as the supreme law of the land. A few examuples will illustrate this position. The first sectill of the forrth article declares, that "full forth and credii shall be kiven, in eacli state, to the public sr's, records and judicial proceedings of every wher tate" This, ilien, is a law of the con feleracy; rule of judicuture, which every state tibi al of the \(u\) ion is bound to ubserve. The latter part of this same section declares, that "the congress my, by general laws, prescribe the manner in whicl, such acts, records and proceedings shall lie prosed and the effect thereof." The ac.s of c uress, mi.de in pursmance of this provision and uthori \(y\), are, in like manner, Laws of the comfederacy and moles of i dicature, which the courts of the neveral itates of the tmion are bound to observe. Congriss are, by the eighth section of the firm arti"lo, aumborised "to lay and collect laxes, du'ies, imposts and excises" By virtue of this power, hey have t ionglit pioper to impose a stamp tax on certain instraments of writing; and, as a meats of enforci th the cullec ion of such tax, they have declared, that an instrumen of writing, on which a stamp tax is required to be paid, shall not be eviferice inlesg stampe! And this alteration of a Itgal rule of evidence has be en held to be bindinge on the state courts; becaluse it is necessatily is.cident to the power to lay such a tax, as a means of efforcity its callection and payment.- Iorginia cazr, 128. Sn c neress tave, by ilve same section, the poner "to regulatt commerce with foreig" natims, and athong 4 e several states, and with the Indi in mation" And, ib a necessary incident to this pmeer, the shberessumed the right, and, so it woblel seem, correct!, to regulate the marnitime contrafts of ceamen, ingaged in the merchant service, co bring a class of pereons who may fairly be consinered as the imunerliate instruments by which commete is conducted And, in order to enforce vie specific performance of a marilime engagement eniered inio by a seaman, an arrest and deten tion of his person, so as to be delisered immedia'ely into the service eontracted for, lias been pro. vill for and authorised by ans set of eongrens.

I impore of thene, or any anch cises, however, does the ennstitution or congress invest the judici.s functiomarles of the stater with t.ew and origins jurisliction, either of a civil or criminal nature; but the constitution either lays down a rule of judithture, or it anthorines congress to do so, either in ex prest terms or 29 necessarily incilent toseme power grantet. But the prescribung of a rule of julicawife to the juticial officers of a state, relative to
the kind of fith and credit to be givel 10 records; as to the authentication of judicial proneedinss; as to the manner of enforcing the specific pe:formance of a seaman's contract, and she like, is manifestly very different from the investing of such nfficers with a portion of the original judicial power of the United States in criminal cases.
The constitution of the United States, not only leclares the general government to be a lin ted one, but it also prescribes certain boundaries to -hose of the several \(s\) ates. The tenth section of The first article declares, that "no state shall enter into any treaty, slliance or confe' eration; grant letters of marque and reprisal; coin money; emit bills f credit; make any thing but gold and silver coin a tender in payment of debts; pass any bill of attainder, ex post law, or law impairing the obligation of cuntracts, or grant any title of nobility." These provisions are thus, virtually, engrafted upon the constitutions of the several states; and are, in like manner, obligatory upon the several meabers of the several state governments. They may be, in many r-spects, cunsidered as miles of juticature; but they confer no judicial power, nor do they authorise any to be granted; they are, therefore, unconnected with the present question.

In those cases, clearly within the jurisdiction of the United States' tribunals; although it is admitted, that those courts can control the person, or the property of he litigating party; yet, it in doubted, wnether, in such erses, the United States' conrts c.s control the state tribunals, which mav have under'aking o exe cise a concurrent jurisdiction.Aud the ex.ricise of such control has been solemnly sid to be "a right which congress has not asserted; w..ch the" supreme court has not asserted; nor dies there appear any necessity for asserling." Th. he right to control the judiciul ath-horities of the stes his not been ass ried, has, colfessedly, been; be cauve there was considerable dumbe with congress anul the supreme court whether it could rightilly be done -1 . Hheaton 381, Martin vs. Mimbir's lessee. But to control state tribunals, although doulted, woul I seem to be includel in the right in invest them with o iginal jurisdiction. The right to con. trol, and the right to invest judicial power, are, however, although strangly analogoun, yet essen. tially different. The riglit to control may he, and perliups is, in inany resplects necessary, as a means of preserving the judicial power of the nation \(f \mathrm{om}\) dilapidation; hut the right to invest judicinl anthority may be used is an casy means of enlarging the poirers of tle seneral government, or wielded as a weapron lu proztate those of the states.
II ving thuss ripped the subject before us af such analogons, but fireign matter, :s secmed likely in obsctice or retart ont invest ige finn, we shat be en thlel, with less embarrassinent, and in a more single furin, to consiler the quetion bo fore us; which is, Cun congress iuvest any of she inuliciul afficers of this state rish aivy pmrcion of she guthcinl p-werr of the tinited stutes, in cuny criminal cuse whinterer?
It may be aflirmesl, with perfers ovifidence, that the several state govermments of this union vre as totally forci, 11 and alien to each other as those of France and R'issia; exeept, so far as they may have been, by the comstitulion of the union, confederatel and amalgamared And it may, with equal confflence, be uflirmed, that the general governvich and the severalstate goveruments are distinct sovereign' ice. wholly independent of each other; and that the gole verinients of the states cannot be enntrnied by that of the wion, in any cases what erer; except in those which are ciearly epecified, or necessatily implie...

For, the general goverument heing, in its nature, a linsited one, it can exercise no powers but such as arc expressly granted, or are essentially necessary to some given power, as is shown by the tenth article of the amendments; hy which it is expressly declared, that "the powers, not delegated to the Winted States by the constitution, nor prohibited by it to the states, are reserved to the states respectively, or to the people."
In addition to those axioms, growing out of the peculiar structure of our political institutions, it may be dssunted, as a settled principle, applicable alike to all governments, that the expounding and enforcing of the penal laws of a sovereign state, belong exclusive! y to the cour:s of such state. This primciple has been lon! well established by the eng. lish court; they hold it to be a settled principle of the law of that country, that they have no power to enforce the revenue laws, or any part of the penal code of a foreínn nation. A similar principle seems to prevail among the Luropean nations of the continent; and alsu to have been held by the several states which formerly composed the seven United Provinceswhose principles of confederation were, in this particular, more analogous to ours than that of anv other country whatever.-3. hall. 370 , rote. This principle has, in like manner, been recognized by soiemn reported decisions in many of the states, and, it is believed, is acted upon in all, that the courts of no one state will expound and enforce the criminal lave of any otherstate of the union-2. Johns. 477, 479-2. Cuines, N: Y Rep. 213-3. Binney, 221 -5. Binney, 617-1. Maytwoord, 100.
And, indeed, this indispogition or inability of the cour's of one sta e to act in aid of, and as auxiliary of the courts of a oilier, seemis to have been extended even to civilc cises. For, although the court of chan cery of Englai:d will, as it is said, compel a discusery in aid of a fureign cnurt, Coopt. ch. pl. 141, yet, by the cane of G ason vs. Wordsw orth, 2 . Vesey, 325, 336, it appears, th.. on acom is sim, to take testimony, he ing sent from the court of chancery of England to Sweden, the King o." siseden refused the executing of the cummission, requiring it to be by some magistrate there, according to the laws of Sweden. The lord chancellor seemed surprised at this refu sal, between two tradirg countries, which might be so dangerous to commercs-and an a subsequent day, in the same case, he declared, that he would not send another commision over, under the seal of Gieal Brilain, to be treated in the manner that had be:m. And in the case of \(M^{\prime}\) Kean vs. Bruff, a bill of liscovery was filed in the chancery court of Mary12. 1, siating that the defendant had the knowledge of certain ficts, 'o which he might depose, as material, onmperent and proper evidence for the plaintiff, in a canse depencling in Virginia, between him a-d certain Kimmel and Albert; and, therefore, pman, that tie defendant might be compelled to subinit to have his deposition laken to those facts, to be read in evidence in the suit depending in Virginin. To which bill, the defendant, Bruff, demurred. The claim to reli:ef, in the manner prayec', was pressed with great ability and force of argument, by Mr. Brackenridge, the plaintiff's counsel. Notwith. standing whicli, the chancellor sustained the demurrer, on the ground, that the court had no power to compel a witness to discover or give evidence under such circumstances.

But the second section of the fourth article of the constitution of the United S'ates, which ascertains the mode in which a fugitive from the justice of one state may be apprehended in another, and tuence remanded to the state whose criminal code
hacl been violated, is manifestly a virtual recognttion of this general rule, as to criminal cases. Hence, it would seem, that this general puinciple, that the courts of one state will not expound and cinforce the criminal code of another, admits of no exception; and that there are but few instances in whicll the courts of one nation will or can act as the auxiliaries of another, even in mere civil matters. Il follows, therefure, that according to this general 'ute, applicable to the nature of an independent sovereignty, the congress could have no right to clothe any of the state functionaries with any portion of the judicial power of the nation in criminal c:ses.
Therefore, the judicial power which has, in the present instance, been exercised by Thomas W. 1 Griffith, a justice of the peace of this state, must be derived from some specific provision of the constitution, or from some power necessarily incident to a distinct grant of power to the general government; which, in themselves, form exceptions to this generah rule. If it cannot be accurately traced to one or the other of these sources, he had no juris. diction whatever; and every thing that has been done by him, under color of such judicial authority. is absolutely null and void; and, therefore, can givo no legal authority to the marshal or any other officer to arrest or detain the person now before us for a single instant.

By the first section of the third article of the constitution of the United States it is declared, that "the judicial power of the United States shall be vested in one supreme court, and in such inferior courts as the congress may, from time to time, ordain and establish." By this article congress have power to ordain and establish inferior courts; and, by the eighth section of the first article, "the con gress shall have power to constitute tribunals inferior to the supreme court.". These are their powers. in this respect, and nothing more. The congress have 110 right to prescribe where the judicial power shall, or shall not vest; they cannot say, that it shall not vest in the supreme court, the inferior courts and constituted tribunals of the United States.They may distribute and regulate judicial authority among the several courts and tribunals of the nation, as declared by the constitution; but they cannot invest such power, in any manner whatever, differently from that which is so explicitly prescribed by the constitution itself.
But can it be said, that the conferring judicial authority on a state officer is ordaining and estab. lishing an inferior court within the meaning of this article? To ordain and establish a court or to constitute a tribunal is, manifestly, to create an office; and to authorise the appointing of an officer to fill such office. But it centainly will not be contended, that congress can, by a mere legislative act, create the office and officer together-ordain and establish the court and the judge at once, and thus deprive the executive branch of its right of appointment; aind so destroy that most valuable annong the checks contained in the constitution, which provides that the lazv, and the executors of the law, shall emanate from different sources, so as to countervail the irregularities of each other.
If, however, this claim of ingres, to invest the officers of this state with the judicial power of the United States, were conceded, it would lead to the most extraordinaiy perversion of the theory of our governmen!; entirely prostrate some of its most valuable principles; and overturn, or throw into confusion, the whole judicial system of every state of the union.
The cbief objects in establishing the rovernment:
-f the United States, certainly, were to reftiis e, ex. ponnd and maintain the aggregate rights of the anion, in relation to foreign nations; to regulate and pacify the conflicting claims of the several states among themselves; and so to bind the states to ether, by the strong bands of mutual convenicuce and reciprocal interests. Hence, it must have been the intention of the framers of the government of tie union, that it should be provided with powers full commensurate to these great objects; and also, that those powers s!ould! be so distributed among its own agents, as to enable it to act from itself-by its own motion; and not through the instrumenta!ity of any oilier independent sovereignty A distinclion has been taken between cases which obviously require to be placed under the coniwol and gnardiunship of the national sovereignty, and those which policy mas dictate tle propriety of being so placed, only provisionally, or in tle last resort. If the question now before us was, whether the state courts had concur rent jurisdiction with those of the union? it might be necessary to examine this distinction fully and carefully; but the question now under considera tion is, whether the United States can use the agency of bny other power, than its own, in the discharge of the duties asnigned to it?

If the United States can use the judicial officers of the several states, is agents to arrest and bring offenders in justice, they certainly can, in like man wer, use the courts of justice of the several states as agents to liear, try and condemn for any crjminal violations whatever of their laws. 'rhere is nothing in the constitution, or the law, which makes the least distinction between the one and the other. To judge of the grounds of an accusation, on which a warrant to arrest may or may not be issated, is as muci a judicial act as the process of trial and con dennation-3. Hull. 42 . Therefore, if the United States call confer, upon the juclicial officers of the s'bet, the incipiont and ancillary power to sppredead, they inay, with equal propriety, invest the courts with the plenary power of irial and condem. nation. And if the United States can make use of the judicial officers of the several states as their ageris, and can compel them to act as such, for the purpose of arresting, tring and condemning, in if- ir wame and behalf, offenders against their laws, in one kind of cases, they can do so in all: for, in this respect, weither the law, nor the cunstitution, snakes t!e lcast shadow of distinction. Consequently, the congress might distribute the julicial power of the Unised Stutes, specified in the constitution, omong the several state courts in suclo mannes as they smight think proper: and rely allogether lipon the state tribumals for the administration of justice utider slicir criminal code. And thus restore the theory, principles and practice of the old articles of conferterniton; the cvils of which, in this respect par icularly, among many otbers, this constitution was intended in reminve.

It will not rffect the force of the argrment, in this repect, in the leaat, 10 assert or to admit, that the administration of justice in crimmal coses. n!? der the laws of the Unird Sia es, ean, with more safely, be confided to the state ributids than in thesciof the United States; on the reverse; it is suf. feient that it be admitied, the two moxles of admi. niltering justice are materially and essential ditierent; that the constiturion louks to, und lias uctually provided for one supreme contiri lias mithorised con. gress to constitute tribunals inferine to the suptrenc court; that congress may orrlain ablel establivit a judicial system fur the U'nitrd Soatra; and that to wie the jitdicial system, 30 by comgress ordained
and estiablistiet, for the mumoses of adininistering justice in criminal cases, is, in theory, princinl snd pratitice, variant f:om the use of the judicial system of the states, for the same purpose. If this be adruitted, and I donot see how ii call bedenied by any one, is f.llows, irresistibly, that an attempt, such is is made in the present instance, tn espound and enforce the penal laws of the United States, in their ncome and hehu'f, through the instrumentality of \(\bumpeq\) julicial officer of ilis state, is a most exiraordin:ary perversion of the true theory of the constitution of the Cnited States, and is, ilserefore illegal and void.

The general goverumem is so framed as 10 be able to act from, and by itself; it is a comp!ete a d independent sovereignty in all its operations. Bnt in the only instance in which it is authorised in esll op the governments of the several states, as such, for support, its right in lo so is clearly and specifically expressed By the 8 h scetion of the first article, "the congress shall have the power to provide for calling forll the militia to exncute the laws of the union, suppress jusurrections and repel inva. sions. To provide for organizing, arming and disci plining the militia, and for governing such pret of them as may be employed in the semice of the \({ }^{\mathrm{e}}\) United Stales; reserving to the states respectively. the appointment of the officers, and the authorit! of training the militia according to the discipline pre scribed by congress." And by the 2al section of the second article it is declared. "that the president shall be commanden in chiof of the army and navy of the United States, and of the militia of the several staies, when called into the actual service of the E'nited! States."

When the militia are so called for, and in pursurance of such call, ordered into the scrice of the national government; the authorily of the state over them, that instant ceases, and that of the union com. mences. Therefore, the mililia clo not act as allics or auxiliaries, but as the troops of the hation, stit. ject to its laws only; as forces placed urder is cummand, government and control exclusively. Jown being the mititia and the officers of the siape. they are immediately converted, by stich Uniical States ca!l, and state order, into the inilitia and officers of the nation. The state whence they have been so taken, so absolutely ccases to have any control over them, that it cannot organize a couri martial finm among them, or in any manner invest a court with power to sake cugrizance of any offence which a militia man or officer may co:nmit, as such, while in the actual service of the Inied Siates. Whis right 10 call a mili ia state officer into the service of the linited stutcs, aloes so eflectually convert him, white eng, ged in such service, into an o licer of the nation, that lie is not bound fo two superiors far, his allegiance to tle one is thrown off, ar sus. pended durins lis being placed under- the command, athit an alifaration to wbey another sovercigal I!-Meude's case, 9 Niles' W. R. 194 -Iluuston vs licks, al. at Lancaster, Penn. IU Feb. 181\%, per J. Franklin.

IBut, in the case now before us, the official duty of this justice to the state, is supposed to continue, auld un attenupt is made, to compel him to act as auxilliary 10 it Luted States' ufficer, of a similar character and auperior grade. To compel this jus. iice to recelve, in his official characler, an investment of jullicial amthority from the I nited Siates, to be used in wid of, and as an auxilliary of tiveir power. In the oue case, the state militia nflicer is e-lled for, atid conterted into an olficer uf the Unied states; in the other, the justice is attentipted to be used, or culled on as an aid, or amailiary. Ent,
the right to call for a state militia effic, for the purpose of convering him into a national officer, is di- inct and specific; on the other hand, there is no expre s righ. given to use an officer of a state, as an ausiliarys and yet the on e is no less important in its nature and consequences, than the other. The infer nce, thercfore, is irresiscible, that a state judicial officer can, in no instance, be called on to at as in unavilury to the powers of the United States.

Ano"g the various princinles, ariang out of our peculiar and inestimable form of government, there is \(p\) riaps, no one more obvinus or more valuable than the \(p\) inciple of responsibilite: whatever tends to enfecble \(t\) is great principle should be regarded with the most wakeful jealousy; but, whatever destroys it, we should dll unite in expelling, is the implacable enemy of all our politic. 1 institutions. All the officers of the United States employed in defendigg their rights; or in carrying into exectltion their laws, we appointed by them; compensated hy them; removable by them; responsible diree ly or in lirectly to them, ad punishable by them or heir official misconduct. With regard to all public fuaction ries so emntoyed, it \(n l y y\) be correctly said, that the United States can create or can destroy; can reward or punish.

But if the United States are allowed to use the officers of any other independent sovereignty than their own, for the purpose of maintaining their rights, or of executing their laws, thi. principle of responsibitity is certainly very much impaired, if not totally destroyed. It is not pretended, that a state judge can be impeached for official misbe havior of any kind when acting in the name and behalf of the United States. Nor can any state officer be removed from his office by any superior au hority of the United States. Even then, if it should be admit ed that such officer may be restrained from misconduct by an action at law, in which he may be trea ed as a wrong doer; yet he is absolutely irresponsible to that superior power under whose authority and in whose nume tie acts. And it is equilly obvious, that for vimilar reasons, he cannot be intile to respond to the superior powers of the state under whic! he has been commissioned; because it is clear that he can only be made to answer to the state superiors for the faithful discharge of the trust which tiaey have committed to his keeping; and not for the performance of those duties which any otiler sovereignty has assigned to him. It is evident, herefore, that this great and valuable principle of the constitution of the union, judicial responsibility, would be completely prostrated by allowing of this mode of conferring judicial powers on state officers; and consequently it insst, for

The first section of the Sd article of the constitution of the United States declares, that "the judges, both of the supreme and inferior couris, shatl hold their offices durmg good behavior; and shall, at stated imes, receive for their services, a compensation, which shall not be diminished during their continuance in office." Whether this be the best tentwe of judicial office or mol, is, as regards the present enquiry, of no importance. It is enongh that this be admitted to be the general constitutional tenure by which all the judges of the United States shall hold their offices. But if the judici.. power of the union can be committed to the judicial functionaries of the states, then those whon act as judges of the union would hold their offices by all the variety of judicial tenures; during good lieluuvior, removable by conviction in a court of law, by address, or by impeachment; some would hold fo:
seren years; some until seventy years of age; some by annual appointment, and soine during pleasure, - the constitutions of the several states will shew. That uniformit! of the temure of judicial office, inanifertly contemplated by the constitution of \({ }^{\circ}\) U ited S :ates, might in this way be perverted in he most extrandinary manner

But, in addition 10 ihe perversions of the thenry of the constitution of the nited states; the danger. of committing judicial power into the hands of \(t\) rose who were no way officially responsible; and the injustice of exacting service without compenation; especially where, as in this state, the officer is prohibited from receiving any hut what is allowed time by the law of the state, such an investment of i dicial ponver might have the most serious efiect upon the judicial system of every state of the umion; and perlaps in mone would be more likely to produce difficulty and confusion than in that of Mary and.
For, if the state tribunals can be invested with he jurisdiction properly belonging to those of the nation, and the varions powers and duties of both brought together and invested in the same officer; then, it is obvions, that there are numerous instanc:s where it would be extremely difficult to deterinine in what manner it might be mont correct to prosecel. Because, ia many cases the tribunal might have a choice to act in the name of the state or of the Onited State; in which it would be very que-tiona\(b\) e, and yet, of rritical importance, 10 decide whether it would be best to consider the case as a subiect most proper to be brought, under the cognizance of the muncipal law of the state; or to treat it as a matler of admiralty jurisdiction, involving, in some degree, the lazo of nations. In all cases where it is, admitted that the courts of the United States and the several states have concurrent jurisdiction, it would be a matter of sompe difficul y and delicacy, where the two jurisdictions were so united in the same person, to say which of the two characters the forum should assume for the purpose of hearing and deciding on the case. And it is manifest, that where such separa e jurisdictions were conferred on the same officer by those two distinct sovereignties, each of which must be oheyed; and a different place and forms were prescribed for perfirming the duties required by each, it would be impossible, thus to double business bound, not to neglect one or both of them; or what would be most likely, under such invidious circumstances, that the officer shonld leave undischarged his duties to the state. It is, therefore, clear, that if this claim of congress to confer judicial power on the state officer's were to be illowed, the whole judicial system of the several states might be overturned or \(t\) : rown into utter confision.
13:1t experience will suggest considerations of policy, in many respects peculiar to Maryand, wh ich ousht to have much weight in the determination of a question of the nature of this now before the court. When we cast an eye over the lucal situation of this state, and observe how completely its dominion is divided by the Chesapeake, a great arm of the sca; the independent territory of the union carved out on one side; the smallest of the states sharing with us a narrow front upon the Allantic; ald that we are surrounded in every other direction by two of the most potent republics of the confede-alion-we cannot but perceive, as late experience as cansed is seriously to feel, that Marylancl, so far from assuming a haughty independency in all respects whutever; and from endleavoring in have ber tribunals invested with the judicial attributes of:
the union, stands in especial need of the preserice and the aid of the judicial arm and of the power of the nation; in order in regulate the rival int orests, and to pacify the jealousies of our territcrial bre-th-en; our feeble sister; and the powerful neighbors by whom we are surrounded and overlooked; as well as in prevent the imputation from being cast upon us, either of neglecting to vindicate some national rights, or of exciting a conflict rehtive to questions of a commercial or maritime concern, with the various foreign mations who pass along our coasts or enter our numerous harbors. With an open front, inviting the intercourse, and exposed to the incursions of all the foreign nations of he earth; and with a domain so eminently provided by nature with the facilities of inland intercourse, it is evident that the chief ports of this state must, ere long, become the great depot, and thoroughfase of a ver; considerable proportion of the commerce of the union, and consequesty, that within our territor!, questions of the greatest national cuncern may ofic arise; arcd that shis state may, more frequently than any other, become the scene of the national conHhuts, and of the clashing rivalship of the states Wisdom and sound policy, therefore, eems strongly to urge upon us the propriety of confining ourselves willin the pale of our municipal law; and of limiting our wishes and our power, as a state sovereignty, tu the administration of our domestic concerns; leaving all national questions and affairs to be regu. la'erl by the wisdom of the national judicature, and pro ected by the power of the national arm.

Upon the whole, therefore, after carefully review. ing the reasons and principles applicable to this great question, I feel perfectly satisfied that con. gress have no constitutional right to confer any portion of the judicial power of the United States upon any state officer whatever, in the manner that has been attempted by the act of congress of \(24 t \mathrm{~h}\) Sep:enber, 1789, section 33d; and which has been aswumed and acted under Iy Thomas IV Griffith, a justice of the peace of this state, in the case now before us.
And I feel frertified in this opinion, by the assurance that the construction of the constitution which, I believe a be correct, and have cndeatiored to shew is the only sound one, is precisely that whicb was put upon it, as well by its friends as hy it foes, among the members of that very conven(ion which framed the instrmment itself, Mortin's 1.f-rination to the General .lssembly of olfirghatich, prt. Aharh, 1788, pager 50,51-The Federalat. -to. 82; by the argminems in some of the state coul ventions which ratified it, Debates Virg. Cour hy the adjudications of some of the most respectable of the state juilges before whom this question has been directly brought and slecided, the Commonzoenthh vs. John Feely, Virgisiain cases 321-Jackson vs. Rose, 9 Niles' H: 18, 173-U. Stutes vs. Nler. Cumpben, 10 . Viles' if. Reg. 405-Commonzecalth of PemnTivamin vs. Jichotas A'ontoff, decidted by the attpreme court of Pennsylviania, Alirch 1816, 7 Jolins. 114. 3 Jill. 17, 5 Binniy 512-And also hy what was incidentally but very di tinctly said by ihe stpreme court of the United Staes in the eque of Mistin se. Himeres lessuee, 1 Itheaten 334. As thive portion of the apinion of the xethetme cotret, to wheh I Atiarle, developes the proneipies on which the judicial awhority of the tivied states retts, with a tirect referente tos cases of the mature of that with which the prisoner before us is charged, I will clove the argument, on which I shall foumd int opinion, in the words of that very eminent thatioms *ibuter.
"li) the firsi place, (says the supreme court) as o cases arising under the constitution, laws and treaties of the United States. Here the state courts cunld not ordinarily pussess a direct jurisdiction. The jurisdiction over such c. ses could not exist in the state courts previons to the udoption of the constitution, unt it could not iftemards be directly confenred ont them; for the constitutio expressly requires the judicial power to be ves'ell i courts ord inned and establish-- 1 liy the Unied States. This class of cases would. embrace civil as well as criminal jurisdiction, and ffect not only our internal policy, but our forcign relations. It would, therefore, be perilous to re. strain it in any manner whatsoever, inasmuch as it might hazard the national safety. The same remarks may be urged as to cases affecting ambassad.rs, other public ministers and c insuls, who are emphatically placed under the guardianship of the law of nations; and as to cases of admiralty and nraritime jurisdiction, the admirally jurisdiction embraces all cyuestions of prize and salvage, in the cerrect adjualication of zohich foreign nations are d-epiy interested; it embraces also maritime torts, contricts und offinces, in zohich the principles of the law aud comity of mutions often form an essential inquiry. Ill these raser, then, enter into the national policy, affect the national rights and may compromit the national sovereignty. The original or appellate jurisdiction ought not, therefore, to be restrained, but should be commensurate with the mischiefs intended to be remedied, and of course, should extend to all cases whatsnever."

It is therefore, my opinim, that Joseph Almeida, the prisoner now brought before us, has been ille. gally arrested and detained and that he must now be discharged.

Judge Hassoa then delivered his opinion much at large, in which he concurred with judge Bland as to the unconstitutionality of the act of congress; and therefore by order of the court the prisoner, Almeida, was discharged.

Chief Judge Dorsey haviug been engaged as counsel for Almeida, before his appointment, did not sit in the cause.

\section*{Cherokee Warriors.}
extract of a letter hrov miwasik
With regrad to the rifles presented by the president of the United States, as a reward for the extracrdinary enterprise of three young Cherokee zrar. rios, I must give you a short history.
"The Creeks were fortified on a point of land formed by a bend of the Tallaponsa river, at a place which, from its sliape, obtained the name of Horse-Shine. The river was deemed a sufficient se. curity, on account of its clepth, and that part of the point adjoining the country was strongly fortified by the Crecks, quite across the isthmus, with large square timber, well put together, and raised high. Gencral Jackson appmached the works with such artillery as he had; the Cherokee warriors having been posted on the opposite side of the river to prevent any reinforcements from coming to the Crecks. He then cummenced a cammonade on the works. while the Cherokees and Creeks fought across the river with small arms. The general found that his artillery was too light to make any effectual impression on the works-The Cherokee warriors, at the arme time, found that thrir fire across the river promiscd notling-they frew impatient-and three toung Cherokecs plunged into the river, while the battle was raging, and swain towards that point of
the Horse-Shoe where the Creeks had secured their Water-arafi. As these three brave Cherokees approached the shore, they were fired at by the Creeks, and one was wounded-two reached the shore unhirt; each of these scized a canoe and re-crossed the river; the two canoes were then filled with other Cherokees, who crossed over and seized a number of canoes, and returned. By these means, in a short time, nearly all the Cherokees landed themselves on the Horse-Shoe, attacked the Creeks there, drove them and burn \(\left\{\frac{1}{}\right.\) their cabins. Gen. J ckson, fi iding that the Creeks were attacked in their rear, on their con fo \(\cdots\) fified sround, made an assault on the works ny escalude, and curried themwith the loss of some va luable officers and men; but, uotwithstanding the works were carried, the Creeks fought obstinately till night, when a few escaped. It was estinated hat about seven hendred Creeks fell in the action. The Cherokee warriors suffered considerably, as well as the American troops. A regular regiment, comman ded by col. Witliams, lost a number of men in carrying the works. Col. Wiluams assured me, that, had it not been for the enterprise of the Chernkets in crossing the river, as stated, nearly his whole regiment would have been cut to pieces.

Ni.s. Int.

\section*{African Colonization.}

The fullowing is un extract of a letter zoritten by Thomas Jefferson, to J. \(I\) _
monticelle, Jan. 21, 1811.
Sir-You have asked my opinion on the proposition of A.M to take measures for procuring, on the coast of Africa, an establishment to which the penple of color of these states might from time to time be colonized, under the auspices of different governinents

Hiviag long ago made up my mind on this subject, I have no hesitation in saying, that I have ever thought that the most desirable measure which could be adopted for gradually drawing off this part of our population; most advantageous for themselves, at well as for us.-Going from a country possersiug all the useful arts, they might be the ine uns of transplanting them among the inhabitants of Africa, and would thus carry back to the country of their origin the seeds of civilization, which might render their sojournntent here a blessing, in the end, to that country. Ireceived in the last year of my entering into the administration of the general government, a letter from the governor of Virginia, consulting me, at the request of the legislature of the state, on the means of procuring some such asylum, to which these peuple inight be occasionally sent. I proposed to him the establishment at Sierra Leone, in which a private company in England had alveady colonzed a number of negroes, and particularly the fugi ives from these states dusing the revolutionary war-And at the same time suggested, if that could not be obtained, some of the Purtuguese possessions in South Ainerica as nost desirable. The subsequent legislature approving these ideas, I wrote the ensuing year (1802) to Mr. King, our minister in London, to endeavor to negociate with the Sierra Leone company, and Induce them to receive such of those people as mirlat be colonized thither. He opened a correspondence with Mr. Wilberforce and Mr. Thornton, secretary of the company, on the subject; and in 1803, I received, through Mr. King, the result. -

\footnotetext{
*Nore by the communicutor.- Which was untavorable, owing to circumataaces which do not exist at the-present time.
}

The effort which I made with Portugal, to obtara an establisloment for them within their coloniess proved also abortive.

You enquire further, whether I wonll use my endeavor to procure for suri an establishment, securiy against violence fiom other powars? Cert:inyI , sall be willing to do any thing I can, to give it effect and safety. But I am but a private individual, and could only use endeavors with individuals: whereas the national government cati aildress themselves at once to those of Errope, to obtain the desired security, and it will unquestionably be ready to exert its influence with those nations to effect an object so benevoleut in itself and so important to ? great part of its constituents. Indeed, nothing is inore to be wished, than that the United States would themselves undertake to inake such an establishment o: the coast of Africa-excluive of motives of humanity, the commercial advantages to br derived from it might defray all i's expences.

Accept the assurance of my respec and es erm,
THOMAS JEFFERSON.
[Enquirer.

\section*{Remarkalle Domestic Manufactures. \\ \section*{FHOM THE NEW-york gazette}}

The pieces of goods prepared by the American Twrtars, and presented to Dr. Mitchell by capt Rich. ard Whiley, late of the United States' army, are full of instruction.

They consist wholly of animal materials, and do not contain a single vegetable thread or filament.They are worked with curious art: and the ability displayed both in the design and in the execulion are admirable. They were recieved by that distinguished officer, while he held the military co.n nand at Michillimackinack, as an offering of friendst. it on the part of an aged and venerable chief from the remote regions of the north-west, with an intimation at the time, that they were gifts of extraordinary value.
Their Tartar origin is evinced by the f bries themselves, and by the scenes they intended to re present.

The principal article, is a tawed or soft dressed skin, probably of the Wapite deer, of abont three feet square, or of an extent atmost sufficient to cover a common breakfast table. The color is a dark brown. The consistence of the leather pliable and unifurm throughout.
One of its siles is \(\epsilon\) mbroidered with an interesting scene, wherein the hunters are exhibited as returning to the village after a succesful chase. The embroidery is performed with flexible slips of porcupine quills instead of thread. The stitching is so niccly done that the skin is not punctured through in a single instance, the needle, as in skilful tayloring, only passing deep enough in the leather to secure the work. The dyes, especially the blue, yellow and red, surpass every thing that our most able chemists and manufacturers can extract from the vegetables of the forest.

It was probably intended for a mantle or ornamental covering for the shoulders; all gentlemen, however, of a classical taste, are reminded by it of the shield of Achilles as described by Homer.
In the middle are two quadrupeds, apparantly beasts of prey. From their long tails, it may be conjectured they are conguars, and that the hunt which is celebrated, is that of the American panther. They are encompassed by a ring, as if that circumscribed space was allotted for their confinement if alive, or for their depositit if dead.
At the distance of and inch aind nore from this
sircle, there is a square of ten inches on each side, denoting the common area, or space assigned for general convenience in the centre of the village.
Opposite the four sides of this square, there are four circles of about four inches diameter, and opjosite the four angles of the same four more, representing the habilations of the tribe, constructed around the central area; and, after the manner of the Tartars, the houses or wigwams are circular, and not square. Around these huts or dwellings there are figures of hamian beings; showing that the inhabitants were briskly stiring about. Within them are forms of flowers, birds, and various other oblects; -illustrating, in all probability, some matters connected with their furniture, dress and cookery.
The whole village is surrounded by a work of two feet square, securing and inclosing it completely. On the out side of it, by way of border, is represented a grand dance. On two of the sides arc embroidired nine men each, making eighteen; and on the - pposite two sides five men eacli, makking ten. So that the dance is performed by twenty eight persons, connected hand to hand, and extending round the whole contour of the margin This expression of festivity and joy seems to occupy the part of the male inhabitants, that are capable of partaking the adventures of the forest.
This is picture writing, advancing towards the hieroglyphic. It marks an ara in society of these people, and it designates with singular exactness the progress of the mind in invention, and of the band ii dexterity,
There is nothing perhaps in the celebrated paintings of Mexico, more worthy of plilosophica! and historical rescarch than this and similar fabrics of the indigines.
The Mexican paintings were executed upon cloth and were symbolical. The assinibuoin embroidery is done upon leather, and is imitative. The former is derived from the Austrisians; the latter from the Hyperboreans The more cultivated Malays who people the southern parts of North America, formed the fanious records discovered in New Spain.The ruder Tartars who migrated to the nothern re gious of the same continent are the authors of the fabrics, not less curinns, but in a totally different atile, now under consideration.

American antiguaries have an extensive and fertile ficld to cultivate, and it is pleasing to find so many men of talents occupied in the productive la. bor.

\section*{Franklin's Correspondence.}

The long expected correspondence of 1)r. Franklin has been published in London, and will soon be re published in the United States. The following letter, which is one of the collection, is copied from a London paper:
To William Struhan, requare, king's printer, Lonctun.
Pesay, -Iugust 19, 1784. - Dear frient, - Loin press me much to come to England. I annot withont strong inducements to do so; the find of knowledge you promise to communicate to me, is an uaddition to them, and no small one. At present it is imprac. ticable. But when my gradson returns, come with him. We will talk the matter over, and perhapss you may take me back with you. I have a bed at your service, and will try to make your re idence, while you can stuy with us, as agreeable to you, if possible, as I am sure it will be to me.

You "fairly acknowledge, that the late war terininated çuite centrary to jour expectation"

Your expectation was ill founded; for you would not believe your old friend who told yon, repeatedly, that by those measures, England would lose her colonies, as Ejacte.us wa rned, in vain, his master, that he would break his leg. You believed rather the tales you heard of our poluroonery, and impotence of borly and mind. Do you not reinember the story you told me, of the Scotcl sergeant wito met with a party of fort: Anicrican soldiers, and, though alone, disarmed them all, and brought them in prisoners? a story alnost as improbable as that of the Irishman who pretended to have alone taken, and brought in, five of the enemy, by surroonn ling them. And yet, my friend, sensible and judicious as you are, but partakiny of the general infatuation, you seemed to believe it. The word general puts me in mind of a general, your general Clarke, who had the folly to say, in my hearing, at sir Jolun Pringle's, that, with a thousand British grenadiers. he would undertake to go from one end of America to the other, and geld all the males, partly by force and partly by a little coaxing. It is plain he took us for a species of animals very litte superior to brutes. The parliament too believed the stories of another foolish general, I forget his name, that the Yankees never felt bold. Yankee was understood to be a sort of Yahoo, and the parliument टid not think the petitions of such creatures were fit to be received and read in so wise an assembly. What was the consequence of this monstrous pride and inso-lence:-You first sent small armies to subdue us, believing them more than sufficient, but soon found yourselves ohliged to send greater; these, whenever they ventured to penctrate our country beyond the protection of their sliips, were either repulsed and obliged io scamper out, or were surrounded, beatent, and taken prisouers. An American planter, who had never seen Eurone, was cliesen by us to command our troops, and continued during the whole war. This man sent home to yout, one after another, five of your best generals baffled, their heads bare of laurels, disgraced even in the opinion of their employers. Your concempt of our understandings, in comparison with your own, appeared to be not much better founded than that of our courage, if we may judge by this circumstance, that, in whatever court of Elurope a Yankey ne gociator appeared, the wise British minister was routed, put in a passion, picked a quarrel with your friends, and was sent honic with a flea in his ear, But affer all, my dear friend, do not imagine, that I ana vain enougt to ascribe oull success to any superiority in any of those points. I am too well acquainted with all the springs and levers of our machine, not to see, that our human means were unequal to our undertaking; and that, if it had not been for the justice of our cause, and the conscquent interposition of Providence, in which we had taith, we inust have been ruined. If 1 had ever before been an Aclie ist, 1 should now have been convinced of the being and goverament of a Deity !It is he who abuses the proud and favirs the fium. ble. May we never forget his gooduess to us, and may our future conduct manifest our gratitude!
But let us leare these serious reflections, and converse with our ustual pleasantry I remiemiler your observing once to me, as we sat together in the honse of commons, that no two joirneymen printers within your knowledge, laad inet with such success in the world as ourselves. Sou were then at the head of your profession, anal, sonn after. wards becune a member of parliament. I was ani aycent for a few provinces, and nuw act for them all But we havo risen hy difiersut inodes. I, as a re-
pblic'n prin'er. always liked a form well plained dowo, being averse to those overbeuring letters tha hold their heads so high as to hinder their neigh. bors from appearing. You as a monarcl ist, close to work upon crown paper, and found it profitable; white I worked upon pro patris (often indeed called for's-caf) with no lessadvantage. Both our heaps hold out very well, and we seem likely to make a pretty good day's work of it. With regard to pub. lic affairs (to continue in the same style), it seems to me, that the compositors in your chapel do not cast off their copy well, nor prefectly understand imposing; their forms too are continually pestered by the outs and cloubles, that are not easy to be corrected. And I think they were wrong in laying asside some fuces, and particularly certain head pieces, that would have been both usefil and ornamental. But, courage! The business may still fourish with good management, and the master become as rich as any of the company.

Hy the way, the rapid growth and extension of the English language in America, must become greatly advantageous to the booksellers and hold ers of copy rights in Fingland. A vast audience is assembling there, for English authors, ancient, present and future, our people doubling every twenty years; and this will demand large, and of course, profitable impressions of your most valuable books. I would therefore, if I possessed such rights, entail them, if such a thing be practicable, upon my pos. terity; for the worth will be continually augmenting. This may look a little like advice, and yet 1 have drank no Madeira these six months.

\section*{Foreign Articles. \\ exgland, \&c.}
"King and constitution," and "no popery," will be come the cry through England. The people, one would think, have been fooled long enough by such stratagems.

One of the accounts of the assault upon the regent says that the people were even for killing the horses-crying "down with them," and striking them several times!-A person of the name of Scott wa. taken up as having been engaged in the assaul'; he denied the accusation, saying "he supposed some body must be taken up to get the reward, and that he was selected for the purpose." He was committed for further examination.

The British house of commons was considerably employed on the 3rd of Feb, with the case of a ponr lioy, 17 years old, named Thomas Dngond.The following brief abstract of it may suffice:

The boy made his living by hawking through the streets relipious and moral tracts for sale (as stated in bis petition) by which he obtained a livelihood. On the 10 t of January he pulled down a posting biil, ininterl by the printer to the palice, entitled "Mr. Hunt hissed out of the city of Bristol." For this offence tre was immediately seized by the police, and thrown into a dungeon, where he was compelled to licon the bare boards, from the 10th to the 22 and of Jthuary, fed only with bread and water.He was tincl, with about 50 others, "tied to a long sope, or cable, and marched to Hick's hall and there let luose."
His petition to parliament for rediess, was offered by lord Folkestone; who, with Mr. Addington, Mr. Bennet, the attorney general, Iord Castlereagh, loril A. Hamilon and sir \(\dot{F}\). Buadett spoke on it.It wats finally laid upon the table, with an understanding that the "home department" would institute an investigation of the case.

It appears that the bill which the boy pulled down had been printed at the expence of the police and was watched by police officur ingood was seized under the broad pleat of being a w..grant, and being promished as stated above by cul frement and privation in a place declared by one of the men:bers "to be utterly disgracef.ll to the country"a place so wretched that no man would keen a pack of hounds in it, was dismissed-no one appearing against hins.

Mr. Curwenstated, in the honse of cominons, that one half of the laborers in agriculture, estimated at \(2,500,0(0)\), and one half of chose in manufactures, \(3,000,000\), were without employment.
Some of the petitions for reform have been rejecterl on account of the "violence of their language."

Lord Cochrane, on presenting a petition for refrom from the people of Hampshire, stated that the ineeting had consisted of 50,000 persons, and would probably have amounted to 100,000 but for the obstacles thrown in the way by the agents of the government. He informed the house of commons, that in preparation for this meeting the yeomanry cavalry fir four miles round had been called out, and that ball cartridges were distributed to them and to the regular garrison of Portsmouth-both which were under arms all the time of the meeting :o overawe it, \&c.

The marquis of Camden has renounced the sinecures of his office, retaining only a regulated salary of \(£ 2700-\$ 11,988\) per annum. A great mes it in made of this.

Spanish patriots-From certain remarks, made in the house of commons, it is understood that the British government had much exerted itself for the relief of the Spanish patriots groaning under the tyrany of Ferdinand; but without the least success.

Revenue.-There cannot be a more convincing proof (says a late London paper) of the great decline of the commerce of the country than the extraordinary diminution of the revenue of the posteffice, the receipts of the last year being less than those of the preceding by the sum of \(122,000 l\). which is upwards of 2340 l . per week.

In the old peace tax upon tea, (an article of such general consumption with the lower classes) there is a decrease of \(324,634 l\). making a total decrease of more than 650,0001 . on that article alone.

House of commons, Zeb. 7.-Mr. Calvert said, he rose to move for leave to present a petition from the lord mayor and livery of London. It stated the severe distress of the manufacturing and trading: interests, and which it did not ascribe to the transition from war to peace, but to the enormous amount of the national debt, the profusion of sinecure places and pensions, and an immense military establishment. They allude to the corrupt state of the representation, and pray for a reform according to the constitution, as it at present exists. He trusted this peti ion would be received and read.-

After some observations from others,
Mi: Calvert maintained, that he had never bound hinself to support any petition, right or wrong, but one reason why he would support this was, that he had himself been one of six persons who sent two members to parliament, each of them paid \(£ 4,500\) for their seat; and this independent of the ringing the bell and paying \(£ 10\), alluded to by the noble lord ou a former occasion, was a state of things not to be endured:- (Loud cries of hear, heat:)
The following is the address of the merchants,
bankers and traders of London to the prince regent on his lucky escape-
"We, the undersigned merchants, bankers, traders, and imhabitants of London, deem it to be incumbent on is to come forward with a declaration of our sentunents on the present crisis of public affirs. - We are far fromb being ins ensible to the evils which at present affic. every class of the commonity, mrre especially the lower orders; we are uxiously desirous that every practicable means mily be used for alleviating their distresses; and we entertain a sanguine hope, that the embarrassinents whill which we lave to struggle will, hy the exercise of a wre and enlightencd policy, be overcume; and that the agricut ure, manufuctirses, and commerce of the cormiry, will at no distant period revive and dourisi. We are satistied at the same time that motherb can tend more to retard the accomplish noent of our wishes and hopes, wan the endeavors Which liave recently been exerted with too much ouciess. is desigilig and evil-mioded men, to persua le ine people that a remedy is to be found in meisures which, minder specious pretences, would efice be overurow of tne constitution. To these endwiors ini:) be traced the criminal excesses Fhich is re miety digriced the Metropolis and ollor paris of we eupipe: and the sill more des \(p\) anic and atrocto ts uurrage wich has recently b \(\quad\) con ititicel against the sacred person of the prame res \(=11\), on hins return from opening parliameit, wace exer tov of the functions of our revered monireli. Wc cannoi adequately express our ab. horrence of int en amaies, which, if not repressed, must lead .0 seenes of anarchy and bloodshed, too appouing to eomtenplate; and we feel it to be a solemia and imperions duty we owe to our country, to pledge ournetses individually and collectively, to stip ,ort the jusi exercise of the authority of go. verumeat, to maintain the constilution as by law estwilisied, and to resist every attempt, whether of craf. or of viulence, that inay be directed against ou: civil liberty and our social peace."

London, tib. 4. The expected message from the prince rugent was yesterday brought down to hoth houses of parliament. As it calls their attentim is papers conlaining informa ion; an appoint. men of coumittees will probably take place in order (1) catmine them and to make reports; af er which, bills will be moved for upon these reports. In both biauses the message will be discussed to night. As to the ul imate measure to be adopted for the preservatom of public tranquility, the general be. Lief is tiat a suspension of the liabeas corpus act will ith be itsurted to, but only some enactivents, whish will timit greaily the mimber of individuals wio stanl be emitited to assemble, publicly or privaily, without previously obtaining the con-y-uot te viciny. The priviceses of corporate and cariered bolies, are to be lied sacred; but no wetgrolar men i.."gs, like those ut whelt Mr. Hunt cxtimbe, will ve permitted on any pretext.

Tie ines ige is accompanied by copics of certain eriourn iow laken betiore the pring council, from wheti we werts to hear that, in Lancashire in par. ijsular, line exists most dangerous societies, of \& seons ouf therefore illegwi descripion; having For then a \(j\) th, t.e disturbance of the phitic tranyouliong mig liat liringing into contompt all the entilisiad authontics.

If Hextant that Tally,yrand is not yet sufficed to apincr ai i. T F racli cuirt
A firend has put into our bands a Paris paper,

Jan. 26, a full sheet supplement of which is fillèd with the report of coment Buenot of the house of deputies, on the ways and means of defraying the expences of 1817. After a view of the financial operations of past years, he proceeds to state the estimate of expences for he year, which he makes 16 millions lcss than the ministerial estimates, as fol1 w's
\begin{tabular}{ll} 
Ordinary expences & \(468,000,000\), francs \\
F.xtraordinary do. & \(431,000,000\), \\
Expenoss of pub. delbt & \(157,000,000\),
\end{tabular}

Making a total of \(\quad 1,056,000,000\), francs, which is about equal to \(198,000,000\) of dollars Of this sum it is proposed to raise \(759,000,000\) by taxes and imports of different funds, and the deficiency of \(298,000,000\) by a loan, from a company through which it was expected that the aid of foreign capitalists might be obtained. To enable the government to effect this loan, it was proposed to appropriate, from certain revenues, the annual sum of 30,000,000.-Bost. Daily Adtv.
SPAIN.

A small insurrection lately took place in Valencia, Spain. Gen. Elio dispersed some and took others of the rioters. Several of the latter have beell executed.

SORTHERS EUROPE.
The duke of Montfort (Jerome Bonaparte) appears quite at his easer. He has a fine estate in Upper Austria, which lie has late purchased.

A treaty of commere had been concluded between the courts of Vienna and Brazil. The Austrian government were litting out the first merchant vessel for a voyage from Trieste to Rio Janiero.

\section*{Vaccine Disease.}
from the drlawate watciman.
Mr. Wilson-If you siould deem the following rela. tion of facts, upon a subject of no little importance to society, likely to prove useful to the public, you are at liberty to insert it in ynu paper
S. H. BLACK.

Upon the 27 th day of February last, I visited by request, the family of Risdon Anderson, a black man, residing near the head of Back-Creek, in Cacil county, in the state of Maryland. I found his eldest son Adam, aged about 21 years, and of a robust habit, laboring under the small-pox, of the distinct kind.-Anderson is poor, and has nine children iu his family-eigit of them appeared at that time to be frue from disease-mone of these had however becn secured, by innoculation, from an attack of the small-pox; and an aged mother alone could have remained as their nurse, in the event of the discase extending by contagion, \(t\) rough the family. The propricty of vaccinating thes: children sukgested itself, as being most likeIs, at once to serve the a.use of humanity, and i test by a fair experiment the relative power of these two diseases in the human system. Having some genuine vaccine virus, I innoculated with in (ieorge, aged 18 years; Sarall, aged 16 years: A'ex -nder, aged 10 years, James, aged 7 years; Priscilla, aged 5 years: Pcarcy, agcd 4 y cars; 1:lizab. 111 , ared 2 years; and Solomin, aged 15 car. Four as: afier the nstal characteristics of the cowpock ppleared in all the cases. Upon the fifth day, how. ever, George and James were attacked with chills und ferer, which was soon succeedal by pustuless if the small-pux, with which they were nearly covered froin head to foos, these two very narrowify
escaped with their lives; the disease relainny a cus. tinct character, perhaps alone saved them.

Upon the seventh day, reckoning from the perind of vaccination, Sarah was attacked with symptoms - of small pox, and upon the following day there ap peared abotit one hundred petstules, of the voriolus kind, upon different parts of her body, and extre-mities.-She did not suffer materially from the disease. Upon the eighth day one small pustule appeared upon the supper lip of Alexander, which never filled with any sort of matter; and upon the same day one pustule of a sinilar nature was observ. ed upon the arm, and one upon the right leg, of Pearcy; but in both these cases, the symptoms of previous and? subsequent indisposition was so very inconsiderable, as to leave it donbtful whether this slight eruption resulted from the vaccinc, or from the variolus discase. The appearance only of the pustules induces me to believe, that they were pro hably the effect of the last expiring effects of the small-pox. Priscilla, Elizabeth, and Solomon, the last a remarbable gross child, escaped free from crery appearance of disease, except the usual symptoms of a mild cowpock.
It may be necessary to remark, that these chil dren all occupied the same room, and had but one common fire side: No attempt was made at any time to separate one part of the family from the other: their house, and their poverty, would in fact have rendered any such measure impracticable : nor was any preparatory regimen or medicine directed - used.

The foregoins experiments seem clearly to warrant the following conclusions:

1 st. The cowpock, when genuine, will, under all sircumstances, most certainly prevent the smallpox. This unfortunately is by many still doubted.

2dly. The vaccine virus introduced into the sysfem five days afier the variolus virus has been received, produces no good effect.
Sdly. A successfill innoculation for the cowpock, made three days after the system has been charged with the infection of the small-pox, will either totally destroy, or render perfectly harmless, that otherwise formidable clisease-and hence the importance of vaccinating patients even several days after exposure to the contagion of the small-pox.

Lastly-It appears that the peculiar change which is produced in the human system, and by which a subsequent attack of the small-pox is pre vented, is not effected by the cow-pock sooner than the eighth, or perhaps the ninth day after innoculation.
I cannot close these hasty remarks without ex pressing my sincere regret, that any circumstance should happen, tending to discredit the utility, and the importance of the kine-pock-and preventing it from being universally received

Perhaps an entire union of sentiment upon any mbject, is not to be expected amongst mankind; jet upoh t!is I am surry to believe good cause has been given for a diversity of opinions.

The process of innoculating with the cowpock viwis has been thought so very simple, and the true characteristics of the disease so obvious and platin, as to put it fully within the reach of every man and every woman : hence every needle has become a lancet, and almost every house fiound to contain a male or a fermale innocilator. These are likely to prove most fatal errors.- 'T is well known in the medical world, that to distinguish corsectly between a genume and a spurious cow-pock, is very tar indeed from being an easy task. The disease seems to be one sui genetis. It has been known for
more than twenty years; and, doring the whole of that time, physicians in every part of the world have been laboring with indefatigable industry to discover its nature, its laws and its powers, and by reasons and experiments to bring it, if possible. clearly within the scope of thelr knowledge :-yet there are thousands who no sonner hear the name of the disease, than, as if by intuition, they become at once acquainted with all its inysteries.

It is well known that a thousand sores may be given to as many patients, by the introduction of matter taken even from the pustule of a cow. pock, beneath the cuticle, and yet their may not be one single case amongst them of the genuine vaccine disease; nol may one of the subjects of such experimen's be secured from an attack of the small-pox-lnstances occur, almost daily, of the sinat!pox being taken by persons said to have been previously innoculated for, and to have had the cow. pock. S:cci accidents are not only injurious to the individuals who are the subjects of them; but also extensively derrimental to socicty at large; as many are in consequence discouraged from receiring the important benefits resulting from this mode of innoculation.

The superior mildness and safety of the vaccine disease, when compared with the variolus, even in its best possible form, seems to be indisputable. The only remaining question with the public iswill the former certainty prevent the latter? If the above statements and experiments, which have stricl truth at least to recommend them, answer this query to the satisfaction of any, I am satifised.

\section*{A Board of Agriculture proposed. \\ fhom this albanyarges.}

The following plan of a Niutionai Board of Agriculd ture, accompanied the petition of the leerkshire Agricultural Society to congress; and as a select cominittee have reported a bill founded on these suggestions, we submit the plan to the perusal of our reuders:
First-A national board of agriculture to be organized, to consist of the members of congress for the time being-honorary niembers to consist of all for mer members of congress, and all such other persons as may, from time to time, be elected: the latter. inay deliberate but not vote.
Second-The vice president of the United States to be president of the society: the other officers of the suciety to be annually elected.

Third-To give vigor and effect to the measures of the socicty, an appropriation of several valuable tracts of land in the national territories, and in eligible sitnations; to constitute a permanent fund for the promotion of agriculture within the United States; as also an annual appropriation of iwenty thousand dollars, for the like purpose, to cease as soon as the revenue arrising from said land shall produce that sum.

Fourth-A gricultural societies in any state, not possessing established funts, but whieh shall in any year evince to the national board of agriculture to have produced the preceding year the great est quantum of public good in relatiun to any oulher society int the sulne state, in promoting improvements in agri culture, of practical utility, shall receive from the national fund a sum equal io that which the said society shall have expended in premiums in said year, not exceeding the sum of \(S\)-, unless the aggregate find shall be increased.
Fith-Sail state societies to be compelled to apply the whole of the monies they shall thus receive, ex-
clusively to premiums on articles of agriculure, to be awarded and paid at stated annual exhibitions, in a manner to be prescribed by the societies respectively, and approved by the board of agriculture.

Sixth-Not more than one socicty in any one state can receive aid from the said fund in the same year: other societies in the same state can by their efforts, enterinto an annual competition, so as to produce a spirit of emulation, as well among societies as individuals.

Seventh-Should there be no organized agricul tural societies in any state, the board of agriculture can organize one or more, with power to annul the same should their efforts not comport with the views of their institution.

Eighth-The board of agriculture to meet in Washiagion, statedly the first Tuesclay erening in each onth, duri:s the siting of congress, commencing the secund week iffer the meeting of congr s.
Ninth-T0 give effect and permanency to the measures of the society, and to inantain a foreign and lone tic correspondence, there shall be an executive cominittee of three persons (heins mem. bers) amnually elecred- (he first named to be chairman , whon shail have a secrevary, to devote himself exciusively, under the direction of said chairman, to all the duties which shall be asaigned to said committee by the board of agriculture. The clair. man of said commi'tee shall receive for his services, S3000, and each of the two meinbers \(\$ 1000\), an. t the secretary \(\$ 1500\) per annum. It slaall be the du'y of said committee to open an office at Washington, to be de rominated, office of the Vational Boart of agriedlure-S.id office to be the place of meeting of lie bourd of agriculitre and the executive commitree; also a place of deposit for all boohs. on agriculture, seeds, plants, models, and macinines of agriculture.
Tenth-It shall be made the duty of all foreign agents, and encouragement be given to all intellifent sea captains, 10 collect and transmit to the exechtive cominitice such information and articles of abriculture as they may deem ureful to the genemal in crests of the United States

Cil ven-h-Tine several state socicties who shall recerve aid from the national board of agriculture, to renurt in the chairman of the executive committee jourl!, the existing state and progressive im. provembins in agriculture in said state respectively; als, , hiris proceedings-premiums paid-to whom -an what objects, and amount; also the effect pro. ducedt; and io sughest such further measures as experiener shall moticate.

Tiweif fi-ll shall he the duty of the board of agticulture to correxpond, through the secretary of state's office, with all Americith amhassadors and consuls th every part of the globe, in relation th the objects of the mational society-also, with all the alate agriculural socictics. All letters goug to and from the otlice of the said execintive coimmitee, ta he free of postage. It whall also be their duyy attuthly to prepare a digeat of all repurts from thic alate surieties-cominnmeations from abroad, and all viher informal iun they may deen usefits: alsu, a thement of all receipts and expenditures, to be annully ligadated at the office of the comptroller of the United Ststes.

\section*{heyates of a connearoxinxyt.}

It will be ubsious to every persum, that the na. tional society, thus organized, will be instrumental tiv pretucing incalculable results in a few years. The suciety will have little to do otherwibe than a month!y interesting meeting, to regulate and keep
in motion the machinery; thits, constituting a new and highly interesting department, attended with a trifling expence, comparable to the great national objects t? be attained; and eventriaily, when the land appropriated to produce a permament fund shall effect that object, the expence will be unknown and unfelt by the nation, although this find will probably increase for many years; and in its effects, in less than half a century, it will be productive of a new era in our agriculiural pursuits. It will also tend as a cement to the umion, by assimilating our agricultur:il habis, by unifo:m excitements antl competitions; thus rousing and bringing into activity a laudable and useful spirit of emula tion in every section of this great republic.

\section*{Legislature of New-York.}

Answer of the huwo of asacmbly io the communication of his ezcellency Daniel D. Tompkins, resiguing the office of governor of this slate, reported by Mr. Irving, and uanimously adopted. With feelings of sincere regret we have received your excellency's communication, announcing your resignation of the chief magistracy of this state. The period during which you have administered its government, has been marked by evenis of a highly interesting nature. Advanced to this responsible station, at a time when prosperity and peace prevailed with our limits, your administra. tion promised an opportunity of cultivating those arts and improvments whicli are alike the convenience, the ornament and the pride of a nation.

IRemoved from the European continent, it was hoped that our distance, and the pacific habits we indulged and manifested, would preserve us from tiose violent agitations which have convilsed the old world-exhausting its wealth, and desolating its inhabitants. Youlial scarcely, however, assumed the reins of govermments, when the injustice of foreign powers, so affected our national rights, as to produce a course of commercial suffering and restriction which eventually terminated in war. It has therefore been your lot to preside over this state during a period of great difficulty and embarrassment, when with a diminished revenue and inipoverished resources, it was ca!led on to sustail all the hardships and privations of war. Vour patriotic: devotion to the best interest of your country c?uring this arduous contest-the zeal you nranifested-the spirit you infused-anal the enorgics which you rous. ed into action-while they enmmanded the applause of our sister states, will ever enlear youl to those who were the immediate witnesses of your attachment, your srelor and your enterprize.- Througla your instrumentality, the extremes of the state. which were equally threatened with assailment. were placed in st situation capable of repelling tho approaches of an invacler. 'Those botders which. diring our revolutionary struggle, were the seat of incrciless warfare, fand which were aspar esposed to similar devastations, were rendered, throngli y ous carly solicitude. not only able (o) sustain lie jressure of an enemy, but to tectaliate upon him tie raviges lie might venture to perpetrate. From points of weakness, they were converted into places are wtrength, and becatne the seats of splendid heroism and exalted achievinent.

Whether employeal in the estrablishment of uscful institutions, in fostering the liberal views of science. or providing the resources of war, we behold youthe faithful guardian of the best interests of the state. After a perind, therefore, of ten years engagel ace. rively in is service, in your presens separation from
its immediate concerns, you bear with you the warm attacinment and the best wishes of its inhabitants. In their belalf we reciprocate the sentiments of regard which your excellency has so feelingly expressed; and while promoted to a spliere of more extetsive usefulness, may you by an equal devotion to the general weal, secure to yourseli the best resompence of public services-lhe approbation of your own lieart, and the lasting affection of our sountry.

A public dinner was given at New York on the S1st ult. to Mr. Tomplins, late commander in chief of the militia of that staze, by the officers of gen. Morton's division of artillery, and of gemerals Mapes and Ward's divisions of infaniry. There is a warmell of affection mamfested for thi-gentleman, by all classes of the peuple over whose goverument, civil and military, he dately proviled, that must be very grateful to his heart-constituting the best reward for his efforts to serve his country.

This dimer sppears to have been prepared with uncommon splendor, and was honored with the presence of many distingnished guests, among them were maj. gen. Brown, and colonels Uindman, Wool, Gardner, and Croghan, of the United States army -the mayor of New York, maj. generals Vin Kensellaer, Stevens, and Ste idiford of the N. Y. militia. Mr. Tompkins being called upon for a toast, after a short but handsome address, gave-

The officers of the militia of the city of New. York-distinguished, in peace, as unassuming and accomplished citizens; in war, as the willing and gallant defenders of our great metropolis.

Upon his retiring, the president gave-
His excellency Daniel D. Tompkins, late commander in chief of the militia of this state; while the zealous and faithful discharge of his duties dur ing a long administration, claimed the public respect, his uniform and undeviating attention to the advancement and respectability of the militia of this state; and the kindness and urbanity with which his duties were on all occasions performed have secured to him our sincere atd lasting esteem.

\section*{General Brown then gave-}

The men of every corps who evinced a spirit to sustan the rights and honor of their country.

After the general retired, the president gave-
Major general Brown-He drew from the sources of his own intelligent mind the science of the soldier: his daring and intrepid spirit gloriously developed that science in the field.

\section*{CHRONICLE.}

Whe Georgetoron . Messenger of the 16 th inst. intimates that the president is about to make a tour of the United Siates.

Aiurul.-The U. S. schooner Homet, lient. Clax ton, arrived at Charleston on the 6th instant, in \(4: 5\) days from Gibraltar, with despatclies from com Chauncey. Left at that port the ship Washington. sloop Peacock, brig Spark and store ship Alert.The rest of our squadron was at port Mahon. No, thing important is mentioned as having occurred in the Mediterranean.

Connecticut election.-The "toleration ticket," so called, has succeected in this state. Mr. Wolcott hat has been elected governor by a majority of about 800 votes-his opporent was Mr. Smith, the then governor. The election appears to have been ver! warinly contested. In the assembly, there is "is pepublican majority of at least \(5 . "\) In the famous
town of Harifurd, out of 880 votes the federal candidate for the legislature had a majority of 32 .
-1hssachusetes chectinn.-Mr. Bronk:s has been reelected govemor of Massachusetts-his opponent was sreneral Dearborn. The returns are not yet fully received.

Arrow Robt has been planted on the Islands of Georgia with success. It is said that Cochine al is found on there islands, subsisting on the prickly pear.
"Emigmants' mertory."-Mr. Henry C. Southwirk, of Aubum, N Y. proposes to publish a new "lo x to be entitled "The II estern Gucetteer; or Emigrant's Directory. - Containing interesting geographical ilescriftions of the western country-viz. the states of Kentucky, Indiana, Louisiana, Ohio and Tennessee, and the Illinois, Missouri, Mississippi, Michigan and North-Western territories, together with some of the western counties of New-York, Pemmsylvania and Virginia," \&cc.-By S. R. Brozun. The work will make an octavo volume of between 3 and 400 pages; price, in boards, \(\$ 250\)
Tie author, Mr. Brown, we are assured, is very competent to the work he has undertaken-as an int elligent correspondent, he has been known to the editor of the Regrister for several years-and he has seen much of what he is about to favor us with a description of.

Commerce of Ceorgia.-The "Savannah Republican" of the 27 th ult. contains a very interesting exposition of the commerce of that city. It appears from this statement that the value of the native products and manufactures of Georgia, shipped from thence in one year, ending with September, 1816, coastwise and to foreign ports, amounted to the enormous sum of \(\$ 10,322,880\) ! Thus-
By the report of the secretary of the trea-
sury in February last, the exports of
Georgia for that year were put down at \(\$ 7,511,939\) And there was shipped coastwise, in 31
\[
\text { ships, } 98 \text { brigs, } 49 \text { schooners and } 44
\]
sloops, cotton, rice, tobicco, \&c. to the
value of
2,981,481
Deduct foreign articles exported 170,540

\section*{Value of native products}

10,322,880
Commerce of South-Carolina.- The editor of the (Charleston) Patriot, noticing the preceding statement, gives an opinion, which is a reasonable one, that the coastwise exports of South. Carolina may be estimated at \(\$ 3,700,000\)-giving a total value of exports from that state of fourteen millions and a hulf, for une year. Af er mentioning that a cousiderab e quant ity of the products of South-Carolina pass down the Suvannah river, from the town of Augusta,he ub-serves-"Put these facts together, and we think we may be allowed to say, without fear of contradiction, that South-Carolina is the greatest exporting state in the union."
Yet the cry has been-that the southern states were anti-commercial!
Health of Suramnah.-The mayor and aldermen of Sav miah, in common council assembled, have appro\(\mathbf{r}\) ated \(\$ 71,000\) for the purpose of bringing about a c'ianre of the culture of the low lands adjacent in that city, by which it is reasonably expected that the generai health will be exceedling improved. The lands alluded to are at present occupied as rice-plantations-it is designed ra appropriate them to the raising of cotton, corn, grass, \&ic. requiring a dry culture.

\title{
NHLES WEEKLY REGIS'TER.
}

Hac olin memainisse jurddut.-Vingle.

ALvana's cask - The ex'ranrdinary finterest excited by the late decision of the jull res of Balamore cinnty court in the case of ilmeide, made us elcsimus of filllowing the npinion of judgre Bland by chat of juige Hishson, which we expected for the present number. The non receipt of it las considerably affecied the arrangements that otherwise would lave been made for 1 is week's busi ess.

Capt. Almeida has since been arrested hy a warrant obtained from jurlge Uuval, of the sitpreme court of the Chited states Application has been marle to admit him to bail; but the result of it is not yet known.

Wi hout preten ling to give colr "opinion" on the great question involved by the decision of thuse juiges, which is strengthened by that of several vihtrs, weareplesed lo obourve that it seems likely to raise up a spirt of enquiry that will probably bring about a conclusion upon it, by the competetr authority. To assist t!is engury and lead in the desired conclusion, we bave lierein inserted \(\mathcal{K}^{\circ} 08 \operatorname{loff}^{-1}\) s case.

0 It has ever been the unwearied object of the editar to preserve for the possessors of this work all important matters and things having a national character. There is a pleasing eviderce that he has succeeded pretty well in this in one departnient, by ohserving that judge Jland, in his opinion, referred no less than five times to the Weekly leegisteu for important judicial decisions.

Niw Jeusay cavar-The editor has been furnished with a copy of the report of the commissinares appointed by the legislature of the state of NewJersey, for ascertaining the most eligible route for, and the probable expence of, a canul, to connect the tive waters of the Dolaware with those of the Ruritan-accompanied with some pointed remarks, in manuscript, on canals, generally, \&c by an anonymons correspondent;-neither of which shall be neglected.

We earnestly recommend the "Pillsturg report" on manufactures, to the attention of every elisy of our readers.

\section*{}

An extraordinary diminution of the revenue of the lirilinh prost-office establishment was noticed in our lat paper-its receipts for the last year being e122, 100 leas than those of the preceding-but there lias been a much more exiraordinary diminu. fion in the business of another pest-office, suore unmedately Afecting us. The month of Aprat has bitherta been the chief harvestemonth of the edioor of the Wy, why REantsin, and lie was accustomed in reccive at least fificen, if not twenty, letters per do in in it, from his friends ut a distance:-hut in this present April, withont any diminution in the busimess of the establislament, four days on one ve. casion and three days on anotlier, pussed over with. out bringing to it a single letter. I case similar in either of these never before occurred since the comInencement of this preper.

Vom XuIf

\section*{Support of Paupers.}

The very generul practice of comp ring the state of things in America wath their condition in freat Britain, las latterly made many desirous to ascertain the facts belonging to patuperism in the Unt ed states-a su!.ject of very serious con xleration and of a most alarming extent, in Elighand.

A statement just published by the auditors, exhibiting "the account of the steward of the puor upuse and house of employment for the county of Iurk, Penn. for the year ending on the 22nd day of Iuly 1816 , furnishes some facts illustrative of this matter.

The institution has credlit for cash receiv d for catlle, grain and vegretables raised on the furm, \&e. and sold, amounting to \(\$ 1217\) 69-and by wther commodities, the prorluct of the farm or of the labor of the panpers and others, estimated at \(S 5,284\) 76-urether 87,501 85. Ainong the latter we hive 583 bush. Lleat, 240 ryc. 326 barky, 255 oats, 1000 corn, 450 potatwes, with hay, cabbast, mions, \&ic. and 425 lbs. fax, 1212 yaids various line:1s, 10.540 lbs beef, 2917 pork, with veal and inution, \&c.

The esuablishment is charged with cas'1 paid for labur performed on the farm, and maty littie supplies including S275 for sugar, coffee and molasses, \&c. amounting to S 119473 ; and wiili grain and meat, \&c. consuated by the institution, including fire-wood, to the value of \(\$ 4,69533\)-logether \(\$ 584506\); leaving articles on liand valued ai \(\$ 1656\) 79.

There is no charge for the salaries paid to the steward, plyysician, dec. all which amount to S65jbut it would seem from the preceding that the profit of the farm is competent to the entire maint.inance of the poor. The live strick, 6 horses, 3 colls, 6 bullocks, 15 cows, 40 sheep and 40 logs, was valued at \$ 1,478 .

The paupers, on the 22 ud of July 1816, were- 45 men, 2 J women and 10 children-total 75 . The auditors saty the institution is "over-charged"

Taking this as the aver.ge number, an destimating the popula on af the colus!, st 37,000 [25,642 in \(1800,31,958\) in 2810\(]\) it uppears that a very sumal fraction mure \(t\) tan one in fore mumdred of the penple. of this county are panpers. In Eugband, the averago is one in fire. In this respect then, York county stands to Fingiar d as one is to a hundred.

\section*{Pittsburg Report.}

Repport of the committee appointed ly the cifisens of Piolshorys, ist a meetsng hell as phat court-house of the 21 ni of l)ermber, 1 हl( \(i\), to inguire into the state of the many finturea in the aty and its immeritate vuramity.
IRemd, Febuary 1\%, 1817, in the liouse of representatives of the Vitited States, and ardered to lie "pris the table.
The commattee appointed by the citizens \(\alpha\) Pittsburg, convenm at the court-house on Saturday, the 21 st instant, to inguire into the state of matinfactures in Pittsburg and its vicinity: have levoted is inuch time and attontion to the subject
as theirnecesiary avocations, and the short period limieed for their report would permit. It would have been impossible for them to ascertain with any degree pi certainty the number and variety of matofscouring establishments in and near the city, -1 1 lamel less the aggregate value of their proif as The committee moreover did not regard their instructions, as demanding any considerable at ctitin to those subjects, and have directed their vinus to sich branches of industry as have declined -. the wiant of n_tional encouragement. In the discharge of this duty, they have found that the prunifueure of cotions, woolens, flint-glass, and the liner artisles of iron, has lately suffered the most alamiag depressio:t. Some bratches which hat been several years in operation, have been deforojed or partiaily suspended, and others of a more recent growth, maibitated hefore they were compietaly in uperation. The following facts from maFv others, of less moment, within the knowlelge of we committee, are stated in illustration of this pa:t of the sulject.

The cotich factory of Jelly and co. occlapying a IArge three story brick building, and propelled by stearn, is not now in operation, and most, if not all the hatak, are clischarged.

The wholen factory of \(\mathbf{1 1}\). Arthurs, condticted by the asency of steam, is now but partially in opetion and the number of hands reduced one half The same observation applies to the woold fac toiy of George Cochan, lately removed from l'itsFure, to Beaver creek. The flint glass, formerly m.ute in Pittsburg, and which in pont of beauty ant style of workmanship, equailed the funest glass from Europe, amounted to upwards of 130 thou--an I clollars per annum. The enormous influx of forcign glass has already stopped one of the liznaces, and reduced the manufacture about thirty tho'sand dollars a year.

The wire factory of Mr. Eichbaum, carried on by steam, is no longer in operation.

The butt lisigge factory, latcly erected by A. Bcelen, has fallen a victim to the late importations. The manufactory for curry combs, established by the same gentleman, has met a similar fate. The importance of our manufactures in iron, may be csimmated from the following facts: In Pittsburgh and its insmediate vicinity there is an anual consumption of pig iron to the amount of 1800 tons, which gives employment to about 150 hands. The value produced is estimated at 225,000 dollars per amum. Of wrought iron there is annually worked op, above two thoustand tons, furnishing according to the best estimate in the power of the commiltee, a produce of one nillion theee hundred thousand dollans.

The great mablic injury and private distress, which have attended the late depression of manutictures, scems not confined to l'ittsbugh or the western country-from many parts of the middle and northenn states, the same complaints are hearí, ard the same distress appeays to prevail. The tide of inportation has mundated our comitry with foreigrn goods. Gome of our most valuable and enterpriaing citisens, have been subjected to enormous losses, and wihers overwhelmed with bankrupicy and ruin. The pressure of war was less fatal to the hopes of entermize and industry, than a general peace, with the calamities arising from the present state of our foreign trade. The circumstances which have induced such a condition of things, demand the investigation of the national goverrment, bound as it certainly is, io provide for the general welfare of the community. tmong the iaducements presented to men of capi;
tal, to invest it in manufictures, the langunge anal the conduct of the administration were not the least. It was certainly understood, aill every one was led to beiieve, that government was at length convinced of the necessity of a reliance on our own resources, and that a permanent support would be given to domestic manufactures. Their growth and prosperity during the war, seemed to atone for its most pressing evils, and became a topic of triumph and exultation at its close. Although we had acquirel no territory, nor extorted a formal acknowledgment of the rights asserted by an appeal to arms, the development of our interior resources promised a stability 10 our independence, which seemed an equivalent for the sacrifices we had inade. It was earinestly believed that the destinies of the United States, would no longer depend on the jealousy and caprice of fureign governments, and that our national freedom and welfare were fixed on the solid basis of our intrinsic meass and energies, But these were "airy dreams." 1 peace was concluded with Eng. land, and in a few months we were prostrate at her feet. The manufacturers appealed to the general government for the adoption of measures, that might enable them to resist the torrent that was sweeping; away the fruits of their capital and their industry Their complaints were heard with a concern which seemed to vouchsafe the return of better days. The tariff of duties, established at the last session of congress, and the history of the present year, will demon. strate the utter futility of their expectations. Vast quantities of the circulating capital of the country -the life-blood of domestic enterprize-have been drained into a foreign kingdom; our own manufacturcs have been superseded by British goods, and a balance of trade already stares'us in the face, equal, perhaps, in amount, to the whole specie capital of the union. Even the British government, whose rooted and implacable hostility to our manufactures has been proverbial throughout. the world, is at length gratified with a complete triumph. Mr. Brougham, a distinguished member of parliament, in a late speech, after noticing the great losses which accrued from the vast exportation of goods to the continent, uses the following language: "The peace with America has produced somewhat of a similar effect; though I am very far from placing the vast exports which it occasioned upon the same footing with those to the European market the year before; both, because ultimately the Americans will pry, which the exhausted state of the continent renders very unlikely, and because, it was zwell zworth twhile to incur a loss upon the first exportution, in order, by the glut, to stifle, in the cradle, thase rising manufuchures in the United Siates, zohich the zvar had forced into existence, contrary to the nutural cour'se of things."

When the destruction of our manufactures forms a strong feature in the views of a rich and warlike power, jealous of our rising strength, and unchangeable in her hatred towards us, their security becomes an object of national pride, and seems to involve the national honor. To England the growth of our manufactures is a subject of concern and dread; their declension a signal of great joy and triumpl. Her strength is our weakness; her jny our sorrow; her glory our shame. In such a struggle she regrets no sacaifice, and spares no treasure; the millions scattered to-day will produce a rich harvest in all future years. Is there not virtue. energy and patriotism in the American people to withstand her hostility against their vital interests -a hostility, open, palpable and direct? The eagerness of England to paralyze our manufactures, in itself, demonstrates their importance to us as a na-
dion; they are a resource of wealth and strength which she deprecates; their success would sever the bond which has held us in a servile and mercenary dependence on her from the first settlement of our country. This dependence continued when our allegriance had ceased: and frce America was as valuable to Engtand as her tormer colonies. Our governiment was our ow:n, but our treasures were still feets. From Fingland we still continued to import the very necessuries of life, and a momentary interruption of our commercial intercturse was a privatioll of zaluy of our accustomed enjoyments. Her frowns brought instant stagnation upon all business, and reuched every condition of life. At the beginnity of the last war ourr government was under the necesiity of either conniving at illicit importations, or sulfering the inerchants to compound for their evines of an immense profit, in order to get a sup. Thy of clothing for the army. There is no man of intelliyence whu has not a lively recollection of the sutferings of our gallant troops from nakedness alone We mention it nat in the spirit of detraction or com-plaint-bat to exhibit, in the strongest light, the evils of abject dependence, sad the necessity of ronsing the pride and patriotism of the nation to provide against it in future.

Anum the necessaries of life, we may safely rank cl ohing and subsistence; these we ought not to sec-ive foom the hands of Furopears. The United Slates possess, within themselves, almost every malerial requisite in the more inportamt manufic. tures. The inventive genins of our citizens, their enterprize and indusrious habits, will enable them, under the care of a paternal govermment, 10 equal any other tation in all the necessary branches of mec.anical art. Frie want of capital is no longer an oljection (1) their efficient encouragennent-and the want of skifful workmen, though now but partially folt, is an inconvenience which results, in some ineasure, from the neglect of government. When it shall be knowin that manufactures ave under the sacred guar lianship of the nation, foreign artists, many of whon are on the point of leaving our country, will rein in among us, and others, encouraged by the spirt of cur free instilutions and the prospect of a cimperency, will come to Imerica for employment. Even the short periol in which our manufactures had met encouragement, brought hundreds of foreign workmen among us; a prowf, demonstrative that a fiw years of prosperiiy woald produce an titiple supply of labor and of skill. The committee ate aware that many worthy men, regarding agricublure as the basis of national wealth, or insensihily biassed by comiderations of a Incal nature, opp phase the extensim of firther aid to manufactures.
O.1 this subject they have neiber leisure nor in. clication fur the discussion of abstract systems of polite deconomy; they will advert to principles Faniliar to the mind of cuery practical man, and to faces within the knowladre of all classes of citizens. It is certainly frue that the subsivence of civilized in in ilepend, in a great measure, on agriculture; but this branch of indistiry, when properly conductad, is necessarily preceded by manufictures. The implements of husbandry are the work of artificers, and the farmer, before he opens his soil with the plongh, inctst recur to the workers in win) d and in iron. Thratigh all the varicties of agricultural Sabor the same dependence is preserved, and it is inponstible to imagine a staic of socicty in which it call be carried on, detached from the mechanical arts.

The value of apricultural labor must depend on She value of simplis sobsistenct which it places in
market. In the interior of the United States, few articles can be raised which will bear a distant transportation; products much more valuable when the grower and consumer are near each other, are therefore excl ided from cultivation. A dependence ons foreign markets in the most prospervis times necessarity restricts the labors of agriculture to a very few objects; a careless, decrepit, and umprofitable cultivation is the known result.

The propriety of these observations may, in some degree, be illustrated by the difference in value between the land in the vicinity of a large town, and and at a greater distance from it. The labor which produces the greatest quantity ofsubsistence is bestowed in the culture of articles too cumbrous firs transportation; and in general a farm which will subsist fifty persons in ris vicinity, would not subs sist the fifth of that number three hundred miles off. If the value of land be so much enhanced by the proximity of a in:rket, and so rapilly diminishes by the distance of transportation, the intrenluction of manufactories, and the creation of an interior market, ought to be regarded as peculiarly auspicious to the interests of :

Within a few years past, l'ittsbimg has grown from an inconsiderable town to a city of ten tho:1sand inlagitants; two-thirals of the jopmbation are supporicel by manafictures. The emterp) ive and skill of our artificers bave created a creculatint capital of very great allumbt. Spacious buildings, with other inmprovements, haverisen up in ala alnost magrical successinia; the agriculture of the country around has fomishe land extended with a cominensurate rapidity; real property, to a preat distance in every direction, has doubled and, in many places, trebled in value; the farme:s are aitai.ans to aflu, ence, and already find surplus funds for elogrant and costly inprovements. But during the seacon of our prosperity, the exports of agricultural pro luce from western P'enstvania have been trifling indeed; small quantities of flou have descended the Ohin, whi'st we imported cargoes of bacon tiom Kentucky, and fish fion the seaboard :nd the lakes. It hi s been under such circumstances that Pitisburg, and a large tervitory around, have advanced in wealth, inprove. inellts, and population, beyond example.
The cominittee might assume as a f.ct, and ap. peal to every man in the interior of the United States for its truth, that wherever manufactures have been establistled they have produced similat resalts: new life and energy have been communicated to agriculture-and the liome inarket, enabling the farmer to diversify his labor, gave him a latge profit on many productions too bulky and perishable for exportation.
It is remarl:ed by a very able qriter, "that what a town is with regarll the country in its neighbor. hood, one indepenilent state may be with regurd to other independent states; a small quantity of ma. thefactured produce porchasen a great quantity of rude produce; a tratisis and manficturing cound try therefore, naturully purchases with a small part of its manufacturel prorluce a preat quantity of the rude produce of other combries, while, on the contrary, a country without tracle and m.unfactures is gencrally obliged to phrchase at the expence of a great part of its rude produce, a very small part of the produce of other countries." We might here ask, what has f'ennsylvimia io give in exchange liar the enormous quantities of English goods which she has imported for lier own use singe the war? Will her agricul'ural profluctions be accepted by 1e.glan!? certainly not. What incans of payment

Almjiting a forcign undiet cuutd lie
f. \({ }^{2}\), whol prequatim in whelue with hat expertho \(\because\) protiac iour th the mantictures recived? Uith the troot fir:umate trade, a figholut b.latice routh whe th to be discharged in !gold and silvor. Conhang sat shews to the westeril country, we wiyht anphaticaily isk, wihl what exportable commaditi. shall we restere the balance of trade, now fasi actomulating against us? How arrest the fice cant srai: of ot.: capital? Our manufactures as jecilhing sround us, and alretdy millions have escipal, incier to return.
In the semintis of the cominitee thus far, the cutuinty of a forcign market has beet conceded: hut the slightest reflection will convince us that this is a resussce of the most precarious kin!l The encriculture ofemope is fully adequate to the subsistence of fies population, and it is only in times of wat on unpropitions seasons, that a market is of eneel there. In the West Indies uin hopes and firtines are the spurt of chance, and fluctuate with Wie c.price of Bu opsill tyrants or colonial governorb. These cursiderations abmundanty show that a f)reigun market cannot be relied on-that it is an obj ct of the most changefiel and illusive character. In time of general war in Europe the demand for our produce, ind especially the carrying trade, g:ve wac uakag ement to the interior and ct anmercial in dustry of the Clinted States. Satisfied with the p:esent good, the certainty of future evil was not bsurdect, and every plan of private enterprise and misinin of political ceomomy had an exclusive relation of tie existing state of things. OllP goWhinetit and country seemed to thimk (and they ctriainly acied) as if the war in Europe, which had lasted s, hes, would last for ever. With the re. tun: of pacer, these habits and opinions are not d...rge!. At the arguments against manufiactures ate sill predicated upon the existence and con2. enalce of a forcign manket, a privilege resulting rom the pressure of war, and consequently uma. tural atd transitory.

The plans of every wise gevernment, are the rePuit of emlarged and comprehensive viens of the inure and the past. They have an inherent stabibit alapted to every vicissitude of peace and war. i shinitg changctill poiicy, which fillows the forlanes ni other hativns, and becones the slave of arcial mi:al cinergencies, is the reverse of wisdom. shat ther pisperity of the United States, be forewir shikid i.pon the chance of European, wars?
1) titiou merely agricultural was never rich;,aul, a) Ue comary, there have been nations of very stender aresuiture, pussessing inmense wealhi; Whon' hindistry and matafictures enabled them to imbin the commerte into every seat, and carry the tertor of their anas to the rembetest regions of the 1: Lobe. Thuse facts ate confi med by every page of hisiory: and a slight returrence us the rise and browat of masafactures, in some of the king ghones of Earope, will phace them in a clear and striking point of view. "Until the reign of Edvard 115 ." says A:derson, "England lad no inanufectures for capertation; that king's revenues, were, therefore, cuapratatively very inconsiterable, for in the 22.1 year of his reignt ( 1328 , when, in a hot war with rrance, the whote subsidy on wool exported, at 4) shitlings a saiek, (a very heavy tax) was but 61,000 pounds. This king, attentively observing the great benefits accruing to the Netherlands, f:om their vast woolen manafactures, and that they owed all thenr wealth and power, entircly to Eng. lish wool:-viewing also the beauty, pupilousness, opulence and strength, of their cities, and wealh cren of their villages, whilst those of his owa king.
dom were mostly poor, ill betilt, small and thin or perple; and reflecting that the province of Flanders particulaly, was theereby become so npulent and potent as to be a dangerous neighbor to England, more especially when in alliance with France, he determincel to attempt the removal of every wbstacle in order to attan the same benefits and advantares to himself and pecple
At this perime the city of Bringes was arrived to. such a pitch of \(\mathrm{g}^{\circ} \cdot n\) letir and wealth by its mamufuctures unil comizelce, that the kiug of France, beinc here with his queen, they were both astonished at the mat nificence and ricites of that city: The ladies of Bruges put her in josty out of all p. fience to see how splendidly they were decked with jo wels and rich attice, so that she broke ont into this pas sionate speech: "I had thought, that I was the only queen here, but! find there are above six hundred (besides myself) queens in this city."

King Edward, pursuing the policy lie had so earnestly adop:ed, grantel? a letter of protection to John Kicmp of Fl.nders, a wonlen cloth weaver, coming over to exercise his trade in E.ghtand, in the year 1331, and as his protection expresses it, "to teach his trade to such of our people as shatl incline to leatn it. The king hereby taking the said Kemp wilh all his servanis, apprentices, goods and chattels, into his royal protection, and promising the same likewise to all others of his occupation, as also to all dyers and fullers who shall incline to come and settle in England. In consequence thereof, seventy families of Walloons were this year brought over to England by the invitation of the king, for promoting the woolen manuficture, and teaching it to the people."
Similar protections were afterwards granted and? other woolen manufacturers were induced thereby to carry on their business in England. Six year's after the first fine-cloth weaver was brought into England, a parliament was summoned, and at the instance of the king, it was enacted "that no Fing. lish wool should be exported under pain of forfeiture of life and member till otherwise ordained; that all cloth-workers should be received from any foreign parts, and fit places assigned, with as many and such fi:unchises as might satisfy them, and a certain allowance made them till they were fixed in some competent way of living; that none should wear any cloth in future but such as was made in England, except the king, queen, and their children; and that no forcign cloth should be imported on pain of forfeiture and other punishinent." Under such encouragement it was not long before the woolen manafacture spread into many parts of lingland. Several of the citizens of Bristol, immediacly af er the act of parliament was passed, set up iooms for we:sing cloth, which example was afterwards followerl by some of the neighboring counties.
"The establishment of woolen manufactures in England did, without doubt, at first diminish the king's customs, because all the wool of the homemade cloth was used to be exported, on which a consilerable custom was paid, as did also the cloth brought back in return from the Netherlands."dnd. His. Com. But we find that in the year 1354 the general balance of the commerce of : hland, then in its infancy, was nearly eight hmadred thousand pounds of her present sterling currency. Upon which "noble balance" sir Willian Temple observed, "that there must have entered into Englant during this year, cither in coin or bullion, or eise, which is the same thing, their must have grown a debt to the nation of just so much as that balance amounted to:". At this time England had began to send
coarse wonlens abroad; for amnig the exports of this year we find \(4,7.74\) coarse cloths, and \(80,061 \frac{1}{2}\) peices of worsted. Tire maufactures of silk, cotton, linen, iron, \&c. Sc. Were then unknown in Eng. hant. Her commerce dath scarcely reached the bistic se., and few of her ships had ever appeared in the Jediterrannean.

All lenglish writers agree that the preasent astonishing wealth and gra: 1 deur of that nation are to be iricell back to these small beginnings. "It is" her manufactures, say they, which have brought Fingland to her unrivalled opnlence and power." WI.en Edward III. began his reign, the wealth of England consisted in cattle, sheep, and the pro ducts of a rudely cultivated soil. The English were poor, ignorant, and servile. The Netherlands, in extemt but a speck upon the map of F rrope, and whose naural prodlic's were very inconsiderable, by her woolen manufactures alone, attained to such a height of opulence tiat some of her private citizens, in their treasures and equipage equalled the greatest monarchs of the surrounding nations. No sooner were the woolen manuf.ctures naturalized in England, and'guarded by the strong arm of government, that similar effects began to be witnessed there. Vinjland gradually emerged from poverty and ignorance, to wealth, knowledge and splendor.

The history of all nations demonstrates that manufactures have been the inseparable allies of wealth and power. Their prosperity or declension constitute an epocha in the rise and f.ll of cities and nations. The vast capital and power recently possessed by Holland may be traced back to the dawn of her manufactures. "Hyy reason of the tumults and discontents occasioned by restrictions and taxes upon the manufactures in the towns of Flanders and Brabant, many of the manufaoturers of those towns, says I'ensionary I)e Witt, removed soon after the year 1.300 to Holland, whereby the towns of the Hollanders increased in greatness and number of inhabitants."

In the year 1380, Louvain, a great, flourishing and populous city, was ruined by an insurrection of the journeymen weavers against their sovereign, the duke of Brabant; who lhaving besieged the revolters, obliged them to submit to his mercy, and the greatest part of them were banished-many of them setthed in Holland, and some in Eingland; where they ware kindly treatel, and contributed to the impruvenent of the woolen manufacture in botl conntries. "From this time," says Inderson, "Lou vain was never able to recover its former lustre and riches, being at this day fanous for nothing but soorl beer." The hisiory of Venice, Florence, Geno: and lyons, cxhibits the same picture and establishas the same conclusions. Manufactures and the arts have invariably been the handinaids of wealth, commerce and power.

They bave been fostered by every wise goverument with paternal care, and most of the distinguished reigns in Europe have been characterized by their encouragement.

In the year 1:99, king Henry the IV. of France, prohibited, by a special edict, all foreign m.nufuctures, as well of silk, as of gold or silver, pure or mixed, at the request of the merchants of Tours, Who undertonk to make quautities of such manufactures, sufficient for the whole kingdom. Yet, grasp. iag at more than they could perform, and being also eomplained of by the city of Lyonx, justly styled (on account of its manufuctures) the goluten gate of Firance, as therchy destroying their fanous fairs, as well as lessening the king's customs, that elict in fivor of T'unts, was revoked. Vet, as Puffendorf
observes, "these new mannfactures of France, and more especially that of silk, afterwards drew wealth ino the kingdom"
"The king saw ( 1603 ) that it was in vain in prohibit the exportation of gold and silver, unless those things were male and improved at fone, the want of which had hitherto principally oceasioned the said exportation; that the wearing of siik clothing was, in his time, become so common, more especially among the fur sex, that they leepised the usc of wonlen, so universally and frugally worn by their ancestors; and that bereby much money was sent ant of the kingrlom, for the purchase of wrought stik. Wherefore, the king, not only set about the propogating of the worms for the spinning of raw silk, but, which was the greater benefit to the public, the inanificturing of the same. The king, also, procured workmen from Flanders, for a tapestry manufacture, in which country it had long flourished. The manufacture of fine earthen-ware he introduced also into France from the Netherlands. He revived the glass-houses, which had been first set up in king Heury the second's time, in imitation of those at Venice. He also established a linen manufacture. That the king's magnificent improvements in buildings, gardens, \&c. were suitable to his great fenius. He also made rivers navigable, \&c."-. Incl. Hist. Com.
"In the year 1506, he set up in divers parts of the kingdom, the manufacuure of tapestries, gilt leather, hangings, mills for working and cleanıng iron, fuzes and tine linen cloth, potters' or fime earthen-ware. glass-houses for chrystaline, cloth and serges, stuffs and silks, with several others."-.Ind. Hist. Com.

Examples, like the foregoing, might be cited from all the enlightened and wealthy nations of Europe, but a further reference is deemed unecessary.
The history of Spain furnishes an instructive lesson to all nations on the subjeet of manufietures, and shows that the want of them is not compensated by the highest natural advantages of soil and climate, and the greatest resources in colonies and mines of the precious metals. "From the year 1493 to the year 1724, the gold and silver brought into Spain from the Indies is computed to have amounted to \(5,000,000,000\) of dollars; being above ewenty. one millions and a half yearly, on a inedius; yct all this treasure necessarily goes out every year in other European nations for the manufactures and ponduce of those nations with which Spain and its ludi-s are supplied in immense quantities. Some have beat of opinion, that it would have been happier for \(S_{p}\) ait if slie had never planted in America, unless she had, at the same time, cultivated manufictures of all kinds."

We of:en hear it urged, that prohibitions and heavy import dutics, are calculated to enntrol and change the course of private cutorprize which lati brtter belef to the directionof private interest, and that in cficet they sacrifice the freneral inieresis of the coonmunity, to the partial interests of a few in. dividuals.
As to prohibitions and duties, the committee would obscreve, that the raluc and inportance of mamificthres, in a matsona' point of view, are acknowlet? ged by all. It is also admitted, that they livee seldom, if ever, succecded without the aid and protection of govemment. The cominittce will not atiempt a refitation of the fubtleties of abstract speculatints, as to the justice 0 expediency of suct1 aid and pratection. It will be stillicient for then to refur to the practice of the most wealuy and powerfisl nations in the world for a test of their utility. Eingland, in almost all cases, prohibits under severe pe-

\section*{1ヶト NHAE' WEEKLY RFGISIFK-SATURDAY, APNIL \(2 \in, 1 S 17\).}
nalties, the erpmitation of all he: rall matlerials for montactures She also prohibits directly, or by excessive duties, the importation of almost every article of manufacture, the raw materials whereof she posse swes within herself, or is able to procure from other nations. Her laws, on these subjects, are matters of curious research; and the progress of her namafaciures may be traced in her penal statutes. Some branclres were introduced originally by the prower of goverument alone. Ohers, while in an incupient state, were fostercal and guarded by its cue. Fuggland uever suffered a foreign govermment, nr a combination of foreinn capitalists, by glutiong her own market, 10 crush in the cradle, any branch of her domestic imlustry. She never regarded, with a cold indifference, the ruin of thousands of her indnstrions penple, by the competition of foreigners. The hare avowal of such an attempt would have incurred the indignant resistance of the whole body of the nation, and met the frowns, if not the instant vengeance of the govermment. The consequence of this policy in Ingland are well known; her manu. factures have become a source of wealth incalculable; the Ireasures of Spanjsh America are poured into he: lap; her commerce is spread over every ocean, and with a population comparatively small, she is the terror and the spoiler of Europe. Take from Eingland her manufactures and the fountains of her wealth would be broken up; her pre-eminence among nations would be lost forever.
Similar consequences have flowed from like causes in all the opulent nations of Europe. The history of the Netherlands, Holland and France, all concur in the same result; when the energies of the government were strongly exerted in the patronage of inanufactures, the nation prospered; when manufactures were neglected, the nation declined. Swch examples are fraught with wisdom and instruction to oursalves. Of what monent are untried theories, when opposed by the experience of age?

If the United States in their trade, as well as geo graphical position, were detached from all other nations, private industry might be safely left to the graidance of privatc interest. Ifut such is not the case; we constitute a branch of the community of nations, and are necessarily affected by the policy of other countries. Fingland, with whom our dealings are most extensive, sells but never b:fys her manufictures-the means by which they are supported, are calculatcd io prostrate all rivalship on our part. England impedes the enterprize of Amesica:l citizens; she controls and directs the pursuits of private industry among ourselves; her interference exiends to every field and workshop in Ame rica; we suffer the ardor of genius and the vigor of cxertion io be sinothered and cleadened by it. Remove this baneful interference, or restrict it so as to be harmless, and the interior trade and industry of Americans may be safely left to themselves. The free and usrestrained scope to private enterprize, which is so strongly insisted on by those who deprecate the patronage of government to manufac. tures, is the weightiest argument to prove its necessity. The government must go so far at least, as to countervail the checks to Amenican enterprize proceeding from foreign nations.

The establishment of manufactures, instead of producing a partial benefit in individuals, to the prejudice of the rest of the community, would eviclently add to the comforts and the wealth of all. \(\Lambda\) few vears of competion, amongst themselves, would fix the prices of their products upon a fair and a reasonable scale.

The population of the country will be condensed, and the chances of civilization and improvement sreatly multiplied; science, literature and the arts have never taken deep root among a thinly scattered peopie.

The prevalence of manufactures would also ameliorate the africulture of the country-the proximity of a market for its proclucts giving a stimulus to industry by increasing its reward. Hitherto the want of good roads and canals has retarded the growth and improvement of many sectinns of the inland country. \(13 y\) manufactures a vast interior commerce will be brought into action; and roads and canals, aflording new faciliies to iis prosecution, will unt be clelayed. Viewing the subject of mamifactures in this point of light, the declamation so often heard, against taxing tise farmer, by excessive import duties, and compelling hion to purchase at the dearest inarket, loses all its force. If by mike nufactures, ankl interior commerce, the value of his products, and consequently his means of payment, are doubled-if his mowey be retained in the general stock of currency, instead of being sent abroad -if his comforts are augmented, and his land vastly appreciated-if his country be clisburdened of her load of foreign debt, and her independence fixed on the deep and solid basis of her own resources, a trifling addition to the price of his clothing, and other necessaries wonld not be regarded. Of what benefit is a depreciation of price, if it brings a twofold depreciation of the means of payment? But the objection, noticed above, taken in its most plausible aspect, applies merely to the infant state of manufactures; their patronage would soon command artists, capital and skill-their growth maturity, and competition would reduce the prices of their prorlucts.
The committee, in attending to the subject of their appointment, have been led to a cursory exa. mination of the tariff of duties, established during the late session of congress. They find that the duty on flint glass, which was formerly 22 , is now but 20 per cent. Congress have also declared that cotton cloths, or cloths of which cotton is the mitterial of chief value, (except nankeens imported direct from China) the original cost of which at the place whence imported, with the addition of 20 per cent. if imported from the Cape of Good llope, or froin places beyond it, and 10 per cent. from any other place, slall be less than 25 cents per square yard, shall, with suoh addition, be deemed and taken to have cost 25 cents per square yard, and shall be charged with duty accordingly, twenty-fire per cent.

They, will now turn, for a moment, to the progress and patronage of the cotton manufacture in England. In 1787 there were built, and in progress in Great Britain 143 coiton mills, and 20,500 jennies for spinning; the shute for the twisted yarn spun by the watermills. The expence of the mills, jennies, houses, buildings and auxiliary machinery was estimated at 1,000,000 poinds. In the branches applieable to muslin and calico, employment was given to \(1,00,000\) men and women, and to 60,000 children; many of the latter taken from the parishes and loospitals. Jut notwithstanding the great maturity and perfection to which this mainufacture had attained in Fingland at the period of which we speak, it was stiddenly checked by the competition of Fast-India groods of the same species, imported by the EastIndia Cumpany, and sild about 20 fer cent. on an average, under the lowest prices at which the liritish manufaciurers could afford to sell without loss:

Anderson observes, (1787) "stuch conduct in the company," (all Englishmeni) "inust operate to the very great prejudice of the British mamufactures, and will continue to do so while they press goods upon the market at prices which have no relation to the original cost, and under circumstances when the just laws of competition cannot operate, and when every idea of protecting du!ies is annilhilated in the general system." "It appears, therefore," says he, "that unless some relief is given, perhaps little shont of one half of the present mecianical powers now in action must cease working." It will be kept in mind that the East Indis goods were imported from British provinces by British suljects. We will now see what ineasures were adopied by the British go vernment for the protection of the cotton manufac tures in Eugland. In the same year, (1787) an act of parliament was passed, "imposing a duky of fifty pounds for every liandred pounds of the true value of East-India cotton inanufactures, according to the gross price at which goods were sold at the public sates of the company trading to the List-latdies." In 1798 this duty was increased to one-hundred and twenty-two pounds, four shillings and five pence, for every hundred pounds of the original cost, as abovementioned. Such duties were necssary for the protection of British manufaciures against a competition from their own provinces; and this ton when they had been brouglit to the utimost possibie perfection. Our governinent protects our own in fant manufactures against British competition by a duty of troenty five per cent. Further lime would enable the committee to extend their animadver sions upon the tariff; but its defects are known and prosed by the present condition of the manufactures which it affected to assist.

Strong and imperious reasons for the encouragement of manufactures are suggested by the state of our foreign trade. In the year 1815, the general balance against us amounted to seventeen mil lions of dollars; a sum nearly equal to the annual produce of all the mines of Spanish America within the periud before noticed. It would give us pleasure if the frieuds of commerce, and enemies of manuffactures, would inform us by what ineans this accumulatiug balance is to be discharged; suppose Uhe country were now called on to pay it? sudden and inevitahle bankruptey would ensue. Such is the all ful predicament in which we awaken from the gol !en dreams of British trade! Plunged inta in extricable debt; the interior energies of the country paralyzed; our manufactures sinking into amnihila. tion, and povert'y and misery staring us in the face!

For a speedy redress of such pressing evils, we louk to the government of the union. Will they uphotd the sink ing manufactures of the cotntry, or will they not? are their late assurances uf aid and protection forgotien with the crisis that gave them birth? Let them realize the hopes of the country, and bet with decision before it be ton late.

Note-The annual products of the undermention. ef manntactures in Great Britain, in 1783, was estimated at fifty one millions three hundred and tell thousand pounds sterling ह, viz:-wond, leather, flax, hemp, -ूlass, paper, porcelain, silk, cotton, lead, tin, iron, steel, plating, \&c. The above sum when turn cal in Anerican curvency, is 232 millim dollars; an attorift ten times as freeat us that produced by the mines of Spanish America at the period inentiuned in the foregring report.

The valite of the cotton manufactures alone, in 1787, was seren millioms three handred thousand pounds sterling: a swin probably greater than the
mines of America ever produced in the same time. Resolverl, That the citizens of Piltsburg, in a town-meeting assembled, do approve of the fo-e. going report; and that the committee be requeste? to transmit a copy of the same to the sipeaker of the hodse of representatives of the congress of the United States.
E. DENTI, Ghairman.
(Attest)
E. Pextland, secretary.

\section*{Foreign Aricles.}

\section*{englatd, \&c.}

0 The debate in the house of commons f,r suspending the habeas cormus, logether with the rtports of the secret cominitiees, would make us believe that a revolution wis actually contemplated in Great Britain by a very considerable portion of the people. Those in power give it as their opiaion that lesigns destructive of the constitution are still exrending; but this is believed by many to be nuly a stratagem to get greater power into their hands, th enable then to pursue their iniquitors conrses.The ministerial papers are doing all that they call to alarm the people-France arid the F'rencli, tricolored cockndes ar-1 committees of public sif 3,3 , arspoken of in almust every line. Arins, it is said, are still sought fior, the clubs are multiplying, the lists of proscription flled un, \&ic. Put the repirt of the conmittee inserted below is full on these sub. jects.
It may be, that there is cause for this alarm-if so, we hope it will go on to a thorough refis:mation of the governing power in Civeat Britain.

A bill for the suspension of the Habeas Copus passed parliament on the 4 th of Narch-hut at unf last advices had not received the royal sanctron. It was introduced by Cistlereagh, and passed the commons 273 to 98 . The city of London had remen. strated against it. In the house of Lords a number protested ag inst it.

The debates about refirm gn on with preity se. vere cuttings in the Bri ish parliaisent. Trey will amount to nothing. The people have no clanice of regaining their rights but in the same manner that they were deprived of then-which is, by the sword. Those considered as frienily to reform ure divided among themselves as to the extent they would give it.

The petitions in parliament for reform, presented by sir Prancis Burdett, are said to have hal! a motlion of signatures. The funds continue to rise -3 per cent. cuns. March 6, 69 3.8.

The customs produced for the inonth expiving on the 5 th February, were \(6,881 \%\) sterling ubove that of the same month last year, but "1as \(63,575 \%\). ster. ling beluw that of 1815 .

The expences of the British amy in I :ance for one year is estimated at 1,0\() 30,6031\). sterhar.
Dr. Watson and five other persons lave been an. rested and committed to different apar ments of the tower, as having been concerned in some of the bite riots.

10,000 British troops, onc-third of their army of occupation, arrived in Fingland fion Frunce ont the \(2+1\) h of Ficbruary

The number rif pertons on the half.pay list in the army and navy is about 1100.000 , of whom about 56,000 belong to the firmor. The lalfpay and pensitus for the arm! an I nuty cust fle methm ntariy \(4,590,000 \mathcal{L}\). per :inrums it is supposed that the
number will decrease at the rate of 2 , wi a yar, b: deaths.

The charges for the army and navy, barracks, extraordinaries, ordnance and mischlidieous services. -fter all the talked-of reductions, will amount in about \(18,500,000\) fow the puesent par. Beridu. which there is the civil list and maty et ceteras

Castlereagh has hern sick-but was recovering.
Cattle -180 head of cattle (ne-third of them vearlings and calves) bred by a Mr. Price, newr Upton, sold for the enormous sim of 7,6001 . One yearling bull for 3411. 5s. a lieifer for 2526.
House of commons, Feh. 19. Report if the committee of secrecy. -That it appears to your cominittec, after a most attentive consideration of the ducu ments submitted to them from various parts of the country, that attempts had recently been made to take advantage of the distresses of the laboring and manufacturing classes of the nation, with a view not only to effect a parliamentary reform on the principle of annual parliaments and universal suffrage, but to cause the total overthrow of all our institutions, and of every description of landed and funderl property.

That this system of general spoiliation chiefly proceeded from the doctrines maintained by a number of societies distingruished by the title of "Spencean," whose tenets were principally drawn from the works of 2 visionary writer, published above rwenty years ago. That at meetings of these soci eties it was urged, that parliamentary reform must be lield out as the ostensible ohject of their efforts, and with a view to mislead their enemies, but that it was in fact only a half measure; and that the people ought to look to the possession of the land, and nothing short of that; and that as to the constitution, of which so much had been said, this country had no constitution, for it was not to be found in any book, nor could any man tell what it was. In other societies, founded on the Spencean principles, it had been maintained that the only remedy for the grievances of the people was, to hunt down the land-owners, and to deprive those still greater wretches, the furd holders, of their pretended rights.

It appeared also, that these, and other societies of a similar character, had been guilty of the most blasphemous and impious proceedings; and that as they assumed to be of a convivial nature, heir political discussions were followed by songs of the most inflammatory and seditious description, and by the recitation of profane parodies of the liturgy, and of various parts of the holy'scriptures.

That in.order to extend the principles of these societies over the whale kingdom, the most active efforts were made by their various members; and in consequence, those principles were disseminated in speeches at the public meetings to the discharged soldiers and sailors, and to the distressed laborers and manufacturers of the country; and that, in aid of this object, incredible activity had been used to disperse cheap, and in many instances gratuitous, publications, unfolding the doctrines of the societies.
That it had been proved to the entire satisfaction of your committee, that a number of the members of the various societies, acting in a body as delegates, conceived and dectared, that in their opinion the objects which they had in view, might be, and ought to be, insured by an effort of the physical strength of the people to overpower the constitutimal authorities. That they considered the first step whic', should be taken by them for this purnuse, was by their individual exertions to discoyer
and fin ent the discontents of the metropolis and its vicinity; and that reports of their proceedugs wert nade by the individnal delegates to the general borly.
That it appears to your committce that a plan was formed, by a sudlen rising in the dead of nighi, to surprine the soldiers, and in the terror whoch would be thereby occasioned, to set fire in the town in varions places, and to take possestion of the barracks, the tower and the bank. That to assist ins the execulion of this project, a formidable machine was invented with which the streets could be cleared of alf opposing force. This plan was, however, relinquished as premature; and it was resolved that it would be more proper 10 ascertaia the strength of the popular party, by convening ineetings under the pretext of taking into consideration the legal mode of red essing grievances; and a map of London having been examined, Spa fields was selected whence an attack on the bank and the tower could, with the greatest facility be made. That the first meeting at Spa-fields was accordingly advertised for the 15 h of November, and that printed and written placards were exhibited in all parts of the town, of: one of which the following is a copy:
"Britons to arms! The whole country only waits. the signal from London. Break open the gunsmiths'. Arm yourselves with all sorts of instruments. No rise in the price of bread. No regent. No Castlereagh. Off with their heads \({ }^{1}\) No taxes. No bishops; they are only useless lumber.
N. B. -5000 of these bills are posted up in the town, and in the principal parts of the neighborhood."

That the intended insurrection assumed all the symbols of the French revolution. Tliat a conimittee of public safety was formed, consisting of twenty four members. That tlags and cockades were prepared for the occasion. But that on the 15ih of November, when the first meeting took place, there was no violence (although there was some plunder in the evening of the day) and that the metting adjourned to the 2d of December, by which lime it was hoped me:ans might be found to accelepate the accomplishment of the projected undertaking.
That your committee find that not a moneent was lost in the interval between the first and second meeting, to take advantage of every circumstance which could further the attainment of the objects in view. Additional publications, of an inflanımatory nature, were circulated every where. Findea. vors were made to raise a general subscription for the support of thuse who had relinquished their ordinary occupations, to enable them to devote themselves to those purposes, which persons had hitherto chiefly been paid by a principal member: of one of the socicties. A plan was formed for the seduction of the soldiers, by raising hopes of promotion in the event of their joining in the approaching attempt, and exciting discontent among them by a story of the landing of a large foreign force in the country. It was again recommended that the barracks should be the object of particular observa. tion-Those quarters of the town, where distress was most prevalent, were visited bi individuals appointed to inflame the people. Those warehouses ałong the river, and those shops in various parts of the town, where arms were deposited, were carefully noted. A plan was also formed for the seduction of the sailors, by offering them additional pay, under the new govermment which was about to bo established.
That immediately before the meeting of the \(2 d\)
of December, many persons, connected whth the e ubject of equally monentuous consideration. proceedines, procured ums uf varions describtions. it was thought that sufficient means had litus been obtained to carry on the intended operations for at least two liours, by which time, it was supposed, enough would be got f'om the g'usmiths' and other tlepots, to arm a considerable number of individuals The mannfacture of tri-color ribbon was encouraged with a view of rendering it familiar to the eyes of the public.

Your committee have further received undoubted informution that a large number of pike heads had been ordered of one individual, and 250 actually madle by him, and delivered and paid for. It was also undmbedly intended to liberate the prisoners in the principal goals in or sbout the metropolis, in the hope of their concurreuce and avsistance in the intonded insurrection. Addresses were introduced into some of the prisons, and recommended to be communicated to others, in which the persons confined were invited, in the name of the tri-colored committee, to rally round the tri-colored standard, which would be erected on Monday, December the 2 d , and to wear tri colored cockades themelves. It was promised that the prisoners should be liberated by force, and arms were stated to be provided for them, and they were directed to be ready to assist them in the overpowering the turnkeys. A waggon was hired for the busimess of the day, in which the flags and banner, or standard, which had been previnusly prepared, together with some ammumition, were secretly conveyed to the place of meeting. From this waggon, before the ostensible business of the day commenced, in the other part of the fiedd, the most inflaminatory speeches were delivered, tending directly to excite insurrection, concluded by an appeal to the multitude assembled, whether they were prepared to redress their own grievances. A tri-colored cockade was then exhibited, and the tri-colored flag was displayed, and a number of persons followed it out of athe field.

The direction which they took was towards that part of the town previously designed; gunsmiths' shops were broken open, addresses and offers were made to the soldiers at the tower to induce them to open the gates; but from the falure of the numbers expecterl to join the insurgents, no attempt was male to force the gates. All attack was, however, mide upon the city magistrates, assembled in the Itoyal tixchange, a shot fired, and a tri-color flag and caclade openly displayed and scized on the oflender

In reviewiug the whole of the transactions of the 21 of D ecember, your conmitte are firmly persuaded, that however improbable the success of such a platl masy appear, it yet was deliberately premedi tated by deaperate men, who calculaied, without reasomable ground, upon defection in their appos. scrs, and upon active support from those multitules whose dintress they had witnessed, and whom they lasd rainly inatigated oo revolt. That, consequently, it was mot merely the sudden ebultition of the mo. onent, or the manthorisel attempt of any unconnetted mdicilual.

Vour comuntice are further cansincel titat notwithetanting the failure of the 21 of Decernher, the atme devifins still costime to be prosecuted, with *ang time hopes of succers.

Yur commitice having thus stated the general tesult of the evidence which leas been laid before them, reapecting the state of the melropelis, have now the no less painfull duty of c-thuts the at lention of the hount in what has heen pasting due sing the periou in different parte at in eonint), as

The tirst thing which has here forced itself umon their observation, is the widely diffused ramification of a system of clubs, associated professedly, for the purpoise of parliamentary reform, upon the most ex'ended principle of universal suffrage and annuad paliaments. These clubs in general designate themselves by the name of Hampden clubs. (1n the professed object of their institntion they a pear in be in commanication and connection with the club of that name in London.

It appears to be a part of the system of these clubs, to promote an extension of clubs of the same name and nature, so widely as if possible to include every village in the kingdom. The leading members are active in the circulation of publications likely to promote their ohject. Petitions, ready prepared, have been sent down from the metropolis to all societies in the country disposed to receive them. The communication between these club. takes place by the mission of delegates; delegates from these clubs in the country have assembled in London, and are expected in assemble again early in March. Whatever may be the real object of these cluts in general, your con ittee have no hesitation in stating, from information on which they place full reliance, that in far the greater number of them, and particularly those which are es. tablished in the great manufacturing districts of Lancashire, L.eicestershire, Nottinghamshire, and Derbyshire, and which are composed of the lower order of artizans, nothing short of a revolution is the object expected and avowed.

Your com:nittee find, from equally undoubted information, that the doctrines of the Spencean clubs have been widely diffused through the country, either by the extension of similar societies, or more frequently by the intervention of missionaries or delegates whose business is to propagate those doc. trines throughout every society to which they have access. It is the universal practice of these societies, 10 require from the members a small weekly subscription, which provides a fund for the expences of these missionaries, and also for the purchase of seditious tracts which are read and commented on at their ineetings. Some of these tracts now before your cominittee, inculcate in the most ariful manner, the necessity of overturning what they call "the privileged class," as distinguiviced from the people, who are described as consisting of laborers, artizans, tradesmen, and every pinf:ssion useful in socicty: A new order is declared to be the will of the people; rebellion is justified by the assertion that a nation cannot be a rebel; und all religion is disavowed, as well as loyalty, by the assertion, in answer to the question, "would youlive without gods or kings" "we abjure tyramy of every kind."

It seems, inleed, to he a part of the system a. dopted by these societies, in prepare the minds of the people for the destriction of the present frame af society, by undermining not on! their habits on decent and rekular subomtination, lint all the prin ciples of morality and relifon. Jome commitece find, that there is scarcely any sery minecrous society in the parts above referred tw, of whose prorced. ings shey late ohrained an accultht, in which some of the leading speakers dos opernly avow the intose seditions opinions, and do not exrite their hearers to be prepared for actual insurection. Ino pics fire discmssion are selceced nith thes view; amongot others the quentim, watier the jacobin or the losialist was the hest firiend to his conumer? Eiven where the petitioning is recommended, it is propnosal to be cundacted in such a mamer, by an
immense number of delegates attending in London at the same time, in several parties, attached to each petition, as might induce an effort to obtain by force whatever they domanded. A general idea seems prevalent among those who compose there societies, that some fixed day, at no very great distance, is to be appointed for a general rising. They have been taught to look to the meetings in Iomdon, as the signal for their operations, and lave been in the lrabit of adjourning their own assemblics sirciultaneouly to the same day; and it is a la. meatable instance of the common interest they feel, if not of the conmection which is formed with those most implicated in the outrages committed in the metropolis, that about Manchester and some other places, the greatest exultation was manifested previous to the meeting in Spafield of the 2d of Becember; and the taking of the tower and the ruin of the bank were publicly and confidently predicted. The news of the result was impatiently expected, the roads were crowded during the night with a num. ber of persons, many of them delegaies from the different socicties in the country, waiting for the arrival of the mail coach, and the disappointment was not concesled, when it was asccrtained that the riot had been quelled without much serious or ex. tensive misclief.

It appears that the confidence of the disaffected is such that they represent the numbers enrolled as amouning to several hundred thousand, and that their societies are daily increasing; that in their lists they distinguish by particular marks those among their subscribers who are able bodied men, and reacly in act when required; and that tlacy also keep a list of those who refuse tojoin them in what they call a "blask book" and threaten vengeance against those persons when the general insurrection shall take place. In some parts of one populous county, where nearly every village has already its Hampden club, the members make it no secretthat they consicler themselves as of no other use than as being ready to act whenever they are called upon: on their admission they are said to be listed, and receive a secret card with the words "Be-reudy, be steaciy."

The labits and manners of these persons seem entirely changerl; they already calculate upon the share of lanal which each is to possess, and point out the destruction of the churches, as the neces. sary consequence of their success. It appears that preparations are in progress, in several places, for providing amms; the demand upon gunsmiths, for fery species of fire arms, bas been beyond all former example, the intention is professed of having recourse fo: a still larfer supply to those towns where arms are manufactured, and where they are to be olstained at a very low rate, from the general cheapness of labor at this ?me; or in case of necessity tliey are to be seized by force. The facility of converting implements of lusbandry into offen. sive weapons, has been suggested; and persons lave been sent to observe the state of particular places, where depots of arms for the public seavice were supposed to have been formed.

Your comnittec find, tlat a system of secret association lias been extended to the manufacturing population of Glasgow, and some otier popilous towns of Sontland; and although these societies have availed themselves of the same pretext, of parliamentary reform on the broadest basis, your committce are firmly porsualed, from the informa. tion that has been laid before them, 1hat their ultimate ohject is the overthrow by force of the existing furm of government, Thit the time for \(a\).
tempting this enterprize was to depend on tlie simultaneous rising of the disaffected in England; with some emissaries from whom occasional intercourse appears to have taken place, and that some provision of weapons has been made by this association.

Your committee have now submitted to the house what they conceive to be a fair and not exaggerated statement of the result of their investigation. They lave thought themselves precluded from inserting, in an appendix, the information from which it is drawn, by the consideration, that unless it were extremely partial and complete, they could not make it public without hazarding the personal safety of many respectable individuals, and in some instances without prejudicing the administration of public justicc.
On a review of the whole, it is a great satisfaction to your committce to observe, that, notwith. standing the alarming progress which has been made in the system of extending clisaffection and secret societies, its success has been confined to the principal manufacturing districts, where the distress is more prevalent, and numbers more casily collected; and that even in many of these districts, privations have been bornc with exemplary patience and resignation, and the atternts of the disaffected have been disappointed; that few, if any of the higher orders, or even of the middle class of society, and scarcely any of the agricultural population, have lent themselves to the more violent of these pro-jects-Great allowance must be made for those who, under the pressure of urgent distress, have been led to listen to plausible and confident demagosues, in the expectation of immediate relief. It is to be hoped, that many of those who have engaged to a certain extent, in the projects of the disaffected, but in whom the principles of moral and religions duty have not been extinguished or perverted by the most profane and miscrable sophistry, wculd withdraw themselves before these projects were pushed to actual insurrection.
But with all these allowances, your committee cannot contemplate the activity and arts of the leaders in this conspiracy, and the numbers whom they have already seduced, and may seduce; the oaths hy which many of them are bound together; the means suggested and prepared for the forcible attainments of their objects; the nature of the objects themselves, which are not only the overthrow of all the political institutions of the kingdom, but also such a subvertion of the rights and principles of property as must necessarily lead to general confusion, plunder and bloodshed; without submitting to the most serious attention of the house, the danfers which exist, and which the utmost vigilance of government, under the existing laws, has been found inadequate to prevent.

\section*{Commonrecaleh of P'cnnsylouria, vs. Nichotus Kosioff:}

The grand inquest fir the city and cost? of roiladelplia, having preferred a bift of inderiment for
 hif iuperial majesty tic cmperor of Russia, a mo. tion has been macle to quisle the indictmest for want of juristliction in this cours. Two culter a"e asaigned for our want of juriadiction.-1st. Tist the privilgse of immunity from criminal provect: ions, is contcrered cath ounmils by die law of nations. 2nd. That by the comstitution and lave of the Uhi. whi Stuter exclusive jursadiction in all envesaficiing consuls is reted in the curts of the United States.

1st. It is gran'c \(\sigma^{\prime}\), that by the mollern iaw of natisont, ambasyators and o lier pubbic minituers, are in general, exempt from crimual protecitionePcriaps there are some ofterses, such as w altcmp:
on the life of the sovereign near whom they reside, which would warrant liseir pwnishment. Int in every thing short of an extreme case it is more cownducive to the peace and more agrecable to the usage of nations, to send them to their owt sovereign, to reccive foom him the punishment they deserve. It las nont been contended that a ennsul is a problic orinister, but it is saicl, that a consul general, such as \(\mathbf{M 1}^{\circ}\). Kosloff, is prohibited! from exercising trade and cominerce, and entrusted with important cout cerns of his sovereign, so nearly lesenibles a puls lic minister, that he is antiled to some of his prerogatives, and in paricular to extomption from ciminal pinsecution. In considering this case we must exclude fiom our view, the august personarge to wlinm allusion was made in the argument. Concerning his high character, and the intinacy of the relat ons to be preserved with him, there is bnt one voice, one wish. These considerations would have their deserved weight in their proper place, but before us, there is only a naked question of right, in which all nations are equally concerned, for we camnot but see that what is granted as the right of one, must be conceded as the right of all. The law of nations is to be sought for in the usages of nations, in the opinions of approved authors and in treaties, and in the decisinns of judges; with regard to the provileges of consuls, there is some difference of opinion, amoug respeciable authors.Wicquefort Bynkershoeck and Marten's allow to a consul no privilege, against suits civil or criminal; and the reason they assigu is, that eonsuls in 110 mauner represent the person of their sovercign, but are sent for the purpose of assisting his subjects, porticilarly in matters of commerce, and some tines of deciding disputes, which may arise between them, by permission of the government in whose durninions they reside, (see Wicqueforte l'Ambasdeur, book 1, page 65; Bynkershoeck deforolegatomum, chap. is, page 110 . Barbeyrac's translation into French, Marten's summary of law of nations, book 4, clap. 3.1, sec. 8.) Opposed to them is Vattle, who llhough he does not assert that a consul is entiled to the privileges of a public minister, in seneral, is yet of opinion that from the nature of lis fmeli ns, Ge slumld be independent of thoorclinary cruninal' justice of the place where he re. sides so as not to be molested or imprisoned, unless Jie himself violates the law of nations by some enormous crime." Vattle, vol. 2, chap. 2. sec. 34. I amnot quite sure what is meant by violating the law of nations in \(t\) ! is passage. Crimes against the Jaw of nations, are sometimes understood to he crimes which all nations agree to punish-Such are murder and rape, among all civilized nations, and if that be the meaning of Vattle, his authority wnild not exempt the consul fiom the present provectition. But what is of more weight than the judginent of authors, however respectable, is the opinion and the practice of our own government, and that of the foreign nations with whom we have Ind intercourse. We have had weaties with France, :Bain, Cireat Britain, Holland, Prussia, and Sweden, in alt of which the subject of consnls has been iniroslucel, and in not one of which have consuls been protected from suits civil or criminal. I say rothilig of our trreaties with the Birwary powers, becallse there are special reasons why all nations who send ronsuls to them take care to provide expressly for their persnatal security. In the treat! with Great Britain, made in 179!, consuls are ex. pressly declared to be subject to punishment by the law of the country in which they resicie. liy the consular convention with Irance in 1783 , there
is to be full and perfect immunity concerning the chancery and its papers. but the liouse of the consul is io be no asllum for persons or effects; anct in our other treaties the innst that is stipulated in favor of consuls is, that they shall respectively enJoy the same prerosatives and powers, that art granted to those of the most favored nations. Those theaties ufford a strong pronf of the usages of nations, for it cannot be supposed, lhat they should have omitted to secure consuls from criminal prosecutions, if it had been thought desirable or usual. to aftord them that protection. liut there is not wal ting more diect proof of the opinion of ous own government. In the "act for the punisliment of certain crimes against the United States," passed Ipril 30, 1790, penalties are inflicted on persons who sue out process from any court against an amhassalor or other public minister; but the act is silent as to consuls. And what is directly to thet. point, the 9 th sec. of the "act to establisk the judicial courts of the United. States," passed Sept. 24,1789 , vests the district courts with jurisdiction of offences committed by consuls, in which the punishment did not exceed a fine of 100 dollars, \&c Sic. Neither are we left, on this importsnt subject withont the light of judicial ilecision. Mr. Ravara, consul from Genoa, was indicted and convicted of a misdeneano in the circuit court of the United States. He was defended hy able comsel, who contended for his privilege, on the authority of Yattle. 13 ut the court decided against him, and it is worthy of remark that C. J. Jay presided, who had bcen long employed in a diplomatic function of a high grade at the comrt of Madrid, and was one of the ministers of the United S'ates, who negociated at Paris, the treaty which established our independence. No persoil certainly had better opportunities of knowing the usage of mations, or a better capacity of improving those opportunities. From all these considerations, I cannot hesitate in the opinion, that there is nothing in the law of nations which protects the consul-yreneral of liussia from this indictment.

2d. A more difficult question remains to be cansidered. Is the jurisdiction of this court taken awity hy the constitution and laws of the United States. Before I go into an examination of the consitution and laws, it may not be improper to say a word or two respecting the subject out of which this question arises An agent of a forcign govern. ment, accused of a crime committed in tlie state of lennsylvania, claims not an exemption from trial, but the right of being tried by a court of the United States. His public relations are not with the state of Pennsylvania, but with the govermment of the United States, and if the emperor of Russia shoukd suppose that he had cause 10 complain of our treatment of his ufficer, he must address himself not to the governor of I'minglvauia, but to the preisdent of the United States. But even where there was no cause of complaint, cases may be easily supposed, in which the president might think it more conducive to the peace of the nation to send a foreign agent out of the country to be punished hy his own sovereign, than to inflict punishment on him, hy our own laws. These considerations are so manifest, that when the people of the United states were about to form a fecleral government, through which alone they were to maistain an intercourse with foreign nations, it would have secmed a want of common prudence not to commit. to that govcrument, the management of all affiairs respecting the public agents of those nations. Let us now alvert to the instrument of our fede-
ral union, and we shall soon perceive, that the in casis wiich misht be supposed to affect them; statesmen who framed it, were perfectly wware of the importance of placing all foreig public agents, consuls included, under the complete superimendence of the felleral goveroment. It was through the judicicial power, that those persons could principally be antlected. Accordingly we find it provided by the 2 d sec . of the eilart. of the constitution, that the judicial power shall extend "to all cases affecting ambassadors, oulher public ministers and consuls"-words more comprehensive cannot be devised. They include suits of every kind, civil, and criminal. This is not denied by the attorney-general of Pennsylvania, nor, as I understand, is it denied, that by virtue of this provision, congress has a right to declare by law. that in no case, civil or criminal, should a state court have jurisliction over a consul. But it is cont enle!, that until congress does by law declare so, the state court have concurrent jurisdiction winh the courts of the United States; or rather, that in the case before us, the state courts alone have jurisaliction, because congress having passed no law defining the crine, or the punishment of rape, the courts of the United States camnot take cognidece of the offence. The constitution in the 1st vec. of the 3 d article, declares in what courts the ju licial power shall be vested, viz. in ane supreme court, and in such inferior courts as the congress may from time to time ordain and establish. In the second section, it enumerates tire different cases to which the judicial power shall extend, and then goes on to direct the distribution of that power among the different courts, "In all cases affecting anbassadors, other public minis ers and consuly, ant those in which a state shall be a party, the supreme court shall have uriginal juriscliction. In all the other caSes before mentioned, the supremie court shall have appellate juristiction, both as to law and facts, with such exceptions and under such restrictions as the congress shall inake." Thus the fudicial power, extencling to all cases affecting consuls, and that portion of it which respects consuls, being vested in the supreme court, it follows that as soon as the supreme court was organized by law, it become immediately vested with original jurisdiction in every case in which a cansul might be aficeted. But was this an exclusive jurisdistion? The opinion of the supreme court, in Marbury vs. Madion, 1 Cranch 157, gocs far towards establishing the principle of exclusive jurisdiction. The print denided in that case, was, that where the constitution had rented the supreme court with appellate jurisdiction, it was not in the power of congress to give it original jurisdiction, and the whole scope of the argument maintained in the court's opinion goes to prove, that where the constitution bad given original jurisdiction, it was not in the prower of congress to give ap. pellate jurivaliction. This will appear from the flowing extract from slat oppiuioni. If colly, ress temeins at liberty to give this court appellate juris diction where the constitution has dectared their iurisdiction shall be original; and originul jurisdiection where the conssituition has deciared it shali be appellate, the distribution of jumsaticioun malo in the constitution, is form without sibstaice Atfirmative wurls are of en in thrir uperation negaUre of other objects than those affiemed, and in unis case a negative, or excluaive sense muat be given to them, or they have no operation at all. If the sedicitude of the convention "with respect to our peace with fureign powers, inluced a provision that the supreme court should take original jurisdiction
ret the clause woild have proccerded no further ihan to provide for anch conses if no further restric. tion on the power of congress had been intender'. That they should have aipellate jurisdiction in all aher cases, with such exceptions as congress might make, is to restriction inless the words be deemed exclusive of orig rinal jurisdiction."
Now taking this to be the construction of the constitution, all those parts of the "act to establish the judicial courts of the United States," which rest juristliction in cases afficting consuls, in the district or circuit courls, would be unconstitutional and void; and if it was intended by the constithtion, that no inferine court of the United States. should have jurisdiction, it cannot be supposed that the state court was to have it, because there are much stronger reasons for denying it to the state courts, than to the inferior courts of the United States. It will be perceived that the principle shakes the decision in the case of Bavara who was convicted in the circuit court, though not that part of the decision, which respects the privileges of a consul. But if the two cases cannot be reconciled, the circuit court must give way. Supposing, however, for argument sake, that the constitution does not vest the supreme court with exclusive jurisdiction, let us see whether congress has not exclurlod the states courts by the judiciary act, passed 24th September, 1789. By the \(9 / 1 /\) section, the district courts are vested caccinaively of the conrts of the se. veral stutes, with cognizance of "all crimes and of. fences that shall be cognizable under the authority of the United States, comminted within their respective districts, where no other punishment than whipping, not exceeding thirty stripes, a fune not exceeding \(\$ 100\), or a term of imprisonment not exceeding six months, is to be inflicted "Consuls are embraced in this jurisdiction, as plainly appears by considering the whole section, and as was declared by the court in Manhardt ws. Soderstrom, (1 Bin. 138.) Then comes the 11 th section by which the circuit court are vested with excluaize cognizance of "all crimes and offences cognizable under the authority of the United States, except where the suid act otherwise provides, or the laws of the United States shall otherwise direct, current jurisdiction with the district courts, of the crimes and offences cognizable therein." Does not this exclude the state courts from jurisdiction in the case of consuls.

The only argument attenpted, or that can be devised in support of the negative, is that no offence is cognizable in any court of Ule United States until congress has declared it to be an offence, and pressribed the pmishonent. This is the only consideration which ever had the least weight in my mind-but upon mature reflection, 1 am unable to deny, that the courts of the Enited States can takio cognizance, when 1 find it written in the constitution that the supreme conr: shall have juristliction in all cases uffecting a consul-1s lio not afficeted in criminal cases much more than in civil. How thera cain I say that the supreme court has mo jurisdia non? But how, or hy what haw is lio to be pumished, in chase of couniction? Slall he be punisheth by the law of 'ecmanylvania, where the oflince was committed, it as much as there is hon onther express. law whech reaches his case, and is is onsecount of the person only that jurisdiction is given to bie couris of Ule Umited States' Boes thic 34 th sec tion of th ejudiciary act apply to the pminiment of oflences, by which it is enacted, "That the laws of " the sereral states, except the:" wie constitutig.
" treaties, or statites of the United States shall "otherwise require or provide, shall be regarded " as rules of decision in trials at common law in the "courts of the United States, in cases where they "app!!?" Miy a person convicted in a court of the Livited States, of a crime of the highest grade, concerning which congress has made no provision, be punished according to the opinion of judge Story, in the E'nited Statas, is Coolidge; by fine and imprisomment, on the principies of common law? 1st Galleson's Rep. 488. Or is the constitution to be so construed as to exclude the jurisdiction of all inferior courts, ard yet suffer the authority of the supreme court io lie dorinant, until called into action by a law which shall form a criminal code on the subject of consuls? These are the questions which may embarrass those who have to allswer them, but are not necessary to be answered here. No embarssment, however, could equal that isto which this court would be thrown, should it determine that no court of the United States has jurisdiction in a case which affects a consul in everg thing short of life, when the constitution declares that the supreme court shall have jurisdiction in all cascs concerning him. L'pon full consideration Iam of spinion that the indictment should be quash. ed, because this court has no jurisdiction.
Justice Brackenridge concurred on the second grount, declining to give ally opinion on the first, as he did not deem it necessary.

\section*{Lesislature of New-York.}

\section*{things por meference.}

The legislature of New-York adjourned on the 15 th inst. Among the laws passed were 24 for incorporating turnpike and bridge companies, 10 for erecting new towns, 1 for erecting a new county, 4 fur incorporating banks, and several for laying out new roads.

But the most important law is that which provides for the immediate commencement of the canals which are to unite the lakes with the IIudson. The act authorises the commissioners to borrow money for this great work, and assigns certain revenues and taxes to aid the funds, expected to produce 300,000 dollars per annum. The follow. ing were the yeas and nays on the final passage of the bill:

\section*{In the assembly.}

The bill for reducing the salaries of certin officer's was lost by the disagreeing vote between the two houses.

\section*{Counsellor O'Garnish.}

\section*{FHOM A LATE LUNDUS PAPSR.}

We take shame to ourselves for not having somer noticed the very able address to the court of king's benche during the last term, of a barrister f:om the sister kingdom, in the cause, Serge agcainse Sabretach. The following is, we believe, a pretty correct report of it :-
"When I look around me, and above me, and below ine, and dizzily ponder over the tide of time, which rolling through this elevated edifice, sweeps the mighty and the mean to one common bourne, whence, as the poct of nature informs us, no traveller returns - when \(I\) reflect that the court which I now address, nay perhaps the rery segment of the seat I now occupy, was heretofore enlightened by that Aurora Borealis of legal effulgence, whiclz formed a halo on the brow's of a Dunning and a Mansfield, I feel rooted with terror to the ground, and paralyzed in my lower extrencties like the marbled thighed monarch in the Arabian tales. Would to Heaven that the red haired founder of this venerable hall had snatched Tyrrell's dart from his own bosom, and plunged it into mine, ere I had essayed this oftice! Bui the different epochs of our existence checks the wis!!!-My lords, my client, the plaintiff, is of the useful class of beings (nine of whom were heretofore supposed to constitute a man) who give broad cloth to the backserge to the stomach-buckram to the bodythickset to the thigh! His manners are modest -his conduct is creditable-his shop shewy-and lis residence is Ratcliffe. The defendant is an officer of dragoons, recently drawn from the purlieus of Pall-Mall, and quartered at Hounslow:Luckily for him the days of drawing and quar tering are over, or wroings like my client's might justify the corporal partition.-It might be accident, it might be design, which caused captain Sabretach, on a visit to the Wapping docks, to lomse over Rateliffic highway. Aitracted by these w rids, "serge, taylor and habit maker," he halted at the plaintift's door. An elegant pelisse, with arms extended, hung swinging on the door pust-he entered the shop and with a blandishment well suited to the pertidy of his purpose, he ordered a pelisse of the same iworkmanship and materials. The superb omament started like the web of Arachne firom the fingers of the plaintiff's journeymen, and on the Monday week following, the defendant issted from the Hounslow barracks, the envy and admiration of his booted brethern. His collar was of sable fur. "Get me a suit of sables," cried he, mimicking the march of the dupe of Denmark; but when he would have added, " devils wear. bluck," the dæmon of darkHess stuck in his throat. My lords, you are (and long may you continue to be) clad in the robes of office, and you know what fur is. When you seflect that the pelisse was of extra-superfine frencti brown;
that hanis of braids were buttoned on the bosom, with a fork of ditto behind: that the side seams were finely and fully figured; that the tassels were tamboured; and that fiogs, presumptuous as those of Pharoh, enveloped the defendant from chitter. lin to chine, you will not, I am sure, elevate your eye-brows with extra-astonishment, when you learn that the price demanded was seventeen pounds fourteen shillings and sixpence. The plaintiff was pressing-the defendant was dunned; but cash not being forth-coming, the plaintiff drew a bill of cxchange for the amount, which the deferclant accepted, payable at Messrs. Child and company's, Temple bar. The bill a'as presented when due, and was noted for non-payment. God forbid that I should impute any blame to Messrs. Childs and Company. Their answer was "no effects;" and after sedulons eriquiry, I find that when a man lias no money in a banker's hands, such banker is not bound to pay his drafts. This my lords, the defendant must have known. His acceptance, therefore, was a mockery of the lace merchant; it was buttering the bacon of baseness; it was thrusting the red lint poker of pertness into the already blazing conflagration of my elient's gricvances. The defendant had now thrown away the scabbard, and the plaintiff drew the sword. He issucel nut a writ, in the name of George the Thirel, of the united kinsdum of Cireat Britain :und Irsland-Ireland, in its unfathomed caves of despotism; that hapless tin kettle, coomed to be eternally appurtenant to the tail of the dog of war. A declaration was filed, cautiously containing counts for goods sold and delivered, and for work and labor, with a notice to plead in eight days. Fven now the plaintiff did more than by legal courtesy he was bound in perfurm. He demanded a plea-how primitive the process! otherveise judgment-how awful the alternative!
"this was contumeliously contemned: it was treated as Brutum Fulmen. But the plairtiff, my lords, was no mimic Jove, bantering and blustering from a bridge of brass; Serge, and not Salmoneus, was the antagonist whom the defendant was to cope wilh. The bolt was hurled, and interlocntory juds. ment was signed for want of a plea. At this stage of the proccedings, the plaintifl's atcorney put iato ony unexperiencerl hands, an afthdavit of the cause and action. The motion he wished me to sul-uit to your lordthips was novel and arduous. Seniors in wik, and lowones in prinella, would have shrunk fiomits experiment. Bitt, fail of my client's wrongs, and awelliag like the Sybil with my subject, even so humble an indivdual as inyself now vehtures to move sour lordships-that it may be referred to the mas. ier to compute principal and interest on the bill of enchauy; upon which this action is brought!"

\section*{Chronicle.}

The Pretilent. - We are given to anderstandi, by the Nitional Intelisencer, that the President of the United States, accompanied by gen. Swift, clief of the corps of eagincers, by the general officir commanding in the several districis, ant, occasiopally, by a naval oflieer, will visit the poits northwardly; along the whole Atlantic border, thenes in ila it burg, and to Sackett's Harbor, and ont to letrost. and homeward through she comty ise propaes to travel without his fimily, as a oliath, on hadinens, und will refise to attond io any pubic or private invitation whlich a respect for liis pulths ar pinivite character may induce, an ending to loreat in upon Wis arrangements. A similar tour in the mumbis ird an! westward is, also, contemplatech.

Mr. Michaux has published at Puris, in English, his Jorth . Imerican Syiva, or description of the forests trees of the United States, Canada, and Nova Scotia, in six half volumes imperial octavo, with 150 coloured prints. This edition, it appears from the prospectus, contains sonic additions.
The U. S. brig Boxer, capt. I. Porter, has sailed from New- Vork on a cruize in the fitlph of Mesico and the West-India seas.
In consequence of the alatm existing on the frontiers of Gicorgia, by the hostility of the neighboring Indians, gen. Floyid, who commands a brigade of militia in that quarter, has been authorised by the governor to aclopt such measures for the safety of the people as he may deem necessary.
Dr. Wheelock, president of the Dartmouth collese, Xew-Hampshire, died o: the 11 h inst. aged 63 years. He was distinguished for piety, learning and gondness of heart, and succeeded his fatler in the presidency of the college in 1779. His lase act of munificence was a donation of \(\$ 40,000\) to the university which had long been the object of his soliritude.
The Rorap,-On the 111 h inst. in the United States district court of Virginia, judge 'lucker presidine, the schooner Romp, with her tackle, guns, \&cc. were declared to be forfeited to the United States: for being employed in eruising against, and committing hostilities upon, the subjects of the king of Spain, \&c.-On the 15th, Thoinas raylor, by his proctor, John Wickman, Visq. prayed an appeal from the decree, which was allowed, on or before the 1st of May, upon the security of 500 dollars.

Cold.-A letter from Bangor, Maine, dated April 4, says "snow here in the woods is three feet deep on a level, and it continues to freeze every night hist.""

Guv. Shelly has declined accepting the office of secretary of war. It is well observed that "the good old patriot has no reputation to gain, no ambilima to gratify, and thinks himself too far advanced in years to assume the details of a burthensome office."

Expedition. A new novel, in two volumes, containing 628 close printed pages, was put into the hands of a printer at New York on a \(H\) lednesdhay, and delivered by him enmplete to the bookseller on the following 'Tuesday, in time to offer it for sale, bound at 6 o'clock in the evening.

Fast sailing-The ship l'acific was only seventcen days on her passage from New York to Liverpool. The bric Fagle has arrived at Baltimore from Cape Henry, Hayti, in five days from cape to cape.

Trarelliug. - The distance from the falls of the Ohio to New-Orleans is 1502 miles, A steam boat with a full cargo, has peufurmed the voyage in seven days work-the whole passage oceupying nine days, two of which she was cletained by grounding on a sand bar.

Exchange. - Though the banks have generally resumed specie pasments, there is still differences of exchange. At New Ynik, April 19, they were given thus: South Carolina 1 wo 1 per cent. prem. Hoston, par to \& per cent, prem. Georgia, par; thi latelphia, par to \& per cout dis. Halimone \(\frac{1}{}\) dis. Virginia, dis. Xorts Carolina, 1 dis. New Or deans 2 dis.
3nt-in-luty inlaml-1 sir. Idwards, at New Vork, is uffering atvantaseous terms to those who will make actual setterments on this islated. We bad n-ves heard of f'us-inohay umtil f'erry anchored liss मictorions fleet in it.

The Jiupilin.-L_oanmi Ballwin, esc. principal lingineer in the Virginia board of public works, has completed dre surv! of the North Brapeh of the

Rappaltaninock and commenced that of the Kapidan. The full from the top of Hart's Dam, to the mouth of the Rapidan, a distance of 35 miles 102 rods, is 195 feet, 2 inches; and from the place of beginuing to Frederickshurg, a distance of 50 miles, 157 rods, the f. 11 is 310 feet, 4 inches.

Siogar.-It is stated that the culture of sugar in Lomsiana, sold at S8 50 cents per cwt. has givell to a Mr. Perrett Si82 for the labor of each hand employed by him. This, however, is considered as the maximum.
Nezv. York.-65,000 S were distributed from the school fund of this sta, e during the last yeatr. The return of the militia, exclusive of about 20 companies not heard from, give an aggregrite of 106,880 men-viz. 97,639 infantry, 6,434 ar tiliery and 2,807 cavalry. There are nincty-six nerospapers printed in this state-8 daily, 8 semm-weekly and the rest weekly. "T'/is is probably a greater number (ob serves the dluany drgits) il an is published in the whole of Eirope, if we except those published in the city of London.

Abolition of slavery in the state of Nerv-York.-By a Low passed on the thirty first of March, 1817, the final and total abolition of slavery within this state, is declared to take place on the 4 th day of July, 1817. In this law it is enacted "That every negro, mulatto and mustee within this state born betore the 4th day of July 1799, be fire," and by the s-me law it is further enacted, "that all negroes, mulattoes and mustees born after the 4 th day of July 1799, shall be firee;-males at the age of 28 years, and females at the age of 25 years.

The great canal.-From what we see in the proceedings of the legislature of New York, there is a strong probability that the mighty work of conaecting the great lakes with the Allantic by a canal from the Hudson to lake Erie, will be commenced. The project is considered as "easily practicable"nothing but the funds seems wanting, and we shoul: suppose that the iminense utility of the work ought so command them.

Imprisonment for debt is abolished in the state of New.York for all sums less than 25 dollars, provided the defendant makes oath that he does not possess any property excepting such as is by law now exempted from execution.

Auburn. We have a pleasant account of the dedication of a church, at Auburn, N. Y. which cost between 16 and 17,000 dollars. A little while since the spot where the village stands was a wilderness.

Mussachusetts-Gen. Brooks' majority for govern6r, it is supposed, is about 8000 .

Rhode-Island! - Nathaniel Kuight, rep. is elected governor of Rhode-Island. His opponent was gov Jones.
connecticet election. 1817.

By the late destructive flood, whic: caused the Kentucky river to rise fifty feet, a damage was snstained estimated at one million of dollars. A great part of the loss was in cobacco stored on the shores of the river, and swept away.

Inportunt Judicial decision.-At the late Superitur court of law, of Johnston conaty, out John S. 'lurr Wias offered as a witness and ohjecterl to, upon the ground of difect of religions principle. Wimesses were called, who deposed that, on divers occ...4i.ns, Tarr had declared that he did not believe there was either a heaven or a hell! nor any future rewards or punishment! It was contended on the other side, that Tarr should be sworn to declare whether he believed in a God, and in a future state of rewards and punishinents.
The judge, (C. J. Taylor, said that, on the one hand, it would be incongrunus to permit a matn to be sworn, when the very question was whether lie was qualified to swear; and on the other, that he agreed with those who held that a man shall not be compelled to declare opinions which go to disgrace and degrade him : he could not therefore permit a man to be exposed to such temptations to suppress tise truth.

Tarr was therefore rejected as utterly incompetent to give evidence, and as a person to whose oath the law gives no credit.- \(\left[x^{\circ}\right.\) Carolina paper.
Stbubesville, O, By a census, taken on the 1st of Feb. ult. this flourishing town was found io contain 2032 inhabitants-viz. white males under ten years old, 517 ; between 10 and 45, 440 ; over 45 , 94 -white females under 10, 441; between 10 and 45, 403; over 45,75-all other per'sons 62 .

The town was first laid out in 1798-it contains 2032 inhabitants, 453 houses, 3 churches, a cou't house, a market house 170 feet long, with a town house in second story; an extensive woolen factory, and a very large paper mill, both worked by steam; an air foundery, a brewery, a steam flour mill, a steam cotton factory, a nail factory, \&c. \&c.
Prices curvent in Ohio.-A late paper gives us the prices current of several articles at Sandusky, Worthington, Columbus, Circleville and Chillicothe, \(\mathrm{O}_{\text {. }}\) At the first named, flour sells for \(\$ 15\); at all the rest from 6 a 650 , and plenty. The price of corn bears the same proportion, being 150 cents at Sandusky, and 50, to 37, 33 and 40 at the other pl.ces; the price of common labor per day is 75 cents; carpenter's, \&c 200.
Ice houses, and the freezing of zoater, zoine, spirits, Bc.
One of the greatest luxuries, and preservers of the health in this climate during the hot months of summer, is ice. It is, therefore, with pleasure we observe that ice houses are multiplying in this, and indeed all other towns, and that there are few country gentlemen without them. But the air pumps, constructed by professor Leslie of Edinburg, for the fieezing of water and other Hllids, appears to us more convenient and cheaper for fanily purposes than an ice house. We understand ihat this appaax ratus is sold in London for five guineas, sufficiently large for freezing a gallon of water in ten minutes \(\mathrm{M}_{1}\). Leslie's apparatus has this superior advantage. that ice can be formed of any liquid whatever; besides that the ice which is formed from water by Mr. Leslie's pump is much purer than that of the ordinary ice house. At an entertainment given last summer at Bath, it is said that the wine was handed round frozen in the shape of small bunches of grapes.-[Petersburg Intel.
'1'he mugnetic neeille.-It is a singular circumstance (says a London paper) that none of the almanacs notice the now returning direction of the magnetic needle towards the north; in the year 1657 it pointed due north, but has been 160 years increasing in leclination westward; last year it attained a declension of 25 , and then became stationary, and it is now receding back again to the north.

"Sbur intention in enllect revolutionary ducuanents is I ghly approved with us. It is in miy prowe: if fural \(t\) authentic papers in relation t" important events lierctofore imperfectly de anled; mome of whels, indeed, have entircly eacaped the histopian "I fuclose yon the original repolt (and a copy lest von what not be able to decyplier it) of the battle fincht at the mouth of kenhatwa, luth of October, 1774. This statement is official, and was made on de fround the morning after the action, not more than five copies of it were preserved, and I have been credibly infurmed, that it is mow the only remaining official document in relaton tor thet import. ant transuction.

Yol. X II.
"I do not know that my efforts may be within the soope of your plan to publish revelutionary speeches, oritions, \&\&c. but I propnse to transmit you in the: courte of the year, uathentic docoments respecting the campaign led by governor Jmmane, with 15 w troops, against the N. W. India is, in the fall of \(1 / 7 \%\) : the left wing of whose army, consisting of 1000 rittemen, fouglit the battle ai \(P\) int Pleasant, early in the same uwnth in whic! the first rea lute us congreas convened; also respecting an important batlle fought "t the "Cireat islands," upon Ifo?stein, by captains Jamres Thompson and James Shelhy with the Cherokee Indians, led by the celebrated chief "1):ag.n Canoc," in the summer of 1776, in whicis the latter was signally defeated-also re-pectinis a c.mpaign, led by col. Christian witl, 2000 riflemen, सg.inst the Cherokees in the fill of the same yearAlso ropecting a camprign against the soithern Indians, in 1779, led ly general Evan S'ielby, with 1200 riflemen- 500 of whom were of the army of general Gien. R. Clirk, which campuign terininated in the destruction of their establishment at "Chicamanro," just above the "Vuscle Shoals," on the Tennessec-also respecting two severe actions fought at the "Einoree" and "Cedar Springs," on the waters of Broad river, Sunth-Carolina, in tive sumHer of 1780 , against a superior British force, by 800 rifleınen, led by onl. Shelby and the celebrated cul. Clark, of Georgia."
\(2 J\) Those things do not come within the scope of our design respecting recoludionary papers; but they are completely within the plan of the Regisтen, itself, and will be gratefully received and promptly inserted.

Camp on point pleasant,
At the mouth of Great Canurecy, October, 1774. For the satisfaction of the public, in this they have a true state of the battle fought at this place on the 10 th instant. Monday morning, about half ata hom before sun-rise, two of capt. Russell's company discovered a larfe party of ludians about a mile fiom camp; one of which men was shot down by the Intians, hire other made his escape and brought in the intelligence; iwo or three inilutes aftor, two of capt. Slieloy's men came is and contirmed the account.
Col. Andrew Lewis being informed thereaf, im medistely ordered ont col. Charles Li/w is to take the cominand of one limidred and fifty inẹn, of the Allguta troxps; and with him went capt. lickison, capt. Harrison, capt. Willson, capt. Jolm 1.ewis, of - Hugusta, and capt locleridge, which made the first dreision: col. Fleming was ordered to take commatnd of one hundred and lifty morg, consisting of Botctourt, Bedford and I incastle troups-viz. capt. Ibifurd, of Bedford, capt Love, of Botctontrt, and capt. Slic:by and capt. Russell, of Fimcastle, which made the second division. Col. Charles Lewis' division marched to the right some distance from the Onio; col Fleming, with he drision, up the bank of Ohio, in the left. Cul. Lewis' division had not marclied quute lialf a inite from camp, when about sin rise, all attack was made on the front of his dh. vision, in a most vigorons manner, by the united tribes of Indians, Shawnees, Delawares, Mingoes, haways, and of several nelge nations, in nuraber mil
less than eight hundred, and by many thought to be a thuusand; in this heary at tack col. 1.evis receised a womed which in a few hours occasioned lis death, and several of his men fell on the spot; in Fer the Allgusta dirision was firced to give way to the leavy fire of the enemy; in cbout a second of minute after the attack on coll. Lewis' division, the enemy engaged the front of col. Flemin'g's divisio:, on the Ohio; and in a slort time the colonel reccived two balls through his left arm, and one u.rcu-s his breast, and atier animating the officers and soldiers, in a most calm manner, to the pursuit of victory, retired to canip.
The loiss of the brave colonels from the field was sensibly felt by the officers in particular; but the - Ingustis troups being shortly (aficr) reinforced from camp hy co!. Pield, with his company, tosether with c.ipt. M Dowel, capt. Nathews and capt. Stu art, from Al:gusta, and capt. Arbuckle and capt. 11 Clenahan, from Botetourt, the criemy, no bouger able to muin ain their ground, was forced lo give w? till they were in a line with the tronps of col. Fle:ning, left martion on the bark of Olin. In this precipitate retreat col. Hich was killed; capt. Shelby was then ordered to take the command. Buring this time, which was after twelve 0 'clock, the astisul coint inned extranely hot-the close underword, many stecp banks and logs, greatly favored their retreat, and the bravest of their meumad the bes: use of them, wlilst others were throwing their dcad into the Ohio and carrying of their woumded
After twelve o'clock the action in a small degret abated; but continnerd, except at short intervals sharp enough till after one 0 'clock; their long retreat gave them a most advantageons spot of ground, from whence it appeared to the officers so difficult to dislorge them that it was thought most advis:ible to stand as the line then was formed, which was about a mile and a quirter in length, and had till then sustained a constant and equal weight of the action, frorn wing to wing. It was till about half an hour of sunset they continued firing on us scattering shots, which we returned to their disalvantage; at length night coming on, they found a safe retreat. They had not the satisfaction of carrying off any nur men's scalps, save one or two stragglers, whom they killed before the engagement. Ilany of their dead they scalped rather than we should have them; but our troops scalped upwards of twen'y of those who werefirst killed. It is beyond a doubt their loss in number far cxceeds ours, which is considerable.
dield officers killed-Col. Charles I.ewis and col. John Field. Fielldofficers zoornled-Cul. 11 m . Fiem ing. Copitains helled-Jolm Muray, Samuel Wiilsoi, Rubert A'Clenalan and Charles Wiad. Vance, licut. Gol man and !ieut. James Rubist \(\boldsymbol{m}_{\text {, }}\), and about 46 spics, sergeants and private men killed, and about 80 wounded.

\section*{Mr. Brougham's specch. \\ motse of commens,-math 13. \\ Distress of the country.}

Mr. Procgham, in rising, pursuant to notice, to bring this very important subject forward, said, when he considered that the period of the session was well nigh passed in which it was the custom of that house, at former periods of great national disresse, to tike into consideratien the state of the
country, and that duwing that period nothing whatexcr had been done to bring the matter bef, it them, ar to testify on their part what he considered a proper and becoming anxiety concurning such distress, he felt himseif some what supported molcr the magnitude of the question. They had, in fuct, athowed that interval to elapse, willout diong any thing, except what he conceived to be, with all due respect for their proceedinge, heginnirg at the vrong end. They had attempled to stifle the cries of the people, in tl:cir sutfryings and distress, insteat of probing the causes of those sufferings, or endeavozing to apply a remedy. He wonld put it, however, to all who then heard him, to those gentlemen, who might thiisk with lim, that the measures adopied were erroncous, and to those who helieved them well founderl, by the necessitiss of the times, whether the time was not now eome When it behoved liens to furn their attention from the etlicet to the canse; whether, having done what they could to prescrve the public peace and tranquility, they ought not now in inquire into the indans of remedying those distnbbances. It was with that view he made bold to hring forward the present question; too late, he admitted, in refer. ence to the general sulject, but yet not ton late, he hoperl, to clo some good. IIe was aware there wis nothirg so injurliciours as to begin a di. cussion of that kind, by hazarding any large and general predicions with regard to what would be its result; never!licless he would venture to say, he most confidently expected, whaterer difference of opinion night exist upnn particmar topics, that a considerable majority of the house (if it sloould be necessary to take the sense of it) would agree in holding, that the time was now come, when, the war being ended, and great and general changes having taking place in the sitmation of the whole world, it was absolurly necessary fre us to emter upon a careful and cinfearing revision of almost the whole of our commercial system, with a view to eradicate those errors which time had demons!rated, with a view to retrace thoce steps where it was found we hard deviated from somal poliey, with a view to accommodate our laws to that change of circumstances, and with a view to abandon many frantic and senseless prejudices, unworthy the age in which we lived, and unworthy of the character and jud gment of the nation. He should begin by enter. ing upon what he considered to be the fundanental part of the inquiry that ouglit in be instituted.They were all aware that there existed in the country a great degree of distress. We mizht, in ge. neral terms, say, that in its extent and anount it w:is wholly unprecetented in any former perion of one history. It was, indecd, a matter of such ge"real notoriely, that it would hardly appear necessary to enforce it by any particular proofs or illustrations, were it not, hait unless the house were fully and deeply impressed with the precise degree of inisery that prevailed in specific districts, it, would in vain attempt cither to probe its sources, or apply a remedy. Hc might infer, incleed, from the number of petitions that were presented (notwithstanding what had been urged respecting the: mode of obtaining sigrnatures to them) coning as Lley did fiom such a variety of places and persons, that they tirnished a strong evile:nce in support of the assertion. He might appeal next to the state of our trade and commerce, as alditional evidence. furnished by the returns laid upon their table. At the same time he was aware there was nothing more fallacious, generaill, than arguments which were wholly founded upni our imports and exports.
and he would allow, that those retums did not shew population of 84,000 , contained in that town, it was the exact measure or extent of our distresses. Bui, calculated that 27,500 or bur one-thind on the as far as they went they were not unimportant docu. ments; and it appeared from them, by a comparison between the two years 1815 and 1816, that there was a deficit in tomnage upon the latter year, amounting to \(8: 20,000\), or equal to 5000 vessels. He spoke of the aggregate as referable to one year only of exports and imports; and that alone, he thought, exhibited a striking fact, when they considered that 1815 was the first year of peace, and 1816, in which that great diminution occurred, was the second year of peace. Those returns spoke as to the tonage inwards and outwards, but they did not tell any thing as to the difference between the exports aid imports of that period; a difference, ulich he would venture to say, instead of being in the proportion of 5000 vessels, would be fonud to constitute a defalcation vastly greater in amount. He was ivell aware that many millions of goods had been semt abroad, for which no returns had been veceiveri, and which, in fact, would never produce a sixpence. The returns upon their table would हive them no information upon that point; they would not show what proportion of those goods ioad already frund a market, what proportion of then were yet likely to tind a market, or what proportion of those importerl into this country had found o:s. They had known times of great nation. at distress in former permads, but noihing that could compare to the present in its gencral amonnt. In 1800 there was a great scarcity, greater than was uow felt, hut no distress ensued heyond what the reach of time could remedy, for though provisions were dear, workinen were in full work, and thus enathled, in some degree, to sustain the evil. In 1812 there was distress, accompanied indeed by a slighter pressure of dearth than in 1800 , but by a considerable diminution in the rate of wages.Wretched, however, as the circumstances were in whic', Lieq manufacturing population of the country was then placed, yet when compared with the present misery, it acthally rose into a period of prosperity. It would be necessary for him, and he inped the house would grant him their indulgence Theart 10 go shortly into a few particulars respect--ng the great staple manufactures of the country, and they would then see how general and unvaried the distress was which now prevailed. He would first take the clothiers, which branch of trade, however, firm accidental circumstances, was not so deprensed as others of our great staples. One reason \(w_{\text {ast }}\) that some of the foreign markets did not hap. pien to he over-stocked with that manufacture. He hill in lis hand the result of statements which he hat received from severulaf the principal clothing districts in Yorkslure; he alluded in Leeds, Hide dersficld. Wakefield, and Halifix. He had taken the number of men employed in those branches, which suffered the most, at 2,360 in Aughast last; of that number onc-third were now wholly out of umploy, and of the remaining two-thirds, only one. third liad fill work; in other words, ouly two men in uine, at the present monient, had full work.The distresses in other parts of that counstry were not so convinlerable; but in the clothing dintricts of the west of Eingland they were greater than any thing that could be concelved. In passing to the irmm trate, as carried on at Bironinghath, and in the nenghboring eounties, a much more f़̣ formy picture Was presented; and Birmingham might be considered as a fair symptom of the siate of the neigh. boring counties, counected an they were with 11, in all the brancheg of the ir interngl irada Upona
whole, were at this moment parish pateprs. Of the warkmen, one-third were wholly out of empley, and the poors' rates there, had risen to between 50 anil 60,0001 a year-a sun), exceeding, as he understood, what was formerly paid by that town under the pimperty tax. In 1812, a period of creat distress, instead of one-third receivine pariol reliff, and only 27,0001 . a year was paic! for poul's rates, instead of nearly 60 , (10ul. \(y \in t\) that pplind was the:1 thought to be one of unparalieled diffirulty. The popnlation of Birminglam might he divided into four classes, in the view of their wayss anc' labor. The first were the miners, cinnoloyed in obtaining the raw maierial; the secomd, those whe were ent. ploved in the manufacture of arms; the third, the nailors; and the fourth, the common artificers. With respect to the first, who fismerly received 18 s . or a guinea a week, the: conlit rinw get only 8s. or 10s. Those whin werp engared in the manilfacture of arms, and w'io used to receive sometimes as mucli as three guin as a week (though he admitted that was an exor'hitant rate of \(w\)..ges, arising from paricular circumatances) now received, When they obtain emplo men', -o more than fis od. Tie nailors, who commonly earned aloont iwelve or fifieen shillirgs a week, were rather better off in comparison with theothers, but their wages was now down as low as nise shollings; while the comthon artilicers were absoltetely working at one snilling a day But the mostre:nakable proof of the degree (1) which the distress ac natily existed was in he found in the fact, that wherest the wives and children of the men who used to be enipluyed, and whose wages dombled the earnings of the fainil!, were now wholly unemployed. He dil nnt wish to mingle any thing of a pol tirai luature with his description of these distres-es, whe fett it clue to the character of those unhappy persons in slate (and he diel so from the most accurate inf imnatinn communicated by individuals who did not conincide with hin in political scutiments) that a more peaceable, loyal, and tranquil set of men was not to be found in the whole of his majesty's dominions [hear, hear, hear!]. It was painfil to say, that great and severe as the distress was in Birmingham and its vicinity. the picture becane infinitely more melancholy. When they looked at that great ancient staple of our country (ancient in complarison with the last mentioned) the cotton trade. It wix well known to that house, that the cotton manufacture was divided into two branclies-the spinning and the weaving; but the numbers employed in weaving whs out of all proporion greater than those employed in spinning. In Lancashire alone there was at least halt a million of persons whoderived their supmort from the former. Their wages in 1300 were \(13 \%\). 3d. a week, taking the average of one thonzand workmen. 'Tlose thousind in 1802 were paid at a still higher average, fior it amounted to l.js. 10.1.In 1806 it came down to 10s. Gil. and in 1808, when it pleased the government to retaliate measures upion the enemy, and in quarrel with their best customers, it was as low as bis fil. In 1812, when we pursual those ine sures still mire chisely, it fill sull further, and wav only cis 41 1, 1411, a year of peace, and while we wert panieg from that Iraisition which had been so murh talked of, it was 59. 2d. that was in Jast Mal; and in last Jahluary, it reachert the fearful point of depre an: of ts. 311 . per week, from which, when certain cus:omary expences were decheted, little more than As, id. was len to tilpport butnmi hice for zevon daysm

Wh.en he he:r! of that unexsmpled soce of hu man risery, he was terapted to ask how: it was jus sishe of sist in existence under sucli ci-cunasiances,
 table -in' - Th the first question tre reccisedt th J. intel incellirence, \(t^{1}\) ati those miserable beings cutula f-11 chase, wit' their scam! earmings, no mo:" i) ban haf a poind of natmeal a d:a, which, 1 ixed wi'h lit tas satt ant wates, eonstitntell the whole of tueir fuod. In answer to the se cond lie was in furfucd, Uat upon a calculation of what worli? be necessuy 10) afinal f!enen only :i slight umuris!iment, a litile malis, b en anlmeat, in aduition to their oatmeat, it upp.arel that no lees a sum than 21,0001 a Week woul be requisite. To talk ol charity there fore, was cuterly out of the question; ithe case lay whonly bryond the reach of private benefaction, and if rumed i l at all, mast hope for remedy fiom o!her sun:ces. What was the consequence of such unex:muled misery? Tl:oste poor wretches were compellal, tor their support, in part piece-meal with. the whol (f their properiy, from the little fu:ni ture of their ealtages down to the cloaths which sholtcred them fiom the weather. 'They submitted to t!enthatf pornd of ort-meal and their salt and water, upon a calculation, lhat if they sat up one lome longer :t their wotk, they mirgt earn indeed 1.1. more, a balf penny of which would go to the purchase uf a candile, and the penny would remain for themstlver; but then, they would be the less able to go through thën labor on the following day. lo sucfi a frightful calculation were they reduced, treating themselves like mere machines, and estimaling by their plysical powers, the utmost possible work which they could perform. At last, howeter, they were compelled to come upon the parish foy relitf. If from those particulars they ascended to more satisfictory evidence, they would find in all thit hisel happened nothing but what might be expected to happen firm. the general signs of the times. First, he would refer to the great diminulion that had taken place in the constimption of luxurious articles all over the country. He alluded to a diminution in that consumption as attested by the undeniable defalcation in the excise and customs draing the last year. In like manner it would be found, !!at all districts which depended upon the manufacture of articles of luxurious consump ticin lad suffered first. The case of Spitalfields was well known. The population of that place, af ler 11 !es dausted the whole of the poors' lutes, lind 3 Exived a suin whth the voluntary contribulions of individats (which reflected the highest hoaner upon the charitable and liberal characier of t! e retropolis) - [henr, hear! ] equal to the whole tental of that purish, taken at a rack rent. 'There was an instance, indeerl, of an estate in that parish, which paid nearly half its rent in pors' rates. Fiven the ordinary end common luxuries of watcles, sliewel the extent to which the present dithiculy and distress prevailed. It appeared from what ail fonoriable firiend of his had stated, upon a former evcriang, that a person in the town which he represented, was accustomed to travel in the watch tracie, and that he usually visited about two humdred and thirty towns and cities in the course of a tear, where he sold at least six hundred watches. Litit year, hrwever, making precisely the same circui and visiting precisely the same places, he sold 41. l'erhaps a stronger symptom could not be produced of what he liad asserted, of the great diminution in the consumption of articles merely luxu. rious. Nor was the fict by any means peculiar to the watcot mukers of Goyentry. In London as ap-
peared trom a statement some (lays siace in all the public prints, there were lonw \(\mathrm{J}^{\prime}\) ) () jourmoymer
 employment corld earn only one formily uf what they Were accuston ed to c:arly, and durig lhe last weath only one sisth. The said frersnos alsa hact been cormpelled in piedire tools usid in their trade
 wir to \(1.500 \varepsilon\). Tlete Wert citler Irarles in london stificring lice same defoc si m, fir if he was not misinformed, there were at shat present moment. at least 18,000 juidnevanen tailors out ofemployinent. A.hotincr sy mpi of the present distress, he wok 20 be, the great ciscontent excited throughont the comntry by the introduction of new machincry. Formerly, when any muchincs were invented which dispensed with manual labor, though perlaps partial discontent might be produced at tirst, yet, as the workmen specdily found other chamels of enmployment, which absorbed the dis engraged population with its industry, it did not amonnt to any thing like what was created at the present moment. Now, however, the petitions upon Wheir table, from thousands and tens of thounands of individuals, complaming of the introduction of machinery, testified, that when they were once thrown out of one employment, no other was ready lo receive them, and that the capital which was saved by machinery no longer produced that healing effect which it was wont to do. When sir Rich'd Arkwright invented that mechanical apparatus which had prov. ed of suclr infinite use to the country, though deprived many hundreds of their livelihood at the time, yet no particular discontent was excited. He (Mr. B:ougham) had applied to two of the greatest coiton manuficturers in the kirgdom, one in Sc otland and one in England, for a calculation of the saving in manual labor, effected by that machine. The answer from both was so exactly alike (hough neither knew that the other was asked) that he was justified in assuming it to be a correct clllculation; and lie was informed that one man was made to do as much as 100 men before. No violent discontent, however, was expressed at its introduction. But the case was very different now; and lardly knew whether to be sorry or glad at the change. Of late there had been an accession to the machinery of the country in the weaving trude, which, though not likely to throw so many out of employment as sir R. Arkwright's invention, yet bade fair to throw out a great number of those already wretched cotton weavers. Healluded to what was called the powerfoom, by which one child could do as much work is two or three men. He would tell the house, however, what was likely 10 impede the: further progress of mechanical improvement. It was now actually format, for the first time in the history of mankiind, that the wages of labor were so !uw, and the distress so great, that manual labor was making reprisals on machinery, that it was coming in compe. tition with machinery, and making ic impossible for even one child to matntain its ground against the diminished clams of two or three men. There were other branches of manufacture, such as the printing trade and lace trade, threatened, if he might use the expression, with the introduction of machinery, and which not eren the low rate of wages was likely to keep out. The last symptom to which: he should allude, was the state of the money inarket. He was aware there were some who rebarded that question in a very different light to which he did. He did not know whether the right honorable gentleman opposite (the chancellor of the exchequer) concurred in on opinion which vis en-

Eertained by a high anthority in another place; by no less an authority than the prime minister of England, and when was also at the head of the financial department of this countr. That noble earl had inclulged in the most flattering hopes, and derived the mas firorable ausurica from the late rise in the finds, which he was pleased to attribute, in some sort of way, which lie (M.B.) could not comprehend, to the suspension of the habeas corpus act -[hear, hear!'] That measure was considere! by the noble earl, as at least f.vorable to the commerce of the commtry; whatever inight be its injury \(t\), the constitution. B.1t suppose he were disposed to turn the tables upon the first lord of the tre:sury, and ask hin to look at the still greater rise in the finds after the report of the eommittee appointed in enguire into the contents of the green bag. That report first unfoided the existence of the Spen cean system, which might be found to have some analog! with the finds, because, though the laul holler, in that system was to be despoiled, the fradholder was still more violently denounced as a monitn that should not be suffered to exist. Therefore, if he chose to assume so trivial a principle, he might with more propriety argue, that the rise of the finds immediately after the promulgation of that terrible plot, by the committec, was at least a proof of the toial disholief, on the part nf the fundhilders, in the existence of any such plot. He should vot, however, resort to awy reasoning of that kind, but contend that the actual state of the mo ney market supported the arguments he had already advanced. It was well known that there existed an unprecerkented facility in obtaining discounts fir bills at a short credit, at 4 and \(4 \frac{1}{2}\) per cent. Which could not have been procured two or three years ago. The stocks also had risen, and were now about ten ner cent. nominally, more thaw they were two scars sitice. What did all that prove? If he sat that the e was any proportionate facility in raining money upon land at 5 per cent. that was, upon the very best sccurity our law afforded-namely, a mort tay 5 c; he misht be disposed to stop bef, re he stated that that rise in the stocks, and that facility in ohtaihing discount for bills, was only a proof of the glut which prevailed in the money market. The fict uss, there wis more money in the market than could find empldyment in the trade of Eing land, athl no capitalist chose \(t\) allow his money to be mere than six months beyond his reach. It was on the arme principle that there existed the negocituinn for baas to firceign powers. One of these, namely, that will France, had been concluded, and there was litule doglot but a very co siderable part of the innoney \(a\) : vanced would he drawn fiom the capital of this country. America had also two nego ciations of a similar nature in progress, with the pirliculiart if tone he lappenel to be acquainted It was what wat chlted a stack opreration, and would most prob bly be muplied from Brilisht funds, irom the utier impostibility of employing the capital of the country in any encouraging speculation, either commercial or manufacturing. The only retwaining point connected with that part of the grestion at which the should cursorily glance, was the rate of exchange, and lie would only arime tho house, that before he sat down, be shonith feel itat he liad eit tirely filted in the views he diad taken of the glimes. tion, if he would not bring lome to the eonviction of the house, that what was called the favorabie rate of excliange, was lott another proof of the depretsed Thateof our trable-that it was the nteural result of forced exportations, without any import in return. iv Erance, for instance, owing to thole exportations,
and there being no import, and in the consequent demam! for bills to in the remittances, the twenty shillings Britis! was raised between a 9 th anil a 12 th higher than the par. When such was the unexainpled embarrassment and listress under which :hesa two great somees of national prosperity labored, it was fitile to expect Hat swh an unnatioral state of depression should not affict, and severelv affict, the agricultural interest. The oilly difference \(\boldsymbol{v}\), that as in the last year these eficc's were acc mprer iel by a very superabundant harvest, and by the it ane in the warehouses of the former importat in s if carr, at present they were in a clegrec qualified, Darly by the measures adopted by the legisla!ure, and parly by the advanced price, that the wature of the last season's crops affurded to the landhalrler. I was in \(v\) in 10 drati any line of invitions distinction between the e our host and nearest interests, they must be all intima cly aff ctell by the progre svand decline of each nther, for it was well ohserved by one of the gieatestomaments of one of the erlisises, and who, from his sucress in tran!e, becante riterwards an ornament of the landed interesi, and from his great experience in both, hecame ail omament to letters, (he meant Mr. Child) that trade and land will hoth increase and decay with each other-when it was ill with trade land would tall-when wroll wh trade land would flourish-[hear, henr!) Tue house would feel that it was misch less difficult (1) de. scribe the extent and intensity of the prevalent diis. tress in all these brameles of the roblic economy, than to give an accurate outline of the encurring canser that have prodnced these disastrous effects, separating also those that might have arisen from temporary circumstances, fiom those that were of progressive growth, must be stipposed to be more deeply ronted and intorworen "ith the system of policy that has been pursue ]. In this diffinlty the better and more explicit course was to illustrate his opinion. It was truc, from the nature of things it must be the case, that the tr..nsition from war to peace must have affected many branches of the pub. lic wealth. Some of a forcion, but the greater proportion of a domestic relation. There were two of these branches that must have heen peculiarly injured by the ehange-naately, the provision trate of Ireland, and the manufacture of military weapons at Ilirmingham. The ditiress arising from such sources, it was easy to in! !erstand might be wompurary, but \(a^{+}\)the same tune it was to be recollected, that the occurrence of thls temporary hardship, at a moment when a general clepression in all the other branches, not under the infuence of the same c.anses, Was so sensibly felt-when it was impossible tliat if e hands thrown out of employment could be abwrhed in the geicral system-when there was sip-h a pre neral chooking of all the sonices of ationtind ind try, it "las noi unnatural that diktrest, under inore f.ivorable circumstanoes of a tramsient clameter, might grow illo a permanent sy tern We hal onfy to look' at other branches of tivile bovides thnte if. penting on war for their exitience, to be sutistied that the depreisimi was not circhimerilied. Thie cotton tracte, unaffeciet by the ersation of warlik pursuits, was as dopreatd as the very gin maitifactory of Birmingham in order to arrive at the trae complexion of our situstion, we mu-i sec fully the amount and extent of the cril. The mori acctirately we c. nvassell it, the mare ve rould be ennvinced that it was of an utivemal dexeriptimthat it was not only general, but searching-iliat there was not one filainent or ibre, he mizhet ith. in the whole eystem of our eoonomy, that dil nos feel it deptening influenc:, and was aclunliy inert
in the exercise of its functions- \([\) hear, her.r! \(]\) I। vas alrust ulfuecessiary 10 udd, that we hacd now appraacied the end of the third year since the tran sition from \(\mathrm{W}-\mathrm{r}\) to peace, and still no mitigation, fut, on the con'ray, increasins calamity; whilst in latt that \(\mid\) erist, trom the ent of all former wars, the nasion had recorered fully from those tempurary effec's that the change in our retations had produced. He wouln, the: efure, take leave to mention, what :pprartd to him, after the fullest investigation of the suiaject, to be the real causes of the unsaturial state in which the country, confessedly on all sides, was placed. He henged the house, in the first place, impartatly to reftect on the line of polico whish for years pazt, had characterised the public curnci!s of the country. In referring to that policy, he shuuld as much as possible avoid the more debaleate ground of the question as it respected the co sinuance and protraction of war, and keep to poin's on uhich he was inslined to belive no very great differt ce of opinion existed It would seem that the prictical politicians of this country, as they siyled then!selves, were long surrounded by a class of ment, that blending a sort of political feeling with what was called mercantile knowledge, had considerable influence in guiding the councils of the nation; that it was an axiom, equally sacred as it was profonnd, with these sage instructors of the adminisurition, that they could hardly do too much in discouraging foreign importations of all kinds and from all countries. To this remrant of the morcantile interest, as it was titled, they invariably adliered, by which it was to be all trade and no partnership-all sclling and no buying-all was to be done for monev, and nothing for goods-[heur, Jear.'] In favor of this doctrine, exploded years ago by every improved and enlightened mind, by every means, fair or foul, for the morality of these sound advisers in support of a constant balance of trade, was far from being rigid; it was marvellous to know that in this age, and in this comtry, the practical resulis of this repudiated jargon were still existing, and were traced in broad characters up to the very last !ear, in the enactments of the statute book-[heur, hear! \(]\) Year, after year, we were pro. ceeding under such auspices, until at length, as was natural, we had deprived ourselves of all the great staples of foreign commerce-[hear, hear!] To the subversion of unl carrying trade, we had succeeded in excluchng from our warehousing depots, all the prodnctions of foreign countries. The instances would strike the house as soon as they were staterl in detait. To the opinion that he originally entertained on the corn law, he still adhered; yet in considering the devclopment of that measure, it was easy to perceive the cffect of that inain sin in our commercial system with foreign nations. To be sure, lie filt now as lie did then, ilaat those injurious effects wuld be compensated in that rase by the higher consuleration of insuring to this country a regular and safe supply of the great necessary of life, which no change of foreign policy, nor caprice of foreign governinents, could impede o: disturb[hear, hear, hear!] Besides, it must be almitted, that even if that enactment was exceptionable as a general branch of permanent pulicy, it was filly justifiable as a temporary resource. There was also this further consideration, that the very existence of the manatural depression in all the sources of national wealth, became a strong ground, at that particular moment, for its adoption. Recurring, however, to the details of the system to which the evils of the times were mainly attributable, he would first advert to the Baltic trade. That trade

Was of considerable interest to our shipping and uns conmerce - both in point of defence and gain, it was most valuablc. It was so near, as to allow quick returns to speculators, and quick voyages for the nursery of our seamen. It was accompanied witl a pre-eminent degree of security, from other calses not then necessiry to mention. Yet of the fuur great staples of that trade, the two principal ones we had totally cut up. The two others, hemp and tallow, remained; but the importation of iron and timber had wholly disappeared. And for what objects had we sacrificed these great markets for our manufactures? For the sake of the money speculations of this country, we had placed on foreign iron a duty, equal to a prohibition, whilst, to prop up the importations from our North American colunics, we excluded the othes great staple of the Baltic trade. Instead of leaving, as sound policy would have dictated, the money speculators of this country to their own fate, to thrive, if they could, by their own natural progress, we pampered them, gave an unnatural stimulus, and, in pursuit of a precarious gambling, and, in fact, most losing concern, abandoned an intercourse that increased your capital and employed your population-[heur, hear!] To Norway this country had long been in the habit of exporting manufactures to the amount of between 4 and \(£ 500,000\), annually. That consumption has now ceased, Norway having no other means of payment to make than the iron and wood, which the modern policy had altogether excluded. We have done the same by the article of copper; and, luoking to the supply that South America could give, we have shut ourselves out from that great continent. It was but a few nights past, that some allusion had been made to the act of last session, that imposed protecting duties on the importation of foreign butter and clieese; and in order to shew the house what little faith was to be placed in all those unsound calculations from all export and the ligh rate of exchange, lie would merely mention the one fiactthat the very day last session that these protecting duties were enacted, as true as the pulse respondexl to the beat of the heart, an increase of 2 or. 3 per cent. took place in the city in the rate of exchange, while the imposition of these duties were admitted to be the only cause. The same pervere system characterized our commercial intercourse with France. Partly from political feeling, and partly froan commercial views, there was a clats ot men in this country, who laid it down as a priaciple, from whence they deemed it almost irreligious to depart. to take no wine from France-though it was oul nearest market, and ought to be our best customer. and though it grew the best wines, incleed the wines considered by some as the only drinkable, yet all importation thence was to be avoided, because, forsooth, Erance was our natural enerny, and l'ortugal our firm firiend-[hear, hear!] In the true spirit of this creed, the right honorable the chancel. lne of the excheruer laid an additional duty ou claret last session, not, as he himself professed, for the purposes of revenue, but to discourage impo:tation as much as possible. It may, in the contenylation of this class of politicians, be a proof of a compreIrensive policy in this manuf:cturing conntry to quarrel with its best customer; but to speak is it trader, on the suggestions of common sense, lie conld consider it, not in the light of sound policy, but dictated by a prejudice burdering on iusanity itself-[lear, hear!'] He next consicleration that offered itself was the policy purned respecturg the linen trade. 'The carrying trade had no more beneficial support than wliat was afforded by tlie tran.
sit of fureign linens, yet on this most productive brancl of rale we didnot sop until we had immosed a 15 per cent. dity. The ground for this extraordinary measure was simply this-many na ion:s prefer the purchase of foreign linens in our manufacture. We salv this, and sail immedistely fley should nut be gratified. To legishte we went, determined that a it of priament, the very moment it received the roy al assent, shoald make foreign nations change the ir taste to please as. What was the consegnence? It was this-That thoie very nations the formerly repaired to British markets for foreign linen, and at the same time to complete their ass rament in Britith goods, the fareign linens opera ing as a sort of decov to the sale of our own mamifactures, all at once ceased to visit our ports. They owed this country no alleginuce, and directed their course to Hunhuirgh and Copenhagen, where they were enabled to obtain these foreign linens :it cheaper rate than they were in the habit of purchasing at in the British market This hitter advantage they were, however, inclined to forego. The upporti nily of completing their curgo in British articles, bsing co sid rel by then as a full compensation. The transit du'y was imposed, and with it this valuable brau ch of our irade also dis:ppeared. Such a sch unc of pervarie and stort sighted pelicy would have corresponded with the state of infurmation that existed on the great principles of commerce 150 years ago. But what will the house or the coun ry say, when, after almost centuries of experience, af er the fill knowlet!ge that the events of the last twenty years should liave imparted; yet as late as the year 1810 , notwithstanding the utter abserdity of tenc.s stuch as these, they were made the grould-work of our trading policy, and were now realizing all their natural evils. He might mention the coal trade, out the export of which a duty of to per eent. was levied, and fur which, without sich a dutv, we might find a market m France, proviled we would tike her miods in re turn. He night also dwell with effect on the un accountable inconsistency of our ters regarding wool, on the prohibition to ite ankrt, thongh :wist might be expurted. Lille c , unider all the cirmustimces, lie thought it was not fellig tou for to state, that the time liad now arrivel which called for a foll and enxious review of tio obeie t:ading policy of this country-lhear, liecr! fram al sider.'] That mot only that policy demanded it, bet cur mavigation syatum mast imperionsly required the same kind of prompt and accurale rctilim. Indian prorts. What course did Amevica in conseTlence propose to take? She said, if ynu will not alLw us to imiport in our oun botoms those provision, to your colonies, of which they stand in need, and without which, ther would in extreme cases starve, ve will, (retaliating on our heals the :nischiefs? of our (ww pulicr, ) shat our ports asainst vesseis rither foom or bound tothose places from which we are excluded. That was the object of a bill now before congress, of which he had seen a copy: He knew also that a considerable alarm prevaile. at present in the colonies on that subiwct. If was a striking specimen of that system ihat refuses in vary with human circumstances-that will not ac. commodiate itsedf to the progress and changns of times and scasons, but keeps rigornusly in what was once important though now inapplicable, as if time was standing still, and the events of history had no distinctive claaracter: ('iear, licar, hear !). Seeing, thien, the universal distress that pervaled every branch of the public economs, how nur trade was cramped by the sloort sightal limitations of an unenlightened policy; what litile relief, and even that little accompanied with some obstructions it hal received from our negociations with fureign powers, there never was a peried in the vicissitudes of this country, when, with so much propricty, it might be uffirined, that Bitish commerce actually labored for its existence [hear, liear !] That whei we cast our eyes over every point of the compass. and when scarce a solitary spot of cornfurt or of hope presented themselves, it was matural for that house, for our unfortunate brethren, now sufficring under indescribable distress, whose industry bore us through the late eventful struggle, - for the whole population, pressed by the difficulties of a protracted war, aud exhausted inder its overbearing taxation, now cift off from those very 6xpplies which the unnatural inonopoly of the war affurded-it was, he would say, natural that they should all cast their eycu with eager expectation on some new source of recurery-smine new opening for the excrion of their industry There could exist no opening so magnificent in proinise-so calculated to realize the most sanguine hopes-so congenial to the most generous sympathe, and so consivient with the best interest of Bri-tain-that he iadeed nust be more than a tempe. rate-a cold reasoner, that did not grow warna when hie adverted to the prospects of South Aine. rica [hear, hear!] It was said by the eloquent histurian (hobertson) who described the progress of We first rude invaders of that country, that when, after dificul-ंes unexampled, amul privations al. imost insupportable, after a strugble with st:ferings? bey ond endurance, when wearied, hungerchl and exhausted, they arrived at the elevated summit so loug the ohject of that perilous will: they stuod at once motionless, in mute admiration at the ininense occan that preschted itself to their hensing ricw, and to the boundless territory that gave birth to all their fond calculations. The perplo of this country, afer their long and dreary pilgriinigeafter the datgers to which chey have been expuret, and the dilliculties they have surinnumten, hove liat sumewhat of the same pmopect open to the if vims. and oughte to be cuablecil, if any regard to the dice: tales of a sound pratie! evisis-if any reveruice for the maximes of our ancestors hatl i's influcnce in our councils, 10 make a nearer approach to this inviting intercourse. There was ton, that rast expanse of territory, compreliending every soil, and every climate, intersected by inland seas rather than by rivery, and studded with harbors, angle
room for the exertion of British enterprize. A country populous enough to raise every species of produce that we wanted, and yet not populous enough to threaten its continuance with any rivalry. It had that also, which was the patron saint of cle class of practical politicians, to whom he alluded, great mines of gold and silver. Notwithatanding all that had been drawn from it, yet greatly productive, and, under European skill and ingenuity, capable of being made still further productive, such was the prospect South America presented. A prospect calculated to compensate every enterprize. Though Europe was hermetically sealed against you-even though Bonaparte and his continental system was, as it indeed is, revived-though even Europe itself, in a commercial view, was blotted out of the map of the world, let no man suppose that this was the mere indulgence of f.uncy-he rested his statements on the perusal of documents of the mast unquestionable character. The exportations of that country amounted to 18,000,0001. an. nually. Some portion of that amount found its way to this country, but it was, he with regret must say, decreasing daily under the impolitic course that in regard to that continent we pursued. He would state for the guidance of the honorable gentlemen opposite some facts, because he well knew that they would listen to nothing but in the shape of detail [a laugh, and hear, hear!] In the year 1802, there was imported into Cadiz no less an amount than eighteen millions and an half, twelve millions in bultion, bullion he would repeat, for the consideration of the practical politicians opposite and six millions in goods. The yearly coinage was twelve millions, of which Mexico gave seven. The population was computed at se. venteen millions, of which New Spain was reckoned between seven and eight. Of that popalation, in the majority of districts, not one in three wear foreign goods. In New spain not one in seven.What an opening did this state of events afford to facilitate the introduction of British manufactures? You had here but to encourage the public taste for their use, as there existed no want of the power of repaying the purchase. If any proofs were wanting, the occurrences at Buenos Ayres furnished it, inasmuch as the two gluts of British articles into that section of the continent, though they proved fatal in the projectors, yet had been advantageous in liffusing a taste for the use and consumption of British manufactures. Were we to succeed in opening some of the other ports, the inevitable consequence would be, that this country would take off, oot any stated amount of their exports, but an amount that almost deterred the imagination from ealculating. With such a country inviting our ap-proach-with mo prejudice anong its population lostile to our views-possessed of money sufficient to answer boundless traffi--how has it happened, thit in times of such great pressure, this theitre his been overlooked [hear, hear!]. It was the execrable doctrine of legitimacy [hear, hear !]-that leve of Fer linand the seventli, that has precluded England frum that matural comection with South America. We have abandoned all those to the political caprice of supporting Old Spain in her endeavors of subjugating the incipient energies of her now, thank God, , ilmost severed colonies [hear, hear!] Instead of having our flug flying in every part of that ex tensive continent, we liave been supplanted by a nearer power (the United States)-a power as ac tive as onrseive, , ind wholly free from the incumbratices of thrse infor ve nient doctrines and attachments which liave so lamentably fettered the enter-
prize of Great Britain [hear!] In 1809 we concluded what was calted the Ipollaca treaty, in whicla we bound ourselves to uploldt the eintegrily of the Spanish empire. It contained, however, annthel article, which has urver since been moticed, vizthat the two countrics would lose no time in conchuding commercial treaties. In 1814, after the conduct of Ferdinand had called forth, not the app. probation most certainly of every enlightencd mind in every country in E.urope, it pleased nur moverninent to conclude a convention with Spain, in which was inserted an article, not what might be called an offensive guarrantee, but by which c-cry thing in the state of prevention would he thrown in the way of all assistance to the patriot exertions of the people of South America. In vain had the rarions provinces of Sonth America, as they hirew of the yoke of Spain, offered to us corrmicrial advantages in exchange for our friendship. In 1814, stating as one reason why we ought to furve: thic canse, the long established character of Eigh and for justice, hunnanity, and love of liberty. they made the unprecedented offer of a momopnlv oftlicir whole tracle for 25 years. In 1816 in oifre of a similar nature was made by general Bunnival, theris on his way to secure that independenen for his country, which he (Mr. Brougham) hope:! he had ere this achieved. All these offers were rejecterl. Sometimes they were treated with conteinnt. Impediments were thrown in the way of the trade be. tweers some of our own colonics and the Spanish main. But even these were capricions in their nature; for while the trade from Jamaica was left free, that from Trinidad was preventel. Let the house recollect, that the same treaty which our soverument understood bound to do all this, bond verdinand to do that which he had not done, and which. it did not seem that he ever intended to do, nainely, to aholish the slave tratce. We did not say that we ought at once to go to war with Ferdinanil because he had neglected in fulfil his part of the engagement between nis; but he thonght we had a right to know from him, when we had performed the canditions imposed upoll us by the traaty in spirit and in letter, why he had wholly omitted to perform his conditions. So bigotted were the government of this country to the c:unse of Ferdinand that he (Mr. B.) had secn a memorial presented to our government hy three respectable merchants, who hawing come over to England from Bienos Ayres on conimercial business, and having completed their arrangements were on the point of returning, when they were stopped by an order. signed by one of the under secretaries of state, refusing them leave to proceed on their voyage until they had also obtained the permission of the Spanish ambassador!-Tais was one of the fruits of that blessed measire, the alien act, and affirded a proof of the soundness of the argument urged by the opponents of tiat meashre, that it mighlit be used as a political engrine, and in particular cases to gratify the wishes of fureign sovereigns [hear, liear!]. Last of all, in order to shew our attachment to the canse even be. yond the letter ,and spiritit of the treaty, which boumd is to it, and our determinination ly every means pousible to eludeav or to extirn Euish the spirit of tiberty and indepenculenee in the Spariuth colo. mies, a reprascentatiox had lately ben mate in the Anmerican congress, that he Britisish minisister at wallinington had interf reed to endeavor to preverin shipment In ing walde to those collunies hy A inerican citizens [li rar, thar!] He wonld ask tw- houne, if th'y were

and the political feclings of the inhahitants towarls us? "Whid. yon have 130.000 men in arms in ourt territory," was the ir wanal deslaration, "we will not trata with yon at all. While you rille If with a rud af irun, yoll shall get uu gold fram us by tade. While you continue to exact frnm us urbute at the. trint of the baynuet, you must give up all hopers of obtaining it through the medioun of commerer." As loug as this fital policy shumblt be persinesl, su lange wrould British cammerce be excluded fromt the continent -exchided more completely than by Monaparte's systum becanse now, for the first time, the ports of the contine-lit were oraled agximst us by the goveruments, with the full and cordial concurrence of the people [hear, hear, shear!]. He lumped that this counry might yet see the day when the steps which it had taken muler the gundance: of the noble lord towards its deyme tion sinumid ie retracell fie hoped that our goverument might y't pursur a more honest, a more liberal, a more manly, a more truly Finglish polies; and that if no superior considerations were permited to direct its proceedings, that at luast it might be in flowned hy the rational expectations of advantage which such: mosle of condace must invariably inspire. The honorable and learned genteman here concluded a speech which took upt three hours in delivering, with inoving the following resolutions
"1. That the trade and manufiretures of the conntry are reduced io a state of sach umex:mpled difficuley, as demands the must serious attention of this house.
" 2 . That thuse difficulties are materially increased by poliry pirsurd with resp et to our furmen commerce, and that a re version of this system onght forthwith to be undertalien by the hocise.
" 3. That the continnance of these difficulties is in a great de gree owing to the severe pressure of taxation mader which the conntry labors, and which onghit, by ever) practical neans to be lighteninl.
-4. That the system of foreign policy pursued by his majesty's ministers has not beeth such as to obtain for the greople of this ecuntry those commercial advalitages which the influence a Gritat Briain in foreign courts tiarly entitled them to expect."

\section*{Suspension of the Habeas Corpus.}
house of lorns.-monbat, feb. 24.
The lubeas-corfous suspensimn bill.-Viscount Sidmonth rose on the order of the day to move the second reading of the bill to enable his majesty's ministers to provide for the protection of the throne and government, by the power of appreliending and securing all persons reasonably suspecterl of atesign to overthrow the constitutional govermment. Ile had particularly to call the attention of the house to three prominent features in the report: first, the conspiracy to overturn the government, and resort to enemal plunder; 2dly, the extension of the conspilicy to various parts of the kinglom; and 3tlly, the declaration of the committee that further provisionts Were necessary for the protection of the public peace. He adverted to clubs for reform, observine, that allhough reform was in their mouths, revolittion was in their hearts. The first disturb:unce of the peace took place at Spafields on the secoid IDecember, when it was necessary to employ the military to assist the civil power. He also called upon their lo:dships to afford protection to the illustrious persnnage who on the day of the meeting of parlia. ment, was not only insulted, but his sacred per. son endangered. Ne cnumerated the laws it would be necessary to enforce, particularly the 30 th of the king, forbidding clubs and unlawful meetings. IIe lamented the necessity for restraining the liberty of the subject, but considered the bill indispensable for the protection of the throne, and that for which the habeas corpus suspension bill was originally framed, namely, the protection of the libertics of the constintion, and to prevent the cormisission of crimes. II concluded by moving the second read. ing of the bill.

The marquis of Wellesley obscrved, the country had heen suffering for some time past, under that distress which, is Iord Bacon had described it, was the true legitimate parent of seditioni and, under these circumstances, vas it extrandinary that nymptoms of disaffection had shewn themselvess airiong it part of the population. Restraint, lowever, was the best protector of liberty, and the law must be made strong enougli to meet and grapple with the
evil. Isut it was not a slight disturbance, on even treasonable practices, if confined within a certai! extent, which would justify a departure from the established constitutiona! law. There must be a strong case of necessity made out oefore such a measiure could or oinght to be adopted.

As far as this measure went with respect in preventing meetings, and adjournments of mectings, it had his support, as well as any measure tending for the preservation and safety of the prince regent, but he could not gos to the lengtl of agrecing to the uspension of the haheas corpus act. He had not at present such evidence as would justity his going that lensth.

The noble secretary of state had said, he should have considered the attack on his royal highness as sufficient grounds tor proposing this measure. If the noble Jords could have made out this attack on his royal highness to have had any connection with the spafields meeting, it was a serious charge against them thut they hatl not stated it to the house. the noble lord might smile, but he had better ansswer with his specches than his insolence.-Order, Oriler!

Lord Liverpool had no intention to offend the noble marquis, but, he would not be bound to manage his smiles according to the dictates of the nable marquis, or of any other man alive.-Hear, hear!

Lord Liverpool agreed with the noble marquis that it was not for every instance of treasonable practices that the habeas corpus should be suspend. ed; but if the house believed the report at all, there was proof that a widely spread conspiracy did at present exist: serious circumstancos had come to light, ven during the time the committee was sitting: and the noble lord observed, he believed the conspiracy was more extensive, and more malignant than it was in 1794; and if ever there was a case which justified the suspension of the liabeas corpus act, he believed the present case did.

Lord Cirey contended that the measure now proposed was an unnecessary attack upon the liberties of the people:- That the disaffection which existed in the country was the oftispring of distress, occasioned by the peace which had been conchaled on the continent; and that the nature of the conspiracy Was kuown, the conspirators in custody, and that the existing laws, to which he trusted they would soun be delivered over, were fully equal to their punishment.

The dinke of Sussex and loid Holland stircingly condemned the measure:-I ard Grenville and the duke of Cilnucester defended it.

The honse then divided-for the second reading, 150-agains: it, 3J-majority in favol of the bill, 115.

The bill was then committed, repurted, read at third time and passed.-Adjummed.

Lord Castlereagh minved the first reating of the bill brought from the lurds for suspending the laabeas curpus act.

Mr. Hennett tonk the earliest opportumity of en. tering lis protest agranst the mischiceouts tendency of the bill; and to eepresy his surprise after what liad passed that nifhe, that the moble lord should uot have deemed it expedient to inform the louns. of the necessity fur the adoption of the mensure. He resretted that his hon, fitiend (Mr. Punsonby) should have allowed himself usit in the same chain. ber with the noble lord; for he was a persni, ufter What had passed, not fic tu be tivsted; and he couid
awume the noble lord, that if he had wanrecl him (Mr. 13.) on the commitee, he would not have sat witi nim. He was ashaned of the :churt, which deserver! to be trampled muder his feet. ['The hon, ember here iterally carrieldinto efict his opinion, by tho wins the printel copy on the Aoor.] Into whose hands was this power to be put hutn those who were alreat? stained with their country's blond.
b.ord Castlereagh rossc to order. If the !on. mem: ber stated that he had insbruch his haids in biood unjustly, it was false.

Mr. Bennett had no hesitation in stating that he meant the expression generally, to apply in everv one of the government who wats it power at the time those dreadful scenes took place in lreland.

Lord Casilereagh said he hailnoright io complain, after tbe explanation given by the loon. member: but in a parliamentary sense, lie must still repeat what he had said before.

Mr. Bennett said, the eruelies which he harl alluded to, and the tortures, were committed un Dublin castle yard, under the eyers of ministers.

Lord Castlereagh trusted the house would not suffer the lion. member to j.ursuc such a course. It would be open to the hon. meniber (1) bring forwaid any charge against ministers, if lic thought proper.

Mi: Bennett haped the horrse world excuse the heat of clebate; and concluded by declaring that he would oppose this bill and that for the suppression of seditious meetings. 'lo the others he woulid give his assent.

Lord Althorp had no objections to the bills fo: the security of the regent's person; for puashinn the seduction of the soldiers and sailors; or a乡ainst seditions meetings for a limited tine, provided the meeting shonld be tolerated-where they dispersed in an liour if required. But lie conld not give his assent to the bill for the suspension of the habeas corpus act, because he did not think any grounils hat been laid for it.

The lord advocate of Scotland, stated, that on the 23:1 Jantary, he was informed that a secret conspiracy was formed, and cemented by an oath, in persevere in obtaining for all the people, ammal parlia. ments and universal suffruge by morad and plissical strength; and that the punishment of doult be in. flicted on any one who informed of any of the mem. bers. 'I'his society was formed in folamow, and the oath wats administered to many hundredes in Cilas gow and its neighborloorl. I inotion was made in expunge the punishment of death fiom the nath. but it was rejected; and toe had the pleasure to state that many lad been takenup; bat there were oll!ers in a difierent sphere of life in commonication will this tmatorons committec: but against wham the evidcnce was not yet strong cmungh on warrant theis apprelicusion. Sir. F. Burdeit consyaliliated the mose \(\ln \cdot d\) f.l Enssel) on the manly mataner in whic'i helawl :u.t, night cune forward in : 'ie support of that lisery for tie estolishment of which, his revered a a sing lost his life. Tin gr unds of the present neadure as be maleastonil from the speech nithe leatmet st). I' itty cene-al, was the fial of the Spenceansyctem. Foov Vr. Spence, who has been deal upwarls of 25 yeurs, never during his life, thought lie should be a perion of so muri importance as he was now made In his onininn, however, it was not from the spence systern that we had in appreliend danger but the Ixpence system-a sysiem which ininisters rletermined never to abandon, since when it was proposed only to give up to the cry of the people a lord of the atmiralty, the notsle lond stepped for ward, erving out that for the safety of the constitition anil the country, they must make a stand and refuse tle bonn which the penple asked. The learned solicitor had also talked of the Freinch re. volution. Wie did not wish to stand on the frenola revolution, but on the English constitution. Ife also ialked of the profineness of those timeis ofrevolution, He (sir. F.) had also heard of that profaneness; but lie could not but think it had been eqralled by the miserable farce played off in otr churches a fow weeks since, where prayers had been offered "p for the safety of the prince regrent, agrainst a pestilence walking abroad. Heknew of no pestileice existing except that which was met at every corner of ile street in the shape of taxation. With respect to the proposed measure, the noble lord might carry it-he might erect a gallows in palace yard, or even in the lobby of the house of commons, but lie could not entirely stop the mouths of the penple, unless he could shut them all up in prison; and to do this he must erect new prisons in every cquarter, for those at present in existence, were already filled by the distresses of the times. With respect to the report, althongh he had a great respect for several of the members who formed the committee, he could not agree with them as to the danger which existed.

Lord Castlereagh maintained, tiat the loon. bart. "as prirsuing at course which better suited with his elertioneering views. (hear hear!) Washe tr be inlit thit the country was not surounded with rlan\(1: \cap r^{2}\) ile disclaimed the bill on the part of the cio:wn, as a measure of punisliment. What he wish. r- io know was, whetlier a conspiracy really existed; and if so, whether this was a proper remedy to correct the evil? If government was not armed with this measure, the house would place the country in the most painful, bloody and disastrous state. (hear Tear! )

Lord Jascelles supported the bill, and lord Stanley and Coclirane opposed it.
The house then divided on the question, for the first reading-ayes, 273-noes, 98-majority 175The bill was then read a first time, and ordered for a second reading on Thursday.

Thutwinar, Feb. 27.-After a few remarks from Mr. Curwen, in opposition to the bill, it was read a

Torond time, and ordered to a third reading on Tri\(\therefore\) y. In the coure of his remarks, Mr. C. said that ie did not helieve there was a man in the conntry who dul not wish parliamentary reform. Could any wit!, looking to the statement of the speaker, who had dechared that the sale of seats was as notorious is the sim at noon, say the people were not justifid in expressing upinions that parliamentary re. \(f\) rin was necessary.
Fimmar. Vels. 28.-After a few ad litional remarks from the friends and opponents of the measure, the hatseas corputs suspension bill was read a third time ant passed-aves 265 -1:tys 103 -majority in faror of the bill, 162.

\section*{Foreign Articles. entifanif, \&cc.}

7'arliament.-Lord Holland has given notice of a montion for the production of papers relative to the treatment of IBonaparte, who has bitterly complained of ill usage. 120,000 men have been voted for the army, for six months. A motion to abolish sinecures was negatived in the house of lords-ayes 5, toes 45. Inrd Cochrane has given notice that he will bring forward a motion to reduce the interest of the national debt.

The act for suspending the haheas carpus received the royal sanction on the 4 th of March. All the "Greyville party" in parliament vated for it. The following is a list of the lords who voted against it: bukes of Sussex, Somerset, Bedford and Argyll: inarquis Wellesley; earls of Derby, Thanet, Eissex, Albermarle, Grosvenor, Rosslyn, Grey, Laroley, Luderdale; viscount Torrington; lords Say and Sele, St. John, Montfort, Iolland, Toley, Auckland, Alvanley and Frskine. And by proxy-the dukes of Devonshire and I, einster; marquis of Downshire; earls of Jersey, Cowper, Waldegrave, Darlington and St. Yincent; viscounts Anson and Clifilen; lords Byron and l'onsonby.

Many arrests had alyeady been made under this act. An information is said to have been lodged against Cobbett.

The nature of this suspending act may be gathered from the following proceedings in the house of commons, on the 28th of February:

The third reading of the bill to suspend the habeas corpus was ordered by a majority of 265 agrainst 103.

Sir Francis Burdett proposed an amendment, that no person sliould be imprisoned in a damp or unhealthy dungeon; that they should have the benefit of air, fire and exercise; that they should not be loaded with irons; that they should have liberty to ad dress pelitions to the king and two lonoses, and to see their wives and children.

Mr. Ponsonby moved that the suspension should only continue to the lst of May, instead of the 1st of July.

Another member moved, the suppresion of the clause which permitted the transfer of a prisoner from nne prison in another. The attorney general opposed, by observing that it might be useful to remove a prisoner fiom those who might loold intelli gence with him. All these amendments were successively rejected and the bill adopted.
- Ibstract of the suspiension bill.- The act for suspending the habeas corpus act, after a preamble in the following words, "Whereas a traitorous conspiracy has been forined for the purpose of overthow. ing, by meaus of a general insurrection, the established goverument, laws and constitution of this kingdom: and whereas designs and practices of 2
treasunable and highly dangerous nature are now carrsiar on in the metropolis, and in many wher parts of trreat Britain," proceeds to enact, ithat for Wh- h-ter !restrution of the persens o! the king and , tmee remt, and flue peuce of the kingdum,
 the act, of after, in thas phat of the king lom catiled Great lisitail, b! warmant of the privy comcit, or or any of the secietaries of state, for hight tre.am, nts-
 shall be det oned in ssfe cus.oty, withott bail or manprize, until the \(1 \mathrm{~s}^{\circ}\) d.ty of July hext, and untal Hat day no julge or justice of the peace slatl hail, ar try such person, witlant order from the privy ontricil. The act t'ren expressly suspends the "aet fir preventing arrougots imp:isoument," sic. made iII 1701, for the period abovementioned, and annong some uther provisons, requires that persons implit to: :ed for the causes mentioned shall be kept sepapate, and prevented from communioating with one anothe".
WSee the proeeedings on this bill in the preced ins pastes.

Ereculion of Cash n:tn.-The London papers give th a voluminous detal of the execution of Cashmant, a sutor, convictal of being concerned in the riot on the zad of Dec. He was hung in Skinner tree:, opposite the linuse of a Mr. Beckwith, which, It is said, he and uthers had entered, and plundered -of arms.

The preparations for this executiun shewed much apprehension of a rescue, which was probably desimmed. Kugiments of constables and regimellts of soldiers surrounded the spot, and the avenues to it were also guarded.
Cishoman met his fate with astonishing firmness, and scemed maly to regret that, after having faced death so oftell in the cause of his country, he should be carried through the streets like a vagrant and huag like a thief. He bid "good bye" to all that he knew with the off-hand carelessness of a sailor, bonth upon an ordinary voyage. He loudly enmpitined of having been defrausled by merchants as wi it as by the goverument of his hard earnings£2.U was due to him from the latter, which he bequeuthet to his brother, \&ec. As he passed through the streits, the mols expressed their feelings by groaft and hisses-which lie joined, often crying out, "enizas my boys; l'll die like a man." Arrived at the sont, he refused the religious exhortations of the prievts, saying, "doint bother me-it's of no sie; I want no inercy but from God." He resisted the trawing of the cap over his face; he wathed to ate the last of il! At this moment he turned to Deckwith's ho'ise, and threatemitg, observed, "I'll be with you tiere," memning he would haunt it af ier death. He cold the crowd tie was a murdered athi-and erical ant "how, give me theee cheers when I trip." "Tien calling in the extcutimes le nail, "corse Jack, you leigo the jit buirn" The drop fall, and be di-d wittout a strustite A tead silence previlical for a mhment, when groms and hiones, marder, miviler, and slame, statil, wers new if fom exery pait. The Rritish have taken possession of the island of Tristran de Cimha, for the purpose of fixing a farrison upon it similar to that at Ascension: probabiy with a view to the better securing of Bonaparte.
The dey of Algiers has issured an order prevent. ing the exporf of all sorts of provisions to the British territories and possessions. The French have supplanted the English in the commerce of this regency, which is grievously complained of.
Tlie grand seignior is about to make the dey \(n\) present of a frigate, two corvettes, and three transports laden with naval and military stores. He will soon have a respectable flect.
\(\omega\) It would seem, from several hints in the British papers that a new experdition may be sent out fol Algiers. The dey is satd to have captured several vessels, in disregsard to his treaty; but the probability rather is that the advantages he has given to French commerce is really the cause of hostility to him. Lord Exinouth had been several days in attendance at the armiralty.
homapahte.
It is saicl that Las Casas has taken with him to the Cape of Cood Hope, the mantscripts of the life of Bonaparte, which it is presumed he will publish in England.
a We have several papers respecting the treatment of the ex-emperor, which we have not room to insert or say much about at present. Me has complained, through count de Montholon, of ill usage; which, however, is denied in the British statements. Our last accounts from him represent him as being very uwlell. His boundaries have been circumscribed, and he is more closely watched than ever-being personally examined three times a day. mexico and southayemica.
The projected expedition against the patriots of Mexico alld South-America, yet remains at ©adiz, without any immediate prospect of embarkation. The treasury of Spain is in a beggarly state.

Direct accounts from liuenos Ayres annotince the.
annihilation of the royal forces in Chili, and tene estabiishment there of a patriolic government. There was much hard fighting, especially at Claacabuen, on the 12 th of February, where the Buenos -1 yrean general, Sian . Martin, gained a comelete victory, killing 4.5 U of the enemy, making 600 prisoners and dispersing the rest, who, with the royal general - Marca, have been since picked up. Ferdinand's buniness is completely done here, and the patriots will now have leisure and power to pay their respects to ihe intruding Portuguese at Monte Video, if the events in Brazil shall not have coused them precipitately to depart.

The province of Pcrambuco, in Brazil, has revolied and declared itself independent. The soldiers joined the people, and ttre revolution was completel without mach bloodshed. A previsional governnent, on a very liberal plan, has been established, and there is every reason to believe that the patriots will not only be able to hold their ground in this province, bitt to extead their praciples through the whole country. The next atcounts we have will probably relate to the return of the king \(t\) ) Portugal.
W. An intelligent South I Imerican informed the eclitor of the lesorsten long ago, that Brazil was ripe for revolution and only wanted a little encouragement fiom Buemos Ayres-adding that if the Pontugucse interfered, as in the provinces of La Piatit, that they would repent it.
"Restorration." - The Jesuits were re-established in Mexien the 19 th of May last.

\section*{Planting Potatocs.}

Mr. Kifibrli-Is it is an ofthrim with anany, that pathows will yiclel belt of cholge the seal, and plant the largest, thercfore 1 mave the following experinent.

In t foll 1 sent in . Ihbany for thane of the bet rell pathitme, which were ver! gomal all harges tath on
 in which I pilt one protatoe ni a hif hareer than :

The next row I planted with cut potatoes, of the same kind, putting five pieces in a hill, the whole of 4 lbs . weight and manured in the same manner as ahore. They produced 50 lbs as clid several other fows in the same patch

And on the 15 th May I pealed five of the larges: of the above putatoes, carefilly digreing oat the eyes ahout the size of a cent, which I planted in 3 rows of 16 feet long. puting the cyes 8 or 9 inches apart and the rows 3 feet, which contained about half a rod of groume. It produced 1 bushel and 9 quarts (weiching 78 lhs) of good sized potatoes; many of which weighed fonen \& to 10 nunces, a ad hut a very few small mus. This ground received no manure.

Youls, \&ec.

\section*{RICUARDSON GRAY.}
P. S. The whole and cut potatnes were planted in a light sandy soil, and the eros in a damp soil: and as the olds is an great, it think no one will he. sitate to follow the plan, as it is a saving of all their seed.

Elizabechtorvn, Oct. 21. 181G.

\section*{CIIRONICIE.}

Specic.-Our reators will all recollent that Mr. Sergeane went to Fijrland, as an arselt of the Unite ? States' Bank, tor megocinte an exclange of United States' stocks for specie-and they will learn, with pleasure, that he has entirely succeeded, and on the inost advantageous terms.

The precious metals, on private account, are also flowing in from all quarters, especially from Ensland. It may be tairly presumed, from \(\because\) hat we see in the papers, that from 800,000 to \(1,000,0010\) of riollars ancived in the United States, from that country, within the period of the last week.

Fire. - Two valuable manufactories, one for cotton and wool, the other for cotton bagging, both of thern extensive establishments, were lately destroyed by fire, near Lexington, Ky. Supposed by design.
The Susquehannch.-In the first 12 days of April, \(100,000 \mathrm{~S}\) worth of property was st ot to market oll the Susquchannah, from the village of ()wego, in the state of New- York. It consisted of arks laden with plaster of ['aris, rafts of timber and boards, \&c.500 persons were employed in conducting these to imarket.

The flas of tho tinited Stutes is not altered, as has been published in several papers. The proposiion offered fur it was nat adopted by eongress.

The Dectiterranean squadron. - We have late accounts from our squadron in the Mediterrancanall well: nothing new.
The United States ship Ontario, capt. Downe, has received orders to prepare for sea with all possible lespatch. It is uaderatood she is to carry out despatclies.

The Uried States bris Jnacer, captain Porter, titely sailal from New lork for the Gitf of Mexico. S plimus TVer, esq, weut out in her as agont to the president of \(11 a y^{\prime} i\), (o) demand satistaction for a cap. ured veacl, and the execution of an American.
Shup Ietters.-During the week, which ended o:1 Siturday last, thrity-three thoicsamel three huand cid amai lirty one furcign iftsers, were received at the post. ufice in this city ( \(\mathcal{N}\) vork,) from liverpoul, L.ont!on. NILES WEEKLY REGIS'TER.
}

So. 11 of NoL. XII.]
BALTIMORE, SATURDAY, MAY \(10,1817\). [wuoler no. 2?

\section*{Hac olim meminisse juvabit.-Virgil.}

The present number, from the variety of its con-f would advise a colony to pursue, in order to get out
tents, is calculated to please unost descriptions of readers. There is also enclosed in it a small extra sheet that the editor respecifully recommends to the attention of every subscriber.

\section*{Political Curiosity.}

The following more properly belongs to the proposed collsction of revolutionary papers than to the bodly of the liearster itself-but we prefer to publish it now to invigurate the hopes and sirengthen the exertions, of all interested in that undertaking.
The people of the United States will be pleased to see "othe first printed ess.yy towards a form of gonemment in this comstry," written "six months t, fore the declaration of independence," by president Amass: and they will remark, with siugu lar pleasure, how nearly, in spirit and form, our republican governments which succeeded that declaration, have approached the lines sketched in this "marbled colored bagratelle" as Mr. A. sportively calls it, from its being done up in marbled paper.

Quincy, . April 28th, 1817.
Sir-I lave received eleven volumes of your Register, well bound and ingood order, for which I have paid Mr. Ballard; and I thank you for the promptitule with which you have obliged me.
\[
\text { "VIVE L. } 1 \text { BAGATELLF." }
\]

The light skeich enclosed, is at this day of no ralue: not even an object of curiosity, except on account of the critical moment in which it was crayoned, six months before the declaration of independence, and as it was the first printed essay cowards a form of government in this country.

As Mr. Taylor of llazelgrove, Portroyal, Virginia, has in his late work honored with several pages of remarks, an imperfect copy of it, it seems right that the public should possess an authentic one.
If you think it worth a place in your Register vou may give it one. If not, I pray you to return it to me by the prost. Indeed in any case I wish to have it restored to me, as I know of no other copy of Jinlap's edition.

Yiu may make what ue you please of this letter anil all its onntemts, upon condition you return me my marble coloured Bagatelle.

1 am, respectfully, your servant,
JOUN ADAMS.
Mr. . lifes.

\section*{Mcmorandum by .Mr. ATams.}

In the winter of 1776 there wos mueh discussinn in congress concerning the necessity of inclepen denor, and advising the several states on institute governments for themselves under the inmediate authority and original power of the people. Gireat difficulies occurred io many gentlemen, in making a transition from the old governments to the new, i. e. from the royal to republican governments. In January 1776, Mr. Genrge Wythe, of Virginin passing an evening with me, akked what plan 1

\footnotetext{
Vot. XII.
}
of the old government and into a new one. I akelched in words a scheme, which he requested ne to give him in writing. Accordingly, the next day I delivered him the following letter. He lent it to his colleagtie Richard Henry Lee, who asked me to let him print it: to which I consented provided lie would suppress my name: for if that should appear, it would excite a continental clamons among the tories that I was erecting a battering rain to demolish the royal government and render independence indispensable.

Qirincy, July 21, 1811.
THUCGHTS ON GOVERNMENT: APPLICARLE TO THE PR SEVT STATE OF THE AMEAICAN COLONIES; IN A MEX TKRFRON A GETTLYMAN TO HIS FBIEND, [i. C. FROM JUHS ADANS TU GHOHGE WYTIE] PHILADELPHIA: PKINTEH HT JOHX, DUNLAP. M,DCC,LXXVI.

Thasghts on government, ECc.
my dear sir-If I was equal to the task of forming a plan for the government of a colony, I should be flattered with your request, and very happy to comply with it; because as the divine science of politics is the science of social happiness, and the blessings of society depend entirely on the constitutions of government, which are generally institutions that last for many generations, there can be no employment more agreeable to a benevolent mind, than a research after the best.

Pope flattered tyrants too much when he said
"For furins of government let fools contest,
"That which is best ndministered is best."
Nothing can be more fallacious than this: But poets read history to collect flowers not fruis-they attend to fanciful images, not the effects of social institutions. Nothing is more certain from the history of nations, and the nature of man, than lioat sone forms of government are better fitted for bcing well adininistered than others.
We ought to consider, what is the end of government, before we determine which is the best form. - Upon this point all speculative politicans wilt agree, that the happiness of society is the end of government, as all divines and moral phil, ac ohers will agree that the happiness of the individual is the end of man. From this principle it will fullow, that the form of government, which commusisates case, comfort, security, or in one word haypinest to the greatest number of persons, and 4 ath greatest degree, is the best.
All sober enquirers afier truth, ancient and modern, pagan and Christian, have declared that the happiness of man, us well as his dignity consists in virtue. Confucius, Zaroanter, Gocrates, Mahomet, nut to mention authorities really sacred, have agrcenl in this.

If there is a form of government then, whose priucuple and foundation is virtue, will not every solier man acknowledge it better calculated to proinute the general happiness than any other form?

Fear is the foundation of most governments; but is so sordid and brutal a passion, and renders men, in whose breasts it predomina*es, so stupid, and inserable, that Americans will not be likely to ap. prove of any political instittrion which is foundell on it.

Honour is truly sacred, but holds a lower rank in the scale of moral excellence than virtue. - Indee.! the tormer is but a part of the latter, and corisequently has not equal pretensions to support :: fisame of govemment productive of human happiness.

The foundation of every government is scme princible or pacsion in the minds of the people.- The nublest principles and most generous affections in mir nature then, have the fairest chance to support the noblest and most generous models of government.
A man must be indifferent to the sneers of modern Englishmen, to mention in their company, the names of Sidney, Harrington, locke, Milton, Ned. ham, Nevil!e, Burnet, and Hoadley.-No small forti pule is necessary to confess that one has read them. The wretched condition of this country, however, ©ir ten or fifteen years past, has frequently reminded me of their principles and reasonings.They will convince any candid mind, that there is no gond govermment but what is republican. That the only valuable part of the IB itish constitution is so; because the very definition of a republic, is "an empire of laws, and not of men." That, as a repullic is the best of governments, so that particu\(1 .\), arrangement of the powers of socicty, or in ouler words that form of government, which is best contrived to secure an impartial and exact exccution of the laws, is the best of republics.
O) republics, there is an inexhustible variety, becsuse the posisible combinations of the powers of suciety, are capable of innumerable rarialions.

A - good government, is an empire of laws, how shall your laws be made? In a large society, inhabiting an extensive country, it is impossible that the whole should assemble, to make laws: The fivst necessary step then, is, to depute power from the many, to a few of the most wise and good.I:ut by what rules shall you chonse your representatives? Agree upon the number and qualifications of persons, who shall have the benefit of choosing, or ammex this privilege to the inhabitants of a certain extent of ground.

The principal difliculty lies, and the greatest care should be employed in constituting this repre. sentative assembly. It should be in miniature, an exact portrait of the people at large. It should think, feel, reason, and act like them. That it may be the interest of this assembly to do strict jorstice at all times, it should be an equal representation, or in other words equal interest among the perple should have equal interest in it.-Great care s!ould be takento effect this, and to prevent unfair, partial, and corrupt elections. Such regulations, however, may be better made in times of greater tranquility than the present, and they will spring up of themselves naturally, when all the powers of government come to be in the hands of the people's friends. At present it will be safest to proceed in all establisheal morles to which the people have been familiarised by habit.

A representation of the people in one assembly being obtained, a question arises whether all the powers of government, legislative, executive, and judicial, shall be left in this body? I think a people camot be long free, nor ever liappy, whose go. vernment is in one assembly. My reasons for this opinion are as follow:
1. A single assembly is liable to all the vices, follies and frailties of an individual.-Subject to fits of humor starts of passion, flights of enthusiasm, pariialities of prejudice, and consequently irroductive of basty resuliss ard absurd judgments:

And all these errors ought to be corrected and dc. fects supplied by some controling power.
2. A single assembly is apt to be avaricious, and in time will not scruple to exempt itself finm burthens which it will lay, without compunction, on its constituents.
3. A single assembly is apt to grow ambitious, and after a time will not hesitate to vote itself perpetual. This was one fault of the long parliament, but more remarkably of Holland, whose assembly first voted themselves from annual to septemmal, then for life, and after a course of years, that all vacancies happening by death or otherwise, should be filled by themselves, without any application to constituents at all.
4. A representative assembly, although extremely well qualified, and absolutely necessary as a branch of the legislature, is unfit to exercise the executive power, for want of two essential properties, secrecy and despatch.
5. A representative assembly is still less qualified for the judicial power; because it is ton numerous, too slow, and too little skilled in the laws.
6. Because a single assembly, possessed of all the powers of government, would make arbitrary laws for their own interest, execute all laws arbitrarily for their own interest, and adjudge all controversi s in their own favor.

But shall the whole power of legislation rest in one assembly? Most of the foregoing reasons apply ectually to prove that the legislative power ought to be more complex-to which we may add, that if the legislative power is wholly in one assembly, and the executive in another, or in a single person, these two powers will oppose and encroach upon each other, until the contest shall end in war, and the whole power, legislative and executive, be usurped by the strongest.

The judicial power, in such case, could not mediate, or hold the balance between the two contending powers, because the legislative would undermine it.-And this shews the necessity too, of giving the executive power a negative upon the legislative, otherwise this will be continually encroaching upon that.

To avoid these dangers let a distinct assembly be constituted, as a mediator between the two extreme branches of the legislature, that which represents the people and that which is vested with the executive power.

Let the representative assembly then clect by ballot, from among themselves or their constituents, or both, a distinct assembly, which for the sake of perspicuity we will call a comcil. It may consist of any number you please, say twenty or thinty, and should have a free and independent exercise of its judgment, and consequently a negative voice in the legislature.

These two bodies thus constituted, and made integral parts of the legislature, let them unite, and by joint ballot choose a governor, who, after being stript of most of those badges of domination called prerogatives, should have a free and independent exercise of his judgment, and be made also an integral part of the legislature. This I know is liable to objections, and if you please you may make him only president of the council, as in Connecticut: But as the governor is to be invested with the executive power, with consent of council, I think lie ought to have a negrative upon the legislative. If he is annually elective, as he ought to be, he will always have so much reverence and affection for the people, their representatives and comncillors, that although you give him an independent
exercise of his judgment, he will seldom use it in opposition to the two houses, except in cases the public utility of which would be conspicuous, and some such cases would happen.

In the present exigency of American affairs, when, by an act of parlianent we are put out of the royal protection, and consequently discharged from our allegiance; and it has become necessary to assume government for our immediate security, the governor, lieutenant governor, secretary, treasurer, commissary, attorncy-general, should be chosen be joint ballot, of both houses. And these and all otlier elections, especially of representatives and councillors, should be annual, there not being in the whole circle of the sciences, a maxim more infallible than this, "where anuual elections end, there slavery begins."

These great men, in this respect should be, once a year
"Like bubbles on the sea of matter borne,
"They rise, thes break, and to that sea retorno."
This wift teach them the great political virtnes of humility, patience, and morderation, without which every man in power becomes a ravenous beast of prey.

This mode of constituting the great offices of state will answer very well for the present, but if, by experiment, it should be found inconvenient, the legislature may at its leisure devise other meshods of creating them, by elections of the people at large, as in Connecticut, or it may enlarge the term for which they shall be chosen to seven years, or three years, or for life, or make any other alterations which the society shall find productive of its ease, its safety, its freedom, or in one word its bappiness.

A rotation of all offices, as well as of representatives and councillors, has inany advocates, and is contended for with many plausible arguments. It would be attended no doubt with many advantages, and if the society has a sufficient number of suitable characters to supply the great number of \(v a\) cancies which would be made by such a rotation, I can see no objection to it. These persons may be allowed to serve for three years, and then be excluded three years, or for any longer or shortor term.

Any seven or nine of the legislative council may be made a quurum, for cloing business as a privy onuncil, to advise the governor in the exercise of the executive branch of power, and in sll acts of state.
The governor should have the command of the railitia, und of all your arinies. The power of par. dons should be with the governor and conncil.
Judges, justices and all other officers, civil and military, should be nominated and appoinced by the ghverno:, with the advice and consent of council, cinless you chouse to have a government more popular; if you do, all officers, civil and imilitary, may be chowen by joint ballet of bolli houses, or in order to preserve the independennc and importance of each lowise, by ballot of one house, concured by the oilier. Sheriff's should be chosen by the freeholders of counties-so should registers of ceeds and clerks of countics.

All officers should have commissions, under the hand of the goverior and seal of the colony.

The dignity and stability of government in all its branches, the morals of the people and every blessing of society, depends so much upon an up right and skilliul admimstration of justice, that the judicial power unght to be distinct from both The iegislative and executive, and independent up. nal both, that so it myy be a check upon boylh, as
bot shouit be cliecks upon that. The judges therefore should always be men of learni"g ind experience in the laws, of exemplary morals, yreat patience, calmness, coolness and atiention. Their minds should not be distracted with jarring interests; they should not be dependent upon atis man. or body of men. To these ends they shouid hold estates for life in their uffices, or in olher words their commissions should be during gimed be'iavinur, and their salaries ascertained and extablished by law. For misbehaviour the grand inquest of the colony, the house of representatives, should impeach them before the governor and council, where they should have time and opportumity to make their defence, but if convicted should be removed from their offices, and subjected to such other pin nishment as shall be thought proper.

A militia law requiring all men, or with remy few exceptions, besides cases of conscience, to be provided with arms and ammuniti \(n\), to lse trained at certain seasons, and requiring countics, towfis, or other small districts to be provided with poblic stocks of ammunition and entrenching utensils, and with some settled plans for transporting provisions after the militia, when marclied to defend their country against sudden invasions, and re. quiring certain discricts to be provided with fisk. pieces, companies of matrosses, and perhaps smo regiments of light horse is always a wise institution, and in the present circuinstances of our country indispensable.
Laws for the liberal education of youth, especially of the lower class of people, are so extremely wise and useful, that to a lumane and generolls mind, no expence for this purpose would be thought extravagant.

The very mention of sumptuary laws will excito a smile. Whether our countrymen have wisclom and virtue enough to submit to them I know not. But the happiness of the people might be greatly promoted by then, and a revente saved sulficient to carry on this war forever. Frugality is a great. reverue, besides curing us of vanities, levities and fopperies which are real antidotes to all great, manly and warlike virtues.

But must not all commissions run in the name of a king? No. Why may they trot as well rint thus, "The colony of to A. B. grecting," and be tested by the governor?

Why may not writs, instead of running in the name of the king, run thus, "the colony of to the sheriff," \&ic. and be tested by the chicf jus. tice.

Why may not indictments conclude "against the peace of the culony of and the dignity of the same?"

A constitution, founded on these principles, in troduces knowledge among the people, and inspires them with a conscious dignity, beeoming freemen. A general emulation takes placa, which causes good humor, sociability, good manners, and good morals to be ferteral. That elevation of sentiment, inspired by such a fovernment, makes the common people btave and enterprising. That ambitions which is inspired by it makes them sober, indinstrious and frugal. You will find amning thrin some elegance, perlaps, bla more solichity; a little pleasure, but a great deal of busmess - some politeness. bert more civility. If yon conpare such a country with the regions of donination, whelher monareh\}. cal or arianocratical, you will fancy yourself in A. catlia or Elisiva.

If the colonies should assume govemments setiz rately, they should be left enfirely to t!isir on* ehoiee of ure forins, and if a conntinemial \(\mathrm{emal}^{-1}\)
tion shueld lie formed, it should be a cuingress, containing a finir and adequate representation of the culonies, and its anthority should sacreally be confinel to these cases, viz war, trade, disputes betue in colony and colony, the prost-oflice and the * 1 propriated lands of the crown, as they used to be cillad.

Til.se colonics, under such forms of govermment, and is suchot urivin, would be unconquerable by all tir Homarclues of Einope.

You and 1, my dear friend, have bien sent mus) life, it a time when the greatest lawgivers of ant.qui: would have wished to have lived. - How few of the human 2:ion have ever elijuyed an opportum ity of making an election of government more than of air, soil or climate, for themselves or their chil-dren.-When! before the present epocha, had three billious of people full power and a fair opportunity to form ard establish the wisest and happiest fovernment that luman wistom call contrive? I Bope you will avail yourself and your country of that extensive learning and indefatigable industry which you possess, to assist her in the formations of the happiest goveruments, and the best charactrr of a gieat peuple.-For myself, I must beg you to keep my naine out of sight, for this fecble attempt, if it should be known to be mine, would oblige ioe to apply to myself those lines of the immortal Join willon, in one of his somets,
"I did but teach the agt to qnit their clog's
"By be plain rules of ancient libery,
"When lo! a barbarous noise surrounded me,
"Of ow is and cuckoos, asses, apes and durse.
"Ot owis and cuckoos, asses, apes and dựs."

\section*{Public stocks.}
from tue boston centinel.
"She public slocks of modern nations have been considered the best criteria of the stability of their goveruments. - By this rule, then, that of Great Britain is considered as firm as the Peruvian Andes. Take an exampte.-American stocks are considered to be next in stability;-but American securities, bearing six per cent. interest, will only command in specic one or iwo per ceilt. above par-whereas Britis! stuciks, bearing only three per cent. interest, will chnorand in specie 70 per cent:-which at the rate of six per cent. would be 40 per cent. above par! What will the c:oakers and boasters say to this?"

\section*{memarks.}

There is spparently a singular disposition in some Ancricall chlizens to exalt the character of Great britain even at the cost of their own country's reputat ion The writer of the preceding paragraph seems to have that disposition-for, not cout ent with the ficts siated, which lie assumes as "the truth, the whole winh and nothing but the truth" of the mat'er, 'e evidentiv exults at the supposed superiur stablity of the Britisti government over that of the Uinitud States. Gne might have hought that this would rather be a subject for regret than of plensure.
11.s true, when British three per conts. were at 70, in Aundori, American six per cents. Were no more thall 102: but this is not "criteria of the stabilit! of the guvernments." There is no man who believes that the present American debt will be perpetual; it is known to be in a rapid state of reduc jo:2, and its period is reasonably calculatedu tereas, there is no man who dreams or supposes tl it the Bri ish debt will ever be paid; it is by all arcotr.ted ar impossibility to do it. There is, then, sumething else, besides the presumed "st..bility" of the respective goveriments, that inakes the British (1apapialist willing to give a higher comparative
price for the stocks of his own country than tei those of a foreign one-this something may be the greater facility with which he can collect the interest, but chiefly in the greater convenience w th which he may convert bis stock into other kinds of property, at pleasure. The British stocks, from the inmense trade carried on in them, answer nearly all the purposes of inoney, at their current value; and millions on millions of them are bought and sold in the course of a week, without the use uf money at all-one kind, or lot, being disposed of and another bouglit, by certain sets of persons, in continual succession. But real purchasers-that is, such as purchase stocks to invest finds for the receipt of interest, are of little account in the stock market; Where the trade goes on, buying and selling, without delivery, in numerous cases, like the famous Tulift trade which had its day in IIolland, many years ago. The case is different with the American stocks; these are only to a certain extent in the market-the trade in them is limited, and they do not serve the stuck-jobbers and others the purposes of money, so easily as the British stocks do. A sale of them cannot always be effected, at half an hour's notice-and hence they are, comparatively, of less ralue, proportioned to the interest payable on them, in the Briaish money market. And besides, their amount is ton small to engage inuch of the attention of the great dealers in slocks-who turn in one week as great a value of British stocks as the whole debt of the United States amounts to.

But there is another point of view in whioh the editor of the Boston Centinel might have represented the matter more fairly, if he had pleased. He could have compared three per cents. with three percents. We have not seen any quotation of the American 3 per cents. in the British market, but it may be presumed they bear the same relation to the 6 per cents. there that they do here. The prices current at Baltimore, last week, gave 6 per cents. \(100 \frac{1}{2}\); and 3 per cents. at 65 . The first being 102 in London, would give the latter there, at the same rate, a little more than 68 pr . ct.-only 2 pr . ct. less than the British 3 per cents. in the 13 ititish market.

Further, and to shew that the price of the British 3 per cenis. were not raised to 70 for the sake of the interest to be received, we may observe that when the 3 per cents. were at 70 , the five per cents. were only 99-As 3 is to 5 so is 70 to \(1162-3\)-which ought to have been the price of the 5 per cexts. instead of 99 .

\section*{Observations on Flour and Bread.}

The following series of experiments and remarks are deeply interesting to a large portion of out realers; and the facts, so carefilly ascertained, will instruct and amuse those who have no need to profit by them. The gentlenan who communicated them stands second to no man as a nice observer of trt:th, and what he alleges on this, as on other occasions, may be entirely relied upon. In his letter, enclosing the article, he says "it was " my intention to have carried these experiments "still further, and to have reduced them to a "certain degree of order, which, owing to a va"riety of circumstances, I was compelled to relin-"quish"-adding, "I now send them to thee, in "their rough state, to be made use of as may be " most agreeable. These experiments were made "with snficient accuracy, and my nules entered " immediaiely on weighing the bread," \&c. We have thought that in ti:eir "rough sta"e" they are the most explicit, and have not ventured any alteration of their matter or manner.
"The peck loaf of England must weigh 17lb, 6os. tai red of the accuracy of these experinents; but I for which aho:it \(142 b\). of flour is usually employed; have none, as the wheat was in inufictured in my the half-peck weighs \(816.110 z\); the quartern loaf pwn mill, and the bread made \(u_{i}\), an 1 haked in my \(4 / 6\). \(50=\). 8 llrs . -hence, in the usual way of sale, 56 own family. nunces of flour makes \(69 \frac{1}{2} 0\). of hread; or 101 lh . of A third experiment was made ( 27.1 h 9.1 mm ) with
 baked, produced \(672 l b\). of household bread, or at the \(7 \rho z\). of yeast, and the requisite 7 Invtit, of \(x: t e r\). rate of 30 per cent. beyond the weight of the flour", The result was 19 \}/bs of bread when cint-which -"this is at the rate of 13 lb . of bread to 10 lb . of is an advance of 41 ll . 20 . per cent. Hi experiments flour. I presume this bread was weighed warm." No. 1 and 2, the veast was not weighel, sinnosing "According to lord Sheffield, the general calcula. tion is, that a Winchester bushel of wheat, weighing 6016 . will produce 541 lb of meal, 5 llb . of bran, and \({ }_{3}^{3} l b\). of water; that this \(54 / \mathrm{l}\). of meal will make \(63 / b\). of bread. This is at the rate of \(13 \frac{1}{\mathrm{~T}} / \mathrm{b}\), of bread to 10:3. of flour." "It appeared from the examination of the bakers, about the period of the scarcity in Ingland, that American flour, weight for weigh, produced rather more bread than the best English! flour"-"Hence, I conclude, that 10 ll . of Ameri can flour ought to make \(13 / 6\). of bread, if well ma naged."-Enpoorium, vol. 5, page 277."
In order to ascertain whether the above trials and opinions would correspond with experiments made under my own direction, I weighed \(12 / \mathrm{l}\) of flour, which, being inade up with \(11 b\). of yeast and 5 pints of milk, and baked in mv own housé, produced \(17 \frac{1}{2}\) pounds of bread, carefully weighed when nearly cool Two weeks after the above trial, I weighod 14lb. nf tour, which was, in like unanner, made up with 1 lb . of yeast and \(5 \frac{1}{2}\) pints of milk-the bread was weighed in a similar state with the first experiment, and produced \(20 \frac{3}{2}\) lhs. of bread.

The above trials were made in the 8th and 9:h mantlis (August and September) of the present year (1814.)

The wheat from which the bread first mentioned was made was from the peninsula between the Delaware and Chesapeake bays, and of what would be called middiing quality - the second parcel of bread was made from flour of New.Jersey wheat, of a superior quality, well cleaned. Both parcels of wheat were of the harvest of 1813.
The product of the first quantity of flour (12lb.) is at the rate of 145 lb . 130 z . to 100 lb . of flour.

The second parcel ( \(14 / \mathrm{b}\). of flour) produced at the rate of 146 ib .80 z .4 drs . to the 100 lbs . of hour.
The average of these two trials is an increase of 4616. \(002.13 \frac{1}{2}\) dre. per cent. which exceeds the Brisish average by 50 per cent. Doubts may be enter-

\footnotetext{
- Note-The above observations of lord Sheffield, with respect to the product of wheat, do not accord with the experience of millers in this neighborhood: For, though our wheat probably contains less water than the Fuglish wheat, in consequence of our cli. mate being less humid, yet the quantity of filth that is brought to market in the American wheat, owing io the common method of treading it out, and to other circumstances, causes a loss of from 2 to 5 l . per bushel, instead of \(\frac{1}{5}\) of pound, including water. The quantity of bran also (owing to like causes) is, on an average of the different qualities of wheat, nearer 9 pounds than 5. By the word meul it is presumed that lord Sheffield intended in include every quality of the Hour; but in the United States various qualities of stuff, superior to bran, are made from every parcel of wheat-viz. supertine, middlings and ship stuff, for ship bread-and ship stuff for horse-feed. The writer apprehends that the British wheat is generally kiln-dried before it is manufactured; if that is the case it is probably much drier than the American wheat when it comes into the hand of the miller to beground
}
the measure used would contain (heine a milk nint) no more than \(1 / 6\) but on weigising a like quintity. in expertrient No. 3, the result was as above stated [11b. 70z** being that kiad of risinm called here "sotts," a Dutch term, I presume This diffrencin the weight of the yeast will make a correspnn lent difference in the results of No 1 and 2, and will be accoun'ed fir toreafter.
\(10 t h\) mo. \(6 t h\) - A fourth experiment was made with 1416 of llon : made from wheat of the preseat year (1814.) This flour was laid to rise with the llsial quantity of "sotts" (1 pint) and mised with two quarts of milk and half a pint of water: the product was \(21 \frac{1}{2} / b s\). of hreal, weiphed wiren wazm:this is equal to \(1531 / \mathrm{h} .80=\). of bread to \(100 / 3 \mathrm{~s}\). of flour, or an ardvance of \(5316.80=\) per cent. an unexpecied result-in allition to which it is proper to mention that, supposing this flour would pro"e similar to a previous baking of new Rour (which was runny) a small portion of flour, supposed to be equal in quantity to that employed in making the "sotts," was reserved to mix up in the innening with the dough, but as it was found unnecessary, it may, therefore, be safely calculated that \(15 \frac{1}{2} \mathrm{lb}\). of flour produced the \(21 \frac{1}{2} / \mathrm{b}\). of bread-which is an advance equivalent to \(5916,70=\) per cent. The wheat of which the above flour was made came from the peninsula between the Delanare and Chesapeake.

11 th mo. 19th.-31bs. of Indian meal were marle into hasty pudding and laid to rise with 1416 . superfine flour, 1 pint of yesst and 5 pints of roater-the product was \(21 / 6\). \(40 z\). of bread; increase, 25 per cent. The wheat of which the above four was made was a mixture of the crops of 1813 and 1814, from the peninsula; the floir not of good quality-the bread proved hard and mpleasant; whether owing to that cause or a want of inilk in making it up, the product was much less than I expected.

1 st mo. 25:h, 1815 - 3lds. of Indian meal was made into hasty pudding, with 8 pints of water, and mixed up with \(14 / 3 \mathrm{se}\) of superfine flour, 2 pints of water and 1 pint of yeast-the product was \(231 b s\). of bread: in increase of \(355-17\) per cent. This whest was of the crop of 1814, quality inlerable-the grain from the western shore of the I)"laware.

9th no. 13 th, 1816-Having a parcel of gond wheat in the mill from Virginia, of the crop of the present vear, 14 lhs . of the flour of that wheat was laid to rise with 1 pint of "sotts," and malle inte dough with six pints of water The breal, when mearly conl, weighed 193lbs. giving an increase of 41 pei cent.

11 th mo. 9th-14lbs. of the fiour of a good pareel of Virginis wheat was laid in rive (last evenillg)
- On measuring a pint of milk and weighing it, (9th mo. 26th) it gave 11 h .30 s -the measure", such as is commonly made use of in this neighton". hood. But, with respect to weights and measures. the community are pretty much in the state tha: Israel was when "every man did that which was right in his own cyes," thanke to our compres, when have it in their power to do a great gool, Iy a ju:di cious regulation of weights and measures.
with 1 pint of "sntts" and made up this morning, will 6 pints of water; the bread was weighed when quite coul and proved to be 21 tlls. The weight of the bread in this instance exceeds that of the last experiment; owing, perhaps, to the wheat having prirted with a portion of its water, by two months dreing, and from the bread having been weighed when quite cool.
\(11 t h \mathrm{mo} .16 \mathrm{th}_{\mathrm{h}}-14 \mathrm{lbs}\). of flour was made up last evening with the usual quantity of yeast, and 7 pints of wa:er-the product in hread, weighed when cool, was 2libs. The flour of Virginia wheat.
\(11: / \mathrm{mo}\). \(3 \mathrm{e}: \mathrm{h}-41 \mathrm{ss}\) of flour was kneaded with \(4 \frac{1}{2} l b s\) of boiled potatoes, and \(2-3\) of a pint of yeast The product was 713.1302 . bread.
Sion.e time -4 ibs. of flour, of same quality, was made up with 11.3 pint of water, 2.3 of a pint of yeast-product 6 lb . Soz of bread.

\section*{American Manufactures.}

HTe intelligent and indefatigable Mr. Isnac Briggs, who, perhaps, at least as well as any man in the \(U\). States, understands the tmue opercation of domestic manufactures on the welfare of a country; whose truth-directed pen is alwass followed by conviction, though conversion may not succeerl to the desireal extent, through the trammels of prejudice and the bustle and connections of business -we are pleased to observe is still directing his efforts to the great concern of these establish. ments. If success does nat crown his exe tions to be useful, he certainly deserves it; and the friends of manufactures have teason to be proud of such a champion to advocate their cause.

\footnotetext{
1 suspect some evor in this experiment.
}

Speaking of the lately established societies "for "promoting American manufactures," he has the following remarks in a private letter to the editor of the leegister. We think he will pardon the liberty taken in giving them to the public, if he can believe, with us, that they are calculated to subserve the public good:
"The greatest enemy we have to fear at the present juncture is that drowsy indolence and stupid lethargy into which we are apt to fall after conamencing an enterprize apparently with some degree of spirit. We commence, with a boastful and noisv zeal, and continue a little while an enterprize of high and lofty promise, just far enough to shew that we are more than a match for our enemy to alarm him completely and to awaken all his strata-gems-we then fall asleep on the very threshold of victory, and quietly suffer the unsleeping enemy to gain possession of our arms and to tie our hands. Afterwards when we feel the triumphant and insulting scourge, with anger and impotence, we kick, threaten and scold. If we can produce and keep up excitement enough to operate as a preventive of this disgusting lethargy, we shall deserve well of our country."
At a regular meeting of "the society of the state of Delazuare for the pramation of American manufuctures," held in Wilmington on the 5th April, Mr. Isaac Briggs offered the following resolutions, which, being considered, were unanimously adopted.
Resolved, as the opinion of this society, that the surplus produce of the industry of any nation, beyond the necessary wants of its own population, is the only sure foundation of its independence and wealth; and its only means of supporting the expences of its own government: That no nation can sell more of its surplus produce than other nations liave an interest in buying-this interest will always be the measure of value-a greater or less quuntity may be exported, but the value received in return will be regulated by the interest of the buying nation.

Resoived, That although the maxim be old and farniliar, it is true, that a nation which imports a greater value than it can export, must soon become poor, distressed, in debt, and finally despicable. The debtor is generally, in a certain measure a slave to his creditor-and this is true of nations as well as of individuals. Labor is the foundation of wealth-and the nation which is wise enough to extend and multiply the objects of labor and to appply it properly, so that every condition in society may find the most suitable employment, will have the smallest portion of idle population, and of course will, in its trade with other nations, ensure a balance in its favor, and plenty of specie, which is the coraventional measure of value between nations, the basis of confidence in every other circulating medium, and the oil which enables the grand political machine to perform its functions with an easy, regular and prosperous motion.
liesolved, That in our opinion, no maxim is more twe than-"Let labor alone and it will best regulate itself"-but it is true only when its application is complete and univerobl; when partially and inperfectly applied it is not true. If all mations would fatithfully adbere to this maxim, in their inter-mathonal concerns, euch nation might, not only safely do it, but would be unwise not to do it, internally. When the regulations of other nations afiect partially, and clerange our industry, it is a duty we owe to cuselves, by countervailing regulations, to
westore harmony, health and vigor to our own system. Whenever our government protects us against foreign interference and foreign competition, we will petition them to "let our labor alone."

Resolved, That as we believe, the preceding propositions are clearly founded in truth, and that the United States of America is on the verge of a crisis in which, if we do not avail ourselves of a prudene foresight, we slall be taught through extensive suffering that we must so far supply our own wants from our own internal labor, as to nced no more from foreigh nations than they need from us. If we need less, we shall have opened for ourselves a mine of wealth, richer than those of Mexico and Peru.

Resolied, That as the nitural effect of free government, there is so much'good sense in the people of the United States that they will not long remain ignorant of their true interests - that the prejudices, fabricated and circulated by self-interested mensuch as that we wish to tax the great mass of our citizens employed in agriculture, to place in a hotbed, and make the fortunes of those engaged in manufactures - will be dissipated like morning mists before the sun. Yet the noblest birth requires aid, and infancy requires fostering care: Therefore

Resolved, That this society will unite its efforts with those of similar socicties, who may concur in the ineasure, to collect and embody a statistical account of our inamufuetures and of our industry generally, with such remarks and observations on political economy, as may bring the subject fully and effectually before congress at their next session, accompanied by the emphatic voice of the people-a voice which, in our country, never speaks in vain: And that this society will appoint one or more de. legates, to meet, in convention, at the city of Washiogton, during the next session of congress, or at any other time and place, such delegates as may be appainted by other similar societies.

Resolved, that the president sign these resolutions, attested by the secretaries; aid that the cor responding committee be and they are hereby requested ant enjoined to have printed five hundred copres, to communicate them to all similar societies of which they may have knowledge, and otherwise dissemi:ate or dispose of the same, in such manner as they may deem most conducive to the objects of tais suciety.

Fi. I. 1)UP\&NT, I'ice-President.
Selleck Osaons, Secretary.

\section*{CllRCUL. 1 .}

Hilmington, (Dcl.) 1/ril 17, 1817.
The committce of correspondence of the Suciety of the atate of Deluware for the promo.ion of Anterican mosufficimes, having been enjomed to communicate the cuconted resolutions-in the fulfitarent of that duty, respectfully offer them to your consideration, toge her with the following remarks.

The subject of internal cconomy has become ver interesting to the proptle of the U.ited States. Our embarrasanents alrealy make us feels and we shall feel mure und more. This feeling while it awakens attention, should excite engquiry into the causes of our distress, intil we are iupelied to seek remedies for past, and, taught by expernence, to establisht preven ive guards aguinst futue errors. No class of people in our country is more deeply concerned is theme inquiries than the cultivaturn of the soil; and alihough the evil may reach them later than their less favored brethisen, the inawifacturers, yet the calamity will finally be felt pressing on them, wit. a certain and destrictive weight, and crushing down their energies. There exists alrcally in the Inited

Stales a vast and increasing amount of fragments of opinion and correct knowledge. Light is widely spread and still spreading through every part of our land, and through everyoccupation. It appear's to us very important that measures should be taken, vithout delay, to concentrate these opinions and t! is knowledge into one clear, distinct, loud and empha. tic expression of the public will, addressed to congress at their next session, accompunied with a body of facts, and remarks, so complete and so lucid!y ar. ranged, as to dissipate doubt and enforce conviction. We apprehend that, as the cause is common to every part of the nation, the measures proposed would receive their best form and direction in a convention of delegates from the several societies. Should you concur in the measure, and such a convention be formed, how soon would. it be practicable for it to meet at New-York or Philadelphia? If any thing is to be done, in this way, that it nught to be commencell quickly is, we think, very obvinus

Signed by order and on behalf of the committee, ISAAC BRIGGS, Chairman.

\section*{Land Offices.}
circular to the brgisters of the lind offices of the cniten states.
\[
\text { Goneral Land Offee. April } 29,1817 .
\]

Sin-You will receive, with this, several biank forms of a Meteorologicul Register, to which I beg leave to request your attention.
The United States have already established troenty land-offices, viz: at Detroit, in Wichiran; at Wos. ter, Steubenville, Mrietta, Zanesville, Chilichthe, and Cincinnati, in Orio; at Jeffersonville, and Vincennes, in Indiana; at Kaskaskia, Shawiceiown, and Edwardsville, in Yllinoir; at Saint Louis, in .Hissonvi; at New.Orleans, Opelonsas, and north of Rer river, in Louisiana; at Iuntsville, Washington, Saint Stephens, in the territory lately acquired froin the Creeks, in the Mississippi territory.

These offices are dispersed over a space of about thirteen degrees of latitude and ten of longitu.le,"
The three columns for temperature, wivish and wenther, are ruled for three daily observations of each, viz. in the morning, at 2 P. M. and in the ctening. The column entitled miscellaneous obsertation, is intended to compreliend a variety of objects, among which are the following, viz:
1. The time of the untolding of the leaves of plants.
2. The time of fowering.

3 The migration of birds, whether from the north or asuth, particularly of sioullozes.
4. The migration of foslies, whether to or from the ocean, or other plaoes and the time of their deposiion of spawn.
5. The hybernation of other animals, the time of their going into veinter quarters, and their re-appeaf. ance in the spring.
6. The phanomena of unusual rains and infumit. tions.
7. The phanomena of unusually severe droughts Tise history of lucusts and other insects in unu.ual numbers.
8. Remarkable effect of lighening.
9. Snow slorms, hail-storms, lurricanes, and tior-nadnes-their courses, extent and duration.

13 Discoveries relative to the antiquities of the c.untry.
14. Memorable facts as to the topography of the country.

A notice of any, or all, of the above articles will be highly acceptable.

I wish you to transmit your observations monthly, with your monthly official returns.

Whatever information may be thus obtained will be public property.

My only object being the increase of our physical knowledge of our country, I flatter myself you will not think my request unreasonable.
I have the honor to be, very respectfully yours, JOSIAH MEIGS.

\section*{Treatment of Napoleon Bonaparte.}
letter, by order if the emperor Napoleon, uddressed by general count. Montholen. to sir Hurloon Lowe, British governor of the islund of St. Helena.
Geveral-I have received the treaty of the 3 cl of August, 1815, concluded between his Iritannie majesty, the emperor of Austria, the cmperor of Russia, and the king of Prussia, which accompanied your letter of the 23d of July.

The emperor Napoleon protests against the contents of that treaty; he is not the prisoner of Eng. land. After havingplaced his abdication in the hands of the representatives of the nation for the advantage of the constitution adopted by the French people, and in fivor of his son, he repaired voluniurily and freely to England, with the view of living there, as a private individual, under the protection of the British laws. The violation of every law cannot constitute a right. The person of the emperor Na. polion is actually in the power of Fingland, but he neither has been, nor is, in the power of Austria. Russia and Prussia, cither in fact or of right, even according to the laws and customs of Englur'。 which never included, in the exchange of prisoners, Ruscians, Prussians, Austrians, Spaniards, or Portuguese, though united to these powers by treaties of alliance and making war conjointly with them.

The convention of the second of Aingust, concluded fifteen days after the emperor was in Fingland cannot have a right of any effect. It exhibits only a spectacle of the coalition of the four greatest powers of Europe for the oppression of a single man!-a coalition which the opinion of every 112 ion and all the principles of sound morality equally disavow.

The emperors of Austria and Russia, and the king of Prussia, having weither in fact or' in right any claim over the person of the emperor Napoleon, could decide nothing respecting him.

Had the emperor Napoleon been in the power of the emperor of Austria, that prince would have recollected the relations which religion aml nature have formed between a father and a son-relations which are never violated with impunity.
He would have recullected that Napoleon had four times restored him to his throne: viz. at leoben in 1797 -at Luneville in 1804 -when his armies were under the walls of Vienna-at Presburg in 1806, and at Vienna in 1809, when his armies had posession of the capital, and three fourths of the mos narchy! That prince would have recollected the protestatinus he made to Napoleon at the bivonac in Moravia in 1806, and at the interview in Dresden in 1812

Had the person of the emperor Napoleon been in the power of the emperor Alexander, he would have recollected the ties of friendship contructed at Til. sit, Vrfurth, and during twelve years of daily corres. pondence.

He would have recollected the conduct of the emperor Napoleon the day after the battle of Aus. terlit?, when, though he could have made him with, the wreck of his army, prisoner, he contented himself with taking his parole, and allowing him to operate his retieat. He would have recollected the dangers to which the emperor Napoleon personally exposed himself in order to extinguish the fire at Moscow, and in preserve that capital for him-as-
suredly, that prince would never have vinlited the duties of friendship and gratitude towards a friend in misfortune.

Had the person of the emperor Napoleon been in the power of the king of Prussia, that sovereign eould not have forgoiten that it depended on the emperor, after the battle of Friedland, to place another prince on the throne of Berlin. He would not have forgotten in the presence of a disarmed enemy, the protestations of attachment and the sentiments of gratitude which he testified to him in 1812 at the interviews in Dresden.

It accordingly appears from articles 2 and 5 , of the treaty of the second of August, that these princes being incapable of exercising any influence over the disposal of the emperor, who was not in their power, accede to what may be done thereon by his Britannic majesty; who takes upon bimself the charge of fulfilling every obligation. These princes have reproached the emperor Napoleon with having prefered the Einglish laws to theirs. The false ideas which the emperor Napoleon bad forined of tho liberality of the laws England, and of the influence of the opinion of a great, generous and free people, over their government, decided him to prefer the protection of these laws to that of a father-in-law or an old friend.

The emperor Napoteon had it in his power to secure, by a diplomatic treaty, whatever was personal to himself, by putting himself either at the head of the army of the Loire, or at the head of the army of the Gironde, commanded by general Clausel; but wishing, henceforth, for nothing but retirement, and the protection of the laws of a free state, either English or American, all stipulations appeared to him unnecessary. He conceived that the English people were more bound by a conduct which was, on his part, frank, noble, and full of confidence, than they would have been by the most solemn treaties. He had been deceived, but his error will for ever cause true Britons to blush, and will, in the peesent as well as the future generaLions, be a proof of the bad faith of the English ad. ministration.

Austrian and Prussian commissioners are arrived at St. Helena. If the object of their mission be the fulfilment of a part of the cluties which the emperors of Austria and Russia have contracted by the treaty of the 2d of August, and to take care that the Jinglish agents in a small colony in the midst of the ocean, do not fail in the respect due to a prince connected with these sovereigns by the bouds of relationship, and so many other ties, proofs of the character which belong to those two monarchs will be recognized in this proceeding; but you sir, have declared that these commissioners have neither the right nor the power of giving any opinion on what may be passing on this rock.

The English ministers have caused the emperor Napoleon to be transported to St. Helena, at the distance of 2000 leagues from Europe! This rock, situated within the tropics, and 500 leagues from any continent, is subject to the devouring heats of these latitudes. It is covered with clouds and fogs during three-fourths of the year, and is at once the most arid and the most humid country in the world. Such a climate is most inimical to the health of the emperor, and hatred must have dictated the chince of this residence, as well as the instructions given by the English ministry to the officers commanding in the island.

They have even been ordered to call the empesor Napoleon, gentral, as if it ware wished to oblige
him to consider himself as never having reftrned is France.

The reason which determined him not to assume an incognito mame, as he mighx have resolved to do on leaving France, were thee: first magistrate fur life, of the republic, under the title of first consul, he concluded the preliminaries of London and the treaty of Amiens with the king of Gireat Britian: and recieved as ambassacors, lord Cornwallis, Mr. Mercy, and lord Whituorth, who resided in that quality at his court.

He accredited to theking of England, count Otto and general Andressi, who resided as ambassadors at Windsor. When, after an exchange of letters between the ministers for foreign affairs of the two monarchies, lord Lauderdale came to Paris invested with full powers from the king of England: he treated with the plenipotentiaries possessing full powers from the emperor Napoleon and remained for several months at the court of the Thuilleries; when lord Castleragh afterwards signed, at Chatillon, the ultimatum, which the allied powers presented to the plenipotentiaries of the emperor Napoleon, he recognized by that the fourth dymasty. This ultimatum was more advantageous than the treaty of Paris, but in exacting that France should renounce Belgium and the left bank of the Rhine, it exacted. what was contrary to the propositions of Frankfort and the proclamations of the allied powers-what was contrary to his oath, by which at his coronation the emperor swore to maintain the integrity of the empire. The emperor, besides, thought that these natural limits were necessary both for the security of France and to preserve the equilibrium of Europe; he thought that the French nation in the situation in which it was, ought rather to run the hazard of all the chances of war than to depart from that policy; France had obtained this integrity, and would have preserved it with honor, if treason had not arrayed itselt in aid of the allies.
The treaty of the 2d of August, and the act of the British parliament called the emperor Napoleon -Bonaparte, and gave limn only the title of general. The title of general Bonaparte is doubtless eminently glorious-the emperor bore it at Lodi, at Castiglione, at Elvoll, at Arcole, at Leoben, at the Pyramids, at Aboukir; but for seventeen years he has borne that of first consul and emperor, which proves that he has been both first magistrate of the republic, and sovereign of the fourth dynasty.Those who think that nations are flocks which belong of divine right in certain families, do not belong to the age nor do they participate in the spirit of the Einglish legislature, which has several times changed the order of its dynasty because great changes had taken place in public opinion, in which the reigniag princes not participating, they became enemies to the welfare of the great majority of the nation, for kings are only hereditary magistrates, who exist for the welfare of nations, and not nations for the satisfaction of kings.

It is in the same hateful spirit that orders have been given that the emperor Napoleon shall not be allowed to write or receive any letters, unless they are opened and read by the English ministers and the officers at St. Helena. They have interdicted to him the possibility of receiving intelligence from his wife, his mother, his son, or his brothers; and when in order to avoid the inconvenience of having his letters read by subaltern officers, he wished to send letters sealed to the prince regent, he was told that the order could not be departed from, and that the letters must pass open, such being the instructions of the ministry. This conduct
needs no observation; it gives rise, however, to strange ideas as to the spirit of the administration which could dictate what would be disavowed even at Algiers. Letters have arrived at St. Helena, for the officers in the suite of the emperor; they were broken open and transmitted to you, but you have not communicated them, because they did not come through the channel of the English ministry. Thus they had to go back 4000 leagnes; and these officers had the grief of knowing, that there was intelligence on the rock, from their wives, their mothers, their children, and that they could not know the nature of it for six months-the heart must solace itself.

They could not obtain either the Morning Clironicle, the Morning Post, or any French journals. Now and then a few stray numbers of the Times reached Longwood. In consequence of a request made on board the Northumberland, some books were sent but all Ulose relative to the affairs of late years have been carefully kept back. He wish. ed to correspond with a bookseller in London, in order to have direct the books which he wanted, and those relative to the events of the day-this was prevented-An English author, having made a tour to France, and having published an accout of it in London, he took the trouble to transmit it to you, in order that it might be presented to the emperor; you thought proper not to transmit it because it was not sent to you by the express desire of your government. It is said also, that other books sent by their authors have not been trasmitted, because some of them were inscribed to the emperor Napoleon, and others to Napoleon the Great. The English ministry is not authorised to order any of these vexations; the law, although unique, by which the Britisl? parliament regards the cinperor Napolcon as a prisoner of war, has never prohibited prisoners of war from subscribing to journals or receiving printed books-such a prohibition only takes place in the dungeons of the inguisition.

The island ofSt. Helena is ten leagues in circumference; it is inaccessible every where; brigs surround the coast; posts are stationed on the shore within sight of each other, which render impracticable any communication with the sea. There is only orte small town (James' town,) where there is an anchorage, and where vessels touch. To prevent an individual from quitting the island, it is sufficient to guard the shore by land and sea. To lay an interdict on the interior of the island cann, therefore, have no other object than to deprive him of a promenade of from cight to ten iniles, which it would be possible to make on horse back, and the privation of which will shorten the life of the emperor. The emperor has been establislied at Lougwood, exposed to every wind, and where the land is sterile and uniuhabitable, willont water, and not sisseeptible of any cultivation. There is a circuit marked ont of about 1200 toises, it about 11 or 1200 distance a camp is establistied on a hiill, and another camp in an opposite position at the same distance; in short, in the midst of the heat of the tropic there is nothing to be seen but camps. Admiral Malcolm haviug learut the utility which the emperor would derive fi mo a cent in that situation, caused one to be set up by the sailurs, at twenty paces distance in front of the honse, it was the ouly place in \(w^{1}\) ich a shade could he found The emperor lad as much reasoun to be satusfied with the spirit diat animated Uhe officers and soldiers of the brave 5.3.1 regiment, as he had been with the crew of the Northumberland.

The house at Lougwoud was built to serve as a
barn for the company's farm; the deputy governor of the island had since built some chambers; it served him for a country house, but it was not in a proper habitable state; workmen bave been employed at it for 3 year, and the emperor has been continually subjected to the inconvenience and insalubrity of inhabiting a house in the progress of building. The chamber in which he sleeps is too small to contain a bed of ordinary dineensions, but every alteration at Longwood prolongs the inconvenience of having workmen there. There are, however, in this miserable territory, heautiful situations, preseuting fine trees, gardens, and good houses. There is besides, Plantation house; but the positive intructions of governuent forbade you from giving up this lhouse, although much expence would thereby have been saved to your government-an expence incurred in Alting up at Longwood a hut, covered with paper, which is already unserviceable.

You have interedicted all correspondence between us and the inhabitants of the island-you have, in fact, placed the house at longwood an secret-you have even prevented any communic.ation with the officers of the garrison; it seems, therefore, to be your study to deprive us of the little resource which this miserable territory affords, and we are here just as we should be on the insulted and uninhabited rock of Asceus:on.During the four months that you have been at st. Helena, you have, sir, rendered the situation of the emperor much worse. Comut Bertrand has observed to you that you even violate the laws of your legislature, and that you trample under foot the rights of general officers, prisoners of war.You have replied, that you acl according to the letter of your instructions, and that your conduct to us is not worse than what is dictated by them.

1 have the honor to be,
Your very humble and very ob'dt. serv'l, (Signed)

The general Count DE MONTHOLON.
After 1 had signed this letter, 1 received your's of the 17th August, in which you subjoin the account of an anıual sum of 20,0001 . sterling, which you consider indispensable for the support of the expences of the establishment at Longwood, after having made all the reductions which you thouglit possible. We do not think we have tuy thing to do with the dischasion of this point-the table ni the emperor is scarcely provided with strict necessaries, and all the provisions are of the worst quality. You ask of the emperor a fund of 12,0001 . sicrting, as your government will only allow 2,0002 . for all the expences. I have alrcadyy bad the honor of informing you that the emperor had to fuuds, that for a year past he had neither written nor received any letter, and that he is altozether ignoraut of what has phassed, or is pas ins in lin. rope. Transparted by forec to this rock," without being able to write or to receive any suswer, the emperor is entirely at the miercy of the English agents. The emperor has ulways desired, and is still desirons, to provide himsilf for गit his ex. pences, of whintever nature, and lie will dn it as soon as you render it possible by taking off the in. terdictiou baid upon the merclants of the islanat, with regard to his correspondence, and directung that it should not he subjected to any inquivitio? on your part or by any of your agents. Thence. forth the wants of the emperor woull be kuown in Europe, and those persons who interested them selves in his behalf, might sead hian tine fends we cessary to provide for the:n

The letter of lord Bathurst, which yom have comthinicated to me, gives birlh to strange icieas. Are vour ministers then ignorant that the spectacle of a great man in captivity and adversity is a most subime spectacle? Are they igmorant that Naproleon at St. Helena, in the midst of persecution of every description, to which be opposes nothing but serenity, is greater, more sacred, and more venerable than when seated upon the first throne in the world, where for so long a time he was the arhiter of kings? Thuse who, in sutch a situation, are wanting in Napoleon are blind to their own character and that of the nation which they represent.

MONTHOTON.
\(x^{3}\) This letter nocasioned an interesting debate in the British parliament and formed the ground work of lord Holland's motion for an enquiry into the personal treatment of the ex-emperor. The charges enntained in it, however, were denied by the English minis! 1 y, on which lord Holland's motion failed. The following is from a London paper of March 11-
We cannot help differing with those who are in clined to blame lord Holland for bringing forward his motion yesterday, relative to the treatment of Bonaparte. For it drew forth a decisive and official refutation of all the complaints of ill treatment alleged against our government; it exposed the mean and base arts which had been resorted to, to calumniate us, and it proved beyond the possibility of doubt the absolute necessity of applying to Bonaparte the most wacthful and incessant restrictions. For the sake of more clearness we shall state the heads of the charges (A.) and secondly the refutations (B.)
(A.) 1. The charges are, that he has been exposed to additional restrictions with respect to the space allotted him for exercise.
2. That at those hours most proper for exercise, all ingress or egress from Bonaparte's residence, Longwood, are interdicted.
3. That he was prevented from procuring such books as he may want, or from subscribing to the journals.
4. That he is not allowed to send a sealed letter to the prince regent, nor to correspond with nor receive letters from his wife, friends, or relatives.
5. That he is debarred the means of writing an account of his former acts.
6. That the sum of his maintenance has been reduced to 8000 . a year, and that the supplies for his table are scanty and inadequate.

Such are the charges. The refutations are as f.llows:
(B.) 1. During the first perind-of his confinement lie had a circumference of no less than 12 miles to ride or walk in without the attendance of any offi-cer-which range had not been reduced till it had been found that he had abused that confidence reposed in him by tampering with the inhabitants. That range was now reduced to eight miles instead of twelve, and within that boundary he might at present walk without the attendance of any officer. Beyond those limits he might go over any part of the island, attended by an officer of rank not lower than a captain in the army.
2. Though he has not free passage through the island after sun-set he may at any hour walk in his garden. Sentiaels are stationed there after sun-set, and he expressed his dislike to walk when he was thus watched. Sir H. Lowe, with every desire to attend to his wishes, after that, fixed the sentinels in places where they would look on him. Would
any one wish these sentinels to be remored altogether just at the time when it was most likely that he sliould escape ?
3. Soon after Bonaparte's arrival at St. Helena, lie expressed a wish for some books to complete his library, and a list was made out by general Bonaparte himself, and transmitted to this country. This list was sent to an eminent French bookseller in this town, with otber orders to supply such of the books as he had, snd to obtain the rest from other booksellers. As several of the books were not to be obtained in London, the bookseller was desired to write to Paris for them. He accordingly obtained some of them from Paris. These books to the amount of 13 or 14.00 l . worth, were sent, with an explanation of the circumstances which prevented the others from having been sent.
Newspapers have been refused, from a knowledge that attempts have been made, through them, to hold correspondence with him.
4. He might have sent any letter to the prince regent, but not sealed. The ministers, who are responsible, must know the nature of such a letter, bit it would certainly have reached his royal highness. He may likewise send and receive letters from his wife or relations, hut they must be opened: they will then be sent as addressed. Only one of his relations, his brother Joseph, has written to him, and that letter was forthwith forwarded to him.
5. No attempt has been made to prevent him from writing any account of his life.
6. Eight thousand a year has been deemed a fair permanent allowance for his maintenance; but Sir Hudson Lowe thinking the establishment of IBonaparte could not be provided for suitably under \(12,000 l\) a year, the latter sum was immediately agreed to.
With respect to provisions and wine, it need only to be stated, that for nine persons, the number connected with Bonsparte, there are allowed eleven dozen of wine; (Claret, Champagne, \&c.) weekly.

Such, then, is the manner in which we treat Bona-parte-a manner in which, if there be any room for condemnation, we are quite sure it will not be on the score of its being tro illiberal, harsh, or vindictive. Thanks, we repeat, are due to lord Holland for affording so official and decisive an opportunity of putting down the charges brought. against us.

The people of Cuba are said to be "well-inclined" io the patriots-of ien coming off at night and sup. plying the privateers with provisions, from which some infer that the island will shake off its allegiance to Ferdinand.
south amenica.
The port of Pernambuco is declared open to all nations-the Portuguese excepted. The new government, it is said, have sent an account of their proceedings to the United States. Every thing seems to go on very well there. A letter from Pernambuco says, "this province or captaincy contains three millions of inhabitants." This camnot be truc -the population of all Brazil, exclusive of Inclians, ean hardly exceed that number, scattered over an immense territory. The city of Pernambuco may contain about 45,000 inhabitants, and is a place of great tracle, last year exporting 17,000 bales of cotton to England. The people are much attached to thase of the United Staics:

The present head of the new government is \(D_{0}\) mingos Jose Martins-reported to be exceedingly well qualified for the station.

The royal governor of Chili was captured at Val. paraiso, where he was about to embark with two millions of dellars.
Washington's birth day was celebrated in hight stile at Buenos Ayres, by the citizens of the United States then at that place, joined by some distinguished S. A. patriots. The toasts were good*en. Catrera gave the following volunteer-"The
is in gratitude eternally bound."
It was believed at Cadiz that two of the patriot privateers, joining their forces, liad captured, after a smart action, a very rich galleon, destined for that port, off the Canaries. We hople it is true!
A Carthagenian privateer off the Balize is report: ed to have captured a Spanish vessel with \(500,000 \mathrm{~S}\) in specie on board, and a cargo of Guatamala indigo nearly of the same value!
While half a dozen Spanish vessels of war are in Havalla, their active enemies, the patriot privateers, of ien capture vessels and carry them off within sight of the Moro castle.
of That the Sonth Americans will ulimately work out their emancipation, (unless a stronger power than that of Spain and Portugal, united, shall be raised up against them in Europe, of which, happily, there is not any prospect at present) is ap. parently certain. But, as observes a friend, in a letter to the editor of the Remistra-"it will ne"cessarily be a long and suffering struggle; and "without it they would not be prepared for the "correct estimate or right enjoyment of liberty-"they are now at school, and must pass through "all the gradations befure they can become free"men. England is what badl men have made her"poor and miserable; and so she will continue until "church and state are severed, and mind assumes "the power which now is in the hands of appetite. "If the United States will open their eyes to their "true interests, and depend on their own industry "and resources instead of those of Europe, they "may soon beeome truly independent-and not ea"sily so without it."

\section*{Indian Captives.}
from the georgetown (ky.) pathot
That a nuniber of prisoners taken since the commencement of the late war by the indians, yet remain, we fear there can be no doubt. Some time in the month of January last, we received information by the return of one of our citizen soldiers, detained in indian captivity, that there were a number of American captives, yet behind, in the same situation (perhaps on lake Huron.) He also gave particular information of a musician, by the name of Fant, or Vant, who was in possession of an indian near Quebec.
We have received for publication the following copies of letters, the result of engluiries made by our government on that subject.
Copy of a letter from Richard Rush, acting secretary of state, to col. R. MI. Tolinson, clated,

Department of state, Mach 19, 1817.
Sur-I have the honor io send you the copy of a letter from Mr. Bagot, to this department, and its enclosure, one to him from the governor general of Canada, ou the subject of certain American prisoners, who were supposed to be still held in captivity by the indians upon lake fiuron, in whose cases you have taken so much interest.
It would seem, from governor Sherbrook's letter, that no such person as Thomas Fant or Vant, partiaularly mentioned by you, was known to ever have been in (Huebec. As governor Sherbrooke says, however, that some individuals may possibly be yet in eaptivity in the neigliborhood of lake Huron, (meaning, it is presumed, American ci, izens,) and that he would avail himself of any information which might be communicated through this government, for the discovery of such, with a view to their release and their restoration to their families \(2 n^{2}\).
friends, you wiil readily, I am fully persuaded, furnish this department with all the information that you may obtain on this subject.
I have the honor to be, with very great respect and consideration, sir, your obedient servant,

RICHARD RUSH, .qcting secretary of state. Hon. Richard M. Johnson.

Copy of a tetter from H. B. M. minister to the acting secretary of state, dated, Washington, March 15, 1817.
Sin-Upon the receipt of Mi. Wonroe's letter of the 28th January last, respecting certain American prisoners who were supposed still to be held in cap. tivity by the indlians upon lake Huron; I lost no time in writing to the governor general of Canada, requesting that he would direct a minute enquiry to be inade into all the circumstances stated in Mr. Monroe's note, and in the eveit of its appearing that the prisoner in question, or any other citizen of the United States were still frorcihly detained by the indians, that he would use his utmost endeavors to procure their immediate release.

I have now the honor to enclose to you a copy of the letter which 1 have received from sir John Sherbrooke, upon the subject of these prisoners.

From this letter there appears reason to hope that the inforination which has been given in respect to them, may be found to be correct; but the governor gencral will not cease to use every exertion in his power to ascertain their fate, and if the govemment of the United States can furnish me with any additional information which may serve, in any degrec, to sssist his excellency in his enquiry, I shall not fail to put him immediately in possiession of it.
I have the homer to be, with the highest consideration, sir, your most obedient humble servant.

CHARLES BAGOT.
The Hon. R. Rush.
Copy of a letter from sir John Sherbrooke, governor general of Canada, to his excellency Charles Bagot. Casle of Sh. Lewis, Quebec, Feb. 12, 1817.
Sin-On the subject of Mr. Monroe's letter, I have made every possible enquiry here, and cannot learn that the American therein inentioned of the name of Funt or I'ant, was crer in Quebec.

You will naturally perceive low highly improba. ble it is, that an indian, having a priscner in his possession, which they were invariably, as far as possibie, prevented during the war from retaining, showld ever have brought him to Ruebec. But if an indian liad so done, it is scarcely necessary that 1 should remark to you, how absolutely impossible it is, in such a city us this, lic could at any time, much less in peace, detain in custody an American citizen against his consent; and this tou while numbers of the inhabitants of the United States are visiting or residing among us.
After the mont ininute engriry, I cannot learu that Josepls Faudrie hinsself, the informant of the circuinstance referred in, has been in Quebee, and can liardly conceive it credible that he could have been brough licere a prisoner in custody of an indian.

It is, however, possible, notwithstanding all the eflorts of our officers and tronps to prevent it, that theie may yet besome individuals in capsivity in the neighborthood of lake Huron. On this subject I have not failod to write iosedately to that part of the coturtry, and you may assure the government of the United States, that if 1 can discover, or if they ean by further information, assist me in discovering anty 'tith no exertionts shatl be sparal by me t)
effect their release and restoration to their families and friends.

I have the honor to be, \&c. \&c.
J. C. SHERBROOKE.

His ex. the right hon. Clarles Bagot.
The following article, from the Sag Ifarbor Re. corder of last week, proves that governor Sherbrooke was mistaken in supposing that there were no Americans in captivity by the Indians in the neighborhood of Quebec:
"The schooner Lydia, Johuson, from Quebec for New-York, having sprung alenk at sea, was run on shore in Long-Island Sound, near a place called the Old Man, on Tuesday morning last. Came passena ger in the Lydia, Benjamin Powell, Joln Brown, Elizabeth Smith and Sarah Roberts, all of whona have been prisoners to the Indians; by whom Mr. 1"s wife and five children were murdered. Mr. P. after having been cut and mangled in a most shocking and barbarous manner, was left on the floor of his own house for dead; but fortunately some of the Indians returned in a few days, and finding him alive, took him, bound up his wounds, and, by the aid of an Indian doctor, cured him. Mr. P. has lost the use of his right arm, by a cut with the tomotiawk, in the shoulder. Mr. F. states that he, and three others, were sold to a Mr. Randal M'Donahl, an Indian trader, for five gallons of rum. Mrs. Smith and Roberts liad both their husbands and several children murdered by the savages. Mr. IP. left this place on Wednesday last for New-London, and from thence to Providence (R. I.) the place of his nativity. The other passengers in the schooner have gone to New- Iork."

\section*{CHRONICLE.}

Mr. Groszenor, late a member of congzess, finm New-York, recently died at Baltimore. And Mr. King, late also a nember from Massachusetts, has died at Saco.
The freight bills of the steam boat F:tna, from New Orleans to Louisville, amounted to more than \(\$ 22,000\).

Nerv- York election.- There has been a warm contest in the city of New York for assemblymenClintonians and Anti-Clintonianse The latter beat the former by a inajorit! of 1900 rotes.

American vert anaque marble--A quarry of very bcautiful marble was not long since discovered ai Milford, Connecticut, and is now worked. A small supply has been received at Baltimore, by one of our stone-cutters, who advertises that he is ready to receive order's to work it up. This marble is of singular beauty-the ground color iv chic by of gre. and blue, interspersed with clouds, spois und veins of White, black and green. It takes a fine polish; and for those purposes where elegant ornaments are reItired, renders us independent of the old world.

Indian hostilaty.-IThe late outrages of the sout?. ern Indians are attributed vo the cont jnued intrigues of the infamous \(H\) ooilline, now sail to be resident at the montlo of Sewance, where there is a fort amb block house. Besides exciting the Indians to murder and robbery, it secms lie is carrying on a trade with Cubn, in slaves, inveigled from the Linited States. Government appears to be impressed with. some facts of this nature, from the late marching of Iroops for the lower Creek comery; and if it be true, that llondbine has a fint and is carrying on the operations attributed to him, we hope it may ineet the fate of that at I ppalachicula, It the Spaniards Inse dielr neutral character, why shonid we renpect it'-
if they ire unable to control such proceedings, we must slo it.

Mans emigrants are arriving from Europe-some of whom, it is stated, bring with them a good deal of mincy.

Whent.-This grain, which was so promising a few diys ago, we are told, is very extensively injureal by the Hessian fly.

Dreal!ful. The fullowing is from the (Baltimore) Merehantis Cuffice House books:

Capt I'IJonald, of the British schooner Marga. ret, reports that on Monday last at half past 6 o'clock, l'. M. When he came into the bay, discoverect a Buenos Ayres brig, commanded by com. Chaytor and a schooner under the same flag, (for merly the lomp) anchored a short distance from her, near cape Henry-a pilot boat was near the scirooner supposed to be delivering powder, when, says capt. M. "the most shocking spectacle I ever witnessed was in the explosion of the schooner; she ascconled the air in a blaze of fire, and not a vestige of her was afterwards seen; the boat near her is supposed to have shared the same fate; the concussion was so great, and shook my vessel so, we thought she had struck the grotnd" It is since reported by Thomas' pilot boat, that 22 lives were lost in the schouner.
by the president of tae united states.
Whereas by an act entilled "an act providing for the sale of the tract of land at the lower rapids of Sandusky river," passed on the 27 th day of April, 1816, it was enacted ihat all the lands in the said wact, except the reservations made in the said act, should be offered for sale to the highest bidder, at Wooster, in the state of Ohio, under the direction of the register of the land office, and the receiver of public monies at Wooster, and on such day or days as shall, by a public proclamation of the president of the United, be designated for that purpose: And whereas by an act entitled "an act providing for the sale of the tract of land at the British fort at the Miami of the Lake, at the foot of the rapids, and for other purposes," passed the 27 th day of April, 1816, it was enacted that all the land contained in the said tract, except the reservations and exceptions made in the said act, should be offered for sale to the highest bidder, at Wooster, in the state of Ohio, under the direction of the register of the land affice, and the receiver of public monies at Wooster, and on such day or days as shall by a public proclamation of the president of the United States be designated for that purpose.

Whereforc, I, James Monhoe, president of the Enited States, in conformity with the provisions of the acts before recited, do hereby declare and make known ihat the lands authorised to be sold by the first mentioned act, shall be offered for sale to the highest bidder at Wooster in the state of Ohio, on the first Monday in July next, and continue open forl seven days and no longer; and that the lands authorised to be soll by the last mentioned act, slall be offered for sule to the highest bidder at the same place, on the third Tuesday in July next, and continue open for seven days and no longer.

Given under my hand, this 15 ih day of April, 1817.
(Signed)
JAMES MONROE.
By the president,
J. MEIGS,

Comnissioner of the seneral land office.
The elegant piece of brass ordnance landed on Buchanan's wharf, west side of Rutgers' slip, was brought from Virginia, where it has remaned in the battom of York river since the American revo.
lution. It was lateiy raised by means of a diving bell, in four fathoms' water, partly imbedded in the sand. It appears to be no way injured, corroded or incrusted, by lying between thirty and forty years on the sandy bottom of the river. It is stated to have been lost before or about the taking of Cornwallis at lork, by general Washington.

The slings gave way while lowering the cannon into a scow, intended to convey it to the shore; but its enormons weight burst the scow asunder, and it went to the bottom.

Upon examining the piece, it was found to measure 11 feet 10 inches in length, and its calibre capable of carrying a 32 pound ball. It is elegantly carved about the butt end and otlier places, and contains several inscriptions and devices. On the upper part near the muzzle, are the words, "Ixt Divertissant, which appear to have been meant as a name for the piece, and may be properly trans. lated, The Sportsinan. Below that, are the Latin words "neltima ratio regum," royal logic, or literally translated, the last resort of kings. Further on is inscribed, "Je Narechal De Mamiers," with a coat of arms, probably of that general. Beneath that are the Latin words-"Pluribus nec impur:" This inscription would seem to convey the value of ordnance when compared with small arms, and would therefore be considered, by translation, as equal to many small arms. Around the butt of the cannon are carved the words, Killeri Tiguro Helvitii \(F^{7}\). \()\). 1680-which may be rendered thns: "Keeler Tigu-, ru (or Tigurns) of Svitzerlund, made this piece of ordnance at Douay, in 1680.

By these inscriptions it appears that the piece is 137 years old, and was cast by a Swiss at the cele. brated foundery of Douay, in the French Netherlands, established by Lewis the 14th, when, in the height of his glory, he endeavored to subjugate and control all Europe. Humiers was one of his generals, and probably from the esteem of his sovereign, had the liberty of inscribing his name upon this piece, attached to his division of the army. Marshal Humiers was beat at Walcourt in 1639 , by the allied armies under the prince of Waldec.

\section*{SAMUEL AKERLY.}

Since writing the above, the cannon has been removed to the coffee-house. It is worthy the attention of the state or the United States, and ought to be purchased by one or the other of thein.
[ \(\mathcal{N e z v - Y o r k ~ G a z . ~ A p r i l ~} 22\).
Splendin paper-From the Democratic Press, of April 30-The declaration of independence-We have this day received from the paper mill of Mr. Thos. Amies, the paper on which we intend to print the splendid edition of the declaration of independence, which, for the fourteen months last past, has been under the graver. The paper is believed to be of a size and quality superior to any ever manufactured in the United States. The moulds, felts, \&\&c. were all of the best kind, and manufactured for the purpose. The paper weighs one hundred and forty pounds, and the price is one hundred und tzuenty five clollars a ream. Cotton rags were altogether excluded, and the finest linen only has been worked up. The size is rather more than 36 by 26 inches. We flatter ourselves that the paper is such as will do credit to the state of the art of paper-making in the United States.

Singular customs.-The errois of the human mind are sometimes so ridiculous that we can scarcely give credit to them. In ligypt it was forinerly a custom for the master of the house in which a cal died to shave his left eyebrow, as 2 token of grief

Hac ólim meminisse juvabit.-Vinoil.

We have again a rich and varinus feast for our rearlers-among the articles is an account of the imports of the United States (a work of much extra mechanical labor) and the report on the Delaware and Raritan canal, commenced in the present and to be concluded in the first pages of the succeeding number. It shall ever be our care to preserve things that will wear well-and enrich oirr volumes for reference, while passing matters aie not neglected.

\section*{ROBBERY OF THE MAII.}

Fayetrerille, -1Lay 8.- One of the most high handed frauds was practised somewhere between this place and Baltimore, during the month of March. We understand that three entire letter mails, which were sent on from this town in clue form, did not even arrive at-Petersburg, Va. In these mails were contained large sums of movey, in drafts and bank notes, renitted to New York and Philadelphia, by \(m=r\) ch.nts in this town, Wilmington and Charleston. -So deep laid has been the fraud, that many subsequent letlers, intended merely as enquiries of the fate of former ones, from those persons who remitted the money, have baen cautiously intercepted. Not the slightest possible clne to this grand scheme of iniquity has yet been discovered, and never will be perhaps unless the general post office see fit to look into the business.
\(0 \int\) That the General Post.Office will look into the business, cannot be doubted. But our great object in noticing this unfortunate affair is to influence our subscribers and others, wishing to remit money to us, not to be discouraged by it; we still bilarantee the safety of the mails for the receipt of all monies really forwarded to us. We fear notiing so much as the negligence of our frients.
"Talking about money, naturally puls us in mind of "1 the acdiress made to our subscribers out of the city of Balfimore in an extra-sheet. It was the result of uecessity, and it is feelingly observed tha: some attention liay alrearly been paid to it. One gentteman, in a very good himered tetter, expressing a derarmination not to be "among tae drones that consume the substance" of this work, after notreise in enclomere 10 pay his dues, says-"and as y \(\boldsymbol{x}\) appar to have the inoney fever" (adisorder, by heby, which very fow of us have escaped) ! add five ctollars more as a payment in advance. They will do bee no liserm and may d, you a little good." if every gentleinan were to think and act thus-with that delight, what spirit and energy, should we pursice the business of the Wrover Reoister!

\section*{A Naton's Weal'h.}

An eastern piper ironically ubverves-"InpoweThatiel Einaliond, within a rew weeks lins loaned to "Erame ant AyEut + mure than f'ingy mullions of "lollim, in satid coin, and at a minderate nsance." We to thot know of any loan heing made to
"ive, inlect, have had a severe altack of thim "hworiet"-but a slight attention from our rearlert, as a goond piysician, would instantly reinore it, and prevent a relapse.

Vos XII
"America"-we suppose that the sale of stock - ly the bark is allucled to, which was a ransaction of individuals with indivicluals, in no wise partaking of a national character on either side. The Cnites' States do not want to borrow, and Englond hat enough to do to borrow and pay the interest of as much money as she wants for herself.

The sentence quoted has the same denomination and tendency as that on which we offered some remarks last week, and is also from the Roston Centimel; and we have again to shew how easy it is to communicate error in the words of trath;-which we shall do for the sake of "America" attempted to be degraded, though America had nothing to do with it.

What is national wealth-what constitutes a wealthy nation? - The political economist will feel at no loss to say thas: the first is in the quantity of the productive labor of a people, and the noher in the aggregate means and resources of the whole It may be assumed as a general principle-indeed, I do not know but that it can be accepted as a cule absolute, that excessive wealth, in the liands of a of a few of a nation, is conclusive evidence of national poverty. Nor is this paradoxical-it is manifest to every man that observes the practical operation of the fact, or reflects upon the sulyject. It is certain that England contans some of the richest men in Europe; cap..ble, perhaps, of cominand. ing more ready money than the same number of private individuals in any other parts of the world-but it is also as certain that she has more paupers than any other nation, probably more than there are in all the rest of Europe and America united. "Magnificent are thy palaces, () Genoa! but thou hast also thy gallies." What better evidence of the impoverishment of a nation can we have than that about one fourth of its people is subsisted by the coarsest bread-stuffs that will keep soul and hody together, at the cost of the rest, being public pinperw? - England has three millions of these, nuproductive. If they were employed at something by which, fall Ge profits being included) they could earn onlv fify cents cuch per dry, they would really, ald 45j millions per anmim to the national wealih-a stam that makes the bagatelle story abont SO millions af: pear truly contemp ible. Weite the splendid pataces of the French nobles before the revolution, sum rounded with ten or fifteen miles of rich cumbtry on which hardly any other honses stond than mud. built hovels, an cridence of the wealth of lirancewould we not rather have Laken an Ringlish county (at that period) which, though it might alsu have had its palace, abounded with large edifices of brick and stone, filled with a ruldy and joy-114 peo. ple, kerping uf) the "hum of busitse.." and enjoying life' But to spenk at onse th the point-1-the fact that some eight or tell harfies in a tow: (bank directors, perhapsi) bave in a course of years realiz. ed a million each, and establubital a cre lit to monos. polize accom-sollations fire a million more, by "haz"nf" the notes of their fillow ciflzens at 2 or 3 per cent. per month, an evidence of the watch or of tho miscry of that town? This inmediately applies to the condition of Iingland, where the people lave becn sinazed in all manner of ways out of their eatr.
ings, until a fourth of the whole of them are tenants of the ponr ! ouse.

IUL t it is the building up of these great personal fertuncs llat facilitates the general borrowing of money, and enables a government to levy heavy tinces. Onf inan with \(10,000 \mathrm{~S}\) a year, has more money to stare, than fifty men with 1000 dollars each, and he can pay more taxes than they, though bie has only a fifticth part of their wealth. This is a very clear case-for the latter have fifty times more people to maintain than the former. The truth is, that the urequal division of property, in E:lgland, caused by excessive taxation, has enabled the govermment thus far to continue that excessive taxation, and raise the various loans required, which, without it, it would lave been impossible to do.
It was by the operation of this principle that the Fgyptian pyramids and temples were built-the whole labor and wealth of the people was centered at the dispusal of the king; and I desire no hetter evidence of the poverty and misery that prevailed than the existence of these monuments. Reduce a frenple to the lowest possible state of subsistence, taking from them all they earn over that, and a great amount may be reserved that would otherwise be expended in procure some of the comforts of life. "It sunds large" that the Messrs Baring", of London, for instance, can advance, in the first instance, twenty or thirty millions of dollars, and wie are inclined to forget the fact that certain of their cotatrymen, capable of actually creating as Freat a value in 15 or 20 days, are dependent on himi and others for out meal* enough to keep them from immiediate starvation.

It has always been my opinion, and I have always supporied it with all my heart and soul to the best of ny ability, that the virtue of government must depend upon the virtue of a people, in like manner as its wealth and strength depends upon their profitabic employment and numercial force. In early youth, the venerable John Dickinson tanght me the force of his favorite maxim, "That ax amapd beopleanio an enarmein magistracy was the best sectrity for reeriom," and consequently of hap-piness- (a sentiment that deserves to be inscribed in letters of gold over every man's fire place). The principle of this maxim I would act up to in extenso. I hope that no man in the United States will ever be able to advance "thirty millions," for then we shall, probably, see the ponr houses tenanted by others than those who, deprived of their natural friends, are incapable of themselves to earn a subsistence. Let plenty prevail, and every man be able to starp lis font on the soit, saying-this is mine, independent of all but.my Creator anal Ciorl. A people so sitnated cannot be enslaved-every house is a castle garrisoned by frecmen. lsat suclia people camot pay excessive taxes; and, what is more to the purpose, they will not pay them-shall they be collected of them at the point of the bayonet? nothey cannot be coilecied but as the fice-will offering of the majority.

There is one thing that, more than ary thing else, I apprehend may have a tendeney to reduce the people of this country from their present lappy condition. I mean our banking instintions-they. are the leven which, in the hands of ambitious and waricious men, is most to be feared to raise up

\footnotetext{
* If Dr. Sam. Jcinnson were now living to revise his dictionary, he might say that oats were "a sort of grain" used to feed men in England-as well as Scotland. See Brougham's speech.
}

Burings amongst us. They have already accom plished much in this way; and have a decided ten dency to make the rich richer and the poor poorer. The people gencrally are fetting alarined at the proceedings of those establishments; whose funds, designed for the common accommodation, are more and more monopolized by a few; thereby enabled to peculate on the wants of others, and make themselves fat on the sweat of the "weary laden."

\section*{Mr. Russell.}

The Boston" "unkee" of the 9 th instant, has a very neat and exceedingly well-written article vindicatory of Mr. Russell, as to the proceedings had on his late marriage, which has excited so much serious reprehension and broad ridicule in the United States. The length of that article alone prevents its insertion entire and without comment; it repreliends, but in a gentlemanly and courteous manner, the notice that "Niles' Baltimore Register and the Rich. mond Enquirer" - (papers to which the writer is pleased to ascribe a very high character) have taken of those proceedings; doing ample justice, however, to the motives believed to have influenced us, and excusing. Mr. Russel as having had a very remote agency, indeed, if any agency at all, in the pomp and parade that really attended the ceremnny; and misch less so as being concerned in the "ridiculous" accounts of it published in the newspapers.
When we saw these accounts in the new pappers, it is frankly confessed we were sincerely mortified that a man of Mr. Russell's standing-a gentleman from whom we expected examples of practical republicanism, should have suffered himself to be led into any thing that could furnish a coloring for them. The progress of luxury and its consequent, despotism, is lamentably rapid enough; and we fear the introduction of any nezo thing to accelerate it. And how was it that we, who had laughed so much, and in honest truth, so heartily, "at the gossip stories about Charlotte and Cobourg," should have passed over quietly and without feeling, a type happening at home of what we had reprehended abroad? The parties in this case, it appears, have been much less to blame than was supposed: Mr. Russell is not the first man that an officious friend has made appear ridiculons; to which the love of pomp and shew, annong a certain set at Boston, may have contributed not a little. The story of the ceremony was embellished to the utmost bearing, though the chief things were, to some extent, founded on what really accurredand in the tout unsemble there was abinclant cause to provoke even coarse censure, as a warning to check the contagion of the example. This has, pinbably, he ell effecied-few persons, to gratify a fooling fondness firs shew, will pass throngh such an o:deal. We hoaestly regret, tiom the great respect we had for Mr. Russell, that this censure has fallen upon him; but are not sorry for the sensure itself. The first is a personal, the latter a public considera-
*There are very few newspapers in the United States that have not had an original or selected article about Mr. I.'s marriage; but the notice that some have taken of the lady's dress (which was foolishly described in the papers) has ofien been coarse, it not indecent. This is nuch to be regretted Mr. R. mighit "stand as a mark to be slont at," being a prominent man among the people-but his lady should have been treated with the respect due to her private character and delicate sex. And, acting upon this principle, zue said nothing more of the lady than to give her name.
tion-and the one should always give way to the cother, of the republic suffers a detrinent. Mr. K. is described as a man of piain, unassuming, unostentatious manners-it was so that we liad accepted him, and our mortification was the greater on that account.
In the sober virtue and sincere republicanism of the borly of the people of the United States, is (in my opinion) the grand, and, in truth, the only security for the liberties of this country. But much depends upon the "mauners of the great," as certain classes are called in Europe, by whom I mean here those enjoying the confidence of their fellow citizens, to put that security in some degree of hazard, by undermining it. it therefore becomes us, the "cominon people," of whom I am ose, to watch every movennent of such with singuliar care, and compel them to wear the semblance of virtue and plainness, whether they possess them or not, that the force of example may have its effect. It is rarely indeed that thave felt imyself bound to notice the conduct of individual--the Wefley Register has endeavored to lay down, or disseminate, principles that every one might apply for himself; but so it was in this case, that the principie could not be well stated without involving the naine of a person. And on the whole, thonght the accounts of Mr. Russell's marringe, which we received as ucknowledged tryths at Boston, inay have injured that gentleman unfairly by their csaggerations, still, we believe, the public grood will be subserved by the notice that has been taken of them.

\section*{Almeida's Case.}

Our rearlers will recollect that captain Almeida, commander of a Buenos Ayrean privateer, was arrested and committed under the anthority of the state of Maryland, on a charge of piracy-released by the judges af Balthonre county court, deciding that the case dha not cume urder the cognizance of the authorities of this state-and again arrested on the same charge by authority of the United States, antel heta to bril.

The grand jury of the circhit court of the United States, sitting last week in Baltimore, found a bill whatiust him, and he was tricd on Thursday the 8 h lustart.
"Aficr a foll and claborate investigation of the merits of the case, wherein the traty betwoen the United States and Spain was more particularly the subject of discussion, the charge in the indictment L.aving been predirated on a elanse containcd there. in, captain Almciula was, by direction of the court, tilscharged. On this oceation judf ge Durall perfornsed the illties of his high station with unubnal ability, and ceilcidated thic puints of the ease in the moit able, luminouts and impressive manner. \({ }^{\text {N }}\).

\section*{William Coblett.}

Previons to his leaving lingland, puldished the following addrcas to tho pibitic, at Laverpool, Barch 20-
"My departure firs 1 merica will surprise nobody, but these who do not rether I fill and explicit statemett of my reasons vill appeser in a few days, probably on the sth of appol In the mean white, 1 think it necessary fo- me to make known, hat i bave fully empowered a perean of repectability to manage and settle ail ory aftioirs in Lungland. I owe my countrymen most sineere ayavl, which 1 shall
always entertain for them in a higher degwee the: ? towards any other people uponi earth. I carry nothing froin my country but my wife and mat chifdren, and surely, they are my own, at any rate. I shall always love Enigland better than any oitacr country; I will never become a subject or citizen of any o ther state; but, \(\mathbf{I}\) and inine were not boin undet a kovernment having the absolute power to imprison us at its pleasure, and, if we can avoid it, we will neither live nor die under such an order of things. If I have not taken leave of numerons fiiends in London and in the coluntry, it was because I stould have been made unhappy by their impnitunities, and the expressions of their sirrow. I make an cnormous sacrifice of property and of feeli:g; but when my heart feels the turs of friendship, and of all interesting objects in Hampshire, it is reennciled to the loss by the thought that I can enjoy thein only during the pleasure of a secretary of stale When this order of things shall cease to exist, then shall 1 aysa in see England.

WM. COBBETT:"
A A great many stories have been told aliout Mr. Cobbett since he lefi E:ggland, witich he refules in a New-York paper. He says that he had a clear in. come from inis writings of more than ten thruasiod foumals a year-alid that he expects to receive for this landed and other property 20,000 \&. He micheng in a few days to publish a prospectus of his fu ure literary labors-and in a P. S. in noticiag certain articless published in the New. York Evening I'ost, he says, though lie havdly ever made a bei in his life, lie will bet with the editor of that paper 10 ro dollars, "that the government of England, liat is to say, the governinent of the boronglunumgers, dives not last thrue years longer"-which Mr. Colcman declines - "for (the possibility of losing being admitted, as otherwise it would not be a f.iir bet) although the sum staked, might litlle affiect a fortune arising froon suchan incom", [as Mr. Cobbett states his to have been] it would be serionsly felt by the humble editor of the Newo York Evering Poss."

\section*{The War Tables.}
land and nayal battles, in the late with.
Our readers will recollect thas in the 9 th and \(10: 1_{1}\) volumes of this work, we published certain laborious tables, calcinlated to shew, at once, the general result of the chief battles fonght by liand or sea during the late war. Absolute correciness wus not affectect, for the very natire of the thing forbade the hope of it. They were, probably, as carrect as they easily could be; and it is imposesible that the gentleman who compiled thens should have willingly neglected the just ciarms of the western army, of which he himself, a zealous patriot, on two or three occasions, forined a part.
But we are thankful, even at thin day, for the currections and additional information afforded in the following conmmicationt; there is not, howcyer, so great a discregniney betw cen the facts stated in the tabies and thone furnished by it, receiving, as we cin, the latter to are entirely currect, as at the first glance appears, in respect to the affairs at Firt 1 lags (No. 8, in the table, yol. X.p 151)-the desifin of the compiler hating been only to shew the frice of the kortic unter colonel willer auld of the eneiny opppased? to it. Our loss uniler culonel Dudley is also represented in the lables as b ing greater than it was, and there is a difference, in both sides, in fivor of our arme, as to the firess engaget on the Thames.

The cortmanication is interesting for present use and of gre:t value :o history, and we repeat our 11. Fs to the very respectiable gentleman who firnisfitd it.
". Hy attention has been clirected to a table, pub. lished in your 10th volume, [pages 154-5] shewing the recult of the land battles fonght during the late \(1 . \pi 1\). Having entered the service as a volunteer at i's commencement, and returned at the peace as an inspector keneral in the United States' army, I feel my self authorised to suggest some inaccuracies which have occurred in your estimate of the relarive loss at Fort Meirs and upon the Thames.
"You appear only to have given the force and re. sult of the sortic under colonel Miller, when a consid rable number were disabled in other sorties and during the siege. That detachment consis ed of 350 nien, and carried two batteries defended by 350 Britis' and 400 I dians: so gallant and warm was t.e contest, that in fifteen minutes, 186 were kulleci and wounded on onf side, and it is well ascertained that the enemy suffered more severely. Inct.ed, candid nicn acknowledge that, upon a compration of the furce and the loss, it was the hardest frgizing during the war.
- Colorrel Ducley's ctetachment consisted of 300 : 170 of them reacised Firt Meigs; about 45 were killed i: the actim and wantonly massacred in the S. ugliter Pen, at the Old British Fort. It is now ascert tined that 30 or 40 were taken by the Indians and buve since returned to their friends. The whole force of the enemy besieging Fort Meigs coassisted of 500 regulars, 800 militia and 1600 Iadians-total 2900; whereas your cstimate gives them 350 regulars and militia and 450 Indians.*
"In the battle of the Thames, the most correct informin ion estimated our force at not more than 2TVO)- 120 regulars, 800 or 900 of Johnson's regiment, ard from 1500 to 1800 of govemor Shelly's rolunteer \({ }^{\circ}\). The force of the enemy consisted of 700 regulars ad 2000 Indians- 600 regulars were captured, 12 killed and 22 wounded: but a very material resti): of this "bloodless victory" you have entire!y nuitied. There were not less than 40 Indians fnund upon the ground, and no doubt the usual prupurtion wounded. With the exception of a similare loss at "ippecanoe, the N. IV. Indians have never, in the listory of their warfare, suffered so severely. In the decisive battle fought by general W. me, 201/ Angrist, 1794, at the Miami rapids, 2hd in tiat fingli at the mouth of Kenhawa, 10 th fichior, 1-īt, from sumrise to suset, there were ouly 19 Indiais fomm upon the ground; and there "is \(1.0 t\) hatf that momlere killed in either the defast of Hamar or St. Clair."

\section*{Canals.}

Sir-Observing that the proposed Delaware and Raritan canal is noticed in a lite Refister, 1 scud wilh this a copy of the report of the commissioners to the legistature of New Jersey; as you may, probably, be cresirtus of seeing the plan at length. Aff error is maning throush the different newspapers relative to the clevation of the proposed canal abowe the ride watcr; it is stated to be 136 feet insteal of 08 feet- 135 fect is the aggregate amount of the assent from the ide water to the catsal at one of the rivers, and of the descent foom the canal to the tide watcr at the other river.
* Alluding only to the force, we presume, which opiosed that under colonel Miller. Ed. Reg.

The report contains a statement of the objec: tions to the old mode of using the beds of streams with connecting cuts and locks, and to the moro recent mode of pursuing the vallies of streams with canals adjacent to their barks; a detail of the adlvantages resulting frum a level canal, if practicable; the proportions and dimensions of a canal suitable for the proposed navigation; an estimate containing the details of the work which may be necessary, and the probable expence of each iten; and a number of useful hints relative to the construction of canals, the plans of locks, and the supply of water. The information and observations are applicable to many other places in the U. S. where cantals are in contemplation. A hint is also given on the employinent of the military on the canals; a plan esteemed preferable to the project of reducing the establishment.
The great national advantages attending a genc. ral system of inland navigation in the U.S renders it of the greatest importance that the public attention should be excited, and that the subject should be thoroughly discussed and understoad, before the plan is determined on, and the busimess commenced; on this account the rejection of the late bill for internal improvements before congress, is a fortunate circurrstance.-Divisions of the appropriation, and separate plans of work under state authorities, would tend to defeat the arrangement of the system for national purposes.
If the business is not marred in the outset, the time may come, when the policy and practice of China may be realized in the U. S. and our inland commerce employ many of our merchants and sail. ors; and manufactures, by an interchange among ourselves, will afford double national profits.

A vessel may depart from the seat of government at Washington, ascend from the Eastern branch to a level canal* on the New-Jersey plan, fed by the Patuxent, proceed to the banks of the South river, descend to the Chesapeake, touch at Baltimore, Philadelphia, New-York, New-Haven, and Boston, pass on to the Merrinack river, and from thence into New-Hampshire, and, perhaps, Maine. The vessel may then return to New-York, and, ascending the Hudson, enter lake Champlain, visit our northern houndary in 45 degrees of latitude, and return with the water of lake Champlain to the Hudson; ascend to a canal fed by lake Erie, and approach our Mediterranean seas, not by the proposed route through Rome and the Cayuga marshes, but by a canal preserving a flow of water fiom lake Firie to the Hudson, and pursuing nearly a level, south of the Cayuga and Seneca lakes, on the grounds diviling the waters of the Susquehanna from tise streams of the ILudson and Ontario. From the port of lake Eric the usual route may be observed by Detroit and Michilimackinack to Chicage; from thence by the Chicago and Des Planes rivers, or by canals in their vallies, to the Illinois. and hence to the Mississippi and descend to NewOrleans; thence, inland, by Mn!ile, to St. Mar'y's, and thenice through the Atlantic states of Georgia, Senth Carolina, North Carolina and Virginia to Washington the place of departure; perforining an intand national voyage of above 5000 miles, and traversing an extent of 15 degrees of latitude, and nearly 20 degrees of longitude, in the most delightful part of the temperate zone. Such are the facilities to ellicet at a moderate expence a completion of the projected route, by an extension of in-
*Consider the importance of this canal to every part of Maryland.

Iand navigation unknown in the ancient hemisphere, that it is estimated the fotal cost will be less than eighteen million of dollars-indeed on compuling the parts separately, t!!e amount is little more than 16 millions, leaving nearly 2 miltions for comtingencies.

Inland navigation may also be introduced in the vallies formed by the great ridges of the U.S. and a canal \(m\) y be constructed between the north and south motntains, from the vicinity of Newburghon the Iudson, through New-Jersey, Pennsylvania, Maryland and Virginia, by Teinessee or Norih Carolina, to Alabama or Georgia; through as rich a valley as any in the world, without the obstruction of a hill, or the necessity of a tunnel-The rivers Delaware, Schuylkill, Susque!ıanna, Potounac and James, may in part be directed from their beds at their respective gaps of the South inountain, and leis by cinals througll other districts, dispensing the bencfits of inlard narigation and irrigation \({ }^{*}\) to the urid plains below.-Canals may also be constructed from lake Erie to the Ohioriver, and from the Erie and Hudson canal to Pennsylvania and to lake \(\mathbf{O}\) riario, effecting an inland navigable communica'son sith every state in the union

Much more might be added, but I have already exceeded my limits. I sat down merely to correct a typographical error, and I have taken you a voyage neariy tire extent of the inhabiled parts of our republic-If I succeed in exciting the attention of an able and popular editor, and through him the public, my montives will be answered, and the thonghis of the nation directed to objects of the greatest public utility and importance.

Placing the foregoing at your disposal, for sepafate excracts or paragraphs, of such parts as you may tiints proper,

I am, sir, very respectfully.

\section*{Ad valorem Duties.}
treasulit nepantmevt, 7 th .May, 1817.
Sir-A general impression appears to prevail in all tic commercial cities, that frauds upon the revenue are commirted to a considerable extent by invoiciug merchandize, paving an ad-valorem duty, whicu cusis less thau twenty five cents the yard, with those which exceed that price, so as to produce an averate value above twentyofive cents the yan], whel thereby intruduce coarse and cheap fabrics wit out paving the duty contemplated by the tariff. Acent ling 10 the nome impression, frauds of a more Elarng nature are frequisently committed ilpon the revesue, especially in importations on consignment, by tre introduction of articles not described in the invoices, which from the imperfect manner in which the inspretion of the packages are made, cscape with impunity.

It is possihle that this iropression may not be correct to the extent that it has been made, but it is believed that a dete regard to public opinion upon this subject, requires that a more rigid inspection than has heretofore been made, slould be atsempt. ed with a view to detect the frauds which are supposed to be practiced. It is thercfore proposed:

1st. That a proportion of the packages which

\footnotetext{
- Monsieur de la Londe speaks of the canal de Provence, which takes the waters of the Durance to Aix and Marscilles, being 110,000 toises long, and of the irrigations by its bringing in a million of livres a year. Jes Canaux de Navigation, folio, 1778 -p. 175, 181. Young's travels in France vol. 2nd, p. 176, Irrigation.
}
contain grods subject 10 ad-valorem duties, shall be selected from each invoren by the collew r, which shall be strictly ins;jected, with a riev in letect frauds which mav be attemy - : by ?:.t: ins in the same invoice goods of areater and less puice than twenty-five cen's the yard.
21. Thrit a certain proporion of makur s piying specified duties be clesignated if il: il ammer by the collec'nr, which shali be tharon ryll examined fur the purpose of detecoing any oll empt which nay be inade to smugirte any suticles not described in the invoice.

3d. That the proportion of packages to be de signated by the cullector on importations upoit consionment, be domble the number when the porson - in enters them is the owner and importer.

41 i. That in all cases of comsinnment the preckages designated shall b lorlged in the public warehouses until the iaspection be marle.

5th. That every importation shall be deemerl to be upon consigninent unless the persun who inikes the entry shall expressly negative the fact in oath of entry.

In order that the inspection directed for the puepose of detciting frauds of the first kind may be skilfully executed, the inspector whose habiss and information qualify him for the disc'rarge of that duty and in whose judgment and fileli:y you have most implisit confidence, sliould be exclusively enployed for that purpose. Slinuld none of the inspeciors uow employed be consilered well qualified by you for t!is service, you arc anthorised to select one specially for that object, and report him to this department.
\(A\); it is an object of importance that the revenne system should be rendered as perfect as possible, and that every aticmpt to evade the provisions of the existing laws should be known, you are request. ed in communicate to this department every circumstance of that hature, accorpanied by s'isres. tions of the provisions necessary to repress the evil.

I am mast respectfully, sir, your very wberlient servant,

WM. II. CRAWFOIRI).
Janers H. M'Culiorh, Esig.
Collector of Balsimore.

\section*{Custom Houst, Bafttmore, \\ Colleeter's office, ilfuy 19, \(18: 7\)}

Sir-I lave been fivored this morming with your letter of the 7 th inst. on the subject of imported cottons less than 25 cents cosi per yard.

The supposition in your letter as to the impressionsunder which representationsof fraululent procecdings in the case have been made on the de. partment, is most probably well froturded-That is, that the apprehensions have nvergone live real misclealings in this instance. It is trite, ther time has not been sufficient to allow all the arrange. ments which mirht perhaps be conceived to clude the intention of the law. But I hrave thin satisfac. tion to report, that nothing las appeared lirie in countenarice the suspicion in a single instance - Not an invoice pre ented to us, but liss been cleas and specific in this renp-ct; nor is anv thig mort due to the mercantile body in lialimore than a declaration from the officers of the customs liere, that sucli a corrcciness of transaceinu appears in theirdcalings relating to the revenue, as cannot be exceeded in any place, and must be e te med a lappy state of society wherever it is cy-alled. Scarcely one, in whom the name of mercliant is properly attributable, lias in a tucc +hint of years incurred the censure of the office here fior a failure in the obligations allisded to - On she countrazy, the
instances are numerous, of declarations of goods find beyond their accounts subsequent to entry; of arelnifulishment of discounts previnusly allowed, and of \(c^{1}\) arises becoming known after recciving the grools .filetel, as well as irregularities in the pro credings of treir comespondents, and that to no i enishler ble amount fiequently. Yet the surmises of dithe, cut conduc: have very ofien been made, in a w? mor or less general or particular. As we do nit feel otirsulves at liberty to slight any well uppeazing information, we lave of ien with much winint and unple santness to the owicer and parties, cyetrica! the most rigorous duties, and tried the temper ant patience of many, rarely finding any 1! inh I ut a compliant and just disposition towards the law anc! its agconte, even in the cases palpably misunc!erstoo!, or misrepresented. Such, indeed, should be the very cases in which a free submission to ex mination ought to take place, but it will not alwas be so, unles; a gond disposition and sense of propriety prevaits - The natural pride of honesty rises against it, tud the affectation of this virtue stiil more.

The directions you have friven will be carefully attended to, in their several branches, and such a proceeding adopted, as we hope will fulfil the public expectation and facilitate all the transactions of cor:merce subjected to it-[but unless some mode more expeditious than that prescribed in 66 sec . of the collection law is pointed out, equally safe for the collectnr, it will be a work of difficulty; though \(I\) am sure the mercliants will acquiesce in any reasonable measure.]

I am, sir, your ob't serv't,

\section*{JiS. H. I'CULLOCH.}

\section*{Hylliam II Craueford, esq.}
[1. is well obscrved in the Federal Gazette that -"The answer of the collector of this port to the let er of the stcretary of the treasury which will be found in this paper, is as highly honorable to the wriler, as it is to the reputation of the merchants of this city. From such an officer, a correct mercl: n. las nothing to fear, and may expect every facility consistent wilh his duty. To such an officer, every correct merchant will give all the information and asisistance that may be useful and tend to render the parformance of his official duties casy and agreeablc."]

\section*{Treasury remittances, \&c.}

New Yonk, May 8.- The following highly important circilit, from the secretary of the treasury to the district jud! bes, was read on Tueaslay momiing at the opiening of the district court in this city:-

\section*{circular.}

T-pensury department, Affril \(3,1817\).
Sin-Doubts having auisen whether, uader the act providing fir mitigating or remitting the forfeitures, penalties an! disabilities accruing in certain cases thercin mentioned, passed the 3d day of March, 1797, the secretary of the treasury can rightfully exercise the authority therein conferred, after the sentence of Whe district court has been executed, or after a cause has been withdrawn from it by appeal or writ of error, the case has been referred to the attorney-gencral, who has giveti an opinion adverse to the exercise of this puwer under such oircumsititice. As this opinion is understood to be coincilent with thitat of the judges of the supreme cuult of the United States, I have deternined to bo guverued by it. My respect for the judges of the distict courts, and my desire to re-
lieve them from the trouble of making summary ex. aminations, were no practical benefit could be dcriverl from them by the parties, induce me to make this comnunnication.

This iuformation may, also, be highly useful w the parties thenselves, who will in future, apply directly to the treasury department for relief, whera the violation has been unintentional. In all cases where the court, upon hearing the evidence, shall be of opinion that the case requires or justifies the interposition of the secretary of the treasury, it is expedient that that course should be suggested, and that the postponement of the judgement of the eourt necesary to make the application should be granted.

1 have the honor to be, very respectfully,
Sir, your most obedient servant.

\section*{To the hon. Wm. P. Vax Ness.}

\section*{Foreign Articles. \\ england, \&c.} London papers of April 12 .
3 per cent. cons. April 8, 73 5.8. They have been subject to great fluctuations of late, rising and falling suddenly.
Lord Cochrane has bought a fine vessel, nearly as large as a frigate, in which he is about to take a voyage to South America.
The British ministry are stirring up the lagging service of their members of parliament by urging their attendance, in printed circulars-so shame. less has the prostitution become.
The price of bread stuffs has considerably declined, in consequence of the prospect of great crops on the continent.
The royal assent has been given to the bill for preventing "seditious meetings." There has been a disturbance at Carlisle; Manchester was quiet: bitt a Liverpool paper publishes an account of a plot discovered there to burn down the whole of the manufactories. A design appears to have existed to desiroy the town of Ely by fire. The people are mad with suffering. Their distresses, however, are said to be declining. There are many mobs in Ireland; which, appear to have a sole object of getting provisions. The burning of several farming establishments is mentioned.
The official report states the cost of the civic entertainment giving to the prince regent, emper ror of Russia, king of Prussia, and duke of Wellington, by the corporation of the city of London, to be upwards of 24,0001 .
We have a brief notice of the first report of the select committee of finance to parliament. They propose the total abolition of many officers whose offices have died many years ago, and the reduction of many nthers. There is room to do a good deal in this way. A treasury circular las issued recommending that all persions in official situations, receiving more than 10002. a year, should give up a tenth part of their salaries for a limited lime-There is a talk of levying a tax of 20 per cent. on the incomes of absentees. Emigrations to Canada are encouraged by the British government, by grants of land, \&c.
The British army is said to be reduced to 121,035 men. The slips in commission are very few.
The marguis Wenesley, brother of the duke of Wellington, in a debate int the house of lords, called lord Liverpool an "insolent man." There was more candor than conrtesy in the expression.
The venerable can! of Duchan gave a splendid.
entertaiument to the Americans pursuing their stu dies at Edinburg on the 22d of February, in connme moration of the birth day of his friend, H'ashington The earl is about 75 years old, hale and hearty, and on this occasion wore a mantle which hatl covered the illustrious dead.
Locke's treatise on government has been expell ed from the college conrse, by the trustees of Trinity college, Dublin. For one hundred years admired, it is now discovored to have too liberal ideas for the times.

It seems agreed-at least, is sn given out by the British government, that the late insurrection at Manchester was a part of a very extensive systern, for a general rising of the people. It is said that they intended to set fise io the buildings adjacent to the town by means of Congreve rockets to attract attention, while they attacked the prisons, banks, \&cc.
A young, and beautiful woman lias been thrice nogged on her naked Dorly, tlurough the streets of Invanise, for drunkenness and disorderly behaviour th the streets.
Birmingham in England, is supposed to have 19,000 louses and 110,060 inhabitants There are also 1,500 houses uninhabited. The outcast poor were 20,000 , besides hundreds in the poor houses.
Lately died in the Fleet prison, poor old W'illiams, after an imprisonment of 34 years, on all alleged contempt of the ligh court of clancery.
The total receipt at the Dublin custom house on the 1 st of March was only 91.6 s. 11 d .
The following is an extract of a letter just received by 2 gentleman now of Baltimore, from his friend,
a meinber of the society of Quakers, dated Shrews.
bury, (Eng.) 3d mo. 24th, 1817.
"I anglad to hear you all got safe to America; that thou givest so good an account of it gives me pleasure. We are ready for open rebellion here, and expect it in less than two years. Tlie poor are amused by making a few improvennents [on the rnads, 3c.]-the young men get 6 s. per week, and shase with two children or noore, get \(9_{s}\). Titey are emploje only two weeks at a time, and then starve (wi) weeks or go into the work-house, which is next (1) it."

Iomulon, April 11.-On Friday, an exhibition of the sale of a wife tork place at Dartmouth. A brute of 2 fellow dragsed his wife to the public qquay for sale. She luad been married about a twelvemonth, is not yet 29 , and could scarcely be sustained from fainting as her unworthy husband dragged her along.She, was purchased for two guineas by her first sweetheart.
I'rotest on motion for the third reading of the sedicious sociely bill, March 23, 1817.

\section*{Digaentikist.}
because it appears to us that this statute, in inflicting the penalty of death, is injustly severe; that it gives 10 magistrntes a formidable and unnecessary power, improperly controling the gencral expues. sion of opminn, and interfering buth with the pub. lic and private meetings of the people, in times of which we consiler the danger to be much exayge rated, and which we think call for measares of conclliation and relief, and not for cuertion.

the Americans at Paris cricbrated Washiugton's birthada-among the invited guests were general

ثf yette, D. Parish, \&cc. Mr. Hughes, of Ealtimore, presided. Among the toasts drank one is printed thus, "The - of France." When general la Fayette's hiealth was drank he rose and feelingly said-"While I most gralefirly enjoy these testimonies of your friendship, permit me to receive them as a token of remeinbrance for that old ariny of American brothers, who had to boast of a Wiasli. ington as their paternal chief; it is in the name of the surviving veterans that I berg you to accept our affectionate thanks."
Marshal Massena, prince of I:ssline, lately diect at his hotel in Paris. Bomaparte used to call this distinguished chieftain "the forthnate."
France, except for a litule "factious spirit" in Paris, is spoken of as entirely tranquil.
Many French prisoners yet remain in the interior of Russia, subject to the severest hardships. It seems that they are about to return-but a column of 700 then returning, lost about 400 of their wur. ber by the hardships of their journey!
Some accounts say that the king of France is very ill, and hint at his speedy dissolution.
It appears from a speech of the duke of Haguea that the French army scarcely consists of \(20,00 \mathrm{~J}\) fighting men.
Manuscript copies of M. de Montholon's letter to sir Hudson Lowe circulate, and are read with avidity in every society in Paris. They dare not print it there.
Marshals Macdonald and Victor appear hiehest in favor at the court of Louis. It may be well here to mention that it is a Neupolitan general of the name of Macdonald that is reporled about to mary Mad. Murat.
mosaparte.
There is a report that the emperor of Russia is interesting himself to procure the removal of liona. parte from St. Helena to Malta. There is no proo bability of its being true.
A vessel just arrived at New Vork from C.alent:ta was telegraphed sixty miles disiant from St. Helena-and being boarded by "his majesty's brig" Leveret," as the New. York papers have it, reccivrd information that Bonaparte had grown very fat, and kept himself very close to avoid the curionity of strangers.
Hresh provisions were so scarce at St. Helena that a joint of meat was regardsd as a great luxury on a general's table.

\section*{splis.}

The want of rain is severely felt in some parts of Spain. A letter from one of our naval ufficers nt Cadiz says, "procecssions are often met in the streels invoking the same whuse business it is to fitmish water, to give them a supply."
The disputes between Spain and Portugal, thourh the king of the former has just married a daughter of the latter, appar in be serlous. The garrisons of the frontice fowins have been increased, and hos tilities seem expected. Spaln appears oflended with the conduct of l'ortugal in laking possesiten of Moute Video, \&e. and Portugal complains that certain parts of her Eurgpean lerritory, wrested from her by Bouaparte, are retained by Ferdinand.
We liave at accumit of the books probibi cil in be read in Spain-some of them are delomencel for being prejurlicial to the "huly olfice"-as the angai. ailuon is impriously called.

The Spanish state prisoners, who have been removed from Centa to une of the Balcuric Islands, are accused of a plot for obtaining possession of the foriner place by surprize,

italy.
Lucien Bonaparte has applied to the pope for a passport fior the United States. It was not known if it would be granted to him.

Maria Louisa lives in great splendor at Parma.
The grand Turk refises to acknowledge a fiction, and has given offence to the British by declining to say that the Ionlun islands are independent.

The celebrated sculptor Canova has had the tithe of marquis conferred upon him by the pope, to which is attached certain privileges. He is said to have as much work bespoken as would occupy him for 50 years.

\section*{SWEDEN.}

A conspiracy is said to have been detected for destroying the crown prince, Bernadotte. It seems to have strengthened him in the good opinion of the people-if the accounts are to be believed. The son of fustavus, who was set aside to make room for him, lives with the king of Wirtemberg, who is his cousin; he is also a nephew of the emperor Alexander, and spoken of as an accomplished young man. He will, probably, in these "legitimate" days yet mount the throne of Sweden.

\section*{rússia.}

Lieutenant Kotzebue, commander of the ship Rorik, has discovered on his voyage round the world several new islands, which he has named Romanzow's, Speridow's, Krusentern's, Kielusow's and Suwarrow's islands.

\section*{AFRICA.}
F. We have fresh reports of the hostile dispositions of the states of Barbary towards Europeans. The dey of Algiers is stronger than he ever uas, and already has eighteen armed brigs, which are daily exercised in the harbor.
mexico.
We have a report, by way of a letter from New. Orleans, that Apodaca, viceroy of Mexico, has declared limself independent, and has an immense force arrayed to sustain the declaration. There are reasons to hope that this report may be trie.
In the late debate in parliament (says the Richmond Enquirer) Mr. Ponsonby enquired whether "the representations and remonstrances of the Spanish A mbassador (in regard to our conduct as to the South American colonies, ) had been seconded by the English minister in the United States." Lord Castlereagh managed, as Mr. Ponsonby said in reply, "to elude the question." But will lord C. pretend to deny that Mr. Bagot did make some represen ations to our government-that he was so absurd as to suggest that the British court could not be satisfied with any interference on the part of the United States, which should contribute to the aggrandizement of the United States.
south-america.
A patriot privateer, called the "Galveston," has been captured off the Havana by one of the royal vessels-her crew consisted of 44 men, "only 17 of whom were saved (says the official account) by their obstinacy in attempting to escape."

We lave it reported that the royal general, the bloody . Mor illo, has been defeater in the valley of St. Jose, and is dead of his wounds.
Speaking of the Brazils, the editor of the Essex Register says-"The superstition of Portugal has been proverbial. One fact may explain it. In the war of the Spanish succession, the troops of Portugal elected St. Antony for their general. The king, Don Pedro, made out his commission and his pay.

This saint is still commander and chief of the ariny, and every year receives in his church his salary from the king. The imare of the saint is borne in solemn procession, and has the prostration and homate che to lus. commission paid to this emblem of his presserice and of his power"
wJ If St. Anthony commands for the king, the "rebels" have :1o hope!

A Paris paper says-The tea-plant has been naturalized at Rio Janeiro, under the particular cate of a number of Chinese, whom the Portuguese government has invited thither for that purpase.

It is intimated in the . Nittional Intelligenerr, that the people of the adjoining provinces had not supported those of Permambuco, that the port was blockatled by a strong Portuguese force, \&ic. But later accounts, perhaps, than any that could lave heen received at Washington, from St. Salvador, inform us a brig had sailed for the purpose of blockading the port, and that two other vessels were fitting for the same purpose; but add, that the people of that district, though they had not yet openly esponsed the cause of the revolutionists, obeyed their government with reluctance, and it was thought that the whole of that part of Brazil would follow the example of Pernambuco. Success to them.
It may be well to repeat that a revolution in Brazil was culculuted upon by the Buenos Ayreans.

The provisional government of Pernambuco founn 800,000 dollars in specie in the royal treasury, which Wey unceremoniously appropriated to patriatic purposes, as their owns
hay'tr.
A French frigate was lately off Cape IIenry. A letter sent in, addressed to "trineral Christophe," was returned by his sable majesty, unopened.

\section*{CHRONICLE.}

Jorfolk, May 7.-We perform a painfui task in announcing the destruction of the Buenos Aryean armed schr. El Atrevido, by the explosion of her magazine, on Monday last, by which 23 persons including all the officers except the boatswain and two mosters mates were instantly launched into eternity!-It will be recollected by our distant readers, tliat this vessel, in company with another, a brig called the Independenciu, also under the Patriotic flag of Buenos Ayres, put into this port about two months ago. Here they remained about six weeks, and then attempted to get to sea, but the wind being a head they conld proceed no further than the tail of the Horse Slioe, where theycame to anchor in \(4 \cdot \frac{1}{2}\) fathoms water and about mus. ket short distance firon eaci other.
On Monday last the captain of the schr. dined with the commodore on board the brig, and was standing on the quarter deck (about 6 o'clock \(P\). M.) in company with the commodore and officers, looking at the schr, at the moment she blew up.The explosion was terrible, and the schr. alnost instantly disappeared. Boats were immediately sent off from the brig to save those who might be alive, and succeeded in rescuing 33 who were all that survived, three only of whon were injured, and those but slightly. From the account which thesc men gave, it appears that the gunner had, contrary' to a standing order, opened the magazine, and while he was at work in it, the lieut. of marines called a sergeant down into the eabin to pick him out a pair of pistols from the arm chest, in doing which the pistols were severally suapped, by way of trying them, though the officer of the deck was heard to forbid it. What followed is unknown, and it is merely conjectured that one of the pistols snapped

Right have been loacled, and the conte is Cel dentally disc argel into the nagaziac. The whole of the vessel abaft the invil mast was literally blown to atoms, thot:rh both masts remained unmoved.

We regret to add that the pilot (the elder Thomas of Hampion) and four young inen, residents of this lown, were on board at the time, and are among the number of the killed.
Commodore Chaytor has very lumanely made a present of the remains of the schooner to the vidow of the unfortmate pilot, and his men are now employed in saving whatever is of any value for her, wi ich will amount to something handsome - Merald
- Montreul, C. April 23.- Persons supposed to be dearl are frequently buried with a haste that is highly reprehensible. This blameable precipitation has often been fullowed by the most shocking and disgasting consequences; it has frequently happened that persons supposed to be dead (but who in reality were ouly in a state of lethargy, have come to life without being able to obtain light, and perish ed in convulsions and despair, as the subsequent inspection of their bodies has proved. Repeated remontrances have not had the effect of preventing the pernicious custom of burying the dead, the moment that the breath is supposed to be out of the body; it is customary to wrap up the corpse with a sheet which is sewed from head to foot in such a way as to prevent the admission of air. The following is a recent and tervible example.

A man named T'eseier, of the parish of Saint Anne, in the district of Three Rivers, supposed to be clead, was carried to cliurch about twenty-four hours after, where his funeral service was perform. ed, he was then placed in the charnel house, "which is the ordinary custom in the country during the winter. About cistht days after, it became again necensary to open the charnel house, and the cuffin was found open, the feet were out, the hands were torn, the left hand grasped into the right shoulder, and the body was turned upon the right side.

Almost every vessel from England brings more or less passengers-the current of emigration is bteady, and of very respectable classes.

The distinguished Frenchman, who arrived some monthis since at Boston, and supposed to have been marshal Soult, is now said to have been the duke of Vicenza, Caulucourt, who has taken up his residenceat New-Oileans.
The arrivals of veasels, from Fingland, France and the West Indies with "lots" of specie are daily announced. We cannot suppuse there is any real scarcity of the precious metals in the United States at this time. Though our banks ostensibly pay specie, it is almost as rare as it was some monthy ago to see a dollar. "Paper does the bu ness" still, and yet the banks are said to be "puliing and hauling" their customers to the utmostfrightened about something.
- Vicual-The Spark was at Gihitraltar about 35 days ago. The Washington and the Dutch squadron was oll a cruise off the Barbary coast.
The U.S. brig l'rometheus and schar. 1,ynx are ordered from Boston to Philadelphia, with a crew to bring the I'ranklin 74 to the former, to be equip. ped for sea.

\footnotetext{
- The name of Clarnier (Charnel house) is given in this country to a large commongrave, where the deat are put iluring thie winter, so as not to dig a grave for eact bodly.
}

A line of battle ship, and a frigate of 44 guns, are ordered to be built at Portsinouth, N. H.

Connecticut.-The votes for governor have been officially counted. For Mr. Wolcott 13,\(655 ; \mathbf{M r}\). Sinith 13,119; scattering 202-majority for Mr. W\%. 334 The legislature is in session-Charles Deanison was chosen speaker by nearly aff the votes of both paries-but the choice of clerks was made a party matter-the republican candidates had 98 , the federalists 95; 3 rep. members absent.

Whode Island.-The legislature of this state is in session. The ascertained majority of votes in favor of Mr. Kinight, (rep.) for governor is 68. Itepublican senators, lieut. governor, treasurer, attorneygeneral, \&c. are also elected by an average majority of about 80 to 90 votes.

The steam boat, built at Sackett's-Harbor, succeeds on lake Ontario, according to expectation. The first vessel, a schr. of 60 tons, arrived on the 21 st mit. at a new port and village on the lake, called Carthage. How great will be the commerce of these inland seas, when they are united with the ocean!
Internal resources.-About a mile from Cumberland river, 80 miles above Nashville, after boring 60 feet , an abundance of water so saturated that it will not dissolve salt, is found. It rises in the wells to within 4 feet of sine top of the earth; 10 bushels of water make 1 of salt.
Monument to Washington. Measures have been taken in Virginia to carry into effect the resolution of the legislature for erecting a monument to gen. Washington. Gentlemen have beell appointed in the several counties of the state for the purpose of receiving the voluntary subscriptions of the citi-zens-no person in his own name is allowed to subscribe more than 20 S .

Siavianuah.-13y a late censtrs, the population of Savannalı is ascertained to be 7624-about one half more than it was in 1810

Bank of the U. S.-The 3rd instalment, payable on the 1 st of July next, is called for by the president and directors of the bank of the United States.
Col. Croghen has recently married Miss Livings. Lon, at New York.
The following is the result of the election for representatives to the fifteenth congress, in Virginia. Those in italic are reputed federalists, the rest are republicans. Those with are new memhers.

AGGREGITE OF IMPORTATIONS - continued

\section*{Delaware and Raritan canal.}
[passed febbuaby 13, 1817.]
The commissioners, appointed by an act of the legislature, for ascertaining the most eligible route for, and the probable expence of a canal to connect the tide waters of the Delaware with those of the Raritan,

REPORT-
That in ascertaining the most eligible route for a canal to connect the tide waters of the Delaware with those of the Raritan, they have examined the plans and routes of canals heretofore proposed, and have considered the advantages and disadvantages which would respectivley attend them.
The first and most obvious plan heretofore proposed, was to use the beds of the streams intervening between the Raritan and the Delaware, to ascend the Raritan from the tide water to the first obstruction, and by deepeuing or widening, or by confining the stream to a narrower channel, to proceed as far as practicable on that step, and then, by a dam and lock, to raise boats to another step, to be pursued by deepening, widening, narrowing, or clearing, as before, until another dam would become necessary, and in the same manner to continue the process intil the navigation would arrive at the mouth of the Millstone river; to proceed from thence up the Millstone, erecting locks in the several milldams, and deepening, widening or clearing the channel, and placing other dams and locks where necessary, to the mouth of Stonybrook, and from thence up the Stonybrook in like manner, to the vicinity of the great meadows, in the township of Lawrence: here a comnecting cut would be made through the meadows of Lawrence to the Shippetaukin brancls of the Assanpink creek. This connecting cut would, on this route, be the lowest part of the ground dividing the waters of the two rivers, and would form the summit, or crown level, of the canal. The boats would be raised by locks to this level, which would be supplied by a feeder from the nearest strean of elevation; they would from thence deacen I by locks into the Shippetaukin, where a like process would be used, to enable them to navigate to the Assanpink, and down the Assanpink, by Lamberton, to the Delaware. In this route it would be necessary, il some places, to make cuts through in. tervzning low grounds, and to depart occasionally from the beds of the streans; the elevation of the atrmit level would be ubout forty-six feet above the tide water, and the whole distance would be slout forty miles. The route was viewed and levelled by several gentlemen, in the yenr 1804, who were of opimion that a comnunication might be spened btwern the fide waters of the Delaware and laritan, of at least three and a half feet in depilh.

This plan is lithle In oljection:
Fi-A. From the difliculey and great expence of Fumoving ohstructions in the beds of the Raritan and Dhistoue, which are formed, as far as Roch yhill, of red satish stonc, and its aecompang ing red shell. or w.ick.

Secon] From the precipitons, marsly, or cavernous banks of the streans, preveliting the cons ructon ant combinuzace of towing pults, therchy relldising the labor of menn necessary fur propelling boats instead of the draft of horset.

Third. Irom the dams acrons the stronms occasiowing back water on the acljacent ground, ilestroy. Hig the finer species of frasw, and getueratiog a niasina, affecting the bexlth of the inhabitants of the country.

Fouth. From the locks being placed in low situations, and therefore subject to injury and decay.

Fifth. From the cuts in the low grounds being liable to be filled by freslies, with sand or mud, or to be washed to an improper size or shape.

Sixth. From the unequal currents of the streams. which in some places, would require the labor of many men to stem their force.
Seventh. From the inconvenience of eight mills in the route, any one of which could at any time during the summer destroy the navigation, by using and exhausting the water of their ponds so as to occusion shallow water above, and to prevent the use of the locks.
Eighth. From the great distance of the route, preventing the dispatch so necessary to ensure a preference of conveyance and transportation.
Ninth. From the varying quantity of water at different times of the year. In dry seasons the water near the dams being spread over the wide surface of the bed of the creek, or river, and in some places over the adjacent grounds, great quantities would be lost by evaporation; and on the streams becoming low, the navigation would be obstructed by either permanent or shifting bars, and shallows, which would be often impassable for sevel al days or weeks; and in wet seasons tEs torrents of water after heavy rains wouk totally stop the navigation, displace the stones and walls constructed to widen or narrow parts of the water course, fill up parts of the channel, and sometimes destroy the dains and locks, and perhaps the boats. These contingencies would occasion great losses to the navigation, not only from the expence of removing sands and obstructions, replacing facilities, and rebuilding dams and locks, but also from the injury to the boats and their cargoes, the delay and loss of time, the consequent loss of toll, and the diversion of trade to other channels.

Another plan has been suggested, by digging a crnal in the valleys, and along the banks of the streams above mentioned, pursuing the level as far as practicable, and constructing locks where necessary: thus rising to the summit level, from whence the na. vigation to the opposite tide water would decend in the valleys and along the banks of the other streams, by the same process.

This plan is also liable to objections:
First. From the frequent occurrence of deep ravines and gullies, conveying small runs of water to the strean of the valley, occasioning expensive aquelucts, culverts, walls, aud embankments, which in wet seasons would bo subject to injury.

Sccond. From the adjacent strean overflowing its banks, in some situations filling the canal with inud or sand, and in other places destroying the locks and sides, and washing deep holes.
Thiel. Frow the irregularity of the valleys, high promontories and low hottoms often suceceding each wher, rendering the crossing of the strean frepuently necessary, by expousive aquedncts.
Fourth. From the rel stone atud other hard matter difficult to excavate, forming the balks of scveral of the streans.

Fifth. From the circuitous ronte of the naviga: tion

Sisth. From the number of locks which would be required at irregular distances and in incligible sitrations.
beventh. Aud, above all, from the almost insuperable difficulty of procuring a sufficient supply of water at the crowil level to answer the demand at the locks, for the passage of every boat to yr from the summit, and from thence to the tide wates.

Another route proposed was to make a cut from Lamberion to the Assanpink creek, and to proceed on the bed of the Assanpink to the mouth of Sto-ny-brook, as in the first-mentioned route; from thence up the Millstone to Devil's brook, up Devil's brotk to the head thereof, from thence across to 1.awrence's brook, and to proceed on the bed of Lawrences's brook to the tide watel of the Raritan. A third route proposed was to ascend Crosswicks creek to Doctor's creek, up Doctor's creek to the vicinity of Allentown, and from thence, crossing the Millstone aid other intervening streams, in the Menolopen, then down the Menolopen to South river, and down South river to the tide water of the Raritan. A fourth route proposed was to proceed from the Assanpink, near Wright's mill, to the Menolopen near Mount's inill, or Spotswoad. A fitth from Crosswicks creek to the head of Lawrence's brook, and a sisth from the head of Law. rence's brook to Wright's mill, on the Assanjpink.
It has also been proposed to dig canals in the valleys of the above-mentioned streams on the foregoing routes, in the manner specified in the second proposition.

It is obvions that many of the objections to the plans already examined, apply also to these; and that there are others still more forcible from the elevation of the ground, and the scanty supply of water; but in order to appreciate their relative merits, it is necessary to take a general view of the district of country through which it is proposed to effect an inland navigation.

In the county of Monmouth, there is a ridge of Highland, which, like the chief part of the district, is of alluvial formation. This ridge divides the waters of the streams running immediately into the ocean, from the waters of the streams runaing into the Delaware and the Rartan: the highest part is near Perine's and the Burnt taverns, in the township of Upper Freehold.

Within a circle of not more than five miles diameter, are the heads of Tom's river and Metetecunk, flowing into the ocean, of Crosswicks creek and As sampink creek, flowing into the Delaware, and of the Millstoise arce Sothth river, flowing into the Raritan. Although no actual measurement has been made, it may be safely asserted, that this spot is three hundred feet above the tide waters of the Delaware and Raritan; from hence the country gradtally descends in a northerly direction to the month of the Millstone, a distance of thisty miles, and where the waters of the Raritan are not more than thirteen feet above the idie water.

It is manifist, therefore, that the further we proceed from this circle in a northerly direotion, and the nearer we approach the minuth of the Willstone, the less will be our elevatio: above the tide water; but in our progress northerly, keeping in view the descended country between the Delaware and the Ravitan, we are stopped by liockyhill and the Sand hiils; the former, a part of the granite ridge, first appear's in the south-easterly part of Munterdon county, passes through the westerly part of Somerset conniy, permits the Millstone to pass in a northerly direction through a narrow gap between Kingston and Rocky-bill Proper, and lemmates in Middlesex county, near Dean's saw-inill, on Lawrence's brook, where it gives place to saud-stone and wack, which continue to New-Brunswick. The Sandhills are a detached mass of sand, of greater elevation than the terminating part of Kockyhill, and are si tuated about one mile to the northward of Dean's saw-mill. The sides of the gap of Rockyhill are of considerable elevation, with tittle soil. A spup
or branch of Rockyhill, but of different formation, extends from hence northerly, for several miles, on the right of the Millstone, forming its second bank, and contains sand-stone and wack, also of considerable elevation. From this view it is apparent, that we cannot proceed to the northward of the termination of Rockylill, and that the ground near this termination is lower than the ground to the southward of it, towards the sources of the Millstone and South rivers, and the Assanpink and Crosswicks creeks.
It is also to be noticerl, that Stonybrook, from its confluence with the Millstone to the vicinity of the great meadows of Lawrence, and the Shippetaukin, from its confluence with the Assanpink to the same great meadows, are sluggish streams, with very little perceptible fall; and that in the time of freshes, part of the water of Stonybrook is discharged through the grent meadows, by the Stippetaukin, into the Assanpink, from which it is inferred, that those meadows atre lower than the Millstone and Assaupink above Scudder's and John Mount's mills.
It will likewise be recollected, that a single foot of additional height of the summit level of a carial, gives two feet additional ascent and descent of boats, increases the expence of constructing the locks, produces greater delay, and requires more labor for the transit, is attended witis a greater consumption of water, and occasions a smaller supply, by placing the canal above the level of some streams, and nearer the sources of others.

From the foregoing objections to the old plan of using the beds of the streams with connecting cuts and locks, and to the more recent mode of pursuing the valleys of the streams with canals adjacent to their banks, and from a general view of the face of the country, it was proposed, as the plan of the Delaware and Raritan canal, that the lowest part of the ground, dividing the highest streams which would be intersected between the Delaware and the Raritan, should be ascertained, and assumed as the point of passage of the canal, which would be the highest part of the ground that it would be necessary to pass between the two rivers; that a level should be pursued from this place, and on this elevation, towards the Delaware and towards the Laritan, terminating on a high bank on the ticie water of each of the rivers, and that locies slionl be constructed at such banks for the ascent ank descent of boats, to and from the canal and the tite waters.

It appeared reasomable, that if this level could be pursued without meeting with hills or hollows, which could not be passed with inoderate digging or embanking, and if banks could be found at converient places on the tide waters of the Delaware and the Raritan, of the same clevation, or which might be made so, by moderate digging or emtranking, that great advantages would resith from the adoptiou of this plan.
First. The canal crossing the country on the surface of the ground, as nsuch water as may be rerguisite of all the streains intersecting it, may be turned into it by dams and feeders, constructed in and from those streams, at short distances above the canal, and the quantity of water supplied will be regulated by the gates of the feeders, the remainder of the water will fall over the dams, and pursue the old channels through arches or culverts under the canal.

Second It will not be necessary to conduct a feeder to the spot assumed as the crown level, as the whole canal wild be of the same elevation, but

\section*{NILES' WEEKLY REGISTER-DELAWARE AND RARITAN CANAL. 191}
the feeders may supply the requisite quinticy of water at any point or points between the Delaware and the Raritan.

Third. The canal being on a dead level the whole distance, its sides will not be subject to injury by the rapid flowing of the water, nor will the puddling be disturbed so as to occasion a loss of water.

Fourth. Heavy rains or freshes will not impede the navigation, nor injure the canal, as the quantity of water running into it will be at perfect command.

Fifth. There will be no difficulty in locating and constructing reservoirs for the whole line of canal, to be filled in the time of freshes, and to be used in dry seasons, to prevent any injury to the mills

Sixth. The mills and low lands on the streams will be benefited by the filling of the copious reservoirs, which will tend to diminish the height of the freshes, and to give a more regular supply of water in summer.
Seventh. The \(b\) "eatest drought will not prevent the continual navigation of the whole length of the canal from lack to lock, that is, from river to river.
Eighth. If by an increased intercourse, and the constant ascent and descent of large boats to and from the tide waters, there should not be a sufficiency of water for the locks in a dry season, without injury to the mills, modes may be adopted to transfer the freight of part of the boats to and from the tide waters to other boats, without any lass of water.

Ninth. Modes may be alao adopted to lessen the consumption of water at the locks on the tide water, by returning a part to the canal during the deocent of the boats, and to obtain a further supply from the tide water cluring the descent of boats or freights, and at other times by means of other maclinery.

Tenth. As in the usual mode of following the salleys of streams, the water imust be drawn out of the comecting cut or summit level canal, whenever a boat enters or departs from it; if the level extends only a short distance, a basin for the suinmit locks will be necessary; but if the canal exiends the whole distance without a lock, it becomes irself the basin for the locks, and other basips for that purpose will be unnecessary.

Eleventh There will be no delay in ascending or deseending locks at irregular dispances between river and river: bat the whole ascent or descent will be perforined at one time and at one place.

Twelfih. Only two keejers of locks, with theirne. celiary at tendaitiss, will be retulired to superintend the ascent or descent of bats; biss if there are fif. feen or twenty locks at liffercint places, as namy superintendants will be neceswary.

Thirteenth The locks will be builtat the tide waters of the rivers, where stone, lime, and other materials for their constructinu, inay be brought by water, intead of being carted into the country, at a great expence.

Fourteenth. A plan is nferel for considerntion fir ascenting or descendigg the whole heightst be theen the tile watars and the canal, by a siagle lock, oh a construction which will save a large pho portion of the water, time, and laboe whided woud lie regnired by the cummon mode for the same helfht.

Fifteenth. If the sum appropriated or sulberibed for the unlertakings, shoult be insufficient for the whole expence, the canal may be conpletel, atd used from the Dedaware bank, to the Raritan bank, withont locks in the first instance, and at a future period they may be constructed for te patiage of koats to and from the tite yater.

Sirteenth. The towing paths, being on a dead level from river to river, will form an excellent turnpike for carriages of a particular construction, during the winter season, when the navigation of the canai will be obstructed by ice.
Seventecoth. Mills may be erected on the banks of the canal, and the most arid part of the country mav be irrigated by the sumplus water.

Eighteenth. The grand trunk canal between the Delaware and the Raritan, being assumed as the New-Jersey level, minor canals may, at a future period, be constructed, branching off from it through most of the counties of the state, creating an easy, active, safe, cheap, and lucrative, inland commerce, by receiving the materials for agricul. ture, manufactures, and domestic economy and comforts, and by transmitting their multifarious products.

It being deemed expedient to ascertain the practicability of the last-mentioned plan, the cominissioners, in order to obtain an accurate knowledge of the country through which the canal would pass, appointed Mr. Randel to make a rap of the district on a scale of one mile \(t 0\) an inch, and to lay down the hills, valleys, swamps, roads, and streams of water, from such materials as it was in their power to procure; and tney appointed Mr. Erickson, a skilful mill-wright, to follow the several streams within the district, to observe the banks and currents and to ascertain the number of mills, and the number of feet of fall at each, to be inserted on the map by Mr. Randel.
By means of this information, and a tour througha the district in which the hills and streams, and the ascent and destent of the country were particularly attended to, it was ascertained that the lowest part of the ground dividing the streams intersected by a tine drawn from the Dealware to the Raritan, is near Longbrilge farm: from this place it was supposed that a level might be run to suitable banks on the Delaware and the Raritan, and that the proposed plan might be carried into effect.

Mr. Randel was appointed to rmu the Ievel, and a contract was entered upon with him, by which he engaged to pursue a leval line as far as was practicablefrom Longbridge farm to the I) laware, and io the Raritan, in the shomest direction that the ground would adnit, which line should be run with the greatest accurney, and lre esteemed the base line of the work; to aycertain the argles of elevation and depression of the surface of the earth, and the angles and distances of the courses of the line; to place monumental stones in the lasise line abont one male apart, and to have the height of every nobounent above the tide water accurately notcil; in give a section of the comntry at the distance of every half mile, at right angles with the hase line, and from furty to eighty chins ditave ficm the mame, nueth. :Nesintly thid south cabicrly, to sink shafis in them hase line, avcraging one for c very mile, aml sivfeet deep: to measure the quantity of water in all atrains intericesing of vunning near the benclise, by ase rlaining the antount flowing in eachatrain in cubic feet fer hour: 10 muke a map conturing a recton or pratile of the above levellat lines, the lobriantal scale of which to be me phomand feet is an inch, and the perpentientar ocale fify feet t" an inch; to make monlier map commining a hirl's ? \(?\) ciew of the ronise of the canal, mid cross as. \(:\) tions on a male of one thoisath fert 10 an inth; whd to lay down on it all useful matter to be ub tained white performing the survey, firr the diatome of one mile on each side of the base hime: sund to complete the general inap of the coustry betwecu
the Delavare and the Raritan, and three miles north west, and ten miles south-east of the Trenton ani Sew-Brunswick turnpike road; and to firish the whole by the first day of October then ensuing.
It will be observed, that it was intended by this contract to establish a base line of great accuracy which might also perlaps be the line of canal; that the monumental stones denuting the exact lieight of each above the tide water might, at any time hereafter, be resorted to, in running lines of level divergin? from the base line, to ascertain the height of places requiring investigation, as it was esteemed more proper to give scope to the professiomal talents of those practical gentlemen who may be hereafter employed, than to confine them to a particular course, being well aware of the propriety of the observation of Mr. Weston, that it requires the utmost skill of the professional engineer to determine on the proper line of canal, and that the success or failure of the undertaking frequently depends on this part of the work; that the maps, profiles, and sections, would furnish a general knowledge of the district country, and an accurate knowledge of the elevation and depression, topography and chorography of nearly two miles in breadth, of the most suitable tract for a canal ; that the shafis would ascertain the nature of the soil, and the kind of earth to be removed, information so necessary in order to form an estimate of the expence of the work; and that a knowledge of the quantity of water which might be procured from the different streams would show the size of the canal that might be constructed, and the extent to which the navigation might hereafter be conducted.
In pursuance of this agreement, Mr. Randel commencel his operations on tie fificenth of August last, by causing exploring lines to be run from Longbridge farm, in direct lines, to the tide waters of the Delaware and the Raritan, and shortly after began to level the base line from the same place towards the Delaware; but from the late period of commencing the work, the subsequent unfavorable weather, and other contingencies, he did not arrive on the banks of the Delaware until the tenth of October, when he was under the necessity of surpending the levelling for some weeks, on account of prior ensagements with the corporation of the city of New. York; he afierwards resumed the business, and, on the 29 th of December, completed the field work.
The commissioners have since liad the pleasure to receive \(\mathbf{2 l}\). Ratidel', report on the performance of his contract, acconipanied with part of the sti pulated docupients, and now venture briefly to state, that, in their opinion, a canal may be collstructed from the banks of the Delaware or Crosswicks creek to Langlridge farm, and from thence to the banks of the Raritan, between Nrw Brtusswick and lif asinn gion, on a dead level, without the necerssity of a lock, ath with very moderate extra digaing or embanking: of course, the only ascent or descent will be on the banks of the rivers, between the tide waters and the canal; that by plamme the surface of the water in the canal abou thirtren fert below the surface of the earth, at the sumnit near Longloridge farm, the level may be pursied near the surface of the eurth, and the cainal may w-ive at couvenient banks at cach end, abou sixiv aitht feet above the medium of ligh and low tic titer in the Delaware and Raritan; thai I-w el ce's and Devil's brooks, and Totamy's an Fi xumer runs, and several other streams, may b adian \(d\) into the canal near their sources withou waill, , nd that the surplus water may be discharged
into their old beds without injury to the canal; that Cranbury brook, Millstone river, Bear brook, Assan. pith \(k\) creek, and Miry run, may be crossed on aque. ducts, leaving sufficient space for the passage of the streams through arclies under the canal; that it is at present supposed that part of the water of Cranbury brook and Bear brook, may be brouglit to the canal by raising the mill dams near the crossing places, and that the mills will be beneficed by the altera. tion; that part of the water of Millstone river, Assanpink creek, and Doctor's creek, may be brought to the canal by feeders, which may extent from the canal on a level until they admit part of the streams; and that these feeders may be used as branch canals, communicating with the grand trunk, and extending the benefits of inland navigation several miles to the southward; that it will not be necessary that the canal should intersect Heatlicote's brook, though it may run very near it; and that a part, or the whole, of its waters may be used, if expedient, by constructing a short feeder; that the route of the canal will not deviate two miles to the northwest or southeast of a straight line, and that the whole distance, including the necessary curvatures, will be about twenty-nine miles.
In the foregoing designation of the most eligible route, the commissioners have declined stating the precise spots for the commencement and termina. tion of the canal on the lide waters; there are several which appear to have advantages nearly equal; to fix the particular points will be the business of the professional engineer; after a careful study of the banks and rivers, and after the plan of the locks has been finally determined on: to offer an opinion at present, would only give an imaginary value to places, which would be favorable to speculation, and unfavorable to the canal.
In estimating the probable expence of a canal, the commissioners are naturally led to consider its dimensions, the nature of the soil througt. which it will pass, the quantity and the price of the land which will be requisite, the plans of work which will be necessary for the safety and success of the enterprise, and the elevation of the level above the tide water.

As to the dimensions, the commissioners do not hesitate to declare, that their thoughts and wishes are directed, in the first instance, to the construction of a canal which may be applicable to national purposes; and which may form a link in the chain of inland navigation from Massachusetts to Georgia The secretary of the treasury of the United States, in his report on roads and canals, in the year 1808, states, that a navigation for sea vessels drawing eight feet of water, may be effected from Massachiusetts to the southern extremety of Georgia; and it is desirable that the proposed canal from the Raritan to the Delaware may be constructed in collformity with this plan. The water in a canal admitting vessels of eight feet draurght, should be nine feet deep; and the sides should slope in the proportion of five feet to three; that is, for three feet rise there slould be five feet slope on each side, or tell feet in the whole, being equal to an angli of thirty-one degrees with the plane of the hotizon.
The sides of canals formerly were constructed with less slope; but the more modern are made, and it is supposed with goond reason, with the inclination thove inentioned. If, therefore, a canal is made . Wenty-six feet wide at the botion, and nine feet arep, it will be fifty-six feet wide on the surface if the water; this surface should be the line of the canal, and be on a level, as nearly as practicable,

\section*{PRIXTED AKD PCHYARED RY R. MILFS, AT THE GZAD OF CAEAPBIDE, AT \$5FFRANNUM.}

The o iginal matter, \&e. that generally has precelence in our numbers, is reminved from its usnal place to continue, uninterrupted, the report about he New.Jersey canal.
with the general sinface of the eurth. If the line of the canal should be below the surface of the earth, an extra expence will be incurred for deep cint. ting: and if above, their will be an extra lockage, an extra leakage through the ficelh carth, and in many places, an extra expence for embanking. The towing paths should be raised on the embankment two fect above the line of the canal, and should be formell of the excavated earth. Where moderate elevation intervene in the route of the canal, which canno the avoided by a gentle deviation of the course to the right or to the left, a deep cut will be made; and where hollows or ravines in the same manner occur, ant embankment will be raised. Where tivers or creeks are to be crossed, aqueducts will be constructel, while culverts will be sufficient for the transit of minor streains, which are not admitted into the canal. The expence of the excavation will depend on the nature of the excavated matter, and on the size of the canal: Inose sand may be removed at less cost, per cubic yard, than tough, clay, hard pan, or stones and gravel, and a narrow and shallow canal moy he excavated at less expence, per cubic yard, than if it is broad and deep. The information of this subject has been very vague, probably from the above causes. In Eugland there are estimates from three pence to seven pence sterling per cubic yard; in this country the commissioners on the canals of the state of New- York in one of their reports, have estimated the excavation at twelve and a half cents per cubic yard, and in another report, on the same canal, at twenty cents.
1st. For the canal under contemplation, as the grount is, uncommonly favorable for excavation, beiligg gencrally a sandy lown, it is concluded that twelly cents per cubic yardwill be a sutable esti. mate, calcelating, as if the whole line of canal was on the surfice of the earth, and including the deep chting anl embinking where requisite; the exeatio tim, therefure, of a canal of the dimentions propoo red will cost \(\mathrm{S} 14,432\) per mile, for 29 mile
S. 218,528

2d. The width of the canal on a le T 14 ills the cowing pathes will be 62.60 feet, being 6.66 teet wider than the burface of the waicr in the c.mal, 62.66

() e mile in length, and 132 feet in brealth, will contain 16 acres, aud \(2 y\) miles will contain 464 acres.

It is crident that in many places adjoining the canal the lan I will bocome ex. treinely valutble, and that the benefts re. ceired by soine of the owners would much

Vos XIf.
more than remunerate the damaces sustatined by others; but as it is clesirable that the proprietors should be perfectly satifised with the proceedings of the government, il a estimate of the valu of the land may be made in the following manner:
\begin{tabular}{lrr}
1 mile averaging & \(\$ 152\) per acre- \(\$ 1: 20\) \\
2 miles & 100 & 201 \\
4 & 80 & 321 \\
6 & 79 & 420 \\
8 & 60 & 480 \\
8 & 50 & 400 \\
\hline
\end{tabular}

29 miles avaraging . 868 per acre, 1972
464 acres, averaging \(\$ 68\) per acre,
Sd. There will atwo be requisite a further quantity of land on occount of high banking, deep cutting, and short turnings, which will require a greater width than 153 feet; also, for docks, 1asins, and landing places perhaps equal to 1.8 th of the whole quantity- 58 acres at \(\$ 68\) per acre.
4th. For reserviors, dams, and feelers, say 500 acres of land at S 50 per acre

5th. Water rights. As great care will be taken to preserve the power of the mills, and as very few sites will be destrovel, (11) even injured, it is estimated that \(\$ 8,000\) will be a sulficient compensation for the water rights, the owners reserving the land, 6 th. Aquaducts. It is very difficult in estimate the expense of the aqueducts before the precise spots are ascertained, where the canal will pass the streams; but it is supposed that they will cast, if executed in substantial masonry,
rth. Culverts and bridges. It is proposed to onstruct culverts where practicable, for the passage of the public highways and the private roads, as well as for the passage of the sinall streams, and where impracticable, draw-bridges or swivel-bridges will be requisite: say 30 culverts, draw-brilige; and sivivel-brilges
8th. Hack-drains. Wherever there is ail embankinent, and wherever the surfare of the water in the conal is above the sulfie. of the earth, there nught to be a backdrain to prolect the owner of the adja. cent land from injury: there ourght also in be drains to lead in and from the chlverta, small streams and rain falls, which it would be impropes to admit, or which camot be conveniontly nolmints into the canal,
94. Ward matter. Phere miv be ather. fra charge for red shell ant sanil stone, of be excapated noter the banke of the liaritan, which may be catimated at

10th Blowiftr rocks. There are som? granite ricks at the termination of lacky. Lill, near Dean's saw-mill, (u) Lawrence's brook, but it is presiment that \(\$ 1,000\) will be sufficient to remove them,

1th. Woodland and heavy timber. The ixipa clarge on accoumt of remoring the
st.impsand ronts of trees ought not to be more than

12 th. Shoit turns. The route will be very free from them, and \(\mathrm{S} 1,000\) a deemed a sufficient estimate,

13:\%. Lining and puduling the sides of the cmbarkment, and, in some places, the buttom and sides of the cana!,

14th. Levelling and gravelling the towing paths, and dressing and re-soiling the external hanks,

15 th. For 20 over falls, to discharge the surplus water of the canal, in case of rains, feshes, or mitra admissions, in order to prenerve the dead level of the water in the can:l, and to protect the embankmentstheaf may be estimated at S 200 each,

16 h . For 8 stop gates, to prevent the rater from Howing off in case of an accident to an embankment, and to facilitate the repairs of such parts of the canal as moy require it, at S 1,200 each,
jith. Between each sto? gate there ghould be a sluice, to let ofl tic water for cleaning or repairing that part of the canal, at \(\$ 15^{\circ} \mathrm{j}\) each,

18:h. For constructing reservoirs, dams, feeders, and water gates,
1. Hh. For constructing docks, basins, and landing places,
anth. For toll-houses, fences, and land ga'eq,

21st. Vor locks, 136 teet, at \(\$ 1,250\) per
foot,
Probable expene of the canal,
In plaming the locks, there will be an excellent opportunity for the display of the skill of the engineer A spot may be selected, where there is a ravine genily sloping to the river for the extent of a mile; to av is deep cutting, the canal may descead by the bank of the ravine, and a space of canal may be constructed between each lock, as a ba\(\sin\) for the supply of the a ljoining lower lock; or the ravine itself may be converted into a canal, with dams and locks across it, descending to the tide water; or ground gently sloping for a mile or two to the river inay be divided into spaces for locks, with a basin between each, for the supply of the adjoining lower lock; or the canal may be brought to a basin on the bold bank of the river, and to avoid deep cutting, the boats inay descend by a combindio:i of lockes constructed, nearly at right angles with the csual, in the bank of the river, and by the sile of it to the tide water; rr a lock my be constructed the whole height of the ascent tiom the tide water :o the cana!; boats may enter fiom the can ut tur) ght gate:, or from the tide water through a tunnel with gater; the water may be diveharged for the descending boils into ten or tweive basins of intermedjate heirgbs, xhen the hoat will be on a level wi th the thant, and lepart; and the water reserved in the basins will raise the ascepos of boats to the level of the upper gate.
locks of the common construction have usualiy a ri e of from five to en feet: locks of ten fect rise may be built for a less sum for the same total rise than those of five feet rise, as there will be only half the number, and, of cour-e, only half the preparatory foundations, and much teus lime will be recessary for the ascent or descent of the height; but they will consurne domble the quantity of ivater, and they will te enure li bie to acciden.s and to be nit of ronare: they must be of the depth of the ca-

1,200
30,000
5,000
5,000
170,000
170,000 \(t\)
n.11 in addition to the rise, and the lower gate 3 2,000 must correspond with the depth of the locks. In the present instance, it would be very difficult to construct substantial lower gates nineteen feet in height, that is, the proposed depth of the canal, with a rise of ten feet. If one of the locks has a greater rise than the rest, the cousumption of wa. ter will be the same as if they were all of that height; thus, one lock of ten feet rise, and ten locks of five feet rise in succession, will consume 5,000 double the quantity that twelve locks of five feet rise will consume.

The expence of the locks will depend, in some ineasure, on the plan of the construction: they have been built at the Little Falls on the Mohawk river for 1,000 dollars for every foot of the rise: 4,000 but there excellent stone is on the spot, and the locks are only tivelve feet wide: for the proposed canal, locks have been estimated at 1,250 dollars per foot, and the expence will be more or less, according to the plan by w!ich they may be built.

As every provision slionld be made for the convenience and accommodation of the inhabitants of the district, it is proposed, whenever the ground will admit, that the culverts and the end arches of invenon, by enacting the law under which this the conation has been made, it is unnecessary for the commissioners to enlarge on the utility of the proposed camal; but it may he proper for them to inquire into what may be termed the capacity of its utility; that is, whether it can be supplied with a sufficiency of water for an extensive, or even a limited navigation: for want of this inquiry, canals have been made in Europe at a great expence, and have been afterwards abandoned or converted into rail-ways.
The quantity of water required for the canal will depend on the plan of the lncks, and the amouit of the transportation, after making the necessary deductions for evaporation, soakage and leakage. The evaporation from a crnal has been estimated in Europeat one tenth of an inch of the surface per day. Although there may be a difference in the aniomst in the proposed line of canal, it is safer to proceed on estinntes which have been heretofore made, in countries where canals have been constructed, than to hazard an alteration without sufó ficient data.
The evaporation, therefore, on a canal twentyaine miles in length, and fifty-six feet in breadth, will, at one tenth of in inch of the surface per day, amount to seventy-one thousand four hundred and fifiy-six cubic feet.

The soakage into the earth, after the parts requiring it have been lined and puddled, may be estimated at the same amount per day-seventy-one thousand four hundred and fifty-six cubic feet.
The leakage at the locks may be estiniated at three locksful, whether the rise of the lock is five feet or ten, as the line of aperture in the latter is double in height, and the pressure of the water at the bottom is in a quadruple propne inn. If the
locks are eighty feet long, and twenty feet wide, three locksful of ten feet lise will be forty-e.ght thousand cubic feet; of five feet rise, twenty four thousand cubic feet. There will, therefore, be requisite one hundred and ninety thonsand nine himdred and twelve cubic feet, with tocks of ten feet rise, and one hundred and sixty-six thousand nine hundred and twelve wish locks of five feet sise, fir the daily evaporation, soakage, and ordinary leaknge of the canal.

A lock eighty feet long, twenty fret wide, and nine feet deep, may admit vessels of nearly a hundred tons burthen; it will also admit two canal boats, seventy-five feet long, nine and a half feet wile, and earrying fifty tons ench, or four canal boais, thirty-seven feet long, nine and a half feet wile, and carrying twenty-five tons each, or three bralch canal bjats, seveniy five feet long, six feet wile, and nearly thirtyinctics deep, carrying twents ions each.

Supposing fourteen locksful of waier to be used at rach end of the canal every day, or twenty-eight locknful at botlı ends, this may effict ilie daily accellt and descent of five hundrel tons each way from river to river, on a computation that seventy. ove and a haif tons pass on an averare at each operation of the lorks.

It has been stated that a lock of ten feet rise will contain sixtcen thonsand cubic feet, and of five feet rise eight thonsand cublic fee!; twenty-eight locksful of ten feet rise will contain four hmodred and forty. eight thorssand cubic feet, and of five feet rise two iunilred and twenty-four thousand.

Hut there will be an extra leakage at the locks, accorling to the number of times the gates are upened, which in twenty-eight times \(m\) be esti. mated at two locksfil, or thirty-two thousand cubic fcet on locks of ten feet rise, or sixteen thousand ont locks of tive feet rise.

T", we while daily expenditure, therefore, with oncks of ten feet rise, will be six hundred and scventy thousand nine hundred and twelve cubic feet, athd with locks of five feet rise, will be four humdred and six thousand nine hundred and twelve.

It may be proper to observe, that the quantity of water is estimated by the number of times the upper lock is filled, as the water of that lock atiswers for all the locks below it in succession; and that the above estimated daily expenditure of suater will amornt to ninety form humdredths of an mich of the depth of the c.tnal, with locks of ten feet rise, and fifig-seven humdredths of an inch with looks of five feet rice. The advantage of the whole catral heing the basin for the locks becomes appareut by this statement, as tnere will be no suse persion of passage in the canal on account of an ex'ra number of loats at the locks; but they inay contimte to pass withoat intermission for several days, even if there was no adilitional water almilied ino the canul. Two humblred locksful, which will be sufficert to transport cight thousand tous from river to river, will lower the water in the canal only five and a half inclics, while in the ordinary mode of ascending to the summit by dist ast lock\%, if the"e were lozks wathin balf a mile of cach other at each end of the summis, and the satne tumber ofions attempic 1 to be iranoporied, utuler the same circinstancea, the canal ut the atimmit would be drained to the boitom, before five thousand igns would p.oss, if practicable

Accerdang to the compliation of Mr. Ravilel, all the streanis which are applic bie io the supply of the canal discharge seveis millions four homelred and sleven thousund coshice fort per day at the placed

Where the water may be used; but the quantity o water which will be requisite for the canal, if twenty-eight locksful are used daily, has been stated to be four hindred and six thonsand nine hundred and twelve cubic feet, with locks of five feet rise, which is less than one eghteens:l part of the water fluving daily in the streams.

In planning a work which may continue for ages, great care should be taken to provide against emer. gencies which may occur at 2 future periol. Il. though the natural streams may ut present be suff. cicut for the supply of the cinal in the exiseing state of commerce, prudence requires is to lonk forward to the period when, by the improvements ot agriculture, in draining swamps and low grounds. and by constructing and clearing water courses, the natural summer s! !! ply of the streams will begreatly liminished, while the commerce will be increased by the completion of ntier canals and improve. ments, enlaroring the sphere of aclion snll inter. course, and which in tipe of war may be aticmente:t in a tenfiold propurtion, by unarmed vessels with. drawing from the orean within our own territories, and navigating safe waters. Attention should als: be paid to the situation of the mills, and the maclinery dependent on the streams. The preser. vaiin: of these valuable works is of vital importance to the inhabitants of the district, and al lough the owners may be fully compensated if deprived of them, still the loss 10 the state woull! he immense. and ought to be avoided. With this view the com. missinners have proposed to appropriate for reservirs four lumdred acres of lan 1,10 be prociurs 1 while it may be obtained at a moterate rate antl before the rise in the value of the soil, which may probably take place from the further improvement of the country, the erection of buldings, and the vicinity of the canal. The reservoirs collecting the water, which would otherwise run off in injurious fresties, overflowing the low grounds, and occasion. ing back-water at the milks, will benefit the agri. culurists and manutacturers, and the water escap. ing from them by soakage will augment the springs and water courses, on a lower level, and furnish a further graduul supply to the adjacent mills, and, in some cases, to the canal itself. If the reservoirs make a part of the original undertaking, they will he better arranged than if introduced at a future day as a substitu'e for deficiencies; and if judiciously planned, there will not be the same danger of the is injuring the health of the inhabitants by miasma, as there is from the overfowing of the low groumdls of rivers. Rescrvoirs have been constructed for many of the eanals of Finrope: those of the canal of laanguedoc contain fue huud:cl and ninety five acies, and thoue of the Roshdale canal cover three hundred and eightcen acres. The canal of the Forth and Cly le has one reservoir which covers a surface of fifty acres, and is twenty form feet decp: and ancther, which contains seventy acres, and is banhed up twenty. iwo fect at the slice.

Some of the proprosed raserviors inay inclule ra. vines and swamps, at a distance from the canal, and if hy embalkminu's the water covers four himblrel acrea of land ten feet decp on an average, and it the resrrwirs are fillel by fr'sics twice in a year, there will be three limulred and forty-eight millions four lumdred and eigh?y thousand cubic fect, anil af er de lust'ing evap)ration, sovk ge, and Ie kige, which may be elsimated ut two thirds of the whole, there will still beone lintred and ixteen millions (me himitrat and sixy phomand cubic feef si)-

hundre 1 : it fighty-five days, o Ingect puriod than the usual stason of navigation lut if it is contennblated to have locks of ten feet rise instead of five leet, then it will be necessary for the reservoirs 1 's contan sis lrundred and sixty acres, ten feet deep on : 11 a to suppiy waler for two hundred and eighty five「а) 5.
\(\dot{\circ}\) the threstion, whether there will be sufficient watcr to !1!l the reservoirs, it may be answered, dat Mr. IRandcl appeats to have measured the Wa wr of the streams by the quantity used daily at the mills; and there is no estimate of the guantity which ruirs off over the dams during frestres. If we estinate that the district of country fiom which lis water descends inte the streams that may sup)bly the canal, contains seventy-five square miles, and if we rompute that only thirty inches of rain fill antually on an average, aud that the quantity rumang from the surface, or issting from the carth, within the serentr-five miles, amounts to threefif hs of the quantity falling as main, there will be tiree thonsand one hundred and thirty six millions three hundred and twenty thousand cubic feet that fow off in the streams anmfally; deducting f:om th is amount two thousand seven hundred and five whilions lifteen thousand cubic feet, the quantity fowing in the ordinary way at the mills, according to Mr. Randel's mensuration, there will remain four hundred and twenty-six millions three hundred and five thousand cubic teet for the amount of the freshes, from which there will be takell three hundred and forty-eight millions four hundred and eighty thousand cubic feet for the supply of the reservoirs, leaving still a surplus of seventy. seven millions eight hundred and twenty-five thou \(3+\) ul cubic feet.

It will be expedient, notwithstanding, that there shoulil be a communication, by feeders, with all the strearus which maty be applicable to the canal, as it would be unsafe to rely entirely on the reservoirs in cases of ensergency. Several of the feeders will be branch canals for the immediate benefit of the district, conveying, articles which, without water carriage, would not benr the expence of transportation, is street and stable manure, marl, plaster, stune, lune, ashes, ores, potters' clay, bircks, wood, chatcoial, fossil, coal, turf, \&c. The branch canals would diverge from the grand trunk in various di rec inns, and could be constructed at a small exfonce ion boats seventy five feet longs, six feet wide, and nearly thiry inches deep, carrying twenty tons cach.
linere may be also other morles adopted for procuang a spuply of water; it may be advantageously rased fiom the Delaware, or fram the Ravitan, by a 1 ariety of propelling powers. Thousands of tons of narl, of a fertilizmg cisatity, almost equal to formirn plaster, drawn from inexlanstable sources near the tack of the canal, which may be penetrated, at a triting expence, by branch canals, wall be an nually culled for by the agriculturists of the adja\(c=1\) states. This great descending weight may be marle the propelling power of more than two iliteds dhe werg'lt of water tran ported at the same tine (t) lee canal, while the lescent of the marl may be effected by transhipinent, without consuming the water of the upper level; the same machincry will miswer for several other articles of freight, and by other machinery, and by transhipping the articles, the transpurtation may be extended to an immense amount without the loss of water.

Undertakings are fiequently objected to on accougt of their novelty, and obstacles which appear
insemmountal it at firse, ari considered trising whet we become far ilius will them; fortunately, no gigratic projecis form the component parts of the prowsed canal. By comparmin the plan with the canals of other conutrios, it will be seen that rlie Lifficulties which were overcome in Fiurope were ot inucil greater inagnitude.

The canal of langueduc, connecting the Merlis terranean sea with the Allantic ocean, is one hundred and eighty miles tong: the proposecl canal will be twenty-nine miles long. The canal of Inolstein, connecting the Baltic sea with the German ocean. is fifty miles loug, and ten feet deep: the proposed eanal will be nine feet deep. The canal of I anguc. doc is one hundred and forty-four feet wide, incluiling the towing paths, and the canal of Holstein is fifty feet wide at the bottom: the proposed canal will be eiglsty-six feet wide, including the towing paths, and twenty-six feet wide at the bottom. The slummit of the canal of Languedoc is six hundred. and thirty-nine feel above the tide water; of the leeds and Liverpool canal, five hundred and twen-ty-five; and of the Rochdale canal, five hundred and twenty-one feet: the simminit of the proposed camal will be only sixty eight feet above the tide water. The canal of Ladoga is obstructed by ice above six months in the year: the proposed canal will not be obstructed by ice three months in the year. In the Rochdale canal, part of the water of one of the reservoirs is raised above sixty-feet by steam. At Harecastle, a canal passes lhrough a tumnel, or subterraneous passage, which is two thousand eight hundred and eighiy yards in length, and more than seventy yards below the surface of the earth. At Sapperton, there is a tunnel nearly two miles and a half in length. At Stratford mea dows, a canal is carried on an embankment which is nine hundred yards long, seventeen feet high, and one huudred and twelve feet in breadth at the bottom. At Barton, an aqueduct, nearly nifty feet high, and five luundred yards long, conveys a canal over the navigable river Irwel; and near Bowling bay, an aqueduct of four arches carries the canal of the Forth and Clyde over the river Kelvin, and a valley sixty-five feet deep, and four hundred and twenty fect in length. In the canal of Languedoc, there are one hundred and fourteen locks, and only miles of the canal are on the same level. in the proposed canal there will not be more than thirteen locks at each end; and the intermediate distance on twenty-nire miles will be on the same level, and without an obstruction.

It will also be seen that great undertakings for the improvment of inland navigation are not confinerl to Furope: The Royal canal of China, from Canton to I'ckin, is eight hundred and twenty-five miles lng, fifty fect wide, and nine feet deep.

To complete the investigation it would be propet. to examine the probable amount of intercourse in number of boats and tonnage, and the rates of tolls and receipts, and also the probable annual expendi. tures by salaries of superintendants and workmen, by wear and tear, and by contingencies. The commisioners have forborne to make this inquiry, as it was not made part of their duty by the law under which they acted, and as it has heretofore been re. presented to the house of assembly by a committce of that body, that "it is ascertained, from data tolerably correct, that during the late war, a sum, little short of two millions of dollars, was paid for cartage of various kinds of produce, merchandise, and military stores across this state."

In the foregoing estimate, the commissioners have inserted every item of expence which has oc
-urred to them in the course of their investigation, as applicable to the proposed undertaking; but as they do not profess to have any practical knowledge on the subjeç, they may have onitted chárges which, by some persons, may be esteemed neces. sary, and there may be plans of work inserted which an experienced engineer may alter or dispense with It rests with the legislator to deternine whether it would be most expedient for the state to appropriate the sum requisite by annual instalments, and to procure funds for the purpose by loans or solicita tions, or to permit individuals to subscribe, reserv. ing a part for the state; or to grant to the United States a athority to construct the canal, with such reservations of privileges to this state, and to the inhabitants in the vicinity of the canal, as it may be deemed expedient to stipulate.

If the latter proposition should be determined on, they are of opinion, that it may tend to induce the congress of the United States to promote and complete a general plan of inland navigation, as a strong cement of the union, an excellent preservative of the lives of voyaging citizens and mariners, a sure protection for domsstic commerce, a ready way of transporting troops and military stores, and a cheap and safe mode of conveying the products and fabrics of American agriculturists and manufacturers to American consumers.

If the design should be commenced and accomplisined under the direction of the United States, ulficers of the corps of engineers, with a due propurtion of privates, may be stationed at the lucks and reservoirs, and the whole business conducted with science and ectriomy:
These civil fortifications, the cheap defence of thenation, and the silent preventive of the harm of an enemy, will then be arranged on the same glan, and for the san e vessels, from Massachuetits to fieorgia, and the whole voyage performed under the superintending care of the general government.

The commissioners regret that the short period of time since the completion of the field work by Mr. Randel prevents them from making a more perfect report. Being aware of the general solicitude on the subject, they have concluded to terminate their inquiries without further delay, and, wish all due consideration, they respectfully sub. mit the result of their labors.

> JOHN RUTIERFURD, JHHN N. SIMPSON, GE:ORGF: HOLCOMBE.

-Y'ew-Brunazvick, Jan. 22, 1817.

\section*{National Literature.}

The Portico, published in IBaltimore, in monthly numbers, and, certainly, one of the ablest and best conducted periodical works that ever issued from the American press - "a proud apecimen of Ameri. can independence, talents and character"-we regret to learn, languishes and seems likely to fatl for want of support. The Edinburgh and Iondon Heviews, possessing no more merit than the Jontict, and far less iuterest to ue, spread far and wide through our country, disseminating their poisonous principles and arbitrary notions among the people; whilst this native work, devoted to elegant literature, and which might serve as an antidote to foreign productions, hobbles along and harclly gets on at all!

And is it so, that every thing must bear an im. forted character to give it grace in the eyes of an American public-are we always to despise the diamond that lies at our feet ant iravel to for rounerics
in search of a gem less brilliant: This is too much the case: the Mritish, not content wh ithersing our bodies, modestly assume the rimit of monufacturin ideas for us, and of directing their uses-and we sub. mit to both. In numerous inslinese, we pliy the part of a "sipoil"d clitd" (whose f.ehtr| I \(2 \cdot 1\) raised himself to sufficient opulence by the rerl. of bootmaking to make a fool of his son) tha rennested old dad to import half a dozen pairs of toan a, fiom England, for him: he would rull the ri-k of being unfitted - they might hurt his corns or wound his heels, be too broaid or ton narrow-ton thick or two thin, no matter what, if they were made of E.ngrish lea. ther, by Kinglish workmen; there was something excessively "zoulgar" in being booted fivm his \(f:\) ther's slop. Whien shall we look at homie ant have home feelings.? The old Fenglish song s.yys, "Hfome is home, be it ever so homely"-but we seem to say- Enrglish is English, be it orer so English, ands ons that account, ought to be preferred!
The work before us is entircly destitute of whay we, in the United States, call party. Its ground is so broadly national, that the " Imerican" and "F'ederal Republican" newspapers in this city- (papers as opposite in their party tenets as the antipodes) have equally united in deprecating its f.ll, is a loss to literature, elegance and the acenmplished scirnlar; and in this, banding as it were between the two, we heartily join them.
My opinion about the influence of foresn books. is well known to every one of my reailers. I have considered them as among the most formidable engines that can be brought to bear against our favnrite principles and best beloved institutions. I ainn at indepentence every w'ay; and womld no more con. e under Scotch reviewers or London critics for the thoughts of my heart, than be subject to Cas'le e.is/b to direct my political conduct. These revimpers are continually libelling my comery; and noi 1 nfequently in the coarsest and most uncouth manner. That Great Britain has many very wise and learned men, is with pleasure admitted-but, in general. they want liberality; setting themselves up as gools of literature to whom all the world must do liomage, or be anathematised. Is the ric!, soil and clear sky of the United States less prodirctive of genims than the barren heaths of Scotland of misi-covered Fing-land-and why have we not writers as reputable to our intellect as the exploits of nur :temy and naty have been to the comrage and skill of oilr solders and seamen? The answer is given in the ease of the boot-maker's son-we want s national, I had almost said a sarumat, feeling, and are filked with prejudices in favor of foreigners; who hold us in a sort of vassalage, and treat us mulely, indeenl, for our folly in submitting in it is to inyself, (lest what is here said inay give rise to invidions tr. marks) my pretentions io literature are very hum. ble-1 do not claim a name as a literary claracter: I can make out, generally, to tell a pl in stom so as to be maderstood, and this is about the extent of iny learning-but, 1 think, 1 have some capacity to appreciate it in others; we may admire what wn carnot imitate, and I certamly lave clegaitit litesn ture, though I don not ponsess i , io ameliorate oin manners and refine sociciy; which mamere and re finement I would have Aincricen, butel in the fe nius of our government, destithte of eirry epecil. of injustice aud despotism. We hare met, rop dif of rescuing ns from the slanders of insolent finciदn ers, in the field of letters; who, "pmint in ; inie" and "yard a-m in yond arm," will "p, "thet the bram; and make them nit's" Bu* thry min/ be monte ra, 6 d - the m m t bave the invani, livel this:mul
not be siffered to languish, and, after cvery re. sollrce is exhausted, be compel!ed to retire from the cuntest, "witiont a stoot in the locker." The poems of Byroz and Scott have produced more clear money to bouksellers of the United States, re.publishing them, thatl, perthans, they have derived from all cur native liter:uy works, united-yet we have at least one nat: capable of rivalling Byron and of surpassing shott, in every respect, whose business it would be 10 write poetry, if he could live by itLut he prefers a subordinate station and a small weckly stipend to the pursuit; well knowing that if lie were to publish a volume of poeins, superior to any thing that \(P\) pope ever put into his sweetest measure, or N/fatspeare imagined, they would (after sulpplyiers a fell personal friends, purchasing them wut of complinent to him) remsin to lumber the booksellers's shelves, while any sort of foreign trash, puffed by fureign reviewers, was selling by thonsandls. It is thins in every branch of literature: Its disciple is made sick by long-deferred hope, and, in poverty, abandons it. There is nat, to my knowletge, one man in the United States who lives comfortably, and much less acquires fortune, by his talen's as a writer. The honest truth is-descending fiom the l'ortico to the - - , that stupidity is among the best qualities to make money as an editor and publisher.* On this account, some may say that \(I\) ought to do well!-and sis I would, if I had not enough of a love of my humble walk in literature to indice me zather to trim the midnight lamp to give a supppased value to iny work, than spend an hour in dumning for the money earned by it.
Designing only to have written one or two brief paragraphs, I have been insensibly led to make a long pssdy. It has its object in what is the favori: e wist of my lieart. 1 ank sensible that the sun is as big to the L'uteil States, my country, as to Englund, or even Edinburgh/; and I will not travel across the Atlantic to curj \(y\) its light and heat when I can have it at home. Tieliberal spirit of the Werker hegistir towards lijutal foreigners or useful citizens, coming amungst us, is universally known. It has nune of that anc e. J. John-Bull-disposition that ha:es or despises every man or thing because he or it was brought to life or produced in a foreign countrylet merit have is chue, be it derived from whence it may But I naturally wish, that we should give a preference to it in "our own household"-and it is time enough when we do not find the thing desired here to go abroad in se:rch of it. By acting upon this principie i:l every respect, we sllall raise up a nutional feelinur, and inspire a pride of country, nore powerful to operate for our safety, than all the fleets and armies of Eugluyd, (and, in a little while hence, of all Europe, untited) call do to our injury. Whatever we cannut get as good, or even as pleasing, at home, provided we have the means of iudulging ourselves, let us courtcously receive from foreign countries-giving only a preference, for like qualities, to the product: of citizons and residents of the Uni:cd Siates.

\section*{hITERARY NOTICES. TOOKE'S PANTAEON.}

A new edition of his standard work has just been published by Me:s s. Coonte and ollaxivell, Hallimore, embellished with tha:ty neiv and beautiful out-line plates, drawa fiea ditinue statuee, engruved by Fiirnan. This wo \({ }^{\text {k }}\) requires uo eulogum fre:n us. In the pre ent ciltion ta atenipl has been made

\footnotetext{
*Sce some of our most profitable newspapers, on both sides of the question, for proce of this.
}
\(t\) ) render it free from that phraseology that made it, occasionally, too indelicate for the youth of either sex, while care has been taken that un f.ct nor incident, worliy of note, related by the author, is omitted.

Mr. Cob bett has issued proposals for puhlishing his Heekly Political Register at New-York, at \(\$ 5\) per aunum, payable half yearly in advance. Address Henry Cobbett, 19 Wali-street, post-paid.
The reason assigned far the discontinuance of the former Register at that place is, that the numbers intended to have been forwarded to the United States found their way into lord Castlereagh's office.

The Americas moxthly magizise, a new work, edited by \(I\). Higloov, esq. and published by Messrs. Kirk and Mercien, New York, has just appeared, and is lighly spoken of. It is publishied in numbers of 80 pages, making 2 vols. per annum, for five dollars. Tlis magazine is devoted to polite literature, criticism, \&c. We learn from the editor's address that it already has 1000 subscribers.

Another work entitled, "A THENECM, or spirit of the English maguzines," is publishing by Monroe and Francis, Boston, in semi-monthly numbers, of 40 pages, at \(\$ 5\) per annum. The title is sufficiently descriptive of the contents of this work.

The Albant Rebisten, edited by Solomon South. wick, esq. one of the oldest papers in the state of New-York, has been discontinued. The valedictory address explains the cause-and shews how easy a paper may expire for want of support, with a large subscription list. The disburseinents of the printing business are very heavy-large amounts must be made up from small sums, which, because they are small, thousands neglect to pay-and they can do it at any time. One old balance is added to another, and year to year. While the hope of payment lasts, the harsh measure of stopping the paper is not resorted to; and finally the weight of debis due, after exhausting all the means of the publisher to bear up against them, breaks him down. Yor a litale while, in a certain circle of friends, his fate is mourned; but he is soon forgotten, even by those who caused his fall, commencing a new course with some new candidate for their favor.

\section*{English and Scotch Reviewers.}

Few, if any, numbers of these works, ostensibly devoted to lofty politics, polite literature and honest criticism, are issued without some libellous attack, or unprovoked invective, upon the American charac ter. The most pitiful and contemplible things are raked up to round a calumnious period, and any stupid tale is accepted as a truth from sacred writ, if it tends to point it. The modest gentlemen who conduct them have kindly taken the science, literature, morals and general conduct of the whole world into their "holy keeping," as we say of the Inquisition, when it is tearing a man to pieces, in its dungeons, with'red-hot pincers, to convince him of the merciful dispensalion of thes aviour of ans; and whatever does not come up to their standard, is barbarous*
"Barbarous" is a favorite term with these review. ers, as applied to American literature and manners. The Buglish p:actice way suit their refined notions better. "I an ordered by my goveriment," said admiral Cochrane in a public despatch, "ro nestrox all places assailable." This, accorling to the religious Dr. San. Jolnson's opinion, that all of 112
and ahsurd. We were not surprised at the report that Mr. Bagot, the Britush minister, had intimated to our government that his master would not view with satisfaction any arrangement with the late Spanish colonies which should contribute to the aggrandizement of the United Sistes-[see the last number of the Reaster, page 184]-well knowink the insuperable objection that the government of his country has to the aggrandizement of any power but its own-and which, if made, was trented b: Mr. Monroe just exactly as the prince regent's go vernors would treat a remonstrance trom us against their invasions of the territary of the king of Aisuly -but we hardly expected that the London Review ers would have been jealous already of the trade we liave with the Sundzoich Islanels, and out of that get an item to abuse us! \(\dagger\) It is a serious trut.1, that the visiting of these distant islands, governed by an independant and enterprizing prince, by our hardy mariners, in five or ten vessels in a year, is sufficient to provoke the anger of these moderate and unassuining gentleinen, who seem to think the "world was made for" England and themselves.

But as, from the general good and gallant conduct of our countrymen, they would die of the apleen for want of objects to whet their malice, (or earn cheir wages) upon, they seize on our literature, and mouth it and maul it, and chew it and champ it, like a hungry dog does a bone; iwisting and tuming it every way to get a taste of something suited to their appetite.

One might think, from the great zeal of those folks for the purity of the English language, in their terrible denunciations of every thing belonging to it on this side of the water, that their own people were faultless, and that they had nothing to do at home. Now the fact is, there is not a people in the whole warid so ignorant of their own latguage as the people of Eugtand-4 little spot of earih, with an unnised poputatiou for ages. An anecdoie that occured to me inay illustrate this-I believe I have told the story befure, but it is a good one and will bear a repettion. One evening bokinf a walk for amuse ment and exarcise, 1 stopped a a public house and garden, on the outskirts of the iown, 10 refresh myself, where I happened to fall in with several F. iglisamen, deeply engaged in passing encomiums upon the general learning of tacir o wil country men and deprectating that of uthers, Inver mect this sort of boasters without feling a dispuantinn wh oppore theni; and so, knowing several of them, 1 joined in the conversation, flatiy denying their pois tuons, and proposing to pruve, by theinsclves, that they did not know what they were talkug aboul' They stared at ree and at one another, and the prout was demanded: 1 proposed some common phrases of about ten words, and requested that each person present stould pronounce them in the di.aleer of lie county lie came from. As brod luck wollad have it , the first that attempted it way frum the "Wess-Midins," (I believe) of Yorkshire; he gave the words, and "staggered" ath the rest; but the second, from Lancas ire, completely knocked them down, and they ceded the primt. M路 of the words hat no more the sound of E iglish that of Hebrew.
ouglit to have been hung for our rebellion, may be a fradished sentence-but the sentiment is imp) ortant as bemg official, and perhaps unique; the probability is, that no other goveru ient ever issued such ai oider. We outht never 10 furget iti and Eeally, with all the charitics of heart cullected, 1 seel at a loss to say whecherito oflt to be forgiven. TSee Quarterly Review for Fel-ruary.

Ithis day met with a pamphlet, of about 60 pagis, publistred in London in 1805, entilled "A vics of the lanceshi e dialect, by zouy f dialogue." \&c. witis a "glossary;" which lateer, I will snon shew the reader, is necessary to understand it. The words are spelt in this brook as they are pronounced, and I am perfectly satisfied that nothing is ex.ggerated. The following is a quotation from the first page 1 happened to open. I shall write out a conple of sentences, and then refer to the glossary to put the English above them. A clown is relating his adi-ventures-

Thou wilt say so by and bye. When I was tired \(f f\) "Theaw'll sey so eendneaw. Whau l'r lovart o that place and crept awny without [a] bit or "that pleck; on crope ow \(c y\), witheawt bitorsope, or pinch of snoff: for I played the fool and on tius "or cup o sneeze; fir I gawnbl't onflect ta: go too. I soon enquired this gentleman's house "gova too. I soyne sperr"d this gentlemow's hoah out; and wohen \(I\) got there, I gave a glance ints "eawt; on when eligeete tear, I gan o glent intp the cozwhonse and saw a man standing in the "th'shipp'n, on seed o monstomning ith' group."
It was no easy matt.r to make this uut-the word "sope" is nut in the glossary, and "groop" may as well remain untranslated. The Lancashire dialect, is perhaps, the most uncouth and unintelligible of any in all England, but these are some eight or tert dialects more that are alnost as much so; and which a well bred Englishman requires an interpreter to understand. A man may travel in the Énited States from Maine to Louisiana, without meeting any one that he cannot understand and be understood by, if he avoids the few Dutch and French settlenents that yet, almost unmixed, remain in our young couniry.
From the preceding specimen and remarks most persons wiil conclude with us that the British re. viewers have business enougli at home, and are wi hout any nacessity of reaching across the Athantic t instruct us in the English languare, in o:der to ennplay thernselves.
f"Leet, light of, ont, or met with, light and lightu ing."-Giossirx.
- Ilie dalorye between Thomas and Mary [Tum. mas and Meary] begins with the following queslion and answer, which may amuse some of our readers -

\section*{The Mails.}

A much respected triend at llenderson, Ky. lately notitied ine of the great decention of the Weak. ir kruneter, and p pinted ont what he suppu.e. there the cunses of i . Belicting that the publiz good ninhit be suluseriod aid mis nwin integect
promoted by it, I forwarded the lefler, wi h a polie vote, to the post-master-gencral, from whom I received a.e following prompt and sat isfactory reply. Wilh such a propiet disposstion in int hed of this important department, I wou'r! respectfully recommend that publishers, who generally have the most reason to complain of delays and losses by the mails, would rather endeavor to ascertain the probable cau es of their disadvantageous operation, and make them known to the P. M. general, than indulge in common censures which very seldoin have an effect to remedy them. By thus uniting our efforts, we might do much to promote the good of the establishnent and our own interest.

Genercil post-office, 15th Man, 1817.
Silf-Since the receipt of your letter of the 13 th instant, I have instituted an enquiry into the causes of the detention of mails on their passage to Henderstowr, Ky. and I have taken measures to prevent further failures on that ronte. I am much obliged to you for the information contained in your letter, and I will thank yon to point other errors that come within your notice.

Respectfully, your obd't,
R. J, MEIGS, jr.

Mr. H. Aites,
Editor of t're Weekly Register, Baltimore, Md.

\section*{Our Naval Officers.}

The various letiers that have been published from the officers o our several squalrons stationed at different times in the Meditermanean to their friends in the United States, do no less honor to their neads, than their courage to their hearts, or their prowess to their arms-presenting the happiest unions of mbud, with valor and skill. Their descriptions of places are sometimes quite eloquent, and always amusing-and are the more interesting as coming from the quarter in which the foundation of our naval glory was laid in our wars with the Barbary pirates, erected, however, by the native genius of our countrymen, and carried to its pinnacle of fame by a chivalric devotion to the cause of the republic. They speak a language also, of a singular character-we can do this, we will do that, we have dose another thing; it is the langrage of men who suppose themselves invincible, on any thing like an equality of terms-and they are so. Talking of the famous port of Ninorca, one of the finest harbors in the world, one of them says, "in case of a Spanish war cur present force is sufficient to take the place."
The following are extracts from three letters from the present squadron in the Mediterranean-
"The mind in ruminating over the remains of antiquity, [the writer is iminediately alluding to the ruins of Carthage] which abound every where in this part of the globe, is naturally led to consider the frailty and vanity of man. Of all the great cities that flourished in ancient times, little or nothing now remains but their bare names, save the deeds recorded of them by the faithful historian. If ever my country should cease to exist, may she leave behind her, an example of virtue, bravery and liberty, and so become the admiration of the world. May the historian have it in his power to say, "Behold a country that never bowed its neck to receive the tyrant's yoke," which, in its infancy, overcome one of the most powerful nations in existence, and
catablished \(i\) 's indepondence on the fien bats wo
 blemished. In hired dre ste doplayel the suln. leeds that distingrmatul her in chilimin!, till inis in his career, clangased to see a pe ple us hap!! with his als pow rtil hand, cut them off forcrer."
"This place [Tripoli] is very interestink 10 an American, when he considers that hore one inf. navy first began to show those deeds which li ve since तlistinguished it. Here is where Decatur, Jonns. Hacdomonsth, \&ec. first lisplayed that fi:In and un. daunted spirit rihich his added glory to their coun ury, and immortahzed themselves. The keepiag up of a force in this se: is a grood thing for owr na. vy ; as it not only gives the afficers an opportunity of açuiring experience, but going into so muny differeirt ports, excites an emulation in cleanliness. and discipline, which will be the lasting support of our navy. If an officer has no pride in his profession, he never will rise above maliocrity. There is as inuch pains taken to keep our ships neater and cleaner than those of other nations as there would be in fighting them: and it is with pleasure an American can hear the ineed of praise given by all to his country's navy."
"He is as lazy as a Port Mahon soldier" is a common saying amo g our brave tars, and I must confess they are the laziest set of men I ever stw: Heey sel. dom appear in uniform, and their clothes look as if they never were in the wash-tub-when the sim shines you can see them in groups baskm, in its beams, employing their time in picking the vermin off their clothes and bodies-they are all convicis transported here from Spain. A few weeks before our arrival a ship arrived here with 150 on board in double irons, who were immediately released and habited like soldiers: they get for pay, per day 10 cents and their bread-all of them have the look of villians, they steal every thing they can lay their hands on, even the tomb is not sacred to them; they have broken up marble momments and solid the pieces, which are very good merchandize here.
"Is to the justice administered here [at Minorcal I shall give you but one instance, which is now the common topic of conversation at this place. A respectable gentleman who lives between Yort Mahon and George.'Town, has a protligate son, who married about six months since. he very soon run out the sim of mosey his father gave him and went to him for more, which the old reentleman refused and remonstrated on the impropriety of his conduct. The son left him and iminediately went to two soldiers, to bargain with them to murder his fsther, on whose death the whole of the property would devolve on him, as the only child. The soldiers agreed to do it for two doubloons to be paid on the execution of the deed. But as he had not the dombloons lae wanted them to wait for pay till he got the property. But they thinki:g, that, after the deed was done, the other would not pay, refinsed doing it withott being paid before hand; some altercation arose and the son left them, saying that he could get it done for half the money. The soldiers unwilling to lose th is opportunity of inaking money, lodged information against him before the magistrates. He was apprehended, and on trial it was filly proved his intention was to have his father murdered. The soldiers owned they would have done it had he paial them the money. The soldiers were released, and the son confined for three months, which time is now out, and he was set at liberty a few days since no doubt to commit a deed which ought to fill the soul with horror"

\section*{I.egislature of Connecticut.}

GOV ERNOR'S MESSAGE.
Gentlemen of the council, . Mr. Speuker, cond
Giens emen of the honse of representatives.
I enter upon the duties of the homrable station Which has beel assigned me, with emotions which I cannot describe. Afier a long ab-ence from the state, If und nyyself on my return almost a stranger in the land of my fathers; and, till a recent period, 1 should have deemed no event more irprobable than that which has rendered it my cluty to address you fom this place.

You, gentlemen, are ail winesses that the public suffrages have not been infnenced by my solicitations ind exertions; reether ought I to athibute the invaluable proof of the confidence of my fellow citizens, which at this time demands my gratefir! acknowledgements, to personal fivor. if, indeed, my countrymen have been in sume degree influanced in their choice, by a favorable estimate of the services I have performed in various stations, still it is my duty to acknowledge, that those services were commenced and continued under the guidance of illustrious men, who were among the founders of our nation; and that to the wisdom of their precepts, whatever has appeared most meritorious in my conduct, ought chiefly to be referred. It is sufticient honor for me to have obtaned their confidence and approbation. Disclaiming all pretensions to a participation of their fory, 1 campt omit to express the reverence I en. iertain for those sages, whon no artifices could deceive, no temptations seduce, no dangers intimidate. Their names have been already inseribed on the inuperishable tablets of history, and in now tendering my homage to those, who, by divine fivor, were insirumental in achieving our independence, and establishitg our government, I prestune that I perform a duty, which will be repeated by cvery future generation with increasing gratitude.
In attempling to perform the duty of inviting yout attention to such subjects, as in my judgment require the consideration of the legislature, 1 am not insensible of the peculiar delicacy of my sitnations, aricing not ouly from inexperience, but from the want of precise information respecting the actual situation of our public affars. White I rely with confidence on the wisdom and intelligence of those whon I have the honor to address, I entreat that the opinions I advance, may be considered as the sincere convictions of my mind, declaredion der a deep sense of those obligations of duty and sratitude which bind ine to iny country. At the same time it is my ardent desire, that the conse. pluences of any misappreliensiqus of the true in. terests of our constituents, which I may have in. voluntarily entertained, may be obviated by a rigorous examination.

As the anciont system of taxation established in this state, has ceased to be adapted to the circum. stances of the people, I recommend that measures be allopted, with a view to a deliberate, and sys Lematical revision. Io this end, the formation of statements, exhibiting in detal the emmponent articles which form the general list, both in reopect to the state, and the particular Townships, with accounts of the annual contributions of the peo ple for every purpose, distingnisling the permanemt from the extraordinary expenditures, appear to be expedient. In forming a new systom which must affect every in lividual, it is proper to cumbine every resource of information, and 10 possess thith, by which the effect of every prineiple mav be firtly -stimated.

From sources of information millected at dif. ferent times, and from continued reflections, my mind is consinced that the effects of the present s, stem are far more injurious than can have been generally supposed; and as illustrations of this opinion, I submit the fillowing observations to yourindulgent consideration.
In respect to the capitation tas, it may be observed that an assessment of sixty dollars in the general list, is equal to that on twenty four acres of the best alluvion meadow in the cougties of Hartfurd or Middlesex; or to that on forty-eighis acres of the best meaclow land in any other part of the state, or to that on one hnuilred and sevensy-five acres of the best wood or timbered land in the vicinity of our navigable waters; or to that on a first rate new brick or stone house containing treelve fire places, in either of our cities; that deducting, ac cording to a moderate estimate, the cost of cloth. ing and other necessary personal expences, the an nual contributions of a laboring man without property, are, on a nedium calculation for the state, equal to one sixteenth part of his income.
Other taxes, which affect farmers of the middling condition, are not dissimilar in their operation. Their horses and oxen employed in agriculture, cannot be regarded as more eligible objects of taxation, than plonghs, harrows, and other instru. ments of lusbandry, the tools of a mechanic, or the library of a lawyer, or physician. Thoughall these articles have an intrinsic value, yet whenever they are sold, they must be immediately replaced.Distinctly consilered, they are objects of expence rather than of profis, being merely aids to that skill and industry by which income is accumulated, and without which, neither can be exerted with success.

The same observations are applicable with equal force to the produce of claries, tillage, and the growth of stocle on a farm, so far as these incre. ments are required for the support of a family:The physical wants of persons are so equal, thar with the exception of persons reduced to absolute slavery, the consumption of those articles which constitute the corumon food of the people, must always be in propartion to the number, rather than the wealth of different families. Hence it is hav been regarded as an axiom in finance, that tikes levied o:l the consumption of the necessaries of hes, are liearly equivalent to uniform tases on persats without reference to property.
Althongls the object is of minor import:ance, ye: the operation of the assessinent onfire plances, is very unequal. In our climate, three fire places are occasionally necessary to the conifortable accommodation of every family. According to our sys. tem, the tax is not imposed on the buidding as atu index of the wealth or income of the occupant, but on all fire places whether used or not and with reference to the condition of the building as being new or decayed. Hence it must frequently happen. thut the cottage of a man in very mexlerate circum. stances, will be subject to a higher asseasment than the ancient, but comfortable mansion of his opulen* ncighbor.

The assessment on mills, machinery and manufactures; on commercial investments; on the protits resulting from trades, professions, and cmploy ments, and on monlies lamed on interest, are in my opinion, liable to the most decisive objections.Unless they are impuised according to uniform and merely inminal rates, for the purpose of collecting statistical iufurmation, they are necessarily arbitrary and unequal. In far as they bave any operation,

\section*{20: NIIES' WEEKLY REGISTER-SATURDAY, MAY \(24,181 \%\).}
they tend to depress talents skill, and indus:ry; they expose individuals to odious intestigatums and comparisons, and serve to expel capital from the state.

It is an obvious policy of this state, to limit, by all reasonable means, those emigrations which menace our resources. Foriunately fir the people, this object can be attained by the alluring influences of interest and offection only. These may be manifesied by exonerating indistry and skill foum partial huplens, and by encouraging the fee circulation of capital and credit. In proportion to the improvements in the arts, and the progress of civitization, the interests of the community begome invulved. Our stute of society has already acquired such a degree of maturity, that agriculture, commerce and the mechanic arts, have become mutual supports and cependencies, which must flourish or decay together. Hach of these interests are equally affecied by whose laws by which contracts are formed and adjusted, and to all, an exact adherence to je rice, as the onty basis of a firm ererlit, are equally esvential. Owing to the subdivisions of real pro periy, tbe farmers, hitherto the most independent class of citizens, cannot pursue their business 10 advantage, wishout a pecuniary capital, or un oc casionai resort to credit. Some estates are best ad pleal to tillage; others for pasture; and in a third, wuyer forage is most abundant. Hence arises the necersity for mutual credits, or the use of capital Wh.ch may be failly purchased but which will retire from the influence of legal coercion.
l.te mechanic arts have sometimes heen represened as uifinurable to public morals. If instances cui be adduced where artiz.ns have become a degraled class of men, the causes of their depression are to be liseovered in political regulations which hate restrained their liberty and reduced them to poerty. The nature of their employments manifestly tends to a different result. It is in the work shop, that habits of order and attention to the ef fecis of in:elligent design are necessarily cultivated; and that firdelity, economy, and mutual co operation, ar. discovered to be duties of inchspensable obliga tion.
the freedom with which I have thought it my duty \({ }^{\text {th }}\) disclose my sentiments respecting the opera toon of the existing system of taxation, upon the interests of a greal proportion of our constituents, might, if my motives were unexplained, expose me in tue effecis of impressions, which self-respect requires me to obviate. It is now more than twenty beir3, since I presented a report to the house of representalives , \({ }^{\prime \prime}\) the U. States, in which the extraust. ing effecis of unequal systems of taxation in several of the sta'es, cupecially in New Fingland, were distinctly described. The opinions then expressed were not dissmilar from those now submited to your consideration. As the principles of that report were approved by congress, and as the benefits of the conserquent system, in equalizing the public contributions, have since been demonstrated by ex perience, I consider that I may failly claim to be ex empted from any suspicion of motives arising from my present situation if \(I\) earnestly recommend a rule of lixation which has reseived the sanction of the Unired States, to which I would ald a ferw objects of assessment, connected with our local circuinstances as buing best adapted to promote the interests of the public

There are I believe, no principles in which the friends o. civil liberty have more generally co.acurred, and in respect to which their opinions have becs more emblhaticully pronouliced, than wiat
judges of h - supreme judicial courts, should hold their office, durias good behavior, with sillaries adequate to heir independent support, and that they should never be permitted to exercise the functions of legislaturs.

The experience of eve: \(y\) age has demonstrated, that no science can be improved and perfected, un. less its interes:s are confided to the protection of a particular profession. The science of law, as it compreliends a knowledge of the human character, and the rights and duties of indiviluals, in every situation, and under every modification of society, ought to be cherished with feculiar attention.Though no controversies have ever existed respect. ing the general principles of moral and social obligation, yet the regulations of every fiee and civiliz. ed state, must be numerous, complicated, and artifici.l, and the knowledge and proper application of them, must require faculties of the mind which are rarely combined. Whenever the laws become flucthating and arbitrary, they cease to be rules proper for the direction of free cilizens; and whenever their expositors are influencel in their decisions by the ve riug gales of party politics, the lives, liberties, and property of the people are rendered insecure. Moreover, history informs us, that disorders in the administration of justice, are, of all political evils, the least susceptible of redress.

I'rior to the cluse of the revolutionary war, the julges of the supreme court were generally, if not invariable, designated from among themembers of the council. In May, 1784, a law was enacted by which the office of a judge of the superior court was declared to be incompatible with a seat in the legislature, or in congress. It was, however, at the same time provided that the judges should thereafter hold their offices, during the pleasure of the general assembly. The separation of the judicial and legisla* tive functions has remained complete; yet as the commissions of the judges have been limited to a single year, the security, and, perhaps, dignity of their stations have been somewhat impoired.

It is conceded that the legistature of this state, has hitherto recognized the principles whichap. pear as fundameutal articles in most of the Anerican constitutions, by adinitting in practice, that the judges are, in equity, entitled to re-appointments during grood behaivour, or the continuance of their ability to discharge the duties of their respective trusts. Still there is a manifest distinction between the tenure of an office during the pleasure of tio general assembly, and a tenure for a single year. In the one case, the office is defeasible by a majority of one brancis of the legislature, while in the othes, the concurrence of both branches is necessary to etfect a removal.

As the principles of the act of 1784 , in effect, ap. proximate to those declared in the constitutions of Massachusetts and several of the other states; as the sanctuary of justice cannot be remlered too secure and especially as our bench is, ai this time, adorned with judges distinguished for learning, talents, and purity of character, I presume that no period more unexceptionable than the present, can be expected to occur, for the restoration of provisions of the bigh. est importance to the present generation and to pos. terity.
There are no subjects respecting which the sen. sibility of fieemen is mare liable to be excited to impatience, than in regard to the riglits of conscience, alat the freedom of suffrage. So highly do the people prize these privileges, that they have sonietimies ascrib \(e d\) to uifiriendly motives, 10. wards particular sects and denominations, buchice.

\section*{NILES' WEEKLY REGISTER-LEGISLATLRE OF CONNECTICUT. 208}

Gulations as were sincerely intended to secule an equality of rights to every portion of the cominunity. Whenever the public mind appears to be con siderably agitated on these subjects, prudence requires that the legislature shoull review its mea. sure, and by reasonable explanations or modifications of tise laws, restore public confidence and tuanquility.

Happily for us, the principles which must govern all deliberations on these subjecis, are neither ab struse nor uncertain. It is the right and duty of every man, publicly and privately, to worship and adore the supreme creator and preseryer of the uni verse, in the manner most agrecable to the dictates of his own conscience: and no man or body of men have, or can acquire, by acts of licentiousness, impiety or usurpations, miny right to disturb the public peace, or control others in the exercise of their religious npinions or worship.

Though the gospel of Christ, like the ark of Gor!, dues not require the support of human strengrth, yet it is conducive to good order, piety, and morality, that public te.cciers of religion should be designated, and that laws providing efficient reme. dies for enforcing the voluntary contracts of the people for their support, should be instituted and constantly maintained,
In respect to the most suitable mode of support. ing the ministers of religion, there has existed sume diversity of opinion among different denominations of Christiaus. That by fixed salaries, has been and probably will continue to be, most generally approved. In whatever morle the support is afforded, the history of the church proves, that such has been the attachment of the people to their pastors, arising from the veneration for their virtues, grati unde for the consolations they afford, and the utility of their influence, wisen einployed in promoting peace and concord in society, that governments have more frequently found it expedient to restrain, than to stimstate the public munificence. It may also be observed, that the great body of clergy, have always enjoyed the lighest degrees of esteem, libe ralily, and influence, under governments of a \(p u\) pular form, and where the greatest equality of coudition has subsisted among the people.

In regard to the manner in which the right of sufliage ought to be exercised, it may be remarked, that not only the purity, but the freedon of the elective franchise, according th the dictates of private judgineat appear to have been cautiously secured by our ancient institntions. As every freeman is bcund by a solemn oath, that he will give his votes and suffrages as in his conscience he judges will condice to the best good of the state, withou, respect of persons or favor of any man; as motives of friendship, personal favor and even private ins terest, are by this obligation, excluded from cont sideration, it was inferred to be but reasondile, that the freemen, in forming their decisions with reference to the persous most suitable to fill uffices of honor or profic, should be exempied fiom those contticts of teclimg, which personal sulicitations, the influence of office, or colissions of opiniou, have a tendency to excite It must have been upon these principles, that the law has declared it to be a penal offince, inerely 10 oflicr to a frceman a writton vote without being privionsly solicited. 'the legrslature will, in their wisdom, discern whe ther any wedt founded coniplainis of the violation of these pionciples lave wrsen, in consequence of the present morte of excresing the right of suf frage, and it that cate, will dguhtleas apply the prupur remedy,

Ii is the policy of every wise state; to consider well its situation and resources, and by systematical arrangements, to acquire and maintain, sume honora. ble distinction among its reighbors, formated on a principle the lcast exposed to depression. In whatever relates to education, or the meins of unfold. ing and directing the luman ficulties, in objects connected with the great interes's of suciety, preyent and future, this state has nothing to apprehe ad fiom external competitions and rivalships. It cannot be a question whether ald our existing institutious ought to be maintained, but in what degree and in what manner they can best be invigonster?, extended, and directed to new objects of public utility. It is certain that no fame can be so dura. ble, as that which would arise fiom the possescion of institutions, for the culivation of the human iniellect of acknowledged pre-eminence; and in proportion to our success in obtaining this distinc. tion, will be the extension of an influence more brilliant and useful, than under any wlicli can be derived from accumulations of wealth or territorial dominion.

A general view of the circumstances of the state, presents subjecis for consideration which require brave, united, and patriotic councils, founded on a just estimate of our situation. In the salubrity of our climate; in the fertility of our soil; in our facilities for external and internal commerce; in the extent and variety of our industry and skill; and in the intellectual endowments and energies of the people, we may securely confide; but we cammot conceal the evidences every where present, that our wealth has diminished; that commerce has declined; that agriculture languishes; and that the factories, and niechanic arts, from which a great proportion of the peopie derive their support, are oppressed by the stagnation of markets and the . .eficiency ot an uniform merlium of exchange.

Some of these embarrassments are not peculiar to this state, and me owinf, to the calamitous and int. poverished condition of other conntries. The redress of others, has, very properly been confi led io our national councils, and from the oper tion of their measures, relief is gradually ex ending anong the people. Still much remains to be accomplished by our collective and individual exertions, and much may be hoped from those sanative principles inherent 11 tree goveruments, which serve to apply the detici. encies, or correct the errors of legistation.

An huvestigution of the \(c\) unes whic i produce the munterous enigrations of our inclustrious and enterprizing young men, is by far the innst important subject which can engage our altention. We c.an. int justly repine at any improvement of their condicion. l'ney are our relations and friends, who, in the honorable pursuit of comfort and independence. encounter volintary tosls and privarious, and the success of their eflorts, afords a most evhilirating subject fur contemplation. Still it is certain that llie ardour for emigra ion may be excessive, and perhaps the time has arrive.l, when it will be wise in thove who incditate removals to compare the vaw the of what they must re'ing inh, with what if ey can expect to acquare; and tu reflect, that schon's. churches, roads, and inany uther establishments nccessary (o) the comfort, preservation and dignity of society, s.e appumdages of real property in alce states; xud that lu a comparative estimate, the ex. pences of forming these establishinients anew, oughis in be adiled in tie first cost asd other charges nici. dent to new settleirsents.

On our part it is muportant in conviser ulethe: every thing has been done, which is practicable, \(2 ?\)
render the people ententel, iwdustriou, and fru1,1 ; and if causes are operating to reduce any class of citizens to a situation, which leaves them no ale ernative but poverty or emigration, in that case to a fiord the most specdy reli f.
I hope to be excusod, if I express a decided conviction, that the success of the inarufactaring sita\(b\) fishments of this country, is connected with otr most essential interests. A state which is dependent on another, for clothing, arms, pruvisiturs, or t'ie instruments by which they must be procured, cannot be tranquil, and must be insecure. I lave no doubt that our alvantages and resources for entsuring the complete success of these establish. snents, are superior to those of any other people; and I firmly believe that the embarrassinents under which they labor, are temporary; and that they will diminish under the protection afforded them by the national government, and the ope;ation of powerful causes, which are developing in their favor. Still, owing to the stagnation of cominerce and exchange, the present is an interesting crisis; and they now need all the patronage which can be afforded them, by government, and public opinion. All which I venture to recommend at present is, that: until our system of revenue can be revised and equaiized, that they may be exempted from assessments, capitation taxes, and services in the militia; and that as doubts lave been excited, whether manufacturing establishments are consistent with the seneral policy of this state, that this question may the settled by a resolution, expressing the sense of the legislature.

Notwithstanding every embarrassment incident to the present period, the rise, prontess, and actual condition of this state, in connexion with the American republic, affurds just cause for patriotic exultation. In particular, i desire to thank God, that my existence in this life has been allotted, clur ing a period, distinguished by remarkable events, that I have constantly witnessed his p:otecting care ofour beloved country; that I have seen the tice of liherty, the emblem of our independence and union, while it was a recumbent plant, fostered by vigilance, defended by toil, and not unifeequently watered with tears; and that by his favor, 1 now behold it in the vigor of youthful maturity, standing protected from violation, by the sound heads, glowing hearts, and strong arms of a new generation, elevat. ing its majestic trunk towards heaven; striking its strong roots in every direction through our soil; and expanding its luxuriant branches, over a powerful, united and prosperous nation.

OLIVER WOLCOTT
General Assembly, May sessiun, 1817

\section*{Legislature of Rhode-Istand. \\ GOVERNOR'S MESSAGE.}

The honorable se:ate and house of
representatives of the state of 12 hode- Island.
It is the boast and pride of the citizens of the thited States of America, that they alone of all the nations of the earth, are privileged in choosing whom they will, to watch over their affairs and to direct in their public councils. This iuheritance was bequeathed us by our fathers, and we are bound to transmit the blessing, unimpaired, to posterity.
In reviewing the political events of nations, we have much reason to be thankful to the supreme Fuler of the universe, for casting our lot in this "Nero Wrrld," for here alone rational liberty is enjoyed. Here we behold the asylum of the op-
pressed-a country growing in wealth, population and virtue, respected abroad and admired at home -at peace with all nations, and having entangling alliances with none-possessing a character for wisdom, valor and justice-our public burthens daily lessening, and our empire peaceably extending, with a rapidity unparalleled in the history of nations.
Such, fellow-citizens, is the situation of our common country, at the time we are entrusted with the political destinies of Rhode-Island. Be it our care to preserve her rights in the participation of those blessings.

Although the clangar of arms during the late conflict with Gireat Britain has not been heard at our immediate fire-sides, yet the citizens of this state have not been exemipt from a share of the public burthens; they have, however, contrihuted their portion to the public wants, with a promptness becoming freemen, determined to maintain invialate the principles declared by the sages of 1776 Though demagogues may have attempted to make a stalking-horse of the necessities of the times, the people have remained true to theinselves and their country, and have kept in view its honor and inde. pendence.

The philanthropist will regret the frequent recurrence of wars, which tend to impoverish and demoralize society; but we should recollect they always spring from the degeneracy of man; and that a defensive war is not only just but even necessary. The names of Greene, of IPerry, of Jllen, and other heroes, by offering themselves in the front of battle, in defence of their country's rights. have been seen covered with glory, and will ever be remembered by their grateful countrymen.

It is true that peculiar occurrences have caused temporary embarrassment to some of our citizens, but is conficlently hoped that the approaching season will dispel them, and a plentiful haryest crown their labors.
According to the ancient usages of this state, the present session of the legislature will be limited to the election of officers for the ensuing year. In performing this part of our duty, I trust we shall divest ourselves of all party animosities, and carefully investigate and decide on the merits of the candidates by this criterion only-"Are they honest, cafrable, and fuithiful to the constitution."
On this occasion I cannot omit calling your particular attention to the judiciary department of this state. Is the system perfect in all its parts? Does every man, according to our bill of rights, obtain justice, freely, completely, promptly and without delay? If on a review of this subject, amendments are deemed expedient, I would suggest for your consideration, whether the present time does not afford an opportunity.

It is a fact, established by experience, that an enlightened and upright judiciary, constitutes a main pillar in the edifice of freedom. What avails the name of liberty, if our persons and property are unprotected either from violence, the law's delay, or an uncertainty of judicial opinions?

On this first occasion of my addressing you, it may not be amis to give this public assurance, that at all times I will endeavor faithfully to administer the executive functions vested in me, and will cheerfully contribute my aid to any measure that may have for its object, the security of the lives, liberty and property of our fellow citizens; and to perpetuate the republican principles of our govern. ment.

May \(8,1817\).

\section*{Foreign Articles. \\ englaidi, \&c.}

Fnglish and French dates to . Ipril 21.
Imerican stocks at London, April 10-6 per cents. 102 \(\frac{1}{2}-103\); 3 per cen's. 61-61 .

It is now said hat lo d Cocher me will proceed ia a frigate, fully armed and manned, to South- Ame-rica-every thing fitted in the first stile. It is also reported that the Spanish minister at the court of Inndon has remonstrated against it, but it is tated the British government are glal to get rid of him, and have waved the applicition. It is expressly said that he means to join l. is force to that of the patriots; and we are really glad that they are about to receive such a powerful auxiliary:

It is almost impossible to tike up an English paper without seeking an account of a man being hung, for one crime or another. The frequency of occurrences of this kind brings to recollection a saying attributed to the priest stationed at Newgate. Whell the new drop was made, he, with others, went to examine the accommodations it afforded. One of the company thought the drop was not large enough-but the priest said he was of opinion "that six or sevell might hang within its space very comfurtably."

Forty-six persuns received sentence of death at the Lancaster assizes. A London paper of April 14 says "from fifteen to fifty capital convictions have taken place in almost every county." "Miltions of seditious and blasphemous tracts have been spread among the lower classes."
Eight of the "Luddites" received sentertce of death, at the late leicester assizes. A "framebreaker" was sentenced to be transported for life. Those executed left bebind them more than thirty clitidren.
The following is an extract from a handbill put incirculation at .IFanchester-possibly by the agents of government to frighten the penple, and aflord prezences for measures that could not be justified but upon some great emergency:
"Countrymen, the day of doubt and indecision is past' Treason and rebellion in open war, stand confessed! Perhaps before this reaches the public eye, the blood of civil strife, the blood of the inmucent and the guilty, the blood of the traitor and the peaceful citizen, have flowed in mingled torrents down the streets of some of the principal towns in the kingdom of Eingland!. Last night the 30 th of March, the night of Palro Sunday, was fix. ed upon a general rising and massacre, in furtherance of insurrection and open rebellion!"

We noticed in our last, the steady emigration from England to the United States. They who now come to us are chicfly of that class which once was the pride and glory of Eigland-the middle cluss, the botie and sitew of any country forthnate enough (1) have 11 , extensively; the poor, alas cammot dhange their residence-they are chained to the woil more tighty than our negro slaves, and the fich cain "live any where."

The sutpension of the hatras corpus appears tel ofirate much wore severely in Scothand than in Ris. gland Glagon, [raisley, and other manufacturDhe towns, sultiar the mast-"hardly a day passe withom heveral arrests being matle" Thise aub. jected to it are dungeoned withont examination, and excladed irom any intercourse with each other or thri fisht!, who, indeed, do not know where Whey are. This is the far-fanted "Britash latery," which formerly mate the islanders always speak of the Fre ach as "glanes:" but that day has past, and Ahn Bull says nothing on that subject.

The following is a copy of a circular letter from the secretary for the home department to the lurds lieutenants of counties:
"H"hitektet, Altereh 27, 1317.
"My zonn- \(\lambda\) s it is of the greatest importance to prevent, as far as is possible, the circulation of \({ }^{\circ}\) blasphemous and soditicus painphlets and writings. of which, for a considerable tine past, great num: bers lave been distributed about the countro, I have thought it my duty to consult the law offcers of the crown, whether an individual, found selling. or in any way publishing, such pamphlets or writ ings, might be brought immediately befure a justice of the peace, under a warrant issued for the purpose, to answer for his conduct. The officers, having accordingly taken this matter into their con sideration, have notified to me their opinion, that a jnstice of the peace may issue a warrant to apprehend a person charged betore him, upon oath. with the publication of libels of the uature in ques. tion, and compel him to give bail to answer the charge.
Uuder these circumstances, I beg leave to call your lordship's attention very particularly to this subject; and I have to request, that if your lordship should not propose to attend in person at the next general quarter sessions of the peace to be hold \(\cdot 11\) in and for the cownty under your lordship's charge, soll will make known to the chairman of such sessions the substance of this communication, in order that he may recommenil to the several magistrates to act thercupon in all cases where any person shoutd be found offending against the law in the manner above mentioned. I beg leave to add, that persons vending paimphlets or other pubfications in the mamer alluted in, should be considered as coming under the hawkers' and pedlaro' act, and dealt with accordingly, unless they show that they are furnished with a license, as required by the said act.

I am, sir, \&c.
SIDMOUTH.
"T'o his majesty's lieutenant
of the county of Chester."
The British parliament adjourned from the \(14 / h_{2}\) to the 17 th of April, on account of the illness of the Speaker. It is understood that the present parliament will be dissulverd at the close of the session. It seeuns determined to lay a tax of 20 per cent. upon the property of absentees.

Four divisions, of about 150 men each, marched into Manchester between 1 and 2 o'clock in the night of the 11th April, with military exactners and silence. The nature or object of these parties is not stated.

Castlereagh was sick, at the date of our last ac* counts.

The price of flour had further declined in England.

It was expected that the income tax would bc resumed to meet the exigencies of the government. A war establishunemt, as to taxation, in time of pase.

The prive regent. - The fullowing is the concluding paragraph of an adderess of "the bishop of the dhocese of Winchester; the revermad dean and preb indaries of the cathedral church of Westminster. with the other members of the said church, the chanceller, and arch deacons of the said diucese. together,with the clergy of the same," to the prince regent on the late attack made on lim. these revarend folks have well subjected themtelves to the "suspicion of being suspected of trenam" by thas making fun of wretched George Gucl/h
"Wi daily of er our prayers to food for the long coatinuange of those blessings, the fair piospect of
which is open to us [ourselves] by the exercise of every public and donestic virtue which so highiy dis inguish your royal highness both in your pub. lic and privase character, and which hath laid the surest foundation for the future lappiness of your prople, tofrether with your 0 own, and unsured to your roy.al highness that glory and proxperity, which is the never fuiling reward of every good and virtuousking in the love and affection of a grateful people."

ERAXCE.
-The Federal llepnblican significantly calls the king of France "2 sovereign in a go-cart."
The duke of Wellington was to leave Paris for England on the 28 th of April-as it was said, "to atitud the feast of St. G orge."

French 5 per cent. stocks, 66 f . 90 c . to 6 r.
The pamphlet entitled "La Coalition et la Erance," which was publistred in Paris some time ago, has produced a very curious sensation. In this p.imphlet, most injurious aspersions are flung on the British and Ausirians courts, and to these powers all the humiliations and sufferings of France are ascribed. Persomal reflections are made also on the dike of Wellington-and it is said that he has com planed of them, demanding the punishment of the mathor. The minister of another of the allied powers interfered in his behalf with such success, theit the author, who manfully avowed himself, widd demainded to be fairly tried by the tribunals, was libe rated without even a reprimand This affair has given rise to much diseussion in the diplomatic circles, as it is pregnant with important results. Since this the p.mplalet has disappeared from circulation, and rumor says the copies have been bought up.

Paris, April 15.-A le'egraphic despatch, dated Calais the 10 th of April, announces the arrival in that harbor of several transports with 450 French Gu'. Intian prisoners of zoar, zwho had been in the serwice of Ergland, from wohich they zuere now discilarged. The French will te transmitted to their departments.

\section*{BONAPARTE.}

In the late debate on lord Holland's motion, earl Bathurst said-" \(f\) t might be a question, whether this person zeas to be cletaincel at all; bui if he was to be detained, the most vigilant measures ought to be adopted to prevent his escape."

\section*{NETHERLANDS.}

Fourteen sail of vessels were preparing at Ar1sterdum to bring out five thousand Siviss and Got man passengers to the United States. This rapid emigration appears to have alarmed the Swiss a wd German deculers in mens, and many efforts, fiar and fulu, are making to check \(2 t\). Among the latter, "Ir!ters from America," (such as British truvellers, coufined to a garret in London, are accustomed to Whte about hite aftios of our country) are exten. sively published, with a sort of semiasficial sanction. Oire body of Germans that arrived here sumetime ago, were certainly cheated and deceived by the Duichman who curracted to bring thern over -a man as phlegmatic as the water in tire catrals of his country, and some of them suffiered much in consequence of \(i t\). But several of those who came in that vessel, we know, are exultiug in the change they bave made, even on the unreasonably hard terins that were imposed upon them. The Paris papers attribute these great emigrations to "Dutch speculaisons."
spais.
The treasury of Spain is in the most beggarly condition. A great effort has been made to raise only 500,000 dollars at Carliz, among the meichantsbut the application, if wite treated with contempt, *as received with mariked undifference.

Many arrests are making in Spain. The vile gó verument has numerous agents through the country who mix with the poople and abuse the king, his ministers and pricsts, to lead others into like expressions, who are then marked, and snon after privately arrested "to be seen of their friends no more." The ininds of the penple are represented as in a state of desperation, through poverty and despotism. The fellow who infornied against the patriot Rechar, at Valencia, was assassinated on the on the anniversary of that offence; his head was cut off and stre: upon a stake in the public square, with this inscription-" \(D\), bt I pay to the heroes Re: char and his complarions, sucrificed through my traito. ous denunciation."

\section*{italy.}

The Paris papers say that the disputes between the United States and Naples still remained unsettled.

The labors of excavation at Pumpei have lately been renewed. On the 22d March, a magnificent temple was discovered, in the nidst of which were found statues of collossal proportions, one of them from 20 to 22 palms in lieight.

THE pope's hiliff.
To the editor of the L,ondon Norning Chronicle.
Sir-Having observed in a moruing paper of this day (April 10th,) a loose tralslation of an importa ant papal document, which will probably be quoted for generations to come, I send you a more literal version, together with the Latin itself, that you may comptre them, and print the English fur the information of your readers. I am, \&er. \&c.

Schutator.
P. S. I shall publish immediately both the Latin and English at Mr. Hatchard's, with notes and illusrations.
Translation of the bull against bible societies, issued June 29:h, 1816, by Pope Pius VII. to the arch bishop of Gnesh, primate of Poland.

PIUS \(P\). \(\mathbf{P}\). Vir.
Venernbie brotier-Health and apostolic benedic. ion. In our lust letter to you we promised, very soon, to return an answer to yours; in which you have appeled to this holy see, in the name of the other bishops of Poland, respecting what are called hible socicties, and have earnestly inquired of us What you onght .0 do in this affair. We long since, in ceed, "ished to comply with your request; but an incredibie variety of weighty concerns have so pressed upon us on every side, that, till this day. we could not yield to your solicitation.
We liate been truly shocked at this most crafly derice, iy:oh hich the very foundations of religion are undermined; aral having, becallse of the great importance of the uhject, couferred in council with our venerable beethren, the cardinals of the holy Roman churcle we hive, with the utmost care and attention, deliberated upon the measures proper to be adopted by our pontifical authority, in order to remedy and abolish this pestilence as far ats possible. In the inean time we heartily congratulate you, venerable brother, and we commend you again and again in the name of the Lord, as it is fit we s'iould, upon the singular zeal you have displayed under circumstan. ces so dangerous to christianity, in having denounce.t to the apostolic sce, this clefilement of the fuith so imminently dangerous to souls. And although we perceive that it is not at all necessary to excite him to activity who is making haste, since of your own accord you have already shown an ardent desire to detect and overthrow the imprious machinations of these innovutors: yet, in conformity with our office, zve again chld again exhort you, that zwhatever you can \(a\) chieve by pozver, provide for by counsel, or affect by

Qublarity, you will daily execute zvith the wimast ear nestness, placing yourself as a wall for the house of tsrael.
With this view we issue the present Brief, viz. that we may convey to youl a signal bestimony of our quprobation of your excellent conduct and also may endeavor, therein still more and more to excite your pastoral solicitude and diligence. For the general good imperiously requires yon to combine all your means and energies to frustrate the plans, which are prepared by its enemies for the destruction of our most holy religion: whence it becomes an episcopal duty, that you first of all expose the reicksel ness of this nefurious scheme, as you have already done so admirably, to the view of the faithfiul and openly publish the same, according to the rules prescribed by the Church, with all the erudition and wisdom which you possess; namely "that the Bible puinter by heretics, io to be numbered among other prolibited books, conformably to the rules of the Index (Sec. No. 2 and 3 ,) for it is evilent from experience, thut the holy Scripuures, when circulated in the vulgar tongue, have through the temerity of men, produced more harn than benefil" (Rule IV.) And this is the more to be dreaded in times so depraved, when our holy religion is assailed from every quarter with greai cuining and effort, and the most grievous wound are inflicted on the church. I: is, therefore, necessary to adhere to the salutary dicree of the congrega :ion of the Index (June 13th, 1757,) that no versions of the bible in the vulgar tongue be fermitted, except such as are approved by the apostolic see, or publishied with annotations extracted from the zuritings of holy fothers of the church.
We confidently hope that, in these turbulent circunstances, the Poles will give the clearest pronfs of their attachment to the religion of their ancestors: and by your care, as well as that of the other prelates of this kindgom whiom, on account of the fafth we congrutulate in the lorcl, trusting that they all may very abundantly justify the opinion we have entertained of them.
It is moreover necessary that you should transmi io us, as soon as possible, the bible which Jacob Wuick, published in the Polish langnage with a sommentary, as well as a cupy of the edlition of it lately put forth without those annotations, taken Gom the writings of the holy fathers of our church, or other tearned Catholics, with your upinion upon it; that thus, from collating them together, it may be ancertained after mature investigation, that certain errors lie insidiously concealed therein, and that we may pronounce oir judgment on this aff.ir tor the preservation of the true faith.

Continue, therefore vener -ble brother, in pursue this trily prous courve ufion whluch you huve entered; vis dilugemily to fight the battles of the loord for the sound doctrine, amill worarn the preople intrusted to your cate shat they fill not into the statess which are pirepthteed for their everlasting ruin. The church demands thiss firom yoll as well as from the other bishops, whom (u)- -escript equal'y concerns; and we inost allxiousl! expect it, that the deep norrow we feel on acculuns of this new species of enres ootich an adversaty has on abmendantly cozon, mas, by this cliecriag hopeo, be somewhat alleviated, ant, we aluats very leartil! mavke the choicest Hessinge upon sourself and your felluw-bialiops, fir the good of the lord' Aock, which we impart to you and them by ou: aportolic benediction.

Given at Roune, at St. Mary the greater, June 29 \$816, the 17 th year of our Pontificatc.

The country between Irckutsk and Nerischink, in Siberia, has been invaded by a great number of bears-penetrating the hamlets and remote habitesions in a most firious manner, the inhabitants of which had much difficulty in repelling their attacks.

\section*{swent.}

Several regiments of soldiers are stationed in the capital, to give energy to the will of the government.
A "conscription," no longer a work so shocking, seeing it is not made by order of 13 onaparte, is making in Sweden. It takes in all the young men in the kingtom born i: \(1790^{\circ}\). There sppears to aave been a very serious conspiracy to put Bernadotte out of the way, and 'restore' the old line of kings.

Slockholm, Brarch 25.-Count Gyllerstrom, marshal of the court, and proprietor of estates in Yomerania, is exiled from the kiagdon; he is to leave this capital in three days. There exists here at this monent a fermentation in the public mind, of which it is impossible to forsee the consequences. The govermment displays great energy. Vigorous measures are spoken of as proper to repress the parties which are showing themselves in the king. dom.
nureish aventca.
The ien was firm in the St. Lawrence at Quebee on the first of olfu. Many May-poles were planted uponit. The same thing is sail to have happrened 40 years ago; but then the ice gave way on the 2nd of the month. Much snow remains in the vicinity. Later accomms inform that the ice laoke up before the town on the 4 (h).

WJ:AT Ivtiss.
The penpic of tnany of the West India islands are serious! \(y\) alarmnd as applyaching a state of starvation. At St. Kitts, after stating the supply of flour on hand, they pray the goverion to open the port. The export of "ground j, rovisions" is furbidden at St. Vincents.
mUUTH A MFRICA.
A vessel has arrivel at Buston in 39 days from Pernambaco-passer gers don . Intorio Cinnzaloo de Cirus, minister fiom the new government of the Unitcd States and his suite. Every thug was tranquil aad prosperous-the patrint administration was acknowleiged by all the towns immediatery dependert on Perrambicu, ant ly the perple of the ilternor. The provincial goveriment had resolved In raise a regular army of \(15,(100\) men, and the rovince of Pemmonbico alone is sail in be capa, le of firminhits 40.000 well regulated militia. If o-llic Brazillion kiagtoin may Le consitered as -pproching is emb The cleray uppeor io have aken part with lise revoiutionisis, which is a gre..: thing there.

The Portuguese minister in the Únitfinitis ins published an official notice uf the bhok k...t if the

t.ithful majesty"-2s the king of Porturail is cillel a There are may printwrs in the timted States nho, when a British vessel of w or has beet sipuken os sea, 太c. describe lier ss, "his majest?'s" ship, jost as an Englishman would do, without a national qualitication-and there are others who rent the sir with huzzaings for the "Epanish patriots," who e.ll those struggling for emancipation from Ferdiaand and the inquisition, "insurgents."

A report prevailed in I andon that the Byitish ministry, in consequetce of the ffier of some commorcial advantares by Spain, had accepted a pro. position of Ferdinand to mediate between him and ihe iadepenclent provinces of S. A.-and it was saitl that Cuchbury was to command a squadron destinesl for the coast.

The dreadful war of extermination still rages in Venezuela. Bolivar, with an army of 4 or 5000 men laving passed into the interior for the purpose of forming a iunction with the patriot general Ardenot, approaching from Santa Fee, the royalats recovered Barcelona, and massacreed the amall garrison left, with all the women and children. A general butile was soon expected, not far from calates.

\section*{CHRONICLE.}

The supreme congress of the Mexican republic, have voted to Henry Clay, the speaker of the honse of representatives, therr thanks for the disinterested, manly, and generus sentiments he expressed on the Hoor of the house, for the welfare of that infant republic.

It is stated that 800 rafts of lumber passed Faston Penn. in the course of one week, which upon a rougl: calculation makes upwirds of 30 millions of feet -or in value about 600,000 dollars.
The several banks of the city of Albany lave a. dopted the following regulations in respect to all notes offered for discount.
Accommodation notes hereafter oflered for dis count, to be drawn payable 63 days after date 111 notes drawn for a shorter period will be considered as business notes, to be paid when due.

This regulation has been made in consequence of a late law of ifew lork authorizing incorporated banks to receive seven per cent. interest for all notes discounted fur a longer period than sixty days.

The Indians in Niew-Yorh, having had a very slort crop of corn last year, are said to be suffering much for the want of provisions. The Indians of the six nations now in that state are given as follows: but we are inclined to suppose that their numbers are over-rated:

Senecas, 2000 ; Cayugas, 100 ; Onondagos, 700 Tuscaroras, 316; the Stuckbridge tribe, 4000.

Tae Hessinv fly.-The crop of wheat last year, aotwithstanding all that was satid about it in the newspapers, wis a very large one, and the quality excellent. The com crop was short, and hence : Wheat has maintained its present enormous ice.
There are so many people interested in the buy--ing and selling bread-stuffis in the United States, for home use and foreign demand, that we always suspect any thing we see in the papers having a tendency to raise or depress the price of them, and at first were inclined to believe that the reported ravares of the Hessian fly were not nearly as extensive as some had repofted them-bu: that scepticism, we are sorry to say, is much lessened by the united accounnts already received from our owt neighborhood,
froun the liustern shore of Watulaml, several payta of Virginia, and fiom Yuk, \&es. Pem. To destrow, ordcfeat, this terrible insect, is a thing wortiy of the most profinual plalosopliy. Late at comons, however, from the neighborhood of York, assure us that some late rains have entircly ol anged the appearance of the wheat, sud that there is every prospect of a lux. wiant crop. And we have also the welome intelligence of a prospect of large crops in other quarters.
It is unpleasant to add to the foregoing, that the "cut-ivorm" has made much destruction among the yomig con'n. The coolness of the season is theug! t favorable \(t_{1}\) this enemy. But, it is sail, that by miking a few holes with a sharp stick near the hills, they may be destroyed. They fall in and camot get out. Sume holes, it is stated, have been found halffilled with them in a single night.

The Floridas.-There was a report at Jaris that the Linited States had purchased the Floridas of Spain.

Bank of the linited Staies.-The scrip or stock of this bank, for 65 dollars paid, has been selling at \(\$ 100\) a share.

China-A London paper is alarmed because there were no less than forty-two ships, chiefly Americans and Swedes, lading at Canton with teas, for Furope -intimating that their cargoes are designed to be smuggled into England. Certainly, we have as good a right to smuggle as they have, though, like them,' we do not suncion it with offricial documents'.

\section*{Marshal Lallemand.}

The following is copied from the Biographical Dic tionary-and is interesting from the circumstance that gen. L. has lately reached the United Slates Baran Lallemand, field marshal, commandant of the legion of honor, knight of St. Louis, \&cc.

In the campaign of 1805 , whilst colonel of the 27 th reginent of dragoons, he signalized himself at the head of his regiment and was highly spoken of upon several occasions. He distinguished himself also in the campaign of 1806 and 1807 in Prussia and Poland, and was made an officer of the legion of ho. nor. He passed afterwards into Spain, when, he re' ceived, the 6 th of August, 1811, the dignity of bri-gade-general, which he deserved by a succession of the most important services. On the 11th of June, 1812, he opposed a column of linglish cavalry near Valencia, and on this occasion was again honorably mentioned. Returning into France at the time of the restoration he obtained from the king the cross of St. Louis, and the command of the department of Aisne. By means of this command, in March, 1815, he endeavored assisted by his brother general of artillery of the ex-guard, io take possession of the arsenal of Fere, and to make it a depot for the usurper; but this attempt was frustrated, and the two brothers obliged to fly from the pursuits directed against them. The prompt arrival of Bonaparte permitted them to re-appear, and they both served him with the most unremitted zeal; he rewarded them for it, by giving one the office of lieuten. ant-general and the title of member of the house of pecrs, and to the other, the command of the foot artillery of his army. It must be acknowledged that at Waterloo they both gave proufs of the greatest courage. They afterward followed the fortunes of their master, and went with him to England. They are both comprised in the decree of the king of the 34th July, which orders them to be brought to trial before a council of war.

\section*{A Naval Establishment.}

If we know the present sentiments of the people of the United States, they are decidedly in favar of a respectuble naval establishment.* \(0:!r\) ğallant little Havy in the late war "hewe lits way to fame," and inimensely contributed to the uational strengtin, by the splenior of its deeds, and vexed and injured the eneiny in his tenderest point. Yet, with the exception of the fleets on the lakes, it could not assume the character of a proiector of the coast on account of its weakness; and, probably; in this respect, did as much harm as good. If, therefore, we are to have a naval force beyond a few frigates and smaller vessels, (rather calculated to annoy the commerce of an erremy than to defend ourselves, ) it seems sgreed that it should be of suricient power to guard us dfectuxlly; which, it is presumed, may be accomplisted by twenty ships of the line and the requisite mumber of figigates, on a permunent establishment. Vessels of the minor classes, except a few to act as temlers, carry rlesputches, \&ec. need not be buift and k cpt tep in time of peace; for in : few wecks affer a declamation of war we can, at any sime, have as many of them as we please, and a great expence will be saved.

With a leet of twenty leeavy ships devoted to defen: the coast, while the frigates were scouring the ocean and our private armed ressels should be vexing every sea under reason:ble prospects of geting their prizes s.afely into port, no nation would rashly yuarpel with us. England, he great leviathan of the deep, with all her mighty means and resomces, contll not send across the Atlantic and main tain near our shores, a power competent to meet it; and her -Velvons and Howese and Si. Fincents would blast their fame if they ever came into contact with it Amies would no longer be tuansponted at pleasury thouns't the American seas, alarming and harinting tho whole inaritime fiomtier, athl landing sul rething whonever they thonfht proper; nor wonld the war-whoop resonnd throngh the walder nifos-fir the supplies of men and the inunitions of Wal th the entomies would be rendered on diftieul and nucertain, that, in general, if they did not fia! frob omp hands, they wautd is least be kept from acting offensively against us. Wi!ls mul . mericuln Heet of twenty sail of the line, collected at a point
 shonat wel oughata Cochrone theatereing, by ardes? of thin fon rumen', "6o deatroy all fínces anviliable"
 by cmifharating defenceles vilinges, sfier ineanly robbur the perple that intabiteal tien. If ee hal l'ard swe in farce if this in 1812, there wohbl have bech lont lillle hard (limi)] lisitith i: the war, agd hine tenthes of the mititia semices rordered therein cand? have been dispeasel with. Who shall osmen the valine of the lives lost in those services'-the number, alas! is feurfil, and among them were many of our

\footnotetext{
-I am clearly of opihiom, if we have smy matal force begond a few frigates and lighter vessels, that it ought to be strong elough to if fond itelf and se - 10 relieve the sea-cuast of was cuctiny rather than iuvite him to it.
}

Vue \(x\).
best and most useful citizens. Some died in batile and there is a consolation in the belief that they did nut die in vain-but what mullitules perisheel by clisease and the hardships incident to the life of anl inexperiencerl soldier? I have been culd that, ia the early part of the war, while \(P_{\text {d }}\) de's regineat was healthy and had every thing in abundance, that , her reginents, with the same supplies and conveniences, were perishing by scores and almost in a state of starvation. There is nore mystery in learning how to live in a camp, than to fight an enemy; and amons our soldiers [regular's and militia] during the late war, it is probable that perished in their quarters for one killed in the ficld. The militia were always in a state of rawness; ofion called out on an emergency and, ever hurried to the places whereat they were in be stationed, were p"evented from obtaining inany of their proper conveniences and necessaries, on the whole of which they would have been hardly put to it to lies; and, in consequence, an extrandinary mmber of thein iniserably, and unelessly, perithed: at times they were suidenly Irawn from the mouniain's top to the low gromds of the coast, where they died by hundreds. How great then wo:ld have been the swinis of the invaluabie lives of freemen, cliefly in the bloom of youth, by such a ficet as ss sp okein of !-anci, passing from that in what we can better comprehend, how great would have been the saving to tine country, in regard in is wealth, if such large bodies of men, instead of buthenugg the republic, had been kept quienly at home to enjoy the repose of their families abd pursue their ordinary businesses! After thinking considerably on the subject, I incline to the belief, that had this been the c.ase, it woull have saved to the govermment fifty, and to the people, as privale indivduals, not less than ons humdred milious of d.tlens, incladin! their losses of time and extraordinary distursements, surk forever, It appears then that a nivy, competent to guard our coast and check Lhe operations of an onemy in the Americ.an sein. wouid he the che.nest possible defonce of the nation. But heyond this expent, as to heary vessels. it onght never to be permittec! to \(\mathrm{g}^{5}\)-mal we are olad to wee it spllumehing that extent with de irable rapediy. We have three it's (besithe the ships o. lake (Ditaria) one other is builliner, and prepametions are making to lay the keeis of two more. the nuvy commissioners have issined propusals for Whe muthanery fir three stean fitigates, atul it is understiond that several friguted of the laricst class ato bont to be con'ractal to:
Sime h we suppised that wh have arrivel nearlv 4t purfictan in the act of buiblan's and mant ang Bips, if the Unite.i states, Ilac fregrens tuwards It, in the lax eh it y geato, tat been su great as to
 nter of any nttempt to unite celerity whi foree witle convenirnce and saf-ig. There is mothing in be compartal with our sthps and seamen but the onges of them; and it was trily a sulyect of jus pride that tirland, whth her immense commerce and mighty mititry on mine, c ndescend to tate so in any lissuly fromus. When the late contest broke oul, she, with amazement, discovered that among her "thousewd shyys of war" she hacd nuthing the to
coniroul, on equal terms, the operations of our "Half a dozen fir built frigates," as slie had sneeringly called on little navy, and could do notbing wili them except literally to block them up in ports and harbors, from which they would occasionally escape notwithstanling, and, lating searoom, go where they pleased: Aud then she went 20) work to build or fit out some thirty or forty slips expressly to manage the "half a duzen." Buit still she thileil-lier lesscu vessels of war were always capitured when met with, her commerce was assail. cd in every part of the world, and she was compelled to seek protecion in a vast superiority of force, the "ulima ratio" against superior skill and conrage. 'The term "cruising f:igates" was expunged from her admiralty books-frigates were convoyed by ships of the line, and fleets of merchantinen were surrounded by vessels of war. The Indepen. dence and Washington ( 74 's) have been fully tried, and, notwithstanding all the croakings about them, are hifhly :pproved-their gencral model and inanner will probab!y he observed as to ships hereafter to be Duili; but from the science of our naval officers, so carefill to observe and so competent to cinderstand all that belongs to their lofty profession, in doubt some improvements may be made. The ship builiong at Woshington, under the zealous and immediate inspection of the veteran Rodgers, is spoken of as approaching the point whereat it is expected we shall have to stop. Our ships of the line have all the ease and swiftness of the best frigates with the power and strength that belongs to tiseir class; so that, barring accidents, they can pursue or escape as occasion requires, with equal success.

Tl.e proceding remarks originated in an examination of onr "pigeon hole" of scraps, where we found the following items :
"The United States ship Promethens went from Boston to Cronstadt and returned, in sezenty-sia days. She was absent only 101 days- 25 of which she lay in Russia."
"The United States brig Boxer, capt. Porter, was off 'Turk's. Island on the 4 th instant, all well, having jrassed within 200 miles of Bermuda, and performed a route of 1300 miles in seven dlays from the time slie left the anchorage ground at Staten-Island."
"A ship called the Beverly arrived at Boston some months ago from Canion. She left the former place in July, 1815; stopped three and an half sionths in Valparaiso; visited all the Sandwich Islands in the l'acific ocean; loaded in Canton; came in the eastern passage, through Dumpiera Straits; s:opped nine lays at the Cape of Good Hope; and azeraged fur the whole time ubsent 5 kwo :s (bnd 1.8 h ; and landed 755 :ons of goods, consisting of 12,500 packages, not one in the least damaged.
Aud what is most remark:lble, during her voyage romild the world, she did not lose a spar of the smallest size, "100 had the most trifling accident to happen; and the very s:ails whith were bent before her s:ailing were constantly worn ciuring the vos. age"
"The schooner Gazette sailed from New-York on the 10 th of February last and arrived at St. Bartho lomews on the 21 st of the same month; next day tonclied at St. Thoonas, where she remained 24 lours; then proceeded to St. Jago de Cuba, where she ar:ived on the 28 th ; remained there 16 days, and sailed fo: New- York on the 16 th instant, and was only 6 days from Crooked Iqland to S:undy Hook -having performed this circuitous voy:ge in 45 days. Besides, it is ascertained that the Gazette,
while absent, has been in port and detained by privateers 19 days and becalined 7 days. The result then is, that she has sailed 4000 milies in 19 days, which is an average of more than 200 miles a day."
Other cases of equal speed nigh: be added, but these are sufficient to shew the perfection of buitding and managing vessels to which we have arrived. Let this perfection be directed io the nutional service, and \(n o\) foreign army will ever again pollute the shores of the United States.
The cost of supporting a naval force of 20 ships of the line, in uchual service is thus estimated. *

For one ship of the line.
92 officers and petty officers
280 able seamen,
233 ordinary seamen and boy's
l'y and clothing of marines
Provisions 35,972
Medicines and hospital stores . \(\quad 5,000\)
Repairs and contingencies . . . 40,000 202,110

20 ships at \(202,110 \$\) each per ann. is \(\quad \$ 4,042,200\)
The amount is much less than was the cost of drafting the militia, and their individual sacrifices and losses, in a single state, in one year, during the war. 10,00 ? American seamen afloat, in ships fitted to protect the coast, would do more for the defence of the country than 50,000 militia, and at less than half the cost, man for man-the losses of individuals drawn from their business being superadded to their pay and subsistence.

There is a danger in vesting so great a power, as the establishment of such a nary would create, in the hands of the executive. But perhaps, this is an evil to which all govermments are liable. Happily, we can correct by the the ballot box.

\section*{The Southern Indians.}

We have always considered the conduct of the British regarding the Southern Indians, ..s peculiarly cruel and unjust to them and to us-as a wanton waste of human happiness and human life. From the foundation of our government until the massac:e at lurt Mims in 1813, the best interests of these tribes had been our particular care: men of high and honorable minds had been stationed amongst them to assist them with counsel, and protect their just rights from every encroachnent. A spirit of peace was zealously cultivated, and much inoncy expended by us to instruct them in agriculture and the urts needful to their prosperity. Instruments were furnisheal and schools established; and already they had many pretty well-managed farms-the men driving the piongh and attending their cattle, and the wonien were spinning and weaving, \&ic. The benevolent Hazukins was their common father; his whole soul appearcd to be embarked in the project of p'ilanthropy, and every administration seconded his beneficent view's. The time seemed to have nearly arrived when they were to have reaped the fruits of an honest care of them-but the spoiler came; the spirit that had destroyed millions on millions of men in the east, entered the yet peaceable plains of the west, and the restless disposition of the indian was excited to raise the tomahawk against his benefactor! The plough was laid aside; the quiet of the forest was disturbed by the war

\footnotetext{
* See report of the secretary of the navy 1811Weekly Register, vol. II. page 137.
}

Whopp of the savage, allied to Euglishmen-defenceless settlements were laid waste, and their innocent people des'royed with a degree of ferocity hardly to be paralleled. Hundreds of those who attacked Fort Mims, and massacred the garrison, with all the women and children who sought refuge there (some 15 or 20 exceptes!, who effected their escape while the savages were busy in slaughtering and burning the rest io deatl:) spoke the Einglish language, and had been in constant intcrcourse with the whites What was the consequence? The besom of destruction passed over them, and thousands of them were swept from the face of the earth by the war that gen. Juckson and others carried through all parts of their country. Prostrate, they sued for peace-and their life, justly forfeited by crime, was granted to them. Mhey had nothing to expect but extermination-yet they were spared. Still Cireat Pritain seemed unsatisfied-blood enough had not been shed; and, though she made peace with us, she furnished the savages with the means of continuing war, and sowed the seets of new c ntentions. Depots of arms and ammunition were made; and a very strong fort in the Spanish territory, well furnished with cannon and every thing needful to its defence, was given to them as a rallying point and place of refuge. The fort at Appalachicola was blown up by one of our gun boats, and its deluded tenmts miserably perished. We then hoped the British had left the indians to themselves, and that a remanat inight be saved. But the work goes on-the desire to obtai:s a pack of peltry at any cust of human life, or maintain an ascendancy in these tribes to imjure the people of the United States, continttes. Several stuecessive Einglishmen, under Spanish license or suficrance, with an official or surt of official character, have been with them - exciting hopes that they [the agents] know cannot be realized. Where is this business to stop ? It must stop. Any IBritishagent found among these Indians, within our territory, exciting them to murder, ought in be seized, and triel, and punished, with less pity than is due to a sheepkilling dogand, if Spain lends her territory to such men to organize hostility in the tribes, Spain must be dispossessed of it. The law of self-preservation requires it. The women and children of our frontier shall unt hold themselves dependent on the mercy of Britilh indian agenes for their lives.
We have sai ! that the conduct of the IBritish in regard to the Southery indians was peculiarly cruel and unjust. 'Their conduct was cruel and uijust to all the tribes, in vantonly leacing them to war; but they whose consciences may permit them to justify the murders and burnings at the River Rasin, \&c. will feel much at a loss to palliate the proceedings of the enemy in respect to the Crecks. These were led in batlle with a moral certainty that they would be beaten. It was truc, they might massacrea few harmtase individual Americals, but no one could have been fool enough to suppose that they had power to uffect the gencral operations of the war-and their engagement in it was a wanton waste of lutman life, and a marring of the most benevolent schemes that liad been adopted by us to ameliorate their condition.

The Lawer Crecks lave lately manifesied a ter! unquiet dispotition. They liave already forgoteon that we refused to exierminate them, as we mifht, when they exlerminated pur peopls, as they cuuld. They have agsum listened to the seducer, and are acting in a way that will go far to reconcile their Lest friead's to their exterinination, wheh, I fervently wily, may hearen fusbil!-Suc! have beea
their proceedings that, we are told, gen. Gaines expects shortly to be compelled to invade their country and "effictually subdue them"-fir which purpose it is thought that a few of the Georgia militia will be called out.
The following letter has been published at . Mitled Serille; and is, upon the whole, about as impudent a thing as we ever saw. If the agent spoken ot is ever caught withinour territory, let him be punish-ed-if within that of Spain he meditates murder and excites walr, a neutral country ouglit not to protect him." The period of submission has past. The republic is no longer in leading strings. Fingiand will never openly sanction such proseedings, if we openly punish them. British "humanity and phitanthropy" towards the indians ! !-Who placed the knife in their hands-who paid bounties for the scalps of babes-who permitied the buruing of tic wounded? My soul freezes with horror when I iock over the pages of the legistan and view the things that have past. But to the letter-if the "agent" arrives and accomplishes the object hintell at-the dissatisfied Creeks will be extinguished. What need of this? There is romm enough for them and For us. Let tliem live and be happs.
-7. Aubuthnot to the commanding officer at Fort Gains
Okutukive River, 34 March . 1917.
"The head chiefs request I will enquire of pu:, Why American settlers are descending the chati. houchie, driving the poor Indian from his habitation, and taking possession of his home and cultiva!ed fields
"Without authority, I can claim nothing of you -but a humane and philanthropic principle guiding me, I hope the same will influence you-and if such is really the case, and that the line marked out by the treaty of peace between Great \(13 r\) - in and the United States, respecting the Indian nations, has been infringed by any of the citizens of the lat!er, you will represent to them their improper conduct, and prevent its continuance.
"I have in my possession a letter received from the frovernor of New. Provideace, addressed 101 im by II. B. M. chief secretary of state, informing him of orders given to the British ambassador at Wanh. ington, to vulch over the interests of the Indian nutions, and see their rights are faithfully attended to and protected agreeably to the treaty of peace isade between the British and the Americans.
"I an in hopes that, ere this, there is arrived at New providence a persou from Great liritail with authority io act as agent for the tadian mations-. mid if so it will devolve upon him io see, that the batndary lines, as marked out by the treaty, are not in. friugred."

\section*{Public Economy.}

A very respectable society hiss been organized at Philadelphia, under the name of "The l'entes! he wis Sociery fur the promotion of Puble EConomy" Its objects are stated in the folluwing preamble to thei. articles of association-
- The Floridas were not nentrat during the warall the excesses of the Crceks waic pit in motion at P'onsacola, \&ic, and the Britis' tramsported arms, \&c. Whrough the cruntry thmalested. Vivery prino ciple of natural and civil lave would lave jusitien us in seiviano upon these colonies, and it was a graml mistake that we dith ant do it. It werult have adeled nothing to the cost of the contest, and might have forl to a spocsy setlement of our ditereness wath Spain.
-The prosperity and happiness of a nation clepend the attempt is given over, and they perish in the upme tios tudustry, the economy, and the morals of bottom of the holes.
iis people - to promote, to encourage, and to proicct these three great essentials of national wealth and character, is therefore of the first importance is the sta'e-man, and the philanthropist. To multip'y tue productive powers of lahor by ascertaining and pointing out its most profitable direction, is to athere? additional leisture for the cultivation of the mind-to inculcate a prudent and judicious expenditure of money by instructing the great mass of the community in the modes of economizing in theis fuel and diet will encourage temperance and accumulate the productive capital of the countrywhilst united with these to cherish a regard for moral aud religiuus obligation by the education of the ighorant and the poor, is to elevate the human ciaracter, to strike at the root of poverty and vice, a id to remed the imhabitants of the land contented, virtuous and happy.
"With the view of ascisting to promote the objects liere deciared by investigations into our present system of public econoury, by exposing its defects, and by recummending to the public a rudical refor:m, where nue is desirable
"ile the subscribers, in accordance with the reconmendation of a town meeting of the citizens of Philadelphia and the adjoining districts, held on the 5 th day of May, 1817, do agree to form ourselves into a society, and for the better government of the same do adopt the following constitution."

at A writer in the fecderal Republican recommands the scatteriug of a tea sponnful of live ashos, or two tea spoon's full of dead or leeched ashes, on every hill of com, being careful that none of it falls on the blades of the stalk, as it would injure them denost as miuch as the worm. He sity's this process is wot tedious-one ha!d may carefully ash three acres in a day, and that it will cffectually destuoy oi' drive away the cut zoorm.

\section*{Mr. Phillips' Speech. \\ Fram the Glussuzv Jterata יff Apmil 11}
heEACH OF PROMISE OF MARRIAGE.
HLAKk: vS. WILKISS.
This cause which had excited universal interest, came on to be tried o: Tu sday week, in Galway, before the hon. Baton Smith, and a special jury: Every avenne to the court house was crowded at an eaily lour, and long before the trial it was inpossible to procure a seat. The plaiatiff is a lieutenant in the navy, not above thirly years of agethe defendant is at least sixty-five, and is the widow of the staff plysician in whose arms general Wolfe died at the siegre of Quebec. The plaintiff's case having been gone through, Mr. Phillips addressed the jury on the part of Mrs. Wilkins, in pretty nearly the following terins:
May it please your lordship-The plaintiff's counsel tells me, gentlemen, most unexpectedly, that they have closed his case, and it becomes my duty to state to you thai of the defendant. The nature of this action you have already heard. It is one which, in my miad, ought to be very seldom brought, and be very sparingly encouraged: It is Connded on circunstances of the most extreme delicacy, and it is intended to visit with penal consequences the monobservance of an engagement which is of the most paramount importance to socicty, and which of ail others, periaps, ought to be the hucst mabiassed-an engagement which, if it be volma:ar!, judicious, aud disinterested, generally produces the happiest effects-but which, if it be -ither unsuitable or compulsory, ençetiders not onIy ialividual musery, but consequences universally peraicivis. Lincre: are few contracts between hur ban beings whach slould be more deliberate than Hist of tiamringe. I adnitit it should be very caulinusly promisecl; but, evea when promised, I am far from canceding that it should be invariably pertorned; a thoisand circumstances may form an irppednment; change of fortune may render it impat ínt; change of affecion may render it culpable. Cit very party to whom the liw gives the privilege of conplaint, has perhaps the most reason to be grateful-grateful that its happiness has not been surrendered to caprice-gratefinl that religion has not coinstrained an unwilling acquiescence, or made an unavoid:bie desertion doubly criminal-grateful that an offspring has not been sacrificed to an indelicate and angencrous enforcement-grateful that an innocent secret disinclination did not too late evince itself in an irresistable and irremediable disgust. You will agree with me, however, that if
therc crists any excuse for such an action, it is on
the side of the female, because erery female object being more exclusively domestic, swh a disappointment is more severe in its visitation-becanse the very circumstance concentrating their fecliugs renderis them naturally more sensitive of a winatbecause their best ireasure, their reputation, may have sufferel from the intercourse-becanse their chances of reparation are tess, and their hatitual seclusion makes them feel it more-brcause there is something in the descrition of their helplessness which almost merges the illegality in the tinmanliness of the abandunment. However, if a man seeks in enforce this engagement, ewery one feels that indelicacy attached to the requisition-I do not en. quire into the compatible justness of the reasoning -but does not every one feel that there appears some meanness in forcing a female into an alliance Is it not almost saying, 'I will expose to public shame, the credulity on which I nractised, or you must pay to me in monies numbered, the profis of the heartless speculation-1 have gamboled with your affections, I have secured your bond, I will extort the penalty either from your purse or your reputation!" I put a case to you, where the circumstances are reciprocil-where age, fortune, situa. tion are the same-where there is no clisparity of years to make the supposition ludicrous-where there is no disparity of fortune to reader it suspicio 13. Let us see whetherthe present action can be so palliated, or whether it does not ex!ubit a picture of fraud, and avarice, and meanness, and hypocrisy so laughable, that it is almost impossible to criticise it-and get so debasing that humail pri.. ealmost forbids its ricicule.

Thas been left for me to ilefend my unfortunate old client from the double battery of love and law, which at the age of sixty-five has so unexpectedly op ned on her! Oh gentlemen! how vain-glorious is the beast of beauty! How misappreheaded have been the charms of youth if years and wrinkles can thus despoil their cotrquests, and depopulate the mavy of its prowess, hegruile the bar of ins eloquence! How mistaken were all the amatory poets from Anacrecin downwards, who preferted the bloom of the rose, and the thrill of the nightingale, to the aaffron hide and dulcet treble of 65 . Evell our sweet bard has had the folly in declare, that
" He once had heard cell of an sunorons gonds,
Whe was eaughe in his krandenulher's bed;
But ow ns he had m'er such a liquorish souch
Ao to wish to be there in hive steact."
Hoyal wistom has said that we live in a "new era." The reign of olld women has commenced, and if Johama Soutlicote converts England in her creed, why should not Ireland, less pious perhaps, but at least equally passionate, kneel before the shripe of the irresistable widow Wilkins? It appears, gentlemen, to have been ber happy fate to have subdued paricularly the death-deating profossions. Inileed, in the epistle of the Heathen mythology, Mars and Venus were considered as inseparable. Iktiow int whether any of you have ever seen a very beautiful prist, representing the fital glory of Cuebee, and the last moments of its inmor tal conqueror-if so, you mitst linve observed the figure of the staff phynician, in whose arms the hero is expiring: that identical personage, my lords, wus the happy swain, who forty or fitty years ago, recciv. ed the reward of his valor and skill is the virgin pand of my vinerable cliens!-The doctor lived suinewhat inore than a century, tluring a greut part of which, Mrs. Wilkins was his companion- Ilas gentlemen, long as he lived, he lived not long enough 80) behold her beaty-
"Thas bentes, like che aloe Anwer,
Bit bjoom'd and Monom'd at fourseore:"

He was, however, so far fiscinated, as ' \(n\) hequath to her it.e legracies uf his parents, when he forind lie was puednoinerl in follow them. To this curcumstance, very far be it form me io 1 int. that Mr". Wilkins is indebted fore any of her a'tractions. Ric!, however, she umdo:ibtedly was, and rich sie stili andrubtedly wnull have continued, !at it mo be-n for her intercuurse with the family of the plaitatiti: Idn not impure it an a crime to them, that they happenerl in be pecesenton:s, but I do imnite it as hinth criminal and umgrateful that afier having lived ons the generssiay of their friend-after having literally exhansted her most prodigal liberality, they shoult Irag her infi=milies before the public gaze, vainly supposing tha: they could hide their nurv con:emptible avarice in the more prominent exposure of her melanclinly dotage. The father of the plaintiff, it cannot he unknown to you, was for many years in the most indigent situation. Perhaps it is not a ma*ter of concealment either, that he found in ifra. Wilkins a generous benefactress. She assisied and supported him, until at last his increasing necessities induced him to take refuge in an act of insolvency. During their intimacy, fiequent allusion was made to a son whom Mra. Wilkins had never scen since he was a chill, and who hal risen to a lietltenancy in the navy, under the patronage of theis velation, sir lBenj. IBlonmfield. In a parent's panegyric, the gallant lieutenant was, of course, all th: \(t\) even hope could picture. Young, gay, heroie, and disinterested - the pride of the navy, the prop of the country-independent as the gale that wafted, an I hounteous as the wave that bore him-I am afraid that it is rather an anti-climax to tell yon after this, that he is the present plaintiff. The elnquence of Mirs. Blake was not exclusively confined to her encomiums on the lientenant. She moved at times into an episode on the matrimonial felicities, paint. ed tl. G jny of passion and delights of love, and oh. seurey hinterl that hymen with his torch, had an exact personification in her son Peter bearing a match-light in his majesty's ship tho Hydra. While these contrivances were practising on Mrs. Wilkias, a by-plot was got up on board the Hydra, and Mr. Blake returned to his mourning country, itfluenced, as he says, by his partiality for the defendant, but in reality compelled by ill health and disappointments, added, perhape, to his mother's very absurd and avaricious speculations. What a loss the navy had of hime, and what a loss he had of the uavy! Alas! gentlemen, lie could not resist his aftectinn for a female he never saw. Almighty love eclipsed the glories of ambition-Trafalgar and St. Vincent flitted from his menory-he gave up all for woman, as Mark Anthony did before him : and, like the Cupid in Itudibras, he

Is the ocean calm-its mirror shews him the lovely widor Wilkins. is the battle won-he thins his laurel that the widow Wilkins may interweave her inyrtle. Dues the broadside thunder-be iuvokes the widow Wilkins I
"A sweer litule cherub, she sits up alon,
To watchifis the life of poor Picter."
- llas! llow much is he to be pitiell! How am. ply he should be recompensed!' Who but mus
mourn lis sublims, disinterested, sweet-soule 1 patriutism! Who but must sympathise with his pure, ardent, generous affection! Affection all impatient fur an interview ! Affection ton warm to wait even for an introduction! Indeed, his Amanda herself seemed to think that his love was most desiral!e at a distance, for, at the very first visit after his return he was refused admittance. His captivating charmer was then sick and nurse tended at her trother's hotse, after a winter's confinement, reflce ing, most likely, rather on !eer funcral than her wedding. Mrs. Blake's avarice instantly tonk the alarm and she wrote the letter which I shall now proceed to read to you.
M. Vandeleur-My lord, unwilling as I am to interrupt a statement which seems to create so universal a sensation, still I hope your lordship will restrain Mr. Phillips from reading a letter which cannot hereafter be read in evidence.
Mr. O'Connel arose for the purpose of supporting the propricty of the course pursued by defendant's counsel, when

Mr. Phillips resumed-"My lord, although it is titteriy impossible for the learned gentleman to say, in what manner hereafter this letter might be made evidence, still my case is too strong to require any cavilling upon such trifles. I am content to save the public time and wave the perusal of the letter.However, they have now given its suppression an importance, which perhaps its production could zot have procured for it. You see, gentlemen, what a case t!iey l:ave, when they insist on the withholdi:s of the documents which origined with themselves. I accede to their very polite interference. I grant them, since they entreat it, the mercy of my silence. Certain it is, however, that a letter was neceiver! from Mrs. Hlake, and that almost im mediately after its receipt, Niss Blake is:truded herself at Brawnville, where Mrs. Wilkins ions; remained two days; lamented bitterly her not having appeared to the licutenant when he called to visit h,er; said that her poor mother liad set her heart on an alliance; that she was sure, dear zwoman, a disappointment would be the death of her, inshort, that there was no alternative but the tomb or the altar! 'To all this, Mrs. Wilkins only replied, how 1 tially ignorant the parties, most interester, were of each other: and that were she even inclined ta connect herself with a stranger, (poor old soul!) the debls it which her generosity to the fumily liad already involved her formed, at least for the iresent, an insurmountable inpediment. This was not sufficient. In less than a weck the indefatigable Miss Blake returned to the charge, actually armed with an old f.mily bond to pay off the incumbrance, and a renewed representation of the mother's anxiety, and the brother's desperation.You will not fail in observe, gentlemen, that while the female conspirators were thus at work, the dorer himself had never even seen the object of his i.lolatry. Like the maniac in the farce, he fell in love with the picture of his grandmother. Like a prince of the blood, he was willing to woo and be wedded by proxy. For the gratification of his avarice, he was contented to embrace age, disease, infirmity and widowhood: to bind his youthful passions to the carcase for which the grave was opening-to feed by anticipation on the uncold sorpse, and cheat the worm of its reversionary corruption. Educated in a profession proverbially generous, he offered to barter every joy for money! Born in a country ardent to a fault, he ad: ertised lis happiness to the highest bidder! and he now solicits an honorable jury to become the panders
to this heartiess cupility! Thus besel, harassed, conspired against, their miserable victim entered in oo the contract you have heard-a contract conceived in me.nness, extorted by fraud, and sought to be enforced by the most profligate conspiracy. Trace it througli every stage of its progress, and its origin, its means, its effects; fom the parent contriving it through the s.acrifice of her son, and forwarding it through the delicate instrumentality of her daughter, down to the son himself un. blushingly acceding to the attrocious combination, by which age was to be betrayed and youth degrad. ed , and the odious union of decrepid lust and precocious avarice, blasphemously consecrated by the principles of religion! Is this the example which as parents you would sanction? 1s this the principle you would adopt yourselves?-Have you never worshipped the bliss by which it has been hallowed when its torch, kindled at affection's altar gives the noon of life its warm th and its lustre, and blesses its evening with a more chastened, but not less lovely illumination? Are you prepared to say, that this rite of heaven, revered by each country, cherished by each sex, the solemnity of every church, and the sacrament of oine, shall be profaned into the ceremonial of an obscene and soul degrading avarice?

No sooner was this contract, the device of their covetousness, and the evidence of their shame, swindled from the wretched object of this conspiracy, than its motive became apparent; they avowed themselves the keepers of their melancholy victim. They watched her movements; they dictated her actions; they forbade all intercourse with her own brother; they duped her into accepting bills, and let her be arrested for the amount. They exercised the most cruel and capricious tyranny upon her, now menacitg her witl, the publication of her follies and now with the still more horrible enforcement of a contract* that thus betrayed its anticipated inflictions. Can you imagine a more disgusting exhibition of how weak and how worthless human nature may be, than this scene exposes? On the one hand, a combination of sex and age, disregarding the most sacred obligations, and trampling on the most tender ties, from a mean greediness of lucre, that neither lonor or gratitude or nature could appease-"Lucribonus est odor exere qualibel;" \(\dagger\) on the other hand, the poor shrivelled relic of wiat once was health and youth and animation, sought to be embraced in its infection, and caressed in its infirmity-crawled over and corrupted by the human repile, before death had shovelled it to the less odious and more natural vermin of the grave. What an object for the speculation of avarice! What an angel for the idolatry of youth! Gentlemen, when this miscrable dupe to her own doting vanity and the vice of others, saw how she was treated-when she found herself controled by the mother, beset by the daughter, beggared by the father, and held hy the son as a kind of windfall, that, too rotten to keep its hold, had fallen at his feet to be squeezed and trampled; when she saw the intercourse of her relatives prohibited, the most trifling remembrances of her ancient friendship denied, hie very exercise of her habitual charity denounced; when she saw that all she was worth was to be surrendered to a family confiscation, and that she was herself to be gibbetted in he chains of wedlock, an example to every su-

\footnotetext{

\(\dagger\) Sweet is the odour of lucre from whateyer source.
}
perannuated dotard upon wiose plunder the ravens \({ }^{\text {s }}\) an honorable jury to abet \(i t\). The following letter of the world might calculate, she came to the wisest determination of her life, and decided that her forlune should remain at her own disposal.-Acting upon this decision, she wrote to Mr. Blake, complaining of the cruelty with which she had been treated, desiring the restoration of the contract of which she had heen cluped, and cleclaring, as the only means of securing respect, her fin: I de' ermination as to the control over her property. I'o this letter, addressed to the son, a verbal answer (mark the conspiracy) was returned from the mother, withholding all consent, unless the property was setiled on her famidy, but withholding the contract at the same time. The wretched old woman could not sustain this conflict. She was taken seriunsly ill, confined for many months in her brother's house, from whom she was so cruelly sought to be separated, until the debis in which she was involved, and a recommeniled cliange of scene, transferred her to Dublin-There she was received with the ntmost kindness by her relative, Mr. Mac Namara, to whom she confiled the delicacy and distress of her situation. That gentleman, acting at once as her agent and her friend, instantly had an interview with Mr. Blake. This was long before the commencement of any action.-A conversation took place between them on the subject, which must, in my mind, set the present action at rest altogether; because it must shew that the nonperformance of the contract originated entirely with the plaintiff himself. Mr. Mac Namara enquired whether it was not Irue that Mr. Blake's own family declined any connexion, unless Mrs. Wiikins consen ed to settle on them the entire of her property? Mr. Blake replied it was-Mr. Mac Namara rejoised, that lier contract did not bind hor to any such extent. "No, replied Mr. Blake, I know it does not; however, tell Mrs. Wilkins, that I understand she has about 1580 a year, and I will be content to settle the oddl 180 on her by way of pocket money." Here, of course, the conversatiou ended, which Mr. Mac Nanara detailed, as he was desired, to Mrs. W. who rejected it with the dis lain, which Ihope, it will excite in every honorable mind. A topic, lowever, arose during the intorview, which mfolds the motives and illustrates the mind of Mr. Blake, more than any observation which I can make on it. As one of the inducements to tire projected marriage, he has actually propos d the prospect of a 150 ammity, as an officer's widow's pension, to which stee would be entitled in the event of his decease! I will not stoop to remark on :he d!elicacy of this inducement-I will not a 1 vert to the glaring dot.tye on which lie speculated, when the conld serionsly hold ont to a woman of her years the prospect of such an inprobable burvivorship. liut I do ask you, of what materials must the man be composed, who could deloase the antional liberality? What! was the recompence of that lofty lieroisin which was almost appropriated to the Sritish nary, the monopoly of maritine renown-was that grateful offerias; which a weep inff county \([\) ours tito the lap of its patriat widow, and into the cralle of is warrior's orphan-was that generous consolation with which a nation's gratitude eheces the last moments of her dying hero, by the portaiture of his clibltren anstanced and ennobled by the legacy of his achievments, to be thus deliberately perverted into the bribe of base, reluctant, un"atural prostitution' Oh! I know of not \(i \cdot \frac{\%}{}\) to ; urallel the self abazement of such a daed, esefft the abdacity that requires
from Mr. Anthony Martin, Mr. Blake attorney, un. folled the future plans of this unfeling conspiracy. Perhaps the genilemen would wish also to cushinn this document! They do not-Then I shall read it.

The letter is addressed to Mrs. Wiikins.
\[
\text { "Galwar, Jan. 9, } 1817 \text {. }
\]
"Mrulam-I hare been applied to, professionally", by lieut. Peter Blake, to take proceedines a arainst yoll of rather an unpleasant nature; but from eve y letter of your's and other documents, together wi h the material and irreparable loss Mr. Blike has sustained in his professional prospects, by means of your proposals to him, makes it indispensably necessary for him to get remuneration froin yout. Under these cirrumstances I am oblized to say, that Thave his directions to take immediate proceedings a gainst you, tuless he is in some measure compensated for your breach of contract and promise to him. I should feel happy that you woull save me the necessity of actiñ professionally by settling the business, [you see, gentlemen, money, moacy, money, runs through the whole amoar] and not suffer it to come to a public investigatian; paricularly as I conceive from the legal advice Mr. Blak: has got, together with all I have seen it will uliimately terminate nost honorably to his advantage, and to your pecuniary loss.
"I liave the honor to remain, madam, your very humble servant,

Anthomr Martis."
Indeed, I think Mis. Anthony Marlin is mistaken, Indeed, I think no twelve inen, upon their oaths, will say, (even admitting the truth of all he asserts) that it was honorable for a British officer to abandon the nary on such a speculation; to desert s) noble a profession; to forfeit the ambition it onght to have associated; the rank to which it leads; the flory it may confer; for the purpose of extortings from an old woman he never saw, the purchase mnney of his degradation? But I rescue the plaintiff from this disgraceful imputation. I cannot believe that a member of a profession, not less remarkable for the valor than the generosity of its spirit; a profession as proverbial for its profusion in the harbur, as for the prodigality of its life-blsod on the wave; a profession ever willing to fling moncy to the winds, and only anxious that they slonuld ivaft through the world its immortal banner, crimsoned with the recurd of a thonsand victorics-No, no, gentlemen, notwithstanding the great anthority of Mr. Anthony Martin, I cannot readily believe that any man could lie found to make the hi gh honor of this noble service, a base, mercenary, sullied pan. der to the prostitution of his youth! The fact is, that increasing ill licalth and the improbability of pro. motion, combinal to induce his retirement on halfpiy. You will tind this confirined by the date of his resignation, which was iminediately afier the battle of Waterloo, which settled (no matter how) the destinies of Eurupe. His constiution, was diecino ing, his advancement was annihilated, and as a for. lo'n hope, he bombarded the widow Wilkins!

\section*{"War thoughits had left their placeo rocan". \\ In their rooin canne thronkiug vof and amornus ilcoives; \\ All telling hinh how hair "young it ro was."}

He first, gentlemen, attucked her fintune, with herself, through the artillery of the church, and having f.iled in that, he now attacks her furtuic, without herself, through the assintance of the I wo. Hwwever, if I am instructed righty, he has nobouly but himsclf to blame for his rlisappointmen-0 io serve,! do rut ronchis fe fur the authonsicity of th a
fac; but 1 do certainly assure you, hhat Mrs W!! kins was persuaded of it. lun know the proverbi... friby of our nature. The gallant lieutenant was bot fice from it! Perhaps you ims-ine that some yusiger, or, according to his taste, some older fisir one, w ratied lim from the widow. Indeed they did sut. He had wo heart to lose, and yet (can yout solve 1:1- paradox') his infirmity was love, as the poet 8 yy -
"-still-love.

No, it was not to Vellus, it was to Bacclits he sacrificed With an eastern idolatry, he commenced at day light, and so persevering was his piety till the shades of night, that when he was not on his kn es-he could scarcely be suid to be on his legs! Whan I eante to this passage. I could not avoid involuntarily exclaiming, Oh, Peter, Peter, whether it be in liquar or in love-
"None but thyself can be thy paralle!"
I see by your s.mur is, gethement, that you correct my ertor. I perceive your classic memories recur. ring to, perlisps, the oilly prototype to be found in history. I beg his pardon, I should not have overlooked
"Who the immortal captain Watule,
"Who was all for love-and a lictle for the butcle."
Ardent as our \(f\). ir one:s are allounced to be, they do not prefer a flane that is so exclusively spiritual. Widow Wilkins, no doubt, clid not chose to be sin gular. In the words of the bards, and, my lord, 1 perceive you excuse iny dweliing so much on the authority of the muses, because really on this occasion the ininstrel seems to have combined the pousers of poetry with the spirit of prophecy-ill the very werds of the bard-
"He asked her would she marry him-widaw witkins answered, po,
"Thers sainl he, I'll to the ocean ruck, l'm ready for the slaughte: coin Iil stoot at my sa.l imare, as its sighing in the water; "Only think of widow Wilhins, saying-Gu, Peter, go!"

But, gen lemen, let us try to be seriaus, and serously give meleave to ask you, on what grounds does he solicit your verdict? Is it for the loss of his profession? Inth lie deserve compensation, if he abandonet it for such a purpose; if he deserted at once his duty and his country, to trepan the weak. ness of a wealthy dotard. But did he, (buse as the pretence is) did he do so? 1s there nothing to cast any suspicion on the pretext? Nothing in the strpeet of public affairs? In the universal peace? In the uncertainty of being put into commission? In the downright impossibility of advancemen? Nothing to make you suspect that he imputes as a connivance, what was the manifust resuli of an accidental contingency? Does he claim on the ground of sacrificed affection?? Oh gentlemen, only fulucy what he has lost! If it weere but the blessed raptures of the brida! night! Do not suppose I am going to describe it; I shall leave it to the learned counsel lie lias selected to compose his epithalamium. shall not exhihit the vencrable trembler, at once a relic and a relict; with a grace for every year and a cupid in every wrinkle; affecting to shrink from the flame of lis impatience, and faining it with the ambrosial sigh of sixty five! !! I cannot pierce the fierce meredian transports of the honey moon, gradually melting into a more chastened and permanent affection; every nine months adding a link to the chan of their delicate embraces, until too soon death's broadside lays the lieutenant low, consol ing, however, his patriarchal charmer (old enongh at the time to be the last wife of Methusclah) with a fifty pound annuity, being the balance of his glory against his majesty's ship the Hydra!!

Give me leave to ask you, is this one of the cases, to meet which this very rare and delicate artion is
incurled? Is this a ease where a recipmeity of circumstances, of affections, or of yeurs, thiow even a slade of rationality over the contract? - bo ant imagine I mean to insinuate, that under fio circumstares sought such a procerding to be adopted. Do not imagine, thongh I say this action belongs inore naturally to a female, its adoption can nové: be one of the other sex. Without any great vio. lence to my imagiation, I can suppose a man in the very spriaks if life, when his semsibilities are most acute, and his passion most ardent, att:chinis himself to some object, young, \{ovely, talented and accomplished, concentrating, as he thonrlit every charm of personal perfection, and in whom those charms were oniy heightened by the modest! that veiled them; periaps his preference was enconraged; his atfection returned, his very sigins echoed until lie was conscious of his existence but by the soul-creating sympathy, until the world seemed but the residence of his love, and that lave the principle that gave it animation-until before the smile of her affection, the whole spectral train of sorrow vanished, and this world of woe, with all its cares, and miserics, and crimes, brightened as by enciantment into an anticipated pararlise! It inight happen that this divine affection might be crushed, asid that heavenly vision wither into sir, at the hell engendered pestilence of parental avarice, leaving youth and health and worth and happiness, a socrifice to its unnatural and mercenary artifices. Fi, am I from saying, that such a case wonld not call for expiation, particularly where the ruin had ortginated. Yet even there, perhaps, an homorable mind woult rather despise the mean unmerited desertion. Oh, 1 am sure a seasitive nind would rather droop uncomplaining into the grawe, than solicit the mockery of a worldly compensation ! But in the case before you, is there the slightest ground for supposing any affection? Do you believe if any accident bereft thie ciefendant of lier firtune, that her prosecutor would be likely to retain his cons:ancy? Do you believe that the mariagre thus sought to be enturced, was likely to promote morality and virtue? Do you believe that tlase deliciots fruits by which the strug: les of social life are sweetened, and the anxieties of parental care are alleviated, were ever once anticipated? Do you think that such an union could exhibit those reciprocities of love and endearments hy which this tender rite should be consecrated and recommended ? D. you not rather believe that it originated in avarice-that it was promoted by conspiracyand that it would perhaps have lingered throngh sorne months of crime, and then terminated in an heartless and disgusting abandonment?
Gentlemen, these are the questions which you will discuss in your jury room. I am not afrairl of your decision. Remember, I ask you for no mitig:tion of clamages. Nothing less than your verdict will satisfy me-by that verdict you will sustain the dignity of your sex-by that verdict you will uphold the loonor of the national character-by that verdict you will assure, not only the immense multitude of both sexes that thus so unusually crowd around you, but the whole rising generation of your country, that marriage can never be attended with honor or hlessed with happiness, if it has not its origin in mutual affection. I surrender with confidence my cause to your decision.
The damages were laid at 5000 l . but the plaintiff's counsel were in the end contented to with. draw a juror, and thereby abandoning the cause, let him pay his own costs

\section*{George Canning.}

This person is well known to the Anserican penple, and they will feel some interest in the following articles about him.

FROM THF Loshon notsing chronict.f.
A regular contest has taken place within these fow days between the Times and the Couricr, upon M:. Canning's apponintment at Lisbon. We do not preterd to decide on the skiil or talemts of the combat:ants, but muat observe, the Times has evidently the adrantage of facts and dates, which of all aukward arguments, are the most ar:kward and perolexing to an alversary. The Courier is, therefors, kr uduaily withdrawing fiom the defence, most probably in consequence of a !int from head \(q\)-arters, that it may be as well to drop the subjectIt is clearly proved by documents on the table of the house that Mr. Canning's enorinous salary commenced fur a loug period before he could by any possibility be called upon to act, and this at a periocl, when the office of our secretary of state was litorally crammed with official details of the most severe and deplorable distress in many parts of the country. Mr. Carning iold the electors at Liverpool, he harl refused office twice in one year, evid ntiy allucling to his ohjection to act with Iord Cistlereagh and his friends. He afterwards tells them that all motives of personal feeling are at an end, and therefore lie accepis oflice. That \(i\), he accepts a place under lord Castlereagh, and becomes a party in a job, to which we are at a loss for an epithet sufficiently exp:essive of the disgust and pity it has exsited anorgh all parties. Nir. Can ning's retirement was certainly a bold finesse for attaining a loftier situation in the cabinet, but it appears Mr. Perceval and Inrd Liverpool did not appreciate his talents so highly; and therefore, perceiving he had outstond his market too long, he is ghad at last, like a maid at 30, 20 surrender on any terins. He drups at ouce from his aspiring flight, and is now contort, with many other courtiers, to perf rm the operation of climbing, in the attitude of crawling. He has fallen ton from an eminence in public eatiation, never to be regained; but we are uot inclined to dwell longer on his disgrace, being unwillig \({ }^{\text {ion }}\) press upon the bruised reed-

Who woul? not langh, if such a nall there be;
Who would not werp, if Atticus were be?

\section*{J.OHD CASTLIRRFAGU AND MR. CANNING.}

This amiable and aceoruplistied nobleman, in surveying the fallen virtue of Mr. George Canning, must feel muchabout the same sensation as when the venerable priestess of some l'aphian receptacle looks upon the innocent young woman whom her arts linve betrayed; and we may conceive something of this kind of dialogue may pass between them in thoye hours when
"HAR hecliug worn and cohl indiffunace come."
Mise Camming- \(\theta\) h! inadan!, to what have you reduced ine? To what a situation am I now brought?
Mrs. Castlereag't-Child, child! Hold up your theal, dry your egel, and let me hear uo more of such nonsenue.

Mis Cunning-O', heavens ! How much was I once esteemed by all good people till you found me olit, and by your cursed wheedling and the offer of money, tempted ine io forsake the paths of virtue!

Mrs. Castlereargh-Ridiculoul Are not you now in the way to preferment? And, as you are a girl of some parts, may you not, if jou mind your luts Wake your fortunc' Your virtue as you call it would
never have b:ought you a penny; but jour present situation may be a treasure to youl.

Aliss Canning-But degraded as I now am, who will regard a word that I say, And they will think the worse of me for being seen in your company.

Mrs. Castlereagh-Fine language, indeed, Miss, If you chose to part with your chanacter for a suin of money, who have you to blame but yourself It was my business to offer, and I beg you will give yourself no more unnecessary airs.
Miss Corning-And what!-What I am to do, marlam!

Mis. Castlereagh-Do, child! Why you are to he one of us, and act as we do. And if any body is impertinent enough to throw your character in your teeth-as you have a tolerable tongue in your hend. rive them their own, and sing-"Y'ou'd have done the same thing in the very same place."

\section*{Lord Castlereagh.}

From a late london paper.
ho Nors to mr. waymumax;-apostact to the that. ton castlembagi, \&c. \&c.
An elegant service of plate, with a suitable in. scription, was presented to Mr. Waithman on the 15th ult. hy his Lomlon friends in testimony of their high sense of his merit in supporting constitutional rcform. The presentation tonk place at the New Londan tavern, where a dinner was given on the occasion.

The following is the inscriptinn on one of the pieces, presented by Mr. Fayal in the name of his fellow citizens;

\section*{To}

ROBERT WAITHMAN Fsq.
Whose exertions in the canse of constitucional reforms Have been ardent and indelatigable.
Whose eminent talonts and an energetic floquence
In support of fredonn and resistance in oppression
Esapecially in persevering and successful efforts
Agaiust that odiuus and degrading impost,
The income tax:
Whmse public ennduet for more than ewenty yeare
Unawed by power, huenrvipterl hy influencer.
And unnoved by calmany,
IIas exhibited a noble example
Of mauly zeal and intlesible pairiotism
Asaltibute of esteem and salmiation,
THIS PLATE゙,
Was presented by his grateful f.llow cicizens
On the 19hh slay of April, 1817.
Messer. Fayal, Waithmat, IBennet and Brough. am, made excellent harangues. Wic extract the following from those of Wathman and brougham

It was said that some wicked or foolish men had given a pretence to minirters [to stifle petitions?] But this was a pretence which might slways be found. Was it to be expected that while great public interests were under discussion, every individual would conduct himself with perfect propriety. and were the people at large to be deprived of their liberties on account of the indiscretion of a few rash inen? [upplause] If that were ncecssary, instead of the panegyrics which were promonced upo: the Ibritish constitution, he shonld say it was the worst constitution on earth. It was a lling to be shiut up in a glass case to be looked at, not to bo used. On the contrary, ho contended it was fit for all seasons, for the protection of the crown and the benefit of the people, in tiones of danger as weli as of prosperity. The habeas corpus act had passed in Charles the seconil's reign-a lime more fertile tu plots than any we read of in history, It was not from plors but from petitions, that the suspension of that act was intendel to graard the crown and the parliainent. It remmeled tim of a evuplet whicls 1):yden had put inta the mouth of Charles 11 .
"From plotis and irrasons hearen percerve roy ears,
ngt save me must fromin my petitioners."

Like the late country girl in the farce, who w en courted by a beat, exclaimed, "What shail 1 do with such a fine gentleman as a lusbuncl, I mnst have annther for working days :" the minisier; seemed to think, that it was on Sundays or holilays only that our constitution could be of service, and on the least appearance of an emergency, they substitnted a set of laws, for the time at leust, totally subversive of our boasted system of government.

To show how ill it became some of our supporters of the encroachments on liberty to brand the friends to reform as enemies to the constilution, Mr. Waithman then read from Evans's valuable pamphlet, the declaration to the inhabitants of Down, signed by lord Castlereagh and another, then candidates for that coun'y-
"We will rigidly attend our duty in parliament, and be governed by the instructions of nur constituents; woe well in cond ou: of the house, with all our abilities and influence, promote the success af a bill for amending the representation of the people:
"A bill for preventing pensioners from sitting in parliament, or such placemen as cannot sit in the British house of commons;
"A bill for limiting the number of placemen and pensioners, and the amount of pensions;
"A bill for preventing revenue officers from yoting at or intefering at elections;
"A bill for rendering the servants of the crown of Ireland responsible for the expenditure of the public money;
"A bill to protect the personal safety of the subject against arbi rary and excessive bail: and agrainst He stretching the power of attachment beyond the limits of the constitution; and we will, as far as in us lies, p:erent any renewal of the police act.
(Signed)
"EDDVARD WARD,
"ROBERI STEWART."
(Otherwise called lord Castlereagli.)
"In the Nezos Letter of the same date is an ad vertisement, to the electors of the county of Dozon, in which the following expressions are used;
"We are embarked in a much more interesting and slorions cause thian our surcess as individuals-we are called forth as instruments in youn hands to emancipate the country.

\section*{(Signed) "EDWARD WARD,}
"ROBERISTEWART,"
Vet men who had gone thus far, who had taiked of making themselves instruments in the hands of the people, now loaded with calumny thase who viewed with indignation their infamous traffic and barter in seats in p:rliament, and their waste of the blood and treasire of the country. The spirit of liberty, he trusted, was not to be extinguished, and if men of rank and character wonld assume, as they seem now disposed to assurne, the guidance or the people, they mirit "cst in conficence as to their final success."

\section*{Foreign Articles.}

Rurdl losgeviry. Froma J'aris paper-There are now living sixteen sovereigns in Enrope, who are of or above threc score years of age! The British King is the oldest, having almost completed his his 79th year-The duke of Anhault Dessau is 77 years old. - The pope 75. The elector of Hesse 74 -Henry XII of Luess 70; the king of Sweden, 69; the langrave of Hesse. Homburg 69; the king of Saxony 67 ; the king of the two Sicilies 66 ; the king of Sardinia 66; the king of France 62; the king of Bavaria 61; the duke of Oldenburg 61; the grand
dwke of Meck!erburg Schwerin 60; the grand duke of Hesse 60; and the grand duke of Save-Weimar 60.
It may amuse the reader to learn the ages of the other potentates of the olci world:-

The king of Portugal is 50 years of age; the em. peror of Austria 49; the king of Danmark 49; the King of Prussia 47; the king of the Netherlands 45; the emperor of Russia 40; the king of Wurtemburg 36, the king of Spain .33 ; the sultan Mahomet 32; the duke of Saxe Cobourg 31; and the duchess of Parma (late emipress of France) 26 . The latter has renounced her title of cmpress.- A proclamation before us begins:-"We, Maria Lnuisa, imperial princess and archiuchess of Anstria, by the grace of God, duchess of Parma, Placentia, Guastella," \&c. \&c.
[Daily Adl.
The season in England, France \&c. has so far been exceedingly dry. Last year the peopie prayed for dry weather, and now they pray for rain.
evgrand, \&e.

Lord Sidmonth's letter, addressed to the lordlieutenants of the Euglish comities, inserted in our last number, is considered in England as one of the most alarming strides towards despotisn that has yet bcen made. It seems to be thought even worsc of than the suspension of the habeas corpus.

The duke of Wellington has arrived in England. One of his aids, col. Harvey, it is said, is to marry a Miss Caton, of Baltimore.

For the week ending April 22, there arrived at Liverpool 49,500 bushels of wheat and 3,869 bbls. of Ainerican flour. The price of bread stuff's was still falling-flour 728 per bbl.

It is announced that the princess Charlote is again in the "family way."
British dependencies. The revenue of Malta and its dependencies, for the year 1815, was 114,426 l. and the expenditure consisting principally of salaries and pensions 60,119 l. The revenue of Mauritius and Bourtion, in 1814, was 206,860/. and the charges 119,9001. The military expences of the same island, for the same year, were \(186,912 l\). The revenue and other reccipts of the 1sland of Ceylon, during the year 1815, mounted to 640,444 . The expenditures for the same year, including the military establishment of the island, was 647,8481. The native troops of the island amounted to 5000 rank and file. The revenue of the Cape of Tood Hope, for 1815, was 229,4951 . and the expenditure 234,832l. including the pay of a native corps.

Burtisi natr. Building, 12 ships of the line; 2 yatches; 550 's; 12 frigates; 4 sloops. Several of these are to supply the places of vessels destroyed or lost, and bear the same names.

Re;pairing, \&c. 14 ships of the line to be cut down to frigates; 4 ships of the line; 18 frigates (one of which lias never been at sea, and is estimated to cost 12,000\%.) 10 sloops.

Imerican seamen. We have the following strange article in a late Iondon paper.-"Farl IBathurst having repeatedly written to Mr. Thomas Aspinwall, the American consul, directing him to provide a ship for the conveyance of American seamen, by w:om our streets are infested, to their own country, that gentlemen had accordingly prepared a ship for the reception of these men, in the river; bat no less than thirty-seven of them, who had signed the asual agreements for the voyage, deserted from their quarters during the last week, preferring rather a precarious dependence on British charity to a free passage to America. Mr. Aspinwall has applicd by letter to Mr. Markland, of the Chadwell police office, requesting him to lend the co-operation of his officers towards enforcing the orders of Earl Bathurst on this subject."

\section*{Mr, EASTINDIES.}

Mr. Eustis, our minister at the court of the king of the Ne:herlands, has succcedel in procuring an ordinance regulating the trade will Juva, by which it is provided that foreign vessels coming from that island are exempted fiom the import duties payable in Holland, on producing evidence that they paid the export duties at Batavia.
sotth amertica.
It is reported, that in consequence of the conduct of the Danish governors in the West Indies, the patriot admiral Brion feels himself justified in mak: ing reprisals.
The ambassador, or agent, for the republic of Pernambuco, has paid a visit to the venerable Juhn Adame, who recieved him with great cordiality. What a variety of interesting events must have rushed on the recollection of the ex-president on such an occasion!

We have il very pompous and truly Spanishaccount of the capture of Ba celona by the royalists, whose force apppears to have been very large. That of the patriots is given at 1000-and it seems admitted that nearly all of them, with many of the inhabitants, were put to the sword. The loss of royalists in killed and wounded is stated to have been ys

From Buenos Ayt.s. Wie have a singular statement in the Bultimore Patriot of Thurstay evening last, annotincing that three gentlemen named had just reached this city, via Sswannah, from Buenis Ayres, under the following circumstances:

These three, with five others, all of whom appear to have been persons of much consideration in their country and to have filled very respectable civil and military offices, were seized at Buenos Ayres on the 15 th of February, at the same hour, ind, without any thing being alleged against them, without examination, were secretly taken on board an English vessel called the Hern, whose captain had contracted to deport thein to the United States for the sum of 4000 dollars. The official letter de. livered by the supreme director of Buenos Ayres to the Britislı captain, is given as follows:
"The persons mentioned in your enclosed list (those alluded to above) have been shipped on bnard the cutter Ilero, bound to the United States. They are unfortunate beings, whom the government has expelled from their country on account of their variance in polities, and of their exal ied ideas. They must not be viewed as criminals; but as they were considered dangeroms, it has become expertient to eransport them, directing them to that country where they cannot canse alarm, as its constitution and lawe present a formidable barrier."
We are giren to understand that the cunse of this outrage was the opposition of these inen in the occupancy of a part of the provinces of Rio de la Plata by the Portuguesc; by whom, it is said, the supreine director and the chief men at Buenos Ayres have been purchased. If these things be tru, we cannot wish success to men capable of such acis of villainy: liut we have only licard one side of the question.

\section*{hepheic of fehsambeco.}

We lave a variety uf accounts respecting the late revolutionat Pernambuco, in the Hoaton l'arriot of the 21 st ult. commmicatel by the secretary of Mr. Culz, the ambassador from th.e new republic to the tinited states. It appears that the patriots have completely susccelect. We are happy to observe that they have abolisiod all tilles of nobility and seem (i) possess very correct illeas of the republican system. The following addressey are interesting:
-qubress of the frominimal govermment to the inhabitants of Pernamb:acn.
Divine Providence, which by its unsearchabl: cesigrns can extract from darkness the most effu'gent iight, and throdgh its intinite soodines, allows not the existence of evil, excopt to chraw from it greater blessings and felicity, has permitted some indiserect and inconsiderate spirits in spreat the seeds of disonntent and ill grounded jealousy hetween the sons of Brazil, and thuse of Eluope now in this capital, from which a great flame might arise, equally inj:sgious to both pirtieq, especirilly since the epoch in which the series of events in Furope hegan to give to the continent of Brazil that consideration to which it was eatitled. We ask, in what are the Brazilians to be blamed? If the prince of Portugal is driven from his capital by the impetun: is assaults of an invading enemy, and compeltod to leave lis latsitanians to seck shelter in the free and gencrous continent of Brazil, and to satisfy his hunger and thirst in the latitude of Pernambucn, through the liberality of its inhabitants, wherein are the Bratzilians to be blamed if this prince, actilted by motives of gratitude, should be desirous of hoioring the land that sheltered him by the estahlishment of this court, thus raising it to the rank of a kingdom? The seeds of discord which unfortunately sprung up in our country, enriched generally by nature with molimited fertility, sp far from being eradicated and stifled in their origin by the hand which had the power to do it, were nourished by mutual indisaretion, both on the part of the Brasilians and Fs. ropeans. They never attained to such a height, however, but that they might have been extinguisthed by a conciliatory spirit in the respective paritics. But the spirit of despotisin and bad counsel had recourse to the most violent and perfilions measures that could be invented by the demnon of persecution. They adopied the most tyannical nestsures to destroy homorable putriots w! o deserve well of their country, thereby overwhelming with tears and despair their unhappy families, dependent on their exertions and labor, and whase lose has been followed by the total and inevitable ruin of their coanexions. Nature and valor at length determined to oppose with all their strength this frightful tymanny. The whole army thought itself involved in the tuin of their offeers, and the cry of defence was universal ; it resounded in all the angles of the town St. Anthony; the perp'e flew to arms and supported the soldiers, for they were also Brazilians. The despots were intinidated by this new and mexpected scene, and still more so by their own consciences, that even in the breast of the impinus, rise in judgment against them, and deeply torture the heart.
I:Inhbitants of Pernambuco! they harl even taken the inhuman and dishonorable resolution of assassinating your associates. The patriots, in about \({ }^{1}\) wo hours, found themselves without a chief or governor. It the centre of an agitated town, and revolted people, it became necessary to adopt some measures to ayoid the disorders of anarclyy. All was done in an instant; it was the work of prudence and patrintism. Pernumbucunoes, be tranqui'; peace reigns in the capital, the people are content; there Is now no distinction between Brazilians and Europeans; all are known as brothers, descendants from the same origin, inhabitants of the same country, and professors of the same religion. 1 mild and enlightened provisional government, selected from among all the orders of the state, presides over your happiness; trust in their zeal and their patriotism. That Providence which directed the work, will

Carry it on; this enterprise being from Heaven, will be protected by it. You will see your happiness cansolidated. You will be fiee from the enormous load of tribute under which you have groaned; our eountry will rise to that pimacle of greatness which we havic long been looking for, and ynu will enjoy the fruts of your labor in the gencral prospersty. Therefore, assist them wit? your councils, they shall be heard; with your arms, the country dethands them; and with your industry and applicativn to agriculture; these make a nation rich and powerful. The coun'ry is our common motheryou are her sons-you are descendants of the brave In/zns—are all P'ortuguese-Americuns-BraziliansPernambincanoes.

\section*{Bank notes not money.}
chilltcothe, o. may 13.
At the last court of common pleas held for Ross county in this place, the following case excited some interest, ond as the question is a novel one arising out of the statute, entithed "An act to prolibit the issuing and circulating of nathorised hank paper," a brief statement of the case may not be unacceptable.

State of Ohio vs. Isaac Fivans.
Indictment for passing an unauthorised bank note on the Owl creck bank of Mount Vernon.

Messrs. Bond and Sill for the prosecution.
Messrs. Breecher and Greighton for the iraverser-
On the part of the traverser, it was contended that the legrislature in the second section of the a. bove act, in the following words, "That everycompany or association that shall lend ixoney, and shall issue by their officer or officers, or by any persoll or persons, bonds, notes, or bills payable to bearer or payable to order, and endorsed in blank, or use other shift or device, whereby the bonds, notes or bills given by such company or association, or on their behalf, pass or circulate by delivery, shall be taken and deemed a bank by this act"-had so particularly described the institution that slonuld be deemed a bank, that unless evidence sufficiently strong to prove the "O:vl creek" association to be of this nature liad been adduced, the traverscr must be acquitted-tiat no proof having been adduced to substantiate the fact of that association having

Intit turney f．e．specie－it was not a bank within this act－st particular is the deceroptiom，that no adowsince of what might have been lie intemion E：an lee ：admittal．The wurd rasney as used in the aot，as comtr－distinguished from bills，clearly \(x^{\prime}\) chst \(x l . a\) is the mtention．If it lad been intend－ al enly for assuciations that issue bilis，the vords iend momey should have been left out，for that is ：an essential requisite to constitute such a bank as this act would embrace－fire ata association that docs not lount mone！but issutes bills，is not a bank within this act，the circulat ion of whose paper is prahibited．

2．－The constitutional objection was raised that the Jogistature had not a right to interfere with contracts：that they could pass no law impaining their abligation，and that they had no right to grant here－ clitar＇y privileges，of which it was endeavored to be sliewn a bank is one－that the granting of in－ corporatious was a dangerous thing，that much was io be apprebended from their increase and final ino． mopoly of the interest of the state－that the legis． lature had not a right to impair one man＇s credi by saying that his paper is not good and its circula． tors shall be punished，and at the same time say to wihers you papper is good the world may take it．
in the prat of the prosecution it was contended －That the word maney thus used in the act was to be recerved in its most known and usual acceptation， i．e．the common currency of the country－that the wowd as used in the statute books，in bonds of sect：－ rity and in every instrument，meant the common currency of the combry，and that it shoubd not now by a peculiar fatality be construed to mean apecie －that the statue was meant to provide against an cril，and it would completely be repealed and its iemedies not advanced if the construction given by the counsel for the traverser was to be received－ that as to the comstitutionality of the law here could be no doubt；the restriction of legislative puwers over contract was admitted，but it was con tended that it applied only in contracts executed or executory，but not to such as should be horeafter unade－that the legislature had an equal right to re． gulate the emission and circulation of spurious paper，as they have exercised over retailers of spi－ rits，and in inany other simular instances；and in shelh flagrant cases，over institutions based on fraud and supported by usury，to say they have no power， is nentier policy nor law；the power is weak enough （i）nitp the growing curse，and courts of justice －Mhth to advance rathee than linder the advance． mathe of the remedies．

The jury retioed affer recciving the elarge of jultrene thomson，who deod ped the law consticution－ al，and thut rht that from the strictness which had beat wed inftaming that law and the puecision i：t ite praving，particuiarly in alefming a bank－that Wh－if with int prial shat die present institution wat as faric with in the mealanf of the act．

Abst mornug their scaled verdict was opened and was a－focme une，fiading the fices of 1 asting

\section*{Manufactares．}

Mr．Rusill．－Viach hos bicen rerently writien upon Amecican manufuctyies，amd duubl iny e beca
raiced whetiocy they andert to reepive the counte－ nathe of givermment．The primeipal reasons urg－ ed argint them are that our collutry is yet too yo mfr－that sume miltions of act－s of now wilder－ incs land should be rirst cullivaled；that in mames fictures to great a propulation is collected together for the eujoyment of health；that science is there－ by neglected，and immorality increased：that it is more for the interest and happiness of the nation to encourage our merchants，to import from foreign countries already over peopled，und for our inhabi－ tants to cultivate our own soil．

The writer of this communication，it will readily be perceived，is nut a philosopher，nor deeply versed in the history of firreign nations；but pro： fesses to be interested in both agriculture and ma． nufactures，and will present a few common place arguments in favor of the latter．
I consider it a fundamental principle never to be coparted from，that agriculture should so far pri－ marily be attended tn，as that in no possible year of scarcity we shall be dependent on any foreign coun－ try for food．Beyond this，the resuli of our labor is exported for money，manufictures or linxuries； and I contend，that if the prodnce of the labor of two cultivators is exclinnsed for what one could inanufactare at hooe，the cocutry is a loser；but if the raw material will othoruise be of no value， Uhen she is impoverished．It is tor our interest to slip the raw hides，firrs，woul and cotton，and in．－ purt our shoes，hats and cloth？It is for our inter－ est to keep tiue ore hid in the bowels of the earth， lie ragsof our wimin out garinemts burnt：and in．－ port our pots，kettles，wails，and paper from Greas Brituin，and our bar iron from Piussin？
That our country is young adimits of no argument When compared with those of Enrope；but in the atis and sciences，wealth and ingenuty，we are not a century bechind them；and our wilderness gives 4 happy resource to posterity to make it blossom as the rose，or if more conformable to their genius to
cultivate the arts． cultivate the arts．
In Lurope as well as in America，machinery not only facilitates labor in a tenfold ratio，but enables women and children，who are unable to cultivate the earth，to make us independent of many forcigu supplies．In Eirope they are compelled to use steam power and the convenience of procuring fuel： and thus crowd them together covered with smoke， diseese and immorality；but in our country we have water falls in every town in positions the most bead－ thy，remute from each other，where literary and religiuns instruction is no more a stranger than with the cultivators if the soil．Wheng government shall aid the manufacturers，I trust it will be on condi－ lion that instruction accompany it：and that they are not inconsistent is fully evinced by reference to the establishment at Himiphryzville，where the jus tices and milers have ceristied What learniag is faith－ fully antended．

I．no part of the union can minufacture be so beneficially encouraged as ．Vers Einghonel．Our soil is te．nst pruductive，our lands mort cultivated，our foills sites must muncrus，and our climate innst fol urable．＇Whe labor saving machinery，is alinns： ine．lculable；but a fow jears since，it requirad the I or of vine m，n to make a thonsand nailof now onte of less ing uily，can make sisty thoushnd．In ouc smat establisi，ment in the vicinity of ths town，a co．on mant．f．clory anmaily spins itris，and weaves cos，il value \(\left.\$ 45,0^{\prime}\right) 0\) ；and emplogs bilt two men： cic uiber lavorers or destitute witits，boys and sials umathe to cnt vate l＇e soil．The raw inate rial is the production of our cwn coumtry，and wiad
wear four times as long as that imported from India.
In civil suciety, next to food, manufactures become a necessary of life, and in war an essential. Upon prudential maxims can it be political wisdum to discourage those manufactures which the con stitution of unn matme requires, which insures a market for the raw materials indigenous 10 out own soil, as well as the surplus food from the fertile tields of the south.
The anthor of the "Road to Nuin" may reason chat facts outweigh theories; and exhibit the jors. tration of our woollen factories which had the ephemeral growth of a short war, are now almost at an end, and the ruin of many left to bewail the delusion.

It is true, from the sudden and unexpected intro. duction of merino sheep, they were so much en. hanced beyond their value that hundreds have been ruined and thousands essentially injured; but the time will come, when, with the aid of government, otte woollens will vie with those of Europe, and the country be enriched.
'The inanutacturers of cotton were more unfortinate; by reason ofinterdiction from Europe, the raw material was depressed below that of any former periorl, many capitalists having no use for money in t? eir usual course of business, were deluded by men who held water privileges to take shares in concerns ihat cost treble the original estimate; were conduceed by men unacquainted with business, and almost as soon as they became in operation, peace presented an opportunity to flood our country with forcign manufaciures beyond consumption. But the establishments which have cost millions, and the machinery which is now rusting, will be placed in the hands of judicious managers, and with the aid of government in prolibiting the importation of the decep:ive India cotton cobwebs, our own will improve and flourish, and increase the wealth and independence of the nation.

This section of our country is now over-peopled for the cultivation of its soil, and the future increase must migrate to the west, or be employed in manufactures; and with it goes our wealth and commeree. As lis subject will soon be presented to our nation. d! and state tegislatures, 1 hope the societies formed and forming for the encouragement and support of manntactures, will nut be deterred from explaining t!re best interests of the statc; and trust, some writers of greater talents will elucidate the subject, and point out the "roull to weulth."
S.

\section*{To Don Louis de Onis,}

Minister plenipotentiary of his catholic majesty, near to the government of the United States. Sia,
In the diplomatic correspondence between you and the honorable secretary of state of the United States, I find you liave made very honorable inention of iny name; itherefore take the earliest opportunity to retum my most sincere thanks: there :ure two points however, in your communcation, which I beg leave to explain, and that explanation I give wita the more pleasure, becatre it will probably render you more respectful to the government of the Uniied States, and inay even spare you an unnecessary cmbarrasment at our next interview. You have attempted, sir, to cast a sliade on the administation by jour simple assertion, that I was concerned with the revolutionary party of St. Antonia de Bexas; this statement is altogether, and must be wilfuly incorrect, since it is a fact of notoricty, that on my passage so the interior proyinces of Mexico (being
then on a mission under the authority of the government,) I was detained a prisonev three days at the river 'rinity, by the patrioss, and the flag of the United States, my compations and even my servants, were taken from nie, and I was compelled to pass through a wik!emess of ne:n four liundred miles alone; and I aver that I was not directly or indrectly concerned wih that army; although, sir, I assure you, hat had I not been in the service of nuy own conntry, I would most cheerfully have been one of tive party.

As it regards the second point, in which you observe thit I was concerned in the murder of four. teen Spanish officers: suffer we to inform you sir, that I was in Orleans, on my way to Washington city, when the dreadful outrage was commitied." I was personally acquain:ed, sur, with all those officers, and the most of thein gentlemen of honor, and worth; with the unfurtumate governer IIerrara I had been intimate for many years; and sir, any but an il. liber.l Spaniard may judge of my friendship for that amiable soldier, when I state, that my son has borne his name for more than ten years; 110 one can deplore with more sensibility that myself, that horrid as. sassiuation; but sir, by whom was it perpetrated? Was it by Americans? No sir, it was by the secret order of the comniander in chief, a creole Spaniari, who possessed no other feeling or sentiment than that which is common to every native of that country; it was a feeling sir, which lias arisen from 30 years of dreadful servitude, and it is to a scnse of ilijury, that liexico will sooner or later owe her independence.

I shall now add, by way of concluding this note, that as your language, sir, is extremely indecorous, I shall not descend from the dignity of an American and an officer of the Mexican republic, to answer the illiberal and scurvilous observations of the minister of Ferdinand VII. You will therefore please to recollect, that as you state I have, in my own person, declared war against his majesty, I shall in all future correspondence on the subject of that war, address my communications directly to the king your master; but, sir, I give you a parting assurance that 1 will give his majesty sufficient time to calon the very important considerations which lie before him, having lieard through the metium of your official correspondence, that the king your inaster, was too much occupied with the organization of the officers of the bedchamber and the toilette apartments of his young spouse, to attend at this moment to the trifling considerations of Spanish relations with the United States, or (as I suppose) the insurrection of an hundred provinces in America.

I solici! your si!, to accept my most sincere solicitations, and my wishes that you may live a thousand years to enjoy the reputation which you have acquir ed in America.

JOHN H ROBINSON.
Don Louis de Onis, \&cc. \&cc. \&xc. \&c.

\section*{Miscellaneous.}

Destructive insect. Vasi multitudes of a worm, about an inch long, calleit by some the locust larva, and by others the cut avom, has made its appearance in some parts of Massachusetts. They are exceed. ing voraciulis, destroying every blade of grass in their progress, and sonume:nus that three hundred of them have been duछ up within a foot square. Itheir motion is durectly forward, and their course is marked as though fire had over-run the herbage. In one case it is stated that 40 acres of land in a body are without a single spire ofgrass! And some

Twere burning over their pasture lands to plough and plant them: but as they do not injure the root, a furvorible seasou may yet restore the herbage.

The progress of these insects, it is said, may be stopped by culling a trench or ploughing a deep furrow, into which they f.ll and perish, beiat unable to scale the walis. It was thus that the progress of a similar worm was checked about the year 1779 .

Literary and miiitary intelligence. We understand that captain O'Comnor, of the artillery, has for some time been engaged, by order of the war department, in translating from the French a celc\(\mathrm{b}:\) ale. \({ }^{1}\) Trea'ise on the Science of War and Furtification, orisinally composed by order of the emperor Napoleon, for the use of the students of the Imperial Polytechuic and military schools of France. This work embraces the whole science of war and fiel! and permanent fortification, with all the modern investions and improvements in the latter branches; and in France is universally used by the military, and is esteemed beyond allother productions on titese subjects, being considered a masterpiece.

We learn that the translation is completed, and nill shorlly be published for the use of the cadets of the United States' military ncademy.-Niat. Int.

Intsuesting duawings.-From the Petersurg In-telligencer.- On the sailing of the French expedition for ligypt from Maha under Bonaparte, the fleet was intentionally dispersed in order to arrive without being notices?; they had no sooner left Malta, than they le.rmed that admiral Nelsoa had penetrat. ed their design, and was in puisuit of them. 1ixpecting every hour to be come up with, and being too weak to risk a combat, it was the resolution of Bonaparte and the rest of the illustrious persons on board L'Orient to blow her up, rather than be taken prisoners; but, that the memory of those whon perished might be preserved, and th:eir features known by posterity, Bonaparte caused the portrats of eigkteen to be taken on two sheets of paper, and to be rolled up, put in botlles and committed to the waves. The names of the persons are, (first drawing.) Dapaix [dead,] Bonaparte, Berthier [dead,] Caffarelli [dead,] Kleber ['lead,] Brueys [dead,] Datimier [deal,] Monge, Berihollet-Second drawing, Rampon, Murat [dead] Junot [dead] Lasnes [dead], Regnicr [dead,] Belliard, Desgencties, sinalkanski [dead,] Larey. Thus of the cighteen eleven are now no thore. The portraits are executed in medallions in ludia ink, and now ornament the study of Baron Larey at Paris.

Patexe minle-fiom the Richmond Compiler:There has been depositel in this office an "Improved patent rifle, marle by Jolun H. Hall, of Portland, district of Majac." It is intended for the inspection of gentlemen, who are conversant in the use offire-arins. It is a curious invention, its great peculiarity being. 'hat it loads near the but end, instead of at the innzzie. Near the lock, tiere is a spring whick being torched and pressed down, canses the Receiver to fly out on a hange. Yont intruluce the curtridse, containing the powder and ball, press the receiver to whichs shuts with a eatch, and the rifle is loaded. There is of course, tho ramening down thelsill, \&e. with a ramrol, the onls the of which is occasionally to swab out and wash the rifle.
some of the advantages of this improvement, as stifel in an accompanting pamplilet, are, that the patent rilles may be loaded and fired with good a1m. ware than twice us quick as muskets can be firel with cartrid!ges-they mas be fired as of ewil as any g'll call bear fizing, withult soo:a becor in -
too hot to be held; in addition to this, they may be loaded witl great ease, in :lmost every situation, either in lying dawn, sitting on the ground or on horseback, walking and even running - "They require too less swabbing, sum i : never interteres with the charge.-They camot be so much overcharged by accident as other guns, and therefore are not so apt io get burst, Sic. \&ic. In short, they are very durable, and combine every advantage peculiar to muskets, except of throwing shont, and that pertains to common rithes with many other im. portant advantares possessed by neither of those species of firearms, but peculiar to these alone."
The writer of the pamphlet observes: "As the forte of American militia consists in their superior skill in the direction and management of firc-arms -as from their local knowledge and from their habits they will always excel as light troops-ant as the most important advantages may be derived from their ability under proper arrangements of quickly assembling and moving with rapidity to any reçnired point, these guns are most excellcntly adapteil for thein."
Light housns-From the National Intelligencer.Contracts have been made for erecting during the present summer, the following Light houses, in the state of Massachusetts, viz:

On I'ctil Manan.
On Naushawn Island, near Tarpaulin cove.
On West Chop of Holmes' Hole.
At Niantucket.
These houses will, probably, all be completed in the month of October or Noveinber next.
Arrangements have likewise, we understand, been made fur determining whether Gas may not be advantageously substituted for oil, in the light houses of the United States. The experiment is to be made at the light-house at Newport, Rhode Islani. It is particuiarly recominended to the attention of marioers, from whom communications jaduressed to the treasury,) as to its relative benefits or inconveniencos, when compared with oil, are invited.

Annual censos.-The rev. John Sianford "attending minister," in the city of New Yark, has furnis!aed the editor of the "Columbian" with what he calls his "amual census"-of whic! the fo!'ow. ing is a compressed view:
In the orphian asylum- 66 bors, 47 girls-total 113.
Cily abne house, including children at nurse-whic men 368 , hoyss 396 ; white women 394 , girls 242 : black me1: 29, boys 15 ; black women 4\%, girls 11total 1500

City hospital-patients 190; maniaca 78-total 263. 1hebsars prison-including the liberties, 300.
Bizdervell-white nien 41, woman 17; black men 23, women 33; boys 7-iotal 127.

Peritentiary-13ellevue, white men 8.s; white women 40; black men 52; women 11-total 199.
S:ate prison-rihite men 6idt; white women 1!bl.ck inen 80 ; black women 29-10tal 752 .

Grand total 3249-du. last year 240; increase 82.3.
- 1acoline!-A colalomic of curiosities recently published in the Confecticht Journal, inentions ammig the collection, lie follonving motern inven. lion.-"Amicus Famine O,timus, of an African Corslctizing inill, for frindling up scandal and awl blades, envy aud eo ki crows, tattling and waggou spckes, and ing sta innaly uniting thesia to as 10 produce ready nude corsleis fior the wee of the fair.
Vuatri Fisturs - Fron a lbromuls puper. Oive
 ry, which hat! brets fitted with a gro imported by the proziates for: the papooc, hias latert shot a

Whale and brought it in. This is quite a movel mude uf car ying on war against those huger natives of the briny element. The gnn is charged with a harpoon of a curious construction, which is shot with such furce as 10 enter the whale at a consider:able distance: and possession of the object is retianed ay warp attiched to the harpoois before the discharge of the gun, and made fast also to the boat. till of cuars, from a British paper, paid by the united kingloms of Great Britain and lieland for enstaving Furope.
The sums amnually raised by taxes, since the conmencement of the war, are as follows:
\begin{tabular}{lr|rr}

\section*{CHRONICLE.}

A frigate-built ship, called the General Scott, lateby sailal from New-York, said to be bound for Havanna. She is described as one the fastert vessels that ever Hoated - is of 1000 tons burthen, and apppears to have been completely fitted and armed, from the attention she excited in that place.

An English paper, noticing the election of Mr. Monroe to the presidency of the United States, observes, that he lost a leg in the revontionary war, and is rather of the Washington school.

On the 25 th of April last, (says an Ohio paper) the chief judze of the supreme court of the state of Ohio, was fined one dollar and fifty cents for not attending a militia muster, as a private sentinel, in strict conformity to the laws of the state of Ohio.

The Spanish consul at New-Orleans has been caned by a Mexican officer, who immedintely after inade his escape.

Died, at Belle Fontaine, capt. Edmund Shipp, of the rifle regiment-a valuable and much esteemed officer.

Also, at Washington City, the lady of the Spanish ininister, the Chevalier de Onis.

And in South Carolina, col. Joseph Calhoun, in his of th year-a revolutionary patriot.
It is stated that Mr. Taylor, our consul at Port au Prince, has left that place in consequence of the condemnation of an American vessel by Petion. The merits of the case are not given.

It is also reported that the Carthagenian crmisers have cummencal hostilities on Petion for having seized upon several Spanish prizes sent by them into lis purts.
Hemlock. Same school boys belonging to Hillsboro', N. C. stopping at a spring, met with what they thought was angelico, but which was hemlock. Two of them ate of it-one of them died in less than an hour; but the other got well.

Sluck's Ejc.-at Baltimore, May 28. U. S war loans 103, old 6 per cents. 100, bank stock 95 ,for 65 paid. Exchange on London, 2 per cent. ad.

Consron schools, in Neiw-Yoik. We have an abstract of the returns for 1816, made to the superintendant of common schools by the clerks in all the counties in New-York, except 5-but the relurns fiom many of the towns within the counties report
al ate wating. The foitowing are the risulis. The counties reported rontain 484 towns, and returns are given for 355. Whole number of schoul distacts in said towns, 3,713. Districts from which returns were made, 2,873 .

Amomit of monics received in said districts, \(\$ 174,08196\).
Number of children taught in them 173,240 .
Number of children between the ages of 5 and 15 residing therein 198,440 .
Impeninent of spezeh. We are notified that is person i: Philadelphia has adopted a course of application by which adults ahd children aftlicted with defects in speech, may be relieved and in some case: cured.

Address, F. X. post paid, northwest corner of Union and Friend streets, lhiladelphia.
Steum frigutes The commissiontrs of the navy have issued proposals to contract for three steam engines of 120 horse-power each, to be completed with: in a year, for as many steam frigates.

Numth Camolia. We are, indeed, pleased to learn, fiom the "Carolina Observer," that many valuable improvements in agriculture have lately been introduced inio the interior of this state. There is no member of the union, perhaps, that possesses a better soil or more healthy and benignant climate than North Carolina, a small distance from the seaboard; her population and wealth has rapidly increased without much assistance from emigration, and all are glad to hear of the prosperity of this inportant and patriotic state; as domestir, and, perlaps, as completely dependent on herieif fur the necessaries and comforts of life, as any in the union.

The Mlbiny Regioter is to be resuscitated, and will appear under the editorship of Mr. I. W. Clarke, on the 4.th of July next.

Emigration. From the 10th of March to the 27 th May, there arrived at New-York, 250 vessels, in which came 1600 passengers. Many have arrived at other ports-a vessel with 130 has just reached Philadelphia from Guernsey.
"T'he buandary commissioners," so called, appointed by the United States and Great Britain, appear about to commence running the line to determine the boundary east of lake Champlain.

The Rounoke. A board of commissioners haz heell :"ppointed to explore the coast of North Carolina, with a view to ascertain the practicability of deepening the entrance of the Roanoke river, which is nearly choked up with sand extcrnally, supposed to be thrown up by the current of the Gilphistream.
hicharonn. A census has just been taken, (by order of the Common Hall,) of the population of this city, and the result is thas reported:
\begin{tabular}{cc} 
In Jefferson Ward, & 5,107 souls. \\
Madison ", & 3,752 \\
Monroe ", & 5,479 \\
Total population, & \(\mathbf{1 4 , 5 3 8}\)
\end{tabular}

Being between 4 and 5000 more than is enumerated ial the federal census of 1810.

Singulur escrape.-Fron the (New York) Columbian On Saturday last an infant about 2 or 3 year's oid, unperceived by its family, got out of the scut. He or dormant window of a tiso story house in Che-ry-street, and crawled down the roof to the back gutter. In this situation the child was discovered hy a man in Water street, and the alarm given to its affrighted parents, who remained in an agony of suspense for some time, until by the activity of a cabinet-inaker at work in an adjoining yard, the the little adventurer was reached and hapded into the gavart windew in safety.

\section*{}

\section*{A Naval Establishment.}

The facts staied in the foilowing were expected by us to have concluded the article under this liead in our !ast paper, but they did not reach us in time fin it. They are in answer to certain queries that the editor respectfully addressed to a di-tinguished gentleman, whose great experieme and lucal situation gave him the best op. portunity of furnishing the information requested; we are thankful for that urbanity which induced him so bandsonnely to comply with our wishes, and therein, we think, gratify his fellow-citizens at large, deeply interested in all that concerns the navy.
"Sul-In ansiver to your enquiries, permit me to in. form you, that the whole annual expense of a 74 fim ship, in scrvice, exclusive of repairs, and which, kaking one year with annther, will not exceed \(\$ 24,500\), is estimated at \(\$ 184.529\); and the expetse, in service, of a 44 gun frigate at \(\$ 134,210\), exclusive of \(\$ 14,200\) for repairs.

I am not in possession of any positive data by which to determine their relative expense, when laid up in ordinary; but from any experience that Ihave had, Iam inclined to think we shouldi come nearest to the muth by estimating their annual expense, (keeping them in a state of perfect readiness for service) at a sum eq̧ual to, but not exceeding, the ariount requirch for their repairs in actual service. In this, however, it will be observed, thit the amount of the pay and provisions of the few officers and men necessarily attached io them, for the purpose of taking cale of them while so laid up, is included.

If the hefore enumeraterl entimates be correct, and I have good grounds for believing them so, it is to be inferred that the annual depreniation of a 74 gim ship is actually no more than \(\$ 24,500\) -while that of a 44 gun frigate is bat S14.200); consequently, that by expending annually, for repediry, the before mentioned stuns, they would, in all probability, be as fit for service one hundred years after, as they were the day on which they first put in sea-provided, however, the repairs alluded to are made in sutitable docks, instead of the de. struclise and inefficient mole [heaving down] that we have heretofore praclised.

The frames of our ships have hitherto been ennstucted of lave ouk, and we ought henceforward never to use any other, provided that can be obtained; and of which there is no doubt, if suitable measures are taken to prevent its destruction.

Imention this to prevent vour thinking me extravagant in calculating the duration of the frumes of our ships at 100 years; but of this I bave no dutht, so fir as regards the live ocibe part, proridied they are repaired under the advantage forded by dry docks:-indeed, from the oberlyations that i have been enabled to make, enrms kind of imber, during a series of more than 25 years, 1 am led to believe that under the circumstances 1 have mientioned, it would be found entirely imperishable, or at any rate as much so as a block of marble."

Vo2 XIS.

\section*{Statesmen and Politicians.}

\section*{POLITICAR, ECONOMY-NO. I.}

Many have thought that statesmen and politicians were svnonymous; but the absolute distinction between them begins to be duly apprecinted. Puliticians are sufficiently numerous-some are to be finurd in every village; but there are few statesmen. These are better calculated to give lisht from the closet, and clam admiration in the coinmittee-room, than shine before the people and make great speeches in the legislative hall; und mankind are too willing to sucrifice substance to shew, especially if the former trenches upon their ease. In addition to these hin. drances, the growth of statesmen is retarded by the sevisity of labor and profound calculation need. ful to understand the political economy of a country; and applause, more or less the desire of all men, slowly follows its acquireroent, because its operations are prospective-and its benefi is spread themselves so gratually before the people, that, by the time they are developed, their author may enjoy a posthumous honor, in the records of histhry. Few men are willing to labor for this reward only-but nimost any ruan can make a speech about the conninon concerns of the day, and sty aye and no, with promptitude, to the variuus questions of party; and some can hold a good argument on either side, as they please-without reflecting, without knowing, periaps, that nind has marclied before them to lay the foundation of the right or privilege :o move their congue about politics at all. Statesmen may he called matter of fact inen-politicians are men of opinion. It costs much tronble and research to the first to advance a proposition-for they view it with mathematical precision before they give it, whereas the other, on either side of the question. ty subscribing to an active newspaper, may have all the matter they want for eight on ten dollars a year! What a vast swving of labor-ccalculcuzasas are bothersonte things. I know two gentlemel, one then a member of the senate and the other of the house of representatives of tle United States, (5reat follticwars) who 1 reforred each to extract (wo or thee pages from my humble writings and use them no that own, leller anil frure, rather than take the tinuble of making calculations for themselies! Ifelt Ut a complinent, while 1 refrretied that it was so paik to me; for I spoke of things that ouglit to have been notorious (1) every reflecting man. In is lic silens Work of the statesman, not only to put the well balanced wheela of a syntem in motion, but to take heed that they are neither accelerated by the introiperate venl, nor impeded by the culpable neylifence of polancians, often a disagreeable and veri ungraci oub duyy, if our nat on's good d.pended upon an
 speak upon domestic cometry of opinion, we stasuly every where prestht a tivat as lerrible in an evemy \({ }^{\text {Ho }}\) the sides of the thpict-victorious Constitutions frigate, and have avwillol the pinching times thas, now set upon ue sotheavily But this sort of peoplo do litue good to the curutry-office or power, for themselves or their friends, is to0 frequentiy the spring of their zeal-Uney care not where the fomedation lies so they are at the hued of ibe stractury
long enotegh to accomplish their own selfish purposes. Let us "dig deep" and discover this found.a-tirn-the gad fli s that fluter round will leave the cap-stone, if the people strike at the base.

A writer in a Jurth Carolina newspaper, supposes that the present parties in the Uniied Siates will decine; that che Eastern states will side with the admmistration, because the administration will sup)port the "manufacturing policy"-athd goes on in conclule that there will be a "mantuftutating and an "gricsitural pa:ty." This is speaking as a politi ciun, and, if stech a division takes place, it will grow out of jolitics, not of policy. There is no rightfui or reasomable cattse for such a division; the inter sts of the t:o are insepurable; and buth, to a certaln ex ent, munt be aided by commerce to their legitionte standing. All will say that agriculture is the moet important of the three, yet it is needful in its welfare that the others should have respect an! ipuportance, as we shall atte,npt to shew in the sequel 1 am of the belief, that nothing but a proper \(=\) quitibrinm between them can be relied upon to priselve the present glorious equality that prevills the Uni ed States, and keep the middle class (so chlie(1) which is the bone and sinew of every foury, from annihilation. A nation of pure agriis cais cannot be numerous, unless there are lords sud peasant - masters and slaves;-a nation of manuficturers must abound with nabobs and paupers; aid a nation of merchants, to the misery of these two woull superudd a degradation capable of trampling tipon the cross and dealing in the scalps of men to make money. But each balances, regulates and refines the rest; and, in their union, afford us the ineuns of being, and of continuing to be, a iree and happy people, as well as a sovereign and independent nation, for ages.

Ja)cal circumstances and temporary matters may make it the interest of small countries, or sections of coentries, to encourage or chiefly support some one (f) these sources of wealth-and so the people of A1.rsachuretts, not long ago, seemed willing to sa cutice every thing to commerce. This was a grand wistake: but when, through the force of party zeal for ligiand, some of her citizens opposed the establstacit of manufictures among themselves, they detred the character of madmen devouring their ow flesh and broot. A very honest and uruly Ame sicat poritician in Somth-Carolina, Georgia or Louisia a, may feel a certain degree of indifference about home matufictures and American shps for carriers of his agricul uial products to market; but the man of Massachusetis, Rhode Island or Connecticut that ias such a fecling, inust possess a very depraved heart, or a very weik mind. The stutesman, in cila \(-1+c\) ion, would see that a combination of the in erests of all was the true interest of all. The deep soil and rich products, sparse population and uumerons slaves of the southern states, canses their palutian to feel a less immediate necessity for ifutiticturing establishments and the employment of our own s!ips ind seamen, than would others, in the castern states, where o thin soil and severe cliIm \(1 \xi^{2}\) gind \(^{2}\) Iing ningrea profit to agriculure, eems wit i frcemen and is lestitute of the cheap labor of slaves. These inust seek the productive eipploy. ment abroad that the nther, have at home, or create s.mething that may affird it at their own dours; and it will in no wise surprise me if the statesmen of Massachusetts, whose voice, or will, was lately drowne by the noise of faction and fury of politics, should soo: come ont decidedly in faror of manufactures, and endeavor, by all honorable means, to give them a firm footing in their country. Nothing
else can prevent the fower of their youth from emigrating ton rapidly.
I certainly wish that the present partios in the United States should decline-I gladly believe that their animosities are sinbsiding, and feel acsurcd unat If it were not for demagogues and office-hunters that the preople world scitle down in a broad and proud American feeling. But let us not sh \(k \in\) of our present denomiriations of republicans and fude. ralists to take up the more injurions party names of agriculturalists and maunficturers. 'Their interests are entirely compatibie - liey are so knit together that they cannot be separated without an act of violence ruinous to both and the nation at large.

Many etatesmen have held an opinion that \(i\) was for the interest of the United States to lave their "workshops in Europe." Among the mnst distiguished of these were Mr. Jefferson and Mr. \(H_{2} \%\) licin L. Smith, late of Siuth Carolina; both of whom, with o hers, changed their opinion as the resuurces of their counrry and its wants developed themsclies. Mr. Jefferson, in his admirable letter to 13. Austin, Esq. [see Wemkly Registen, vol. X.p. 25,] says"We have expcrienced what we did not thell [in "1585] believe, that there exists both profligacy "and power enough to exclude us from the ficlil of " interchange with other nations, that to be indepen"slert for the comforts of life zve must fubricate them "ourselves. We must now place the manaffacture" "by the side of the agriculturalist. The former q" \(s\) "tion is suppressed, or rather assumes a new form. 'The grand enquiry now is, sliall we mukr' our bring comforts, or go zeithout them at the aill of a fureign na;ion? He, therefore, who is now ag inat do"mestic manufactures, must be for reducing us "either to a dependence on that nation, or be clothed " in skins, and to live like wild beasts in clens and "caverns. I amproud to say, I gr not one or thesk." Who does not see the force of these remarks? Yet, perhaps, to the original opinion of Mr. Jefferson, so popular with one party and so inuch esteemed by all for his talents, we are more indebted than to any thing else, for the prejudices existing against manufictures, among politicians-who look at the outside of things, and feel it a sort of derogation from their dirnity to give up an idea once formed. Truth-principle, is always the same, unchangrable. It might, in 1785, have appeared he interest of the United States to discourage manufactures-there was a steady demand for all our surplus product of agriculture;-but how have we changed, how has the very mature, almost, of our country and of all Europe charged since then; and what revolutions have also taken place in manutactures themselves, by the introduction of labor-saving machinery

The great objection to manufactures was, that they abs racted labor from the nore profiable and more healhy pursuits of agriculture. And this might have been a reasonable objection when ablebodied mien were doing the work that is now better done by little girls from six to twelve years old. We here allude to the manufac ure of articles for clothing, with a reference to facts that cannot be questioned. Messrs. Robert and Ilexander .II Kim Lave a cotton mill in Baltimore, driven by steam, caple of making a certain quantity of yarn per annum. "The cost of the raw inaterial used, at its present hush price, is estimated at \(\$ 35,200\), and the value of the jurn produced, at its present low rate, at \(\$ 58,500\). The difference between these sums ( \(\$ 23,300\), ) variously disbursed, and some part retained for profit or interest on capital employed, is nearly as much a value created and thrown into the general wealth, as if the Messrs. M'Kims were

\section*{NILUS' WEEKLY REGIS'TER-POLITICAI ECONOMY.}
capalife of transmuting some useless substance itrio pure gold of that value; for in the whole establishment they employ but two or three inen;-all the rect, in number about 100, ave gurls from 6 to 12 or 13 yfars of aze, and a few womell; zwho, veithout tiis emit oy, zoould eurnu uothung at all. Mr. A. M'Kim, (the late inember of congress from this city) informs ine, that many of his little wirk-people read and write handsomely. They live with their parents, who are generally poor, but not the most incligent; and their wages assist in sending them to school or furnish thein with clothes to appear decently there. The litule girls often seek emiployment fur the avowed purpose of earning money to buy clothes to go to school in, and no difficulty is found in obtaining as many hands as are wanted. We feel warranted in saying that this factory is a blessing and a comfu:t to inany fumilies in its neighborhood. The yarn spun at this mill, if wove into clotb, would give us abolt 315.000 yards \(\pi-8\) wide, at 25 cents per yard, or S78,750, and leave a gross value created of \(\$ 43,550\), per annum-but the weaving is chiefly done by inen.

This mill gives a sleady market to agriculture of the amount of at least \$37,200 a year-35,200 for cotime, and 2000 for the erera articles of fond that its laborers consume; for they certainly live better and fuller on account of the wages received, than they would otherwise do if they earned nothing. These are its first bencfits to agriculture-what are its disidvantages? I can think of none, except the duty levied on foreign cotton cloths can so be con-sidered-which is paid by die consumer directly to the governnent, un the foreign article-or an equi valent to the manufacturer, if he uses the home made commodity. By the present bariff, this duty amonnts to nearly \(4 \frac{1}{2}\) cents per ruming yard. Bit the farmer pays no greater stave of this, for one of his children, than is paid by the poor child that tends the spindles; for she also must be clothed. Goverunent must be supported; but of all laxes for that purpose a land tax is the most equitable. Under wie present system, I pay more taxes than thousands of farmers, with as large f.milies as I have, and worth twenty times more than 1 am-periapls thrice as much; such are the equirements and neces. aties of a city lite; nor have I any way to get this equalized witis them; they may or may not buy my cummodities-lum I cimot use this discretion with sespect to their products. 1 must have themat their own prices. I vinture to say that the foreign goods consumed in blabimare produce more to the reventic than all such gouels consumed by the rest of ohurytund; and his comes less of luxury than of necessity. Wi!l the firimer refise to edvance liis portion of the pliblic burthens, haviug the power to exnet the whole of it fiom the consumer of his articles? The man whon eats bread may as f.urly be said to pay a intl of the lase of the furmer who raises the grain, is the that thes foreign goods pays the duty upon them. No surt of tax can be haid that does hot settle on consumption, or that can farrls be paid ex. cept by ishor. But it in hot woriht whate to discuss this matler at presects. Oirejstent of taxation will tiot be materially cliangel, except in coate of war, when all ranks aid conflitions inust yield the fir sup). port to the gol erament-and, the moreo domeatic we are, hie heft reason shall! we have to eypect eolletoms with fireign uations.

The city of Batumure can, wifhout ineontenifnce to its pppilation, sud with great advanuge to the morals and m.nners of its socicty, furmishl handes ir 15 nills like that of the Messrs © \(\mathbf{M}\) Kins, ench mill eqploying childera of the same sex This siytere.
source, and at a single point, would create a val.e of \(\$ 359,500\) every year, which, without it, would not in any way be created at all; for double the number of cliildren required, are alvays rumnins through the strects or idling away their time, without the least profit to themselves or their parents, too poor or tuo careless to send them to schooland we have several tbousand respectable women that would be glad to earn even tiro dollars a wee': in any way esteemed reputaible, if they could. An extensive manufacturer of Philuldelphic, who has the best opportunity of knowing the fact he states, :all. me, that he believed there were \(10,000 \mathrm{~d}\) cent nold good women in that city who would be happy fir a fitting employment ait two dollars per week, for six montus in the year; but most of them wouli expect to work in their own houses, which might be estensively contrived if matufactures were flour.shins: Would they be any the worse of this--ound agriculture be injured if the, at present, unemploi: I Tonmen of Piniladelphia were to add 500,000 ilolsa:"s a !ar: to the general wealth of the nation ?
With Ulese preliminary and desultory romarks we shall proceed to lake a view of the following s.ithjects, supported by references to authentic tucuments and appeals to palpable facts :
1. That our agriculture cannot fimmish a suridus for export of sufficient value to clothe aul heily the people of the L'inited Stated; and w, the co. 2 of such goods we shatl add the clarg es and il:ties upon them, -which mest be pail as well as the original purchase moncy.
2. That if agriculure could firnish such surphus, Whe foreign market will not reseive it ons sine ii) ten-unless at such rates and ous such terms as would beggar us. Wiecal, at 50 cemts a bulliel, delivered on our seabourd, for ex.mple, might, perhaps, gencrally find a market-ourt could we raise it at that price?
3. That the foreigo marke is never to be relict upon, and may be lost allogether by war, \&c.
4. That manuf.ctures entablisis a sieady in memarket that may be depenced upha, and have been found every where to give a stimulas to ag:iculure-in which it will appear that it is not always the interest of iadividuals to parclase a jonrign article because they c.in get it for less money than the domestic one comis.
5. That is is by insunfactures, ouls. What "ie cons
 of our contine, which is the true und aily cortuill sourso of woalth intury one
6. That certain manufictires, nuw exceecimento depressed, suchas thate of ivon, firs instaice. natas be supported, be inf imili-penealle to pur political indepeadence-and that the intin! factures being amihilated, ca mot be sull teniy restored, if we should wame lieme evor sa matht.
7. That the liigh price of libor, as the plirase in, is no otjection to thatimaturing - fing 14 wi-e nations probitit the inprertation of cillag hesvg dutis superal maty thing. they went, it ise they could fet fir la t immery dimond that doy y oan make theon for aklioner Instanco biciana, Who refuses ti) recerve toe collon guybls of ites own colonion ul A in
8. That shipping riml emomerce is necessay bith
 to the safity of the Ulited States.
9. And, hadily, that the proppie of the Lit:r] States, as agricultutaliass, woald be ian wor binhed by execonive inmufacourm, woul.1 be rendered miserable and efferninate-by wo

knates; and that the three, in certion and just proportions, must exist to render and to keep us a frec, happy and prosper us people.
Wlt may be thought by some that certain of the preceding propositions are too evident to require aty thing to be sain about them: but we propose to surport them, not by argument only, but by a collection of statisticul fucts and caiculations that may serve for useful and easy reference, if they do no good in the way of conviction and conversion.

This article shall be continued and concluded as smas tinie will allow us to cullect and prepure the facis for publication; a work that camot be performed without much examination and considerable reflection. The study of statistics, though everdtlightful, is alwals laborious.

\section*{Permanency of the American Union.} BEINGPAR © OFA A LSSAY DELIVELEC BEFORE THE LITEhaky avi phiqosupilcal. soctety of chanleston, 3N 1815-COMMUMICATED BY THE AUTBOR.
"The dre d of culamity lias often induced the evil rrolen.led. A ligh confidence in our powers, on thecmarary, however extravagant, has uniformly led to the moblest results. This consideration excies the most poiguant regret in every American, to \(u b t \cdot x\) the prevalence, in a degree, of an idea which, it sutund, would chill the lope of every patriot. Ilie il?ea alluded to is, that our confederation is temporiary-that as we increase in number we shall dimins! in harmony - that the remaining days of onr national love are but few-and that perhaps many of us may reach the afflictive hour when state slatil unfold its banners against state, and the triuenph of the American citizen will be, who is most crimsoned with his brother's blood. Were this possible, who of us would not envy his father his grave? Who would not weep over his child, bereft of the beatitude we inherited, and born to act and to suffer in this night of gloums, of sorrow, and of perdition? But may we not ask, with the great Carnot-"was " Liherty only shewn to man that he might never "enjoy it? Was it incessantly offered to his desires "is a fiuit which he nay not touch, without being "s struck with the hand of death? Mas nature, then, " afier making this liberty one of our most pressing " wants, refused us its blessings, like a cruel step. "mothcr? No." We would add to the enquiry, is sot liberty the parent of Anmerican independence aud tclicity, and can she also be the parent of our wreichedness? Are we wrong in asserting, that her bounty has been enjoyed with a gratitude which evinces it was not misplaced and should not be discuntinued? Without being sensible that our wishes form our opinion, we think we see by the lights of livtury, that the American union is permanent; that maty causes of cliscontent are transient-and that its strength will increase with our years, as time is preparing new cords to encircle and bind us more closely and more firmly.
1. The first great truth on which we base this position is, that those political bodies which we lou admire most, for their size and power, are colistiluted of parts more heterogeneous than the United Siztes.
'The whole of Europe was orfginally divided into small wariike clans, and the combination of these clals form its present great divisiuns. Spain, we kıow, was ovew un by Moors, Visigoths and other burbarians-the kingdoms of Arygon aidd. Castile grew from an union of these small portions, and the marriage of Ferdinand and Isabella converted Aragon and Castile inte the kingdom of Spain. Howeyer
bigotry and inclolence may latterly have degrade at her, she has had a period of power and venown, andhar regeneration is less distant than her senseless tyram imagines. Here, then, ferocious and pindictive bands have formed a lasting union and inade an important nation.

Similar w:ss the infancy of France. Clovis, the chief of a iribe, vanquished the Atemanni at Tol-biac-at Vouille he destroyed the army of Visigotlis, and from the repursive fragments of nations, that cherished mutual abhorrence, composed the foundation of the French monarcly. Subsequent kings, by the sword, enlarged its boundaries, ualil he present inighty empire was formed. Hoviaci I antipathies have passed away, and the name of Frenchman has absorbed every ancient disinction. Jena, Austerlitz, Mowskva and Marengo, are the lofty monuments of her power-the lasi five and iwenty years have been illumined with the deeds of hex national devotion-wilh the agony of remorse, she now acknowledges the infituated error of having welcomed, as guardians, foes so often deplumed, and she will, ere long, throw off the incubus which encumbers her, and re-appear, the wonder of the globe.

Of the kingdom of Britain we know that the portion denominated England was parcelled into seven divisions, between which wars and animosities were unceasing, until in the year 827, Egbert, king of Wessex, laving defeated the others, erected the sever into one kingdom. In 1172, Ireland was reduced and annexed. In 1284, Wales, after the most execrable and sanguinary acts, was added. Scoiland however, though occasionally kept quiescent by terror, recognised in England only an enemy-and the Ligh-spirited Wallace and Bruce, at Sterling and at Bonnuckburn, taught her the danger of outraging a peuple disposed to respect themselves. James I. on the assinine principle of legitimacy to inherit a government, was tilled king of Great Britain; but the connexion never merited the name of union until 1707, when Anne succeeded in procuring the compact of union. From that ara, nutwithstanding occasional bursts of angry recollections, each country has been happier, and these hostile neighbors have become inestimable friends.

Such is the nature of the materials which form the great empires of Hurope; the constituent parts of the United States unquestionably have more principles of affinity. The colonies were planted with emigrants from Enope. In the year 1664, the Dutch possessions, New-York and New.Jersey, were trans. ferred to Britain, and all the colonies then became the subjects of one government. There were no wars between them-lhcir views were limited to amassing opulence. In 1754, their foreign mistress being involved with France, there was a slight co operation between the provinces to give efficacy to their respective efforts, but the real germ of union never was suwn until 1765 , by the resistance of the stamp-act. In '76 they resolved to expire or to Hourish together. In \({ }^{9} 78\) articles of confederation were propused by congress to each state, which, after candid and full discussion, were adopted-in , 89 the present corstitution was substituted, which removed obstructions, and infused new qualities of attraction. From that period wealth and happiness, the fruit of union, have confirmed our determination to remain for ever one people. Such is the origin of the American republic. Its union is the result.of reasun, sympathy and general interest, not (like the nations of Euroje) of compulsion. In the retruspect we see every thing to revive and animate affections nothing that can irritate the pride or pro-
roke the anger of any one of its members. If, then English, Scotch, Wels!, Irish, Danes, Saxons, Normans, bred up in mutual destruction, can soften, assinil.ie, and he directed by one government, why shall not Americans, who have known each other only as brethren, and have always acted in the same cause, be equally harmonious? History is no light to the fiture, or our union is not to dissolve, but to aurmant in vigor, and bear new blessings and new glories.
2. The next truth which we would recal is-that the principles of forming large communities are discovered and developed as society improves.

The precedin facts establish this position. We have seen the the tribe of Cinvis become the French nation, the litil kinforlon of TVesses has grown to the vast dominion of Britain. Among the most powrerful of these principles of forming great communities we must enwinerate, commerce, the press, equality of rights, and representation.

Commerce, or the exchange of our respec:ive commodities, has civilized mankind. Our wants make us muthally dependent, and by mutually supplying them, habi:s of ami \(y\) and of intercourse are created. B, being essential to each other's felicity sentiments of friendship arise, prejudices are re moved by intimacy, and the affections expand as our comforts recipricate. This cementing qualit! of commerce explains why domestic trade atway has been and ever shoutd be preferred to foreign. The privations of war must be less, and the strength of the governinent derived from the union of its memhers is thus promoted. Now there exists not a country, the different sections of which seem to have been so planned for each other, as the Uniterd Sta.es. The manufictures and marine of the north give life to the prolific : griculture of the south, and witho the south they would pine and waste to annililation. The tendency of this situation t" confirin our union has been impressed upon our teginlatures. All have concurred that our own manufictures and navigation should be clierished anrt preferred. The only point of debate has been, how far the exclusion of foreign is necessary to advance the unanimous view. The amazing amount of our townage, seamen, and workshops has strpassed the most visionary calculations, and the result on ou. union is manifest from the indisputable circum stance, that the south and north, that Carolina and Ne Yurk are more connected now than were the different paris of the same states twenty-five years ago. This powerfill band of mion therifore exists, and is daly strengthening and enlarging.

The press, we next inention an a iniraculous en gine to effect uniformity of opinion and of conduct. It has not only overcome the imperliment of space by enabling plitiosophers in the remetest spots of the most distant continents, mutully to enlighten, but it has made the great living converse with the immortal spirits of the great dead. Washington was the intimate of Cincinnatus, Na. polcon of the wondrous Clarlemagne. The coatitions of genins, century affer century, tritumphever the obslacles of na'ure, give man new powers to extend his schemes and to sublimate his happiness. As knowledge pervades, the soul is liberalized, sofiened and refined-discord, inalice and depra. vity are banished by philanthropy, and we learn to mitigate and not to embitter the afflictions inherent in our lot. By the press only could whote na tions discuss and ascertain their interests-and whenever the right has been achinitied invariably the interests of that nation have been adranced. Is not our country an unanswerable exemplification?

Who would attempt to estimate how minh we are indebted to the diffusion of cuch beneficial prod loc. tions as that admirable rlissertation on our union and system of governatent in the bank called the "Federalis.?" We never can know how such works will impart st:abilify to our institulions, by gising ew itleas to the rising feneration, an 1 by seceretly lisonlving the hopes of proficate ambition. The interests of America are iherofore ensured, for here Mly has discuswion ener been absolutely unrestraine.l, and she clemonstrates the correctness of the republican tenet that "eitor may safely be tolerated where reason is left free to combat it"

Erpuclity of right, by destroving the marlifying distinctions and the real sufferings of a great portion of a cominunity, has ever bcen succeenle I hy harnony. Coercing the principle, to trample the mandates of conscience, to regulate his illeas hy the mind of another, would justify the helief Ilat rovernment was designed as a diabolical tortureBut as social interests are understood, the instituions of fanaticism vanish as the fogs of night before the returning morn, and it is found that goernment is stable as it is just, and that a people sre ? Ise only when they are oppressed. By ceasing to injure we ceave to hate, and general affection supersedes sectarian abhorrence. Such has been the constant effect of exploding intolerance, an't of allowing our fellow beings to think and in act as fieely as ourselves. This doctrine lins heen established by our own history. Several of the colonies. in their infancy, introduced a st. nclard of religious infallibility as the measure of civil rights. I cruel mimickery of the religious establinhments of Enrope was exhibited, and dissention, its leritimate offopring, assidnously followed. But in these our nobler days, when toleration is merged in an equal, indefeisible rig't of conscience anirl of freedom, the preshyterian, the catholic, the episcopaian, the quaker, knows his fellow-citizen only as his fellow-christian, and his country as his impart tially tender parent.

Representation is another eficarious agent. This, if not the iavention of moilern times, appears certainly with new attributes. To collect the hest informed from the inhabitants of every station in life-of every mode of employinent-and of every piace, is the infallible and the only principle on which the generml interest can be discovered. But how can this be offected if the right of clection and eligibility is limited? i sagacious ininority may adup! plansible and deceptive measures; hut their own benefit will be secured, and not the general benefit. Thus in give a fool a million a year to weat 2 erown and sit upois a throne, and to hire, at public expence, the ecclesiastics of one sect to denounce all others as heretics, is unworthy the rewards of this world or of that to come-consults the dignity and the liappiness of the peopte in a manner which an American is not sufficiently illumined to understand. In the United States all on whom the laws operate are accessary to the formation of the laws: hence those principles are infused which nourish the general interest: Our regulations are the result of reciprocal accummudation-state fraternizing with state smooths away local projudices, and we are becoming as uniform in national feeling as we are in freedom and blessedness.

The groud take delight in dwelling on our unparalleled enjoy ments, but express an amiable appicheasion that our present system may decay; and all that endears it be lost. Hut why slonold science retrocede in politics only? Have we not secn her. convert the coasting barls into the capacious met
chantman, and guide it in safety from continent to continent-from pole to pole? How magnificent is the manision she has raised where once the slovenly log-hut was her best production! And shall we doubt that she may erect political edifices that will o'ertop the wretclied coverings under which most of our race are now suffering? -The amelioration of nan is the design of Providence, and we have been too much favored to dread unkindness hereafter.
3. Another luminous truth which declares the perpetuity of our urion is, that in all countries certain opinions become a national fecling and sentiment, and are consecrated by the devotion of the people.
Il:e sanctity of the Roman Catholic religion in Spain and Italy, and the union of clurch and state in England, are conspicuous illustrations. Now we do assert that the unspeakable importance of the union of the states in the political system of America is not a mere opinion, the result of a dispassionate, eold, survey of our in'erests, but it has become a :atimal sentiment. An American would as sonn reasen with an atheist as with the idint who could nin: see, or with the traitor who pretended he did not see its ratal importance. In every discussion all phries have been agitated but by one emotion wi en it seemed endangered. Was it not to secure this sa many relinquished their speculative objections and accepted our present national constitutinn? Wias not this the irresistible argument? Dicl we not see this sentiment melt all bearts into one dirag the late glories and trials of united America? What tut this sentiment is now trging so many puiriots of geutus-so many noble-minded associatims to rear monuments of literature and of art, rot to a state, but to the United States? Next io the frown of Deity the loss of union would be our must awful visitation. The American will forgive any enemy, but that enemy who woukd assail the ulion of the states. Time will invigorate the sentiment, and identify it with oth existence.
4. Tl:e anticipation of the future grandeur of united America is another unextinguishable cause which will never allow the sentiment of union to be cold. Whilst what has already been accomplished clevates every citizen, yet what will be performed intrires him with entliusiasm. How sweet to the fathe: (o) tell his son what he is to see-how empyFean is the gratufication of two enlightened Americans reciprocating their expectations, and glowing over the vision of the great period when, unequalled in pupulation, in arts, in science, and in freedom, their country shall be the worder and example of nankind, 'This is our evening theme, it is so much a part of our best feelings, that all the machinaticyns of treason, and all the fiend-like efforts of foreign foes will but infix it more cleeply.
Such are some of the reasons on which a patriot may found his belicf in the in:crease and perpetuity of cial fame and beantiturle. Further consideration woult suggest others. Thus we might specify the varions improvements calculated to amalgamate the states which are constantly developed. This may be done hereafier, but we shouill prefer its being done by a better mind, with superior opportunities of information. A more inestimable gift could not be presented the Americin people than a compreliensive detailed view of each distinct mean to confirm the colifederation.

The only causes of dissolution which have ever been mentioned are two, viz. ambitious demagogues will persuade varions portions of the people to cast
away their fieedom, and become slaves of their
views; the other, the innate incapacity of any government to answer for a country so immense.

But we have no dread of ambition as we have witnessed its impotence. The Americans have an engine of punishment, more successful than the racli or guillotine-an elf gine which destroys the crime without injuring the crimimal--rubic uptans. The reputation of Mr. S'aya, or of the Furtford convention, will scarcely lure the ambitious to in:tation.

In reply to the cther objection: France proves the number, Iussia the extent of territory, which one government can superintend. Our political sys. tem is preferable to either of those. Like a wellformed army, while congress will direct the general regulations, the state authuritles will attend to the minnte concerns of the parts-each a distinct cluty; but all promotive of one object, the good of the union.

The illea that Americans cannot form one empire, is an old colonial prejudice inculcated by our foreign tyrant to render us more dependent. As we have thrown off her political shackles, let us no longer be oppressed with her senseless doctrines; but, using our own judgment, imbibe and diffuse those opinions which suit a great, frec, and wise nation.

\section*{British Opinions.}
from the lonbon times, april 5, 1817.
The separation of North America from Great Britain, will necessarily expose the empire to farther disinemberments. We cannot calculate on perpetual concord with the United States. Their first war with England made them independent their second made them formiduble. They lave, in consequence of that latter coiflict, cultivated with more assured and unbending pertinacity the means and resources both of war and peace. They have now for the first time a standing army,* a noveable militia, and a victorious and resolute marineTheir next warfare will be offensive, if not against our islands in the western hemisphere, at least against the British possessions on the continert; and who can say how long Canada, with her line ot defence so grievously impuired by the terms of the lute treaty, will be maintainable against the renewed attacks of this ambitious andinvigorated republic? We may reckon, therefore, on the instability of our western dominions. For the same reason it becomes a matter of very anxious consideration, low far it would be politic to reinforce a population which may be considered as the garrison of an untenable post. If, indeed, we had a prospect of so far strengthening our possessions in North Ame. rica as to ascertain their security against all attacks from without, there is little question but that a draught from the disbanded soldiery and unemployed laborers of the united kingdom might be settled in those provinces to advantage. We have already expressed our fears, that under any addition of force which we can bestow upon the Canadas, the defence of them will be most precurions in a future contest with the United States. But there is another circumstance of infinite momentthe colonists whom we detach to our own possessions, desert almost invariably to our republican rival. During the late war above 2,000 British soldiers remained (not as prisoners) upon the
*We have always liad a small "standing army"not quite so numerous, however, as our present one.

ED. HEG.

Lóstile territory. Emiprations of our sellers take place every year. What the allurements may be, is a sulyject of conjecture. The fact itself is beyond dispute, that British America suffers a daily loss of its new European population; and that the states of the union draw proportionate accessions of nu.nerical stre igth from our comparative decline. If we colonize, therefore, it must not be to the western hemisphere, Which, from Hudsou's Bay to the Straits of Magellan, seems desigued by Prorideuce for other nations.

AMEHICA.-PRYSIDFST'S SPEECHE
1.ondon, Aprit 20.- A variety of fereign and domestic intelligence will be found in our columns of this day: We cannot say, however, that there is any part of it, of any peculiar importance to the public. 'erhaps the address of Mr Monroe, upon his inauguration as president of the United States, dese ves more consideration than it seems entitled to upon inere perusal. We have never given much credit to persons speaking inaugural orations: they are ico studied, to let the real feeling of the com poser escape;-ti:ey are like howy Birmingham goods-entirely inade for sale. If we could believe all that is put forward in this address, we should think the tmericans the first people in the world; -we should think that Mentors governed, and that every child of the Uni ed States was another Telemachus! But we are not so easy of belief.We have too of en been disappointed and deceived by such aidresses; and we have too long known bow flourishing and courtly nations look in print, whilst poverty and oppression are their melancholy portion, in reality.

With all the distrust, however, which an acquaintance with the quackery of politics, and the kilavery of stalesmen must inspire, we sill can catch through the wildemess a gleam of light, that helps us on, in our road to ascertain the truth. The American government seems desirous to preserve a atrict line of amity with foreign powers; at the same time, that they talke all those uecensary precatutions which may secure them from aggression Their revenue would appear to be in a very flourishing condition; but then the expences of their governinent are comparatively nolling. We know not liow it is, that a republican government can keep their stiles secure, and affurd protection to their people, Whilst taxes are unoppressive, and liberty of person athe uf creed is unrestrained in its exercise. We cinhot inaggine why monarchical goveruments should be so particularly expensive; especial!y, as we lave never sean that their people sre inore hap. py or more free than those who live under a repub. tic. We are friculs to monarchical government, becanse we think, if properly badanced and ad. ministered, it cuuld secure every desirable blessing we tnight covet. We rather think republics are unsuited to ettarged domirions; or where nations arrive at a certain point of eleva ion, either commercial or inilitary, or agricultural. Indecel, in Greak and Roman history, we have frequent instances of chis truth; and we lhink, before very many gears elapse, that America will add another-to the examples which could be ciled. The poputation is wot yet sufficiently dense in America, to have utupe divuions occur in property and in interests, which uperate in other countries; aud, of necessity, almest impel them into a monarchical, if not th deppotic form of govermment. But as boou as Amesica bocomes a rustion-as soon as her people bour that propultion to their smil, which those of vilier countries bear to theirs-as sond as a national ian'e is formed, and as conthe'tuys intorests begin
to assume their prozer appearances-it will be found that America will become a monarchical, it not perhaps a military and despotic gove nonent. We camnot say that nur wishes second uur ouservations upon this point. On the contrary, we slionld wish for the improvement of the world, lhat Imerica should remain a republic; because, exteris hrihas, if the least expensive goverumen': possess in it eq'al elements of duration, and afford equal protection of person and of property as a more expensive, the advantuges are with the republican form of governinent, and should therefore be preferres.

America possesses many adrantages donied to other countries; and if she act a priulent purt tiwards her brethren of the south, her commerce inust improve, and her navy acquire a permasence, which may alter, in the process of time, the situations of many Eurnpean states. No man can cortemplate the situation of America without feelings of superior exultation.- I this country, urihalpin), we look upon the Americaus as the lees of sociely, and vainly think that the abuse of Jonatt:an with secure a pre-eminence to Joln Bull. The pablic should be disabused of this erroacnas notion. We should watch the progress of other states minutely; where we see their virtues, to copy then; and where we meet their vices -10 correct those of a simitar nature in ourselves.

\section*{Judge Hanson's Opinion,}

Deliverend in Balimore county court on the ret irn of a sorit of habsas curpus, in the \(c\) ase of Josqua it MEIDA, woho zuas imprisoned in tirtue of a zon at: issued by a jusiice of the pence of the stare of \(: 1 \%\). ryland for a supposed breach of a lane of the Uniticd States.
Ti,e argument in this case bad not proceled very far, before it was manifest to me, that th:c learned attorney for the Unite. States, was chtrammelled in a dilemma, from which all his msenuty could not extricate liim. If a justice of the forec of the state of Maryland, had any leg.l power to arrest a person charyed with an otheme a, ains the United States, it fullows as a dic ate of cormoun sense, that there must, independent of the law a of congress purporting to give juris liction to state tribumals, reside somewhere in the state, us an estential component of the sovereign and protec:ung power it lias a right to exercise over und ia behalf of all persons within limits, a rig't of decinting whether or not that arrest was prop \(=\) ly marle; and, consequenly, that if Thomas \(W\). (i ithit), Eict had the power of issuing a commitunen, this Cmil has the power of orderifig a habeas corpus, a.d up in its return, not only of dectiong the sulticiency uf the return i:self, but of adjoulning whetice or not the intelligent officer in ais cass, in issing his warrant, acted substamially in confior inty is the established praciples of law, regulathit the subject of commitunell. To tice warram, lit the present case, there is scarcely wime .ath ing Un many objections that have been male to it, whith thas not been ably and fully sustainel. Whe "in. gle material defect is, howiver, suflim it in invalitate it; and that of the ommsinn o thake it re,urnabse, at any time, or hefory any fromin, affords, of iiself, ample reason for if tavinig al th hosri4y derived from it. No prociedin, whly the color of latw, can be mare stisefpule of betis wrourbt into an engine of oppressive puw \(r\), tian that of depriviug an medividual of his tio ry, ..m of consghing lim to imprisomintit upon an "e. juate licaring." Every Irectuata has a ríht to be colltull.
ed with the witness against him, in all stages of his accusation; the privilege is inherent, and the right to demand the enjoyment of proving his innocence simultaneons with the first step of prosecution. Before, therefore, any commitment can be lawfully made, the accused is entitled to an opportunity of shewing, either that the act he is charged with is no crime in the eye of the law, that if any wrong has been done he is not the pe petrator of \(i\), or that Howeyer strong the evidence may be against him, the offence alleged is of a class justifying the dis. charge of his person, upon the production of such bsil as may be legally required of him. If the comdition of society were otherwise, the time would have arrived ere now, when the occasion and the disposition would have presented themselves of d-ciding all such ques ions in a very summary way These preliminary points being settled, it becomes necessary to decide the main question, in which the whole of the case has resolved itself. That is to say, whether this court has power to commit for an a' leged offence against the United States; and going One step further, whether a law of congress can confer any judicial power upon state tribunals?

Alihough the adjudication of this pnint devolves upon us the duty of passing upon one of the greatcst judicial questions, that of the constitutionality of a law of congress, yet as every court is bound and presumed to know its own jurisdiction, we cannot avoid deciding whether we derive any jurisdiction from the law of the United States, passed in the year seventeen hundred and eighty-niue, organizing the judiciary of the national government; and consequently whether the 33 d section, and indeed many other sections are constitutional. Notwithstand ing this point has been expressly decided in Virginia and in Ohio, and collaterally in the supreme court of the United S:ates, as may be implied froin the scope of the opiri.ons of judges Johnson and Story, as reported by Wheat in, it is with an irresistible awe that I approach it, for should our decision be adverse to the constitutionality, we virtually adjudge, that in this case, although it be a question arising under the constitution of the United States, the supreme court can exercise no appelate jurisdiction, inasinuch as we absolve ourselves from the obligation of sending up the record for their revisi:n; and as so \(m \cdot n y\) other of the statutes of congress are dependent for their execution and utility upon the administration of them by state tribunals, the argu ment "ab inconvenienti" has great weight, and is entitled to the nost serions coisideration. The law of congress before us, was passed in the year 1789, the first session of.er the adoption of the constitu tion; it was proposed, debated and digested by a body of inen, the ct ief and prominent characters of whom were themselves the erectors of our national institutions. It has been acceded to and acterl under in this and every bther state in the mion; it has never been inatruinental to any signal grievance, or complained of as a public or private evil; it has on the contrary been resorted to as a useful and salutary regulation; it has suved expense and trouble to the general government without being burthensome to state officers, and there appears a degree of propriety and fitness, that as every individual state and every officer thereof is interested in, so they slall be rendlered auxiliary to the execution of laws, malle for the benefit and proteciion of tie whole. The law has obviated on the part of the United States, the neces sity of scuitering at large a host of officers through out the communities of the different states; it has kept them ciear of creatures armed with authority, derived from an executive foreign from and not har-
monizing with the state government, subject to re: gulations in their official capacities to which the people, amongst whom they be placed to reside, would be unused and averse, and susceptibse of being made the insiruments of power whensoecer it might be expedien: for the gerieral government to avail itself of engines calculated to propagate its opinions, and to uphold and enfirce its ineasures; or, at least to defeat by confounding the resort to legal remedy, in the heterogeneons process or jarring and conflicting jurisdictions. But, motwithstanding all these considerations, I will proceed as concisely and in as condenseck a manner as I am capable, to present my view of the subject. The national government appear's to me to stand in relation to the states, as civil society does to the individuals composing it. Both coisist of a congregation of surrendered or delegated rights-and in neither case can these conceded powers be eplarged, dininished or return. ed to the parties granting them, but by their own consent, collecied in such manner, in the first case, as the constitution providing for its amendment should prescribe; and, in the second, as the laws of the social compact should direct.

The several independent states have agreed, by the constitutioa, to invest the jurlicial power of the United States in one supreme court, and in such inferior tribunals as the congress may from time to tinne ordain and establish; and then the constitution goes on to define, what is the jullicial poiver of the Enited States collectively, as a national government, as I understand it, in contraclistinction to the judicial pawers of all the states seperately, viz:The judicial power of the United States, shall extend to all cases in law and equity arising under the constitution-the laws of the United States, and treaties made, or which shall be made urder their authority; to all cases affecting ambassadors, and other public ministers; to all cases of admiralty and maritime jurisdiction; to controversies to which the United States shall be a party; to controversies between two or more states, between a state and the citizens of another state, between citizens of different states, between citizens of the same state claiming lands under the grants of different states, and between a state, or the citizens thereof, and foreign states, citizens and subjects. From the word all being used in the first part of the clause, dropped in the midule and again resumed, it has been inferred, that exclusive juriscliction was not i: 1 every case enumerated, delegated to the United States. Be this as it may, the states, beyond all controversy, reserved to themselves some, if not all rights not expressly given away, and having done so, they unquestionably had the power and exercised it, of creating judicial tribunals for the protection of such of those rights, and the adminisiration and exposition of laws passed in regard to them, as they might deem proper; and if they deemed it expedient to leave their citizens without tribunals having authority to afford them remedies in certain cases, and especially those where the United States had clearly jurisdiction, if only concurrent, where exists the power of congress, under the constitution, to compel the states to create such courts, or what is there to prohibit the states from enjoying the exclusive use, for state purposes, of their own courts and civil officers, and of prescribing as a condition of the tenure of office, that they should, as the constitution of Maryland has done, exercise no office of profit or trnst under the government of the United States? What rightful power has the congress, after the adoption of the constitution and the investment therelyy of
judicial power in the general govern we,t, to enlLarge, dininish, or return any of its powers to the states? If it had a right to confer any power, wha power has it not a right to confer, unless expressJy prohibited by the letter of the cons.itution?and state tribunals must thus be converted inc: coutrts of admirally and maritıme jurisdiction. In fact, if the congress bas the power of conferring en them the duty of arresting, of committing, holdi is to bail or discbarging without it, all of which are julicial acts, bec nise they imply an act of judgment and are not mere ininisterial duties, it must also possess the power of assigning to them that of trial, conviction and sentence io puaishmentSurely it campot be contended that such authority is derived fion the clanse that the judicial powicr of the United States slall be vested in a supreme court and in such inferior courts as the congress may from time to time ordain and establish, ana shat under this interpretation, state courts may, ot the pleasure of congress, without their consemt or knonlectge, or the sanotion of the state under which they act, be converted into United Staces courts; if such were the ease, congress would have nothing more to do, in order to destroy a state judiciary, than to assign to the judges duries uncter the genepal government, and as fast as lie siste of Marylant created court, congress might prostate them until its constitution should be aliered and its officers allowed to hold offices under the United States. To whom should we then io \(k\) for the protection of reserved rights? The first section of the curt of the United States is cleaily proppective: it declares that the judicia! power stiall be vested in otie supreme court, not in a court as it were alreaty created, but o be creared, not in inferior tribunals in existence, but such as congress shall from time to time ordain and establish hereafter; evilently intending these cours to be Uni:ed States cuirte, responsible and impeachable by the United States for neglect of duty or the abuse of power, and for ming a constituent part of the judicial system of the United States-Again, if congress lias power to return to the states judicial powers. or enlarge the power of state courts, why should it not have the power of returning to, or enlarging and diminishing the legislative and executive powers, and if it could assume such power as to all the states, what is to prohibit it from exercising it as to anyone or more of them? And thus at once might be finstrated, the windom and foresight of our fathers in securing to the smallstates an equal re. presentation in the senate of the United States with she large unes-by gielding to a majority of congress the power of imparting superiority and predominance to any one or more states by returning to them sovereign, judicial and exceutive powers conceded to the general government, whilst it withheld them from others-These may be termed extreme cases, but it must be observed, that if the occurrence of such eases had not been slighited and overlonked, many revolutions of government would have been escaped, which have anvolved in them the servitule and wretchedness of millions. If congress has power to require of the state courts to take cos. mizance of any matters assigned or relinquished to the supreme and inferior coums of the United? States, it surely is not limited as to the extent of this demand; and under such a cimstruction, all the business of the general givernment mignt be - imposel upon state tribunals, whose jindges being thus subjected, it is easily comprehendect, would he compelled either to resugn their seats upon the bench, or to exact of the state governments, by
wious we, were employed, an increase of comperta ion cominensurate with the enlargement of their oflicial duties; and the general government, by ti. ese means, might be enabled to impose and exact a :ax, of any one or more states, in a way unjust and unequal, and never contemplated by the genills of our goverument, or letter of the constitution. Bessiles, the constitution of the United Sules prescrises, that the judges shall hold their oflices durmg good beliavior, and shall receive for therr services :s cuinpensation, not to be diminished during their continuance in office; now the tenure by whin state jud bes hold their offices, it is notorious, varies in almost every state, and, here partionlariy, it essentislly differs from that provided by the constitution of the United States, and civil officers are expressly furbidden to hold any office ot profic or trusi under the general governments Now then, can the congress of the United States, coapel them to accep one, for which they shall rective \& compensatun, not to be diminished duri is their conti. uance in office?-Again, the man ner of theur appoin ment is Lotally different-The consticution of the United States requires the judges to be appomte.! by the president and senate; can it, hen, be seriously contended, that congress, by a law can, lut only, ordain and establish judical uribunais, conver: 10 its own use state courts, some created since, others in existence before itself was ia beng, but that it should also forthwith proceed to the appointments of judges therenf, without the consent of the president, the senate, or the judges hemselves. Certainiy, such a doctrine asserts the power and would have the inevitable consequence tu absoib into the general government all state soverergnty, and by thus appropriating and controlling state courts-indireciay to modify, regulate, abriuge, invade or destroy the rights and privilegco reserved to the states, for the protection of which, they had organized their courts of justice. Have the states any where expressly or by implica. lun clelegated any such power to the general govermment? It has, however, been urgelas an argument in support of this motion, that in many cases the state courts and the United States courts, have a concurrent jurisdiction, and that, therefore, the judicai power does not exclusively belong to the supreme and other courts of the United States; and sire.ig \(h_{1}\) is attempted to be given to this idea, from the word all not being used throughont, but dropped, when controversies between the United States and any one state are provided for. If there can be any discrimination between the judicial power and all the judicial power, it may possibly liave been, with a view of avoilling any expression that. might be construed to take a jurisdiction from the state courts which they had before exercised, to Wit, that of deciding claims for, and against the United States, under the old confederation, and warch the constitution subsequently expressly reserves in them, that this variation of language was adopted.- But if this proves any thing, it proves too much, (there being no denial, that the national govermment has power to punish offences against its own laws) for it rather implies, that where the word all is used there is no concuerent jurisdiction, and that concurrent jurisdiction existed only in cases where the state courts had a previous cognizance: besides, if the constitution, with a view to the doctrine of reserved rights, gave, or recognized a concurrent jurisdiction, there could be no necessuty for the law of congress to give it; and, if the state courts had it not before, and did not get it from the constitution according to the principles I have
encleavored to enforce, they could not obtain it by a law of congress. Whatever doubt, therefore, there may have been as to the jurisdiction in civil cases, with respect to the criminal law of the United States, I can entertain none; for, it is obvious, that previous to the constitution, there could be no criminal jurisdiction of offences against the United States any where; and, if the state courts could subsequently have it, they must derive it from the constitution itself. But this no where appears on the faec of the instrument; and, inasmuch as the legislatise, executive and judicial powers of the state governments, consists in the reservation of rights not delegated, and cannot in any degree be composed of concessions from the national government, which is itself made up of what the states had parted with, it would be, according to my appreliension, too great an incongruity to construe the right of conferring jurisdiction to be vested by the constitution in congress; and it cannot be too constantly borne in remembrance by the civilian and statesman, that if congress could eularge or diminish the pow: er of state authorities, it would necessarily follow, that our national goverament would present the singular anomaly of one co-ordinate branch of a government possessing, as a component part of it, the inherent constitutional means, not only of its own dissolution, but that of undermining the basis of the whole fabric, in the surrender, without the consent of the parties to the contract, who must be either the states or the people, of legislative, judicial and executive functions.
Upon the whole, it appears to me, that every cotemporaneous exposition of the views and considera tions of the framers of the constitution-all traditional information of their conferences-and the opinions of enlightened statesmen who have before and since discussed it-carry with them a weight too impressive to be resisted; and that they all coucur in converging to the position, that every exercise of control over, or interference with state authorities, on the part of the United States, where the right is not explicitly granted, has a tendency to convert our confederative republic into a consolidated government; and that unless such constructions are guarded against in time, at some day, a popular and ambitious executive might become the "arclitect of ruin" of the liberties of the people, by attaining a sufficient ascendancy to contract or dilate state powers, according to circumstances; to convert independent sovereignties into vice-royalties, subservient to his mandates; and, in fine, to reduce a state, as it relates to us, into a mere "im. perium in imperio," and possessing no more dis inct and separate rights, than the mayor and city council of a city could exercise in opposition to the legislature, judiciary and execution of a whole state; and although it may be oppositely said, that state governments, as regards the national government, ought not to be considered as sovereign powers foreign to each other; that they are all parts of the sane whole, and that as the people of the states are the people of the U.inted States, the same policy, laws, and process may and ought to pervade and regulate the whole empire, as the same blood which flows into and nourishes the heart, runs through and invigorates every artery and fibre of the body; yet to miy mind, the uniformi'y of a constellation is more illustrative, in which the national sovereig"ty whilst performing its evolutions, is revolved round by the states, on their own axis, and in their own orbits, and if in departing from its course it shoud approach to concussion, with its satelites, they would be jostred aud obtruded from their
spheres, whilst its own functions would be obstruct. ed, and the order and conformity of the whole system, deranged and destroyed.

I am of opinion, therefore, whatever donbt may exist as to the extent of jurivdiction common io state and United States' courts in civil cases, that state authorities cannot act in any stage of prosecution fur offences against the laws of congress.

\section*{Manuscript from St. Helena.}

From Bell's Iondion Weehly Messenger, of March 31.
As so much of the attention of the public, during the last week, has been directed towards this singular production and its reputed author, and as the manuscript appears to justify the importance assigned to it, we have deemed it our duty to give it a perusal. According to Mr. Warden (a selfsufficient writer, and a forlish one, but an authéntic one, as far as he himself appears to be the writer) Bonaparte was much occupied in writing; and the nstural purpose of writing is to publish and he read. If Bonaparte, therefore, lad thus written his memoir, either in part or in whole, it is 110 matter of just surprise that it has found its way to the British press. Of his several visitors at St. Helena, there are many who might have brought away with them a letter or packet; and Bonaparte would find no difficulty in procuring persons in England who would undertake and execute the charge of having it published. We do not intend to infer, from what we have said, that there is any thing improper in this act of publishing, or bringing away for the sake of publishing. If there had been any thing libellous, the English law would have had a responsible subject in the bookseller. Let Bonaparte, therefore, be permitted to publish as much as he pleases. It will be an aid to the history of the times, and will bring us better acquainted with a character which has oceupied so large a space upon so wide a theatre.
The first singularity in the work (which is only published in French) is the abrupt, and, as it were, passionate style of the writer; a style which has so notoriously the characteristic manner of Bonaparte, as to be an argument neither on the oue side nor the other, for the authenticity of the work. In a very foolish bock, but a very interesting one, of that Freuch archbishop and intriguer De Pratt, the reader may remember several long conversations of Bonaparte related verbutim, and in which may be scen some very striking specimens of this style of the French chief-a style equally characteristic of his temper, and of the quality of his mind. Full of great, and iudeed maguificent images-swelling with his conceptions; forgetting the present in a splendid imaginary future; then suddenly awakening to the present difficulty and distress, express-, ing himself with passionate impatience with respect to all the causes, and in the next moment resolving upon some daring remedy. Such is the manifest character of the mind of Napoleon; and such, as it appears to us, is the style which is employed in the work before us.
The narrative (for such it is) throughout is in the fr-st person. The book is an octavo volume of 150 pages, and the subject is a running commentary upon the principal events, of the military and civil life of Napoleon. Our limits will not admit a leng thened criticism; but we must notice, in pass. ing, one or more of its most striking passages. We begin with the preface, which is bold enough, and short enough.
"II shall write no commentary," says the writer,
(Natsoleon, or some one speaking his name.) "The worit has seen my reign, and I feel no disposition saibinenter a la curzosite publique (to purvey for publie entiosity.) Bay I slatl briefly run orer the main events of wy life, for two reasnos; 1 care nothing for the present times, but let me stand as 1 am be. fore my son and posterity.
"This is my motive for writing; I am compellal to resort to an indirect means of rendering this narrative public. should I send it to the longhish nitistry, it won!! remain forever in the office which it would first reach."
This is the whole of the preface. The work then commelices lifth a narrative of his catly life, his elucatiun, Sce. but which are all dispaiched, each in its tutn with a sentence. Some of these condensed members are very striking; some even deute, aml all are characteristic. We shall sunjoin a few of them.
"I succeeded in every thing, because I resolvad to streceed. My will was strong. I looked at the poin:, and precipitated myself towards it. I carried all difficulties by assault, and as few difficulties are mails of brass, they fell before me. The secret of my success is, that inever hesitated.
"The best part of courage, or rather courage itself, is the will-in a vigorents but decided re. solution. But this will, the facnaty of thus will. ing, is wot a matter of clonice; it is the gift of nature; it is natural firmness." But the French is here so much more expressive than any translation, that we are induced to add it-"Laa Volonte depend, au reste, de la trempe de l'individu; il n'up. porbieut pas a chacun doctre maitre chez hui."
- I derived no advantage from any study but the mathematics. I read, indeed, all, because I would not be ignorant of what was known to those around me. But long and methodical arguments of these writers on morals, law, and history, seemed so much beating about the bush; I saw their object at once; in history I wanted ouly the fact, and in mo. rals 1 saw the reasons in the bouk of the world before me. I very carly accusiomed myself to impress a distinct idea, a picture in full of every subject on my own mind; I then clused my eyes and ears, and examined it, as it were, in the silence and darkness of self reflection. This is the secret of my surong cinceptions, which were, in fact, only clear concep. tions.
"I was first under fire (when a lieutenant) in a small action with the fienevese. My natural coolness and habit of attentively looking at the affair before me, made me at once a soldier and I date \(m y\) inilitary ability from that moment. I saw that both parties merely occupied themselves in firing straight forward at each other; sand that this mode pwomised nothing decisive on either side-both par. ties fighting merely to discharge their duty. I saw a hill ut a short diviance; I saw that commanded their rear, and I conchided that if I fell on them from that post I should decide the battle. I took a small body of men; I made the movement, and gained the victory. I was mate a captain in consequence; but my reason fior mentioning it is, that it taught me the art of gaining a victury; and this art consists in being in earnest; in looking attentively upun the point, whilst all others are empluyed in thie noise and haste of the entrmon detail, athed in nuking sotne decisive movement which fortune may adulit. Irequire of my soldiers only stearliness in front, till fortune shall throw the case which aftords the oppeortutity for my play."
"This was my first notion, ard always has been and is still, what helongs to a gond general. I yow
became attached to my profession of arms; and sought all books within my reach, and applied them to the system in my own mind, and in what is going on around me. 1 thus formed my theury of war, and Europe has seen what it is."

He then proceeds to relate his part in the siege of Toulon; it introduced him to the notice and patronage of Barras. Harras was in power, and Bonaparte needed a patron. Each snited the other, and Bonaparte was made a general. In the affair of Sections he regards himself as having merely done his duty. He was called out to disperse the insurgents amainit the actual government. He obeyed and cleared the streets. The service was regarded to be of great importance, and he was made general of division.

The narrative then proceeds to the several other eras of the life of \(B\)-naparte; his appointment to be general and chief of the army in Egypt, his E;pyptian campaign, \&cc, in all of which it contains most important matter for future listory and reflection.We stroagly recommend the work to serious attertion, and regret that our limits will not admit of a longer account of what so well merits it

0 The work referred to in the preceding has been translated and re-published in the United States, and is for sile by our booksellers. It certainly is characteristic and interesting; but we cannot believe it to be the production of the ex enpe. ror. Mad. de Stael is named as the author of it.

\section*{A Long defenrfo article.}

\section*{Report of the juint comrittee en manaffactures.}

Mr. Elmendorf, from the joint committee of the senate and assembl , to whom was referced that part of his excellency the governor's speech which relates to domestic manufictures, reported as follows, to wit:

That the return of peace having opened to this country an uninterrupted communicatinn withall the uations of Europe, has held forth such inducentents to commercial enterprise as have deluged our cint: ury with foreign fabrics. Though it cannot be expected that such a course of things will long contiune. at the immense loss which mast necessarily be sus. tained by those concerned in the importation of these articles, it is yet to be feared, that while fireat Britain finds her European market circumscribed by the nejghboring pawers, she will still contrive to throw into our inarket such quantities of inamufic. tured goods us will altogether suspend the opera. tions of our cotton and woalen manufactories, if not altogether ruin the manufactarer:

Great Britain established her manufuctures on the plan of exclusion. She prohibited manufictures from abroad, and invited the manufacturer to her shores-she taxed the living to employ her loomp: and to ensure the sale of frer products ordainal that the deal should be shrowted in woulens; and test the inamufacturing art should travel to other countries, she imprivons the weaver and the artisan who inakes an alienpt to withdraw from her dominions.

The congress of the United States, at their last session, ulopted two very masterly reperts, made by their committee of comineree and inamufactures These reports recognised the importance of in 11 m factures, and the policy of protecting them eff \(c\). thally against foreinn in.chinations. "The foreign manificturers and merchants," said the conmittee, "will put in requisition all the powers of in-
genuity, will practice whatever art can devise, :und capital accomplish, to prevent the American from striking root, and flourisling in their rich and native soil.
"The American manufacturers have good reasons for their apprehensions. They have much at stake -they have a large sapital emploned and are feelingly alive for its fate. Tine foreign manuficturers and merchants know this, and will redouble with renovated zeal the stroke to prostrate them. They also know that should the American manufacturing establishments fall, their mouldering piles, the visible ruins of a legislative breadth, will warn all who shall tread in the same footsteps, of the doom and inevitable destiny of thér establishments."

Many of these predictions are in a course of ful. filment, notwithstanding the patriotic intentions of the federal government to prevent it. Some of our manufactories are prostrated, and others tottering to their fall. The duty of 25 per cent. if of sufficient amount, is not of sufficient duration to produce confidence in men of capital; as at the end of two years, it is to be reduced to 20 per cent. It can never be expected that large sums of money will be invested in manufactories, while there is a probability they will not reccive support.

The distress which has overtaken all classes of society since congress adjourned, evinces the injurious effects of unlimited importations. The farmer and manufacturer, the merchant himself, have felt severely the depression of trade, and the depreciation of their pursuit more especially in the eastern and middle states.

When we consider that much capital had been employed in manufactories-that great inconvenience had been experienced through want of sueh establishments at the commencement of the late war-when we consider that we have most valuable focks of merino sheep, and cotton in abendancethat in 1815 there were employed in cotton factories alone, one hundred thousand persons and a capital of furty millions of collars- that of these 100,000 persons, 66,000 were women and children, (who were of no service in agriculture)-when we reflect that manufactures will be the life of agriculture, by furnishing a market at home, and restore the precious metals from abroad, the committee are strong ly induced to believe it to be of the highest inportance to mature and defend those institutions in their infancy, which, in their maturity will requite our beloved country by prosperity and comforts, and perfect independence.

New-York has a deep interest in the protection of domestic manufactures, as the late census affirm. -In 1810 they exceeded thirty three millions of dollars; and in 1813-14, must have been more than fify millions.

This amount of domestic industry we have reason to fear has in a great measure subsided, and can only be revived by affording it full protection, and creating around it a legislative barrier to ward off foreign pressure. This must be done by the general government; and the conmittee believing that the sense of the people of the state of New-York expressed through their representatives to congress, vill receive due attention, respectfully submit the following resolutions:-

Resolved, That our senators in congress be instructed, and the delegates of this state requested, to use their influence, at the present session of the national legislature, to obtain sufficient protection for the infant manufactories of the United States, particularly woolen and cotton, aither by a permanent augmentation of the duties upon certain goods,
or by a prohibitation of such woolen or cotton goods froni forcign countries, as can be supplied by our own manuf.ctures.
Resolved, That the president of the senate, and speaker of the assembly, subscribe the said resolution in belaalf of the legislature, and transmit it to our senators and representatives in congress.
The committee further report, that they have not omitted taking into their consideration what advantages our manufacturing establisliments might be expected to derive fiom liberal loans out of the treasury.
On this point they are constrained to be of opinion, under present circumstances, that no such aid, within the extent of the ability of the state, can afford that permanent support which might render them publicly useful, and profitalle to the owners.
The great influx of imported cotton and woolen goods forced into our markets by sales at auction, rendered practicible and even profitable in consequence of the extensive frauds practised by ship. ping them for this express purpose, accompanied with fraudulent invoices, in which they are prised so far below their original cost, as to evade the effect of the duties upon imporiations. It is in this way, that as well the sale of imported goods as those of our own manufacture, are successfully fore. stalled in the market, and ruin has thereby been brought to the door of the fair importer, as well as manufacturer. To correct so extensive an evil, an appeal will not he made in vain to the patriotism of the country, for the purpose of introducing into domestic use her own cotton and woolen fabrics; and the committee deem it not unbecoming the immediate representatives of the people, in the legislature, to set the example.
It is with the proudest satisfaction we can state, that our ability to manufacture contion and woolen, is to the full extent necessary for domestic use; and that we have so far advanced in the knowledge of the art of manufacturing as to equal, in appearance, those imported, while at the same time they are much more substantial for wear; and, with the exceptions of cottons imported from beyond the cape of Good Hope, it is confidently believed, that our own manufactures, especially the woolens, can be afforded for sale in the market for the same prices at which they can be fairly imported.-Therefore the committee recommend the adoption of the following resolutiou:

Resolred, That it be earnestly recommended to the members of the legislature, and all officers of government of this state, and the members of the senate and house of representatives of this state in congress, to clothe themselves, when acting in their public capacities, in the manufactured goods of our own country; and to take all practicuble means to cause them to be extensively introduced into general and domestic use, in preference to those of foreign importation.
The committee also deem it highly expedient in furtherance of their views above expressed, that the buildings and machinery of all cotton and woolen factories should be exempted from taxation; and that all manufacturers, actually employed in manufacturing should be exempted from all militia duty, from working ou the public highways, and from serving as jurors in all suits to the value of tewnty five dollars or under; and therefore ask for leave to report a bill prepared for that purpose.

There was a great fire at Sag-Harbour on Monday the 26 th ult. Houses and other property to an estimated value of 200,000 dollars, were destroyed

We have a report that the patriot gen. Wing has sailed from Galvestown and was before Tempico, which be intended to atlack, being well furnished with artillery, \&c. for the purpose. This place is in the vicinity of Vera Cruz.
west ivdies.
From the 6 th to the 17 th of March last, nine humblied and swenty slazoo urrived at liavana froin the cuast of Africu-and on the 15 th of that monta lhere sailed from that port 5 brigs and 5 schouners for the same coast and un the same business! south america.
The provisional govermanent of l'ernambuco wilt soun have a considerable squadron to protect the trade of the place. One brig of 22 guns was already fitted out.

A Spanish schoonser from Jarnaica for Cuba, valus ed at \(\$ 1,500,000\) has been captured by a patriot privatcer, supposed to be the late Mamanoth of Baltimore.

We have the details of the affair between the patriut gen. P'iar, who commands in lharinas (Venezuela) and the royalist Morillo, on the 18 th of February. The mjal force consisted of 1000 infanfry and 800 cavalry. The cavalry of the forme:
corapletely routed the cavalry of the latier and ennpelted his infintry to retreat to the mumy. tuns of apuse. The to a \({ }^{\prime}\) loss i: men and horses, mol arms and ammunition was considerable.
Piar also completely ronted and defeated a bod of royalisis near Guayana, consisting of 400 men; of whom he says hardly \(5^{\prime \prime}\) t scaped. He alro captures 600 horses, and a large qualtity of stores.
The Buenos Ayrean com. Taylor has officially notified Petion of his intention to detain all Hay. tian vessels, in consequence of his seizure of several Buenos Ayrean prizes. We have a copy of his Letter to Petion on this subject-telling him thwould wait lis answer untit the 28 th of April; and in the mean time detain all Haytian vessels tie met with; which, however, he would give up on receiving a satisfactory answer.
Com. Taylor has also addressed a letter to the insur.ance offices of the city of New. York, giving an account of his overhauling a Itaytian ship whose bill of lading exhibited a large cargn, though she had liardly: any thing on boari. A fraud on the in surance officers wis evidently designed-and the eninmodore deserves the thanks of all honest men for tletecting the conspiracy. The vessel was sent back, not being fit for sea; but certo in Spaniards that were on board of her were made prisoners of war,

\section*{CHRONICLE.}
the presidenf of the unifed states
Alrivel in Baltimore, on Sunday last, :it about 2 octock, escorted by the Hirst Baltimore Hussars, and! a large concourse of citizens-and after dinner attendad Divine service at the first Presbyterian church. Farly on Monday morning, accompanied by generals Smith, Stricker, Winder, Swift, \&c. he visited the batule ground, where Ross was killed, \&cc. Sept. 12, 1813; at 11 o'clock lie proceeded to examine fort Mc \(H\) Mary where he received the customary honoess; after which he reviewed the 3rd or Baltimore brigade, which acted so conspicuuns a part during the wiur. In the aftiernoon he visited the Waslington and Battle monuments e recting in this city-and towards evening was visit ed by the officers of the brigade, and many citizenis, and received the address of the corporation, \&c He left here early the next morning in the stea:n boat for Philadelphia.
The pressure of the people that continually surrounded him though grateful to his feelings, inconvenienced him not a little, and has a tendell. cy matcrially to defeat the objects of his journey; yet we cannot find fant with the people for desiring to see and pay their respects to thcir chief magistrate.

Mr. Monroe travels as privately as he can, excopt the were to pass on incognito-lhis dress and manners have more the appearance of those supposed to belong to a plain and sulbstantial, but well infirmed farmer, than such as, fiom our perverted notions, are attached by many to a personage so distinguished. When shall we fully believe that kings and princes, as well as presidents, are mere men?

\section*{AHIMEESS. \\ Baltimore, June 2, 1817.}
to tie fresinint of the unithid states.
Sir-We, the mayor and city council of Baltimove, embrace with great pleasure this opportunity of personally congratulating the chief magistrate of the unin, on fis arrival in this place.
lour determination, is the commencement of your administration, to visit several of the most im-
purane places in the union, is auspicious of hap.py consequen:ces-Not satisfich with previous knowledge, or secombland information, you are anxious that, on your part, nothing shall be wanting to promote the coinmon weal.
That a city which bure so consplicuons a part in the national de fence, sloutd first be honored with the presence of the clief magistrate, is flattering as if is natur:d; and we sincerely hope, that your rb-ervation of our position and means of defence any enable us, before another war, to bid deliance to any enciny.
Whew, sir', we review your lone tried, faithful and able seivices: when we consider the increasiog harmony and concord of the Luited States; when almust universal peace reigns among the nations, we augur great and lasting happiness to the Linited States, i:1 giving full scope to the developemert of ber faculties in the arts and sciences, in agrictulture, manufactures and commerce : ald in the permanent exlibition of the advantages of a form of civil and political governments, sulperior to any that has hitherto existed.
To our fellow citizens it is a most interesting spectacle, to see the chief magistrate of this great and powerful nation, making an official tour through their country in the style of a private citizen, guarded only by the respect paid to the high station he occupies, and the affiectioms of a virtuous people

We, sir, wish you, in the sincerity of our hearts, a pleasant tour throngh the states, a happy return to Washington, a reputation and satisfaction in your presidency equal to any of your predecessors-and finally the reward of a well spent life in an eternal wortid.

We are, sir, with sentiments of very great respect, your most obedient servants,

GEO. STLIES, mayor of the city of Beltimore.

\section*{Answer of the President.}
to tue majou anj city council of baltimore.
Pellow Citizens-The sentiments which you have conmunicated, have afforded me very great satisfaction. They are just, as to the objects adverted to, and to me they are generous and kind.
1. Was impossible for me to approach Baltimore, without recollecting, with deep interest, the gallumt conduct of her citizens, in lie late war, and the happy result attending their exertions. The glorious victory which was achieved here, and in which her citizens bore so distinguislied a part, at a very important epoch, not only protected this patriotic city, but shed great lustre on the Americun mane.

Experience has shewn our dangers, and addmonished us as to the means of averting them. Congress has appropriated large sums of money for the fortification of our coast, and inland frontier, and for the cotablishment of naval dock yards, and building a navy-It is proper, that these works should be execu ed with judgment, fidelity and economy-much depends, in the execution, on the executive, to whom exte:sive power is given, as to the general arrangement; and to whom the superintenda: exe exclusively beiongs. You do me justice in believin5, that it is to enable me to discharge these duties, with the hest advantage to my comiry, that l have untaken this tour.
From the increased harmony of public opinion, fuinded on the successfiul career of a government, which has never been equailled, and which pronises by a further devolopement of its ficulties, to augment, in an eminent degree, the blessings of this favored people, 1 unite with you, in all the anticipations which you have so justly suggested.

In performing services, honestly and zealously intenderd for the benefit of my fellow citizens, I shall never entertain a doubt of their generous and firm support. Incapable of any feelings distinct from those of a citizen, I cat assume no style, in regard to them, different from that cl:aracter: and it is a source of peculiar delight to me, to know, that while the chief magistrate of the United States acts fully up to this principle, he will require no other grard than what may be derived from their coufidence and affection.

\section*{JAMES MONROE.}

\section*{Baltimore, June 2, 1917.}

After this in erchange of sentments and feelings, the mayor, in his own and in the behalf of the corpuration, cordially invited the president to a public dimner: which he declined on the ground, that it would not be consistent with his previous arrangements for him to accept this public mani festation of their regard. The president, in the most feeling manner, expressed the lively sense he entertained of the cinility and attention of his fel. low citizens, but was compelled, fom motives of public concern, to forego the acceptance of thei: invitation.

Bulgade Orders. Tyird Brigule .IT. . Tr. June Sal. 1817. The arrival of his excellency the president of the United States in this city on Sunday, called for an exprecsion of the respect entertained by its citizens for the chief magistrate of the combtry.

The bristdier general was not disappointed at the alacrity and promptitude with which that call was obeyed by the regiment of artillery, the 5 th, 6 th, \(27 \mathrm{th}_{1}\) and 39 th reginents of infantry, the curps of riflemen, the First Baltimore Hussars, and caphin Hanna's company of dragoons. A cheerful and a willing obedience to orders is a characteristic of the third brigade, which the general has of ien had oceasion to notice and appland-their appearance and number (considering but a few hours no ice could be givent did honor to the occasion which required their services.

By ouder of gencual Siferfit.
GEO. WINCHESTEIR, Brigade MIIjor.

Spunth vice consul at diezu-Orleuns. We noliced the renconlye between this malland a Mexican officer at Xev. Ortans, some time ago. In consequence he has issued the following notice, dated "spanish consulate, New.Orleans, May 1"-" Iow Diego 14 mp 'H, vice constl of 1 is Catholic majesty for the strite of Wousiana, notifics the public, llat being fully convinced that in this city that protec. tion is not granted to him zolich is due to him, not only in his yuality of a public officer acknowledged by the president of the United States, but also as in indimitiont, the sees himself with regtet under the necemily of ceizang his consular functions, until antiace is donc him and he shall have received oiders From his governument"

The Boaton Clwantie and Pariof are merged into one paper, to be published daily by M1: 1). C. Ballard, cditor of the latter, under the title of the "Indepeident Chromicle and Boston l'atriot." The enlarged field thus given to exercise tho talenis and indusiry of Mr. Hallard, will, no duubt, be improred to its utmost extent.

Steam buats. A steam boat called the Constith. tion (tate the Oiver Eivans) burst her hoiler nearly opposite St. Fraticisvitle, on the Missiatippt, by which every personin the cabin, 11 in number, ai breakfust, were scalded to dzath.

Such dreadful aecidents may go so far to reduce the confidence of the people in these inviluable boats (under proper manngement) as to destroy a great part of their usefulness. Those who are conversant with the subject assert that such accitents alway's come out of carelessness. How sober and discreet ought they to be who have clarge of inachinery capable of accomplishing such terrible mischief in a inoment!
S'pecie--We still have many arrivals with specie fiom Europe and the West Indies-but the banks yet keep it scarce.
- Massuchusetts election, for governor, official re. turns.-For gov. Brooks 45,106; for gen. Dearborn 38,:130; scattering 206.
Hessian if.r. It appears, by many certificates of respectable gentlemen in Virginia, that for severd years past they have cultivated a species of wheat, called by thern the "Lawler wheat," that effectually resists the attack of the Hessian fly-this wheat was originally brought from Chester county, Pen. Where it bore the name of Jones' white wheat. 'This is really an important matter, and the fact appears to be undoubtedly established. The gentlemen who certify its th-proof qualities, from their own experience, reside in the neighborhouds of New Balti. more and Buckland, Va.

Cotton. We Fiear of frequent frauds in the package of cotton, in the south. The legislatures of the cotton growing states ought to protect the character of their great staple.

Banks. The banks of Kentucky have resumed specie payments. The governor of Inclianahas recagnized the bank of Vincemnes as the state bank. - bink to be called the bank of Illinois, is to be established at Shawanoe-town-capital 300,000 .

Baturia, May 4.-One of the most singular circuinstances, recorded in the his:ory of accidents, occurred in the town of Middlebury, in this county', on the 10 th inst. and exlibits, in the hero of mis. fortume, a mind excelling in the cool, deliberate, and determined virtues. The subject is as follows: Artemas Shattuck, on that day, in a plece of chopping that he was clearing, foll a tree acrosa a stump, in which situation it remained nearly balanced, the top, however, bunyed up the but. while thus suspended, he under tock to cut the tree in two near the stump upon which it was lodged, and while standing upon it for that purpose he cut so much more upon the upper than the uader part of the tree that the weight of the butt causet it to split, and at the instant of the greatest vibration or separation of the severed parts, his foot slipt into the cavity of the opening timber, anll remained as firmly fixed as in a vice:-he fell inmediately backwards, in which fall he lost his axe, but soon recovered a position that enabled him to bold upon the tree by one hand, with the other he drew out his pocket.knife and cut a limb with a hook aitached to it with the intention of draving up) the ase and cutting the tree to liberate his fout, hut soon found his efforts feuitieis. He nert ti.ied w break his leg , as that would have enabled him to turn his body in a position to sit upon the tree and wait the lingering hour of assistance; but his posi. tion prevented even the gratifcation of this hasti relici. Finding his strength fiiling fast, and no prowpect of timely relief, (as no haminn assiatance was withing three quarters of a mile) be adopted the only alterative that remainct of soving himself from the ind and hurrible death of expuriog While swopded in the tir, "ith hie head duwh and his feet up.-With his penknife he deliberately screred has font from lis lof at the ancle foint, attid
en his hands and knees ben* his courss for home In this posture he crawiled a fill half mile before his calls for assistance were heard,? and twice had to deviate sever.al rods from a direct line to a rivulet to quench bis raging thirst. - We are happy to state dhat he is like to do well.
Somersed note-lientlemen at a dintance have sup posed that they accommudatel the edhor of thi Weexer Register by furwioding the bills of the Sumerset bank, in this state, in payment of their dues. Ohe perion, in lis zeal to serve us, grave 3 per cent. pren, ium iil the notes of a bu:k of lis vici uity, that would have been, at least, fifieen per cent. betler here than those of Somerset, which now Lave little, if any, circulation amongst us, and 1 d'o not know that they can be disposed of at twenty five per sent. discount. It follow's, that we cannot coisider them as money.

Richmond inspections, for six months, ending April \(30-102.924\) barrels superfine flour; 340 lialf do do; \(12,035 \mathrm{bhls}\). fine, do; 1,796 do. \(\mathbf{X}\) iniddlin!es; 213 do. do; 245 do. s. stuff; 256 do. condemined-total 17,809.
Mubile promises soon to become a place of much * ade. The imports, coastwise, were valued at a million of dollars for the last year- 1700 bales \(0^{*}\) cotton were shipped there in the lasi six months, and a like quantity remained to be snipped.

Nlammoth vegetubles, Eic. Letter's are published froin an officer of the U. S. army staioncd at Fort Osinge, which seriously state that they have raised oabbuges there which were sixteen feet in circumference; a beet that was 2 feet \(4 \frac{1}{2}\) inches in circumference, and two feet \(4 \frac{1}{2}\) inches in length, weighing 1S jlb.-a pumpkin, \(14 \frac{1}{2}\) feet in circumference, and weighing 172 lb . with 4 others on the same vine that weighed more than 100 pounds each; and a turuip that weighed 17 lb .

The same letters amounce the discovery of a large number of bones, not far from the bank of the Quicaurrie river, 150 or 160 miles from its conflu ence with Missouri, and about 925 from Fort Osage, which are supposed to have belonged to the mammoth. The shoulder blade is described as being 4 feet long and 3 broad.

The legislature of Connecticut has closed a more lively and spirited session than any had in that state for several years. But the council generally opposed itielf to the reformations proposed and carried in the house of representatives. "Every bill, (says the Hartford limes,) which passed the house, intended either to remove popular compiaints or redress public grievances, was neglected by the coun cil.". The majority of the house of representatives Liave published an address "to the friends of toleration and equal rights," which shall appear in our siext.

The two men sentenced to be luang for negro atealing in North Carolina, lave bad their pu:isto ment commuted to an imprisonment in a dungeon for 12 months.

A girl at Brookville, Indiana, only 17 years old, is said to weigh 335 ibs .

Noah Webster jun. has sold the copy-right of hi, apelling book for 40,000 doll:urs, to Messis. G. Godwin and sons, of Hartford, Con.

The yellow fever is dreallfully raging ar Havanna. Vessels from that port arrivikg at Savannah, are to be examined by the health officer, \&c. A vessel has arrived at the Pliladelphia lazaretto from Guadaloupe, which lost four of her crew on the pas. sage.

The shi; Merenry arrived in the Chesipeake, last wee's, in eight lats from the Balize.

Ingeninus inzer:cion. - A young geatleman of this c:ty, ahout ten days ago, showed the editor the draiving of an apparatil., in be att.ched to a gas lamp, whic! being once lighted, suppries itself with the gas, at oace generating and comstrmiag it; to mntier what the substance, cosl or resin, \&cc. Of its sucess we have no doubt. We understand he is now coinstruc ing one.
- I: Y. Col.

\section*{Marshal Massena.}

This distinguished officer 'ras recently diell at \(\mathrm{r}^{\prime}\) ris. The following account of him is from the Moniteur of the 6 th April.
"Andrew Massen:i, priuce of Essling, duke of Rivoli, grand cross of the royal order of the legion of honor, commander of the royal and military order of St. Lotis, \&ce. Ke. was bom at Nice, on the sth of May, 1758 , and died in the hotel at Paris, in the street de Bourbon, on the morning of the 4th of April, after a long and excruciating illness.
"After having at an carly period of life served three years at sea, he entered in'o the army of France during the year of 1775 , when he joined the royal Italian regiment, in which his uncle was captain.
"He successively became commander of the se. cond battalion of the Var, colonel of the ci-devant regiment of la Sarre, and a general of brigade and of division in 1798. The ensuing year he commanded a body of 20,000 men, clarged with the expedition of Oncllo, and the taking of Saorgio; he afterwards almos! uniformly commanded the advanced guard of the army of Yaly, took the principal part in its movements, and acquired the epithet of the cherished child of victory!
"Hostilities recommencing in 1799, he, as commander of the army of the Danube, made that memorable campaign which the battle of Zurich rendered at once so decisive and glorious; of which 70,000 prisoners were the trophies, and where he contended with those two great generals prince Charles and marshal Suwaroff. He immediately afterwards took upou himself to conduct the wreck of the army of lialy, and acquired new reputation by the defence of Genoa, where his heroic bravery a second time conquered Italy.
"After having sat in the legislative assembly as deputy for the department of the Seine, he commanded the new army of Italy, in the campaign of 1805, and penetrated with it iuto Germany. Ile was afier this entrusted with the conquest of the kingdom of Naples, whence he was called into Poland, and returned to, France on the peace of Tilsit.
"In 1809, war again summoned him to the plains of Germany, where, after several honorable actions, he received, upon the firld of Essling, the tille of prince, having there sustained the shock of the enemy's right, and thus saved the Frencls army by his manonvres and his judument. He afierwards bore a brilliant part in the battle of Wayram, during which, althougi sick and wounded, he was seen at the bead of his troops, whom he animated by his example.
"His military career ended with the command of the army of Portugal, in 1810 and 1811 , and where he again displayed the firmaess of lis character, in the midst of thuse difficulties which he surmounted. He has left a widow, two sons, and a daughter, who is married to the lieut. general the counb Reille, his eleve, and aid-de-camp since 1793."

\section*{Revolutionary Pamphlet.}

\section*{Quincy, May 25, 1817.}

Sin-Thanks for your favour of the 1 Sth , and the return of the pamphlet with a copy.

You revive me, when you assure me, that "the original principles of the revolution are \({ }^{6}\) coming ayain into fashion; and that foreign \({ }^{2}\) feelings are giving way to a national charac\& ter."
As you are "zealous to help on the latter," I should be happy, if I couldi, to help you.

As doubts and questions are easily started upon almost every political subject, many be raised concerning "the principles of the revolution," as well us concerning "a national character."

The enclosed pamphlet may shew the sense in which some people understood those principies.

The story of it is this. A series of political essays were published by me, in the Boston Giazette, in the latter part of December, 1774 and the begiming of .775 , over the signature of Novanglus. Thuse news-papers went of course to Fingland, as all American papers at that time did, and fell into the hands of A mond, the bookseller, who printed them in a volume of "prior documents," as a supplement to his Remembrancer, for the year \(17 \% 5\). From that copy they were reprinted by Stockdale, who had been an apprentice of Almond, in 1784, in the form of the paimphlet enclosed.

Whether it is consistent with your plan to make any use of it or not, I know not, but you may do what you will with it, as well as with this letter, provided you return the pamphlet to ine; a favour which I am obliged to ask, because I have no other copy, and because I know of no other copy, but one, in America, and that is in Connecticut.

1 am, sir, your obliged servant,

> JOLIN ADAMS.

Mr. viles.
The pamphilet alluded to is entitled "Histoay of the inspute with America; from its DTGLS is 1754. Whites is the amarifit. 13 John Amas, esq."

It is not easy, by extracting a passage here and there, to do justice to this patriotic work. and it is too long for entire insertion, mahing abuat 90 pacges. But the following may partially effect our purpose. There is a frecdum of remark and buldneas of expression that cannot fail to claim the admiration of every one
that throws his mind back to their period, and considers the power to which they were opposed.

The character of Bernard and the tory junto at Boston, is thus drawn:
"Bruxard was the man for the purpose of the Junto-educated in the highest priiciples of monarchy, skilled enough in law and policy to do miscliief, avuricious, and needy at the same time, having a numerous fumily to provide for-he was an instrument suitable in every respect excepting one, For this Junto to employ. The exception 1 mean was blunt frankness, very opposite to that cautious cunning, that deep dissimulation, to which they had by long practice disciplined themselves. Howerer, tiey did nut despair of teacling him this necessary ariful quality by degress; and the event shewed they were not wholly unsuccessful in their endeavors to do it."
Among other designs of the ministry these are mentioned, and supported by proofs from gov. Bernard's letters-
"They intended furiher to new model the whole continent of North America; make all entire new division of it into distinct, though nore extensive and less numerous colonies; to sweep away all the charters upon the continent, with the destrojing besom of an act of parliament, and reduce all the govermments to the plan of the royal governments, with a nobility in each colony, not heredtary indeed, at first, but for life."

After noticing the letters of gov. B. the writer says-
"Now let me ask you-if the parliament of Great Britain lad all the natural foundations of authority, wisslom, goolness, justice, power, in as great perfection as they ever existed in any body of men since Adam's fill: And, if the E.glish nation was the most virtuous, pure, and fiee that ever was, would not such an unlimited subjectuon of tbree millions of people to that parliament, at three thousand miles dis ance, be real slavery? There are but two sorts of men in the world, freemen and slaves -The very dificition of a freeman, is one who is bound by no law to which he has not consented. Anericains would have no way of giving or with. holding their consent to the ac s of this partiumeot: therefore they would not be frecmen. But, when luxury, effenimary und venality are arrised at such a shocking pitelin England; when both electors and eiected are become one mass of corruptions, when H.e nation is oppressed to death with debis and taxes, owing to their own extruvagance, Rud want of wisdom, what would be jour cousitition under such an absolute sulhjection tup prlument? Siu would int only be slaves -but the most, abject surs of slaves © the worst surt of "nas crs!".
fixhorting his fellow citizens, Mr. A. o) -serves-
*H lle groud aphorism of the policy of the whigs ian beent to unite the peo:' e of Ineric, and divides whe of Girest Briain. Tae reverse of this has been ,.e muxion of thelaries, riz of unive the people o?

Great Dritain, and divide those of America. All the credit, in the account of public burdens and exmovennents, marches and counter-marches of botli pences, so much paid in taxes, as we are obliged to parties, on both sides of the Atlantic, may be re- sell our commodities to her cheaper than we could duced to one or the other of these rules. Thave gret for them at foreign markeis. This difference sliewn that the people of America are united more is really a tax upon us for the good of the empire. perfently than the must sanguine whig could sver have hoped, or than the most timid tory could have toured. Let us now examine whether the people of G:eat Britain are equally united against us. For, if the contending countries were equally united, the prospect of success in the quarrel would depend upen the comparative wisdom, firmness, strength, and other advantages of each other. And, if such a couparison was made, it would not appear to a demonstration that Great Britain could so easily subrue and conquer. It is not so easy a thing for the most powerful state to conquer a country a thousand leagues off. How many years time, liow many millions of money did it take, with five and thiriy thousand men, to conquer the poor provinces of Cimmeda? Ind after all the battles and victories, it never would have submitted without a capitula. tion, which secured to them their religion and properties."

\section*{A突ath-}
"in a hand war, this continent can defend itself ag:tinst all the world. We have men enough; and those men have as good natural umderstanding, and as much inatural courage as any other men. If they were wholly ignorant now, they might learn the art of war. But at sea, we are defenceless. A navy might burn our sea-port towns. What then? Tiree hundred and fify thousand land-holders will not give up their rights, and the constitution by which they hold them, to save fifty thousand inhabitants of maritime towns. Will the minister be nearer his market, after he has burnt a beautiful town, and murdered thirty thousand innocent people? So far froir it, that one such event would occasion the loss of all the colontes to Great Britain for ever. It is not su clear that our tracle, fishery and navigation could be taken from us. Some persons, who understand this subject, are of a different opinion. They think that our trade would be increased.

\section*{Further-}

Obsta prencifiis-Nip the shoots of arbitrary power in the bud, is the only maxin which can ever preserve the liberties of any people. When the people give way, their decenvers, betrayers, and destroyers, press upon them so fast, that there is no resisting afierwards. The nature of the encroachinent upon the Ainerican constitution is such, as to grow more and more encroaching. Like a cancer, it eats fuster and faster every hour. The revenue creates pensioners, and the pelisioners urge for more revenue. Tine people grow less steady, spirited and virtucus, and the seckers more numerous and more corrupt, and every day increases the circles of their dependans and expectants, until virtue, integrity, public spirit, simplicity, frugality, become the objeets of ridicule and scolw; and vanity, luxury, foppery, selfislness, meanness, and downright venality, swallow up the whole society."
"J There is not in human nature a more wonderful phenomenon, nor in the whole theory of it, a more intricate, speculation, than the shiftings, turnings, windings and evasions of a guilty conscience."

Justifying the refusal of the Americans to pay taxes, there are the following remarks-
\(\therefore\) We have much more to sty still. Gireat Britain has confined all our trade to lierse.f. We are willing she should, as far as it can be for the good of the empire. But we say that we ought to be allowed as

We are obliged to take from Great Britain, comnodities that we could purchase cheaper elsewhere. This difference is a tax upon us, for the good of the empire. We submit to this cheerfully, but insist that we ought to lave credit for it, in the account of the expences of the empire, because it is really a tax upon us.-Another thing. I will venture a bold assertion: The three miliion Americans, by the tax aforesaid, upon what they are obliged to export to Great Britain only, what they are obliged to import from Great Britain only, and the quantities of British manufactures, which in these climates they are obliged to consume, more than the like number of people in any part of the three kingdoms, ultimately pay more of the taxes and duties that are apparently paid in Great Britain, than any three million subjects in the three kingdoms-All this may be computed, and reduced to stubborn figures by the minister, if he pleases. We cannot do it. We have not the accounts, records, \&c.Now let this account be fairly stated, and I will engage for America, upon any penalty, that she will pay the overplus, if any, in her own constitu. tional way, provided it is to be applied for national purposes, as paying off the national debt, maintaining the fleet, \&c. not to the support of a standing army in time of peace, placemen and pensioners, \&c."
On the political principles of the people, he says-
"It is true, that the people of this country in general, and of this province in special, have an hereditary apprehension of, and arersion to lordslips temporal and spiritual. Their ancestors fled to this wilderness to avoid them; they suffered sufficiently under them in England; and there are few of the persent generation who have not been warned of the danger of them, by their fathers or grandfathers, and enjoined to oppose them.
"It is curious to observe the conduct of the tories towards the clergy. If a clergyman preaches against the principles of the revolution, and tells the people, that upon pain of damnation they must submit to an established government, of whatever character; the tories cry him up as an excellent man, and a wonderful preacher; invite him to their tables, procure him missions from the society, and chaplainships to the navy, and flatter him with the hopes of lawn sleeves. But, if a clergyman preaches Christianity, and tells the magistrates, that diey were not distinguished from their brethren for their private emolument, but for the good of the people; that the people are bound in conscience to obey a good government, but are not bound to sub. mit to one that aims at destroying all the ends of government-oh sedition! treason!

The clergy in all ages and countries, and in this in particular, are disposed enough to be on the side of government, as long as it is tolerable : If they lave not been generally in the late administrations on that side, it is a demorstration that the late administration has been universally odious."
"Nero murdered Seneca, that he might pull up virtue by the roots; and the same maxim governs the scribblers and speechifyers on the side of the minister. It is sufficient to discover, that any man has abilities and integrity, a love of virtue and liberty; lie must be run down at all events. Witiress Pitt, Franklin, and too many others."

The following is full of the spirit of the times:
"But what a pity it was, that these worthy gentlemen could not be allowed, from the dearest af. fection to their native country, to which they had cvery possible attachment, to go on in profound confilential secrecy, procuring troops to cut our throats, acts of parliament to drain sur purses, destroy our charters and assemblies, getting estates and dignities for thenselves and their own f.milies, and all the while most devoutly professing to be friends to our charter, enemies to parliamentary taxation, and to all pensions, without being cetect ed! How happy! If they could have annililisted all our charters, and yet have been beloved, nay deified by the people, as friends and ailvocates for their charters. What masterly politicians! To have made themselves nobles for life, and yet have been thought very sorry that the two houses were deprived of the privilege of chusing the commeil. How sagacious, to get large pensions for themselves, and yet be thought to mourn, that pensions and venality were introduced into the coumtry!How swieet and pleasant! To have been the most popular men in the community, for being staunch and zealous dissenters, true.blue Calvinists, and able advocates for public virtue and popular go. verannent, after they had introduced an A meric:un episcopate, universal co ruption among the leading men, and deprived the people of all share in their supreme legislative council! I mention an episcopate; fur although I do not know that governors Hutchinson and Oliver ever directly solicited for bishops, yet they must have seen, that these would have been one effect very soon, of establishing the unlimited authority of parliament."
The character of Ifutchinson is thus drawn:
"This genteman was open to flattery in so remarkable a degree, that any man who would flatter hun was sure of his friendship, and every one who would not was sure of his cnmily. He was credulous in 2 ridiculous degree, of every thing that favored his own plans; and equally incredulons of every thing which made against them. His natural abilities, which have been greatly exaggerited by persons whom he liad advanced to power, were far from being of the first rate. It is industry was prodigious. His knowled ge lay chicfly in the laws, and politics, and latory of this province, in which lie had a long experience. Yet with all his udvantages, he never
was master of the true cliaracter of his native was master of the true claracter of his native country, not even of New-England and the Mas suchusetts bay.-Through the whole troublesome period since the hast war, he manifestly mistonk the temper, priticiptes, and opinions of this people. He had resolved upon a system; and never could of would see the imprac. icability of it."

Speaking of the salaries paid to certain offirers of the crown, Mr. A. says-
"Low as the wages were, it was found that when. ever a vacancy happened, the place was solicited With much more anxiety and heat than the king. dom of Learen."
The business of the tea at Boston is mentioncal as follows-
"Shoston is the only place upon the continent, perhaps in the world, which ever breedt a specee. of Misantliropos, who will persist in their sciemes for their private intcrest, with such obstimacy, in oppotilion to the public, good; disoblige at their tellow.eitizens for a little puif; and make them.
selves odious and infumous, when they might be respected and esteemed. It must be said, however, in vindication of the town, that this breed is spawned cliefly by the Junto - the consignees would not resign; the custom-house refuseld clearances: governor Hutchinson refused passes by the castle. The question then was, with many, wheclier the governor, officers and consignecs should be compelled to send the ships hence? An army and navy was at hand, and bloodshed was apprehended. At last, when the continent as well as the town and province, were waiting the issul of this deliieration with the utmost anxiety; a number of persows, in the night, put then out of suspense, by an oblation to Neptume."
"If Boston could have been treated like other places-like New- York and Philadelphia, the tea might have gone home from thence as it did from those cities. That inveterate, desperate junto, to Whom we owe :lll nur calamities, were determined to hurt us in this, as in all other coles, as nuch as they could. It is to bo hoped they will one day repent, and be forgiven; but it is very hard to furgive nith.. out repentance. When the news of this evelt arrived in England, it excited such passions i.1 the minister as nothing could restrain; his resentment was kindled into revenge, rage and madness; his veracity was piqfied, as his master-piece of prlicy proved but a bubble: The bantling was the f wit ir a favorite amour, and no wonder that his natural affection was touched, when he saw it dippatclied before his eyes.-His grief andl ingenuity, if he hat any, were aifected at the thought that he had mis. led the East-ludia company, so mucti nearer to destruction, and that he had rendered the breach between the kingdoin and the colonies :alinost irreconcileable; his shame was excited because opposition liad gained a triumpla over him, and the three kingdoms were laughing at hime firr his obstinacy and his blunders: Instead of reli ving the company, he laad hastened its ruin: Instcad of establishing the alsolute and unlimited sovercignty of parliament over the colonies, he had excited a more decisive denial of it, and resistance to it .-All election drew night, and he dreaded the resentment even of the cormpted electors."
The necessity of union is thus pointed out-
"If we recollect how many states have lost their liberties, merely foom want of commmication with euch other, and union anong themselves, we shall Uhink that the committees of cosrexp nidence may be intended by Providence to accomplish great events. What the eloquence and talents of benos:thenes could not effect, among the states of bircece, might have been effected by so simple a device. Cis'ile, Arragon, Valencia, is jorca, \&e all complained of oppression muder Chailes the fit h; flew out into trinsports of ratre, and took arms argainst him-13.ut they never consulted or commanicated will e \(\boldsymbol{D}_{1}\) other. They resivted separat-ly nald were sepmaratily subdued. Itad donl Juan Pa, hilli, or his vife, hen possessed of the genins to invent a committice of enrrespondence, perlaps the literties of the Spanisti nation might h.ve ie.nained to this hour."

These are the most inaterial things that bear uron the subjects that induced Mr. Amams to hunor the editor with the lonn of lise pampliet - It is chichs what its title purports tols, a "history of the dispute;" and to the listorian, wishin th dive into the minute matters of the revolution, is of great valuc.

\section*{Ross'arms and Parker's montment.}

A gentleman of the first distinction has furnished the editor of the Registen, with an authentic copy and description of the coat of arms granted to the family of gen. Russ, and shewing the "honorable augmentations" made thereto by the approbation of the prinee regent; and of the inscription on the monument lately erected to the memory of sir \(\mathrm{P}_{\mathrm{k}}-\) thr Panker, at Westminster Abbey. They may be relied on as authentic-the former being copied at the Herald's office from the original designation and record, and the other taken on the spot by the land of an honnrable American, who forwarded liem to his friends in the United States as curiosities.

On communicating these-the gentleman, with regard to sir Peter's monument, observes "as your "Reginteh is as likely to be referred to by posterity "for the character and conduct of the principal ac"tors in the late contest between our country and "England an the tomb-stones of Westminster-Abbey, I "leave it to your judgment to determine if it would "be doing more than common justice to ourselves "to give it a place in your work, accompanied with "such facts as belong to the case," \&c. The like remarks apply equally to the "honorable augmentations" th the arms of the family of general Ross, and we enter fully into the feelings of the gallant officer who sent us the copies of them-considering it as a "dastardly disposition" thus to attempt bolster up the fame of the deceased by the degradation of our country.

We war not wrth the dead-whatever we might have thought of Ress and Parker, living, they have paid the great debt that they owed to nature and to the United States, and let them rest in peace. Nor can they be afferted by any thing to be said of them now; but their officious friends are not entitled to such forbearance. The "star spangled bannen" shall not be so easily disposed of by the Guelphs; nor shall falsehood wrest from a brave yeomanry their well-earned reward-if we can help it.

\section*{COATS OF ARMS OF THE FAMILY OF GEN. ROSS.}
[The second cut represents the original coat of arnis of the family of Ross; the first shews the auginentations, accompanied by an heraldic account of the same.]

description of the armg.
Per fess embut led argent and or, in chief issuant a dexter arm embowed vested gules, cuff azure, encircled by a wreath of laurel, the hand grasping a flag-staff broken in bend sinister, therefrom flowing the colors of the Uniten States of Ayerica proper, in base the arms of Ross, of Ross Trevor, oll a canton of the third pendent from a ribbo:1, a representation of the cross presented by command of his majesty to the late major-general in testimony of this royal approbation of his services, with the motto Bradensberge, and for a crest of honorable augmentation in addition to the crest of the family of Ross of Ross Trevor, the following, that is to say, on a wreath of the colors out of a maral crown or, a dexter arm grasping the colors as in the arms.

0 Can it be possible that the British are soignorant of the facts as to believe that gen. Ross was killed at Washingtox, and on the fourth of Auguse 1814?-No-170-it is impossible; but, by coupling his name with "Washington," they hoped to gratify a pride as mean in its practice as it is false in its principle. The affair at Bladensourg took place on the 24th of that month, and every body knows that the general was killed near Baltimone, on the tzuelfih day of September, 1814. But this "would not tell well in history"-and the glories of Washington were to be made a channel for those of the wanton destroyer of "costly monuments of taste and of the arts," "depositories of the public archives, not only precious to the nation as memorials of its origin and its early transactions, but interesting to all nations, as contributions to the general stock of historical instruction and political sciencef."
That general Ross was a brave man, no person will be disposed to deny; and that he was a "dashing" officer must be admitted fiom the character of his attack at Bladensburgh-and here his merits, if these things are merits, appear to have an end, for his after-conduct was barbarous; belonging to ages long past, and without a parallel in the history of modern wars. Most of the capital cities of Europe have latterly been captured and recaptured, and among the whole we have not one solitary case to compare with the proceedings of gen. Ross at Washington city. But it may be said he has at ders to "destroy all places assailable"-this is no excuse; his government had no right to convert a military officer into a house-burner. He mighthave found an example in the conduct of the French general who told one of the merciful Bourbons, many years ago, that he was always ready to fight and would do all that he could to defeat, the king's enemies in the field-but if an assassin were wanted, they must employ some one else; he was not fitted for such an office, nor was the office fitted for him.
That general Ross, after the burning of Washington, intended also to have burnt Bultimore, is unanimously admitted-that such was his design, we believe, has never been doubted. But it is useless to comment on these things. They are calculated only to rouse feelings which, though they onght not to be forgotten, should be allayed. The general as justly died for his offences against the
*It is worthy of rememLrance, that in the highest fury of the French revolution, and at times when the most unprincipled men had sway, that orders were given to preserve the "monuments of the arts," even though they pertained to kings.
tProclamation of the president, Sept. 1, 1815.

Laws of nations, as ever did a poor soliary induri dual for violating those of his particular country If instead of the crest, "a flag staff broken, therefrom flowing the colors of the United States of America," the regent had ordered a representation of the capitol with the library, \&c. in flames, zue should not have objected to it: and we think that he more truly deserved the latter than the former.
Inscription on the monument of sir Peler Parker, at Westminster Abbey.
In the pious hope of a glorious resurrection, Pursued through virtue, faith and valor,
hore lifs interabid the mortal rematis of
SIR PETER PARKER, BARONET; AEED 28 YEABS,
Captain of his majesty's ship Menalaus.
An accomplishedl officer and seaman,
Who, after landing with part of his crew, on the coast of America,
Defeated an enemy, supported by cavalry E artillery, thase-times the nuinber of his own force;
And, in the moment of victory, received a mortal wound,
Under which he continued to cheer his men to follow up their triumph,
Until, sinking under its fatal result,
He fell into the arms of the companions of his glory, And surrendered, on the field of battle,
His own gallant spirit to the mercy of Heaven.
He closed his career August 3, 1814.
the officens and crew, on their hetcra, ERECT THIS MONUMENT,
As a testimony of their grief for his loss, and respect for his character and merits.

0 Poor Sir Peter-he little expected thus to be "made fun" of after his death, though he dearly loved a "frolic" white living, and, uselessly to his country, lost his life in consequence of one. The facts are these-
The Menalaus frigate liad been for a considerable time near the head of the Chesapeake bay [not ort the coast of America] committing the most disgraceful and most contemptible depredations on the people near its shores-destitute of any national object and only derogatory to the character of her officers and crew; among which were the burnings of cottages, after plundering the poor inhabitants of their few goods, and destroying all that they did not see proper to carry away-a species of warfare such as we might expect only from Algerincs. When things were ripening for the attack upon Ballimore, he was ordered down the bay; but befure he obeyed he resolved to have a "frolic with the yankees," and landed nearly the whole force of his frigate for the purpose of altacking colonel Reed, who had collected a few militia at Moore's Fields, not far from Georgetown X Roads, on the eastern shore of Maryland, to clieck his depredations. According to the British account of this affair, signed "Hen. Crease, act. com." - [yee Wrikly Reolsten, suppt. vol. vir. p. 150) he landed 10.4 bayonets and 20 pikes - (but col. Reed estimated sir Peter's force as being superior to his own, which amounted to 170 men, all told-see vol. Vil p. 11, and suppt. to vol. vis. p. 157) and rashly rushed upon his fute. He was met by a raw militia, "few of whom had ever lieard the whistling of a ball," and in a few minutes was completely beaten, with the loss of his own life and 13 others killed and 27 wounded, ac. cording to the acknowled!gment of Mr. Crease; and his force retired leaving behind it a quantity of arms, ammunition and other apparatus of war, with the dead, and nine of the wounded;-nothing pre-
vented the anuihilation or capture of the nhole force but col. Reell's want of ammunition for his men. We had none killed and only three wounded all of whom got well.
There is no doubt, the "British official" to thre contrary notwithstanding, that Sir Peter's force was superior to col. Reed's in point of numbers. Mr. Crease's account would give us to belice that Sir Peter liad only 124 men-it is hardly probable that 14 of these should be killed and 27 wounded, and 40 "missing;" for Mr. C. sent a flag on slore the next morning for an exchange of prisoners, 40 of the crew being missing. We believe his force was fully 150 men armed with muskets, and about 80 armed with pikes and pistols, \&cc. And this is the affuir that shines with such splendor on his monument. BCT тus marble casmot blesh!

\section*{Commodore Rodgers.}

The compliment designed to be paid by certain citizens of Baltimore to this able and patriotic officer, is ready for delivery. It is a most superb service of plate "intended for the dinner table, and consists of a large fish dish: four large meat and four smaller dishes: four covered dishes for vegetables; two soup tureens and :adles: two large pitchers; four sauce boats and ladles: a bread basket, and a dozen forks-all of the most substantial workmanship, and reflecting on the artists, Messrs. Fletcher and Gardiner. of Philadelphia, the highest degree of credit."
Each piece has the following inscription:
"Presented by the citizens of Ballimore to CO.14. JOIN入 RO DGERS, in testomony of their high sense of the importunt aid aforded by him in the defence of Baltimore, on the 12 th and 13 th of September, 1814." Never was such a compliment more honestly, more faithfully, earned-never was one presented with a deeper interest and feeling than this occasion will give rise to. The unwearied volunteer-like services of com. Rodgers in the defence of Ball imore, in Sept. 1814, were as a host in strength-teaching by example, spreading confidence every where, and in. fusing into each breast a portion of his own invincible spirit.
This service of plate cost \(\$ 4000\). It is splendidly "ornamented with borderings and embrossed figures after the manner of tle Egyptian and Girecian sculpturings," and is miversally admired. It was exlibited a few days for the gratification of the sub. scribers and others.

\section*{Legislature of Massachinsetts. GOVERNOR'S SPEECH.}

\section*{Gentlemen of the senate, and}
gentlemen of the house of representatives:
The return of the election season brings with it little novelty, but nuch to engage and intorest us. Past events, and a long catalogue of patriots and statesmen, with the recollection of whom the transactions of the seanou are associated, recur to the mind and enter deeply into the ineditations of the occasion.
History, the ins tructive epitome of the character of man, exhibits to us not only the perpetual conflict of reason and the passions, of strixing alterations of rectitude and error and the commanding powers and extreme imbecility of the human mind, but the formation of the governments, their progressive changes and ultimate catastrophe.
But without extending our views orer the general history of man or of governments, the annals of
our country, the asthentic memorials of the migra tion and sett:ment, the claracter and manmers, the political and religious principles, and the literary istiturions of our forefathers; the rise, progress and termination of the nomentous question between Great Britain and her colonies, \(110 \%\) the United States of America, respecting the right of parliamentary taxation; the origin of structure and estab. lishment of our systems, jurisprudence, and their influence upon individual and social happiness, open various and prolific sources of instruction to the legis'ator, and of proud satisfaction to the American patriot.

Yo' are called upon, gentlemen, to exercise the functions of legislation at a time lighly propitious for impartial enquiry into the great interests of the commonwealth. For a long succession of years, such was the extraordinary state of most of the nations of Eirrope with which our interests are involv. ed, that the minds of your predecessors have been occupied with painful apprehensions of the public safety, or with the arduous duties of providing means for public defence.

Durin r that eventful period the ordinary avocatinns of manys of our fellow-citizens were interrupted. Navigation, commerce, manufactures, and cven agriculture, assumed or were forced into a preternatural state. Vast numbers of the people were compelled to abandon the pursuits which inclination had selected, providential allotments had facilitated, and habit had rendered familiar and lucrative, and resort was had, in ton many instances, in desperate projects of speculation and adven. thee, equally eluding ćalculaion, rumous to indiviluals and vitiating to public morais.

I3:t the public mind being now relieved from its disquieting solicitude by the internal tranquility of the state, the elevated character of our republican systems of Kovernment, the respectable condition of public credit, resting on its primitive piinciples of fiscal administration, and the existing relations of amity between the United States and the other commercial nations of the world, you are happily insulged the opportunity of turning your attentions specially to the interior concerns ot the commonwealth. And coming as you do from every section of the state, you bring with you not only a know. ledge of the wants and wishes of your respective constituents, but of all those facts and circumstan. ces pre-requisite for sugrestion and perfecting any public improvements of which the commanwealth may be susceptible.

Annual elections and frequent meetings of the legislature being designed to perpetuate the principles of a free constitution in their purity and vigor, and to promote in the highest degree possible the general welfare of the state, it seems highly profor as auxiliary to these ends that the attention of the legislature should be often directed to inquiries into the competency of the laws for securing (o) the people their political and elective rights; to juquiries whether they obtain, as they may be a rlemand, what the constitution assures them, right and justice freely, completely and promptly, without purchase, without denial, and without delay? Whether the code of criminal law be adapted to the state of society and morals, and punishments be uniformly commensurate with the nature and turpitude of crimes? Whether due encouragement is bestowed upon the interests of religion, learning, humanity and benevolence; upon agriculture and the fisheries; upon naval arclitecture and other mechanic and manufacturing arts; upor: commerce and those productions of genius and taste which enrich and em.
bellish a state? and in fine whether the laws are imparlally and faithfully administered?

Agriculture was not only the first employment of man, but we may observe :n admirable and happy coincid ence of his interest, his passions and his taste with his primitive des'ination. l3ut agriculture is unsusceptible of an independent existence. Unsolicited by the demands of commerce and manufactures, would the rural economist extend his care and his toil beyond the supply of his own inmedi. ate consumption? men do not act without motives, The hope of profit sweetens and originates labor.But if the surplis products of the soil become a worthless incumbrance to the producer, langor, inaction and scarcity would be the result.

Whatever may be the intrinsic valne, or the rela: tive importance of the several great departments of political economy, which are so intimately united as to be inseparable, an enquiry into the most promising mears of multiplying and meliorating the the products of husbandry, will not be deemed unworthy a Massachusetis legislature. A plenitude of subsistence affords the nost sure and stable foundation for the maintenance and augment.:tion of the population of the state, for the improvement of mamufactures and for the active circulation of the sur plus prorlucts of art and labor.

Massachusetts has ever been repesctable. And while she retains the spirit and is governed by the principles of her pulitical, religious and moral in stitutions;-while her shouls and higher seminaries of learning; while science and the useful arts shall be cherished; her love of justice and lier habits of industry and economy shall be maintained, slie must continue to command the respectful consideration of the world. The commonwealth, to the mild beneficient influence of whose constitution and laws we are immediately or remotely indebted, not only for our civil rights, but for the secure enjoyment of the rights of conscience, the pleasures of friend. ship, and of whatever is most dear to our affections in doinestic life, clains our first fealty and homage. And I may add, that the people of the several states will most efficaciously perpetuate our system of national government, by preserving the soliclity and the strength, and maintaining the erect at. titude of the pillars upon which the vast and lofty superstructure is erected. IBy recurring to the re. solves of the last session of the legislature, it will be perceived that, on the third of December last, a resolve passed, authorizing and requesting the go. vernment, with the advice of the council, to appoint agents to present the claims of this commorrwealth against the United States, for expenditures during the late war, to the congress of the United States, or to :my department of the government, as might be found expedient. In conformity to the authority vested in the executive by that resolve, agents were appointed, and commissioned, to repair to the seat of government of the United States for the purposes expressed in the resolve, and the hon. James Lloyd and William II Summer and Jo. sephiI. Pierce, esquires, were selected. The two former gentlemen, with as little delay as possible, proceeded to the city of Washington; the latter gentleman remained in Boston and has beevl occasionally employed in selecting and furnishing documents to elucidate the principles upon which our claims are founded, and to arrange the component parts of the account under specific heads, as required by the departunent of war.- The course pur-: sued by the commissioners and the result of their mission you will learn more distinctly by referring to their correspondence with the acting secretary
of war, which the secretary of the commonwealth will lay before you.

A few items of our account as exhibited aganst the United States by the commissioners were considrred by the executive as commg within the purview of existing laws, and eleven thousand dollars have been reinited to me by the war department o:1 account - which sum I immediately placed in the hands of the treasurer of the commonwealih, where it waits the order of the legislature.

Since the last sitting of the legisiature it has been ascertained that a considerable balance of arms is due (1) this state, by virtue of the act of congress passed in April 1808, for arming the whole body of the militia. While our commissioners were at the seat of government they suggested to the acting secretary of war a proposition for transferring to the United States a number of musquets, the pruperty of the cominonwealth, and now in its arsenals, equal to the balance due to the state from the appropriation of the above mentioned act of April 1348, to be reconveyed to the state as its balance of arms due at the close of the last year. This proposition it is understood would have been acceded to by the executive of the United States, and payment made for the arms at the last cortract price of arms manufactured for the service of the United States, had the powers of the cummission. ers been compeient to that object. I rests with you, gentlenien, to authorise, at any future time, a commutation of any portion of the arms now in your arsenals, agreeably to the above mentiuned suggestion, or otherwise as you may think expedi eat.

The resolve of the 12 th December last, authorising and requesing the governor with the advice of council, to appoint agents for erecting a military arsenal at Cambridye, and a laboratory at Buston, and the resolve of the 13 th Decenber, authorising the appointment of three persons to consider the subject of the state prison at large, have severally been attended 10 , and the agenis duly appointed.The arsenal and laboratory have been contracted for, and are in a suitable state of progression.

A report from the cominissioners employed to enquire into the mode of governing the Pemisyl. vatia penitentiary, and other instututions of a similar nature, and to consider at large the subject of the state prison, and to report any improvement, organization or enlargement of that establishment, engether with a communication from the directors of that institution, will be laid before you by the secretary: The importance of that humane aad lie nevolent institution has always been highly appreciated by the govermment of the commonwealth; and from the encreasing population of the stite, and from a variety of other causes, which the se veral communications now to be submitted to you will disclose, it is daily assuming a deeper interyst. Such are my views of the mportance, and indeed necessty, of further improvments in the interior arrangenents and management of that institution, in order to the ataument of the beneficial designs which dictated its establishment, both as a place of mitigated punishment, and a penitentiary, that Ifeel it to be my duty specially to invite your atten. tion to this weighty concern.

Since the last session I have received a letter from the governor of the state of New.Hampshire, together with a resolve of the legislature of that state, suggesting a modification of the laws of this state, relative to the inspection of provisions. Within the same period thave received fom the gover. nor of North Carolina, a letter accompuying a pro-
position of the legislature of that state for amending the constitution of the United States. \(n{ }^{1}\) linese several communications will belaid before you with other documents by the secretary.

Accept, gentlemen, my assurances of the hirh. est respect, and of my readiness to cuncu. with you in all your efforts to promote the honor and happiness of Massachusetts. JOIN HROOLS.
May 31

\section*{Connecticut Politics.}

Address of the mujority of the lonuse of representatives, to the friends of toleration and equal rights.
Fellow crrizess-Your reprentatives constituting a majority in the popular branch of our governinent, beg leave to co gratulate you on the glorious triumph of just and liberal prilicipies, over that aristocracy which has long been supported "by the influence of office" and the prostitution of the fundamental principles of republican government. In the bold and energetic language of his excellency the governor, we may now truy say, "ithe actual condition of this state, in conuecuon with the American republic, a Tords just cause for parriotic exultation." And let us with him, "thank God that we have constantly witnessed his protecting care of our beloved country; that we have seen the tree of liberty, the cinblem of our independence and union, oolile it was a recumbent plant, fustered by vigilaice, defended by toil, and not unfiequently watered with tears, and that by His favor we now betioll it in the vigor of youthful maturity, standing protected from violation, by the sound licads, glowing hearts, and strong arms of a nero generntion, elevating its majestic trunk towards Heaven, striking its strong roots in every direction through our soil, and expanding its luxuriant branc' es over a pow. erful, united and prosperous nation."

Fellow cilizens-We have felt an awful responsibility at this momentous crisis. To establis.: the foundation of a system of policy and measures, which shall secure to our ci izens equal rights and privileges, both civil and relicious; a thorong.a reform and correction of abuses; an equalization of the public contributions; a judiciary which should not be influenced "by the veering gales of party politics," which render life, liherty and property inse. cure; free toleration and equal privileges, in resar? to the rights of conscience; and the restoration of our ancient system of election, unawed "by the in. Aluence of ottice" or dread of periecuion, hecame our paramount duty. H pijily for us, our patristic governor did not s'riak from responsibility; with that manly independence which characiersed his worthy ancestors in the chair of this state, in the face of opposition, he boldly recommended a system of measures which at one sirike demolishod the tottering und rotten fabric of Connecricut pali-tics-pointed out clearly the path of our duty and reccived from gour representatives, a cordial and united support.

Fell wo-ctitizens-We are fully sensible your exprec. tations, in some tew particulars, inay not te fully answered. But in legisla, ing for the whole, private views inust bend in some measure to the public good. Considering the important duties which devolved on us, the shortness of the sexsion, und the various view of men, actimg in concert, (for the first time) on the great and fundamental principues of republican govermment-a majority only in orte branch of the government-we feal the ninst perfect confidence, that all das been done which could be done by us.

In fathe examination of the proceediurs of 4 . pruselicessin", it will be perceived, that almos. the whole attelsion of the legiviature has bee co:sfined to the revision of laws and usages, which had becone odinus, the correction of abuses, an! in shor in endeavorfars to lay and establish a gootl I unda*ion, ratler than in buiding an elegant superstruc'ule on a foundation of sand. Tyour succes so-s we leave the more pleasing task of erecting an.I finishing the building, when a majority of both branches, will act in concert, and your mpresentatives will not be slackled by the jealousy or opposition of the other branch.
Oir task has been ardions, but we have not shruak from duty-Our constituents will decide on the propriety and expediency of our measures and from these our motives will be seen, and candidly scrutinized

The republic is safe. Honest men of all parties are uni.ing, and but one effort more is necessary to complete the work of reformation We have with us a good cause, tirmly supported by all who seck the best interests of the state and nation. Omr adversaries are those who cannot consent to surrender unlimited power to its legitimate ownersthe penple-they cling to their offices and stations, as the drowning man mis agonies catches at straws.

The nomination of candilates for the council whic', has been made by gentlemen from every part of tie state, many of whom are not members of assembly, we recominend to you, and feel the most perfect confidence, that it claims, and will receive jour undivided support-you will once more be compelled to stand up and be counted-Our ole ele tion lazo, under which our ancestors "led quiet ard peaceable lives" for more than 100 years, is not restored-the upper house refused to concur with us to repeal the stand-up laz-let this not be for gotten-isite as a band of bro hers-rally round the standard of toleration and equal rights-support the arm of our excellent chief magistrate, and Israel (and not Amalek) will prevail.

Signed by order,
JAMES ST'EPHENS, Chairman.

\section*{Judicial Opinion.}

On the pozver of the julliciary to detide on the constitutionalty \(f\) the lazvs.
t Langdon Cheves, esq. a julge in South Carolina, was lately required in decide on the constitution. alty of a law-the follo:ving is extracted from his decision.
"I have never entertained a more decided opinion on any question. I am clear the act of assembly under consideration is constitutional and operative. But if I were less clear I should still believe it to be the duty of the judges to carry the act into effect. I hold it not to be enough to doubt. I must be filly and clearly satisfied that an act of the legislature is unconsitutional, before I shall refuse to carry it into effect, or exercise the authority with which I am vested to restrain its operation.
"The co-ordinate authority of the judicary and its right and duty to determine, where its functions invoive the question on the constitutionality and validity of a legislative act, I take to be a point now settled by the judgment of almost every respectable judicial tribunal, and confirmed by the approhation and acquiescence of all wise and sober statesmen, in the union; but it is still a power to be exercised with great circumspection, and a duty which is incumbent only in very clear cases. On this subject I adopt with entire approbation the
lithruse of the supreme court of the United States \(_{1}\)
"Nor is it to be forgotten that this is not a case in which the juliciary is called upoil with painful fir nness to :esist so ne legislative encroachment, nibversive of justice, upon the private clains of the citizens or the great righto of the penple. The legislative act is entirely beneficent, and nothing is tn be dreaderl but that it may not he executed.Uader such ci-cumstances the question must bc clear inderd to uthorise the judiciary to raise this sxcred shield of public liberty and private right. It shonld ouly be brought forth on extrene occarions. If it be voluntarily assumed for every little exhihition-I fiar it may be shattered, and with its bearers, cloven down in some ignoble strife which may grow up, in which the unequal strength of legislative power and judicial independence slaall be pititin opposition, mixed up with all the bitterness of human passions, and all the wantonness of human fully."

\section*{Foreigu Articles. \\ LNGLAND, \&C.}

Petitions for relief from distress, continue to be presented to parliament. One, which harl five thousand signers, prays to be furnished with means to emigrate!
The chancellor of the exchequer has stated in parliament that no loan will be required by governnent this year.

Southey, poet laureat, in virdicating himself ggainst a charge of apostacy, says "it is the people who stand in need of reformation, and not the go vernment." Good!
The employment of boys to draw lotteries has been stopped in Eugland, as tending to make them gamblers Really good.
Five bilis frr ligh treason have been found against. "Arthur Thistlewood, gent. James Watson, the elder, surgeon; James Watson, the younger, surgeon; Thoonas Presion, cordwainer, and James Hooper, laborer." Thistlewood was intetcepted in an attempt to escape to America.

Employment of the poor. In the house or commons the chancellor of the exchequer has brought forward his plan for the employment of the poor.

The sums proposed to be voted are-for England, 1,500,000l. in exchequer bills; and for Ireland, 250,000 b out of the consolidated fund of that king, dom.
Advances are to be made on the security of the poor-rates in England. No advance to be made to any parish except in cases in which the rate was. double the average of the tzon preceling years.
Manufacturers of Birmingham and other places, to be assisted with loans.

We see many gossiping paragraphs in the London prpers about the condition of the princess. Charlotte. We have also a pompous account of the marriage of an American lady to a col. Harvey-and that some American women danced so well on another occasion, as to please, [how gracious!] the enlightened and polished prince regent! Quantum suf.

The princess of Wales is expected at Paris-it is said she "threatens" to return to England. She was mightily offended at Vienna by the conduct of the British minister there, lord Stewart-who, to avoid her visit, set off with his fanily into the country. She openly declared her daughter should be informed of the procedure-and we cannot bui believe, though she is a princess, that she will remem ber the wrongs of her mother:

\section*{FlANCE.}

Mad. de St Jean d'Angely, (wl:ose liusband is in the United States) was arrested at her chateau near Puris on the 25 th April, and sent to the Conciergerie. The callse of this proceeding is not stated.

Restonation! A poor maniac entered the metropolitan church at Paris, and cut his throat in it -on which the church (says the Moniteur of the e0th April) defileal by the effusion of blood, was immediately clused; and ufler a decision of the chapter had been made, it was restored to purity accor 'ing to the form prescribed by the ritual. At a quarter past five o'clock, the clergy of the metropolis assembled in the church, and closed the doors. The pascal taper, the chandeliers, the candles, and the cross of the great altar, were taken away, and the hosis of the tabernacle. The vicargeneral, Jalabert, being clothed in a violef-colored vesiment, went forth of the church by the great door, and sprinkled the walls above, and all about, while the clergy chaunted the psalın Expurgat Deus. Having returned into the church by the same way, the clergy were on their knees at the foot of the great altar, with the officiating priest, who sprink. led the walls inside, especially the place where the suicide was committed, and the places stained with lis blood.

This ceremony, which took up some time, was attended, and participated in by the people, and concluded with prayers being again recited at the foot of the altar.

French commerce. Arrived at Havre in March138 vessels, viz. 79 French, 18 American, 13 Eng. lish, 8 Norwegian, 7 Swedes, \&c. Of the former, only four were from the colonies.

Sailed in March-130 vesscls, viz. 106 French, 11 American, 4 English, 3 Norwegian, 3 Prussian, 2 Swedes, \&cc. Of the former, 17 were for the colo. nies in India, Africa, and West Indies; 3 for America, (New.Orlesns) 1 Brazils and 2 Havana.

A lisi of aH merchandise imported in Murch is also giv. n -including 5,687 bales of cotton, 2,279 tierces, 100 sacks and 72 casks rice, 275 bbls. potash, 135 cases indigo.

Malume . Vey. A letter is published in the Paris papers as written by the emperor of Austria to "Madame la princease de la Moskoway," in reply to one from ber, asking leave to settle in Florence. The emperor, in the most frank and polite manner, is made to offer the liberty of any part of his dominions, as agrecable to hersclf-it being his wish to treat her "as one of his dearest subjects"-arlding, "We deplored the fatality of the circumstances which brought on this misfortune of your illustrious huaband, and impressed with the recollection of his having been the victim of his devotion to a prince allied to us by the tics of bloorl, and to her majesty the duchess of Parma, our beloved daughter, we make it our cluty in concur in oflering youn every - consolation in our power" "this letter is dated at the palace of Jlankembourg, l eb. 20, 1817. If ge. nuine, the preceding extract may be collsidered important.

KAPOLE:ON RONAPARTE:
A Brussels paper states that some of Bonaparte's partizans in France attempted to curry on a corres. pondence with him by means of a magnificent mus lin dress, which was sent as a present (o) madame lSertrand-the embinitered flowers and figures of which were hierogliphucal characters.

J3maparte's mintary carriage aud equipage, tak en at Waterlon, and which has been extribiting for sorre time in Fingland, is to be brought to Ancrica;

One of the French exiles under sentence par contumace, has recently gone to Parma, the residence of Napoleon's wife.

Santini has lately arrived at Brussels from St. Helena, via Fingland. All his steps are watched. It was asserted in London that he was the bearer of leters from Napoleon to his wife.
minorca.
There is a repart that a bargain is on foot for the surrender of the island of Minorca by Spain to Rus. sia. If this should take place, no doubt England will. feel it a sufficient casse for war with these powers ! -believing as she does, that mo nation has a right to cede a riavial station, especially, to any other than herself. Witness the alarm at the rumor that \(\mathrm{N}_{8}\) ples was about to cede the island of Lampedosa to the United States.
corgica.
A London paper says - Previous to April there had been no rain in Corsica for three months. Two leagues of soil and fifteen houses were burnt by fire supposed to be electrical.
austria.
Two Austrian frigates have lately sailed from Trieste for the Brazils, giving freight and protecto many tons of the manufacture of the empire, and to open a direct commercial interoourse with that country.

\section*{portcoal.}

The Portuguese government is said to llave contracted, in England, for 30,000 stand of arms, to be sent to Lisbon without delay- 6000 are already on the passage.

\section*{innta.}

The Pindanees. From a late London paper. By recent accounts from India we are informed that a considerable movement pervades the native pow. ers throughout the north east and centre of the peninsula. The tributaries and officers of the rajuls rypour, terrified by the advances of Ameer Kahn, and still more by the imbecility of their own rajah, resolved at one time to call in the assistance of the company's troops-at annther to chose a more capable and efficient sovereign. The British resident at Delhi has received intelligence that the number of Pindarees in the field amounted to no less than 80,000 , mosily well equipped, and all well mounted. Their mode of making war is most destructive, as plunder is their only object-they separate for the purpose into bodies of from 100 to 4 or 5000 horse, and ravage a territory of fify miles or more in circumference-whence after rendering it a perfect clesert, they march elsewhere to similar devastations. It was a detachment of several thousaud of these fierce marauders which traversed last year the whole of India-and penctrating to the bay of liengal, laid waste to the British province of Cattack, in the neighborhood of Calcutta. It is prestuned that some decisive measures will be taken by the company government, and their several allies, to check the progress of this terrific banditti, and (1) chastise their insolence-since othcrwise there will be neither security uor tranquility for the peaccful inhabitants from north to south of India. For this purpose his higlincss the Nizam had resolv. ed to embody 5000 cavalry, and place them under the command of 1 rritimh officers. To this end also, it was conjectured, as much as with any view towards anticipating the designs of the Mahrattas, a subsicliary force of six hattalions of company's infantry, five regiments of horse, and a proportionate number of artillery, were forthwith to assemble at Nagpunr, in the dominions of the rajah of Berar, under the command of col. Julin Adams-and col.

Frith had been appointed to the second division of the army in the field.
Of Later advices say that one body of the Pindarees was surprized and totally defeated, with im. mense slaughter.

AFIICA.
The navy of Tiunis is sand to consist of -3 vessels of 48 guns, 2 of 26,1 of 24,2 of 18,1 of 16,1 of 14 , 1 of 12,2 of \(8-9\) lateen vessels, \&ec. of 2 each, 2 bombards, and 80 gun boats, 1 each; besides an old corvette of 20 guns, and a new frigate nearly planked up. Total 108 vessels- 413 guns. This list was furnished by a U. S. naval officer.

\section*{West indies.}

Assassination is so frequent at Mavana that a patrole has been established to prevent it. It is said that uine persons were assassinated in one evening. The guards are ordered to search all persons, without distinction, for knives-but they may carry swords, if exposed to view by being lung at the side.

A project is on foot to build two steam bonts to ply between Trinidad and the Main.
flomida.
The Spanish commandant at Pensacola has refused a passage to the transports with provisions for the U. S. troops stationed on the Conawa, \&c. without the payment of an enormous duty-and is said actually to have seized some of their rations. It is intimated that general Gaines will negociute a passage for these vessels.
south america, \&c.
Gool? news. The troops that had just arrived from old Spain, (about which there was so much talk and preparation, and so much difficulty to get off) amounting only to 2000 men , landed and formed a junction with other royal troops near the Oronokowhere the patriot general Piar drew them into an ambuscade and killed 800 on the field, and took as many of them prisoners-Only 250 of the whole united force had reached Guayana. May thus forever perish the hopes of Ferdinand, the ungrateful, of claining South America!

Bolivar and Piar are on the best understanding, and co-operate handsomely; and every thing seems to go on very well. A little more perseverance, and liberty triumphs.

Lord Cochrawe who goes out to South America, is to be accompanied by Sir Robert IVilson. Success to them!
Com. Taylor is said to have informed Petion, that, unless he comes to some arrangement respecting the vessels he has seized, he will capture all Hay tian vessels he meets with until he gets property to the value of two millions of dollars. The liaytian ohief has a frigate of 40 guns, a ship of 22,1 brig of 18 , and 1 of 16 , all completely equipped and manned, but he seems unwiling to send them out to drive away Taylor's light vessels.

Pernambuco. We have an account that this place is blockaded by a Portuguese force of 2 ships of 32 guns and a brig of 18, manned by volunteers-the appearance of which had thrown the patriots into confusion. They had embargoed all the Portuguese vessels,and it was expected that this measure would be extended to those of other nations. It is also said that the people of Bahiaremained firm in their allegiance to the king, the governor having given the soldiers double pay and rations.

In opposition to the preceding, another account says, that the whole coast was in a state of revolu tion; which would doubtless end in the total exclusion of the Portuguese monarchy.

The Mexican patriots are much elevated and the
rovalists as much depressed, at the prospects they have of a war between the United States and Spain -of which, however, we see no immeliate probability, unless the late hostile proceedings of the Spanishauthorities in the Forilas and in Mexico bordering on Louisiana, may tend to it.

Gen. Roul, who left the United States some time ago to assist the patriots at Bitenos Ayres, has returned, after the most outragenus treatment from the supreme director. On luss return from Cliili, be was privately seized and condermed to leave the provinces without examination or trial, like those gentlemen whose arrival we lately noticed. Ilis pay was even retained. We fear that things are not going on as we would wish them. General R . in his statement, however, gives us hopes of the penple; who, he says, love liberty, and will persevere in defence of their rights.

Peris. Our hopes are again revived that Peru is about to be wrested from Ferdinand. The patriot army consists of 3000 men , and has lately gain d some considerable advantages over the royal forces.

\section*{Sound Doctrine.}

\section*{from the n. y. mencantile advertiser.}

Extract of a letter from a distinguished revolutionary
patriat, to his friend in this state, zoritten in May last.
"I hope, with you, that the policy of our country will settle down with as much navigation and commerce only as our exchanges will require, and that the disadvantage will be seen of our undertaking to carry on that of other nations. This, indeed, may bring gain to a few individuals, and enable them to call off from our farms more laborers, to be converted into laquies and grooms for them; but it will bring nothing to our country but wars, debt and dilapidation. This has been the course of England, and her examples have fearful influence on us. In copying her, we do not seem to consider, that like premises induce like consequences. The bank mania is one of the most threatening of these imitations; it is raising up a monied aristocracy in our country, which has already set the govermment at defiance, and, although forced at length to yield a little on this first essay of their strength, their principles are unyielded and unyielding. These have taken deep root in the hearts of that class from which our legislatures are drawn, and the sop to Cerberus, from fable, has become history. Their principles lay hold of the good, their pelf of the bad; and thus those whom the constitution had placed as guards to its portals, are sophisticated or suborned from their duties. That paper money has some advan. tages is admitted; but that its abuses also are in. evitable, and, by breaking up the ineasure of value, makes a lottery of all private property, cannot be denied. Shall we ever be able to put a constitutional veto on it?"

\section*{Church Affairs.}

The very respectable gentleman who forwarded to the editor certain pamphlets regarding a dispute between a highly-titled ecclesiastic and several of the congregations of christians under his charge, is informed that we read them with much interest and no little astonishment. It seems so repugnant to cominon sense, that those who, by voluntary sub. scriptions, raise money to erect places of worship and support clergymen to officiate in them, should not have the right of electing their pastors and of fixing their compensation, that we hardly supposed a thing of the sort could have happened in the

United States; and we feel very certain tiat there must be a degradation in the character of some of our citizens, if they submit to snch severe distranchisement.

But, as in this respect the people have, or may have if they please, an entire controul over their own church affuirs, it is not necessary for us in \(s: y\) any thing on the matter, which is only a private; or particular, concern, to be regulated by the discre. tion of those interested in it; thougit we regret and cannot help reproving an attempt to apply the monarchical priuciples of Europe to any part of the people of the United \(S\) ates.

\section*{CIIRONICLE.}

The president of the United States, after visitjug fort Miftlin, \&c. reachod \(\mathrm{p}^{1}\),iladelphia on the evening of the 5th inst. escorted hy three troops of ho-se and a great concourse of citizens-in the presence of whom the reviewed gen. Caldwalder's brigade. While in Philadelphia he vi-ited the venerathe Thos. .Mc Kean, a!so Thos, M. Willing and the Nidow of the late Robert Alomis.

On Priday the 6 h inst. the members of the Penn. sylvania state society of the Cincinnati, paid their respects to the president of the United States, and presented the following address:

To James. Monroe, president of the United States.
Sin-Embracing the occasion which your attenLioa, as chief magistrate, to the miliary defences of the United States, has afforded, it is with peculiar pleasure that the members of the Penusylvania society of the Cincinmati, a portion of the surviving few who were yhur associates in arms during the war of the revolution, approach to renew their personal intercourse, and to assure you of their cordial support to the firm and impartial administration of government, which, by combining in its measures domestic tranquility with the respect of foreign nations, they confilently anticipate, will promote the best interests of the United States, ensure to our citizens the advantages of social harmony and individual happiness.

That you may participate those blessings and en. joy the gratefill esteen of a happy people, is the sincere wish of your faithful frieads, and respectful fellow-citizens

Signed by order, and hy the
unanimous vote of the society.
1). LENOX, President,

Hon. Baxser, Secrefary. Philudelphin, June 6, 1817.
the pheginext's answer.
To the members of the Pennsylvunia socicty of the Cincinnati.
fallow citizesa-In uttending to the naval and military defence of the United States, nothing can be more gratifying to me, than to meet the surviving members of iny associates in arms, who distin. guished themselves in our revolutionary contest. I can never forget the daigers of that great epoch, nor be indifferent to the inerit of those who partook in them.

To promote trantuility at home, and respect abroad by a firm and impartial administration, are among lie highest duties of the chief magistrate of the United States. To acquit myself in the discharge of these duties, with advantage in my fel-low-citizens, will be the underiating object of iny zealous exertions. Their approbation will be the highest recompense which 1 can receive.

JAMES MONROE.

Pliladejfinia, June 6, 1816.
"The ancient and honorable artillery company" of Buston has presented a custly and elegant sword to gov. Brooks, of Massachusetis. This company is the oldest military association in the new world; and has been kept up with life and spirit from its first establishrnent. They have just celebrated their 179th amiversary!

A ship with 400,000 in specie on board, bound for India, lately suffered much by the explosion of her magazine, by whiclı one man was killed. Iut by p:ompt assistance from the Independence 74 , the specie was savel and the wreck secured so that the vesicl may be repaired at a comparatively small expence. In generous principles, our naval officers have no superiors.

The Venezuelan chief, sir Gremor Mc Gregor, is at present at Charleston, S. C. It is intimated that he soon expects to rejoin the patriots.

The Hudson-Pinjects are mentioned by narrow. ing the chamnel of the Hudson at certain places, to deepen it so tha* sea vessels may go up to Albany. Success is sanguinely calculated upon.
Lieut. Ilenth, of the U. S. navy, has been killed in a duel with a midshipman, at Hoboken, near NewYork. The editor of the neaisten well knew the deceased-a more amiable young man or more promising officer, did not belong to the navy; and he is uselessly cut off, in the very budding of life!

A "hard mouthed" fellow.-A criminal who lately made his escape from the Georgia penitentiary is said to have possessed " an extraordinary faculty of releasing himself almost at pleasure from chainsand tears to pieces with his teeth the strongest padlocks with apparent ease."

Ship Nows. The newspapers published in the numerous villages that have sprung up on the New. York coast of Lake Ontario, sinc: the war, have a portion allotted to shif, news as regularly as those on the sea board. The chief places of trade, at present, are Sacketts IIarbor, Ogdensburg, Troupsville, Gennessee River, and Buff.aloc-the most of which were covered with woods 5 or 10 years ago.

Nezo Church. The corner stone of a new church has just been laid in Baltimore. On a brass plate deposited in the stone is written-
"There is one Gun, and one mechator between God and man, the man Christ Jesus." 1 Tim. ii. 5.

Tuemammoti. We have a detailed account of some newly discovered bones of the maminoth, in the presence of several distinguished gembemen, in Orange county, New-York. The frequent discovery of such relicis, at a day so distant from that in which these monstrons animals must have lived, gives us certain proof that they were once very numerous in our country. What changes in its nature and climate must have happened since then!

The cut \(\mathbf{z o r m . ~ M r . ~ J o h n i ~ E r w i n , ~ o f ~ N e w p o r t , ~ D e l . ~}\) has clearly ascertained that the cut worm is trans. formed into a fly-in which state it propagates its species.

Hessian ely. A letter from a gentleman at Clarks. burg. Va. to the editur of the Register, says that the fly has not extended its ravages to that quarter of the comutry, and that the crops of wheat never looked better. Headds, as yet we have no locusts.

The season in the western parts of New York has been very cold and unsettled, The frnits are despaired of. A snow that would have been six inches deep, if it had not wasted after its fall, fell at Canandiagua on the 27 h of last month. The corn has been severely injured by the cut worm, but the wheat had a very fine appearance.

The crops in North Carolina are reported as pro. mising a most abundant harvest. ()n the rihule,
though some parts of our country has suffered much, we incline to the belief of a probability of tise greatest harvest of beead stuffs ever gathered in the United States.

Inportant present. Arrived at Baltimore, on Tues. day last, in the brig Margaretta, captain Gardner, from London, six beautifill young cow's and one bull, of the Devonshire breed, together with some inproved implements of husbandry, for Mr. Pitterson and Mr. Caton, of this place, the whole being a present from the celebrated Mr. Coke, member of parliament for Norfolk, the richest and most particular farmer in England, who gives the following description of these cat'le:
"I venture to give it as my opinion that we have no cattle to be compared to them in the united kingdom, for purity of blood, for aptitude to feed, for hardiness, as well as for the richness of their milk, and for work when requireu, as I have repeatedly found by a variply of experiments upon my own farms and elsewhere.
"That they may answer in America as well as they are now universally acknowledged to do in England, I most cordially hope, and my wishes will then be gratified."

Ad valorem duties. The utility and necessity of the regulation lately directed by the secretary of the treasury, "that a pprtion of all goods imported, subject to ad valorem duties, shall be examined to ascertuin the quantity and quality thereof," has been already tested. In one invoice that underwent this scrutiny last week, we understand there were twen-ty-six packages fonnd of a fraudulent character, being invoiced and entered as chocolate, confected citron, gentian root, gum lac, orange peel, \&c. They were found to contain, besides these articles, upwards of seventy small boxes secreted therein, containing sewing silks, ribbons, silk stackings, silk velvets. Prussian blue, boots, shoes, E \(c\). to the amount of five thousund dollars ! We trust that a strict and vigilant attention to this regulation, by a competent officer, will be uniformly practised, that the revenue may be secured, the konest imborter protected, and domestic manufactures have a fair chunce in their strus. gle for their existence We believe that there is every disposition on the part of our revenue officers to pursue the same vigilant system which demunciations will not be able to check, nor interested clamor weaken.—Nat. Alvocate.

Nazal-The U. S. brig Enterprize, it is said, is fitting out to take a survey of our coast, and will be manned entirely by midshipmen, under the command of lieut. Kearoey. By this method the number of midslipmen at present unemployed will have an opportunity of rendering themselves familia. with the duties of seamen, and qualify themselves for actual service at any moment when required.

The Deaf.-The following very interesting article is tiken from the Christian O'server, [of Lundon] of September, \(1816:-\mathbf{M}:\) ssrs. Wright and son, surgeon aurists of Bristol, have succeeded in restoring the fuculty of hearing to several persons born totally deaf and dumb. The persons having now acquired the poisession of distinguishing sounds, are daily impruving in the power of conversing. These gentlemen intend to receive a limited number of persons of respectability lavoring under these infirmities, into an establishment in the neighborhood of that healthy situation, Clifton.

\section*{Chinese state paper.}

The London Traveller, of March 11, contains a particular account of the fracas between the Eng.
lith embassy and the Chinese, in September lant. On this subject the emperor issued the following. edict:
tMPERIAL DECREE.
Dated the 15th day of the 7th moon of the 21st year (6th September, 1816,) of Kia-Kiang, addressed to the Viceroy King, and the Feymen Jung of Canton, and received the 5th of the 8th moon 25 th September.)
The English ambassadors, upon their arrival this tine at Tiensing, have not observed the laws of politeness, in relurn for the invitation* of the em. peror. Reaching Tung-echow, (four leagues from court) they gave assurances of readiness to perform the prostrations and genuflexions required by the laws of good manners (of the country.) Arrived at the imperial country-house (half a league from court,) and when WE were upon the point of repairing to the hall (to receive the embassy, ) the first as well as the second ambassador, under pretence of ill-health, would not appear. We, in consequence, passed a decree, that they should depart. Reflecting, however, that although the said ambassadors were blameable in not adhering to the laws of politeness, their sovereign, who, from an immense distance, and over various seas, had sent to offer us presents, and to present with re. spect, his letters, indicating a wish to show us due consideration and olsedience, had not deserved contempt, such being also against our maxim, of encouragement to ollr inferiors; in consequence, from among the presents of the said king, we chose the most trifling and insignificant (which are) four charts, two portraits and ninety-five engravings; and in order to gratify him, have accepted them. We, in return, give as a reward, to the said king, a Yu, Yu, \(\dagger\) a string of rare stones, two large purses, and four small ones; and we ordered the ambassadors to receive these gifts, and to return to their country (we having so enacted) in observance of the inaxim (of Confucius,) "give muck-reccive little."
When the ambassadors received the sail gifts, they became exceeding glad, and evinced their repentance. They have already quitted Tung.echow. Upon their arrival at Canton, you Kiang and Jung, will invite them to a dinner, in compliance with good manners, and will say to them as follows:
Your good fortune has been but small: you arrived at the gates of the imperial house, and were unable to lift your eyes to heaven (the emperor.) The great emperor reflected that your king sighed after happiness (China !!!) and acted with sincerity; he therefore arcepted some presents, and gifted your king with various precions articles. You muss return thanks to the emperor, for his benefits, and return with speed to your country, that your king may feel a respectful gratitude for these acts of kindness. Take care to embark the rest of the presents with safety, that they may not be lost or destroyed.".
After this lecture, should the ambassadors sup. plicate you to receive the remainder of the presents, answer-"In one word, a decree has passed; we dare not, therefore, present troublesome petitions:" and with this decision you will rid yourselves of the embassy. Respect this.

\section*{Mr. Hay's speech on Ustry. \\ to the edttor of the enQuiker.}

Sir-I send you enclosed a rough sketch of \(m\) ! temarks, made last winter, in the house of dele gates, in support of the bill commonly called the usury bill. Your publication of this sketch, will be a performance of the promise contained in my last address to the fieeholders of Henrico.
I do not recollect that the bill was printed in the Enquirer; hut whether printed or not, it may not be improper to state the substance of its principal provisions:
All the existing laws for the prevention of usury were repealed.
Loans at any rate of intcrest were authorised, provided the contraot was reduced to writing, subscribed by the party to be charged therewith, and attested by two witnesses, who should subscribe their names under the words, "having first read chis contract."
Where there was no express stipulation on the subject, interest was to be fixed al the rate of per centum per annum-at which rate, interest was to beallowed when assessed in the form of damages.
The bill directed, that the settlement of the accounts of executors, administra:ors, guardians, trustees, and committees of lunatics should be made on the principles heretofere established.
All contracts made by virtue of the law were declared to be subject to the control of courts of equity; on the same principles on which relief against other contracts is afforded.
A penalty was denounced against those who reseived, or stipulated to receive, higher interest than was expressed in the contract.
These, I believe, were the principal provisions -I speak from memory only, having actually worn out the copy of the bill, which you were so good as to send me.

> Yours, respectfully,

GEO. HAY.

\section*{Ashfeld, May 6, 1817.}

Mr. Hay's speech - In the cominittee of the whole, on she bsll so repeal the several lazos of the state of Firginia, for the prevention of usury.
Mr. Charmmax-1 admit, without hesitation, that the oljject of the bill before you, is the subversion of a system, which has existed (under different mo. difications) for more than three thousand years. This acknowledgement, I am aware, leaves me c :posed to the imputation of temerity, for having brought that bill before the loouse. This inputation would indeed be merited if the opinion, which gave rise to it, had been but recently adopted, or was confined to myself alone. Sir, this opinion, imbibed while I was merely a student, has been confirmed by the observation and experience of succeeding years, But iny conviction on this sub. ject, how over strong, would not have induced the to trespass on the time of this assembly, if it had not been partuciputed by others. Yes, sir, whatever gentlemen may think, or whatever surprise they mity choose to inamufest, it is a fact, that the doctrine for which I contend has been supporied by writers ocrupsing high and distinguished stations in the literary and political wortd. I will lay before jou, sir, the opinions of a few-hot as nuthority, for in political science there is no autiori-ty-but as an excuse, an apology to the committec, for introducing a subject, whose stipposed novelly has atready attuweted so much notice

Sir, several years ago, I read, and very recent ly I have again perused, a little volume on the subject now before us. It is written with great perspicuity and force, and undertakes to prove and does prove, that all the laws that have ever been made, or can be made, for the suppression of what is called usury, are not only useless but injurious. This little volume, written by Bentham, has never been answered, and 12 m entirely persuaded never can be refuted.
Sir, in the 52d No. of the Edinburgh Review. this book is mentioned in terms of approbation, and the writer in the language of respect. But, sir, the reviewers, who contstitute the highest literary tribunal now known, or perhaps ever known to the world-the reviewers, as much distinguished for their profound speculations in political economy, as for their knowledge of literature and the sciences, not content with this notice of Bentham and his book, have gone on to express their opinion upon the merits of the very system, which it is the object of my argument to expose, and of the bill before you to destroy. In speaking of the distresses of Great Britian since the peace, they do not hesitate to ascribe a portion of them to the operation of the laws against usury. They speak of the laws themselves in the strongest terms of reprobation. They derounce them as absurd and barbarous-laws, which " no man of sound under"standing can now ie found hardy enough to sup"port." In the same strong tone of disapprobation and contempt they express a hope that the British parliament will "distinguish this age by "s eradicating one of the most pernicious errors, "which the darkness of the early ages, and the " blind deference to authority of more civilized "times, has ever planted in society."

Have I not said enough, Mr. Chairman, to rescue myself from the imputation of temerity?-from the sarcasm, as irregular as unprovoked, thrown out in debate a few days ago, upon another topic, intimating that this was the age of discoveries, and that the member from Henrico had made the "notable discovery" that the laws against usury were impolitic ? "No," (will be the answer,) "you have not said enough. This Mr. Bentham, and these reviewers are people of whom we know nothing. They may be men of mere theory and speculation: men wilhout that practical knowledge of human affairs, which alone can entitle the opinions to respect."
How far this may be true as to Bentham, I know not; that it is not true as to the reviewers, I have good reason to believe. Several of them are men, who have held high stations in the government of Great Britain; while nthers actually engaged in parlianent are as much distinguished for their practical knowledge as for their great literary attainments. But let this pass. I will occupy gour time for a moment longer on this paint, by introducing one more witness to complete my apology.
Turgot was unquestionably a practical man.Distinguished in France more by his virtues and abilities than by birth or comections, he was called by Louis 16 th in the uffice of compiroller gencral of the finances, of that great and opulent empire. Ihis admmin' ration, it is irue, was not of long cons. thuance. He could not resist the influence nud the eabals of those who rioted on the oppression of the peuple; but he carried with him into his retrement the affiction and confilence of all the - se and the virtuous; and dying, teft a character, w.ich the pen of Comiorcet hias employed itself to preserve and perpetuate.

The opinions of this statesman, on the question before us, are expressed in the strongest terms:"I will dare to speak out." Will you pause for a moment, Mr. Chairman, to observe the expressicn, clure to speak out? Sir, that word, "dare," is worthy of notice. Turgot felt that he was treading on ground consecrated by the prejudices of more than a thousand years, and it required an effort of his moral courage to speak the truth to the ears of a prejudiced and deluded penple. Sir, I feel the force of that word. I know, I see, what prejudice is, and I feel that he, who questions an opi nion which has passell from generation to generation without examination, does dure, when he asscrts his owa, even in this free and enlightened country.
"I will dare to speak out," says Turgot. "The "laws recognized in our tribunals, on the subject " of the interest of money, are pernicious Our "legislation is suited to the strict prejudices con"cerning usury, introduced in ages of ignorance, " by theologians, zohio understood the sense of the Scrop. "ture no more than the principles of natural lazo.(1) "The rigorous observation of these laws iwould "be the destruction of all cominerce; and they " are not rigorously observed. They interdict every "stipulation for interest without an alienation of the "capital; they forbid as unlawful all interest be"yond the rate fixed by the ordinances of the "prince; and it is a thing notorious, that there is " not on the face of the whole earth a place of "trade, where the greatest part of the business "does not depend on money borrowed without an "alienation of capital, and where interest is not re"gulated by agreement."
I will not, Mr. Chairman, occupy more of your time in preliminary remarks. 1 say, I huve proved, that the bill before ynu constitutes a subject of fair and legitimate discussion. If further proof were necessary, it is at hand. Mr. Locke, whose name alone reminds us of all that is great in in tellect, or pure in morals, has long ago demonstra. ted, that the market rate of interest cannot be regulated by law.
Waving all benefit from the opinions here quoted, escept that of justifying the proposed inquiry, 1 proceed at once to the several propositions, up. on the truth of which depends, I conceive, the policy of the measure now under consideration. am well aware, that the discus :on will be tedious, but the importance and the novelty, legislative novelty, of the subject induces ime to hope, that the committee will favor me with their attention.

The first proposition is, that by the law of na-ture-that is, by the principles of reason, justice, morality, isdependent of municipal lave, interest may be required, as a compensation for the loan of money. In this point, all ellical writers now agree. It would be a waste of time to refer to them. In this point, all legislators now agree. In every part of Europe, Turkey perlaps excepted, some interest may be taken. In every state in the union, interest, higher or lower, is allowed. In this state, interest was originally settled at 5 , and was then increased to 6 per cent. It may therffore be assumed as a position unquestionably true, that it is not immoral to exact interest for the loan of money. Even the most strenuous opponents of con-

\footnotetext{
(1). Iccording to Mosheim (abr. 2.70) the clergy, even of the 16 h cent. knew nothing of the scripzures. The most famons university in Europe conld not furnish a single man, who could discuss a question of relizion on a scripture foundation.
}
racts for interest concede, that where the capital is alienated, a rent or interest may be reserved. (2) Between a temporary and permanent loan, there is no difference in principle. Interest may be required with as much propriety in the first case as in the last; nor is there a single exception allowed by the scholiasts to the gemeral prohibition, which aloes not shew the absurdity of the prohibition itself (3)
Now, sir, mark the difference. If it be morally lan ful to tike interest for the loan of money, it is morally lawful to take any iaterest fairly agreed on. Ths inference is justified by a proposition universally true, that all contracts between persons competent to contract are binding, unless there be fraud or mistake. Sir, the inference is irresistible; and contracts for interest must be admitted to stand on the saine ground wish all other bargains. If it be alleged, that they form an oxception to the general rule, the burthen of the proof lies on the exceptor. It is his business to shew, that although all contracts fairly made are moraily binding, a stipulation to pay interest, no matter what, tairly made, is not in like manner obli. gatory.
But it has been suggested, (not here,) that the price of money has been regulated by law f:om motives of policy only. I should have been glad io learn what those motives were. I have never
(2) Thís distinction, after long discussion, was settled by a papal decree. It was established, or samitioned by Pupe Martin 5, and coiffirmed several years afterwards by Calixtus \(3 d\) - Theone de l'interet. printed at Paris 1780, p. 130. These Popes both lived in the 15 th century.
(3) Saint Thomas, (Thomas Acçuinas,) who was called the angelic doctor, and wrote against in. terest, (in the 13 th century) was yet of opinion, that interest might be taken on money lent to one, who wanted it only for parade-"ad ostentionem!" The plain people of this country, who are no Saints, differ from St. Thomas, and think it wrong event to give money which they know is to be squandered. -Theone, 176.
Another Saint (St. Beuve) who lived in the 17th cencury, tho he agreed with St. Thomas, was yet inclined to thmk that money might be borrowed on interest, for a purpose of "signal utility," or by a merchant in a case of "real necessity." He would not advise such a thing to be done, but he could not condemn it.-1bid. This man was expelled from the Sorbonne. It is not improbable that his scepticism on this subject, may have contributed to produce that event.
Another exception admitted by St. Thomas, al loved intersst "ratione dammi." if the money lent was not paid at the appointed time, interest might be clained by way of damages!! It may be very safely affirmerl, that Locke, Stewart, Smith, Quesnal and Turgot imbibed no portion of their political science fiom that ciass of writers commonly called the schoolmen or scholiasts. Of these people, enough is said in three lines by Enfield: "The art of reasoning was employed not in the free investigation of truil, but merely in supporting the ductrines of the Romish church, \&c." Einfield Hist. of Philo. 2. 36 J . Mosheim is equally pointeid and severe. There is no temerily in sayiug thit from the time of Charlemagne until the era of the reformation, these Platonic and Aristotelian theologians had not advanced real science one singrle step. There is a good account of them in ALallet's life of Bacon.
seen them stated. I have never heard them mentioned In truth, sir, they never had existence. I will prove to you-1st, that the restriction on the rate of interest throughout the Christian world was not founded on considerations of policy-2dly, that if it was so founded, it was nugatory and alisurd.

Sir, permit me to remind you, that the Mosaic law had forbidden any interest whatever, in contracts between Jews. - After the estabiishment of the Christian religion, the clergy both of the Greek and Roman churches, difiesing as they often did on points frequet:ly unintelligible and always uminportant, concurred in denouncing usury, or what was then understood to be the same thing, the taking of interest for moner, as an offence not only against the principles of religion but of morality. How it came to n :ss that these ecclesiastical legisla. tors, laid their pious hands on a subject so entirely uncornected with religion, I shall not stop, minutely to enquire. The miserable and abject condition to which the people of Europe were reduced, by the increasing power and wealth of the papal clergy', from a very early period, until the \(16 \mathrm{l} /\) century, will at once shew that they had extended their Aominion to almost every transaction of human lifie, and to every condition of human existence.

Now, it is apparent, that these theological law. givers were mistaken, both as to the law of the old, and the doctrine, of the new testament. It has been long conceded even by churchmen themselves, that the Mosaic law was a political precept, coufined to Jews bargaining with Jews only. The people of that nation so understood it, and have always so understond it. For centuries they were the principal mioney lenders of Europe.

It is equally clear, that the taking of interest, and of very high interest too, is not incompatible with the principles or precepts of the Christian religion. Extortion, it is admitted, is always condemued. It is condemned by the laws of all civilized countries, whether it manifest itself in a contract for money, or goods, or land: but that the receipt of interest was not deemed a crime, by the author of the Christian system, is demonstrated by the comparison drawn by himself, between the Christian religion, and the man who travelled into a distant conntry, and on his return, commended the servant who brought him ten talents for five, and punished him who had buried the money cosfided to him, and would not put it out even to interest.

Of all this, however, the penple of Eurnpe were entirely ignorant. The scriptures had never been iranslated, at least for their use; and if iranslated. could not have been read by the unlettered laity, They believed therefore what they were required to believe, and their humble piety, if it descrved the name, poured out its effusions, in a language of which they knew nothing. The couneils of the clergh therefore inet with no opposition, when they issucd their canons and decrees, denomucing interest as a crime, and in the language of Turgot, the legislation of Europe, was regulated by the prejudices, which they so solemenly inculcated.
I.ven in fireat Britain, interest was prolahited until the 37 th year of Heury 8 th , who had defended the lope against Lather, and then quarrelled with the former, for oppoting on the groutud of the rali dity of his first marriage, his entrance into a second Tin the resentment of thas arbitrary monarch the Finglish ure probably indebted for the first indarcet sanction of interest on loans. In the reign of his father, Henry f th, it had been expressly proseribed, and in the reign of his son E.dward 6th the proserip.
tion was revived. This proscription was continued until the 14th year of the reign of Elizabeth, when interest over 10 per cent. Was, as in the reign of Henry 8 th alone, prohibited. In the reign of James 1st, lier immediate successor, interest beyond eight per cent. was prohibited. There is a proviso in this statute, which merits attention. The proviso is that "the statute sliall not be construed or ex"pouncled to allow the practice of usury in point "of religion or conscience." Suc! was the influ"ence of prejudice sanctioned by time. Thus even in the 17 th century, the parlianent of Great Britain, and its monarch, though long separated from the dominion of the Pope, doubted whether interest Was not against conscience.-They therefore allow it indirectly only by prohibiting all beyond eight per cent. leaving the question whether any ought to be taken, to the conscience of the lender. Now, sir, mark the progress of opinion, slow indeed, but easily discerned. In the year 1546, when the first statute in Fingland, in the reign of Henry 8th, was passed on the subject of interest, the taking of in terest is declared by the preamble to be immoral and criminal. Sill, thourh criminal, it was toleraied. Rather more than half a century passed away, and then it was viewed as a doubtful question, thic decision of which was referred to the conscience of the individual.

On the continent, prejudices were still stonger, at least of greater duration. In the year 1700, the assembly of the clergy of France and the theological faculty of Paris, in conformity to a decision of Innocent 11 th, condemned interest as entirely unlaw. ful.
Even as late as the ycar 1770, a decree of the French king in the case of certain bankers of Angouleme, speaks of France as having no positive law authorising a stipulation for interest. Such, sir, was the influence on the minds of the legislators of the two most enlightened nations of tinrope, of this absurd and fanatical perversion of the scriptures.
The effect was equally visible and equally pernicious even on the ininds of the wirters, who thought themselves qualified to instruct mankind by the publication of their opinions. A few instances will be sufflicient. Grotius, whuse inind was at-least one century in advance of tilat of his cotempora. ries, though at the same time greatly infected by the pedantry of the age, was so much influenced by the existing opinion of the world, that he ex. pressly denounces interest, not as immoral, but as contrary to religion. This opinion lie retained tiil after the publication of his buok De juee belli et pacis; hut he abandoned it afterwards, as we are informied in a note by his commentator to the uri rinal work, and supporiced that which uow generally prevails.
bomat, who published the first volume of his "civil laws" furty years after the death of Grotins, and who reccived a pension from Louls 14th, as the reward of his great abilities, entors into a long dis. sertation to prove the ammorality of interests. He concledes with thete woeds; "all thise proofs which shew that usury is not soly unlawfint, but that If is a crime, do likewise sufficiently evinoe, that Hhci" is hu case whercin it is lawfin, nitd that every covellallt of cotninerce, orlierely interat is takenfor 3 loan, whatever pretext is made use of to color \(i, i\) i, a cr umanal ustiby must pionsly condemand by the law of Ciod, and that of the church, and mosi justly pminshed by the ordinatices."
lo refute this of mions, as perniciuns as absurd, an opulten which even the most iginarant of our
countrymen would treat with derisum, volumes have heen written. Fien as late as the middle of the 13 th century, the enlightened and scientific edifors of the Dictionaire Kaicornce in France have einployed no less than fourteen columns to prove 2hat initerest may lawfully be taken. Tle volume, which furuishes me with the opinion of Turgot al. rearly quoted, was written for the same purpose, as Jate as the year 1779 or " 80 .

I have stated these circumstances, Mr. Chairman, to which many of the same charscter might be ad ded, for the purpose of sliewing, low deeply this prejudice against interest had, in the lapse of ages, agres of ignorance and barbarism, taken root in the human heart. The canon law proclaimed it to be immoral and repugnant to religion, the civillaw denounced it as a crime, and the writers of the highest character for morals and talents gave their sanc tion to the error.

What then could the legislator do, when experience had convinced him that the business of borrowing and lending was indispensably necessary in human affairs, and that it was in fact perpetually carried on in defance of law, religion, and the prejudice of education. I say, what could a legislator do? What course would you expect him to pursue? Pass a law authorising what was declared to be immoral and irreligious; advance straight up to the truth, trampling as he went along on the opinions and prejudices of ages? Sir, it could not be expected. Such is not the march of the human mind, Its progress towards truth is slow. Opinions and prejudices imbibed in our youth are abandoned, when abandoned at all, with great reluctance. We are dragged away from them only by the irresistible force of truth, and we cannot leave them forever without casting many "a longing lingering look behind." All, therefore, that could be expected, was a compromise, between necessity, experience, and good sense on one side, and prejudice on the other. The circumstances which I have already stated, as to the statutes of Henry and James, seem decisive. The first statutory pro. visions on the subject, did not authorise the taking of interest, but prescribed a limit, beyond which the transgression would b? punished. Such, sir, was the origin of what was called a restriction on the riate of interest. In truth, it was not a restriction, but an indulgence. It was an indirect sanction of the usage of the country to a certain extent, a sanction called for by the business and increasing commerce and transactions of the world; but a line was drawn in deference to old laws, ecclesiastical and civil, old habits, old prejudices. The legislation on the subject was, therefore, manifestly a compromise, and the demarcation of a limit was not the result of any profound, or even superficial, speculations conceming the relation between the rate of interest and the capital stock of the country, nor in truth from any consideration of policy whatever.
Bat it has been or may be remarked, that other nations, not Christians, had laws against usury. This is true as to the Romans, probabiy true as to many other peopic. The first Roman law on the subject however is ascribed by l'acitus to the De. cemvirs in the 3021 year after the foundation of the commonweaith. Interest was by the twelve table. fixed at one per cent. Montesquieu is of opinion that Tacitus was mistaken, and that the tribune brought forward this measure nearly 100 years af terwards. Gibbon indeed sneers at Montesquieu for his presumption; but Ferguson agrees with th latter, for reasons, which to my mind are conclu sive, But whether the first law restraining inte-
liest was made in the year 302 or 308 A. U. C. no argument is afforded in favor of the policy of the restriction. The 12 tables constituted a barbarous code. Parents had a right to kill or sell their children, and creditors were authorised to put their debtor to death, and to divicle his lands anong them: It may further be remarked, that the men who prepared that code were conspiring against the liberties of their fellow citizens, and might reasonably calculate on pleasing one party by severity against debtors, and the other by reducing so low, the rate of interest for money.
If, on the otherhand, the first proposition to restrain interest came from the tribunes, its origin was not on that account the more respectable. These men, in order to ingratiate themselves with the people, frequently proposed not only the reduction, but the extinction of interest, the abolition of debts, and the equal division of lands. In all these propositions, they were seeking popularity at the expence of the public good. Such was and sttch forever will be the character of seekers of popularity. Decemvirs and Tribunes combined, afford but a slender sanction to any proposition whatever; to this, none.

But, sir, whatever may have been the origin of the system prescribing a general rule in contracts for interest-a rate beyond which lenders could not go, the limitation itself is ineffectual, and injurious. I say, sir, that the laws of all countries against usury have been both ineffectual, and injurious; ineffectual, because the suppoied evil still continued; injurious, because this evil was increased in proportion to the severity with which it was pursued. The facts which I am about to state will illustrate both parts of the proposition.

The authority to which I shall first refer is Montesquieu. Remember, sir, that I quote him as authority for facts, and not foropinions. With his opinions, at present I have no concern, and I am glad of it. I confess that I do not feel for them, that profound respect which is generally professed; but in his veracity I have great confidence. (4) According to the Koran he tells us, and so do others, all interest is regarded as usury, and forbidden. This is not merely a law of Mahometan countries, but a precept of religion. The government in those countries, we know to be absolute, and punishment is as severe as it is summary. The power of absolute government, and the influence of a religion, to which the people are enthusiastically devoted, combine to prevent the offence of taking interest for money. But interest is taken, and is aug. mented, says Montesquieu, in proportion to the severity of the prohibition.
(4) This remark about Montesquipu has been noticed in the public papers, and censured. It may not, therefore, be improper to state, that while I feel high respect for his abilities and information, and admire bis "Spirit of Laws," which as a celebrated writer (Voltaire) observes, "if it does not always instruct the reader, always makes him think," I camnot admit that he is to be quoted as authority to decide a political question. Any claim short of that I am not disposed to controvert. I had before cxpressed the same idea as to Grotius and others. Treatise on expatriation-On this very subject Montesquieu has not reflected profoundly. In truth, every man who writes a volume, embracing a great variety of subjects, inust make up many opinions just as he finds them in the world. Even Smith is Hot consistent with himself on this very subject.

\section*{}
l lave before remarked that some of the lownan magis rates endequnred in gain the favor of the petuple, hy proposing laws anceraing the red action andex inction of interest, and the abolition of ilebis. "Fhese things," sits Montesquieu, "naturalized "nsury at Rome ill honest means of borrowing "and lending were ab livked, and the most mom"strous usury est.bli,hed itself, notwitistanding "the होrict pronlibition and severity of the law."I treses in the city was at \(34 ;\) in the provinces at " 48 per cent. Britns trimself lent monry at that "Hale." \(\mathcal{F}\)-rguson takes a similar view of this sub. fert, speaks of the satne fact, atrd ascribes it to the suit-c cause.

Ahem Smith, whose opinions, though menerally ourrect, tre not alvays to be taken upon trust, lays it down as a mosim, in policical economy, that wherever a preat deal can be made, by the use of money, a great deal will commonly be given for it; and of course, that when hittle can be inade, less will be kiven. This we all know to be true. In a conity uke ours, where capital is never at a loss fur pe isable empluyment, the privilege of employ. ing that capital will be purchased at a high price. IF, then, the market price of money will regulate itseif, as the maxim supposes, trow futile is the of. gort to renhlate it by law. Smith tells us that it cal not be tone. No law cath reduce the common rate of interest below the lowest or linary market rale, when the law is inade. I quote this opinion with respect, becalse it is the opinion of one of the greatest inen whose writings have ever endightened the world, and with confitence, because it is confirmed by the unifurm evilence of history, and by our own immediate observation.

The same wri er recommends the statutory provistuns in England on the subject of interest, becanse they fluzed the market, and did not attempt to regialate it. Theve provisions, so far as they went to fix a rate, where the comiract expressed ronte, were cestainy pruper. The bill before you dues this.

The bistory of England furnishes some very impottant farts in relation to this discussion. Fid कiml the first, in the ynar 1015, influeneed by the wain: barlyarous and fintar zeal, 4 sich laad led him in Palestinc. conifiscated at a single stroke the property of the Jews in Englond, and banibhed them from the country. -15000 were rubbed and driven into exile. As il is tupossible, combitues the listorian, fur a nation to subsist without lems er. of money, and none will lend without a corn. persation, the practice of usury wis thenceforth esercised by the Eaglish themselves, or by Lambarls and other fireigners, and wis probabily on ori wiace that it hat beets befire in the cution taw: *econdel by the munieipal haw, permiteed un chiristian to tuke interesp, the elvistian was to be pait ent moly for the use of his moacy, but for the infit my and lionger which lie incurred by the thalwac tion- -To take interest, says IBenthain, was acting lake a Jew Now the Jrwa were not only perverut ed withont mercy but abhoriedsso usuch ahhureth, that witen the victims of the royal edict were pre paring to embark, mulutudes were thrown by ticir tos XII.

13
c rivisian elremies into the seal, and perichot. What man then in that age would lend money no interest, without being indem iffied against the reproach of acting like a Jew? The shiril ef persecution a ai st these unluappy people, if it ever exister \(i, ~ i l i s i s\) ciun. try, his become extinct, but the comparinon, to which it gave birch, is fainiliar even at the present day.
The same historian informs us, that Henry 7 th not only enacterl laws against interest, but aguinst atl profit on bills of exchange. It is needlens, lie says, to remark, that these laws coubld not be exteft d. What, sir, not execurer by Henry 7 H , a miser, as well as a tyrant? Whose ugrents were ac. uve and eager in pursuit of penalties, and alike re. fardless of the means as well as mischiefs of extorting them? Yes, sir, such was the fact.- These laws could not be enforced. The power of the monarch; the vigilance of his agents, ailed by a imid and subservient judiciary, availe? nothing. Yet we go on in the same tract. We profit neither by the evidence of history, nor the admunitions of our own experience.

In the reign of Henry 8 th, as we have seen, interest at ten per cent. was tolerated; but in the reign of his son, th:e prohibition was revived, and contimed in force during the reign of Mary. Yet money was lent in deliance of the law, and of the well knowo character of Mary-and the commourate of interest was 14 per cent. If law, backed by reli. gious prejudice, and supported by a powerfil and ambitious goverument, could not restrain the ex. action of interest, what are we to expect from such laws here, upheld by no suc! prejudice, backed by no such govemment, but on the other hand, exuclemmed by multitudes as impolitic and absord?

Ii Russia, we are told by Bentham, the laws are intally unavailing, and onntracts are secretly made for interest at the discretion of the partres.

In kingland, the rate of interest is fixed at 5 per cent. yet, at this very moment, 10. 12 , and even 15 per cent. are paid for money, raised by way of arnuity, even with real security.
I know no country, but one, in which there is no law. against usiry. Mr. Lacke states thin in 1 H . hand tire ras min suc! Latw. Every contrict stipuated the rate of interest to be paids and whether the rate was high ur low, the contract was enforced Now, sur, what mischicfs must hive been experiencel by the people of Holland, if our liws are fiunded on wisdom and pulic!? What extortion inust have been practised? How the money lender, restrained by no law, nust have grown rich on the proils of the necessitues and the extravaratht, who, le, it he remembered, are always necesvitoils! Sir, stich must be suppusel is have heen the con lition of the cotinery, by all who think thede restrainghg I, wis benefirisi is the people. No suppousitim, however, orul the in the erroneous. The cummon rate of itercst, even then, (nbout the year 168u) was 3 per cent.

Bnt it may be said, Holland was a rich country, in which capital aboundect: true-and that the cow price of musey arose from this abundance of capital: agrced. I contend for no more: Let caujex
atume-where it abounds, it can be procirel oul cheap terms: where it does mat, a liigher price must be paid-Tl.e price nill resulate inaif.

The testimony of Mr Turgot, fuunded on actual observation, is equaly conclusive. If ier enu mera ing the various heirl penalties uganst usury in Prance, he stutes expressly that it may with truth be said, that there is not a merchant, or b.uiker, or person employed in the business of the king, whon is not exposed to them. It is notorious, he sajs, that the currenit business of almost all France is done by negociation of this kind; and he mentions one very important branch of business which is carried on with money borrowed at \(17 \frac{1}{2}\) per cent. to the satisfuction of the borrower as well is the 1-ader.(5) Sir, if all this evidence be not sufficient, let us attend to the lessons of our own experience. Of what avail are our laws against ustury? The instances in which they have an effect are indeed few in number; so few, as to be unworthe of notice. Sir, the lav is not violated; it is evaded or rathel' avoided. The law operates ou lows There is no such thing as lending money as a matter of business. Apply to a man who is supposed to be rich, and is so. Ask him to lend you money. He will smile at your simplicity. He lias no money: It is all gone, lie believes, like Sherich.n's Jew, into the Sed Sea. But he will sell you public stock, or bank stock, upon your note a' \(6)\) clays, and he will obtain in the price of the stock, the interest which he chooses to exact. Can you prevent this? Will you attempt to fix, by law, the price of every article of traffic? You know it could not be done without the ruin of all credit, and the stagnation of all business.
lin the purchase of tobacco or flour, the purchaser frequent ly has nothing in view but to convert the article into cash for his immediate use. In the advanced price, which he allows for the credit, he pays the inierest which he thinks the capitalist m:y properly demand. The flour and inbacco, as well as the stock, are immediately converied into cash, and ofien in a few minutes get back to the man who sold them.
None of these transactions are within the scope of the law. Nor does the law proliibit the purchase of notes at any price the holder may choose to take. This is now the form which pecuniary negociations must frequently assume. Of whit avail, then, I repeat, is your law against usury? It has cone no good-It never can do good- 11 aggravates the evil-lt forces business out of its natural channel-It keeps every monied man, either scrupulous or timid, out of the narket-li fixes a stig. ma on those concerned in it, and always present to their minds the idea of litigation and reproachFor all this, the man who wants money must make compensation.
But let it be supposed, for a moment, in defiance of what experience so long, and so general has bild us, that a law could be devised, sufficiently compreliensive to take in, not only all loans but all those cuses which human ingenuity has substiuted for then, and sufficiently penal to prevent us:rry and shaving in cvery possible slape. Let this be sup. fosed, and what would be the result? I say (even leaving commerce out of view, ) mischief incalculiabiy greater. As long as accident, misfortune, or fully continues in the world, there will be men who will want, who will have, indeed who muat

\footnotetext{
(5) In London moncy is lent at 10 per cent. per day, to barrow women, who sell fish, fruit \&c in
the sticets. Colquhoun, lolice of London, 167 .
}
have money. In the event supposed, how could it be obtained? Only by the sale of property. For this property the capitalist wonld sive only so much as whuld assure him of the return of his money by anotier sale, with the expected profit. - This assurance would probably cost the seiler at once 50 per cent. In fack so much property would be perpetually at market that a general depreciation and ruin would be the consequence. But it is needless to pursue this idea. The supposition which has been made is absurd-it never could be realized-but it it could, experience would soon demonstrate, that when money musi be hadl, it is cheaper to raise it by purchasing cash articles for sale, than by selling property, which is not a cash article, and still clieaper to raise it by a divect negociation for a loan, where this can be effected in consequence of the character of the borrow. cr; and that the negocialion could be effected on the terms o:s which it ought to be effected, taking all the circumstances of each cese into view, which the pariies can do, if the laws, which cannut, would condescend to admit their incor.petency. These trutlis appear to me to be self evident.

Sir, I lay it down as a proposition universally true, that the law ought never to attempt to regulate the price of any thing. This rule is ind ed generally observed. It is founded on the most obvious policy. If the price is fixed, in confurmity to the decision of the market, the interposition is useless; if it be not, it is disregarded. The regrulation of tolls at bridges, mills, and turmpikes, furms no exception.-These are buit by legislaive perinission, and the government may prescribe the terms on which the permission is granted.(6)

The only prices in this country whici the law undertakes to regulate, are those of baker's bread, tiver: rates, lawyer's fees, and money. They are all equally disregarded, as in fact they are all equally absurd. As to fees, what can be more ridiculous than the attempt to regulate by the same standard the price in be paid for the labors of Brotian duliess, and the effirts of At!enian learning, genius and eloquence? What cun be mor inconsistent and capricious, than the prorision which requires me to pay 50 per cent. more to one man than to another, though both in giving an opinion have performed precisely the same service.-Well has it been said that individuals profit little by experience, associations of men still less, and governments least of ail.

1 will subuit another remark. It is, that all laws regulating the value of money, without refer. ence to the market stundard, and all laws iestraining the exportation of money, have heen proved by experience, like the laws \(r:\) gulating the price of money, to be unavailing. In ancient Rome and in noderu Europe, repeated experiments have been made to raise the value of money, by giving a new denomination to the existing pieces, or by coining them over again with additional alloy. This act of fratud and tyranny has ruined creditors, public and private: but the standard value has always been regulated in the market by public opinion.
Upon the same principles, efforts have been made to keep the paper issued by goverments at its nominal value. These laws have been entirely truitless. Al! our tender laws and all our revolutionary path otism could not prevent paper money from sinking to nothing. The French expermment with as-
(6) The attempt to regulate the wages of laborers in Eingland was given up after experiments repeated for four hundred years. Smith, 1, 141.
signats, aided by a ferocious mob and a remorseless guillotine, terminated in the same way. In Great Britain during the late war, coin was a matter of traffic, aurl not of currency. A guinea was sold for 27 or 23s. in bank paper. Such sales were made indictable offences. The guineas were then clipt and sold, or melted and sold, at the marke rate of exchange. The statute could do nothing. But mark the result. Peace came. The exportation of specie for the armies abroad in a great mea. sure ceased-and it came from all quarters to buy the manufactures of Great Britain. In a sloort time naper was preferred to specie, and bore a premium. Things took their own cotirse. The tide ebbed and returned again, as little affected in its passage by the laws of England, as the waves of the ocean by the cominand of Canute.

Fiqually unavailing, because equally absurd, have been atl the laws that were ever passed to kesp specie within the limits of the country; laws, says Hume, that have no other effect than to cause more io be exported. Spain and Portugal, as well as other countries, occasionally have tried the experiment; and precisely so far as it operated, has it been injurious to the industry of the country. In trith, sir, money is like a fluid, which will find its level; and interest, which is the price for the use of it, has the same invariable and irresistible tendency.

But, sir, the laws against usury are not consistent with themselves. Tiuere is no limitation as to maritime interest. A man may lend inoney at 50 per ct for three months, to an inctiv:dual who engages in a maritime speculation. The reason assigned, is that the principal is put in hazard. This is a mert delusion. The principal is not put to hazard. The voyage is insured; and the insurance if effected at the expence of the borrower.

The same inconsistency is observable in lending upon an annuity for life or lives. The monied man may obtain an annuity of 200 l per annum, by advancing only 1002 . The lives are insured so as to secure the rate of interest s ught, and this insurance also is effected at the expence of the borrower. In this way money is now obtained in England at a rate calculated to be equal to from 12 to 15 per cent. How futile then to attempt to control the operations of money! It is at ouce the most prowerful and the most subtile of all agents. How inconsistent to lay down a rule from which wexception is allowed, which renders the rule a nullity.(7)

It inay also with truth be said, that the laws against usury have an immoral :endency.

The lenders are bribed to evade their contracts : the law distinctly tells them that if they can prove the usury when sued, they shall gain all that they have borrowed. The judgment shall be in their favor. But the saine law telis them, that if they cannot prove the fact, which, if ealablished in their defence, would afforel them entire protection, they may go into chancery; and although the same fact be acknowledgeal by the lender, why then the borrower is to pay the principal lent, withont any interest. let we regard all this as wise and moral; and I am afraid we should regard it in the eame light If il were ten times inore iminoral and absurd.Such, sir, is the influence of oppinions, which we find established at our entrance into the world, and sanctioned by a general actui-sicence.

H:At much, sir, as we, fiom habit, venerate the
(7) The most palpable inconsistency is seen in relation to the banks; they lond, it is true, at 6 per cent. but the divide from 8 to 18 or 80 per cent.
law in the abstract, its practical operation has been always odious. Sir, I have seen a borrower re:ire from the supreme tribunal with a decision in his favor. The instinctive honor of the by-stan? ?ers has opened a lane for him to pass as if they feared contamination from his touch.

Sir, these laws are calculated to harden the heart of man. They offer him a premium for unkindness You cannot lend your neighbor, however respectabie, 100 dollars at the rate of \(6 \frac{1}{2}\) per cent. to save him from the loss and diagrace of an execution. But you are indemnified for this privarion. The law whispers in your ear, let his property be sold by the sheriff, and you may buy it for fifiy per cent. less than it is worth.
Sir, what sort of a law is that, the vinlation of which, is an act of duty, of sentiment, of virtue and honor, and the observance of which, would be deerned infamons by all mankind? Let me supoose, sir, that you are my friend-that you lemi me money without interest, hy the use of which I have grown rich and prosperous. You have relied on my friendship and honor to pay you when in need. The hour of need unexpectedly arrives. V ur huse and all your property are consumed by fire. I go to you, surrounded thy your syinpathising friendsI condole with you-acknowledge your servicesbut regret that 1 have not been able io raise any money for your relief, unless I had given more money than the lav permitted to be taken. How would you feel? What would yous say? Sir, I will not utter here what yon would be authorjzed to shy. I hasten from this view of the case. Let us take anollier. I carry with me all that you lent, with full interest, though you did not stipulate for interest. You know my situation; you know that I could not command so much money, without selling or borrowing. You kindly express your fears that I have made sacrifices to serve you. That is my concern, I reply, not yours. You af:erwards learn that I have borrowed money at \(2 \frac{1}{3}\) per cent. a inometh. I need nut ask you how you would feel, nor what you would say.

Sir , where is the difference between interest on money, and interest in the shape of rent? Upon a house that cost me \(\$ 10,000\), I may get \(\$ 1200\) rent; but for \(10,000 \mathrm{in}\) cash, I can procure 600 only. I may sell land, honses, horses, any thing, for any price that I call get, without reference to what I have given. I may buy a house at auction, and sell it before I quit the ground, for 10,15 , or 20 per cent. profit, but my money I must part from at a price regulated by law. Why? berause people are more ready to contract debis than to pay Hiem; because borrowers are inore numernus than lendery: and being generally poorer t.ian lenters, are the objects of a sympathy to which the latter canaot pretend. The whole force of the statutes, therefore, is directed against the lender : and the borrower is invited to defraud him.

With respect to the price to be paid for the use of a honse, of a slave, or any other thing, the law does not undertake to judge. It canmot juilge, nor ean it judge of the rate of interest betweeh inilividuals. There are considerations peculiar to each transaetion, which no general law can estimute. At one time a man, having moncy, inay have an object in view of more value to him than any interest that could be paid; or of so much importance that no ondinary rate of interent would induce hin to part with it. Of these things the law knows mothing. The borrower may watt money for all inulediate purpose, oll which his credit, as a man of business, eitirely depends. He may want money to enable

Sir \(t\) bring a sick son from a distant crllege, ur to cor the flicted mother of his children to a place *Were he lin is expected to be found. Of the valite if money in this man, the law can form an estitate abont as accurately as it can of the ardor of his cingral love, or the force of his parental affection. Un the other hand, the lender may, in some ins*. nces, be influenced by the risk of delay from the thw, and in others, of final loss from the situation or character of the borrower, or the nature of bie security of all liese things the law canno Julfre. Ihickstone himself admits this position. Bu then, he says, that the general inconvenience of parting with money, may be estimated by law; and on this ground he rests his vindication of the statuies against usury! The law can make a general estimate of the inconvenience of parting with money, but on make a particular estimate, it is admiticil to be incompetent! But this estimate, ac. cording to Blackstone himself, would be insuff. cient, beeause the rate of interest does not depend, he sajs, on ivconvenience alone, but also on ihe hazard of the transaction. To estimate one, therefore, wi hout being able to estinate the other, is ge mg but half way in shewing that a legal standaral oight to be established. This defect, however, is a mere trifle. Blackstone has a great name. llis book is quoted as a!? honity; and we learn, when young, to regard his opinions with a reverence which of en precludes all examination of their propriety.

But how can this general inconvenience be estimated according to Blackstone's theory? By go ing into the market, and ascertaining from merdiants and others, at what price money is commonly obtaired? No, sir: that course of proceeding, however obviou, would not answer. Truth, which lites in the high road, on the surface of the earth, is not writh finding. We must search, explore, an: dif deap for it. Blackstone accordingly searches, explores, and dirss; and the resuli of his labors is a discovery, that the rate of interest depends on the quantity of money in the country, "which a person, " weell skilled in political arithmetic, might, perhaps, "calculate as exactly as a private banker can the "demand for ruming cash in his shop." I will not stop, M1: Chairman, to animadvert on the palpable absurdíy of erecting a theory so important on a foundation, of which the builder, I will not say perhufls, but certainly, was somewhat doubtful; but will remurk at orice, that the amount of money in a comsty canmo be accurately estimated; and if it could, that the rate of interest and the quantity of money have no necessary connection with each other. Tiiou of the most enlightened political economists in the woid have exposed the fallacy of this idea. They shew that the rate of interest depends on the amount of capital, akd not on the quantity of money in a countiy. But we have 10 occasion to look ablood for evirlence on this point. The quantity of money in the United States has of late greatly encreased; but we all know that the rate of interest has in.t diminished; mor will it be diminished while the :atans of employing capital in this new country continate as abondant as they are.
sir, this restriction on contracts for interest, is not consibient with the first principles of our govermbent. We liohd it to be a fundamental p sition, that the people have understanding enorigh to know their owis interest, and to take care of it. The legitimate object of all soveruments and laws, therefure, is, to protect men from the furce or fraud of others, and not to protect them against themselves. ' 1 his the law cannot do; and, whenever it dssumes thi- wit of gurdianship over men, it degrades and

Corritpts them rithout rendering servide. How many laws would be expunged from our code, it the doctrine now alvancel were more resturded? In the instance before us, the folly of \(t\) ' is है mar. dianship is app rent. A man cannot horrow at 7 per cent. per annum, but he may sell for cash at a ioss of twenty per cent. in an instant.

The effiect of repea ing these laws will be eventually to lower the rate if interest. It has been al. ready proved that penal prohibitions increase it. If this be true, the removil of the penalties wili reduce it to the point from which the penallies raised it. Another consideration still more importint is, that every man who can spare money, will leud it. I vast proportion of the monied capital af the countiy is now kept out of emplovment, because the legal rate of interest is so far below, that of the market. Open then the market to all. Let the business be done in the face of day, in the presence of winnesses, between the real parties of the transaction, and not as now, in secrecy, by a third person, the lender afraid, and the borrower ashamed to appear. Yex, sir, open the market, and the competition will soon fix the standard of interest lower than we have ever yet seen it.

The inconvenience arising from this measure would be temporary. Let us suppose, the law being repealed, that the market opened at 20 per cent! Such I am persuaded would not be the fact; bu let it be assumed as true-1 am willing to take any sup. position-the consequence is obvinus. Every man that had money wonld lend it, and others would be for converting their capital into money, that they, too, might share in the golden harvest. - In a little time the market would be glutted-lenders would be looking out for borrowers, and the price of money would come down as low as the demand for capial would permit it to come. Money would pour into the country from every quarter, and never cease to flow, until interest was reduced to its proper level. Be assured, sir, great profit never can be made for a long time in any busimess in which money, and money only, is required.
But it will be said, shall we give up the people a prey to usuress and extortioners? I answer, no. Give them up 10 themselves. Let then alone. Let them manage their own concerus in their own way. You have had your turn. Youll have been trying for ages to take care of them. Youl experiment has uniformly failed. It is time now to make a different experiment. If it fail, alsu, you can easily get back to the ground you left. No harm can result from leaving, for a short time, at least, the path in which you have travelled so long, without being nearer to thie object, than when you sat out. It is lime to abandon the pursuit. Are you not complaining at this very moment of Hsury, of shaving, of exiortion? And is not this fact, independent of all other. circumstances, sufticient, of itself, to justify a sus. picion, that your own laws are, in a greal degree, the cause of the mischiefs you condemu? It is won: derful, says the author of the Police of London, when we reflect on the various instiutions, inpa. ralleled in point of extent and munificence, fir the relief of the poor of the metrop, ries are not alleziated, and that their marals shoudded grozo zoorse? Good min! he litile thought that mach of the misery and vice which he deplored, inevitably arose fiom the institutions which he admiret. (8)
(8.) Perhaps my doubts, or rather opidions, as to the poor laws of our country thay also be deeir.ed heretical. These laws have been in England, what

Stail we give up the people a prey to tisuly? bir, Shis ques ion is propemaled in the rery enirit of the wanny and bigotry of the \(15: h\) and \(16 \cdot 1\) centuries What, shall we give up the land to heresv, to impiety, to blasphemy? Shall we siffer infilelit! to wifurl its standart, and scluce the prople from their allegjance to the living God? No. We will save the souls of our fellow creatires from perili tion, and punish the wreteh, who perversely abandons the faith of his ancestors, the faith in which bs was brought up. Well, sir, the pious experiment was made, and thousunds, as e millinus, of human beings became its victims. We now see its folly, and deplore its crueltr; sud in this comntry, we hold it in he the most clexr of all truths, the most sacred of all principles, that every man should the left, on the subject of religion, absolutely free. Strange inconsistency! You permit every man, and it is jour boast, and happicess, and glory, that you do permit every man in arljust in his own way "ihe vast concerns of an eterual world:" yet, he cannot make a bargain for 100 dollars without your peep. ing over liis shoulder, io see whether he gives a quarter of a cent too much.

But we have been told, this is a most "notabl. discovery." Weare wiser than our fathers. We have just found ous, that laws which have existed for ages ought never to have passed . To speak plain1y, Mr Chairman, I think we are wiser, much wiser than our fathers. The art of printing has made some diff-rence between the penple of the \(19 \%\) century and those of ancient times.- We are wiser than they were in the time of the Crusades-wiser tham they were, when the julis nent of a cour. depentled on the result of a single combat - when wh men were burnt to prove their chastity, or drowned to prove their i inncence to whithcraft-when the bishops conld iot write, and statesinen could not read-and when the incendiary or the mur lerer was safe, if le could reach the sanctuary of tue church.

Sir, the surcasm which I have just stated, is the most formidable argument that lexpect to encolur. ter It is an argument of very ancient date, and of very general use. It has been invariably resorted to by thove who, from bigutry or interest, have oppos. ed the progress of cience and the refurmation of mankind. A f-w examples will illustrate the claa racter if lis sort of argiment.

Cobbett cals a bux ering surt; in several places in the United S ales they are ver's busy in makiag the same shirt-lis the city of New York particularly, it seems as if they hid already thrownt the two main parts over their shoulders. They will find in a few years that they must add slceves and wristb:ads, and a collar to-It is impossible to read the travel. lers Yonng and 'rownsend, or' Smith and Malthus, without imbibing a very strong subpicion, if not conviction, that the present system of poor laws is radically wrong, particularls under a republican government. The fact stated by Colquhoun to be so wonderful, is worth a whole volume of specula. tion-This is another "notable discovery" I know not who has the merit of it-Malthus has no claim. Lord Kaimes forty years ago, called the firsi statute authorising a tax for the relief of the poor-" "a fital hlotr:" and he refers in the author of Angeloni's let. ters rs having the same opinion, and also to justice Fieliling, than whom no person had a better uppor tunity of decidirg on the policy and effect of the poor laws. - But in the United States we never examine into these mattcrs. Systems, ready made, especially of English manufocture, get into fashion at once; whether they fit or not is immaterial.

When \(G_{2}\) ilen, in the 17th anotiry, revivect the sys em of Cuper:.icus, and boldly made the sun the statinnu"y e ntre of outr system, si! says the cliaf of the inqui-ilion, this is a most "h:otable discovery;" You an river that your ancesints-wiser than Joshua. The sum, insiend of stamhtry still at his command, has been alwoys stationary. Triz is a wonderfil discovery, and entitles somi in a distin. guished station in one of :he cells of the ing lisision. To this punishment this great inan tw is twice condemned, and he was compelle I to aljure the very doctrine which has rendered his mane immntal.

The case of Harvey, who discoverel and demonstrated the theory of the cirmulation of the homan blond, camnot lave escaped your recollecrion. So physician in Europe, over 40 years of age, voild admit it to be true. The ficulty conll not submit to the idea of having spent their lives in ismorance of a fact so important an! interesting in the anional system of man. They persecuted the antior as an innovutor, as a maker of "notable discoveries;" and his practice as a plysician was greatly diminis!sed.

With what effect might this argument have been urger! in the reign of Henry and Eliz.beth against the toleration of interes?! H.w many more years of want and miscry might Eurepe 'iave experiencel, if it had been urged gainst the repral of the ancient laws prohibiting the exportation of grain, and even the transportation of it fromone province in ann her? Sir, there has been a great cleal of useless legislation in the worlil, which might have been ?efended by the same soit of arçument. At one tim , the people of lingland were harissed with sumptilsy laws. They are now abandoned. Iaws have been made to produce conforinity in relision. They are in a great ineasure abandoned also; liere, thank Ciod! utterly sbandoned and ablorred. Laws have been made to punish monopolists of corn. Alen liave profited hy experience; aye, sir, grown wiser than their fathers; and those monopolists, though having nothing in view but their awn emolument, are now regarded as real benefactors of the couniry. In form. er fays, men were as zealous an las active in legig. lating, and in writing, and in speaking ion, against any interest, as they now are against interest beyond a certain polnt. That eiror is now universally ex. ploded. Let us take one atep farther, Mr. Chairman. Let us leave inen in themselves in making their oun bargains, and free ourselves entircly finm (h) fellers with which fanaticism and folly have so long bound us.
Olie remark more, Mr Chairman. It has heen already stated, that the insecurity of coniracts naturalized usury at Rome This fict affords a most valuable lesson; (9) a lesson tezching us never to in. terfere with contrarts but fir the purpose of ine forcing them. Roly upoui it, sir, as an unquestinusalile trinth, that this assembly can never pass a law, impairing the obligations, or suspenling the execustion on contracts, without making men more anxions to keep their capital in their cinn hands, and of course more exhorbitant in their terms for parting from it. Ireprat, let the people alone in making their own contracts, and let alone the contracts when made.
(9) Iholit in polnic I propasi 10 th to be more clear than this-"that all indulgencies experienced by debtors, whether arising from a defective ad. ministration of the law, or from the occasimal interposition of the legislature, are injurinus, not only to the morals but in the interests of the people, particularly the debtors, and have an influence as pernicious as inevitable on the price of money."

\section*{Editorial Notices.}
as To corresponalents. The state of the editor's heath is such as to require all possible relasation from the labors of the desk. The various business of the Regrsea employs eight or nine hours per day, and of ienlimes more, and the consequence is, a return of the complaint he had in 1814-a pain in the breast, wihh a great debility of his systern. These were relieved in the sutmmer and autumn of that year by moderate exercises and amusements in the upen air, which must be resorted to again. It is hard to spare the time necessary for this purpose; but it must be spared-and as business cannot be nieglected, he has resolved as much as possible to avoid the writing of letters and especially of long ones, which the friencly correspondence of many gentlemen has hitherto made it rightful and courteJus chat he should write. He entreats, however, that such will not deprive bim of the pleasure he bas always felt in equding their communications; and that thicy will believe that nothing but the necessity of the case could induce him to decline a fill recipro cation of their kindiness and politeness to him. He bopes that as yet the disease is not seated too strongly to be remored by as much relasation as ninety. Hine hundreds of his fellow-citizens enjoy. \(O \mathcal{A} A\) li.t'e attention to the contents of a late circular from the editor, wouldd very much contribute to this

The statisticul facts, \&ic. with which it was pro posed to conimue a series of essays on politicas ecesomr, are industrinusly preparing-and are expected to amuse, if they shall not instruct, the readers of the Registen.-"Stubborn figures" are hard things to reduce to order and harmony-but, when rightly fixed, are stumbling blocks, indeed, to enemies of truth.

\section*{Banks and Bank Notes.}

Our banking institutions have raised up an aristocracy that portends a fearful prostration of the public rights and private independence of the people. Ostensibly designed for great and noble pur-poses-to assist the operations of industry and encourage enterprise, they are more and more becoming sinks of speculation and tyranny-centre points at which some interested in them, insiduously and dishonestly collect their unloly profits upon the necessities of the poor-mere facilities for brokers and money-changers. Of all sorts of tyranny, deliver me from that of avabics:

Our citizens are becoming indignant at the unnecessary sufferings and losses occasioned by and through these institutions; but, unhappily, they have not thie power or want the courage to do what they would to rediress them. They see the worthless and unprincipled rearing princely fortunes by speculation, and repine that honest industry languisies and is compelled to contribute of its scanty mearrs to the wealth of the undeserving-drones of society, that ought to be expelled from the hive.
What is it that has given to bauks a sort of ex. clusive privilege to become bankrupts or shuffle off their engagements? The people submitted to their uon-payment of their debts for about three years, during which the prudent institutions, by issuning their paper and purchasing stocks of the United States, made vast suins of money; which we must redeem at its par value, with interest. Pubic opiniox then supported them in refusing specie payments, for the public good seemed to be concerned in itand public opinios nust now put them down, for the needless oppression and vexation they subject us to-and for the partial advantages that they give
to the fe:s at the expence of the many. I am in possession of some dingraceful facts as in the latter which I dare not publish, lest they might ruin the firead who communicated them: for the state of the case is so that suspicion would light "pon him; and to be "suspected of being suspicious" by the banks. is as rumous to those dependent upon them, as \(j t\) is for any man in Eingland to be so regarded by the magnanimous and merciful Custlereagh, under the act for suspending the hubeas corfus.
It is not enough that we the penple are every day subjected to the receipt of cuinterfeit notes, or of those of small denominations altered to pass for those of greater denominations, which are "as plenty as blackberries," and so artfully done as almost to defy detection even by those who may be considered good judges of them-and that we, for three years, took their paper without interest, and at a sacrifice of from 15 to 20 per cent. on it, compared with mo. wey, * while they made us pay interest on every scrap of paper they took from us; but that we should still be plagued and wronged by their arbitrary and useless rules in receiving or rejecting such notes of other banks as they please, which the very nature of their institution has made the mediun of the commerce of the country? When reciprocity fails there is an end of obligation-and if every thing like favor is to be extended orily to the banks, we have arrived at a pretty predicament indeed.

Cases like the following belong to almost every section of the United States, and happell, more or less, with nine-tenths of the persons in business in the neighborhoods of banks. 1 instance Baltimure, not because it is singular', but inerely for example.
The bills of the banks in the Disirict of Columbia are 1 to \(1 \frac{1}{2}\) per cent. below par in Baltimore; and the bills of the Baltimore banks are 1 per cent. below par in the District. Those of the state bank of North Carolina are 4 per cent. below par in Baltimore; and those of Baltimore at about the same discount in North Carolina : in respect to those of South Carolina, Georgia, \&c. it is somewhat the same; and it works thus every where. Wuy ? - is it because the banks reciprocally suspect the solvency of each other? By no means. One of them is probably as good as the other; and the southern banks, especially those of South Carolina and Georgia, are, naturally, the most likely to be the best off of any of them. Whence then comes the refusal to reccive each other's notes? I have exercised the charities of my heart to make;an excuse for them-one throws the blame on another; and we must conclude that this unpleasant and oppressive state of things, comes of their own folly or of the craft of those managing them, to carry on the busiuess of shuvings baik notes. Since 1 began to write this article, 1 lave paid as much discount on bank notes to get Baltimore paper, as my semi-weekly marketing costs me; with which, if I had been at the places where those notes issued, I might have received as great a premium if I would have taken the said Baltimore paper, jointly naking a difference of ten per. centum; which, in less speculating times, was considered a good interest for a whole year's employment of capital. A few days ago 1 passed at onc of our banks a \(\$ 50\) Boston note as a favor, which, some time since, would have brought me \(\$ 62 \frac{1}{2}\) in Baltiniore paper. The difference between these I lost on such sums of the last named, during the suspension of specie payments; because with the specie which the banks ought to have paid to me, I could have realized it in procuring so much the greater

\footnotetext{
*It is an established principle of law that bank
} notes are not money.
value of commodities that I wanted - yet my Buston note was received as a furvor! I will not give the cause that brings about such results the name it deserves, lest it might seem ungentee! !
To inake the enormity the inore manifest and slew the extent to which it might be carried, (and it may as fairly go in its utinost length as have its present opration,) le us suppose (liat the bank of the United States and its offices should refuse to receive a:y other as money than their own bills. The immedrate consequence would he that those of al:riost every other bailk in the United States, would depreciate foon 5 to 20 per cent. or the merc aants and others, h.wing bouds and notes to pay at this bauls and its branct!es, would have to let then lay over: for alhough the most of our ol.t banks are admitted as clearly solvent, they, no more thin indiviluals, can suddenly meet the payinent of all that they owe, for they cannot suddenly get in all that is owing to them-and, if they haye not more owing to the than the amome of their capital, the business would not yeld the stockholders more than 3 to 5 fer cent. per annum, let it be handled as carefully as it conld be, instead of 8 or 10 , as their dividends generally give then.

The pretence for the present conduct of the state banks, 1 am told, is because the United States' bank makes them pay interest on their notes that they cannot redcem.t Without presuming to decide on the merts of this arrangement, let us broadly ask -why should they not? They will not give the people the use of their money without paying inierest for \(i t_{\text {; and }}\) can they expect that their notes should lie dead in the vaults of the bunk of the United States-and eapecially so when they refise the like favor in the receipt of those of eich other: "It is a bad rule that will not work both ways."
But it may be saill-if you dout like the banks, refuse to have any dealings with them or to take their notes. We lave a parallel for this in the elo quenz sjicech of a cerlain niember of the Brit ish parliannent who, in his place, descanting upon the blessings of England, roared out "if any man don't like England, why d- him let him leave it" If the people could leave England-if they could give up all the ties of commtry and kindred, and liad the means of enigrating, with hiberty to do so, the "honorable Jack Fuller" would soon feel the neces. sity of wilhdrawing lis generous license But Jack was not a fool-he knew well enough that the people coull not emigrate if they would. So it is with our banks: It is as hard fur us to divest ourselves of business with them as to leave our country -and it is therefore our duty to reform them. They grew ap out of the indulgence of the peopie. and the peaple ough to see that that indulgeance is not used to the general injary.

After thic evils entailed upon our comutry by ne. gro slavery, there are none, in iny opinion, is so fa tal to the frectom and prosperity of the people as

\footnotetext{
\({ }^{\circ}\) I may add, also, that muby, residing in those parts of the country where Baltimore paper was at a discommt, thonglit they fulfilled the extent of their erigagements to me by pasing ne with it; of which 1 conll nut complain.
trhe banks have resumed specie payments ra ther in theory than in practice. They make no cercinony in cutting down any man's note at willbut regard every inan as an enemy that asks them in meet their own obligations. Of all the traders in Baltimore, how many is there that dare demand of a bank the payment of a solitary thousand dellars of thair notes? Not one in a hundres?
}
the mathis ication of the banking establishments. Long will Pennsy!vania mourn her disrespect of the waming voice and veto of her excellent governor SNYDER-a man whose name I prit in capitals in token of my regard for many atets of his atministration, but especially for his refusal to sign the hili for ïttering banks in.that commonweallh. Bat (an! heaven be praised for it!) we may yet recisce the banks to a proper number-there is a period (1) their charters; sind certainly, laws may be passed, and rebircuprinion, more powerful than the law itself, receive such a direction as to keep them, a: 1 money-shops having the semblance of then, in due bounds. To assist in giving public opinion such a direction, I feel to be one of my duties-as an ho. nest politician who never yet bowed to any shrino? but what was supposed to be that of theirn, and whose knees are now too stiff to kneel to Piutus, whose altars scem ready to supercede those of the MOST HIGH, and certainly are the best attended. I know very well that these remarks will not please soine of the priests that offiriate in the temples of the god of money; but I care not whether they are pleased or not, if the remarks are just; for in that case I can cast inyself upon my own conscience and rest with faith on iny countrymen to hear me out in making them. And further, it should be remembered that I thas aniong the most zalous of all men to support and to the ntmost of my ability did support, the banks in their refusal to pay their debis while it appeared that the co:ntry's go od required it, and cheerfully suffered an exira share of the losses occasioned by the depreciation of their paper. Bat now, in the present altered s'ate of things, when I see specnlators and slock-jobbers and money changers fatted like stall-fed oxen by a sequence of things that was permitted, against law and justice, by the purviotism of the people, it cuts me to the quick that I still suffer, and am so eltraminelied by these that I am compelled to sacrifice (and to them!) at the rate of three or fuur hundred dollars fer annun of my hard-gathered earnings, in disconnts on bank paper, receive.t at par, and as grod, if not better, as that which they have been pleased to fix upon as the standard of value. ar so it is with me that I must allow them whatever they please to ask to exchange it.

The things that are here spoken of are as fiec. ly discussed and as severely reprehended is every privale circle; but so it is thit the raess, which should bring about a reforination of abuset, is su fettered thitit dures not inove in the hus=10 \(\mathrm{x}:^{\circ}\) the speculators form a consideraible part of what the newspaper editors call "their adervtisung fubions," Whose delicate cars inust not be offended, less they witheraw their support! It is thes that tie piess is too generally resuated in our commercial \(10^{-}\)is, and managed us carefilly as if it were under the direction of a royal police. Whip ine suctl servili-iy'-"l'd rather be a dog and bay the menon" \(=\) hd throw my types into the iver and fump in ufireticm myself, that be an editorial slare to such men.

\section*{Historical Sulijects.}

We most heartily approvel the resolution of congress for enyploying Col. Trumbull to execute four large historical paintin s, to repicent as may events in our revolation-helievinis What they would have a pooverful tendency to kep alive the f elings of that glorions period, and be instrumental to vio raising up of a notional character.
- I speak gencrally, for there are a few, (and but very few) honorable exceptions.

An enlightened legislature will always irg. rd thrse things as important, fior they are of countless value in giving strength and efficiency to a peoplt. And, in many ways, they may be considerabiy po moted withort cost, if any are disposed to put dollars and cents in the balance against them; which I am not, if any thing, like moderation is observed We are clearly of opinion that nuch money migh be appropriated to such purposes witin more reu adva:tage, than almost to any oiher.

Ainong the cheap means for effecting those de sirable ohjects, we with pleasure observe the coursi that has bean pursued in regard to our vessels of war. The first ship of the line that we built is cnl Yed the Independence; the seond, Washington; the third, Frunklin; - and the names of our frigates and smaller vessels are, generally, significant and inte resting. There is a use in names-we canniul pronounce the name of any thing without he mind being led to its sulject. E.very man, woman and crith? is, as yet, familiar with the names, and the meauing of the names, just given; but the time may come when the people shall be less so than they are now -and the want of a warm and general remembrance of many illustrious men and most mportan' events, is already to be regretted. Leexington, Bunker'sJill, Saratoga, Trenton and Yorktown, (and names of riaces ought to be preserved as well as those of individuals) with others, would lead the youth of our country o the liappiest enquiries into its his 1ory. Lexington would direct his mind to the begionning of the contest in arins for freedom; and with it he would associate the name of simmuel Adams,* who planned or brought aboit the last ap. peal, which he saw was inevitable, under the mos: favorable circumstaces; and of the brave yankees, who there "first put the British troops to sciool," and t.ught them "th. mannal exercise of heels;" and" desire to see the monument standing there inscribed, "sacred to lhaerty and the miguts of mankind!" and p:eserving the names of those who fell on that occasion. With Bunker's-Fill he would remenber Warren, who died there, and learn to estimate rightly the prowess of a people determined to rescue themselves from oppression. With Saratogut he will feel his soul elevated in the consideration that here a nusuerons and well appointed British ariny first surrendered on American ground, while Gates and Arnold and Stark, and otheis, will rush through his mind, with varions and mixed emotions. To Trenton he wilh travel in idea with Washangton, and partake of the gluom that then overcast our prospects; will track the solliers by the blood from their bad ly clad feet that covered the frozen earth, and his puise xill beat quicker by the capture of the Hes-
- S. Idams did not personally act in the batte, thougit his oold spirit was there. He was convincell that ine tin.e to suike had arrived, -and knew that time was only to be taken by the furelock. He therefore planned it that the militia stiouid be collected, and then intriguerl to liave them attacked under circumstances in which it was probable that the royal troops, wound be worstel; for he was so situated and so closely walched, tat his whole scheme of revolution inight liave been defeated if he had ofenly ace ed to bring about that affair. Tha revoiution, pertiaps, oved nore to Sil:muel and Juhu Adums for its collimencement, thall to any other men in Anerici. They boih possessed juvincurie perseverance, courageous ininds and sound politics. -and looked boidly al isoberanexce before it was dreamed of ty the most of those who aided in accomplisning it.
suns, who und been imported to exterminate the "rebeis," as "ushington and those who acted with him were then designated with the name of dorktrwon how must his pariotism be ronsed! her was tile ending, as it were, of what had heen heguin it Laxington; a second British army surrenderel, and "the most nobie marqui Cornzeal'is" d-livers his ssrord to "MFister" Washington, as the Rritis'। called him until after that memorahle event; and he will partake of a part of that feeling that led a ve. nerable friend of mine, resident in Pisilatelphia, to rush from his bed into the street, in his shirt, when he liearst the honest butch watchmen call out"Bast iloo o'glack, and Gonnwalis is daken." But where am I? I had forgot that I had taken up the pen simply to introduce an extract or tho from some remarks on the proposed paintings in the "Examiner," a late london newspaper.

Comirnending che procedure, the editor says-
"And how inuch tonger will England turn her back with stupid ap ethy against all propositions for he public comme.uoration of great events lyy histo rical painting? Has she nothing worthy to corninemorate ? And even now, when there is an opportunity to employ the genius of the country to illustrate its greatuess by pictures in the Waterloo and Trafalgar monuments, it is on the point of being decided that a senseless column, and a nore senseless tower, are the most fit oljjects on which genius can display itself to illustrate such great evelits."
"The Ainerican congress hare done themselves :nomor by their energy and decision; and if they wish to do good to their country, they must not end here; they must not be coutent with one vote of four pictures, but persevere and adorn in succession all their public buildings by successive votes, so that the young Anerican artists, studying in this country and in others, may go on with the glorions certainte of being emploved, if they display genius on their return home. The American congress have done more for the arts of Americ., hy the conficlence this single vote will give, than if they had founded ac:ademies in every town, or sent one hundred stus dents to Europe for improvement. Success attend their energy and sense! Not all the examples in France and in Laly, to which our nobility crowd for refinement, and where every church and hall and ;ublic buiding is filled with pictures, have ever had the least effret !"
"Not all the advice, not all the entreaty, not all the arguments, of all the enlightened purt of tic commtry, have ever had the slightest effect on the British government to protect painting; and now Americ., with a foresight and energy worlhy of Greece, has set them an example, it should have been their glory to set her."
[He then goes on to give an account of the want of putron dge io British artists, and details the privauons and difficulties they have encountered to live, \&c. which, housh interesting, is foreign from our present purpose and omi.ted.]

\section*{National Law Case.}

\section*{Decision of the hon. Langidon Cheves, in the case of} Andrezo R/odes, deliverell at Chumbers, on a worit of Hub~as Corpus and Subjiciendum.

\section*{EXP.ARTE-INDRE W RHOIES.}

The p:isoner is brought befire inc, at Clambers, on a writ of Habeas Corpmes ad Subjiciendum, and the officer in whose custody he is, extibits as the athtiority by which he detains him, a warrant of conmitment under the hand and seal of John Hinckley

Mi chell, a jastice of the peace of this state, whit cluys that the prisoner hath forged or cunnterfint ed number of purfec ions for 1 merican seamen. I \(s\), it is bulleved, is in uffence agrainst this strit: \(h_{f}\) is an offence against the law's of the U.ited Silles.

I am cailed upon, on the part of the prisoner, to dicchacge lin from cus ods, 'inler this warr:th, be
 the thite, 1 it is co tentel, the matristrate who ch rint thitho beins an offiret of the state, had mi ant uriv to conmit him for an offence anginsi th. [lited Siates, becanse the \(33 \cdot 1\) sec ion of the
 terns aythurizes such commi'ments is unconstitutional.

If is contendel:-
1st. Thi by the lsi secion of the 31 article of the constitution of the IJvited States, "The judicial poxer of the \(C\) ite.l States shall be veste \(i t i=\) one supreme coliry, all! in s'ich inferior courts, as cong!ess shall, firm iime to tine ordain a ad evtablish" -and that this judicial power in criminal cases is under the constiuntian, exclusive of the au hority of the -t les:
2d. That the act of granting all warrant of commitment is a judicial act, ant therefore, in cases under ille fiws of the United Siates, 10 b mxclu sivelr performed by an officer of the L'itev Stztes:
Sil 'Trat it is my duty as a juclge of this state, und: the lfaseas Curpus act, ta t.ake cognizance of this case on the grownd stated
1st. All these questions are important and difficult; and the first is of peculiar importance. It his heen a controver:ed question from a period ante. rior to the stop ion of the constitu ion of the UnIied States, atio slill remuins unsettled, and I am Jappy to be relieved by the upinions I have formed on the uther questions, ulich the case presents. firm the leces ity of deciling this.
21. Is the act if ?rantigg a warrant of commitment a juc!icial act?-I think it is not. I sm aware of a late decision (the case of Josepli Almeida, in Maryland) in which this question has been deterinmed in tife affirmative. In this opinion I cannot concur. The only authority which is relied upon to support this opinisu, is a single expression contained in the decision of the supreme court of the United Stares, in lie case of the United States vs. judge laurence-(3. Dillas' rep. 53.) This all. ihority, it is cudent, has been misconceiverl. That was a case in which, tuder our consular convention with Prance, judge Iaurence, who was then the dintrict ju.Ige of the United States for the district of New. York, had been required, hy the vice-consul of the F'rench republic, to sisue a warrant for appre hending captain 13 arre, commander of the frigate 3.e l'erdris, belongigg to the french republic, as a deserier. The judge was of opiniom, that hefire the warrant could issise, the consul shoutel prove by the reginter of the ship or roll d'equipage, that captain \$3arrewan one of ilie crew of the l.e Perdrix. 'The consul nfieret other pronf: but the judge thought this imlispensable: wherenpun an application was male to the supreine court for a mandamus, to compel the jinige to insile a warrant. The court, in deciding ll.e case, refised the mandamus, antl ing giving theur reasons, say-"it is evilent that the district judpe was acting in a judicial capacity, when he determined that the evilence was not suff ficient to authorize lis issung a warrant." It in tery inatifest that it is to his jurggment on the evi. defice the court allude, when they say he was actol
(ing in a juliciul capacitr. and for that reason they refise to issue a manrlamus, and founding their jial ment on this distinction, wey virtually declare, 1) het the grant is a warrant of commitment is not a je licial act. I am aware it my be said, as all comarioments must he foumled on some cuidence, in all cases of rommitment a judicial act m'tst be per. for ned. Where is cert ainly an opinion to be formed On the nature ar 1 sufficie of of the evilence ad. tuced; bu if such an exprise of the mind be a iulicial act, then almost every function of all the inferiur ufficers of justice will he judicial, and even conslubes, who have, in certain cases, the power of comminment, will be judicisl offisers. Tlis is prep s erons. There mist he some more correct view of the subject, and to siotain it let us resort to anthori ies. Our ubject is to ascertain wherlier the function of a justice of the peice, in granting a warrant of commirment, be juticial or ministerial? It is not de:ned, that a justi-e of the peace does prosess cer'ain judicial powers, but it is denied that the granti is a commioment is a judicial act. We must carefully distingruish between the original duties of a justice of ee perce and those which huve been subiequently imposed upon him-l'he firs. constituted lisn merely a conservator of the pe ce-the latter have made him a judicial ufficer -the first uthorized hin fo apprehend and com. mit iffinders-the iatter, in many cases, h.ve conferred upon him the power to try and convict.

Sir Wiilia n IBlackstone. ( 1 coni. 351) after speak. ing of the occasion of the first appointment of these officers, says-"It was ordained in parli ament that for the better msintaining and keeping of the peace, in every conntry, good men and lawful, which were no maintainers of evil, or barretors in the country, should be assigned to keep the peace: and in this manner, aud upon this occasion, was the ciection of the conservutors of the perace taken from the people and given to the king: this assignment being construed to be by the king's commission: But still they were only conservators. wardens or keepers of she peace of trying felonies, then they acquired the more hono. rable appellation of justices."
"The power, office and duty of a justice of the peace depends on his commission, and on the several statules which have created objects of his juris. diction. Ilis comınission first empowera him singly to conserve the peace; and thereby gives him all the power of the ancient conservators at the common law, in surpressing riots and affrays, in taking sccurities for the peace, and in apprehewding and commisting felons and oflser criminals." (id. 353,354.)
Who are these conservitors of the peace who possess the same authority to commit as juytices of the peace? Arethey julicial officers? Among others, slicriffs are conservators of the peace - "Constables, ti:hingmen, and the like, are also conservatars of the peace within their awn jurisdictions; and may apprchend all breakers of the peace, and commis them till they find surctirs for theirkecping it:" (Jacob's law dict. lit. Conscrmator of the pecace, vol. 2, 1, 26) "Conservhtors of the peace did commie at conmon law, and it was inculent to their nffice, as it is to the office of justices of the peace who are mot authoriscd by any express words in their com. inteston, but du 11 , tinfture officie," ( 15 Vinar 8 \%it. "justices of the peace."
"It seems that the power of sitel) conservators of the peace, whether by tenor, elcction, or prescrip. tion, was no greater than that of constables at this diy, umless it were enlurgeri hy some spectal grani or prescription-(ibid 4.)
"Holt. ch. I. said he knew not whetber, at first, justices of the peace were more than high constables; but the statute that made them complete judges is that of 34 Ed. 3."-(Ibid)
Lord Hale, in his analysis of the law, after having said that there are two kinds of subordinate civil magistrates; those that have a power of juris. diction, and those that are without jurisdiction, says:-The persons that exercise this power, or furisdiction, are called judges or judicial officers," (sec. 11, p. 25, 27;) and in sec. 12, "of inferior majestrates sine jurisciictione" - (p. 29) he speaks thus: "The sheriff of the county is the greatest minis terial officer; and I call him magistrate because he is a conservator of the peace of the country, \&c. \&c. \&c." "Constable and head constables. These, though they have not any jurisdiction to hold cosni zance of any fuct, yet are conservators of the peace."
Dr. Sullivan in his commentary on inagna charta, speaking of the warrant of cominitment, says, "Thirdly, the warrant must not only contain a lawful cause but have a legal conclusion, and him sufely keet until delivered by law; not until the party committing doth fisther order-for that would be to make the magistrate, zuho is only ministerial, judiciu;, as to the point of the liberty of the subject" (2 vol. Lectures on the constitution and laws of England, p. 266.)

I presume I have now established beyond all doubt, that the act of the magistrate, in granting a warrant of commitment, is a ministerial and not a judicial act. It may be useful, however, to spend a moment longer on the nature of that judicial power which is spoken of in the constitution.Hhere are functions to be performed by inferior magistrates, commissioners and other like officers, which leave in them a discretion, which in that particular, resembles judicial authority, but is not of the nature of that judicial power which forms one great branch of government. It is the latter, winich is spoken of in the constitution. It is that which lord Hale defines to be "a power of jurisdiction," and of which lie further says, "the persons who exercise this power or jurisdiction are called judges or judicial officers; the places or tribunals wherein they exercise their power, are called courts; and the right by which they exercise that power is called jurischetion." (Analysis, sec. 11, p. 26, 27.). He then goes on to enumerate the superior and inferior courts of England, and gives us a clear and distinct idea of what may be embraced, and what is meant by the 3d art. of the constitution on this point. They both mean to speak of trial, judg. ment; emplatically of the administration of justice, and not the little functions and functionaries, which are merely incipient and ancillary to this great essential power, which are inseparably incident to ir; and can with no propriety be called implied powers.

If it has been proved that the act of the magistrate in conmiting an offender is a ministerial act, then the ground on which the counsel for the prisoner has put this argunent, wl:ich is the same relied upon in the case of Almeida, though he has enforced it with ability and eloquence, entirely fails.

The only question that remains is, whether the legislature of the United States las a right by a staiute furbidden by no provision of the constitu. tion of the United States, to give a limited authority to conserve the peace to one or more of the citizens and subjects of the said United States; who happen at the same time to be conservators of the peace of the state? If not forbidden by the constitution of the United States, what other power can furbid
it? That constitution expressly forbids all it does not authorise. If not so forbidden, the statute is the supreme law of the latid. All the minor arguments of expediency, such as blending jurisdictions, neglect of state duties, want of responsibility and others of the same descriptinn, are of little weight in themselves, and are not for judicial, but legislative consideration. Throughout the whole system of the government, the legislative, judicial and exccutive functions of the union and the states are blended; the responsibility of the citizen is diviled, and duties to the states are superceded by duties to the union. But what then? Is it for judges, therefore, to say, they deem them inexpedient, and because they deein them inexpedient declare them void? I will not say that expediency shall be always rejected in a judicial judgment on the meaning of the constitution, but it will seldon be a very weighty consideration, and ought always to be used very cautiously. But I think it higinly expedient, that congress should confer this autho. rity on the ministerial officers of the states. It is as useful to the states as the union, that the crimes against the United States should be punished. Their intercsts can seldom, perhaps never, be wisely separated. The crinies punishable under the laws of the United States are great and important, but few in number. With out the aid of the ministerial officers of the states, to have the laws of the United States effectually executed against a few offenders, (probably not one hundred in a year in all the states) it would be necessary to appoint and scatter over their vast territory many thousands of justices of the peace, coroners, constables, \&cc. The attempt to execute the power, would be as impracticable as it would be ludicrous. But it is said the states are to watch with jealousy the acts of the general government, (a monstrous heresy in the politics of this country) and if it use the agency of the officers of the states, it will have a tendency to a consolidation of the state governments.
Exactly the reverse is the sound conclusion. The necessary dependence, practically, of the general government on the states, in many particulars, is one of the points in which its weakness las been most obvious and most lamented.

The counsel for the prisoner, taking it to be granted or proved that the act of the magistrate was a judicial act, contended that the constitution had established a mode in which all judicial officers were to be appointed, and that an act of congress, giving authority to the magistrates of the state, was a violation of this provision of the constitution. It would not follow, however, 'if the function were judicial that the appointment must be made by the president and senate, for the constitution authorizes congress by law, to vest the appointment of such inferior officers, as they think proper, in the president alone, in the courts of law, or in the heads of departments; but the function is not judicial; the officer, consequently no judicial; and therefore, the argument, as urged, does not apply. But it may, perhaps, be insisted that though the constitution does authorize congress by law, to vest the appointment of inferior officers in the president alone, in the courts of law, or in the heads of departments, it cloes not authorize congress, though both houses and the president should unanimously concur, itself to appoint immediately by law. This would really be construing the constitution like an old pleading, without allowing the benefit of the statutes of Jeofails.-Qui cadit a syllaba, cadit a tota causa. A rational construction, it would seem, would authorize congress to do itself what
it can, at its pleasure, authorize an inferior bo's or an individual to t!n; but that is not the question. It may be safely admitted, that congress cannot directly by law appoint an officer whom it can autho rize an individual to appoint, and yet the diffeculty will not occur in this case. This is not the case of an appointment. The magistrates of the state are not, by the act of congress, constituted nfficers of the United States. They are merely authorized 10 do a certain act. The case may be easily conceived in which a magistrate of a foreign state may by act of congress, be authorized to exercise ait equivalent power. That it is not an appointment in the sense of the constitution, will be proved by reference to the undisputed practice of some of the state governments.

The constitution of Pennsylvania provides that the governor shall appoin: justices of the peace(art. 5. sec 10) and that they shall be commissioned during good beliavior. 13ut by an act of the le. gisluture of that state, passed 20ti. March, 1810, all the prowers of justices of the peace are vested in all the aldermen of the city of Philadelphia-who, 1 believe, are elected annually by the people of that city.

Sn, in New-York, justices of the peace are appointed by lse governor and council, according to the express requisition of the constitution, and hold their offices during the pleasure of the governor and council. But by act of the legisiature of that state, (2 vol. Laws of New-York, 508,) the aldermen of the cities of New York, Albany and IHudson, are vested with the same powers as jus.ices of the peace.

By the constitution of South Carolina, justices of the peace shall be nomitated by the senate and lrouse of representatives, join. ly, and commissioned by the governor ( 1 13revard 468,-2 B"evard 175). lit the clerks of the courts, the wartens of the city of Cliarleston, and many other officers of the state, are vested by act of the legislature with the pewers of justices of the pesce. The like case prolrably occurs in almost every state of the union, and the argument of unconstitutionality which we are now examining will equally apply to them all.
I am then satisfied that in relation to the case be fore me, the 33 ll section of the act of congress, commonly called the judicial act, is constitutional and expediant, though I reject the argument of expediency, from the grounds on whic! I rest my decision. It is not a case in which 1 bave a right to weigh it.
31. I might here leave the case, hut I deem it proper to consider the itsird ground. I think thave no jurisdiction over the case. I ati aware of but three cases in which this question had been made. The case of Almeida already mentioned. The case of F. namuel Roberts, ( 2 , Hall's law journal 192) in Mnryland; and the case of Jeremiah Ferguson, in New. York, (9, Jolins. rep. 239.) In the first case jurisdiction was assumed and the pritoner discharged. The second was the case of a minor enlisted in the service of the Thited States, and Nicholson, chief judge, determined against the jurisdiction. He does, indeed, say, in speaking of all extreme case which was put by counsel, of great oppression and injustice, that he would interpose and discharge the prisoner in the case supposed, but he adds-"If in such a case I should exceed the technical limits of \(m y\) authority, I should have the approbation of all goot men, for resisting oppression unler the culour of law." This is certainly no argument in favor of jurisdiction, while the judgment in the case is on the want of it. In the last case, which was also the
c.se of a minor who had been enlisted, the court refused to interfere on ohber grounds-but chief justice Kent declares explicitly, that the state courts hive not jurisdiction where the arrest is under the authority of the United States. In this opinion I concur. If there be cases in which the state courts have jurisdiction of the principal matter, I am of opinion they may entertain an incidental or collateral question-they may, therefore, in such cises, release under a writ of habeas corpus on the ground of illegal confinement, because the prosecution is gromndless, or for other sufficient cinse. This authority may, perhaps, be exercised by courts having a superintending power, though they may not have juristiction for the purpose of trial, for they have authority to restrain and annul the acts of inferior jurisdictions. But in a case like the present, where the state courts in no ease and under no circumstances, can take cogrizance of the offience charged, to punish or or acquit, and where the functionary appealed to, is himself in all questions under the laws of the United States, subject to the controul of their high tribunals, all pretence of jurisdiction seems to vanish. I cannot, nor can all the judicial authority of the state, discharge a defendant in a civil suit who has been held 10 bail in the courts of the United States, however illegal the ar. est may be, because 1 liave no jurisdiction-and yet it is seriously imagined that I bave, at my Chambers, authority to take their criminal jurisdiction, which is, by their laws, cxpressly exclusive out of the hands of their tribunals and to determine the acts of the national legislatrre, unconstitutional and voin? Nay more, in this state any two justices of the perce, one of whom shall be of the qunrum have anthority to carry the 1sabeas corpus act into execution, and have on the subject all the authority I enjoy. Thev, too, then, have a right to determine on the constitutionality of the acts of congress, and to release those who are amendable to the United States in their criminal courts. But the pretence for all this is, that the liberty of the citizen is to be preserved inviolate. Is it meant by this, that he shall be exempt from all the usnal moden of trial instituted for the preservation of that very liberty? That the march of justice is to be divested of every thing staid and snber? That instead of her solemn and learned judgments, we are to have pie poulle expositions of the great act of our national union? But agaimst whom do we seck this protection? The government of the United Siates, the government of the people themselves, whose greatest power, retums into their hands bienally, and all of it at short intervals. A government as able, as much bound, and no doubt as willing to protect ule citizen as the governments of the states. A government, which has its habeas corpus act and its judses bound under tie inost solemnsanctions to execuite it. A government to which the states constitutionally look up for the preservation of the ir fiee institutions. That jealousy which we sometimes see recommended, is had law and worse policy. I deny that it is inculeated by a true umberstanding of the constitutions of the states. That it is necessary to the preservation of state rights or that it can conduce to national happiness, or national greatness. It may make us bins aboui some little factious privileges which are in ino danger. But a regulated liberty, under the protection of stable institutions, will be best and longest secured to 115, by repardugg the government of the union in a spirit full of confidence-in a temper devoid of jraza spirit
lousy.

Finalls, 1 am of noinion I have n juris liction of the case: Let the prisoner the remanded.
Fawarn P. Simovs, esq. coimsel for the prisoner.
Gromas Parkbib, esf. fir the United States.

\section*{Legislature of New-Hampshire. GOVE?RNORS MESSAGE.}

\section*{Gentlemen of the sunate, and}

Gentlemen of the house of remperntatives,
In obedience to the pmblic will, I have arain accepted the office of chief inasgistrate. I senstbly feel and frankly acknowledge, the obligation my fellow citizens have conferred upon me. They have made it my duiy to promote their interest, by devoting my time and my talents to their serviee. If these can secure their approbation, my official conduct will not, I hope, disappoint their reasonable expectations.

Though the United S:ates enjoy peace and security; though their government is administered by ablé men, who possess the confidence of the people; yet they as a nation, and we as a state, have difficultios to surmount and embarrassments to remove. The great change which the European world has recently made, from war to peace, has very materially affected us. The nations in that quarter of the globe being now at peace with each other, have revived, and rigidly execute, their former colonial system of excluding other nations from a participation with them in the commerce of their colonies and dependencies. We are not only deprived of the carrying trade of Purope, wheh during their wars trats a source of immense wealth to us, but the subjects of those nations now obtain a portion of the transport even of our own produc-tions.-This change has not only greatly depress. ed our commerce, but injuriously affected our agriculture and manuf.ctures and extended its effects to almost every class of our citizens.

In New-Hampshire the balance of trade is against vis. Our imports from foreign countries and froin the southern section of our own country, exceeds our exports.-This order of things must necessarily drain off our money, and tend in produce a state of dependence on other nations and other states, in. jurious to our interest, and dangerous to our freedom and independence. For it is with a state as with an individual-he that continues to buy much more than he sells must be involved in debt, and sooner or later become poor. We may increase the number of our banking institutions, but they will not increase our wealih-the precious metals will be sent to other countries to purchase goocds-we do not want, or such as we can make ourselves. Fur these, evils, we may apply a gradual, but effectual remedy; hy the increase of agriculture and of manufactures.

We are by nature formed for an agricultural and manufacturing state; and our habits and pursuits ought to conform to nur situation. An improved state of cultivation would render our lands more fertile, our people more wealthy, and our country more independent. The constitution has made it our duty to "promote agriculture;" let us perform this duty with a zeal proportionate to its importance. Our improvements, compared with those in a neighboring state, are few and inconsiderable. As individual members of society, we may do much to convince our fellow-citizens, that it is more for their interest to cultivate the lands they now possess, than increase the number of their acres; and to devote their attention to those branches of agriculture, which are best suited to our soil and climate.-

I'ul.g. the last year was un'arorable to the production of so:ne k \({ }^{2}\) ind of bre.d s suff, we may with confidence expect mare favible seasons; that "ceed time and harvest will continue"-and that "he that tilleth the land shall have plenty of bread."

But a state wholly agricultural cannot long exist as a free and independent people. A foreign mantu facturigg nation will soon impoverish, and then reduce it to dependance on them, as servile and degrading as that of colonies. Hence arises the neeessity of our affording aid and support to manufactures. We are as able to make our own clothing as to raise our own food; and we ought not to dcpend on foreign countries for either. It is to household manufactures that we must principally trust for our supply; they bring to the general stock of wealth the labor of the people; their industry affords aid to the larger establishinents; and is a constant and certain source of wealth in the nation. The increase of manufacturing establishments not only enriches the farmer, by opening a inarket near him for his surplus provisions, but retains at home the wealth of the community by preventing its specie from being sent abroad for the goods they manufacture.

If our object is to promote the real prosperity of our country, we must patronize agriculture and manufactures. They are the main pillars of our support; and on them we inust depend for our wealth as a nation. If we cherish these, they will mutually encourage and support each nther, and the wants of the people will be supplied from their own industry. And let us never forget, that labor is the real source and fountain of wealih; and that the rich equally with the poor, are not only "fed from the field," but clothed from the manufactory.
For the protection of our trade and navigation we must depend upon the government of the union, which has the exclusive control of this branch of our affairs. There is reason to hope, that their present unfavorable state will not become permanent; and that the activity and enterprize of our citizens, which heretofore have been so successful, will in due season, again enable them to acquire their accustomed share of wealth from foreign commerce.
Though I have not obtained a final adjustment of the claims of this state against the Uni ed States, for military services during the late war, I have recently received on that account, a draft from the treasmer of the United States on the cashier of the New-Hampshire Union Bank, for twelve thousand dollars, which I delivered to the treasurer of this state, who has received the money for the same.

The treasurer's report will exhibit the state of our finances, and enable you to determine what tax will be requiste to raise for the year ensuing. Among other appropriations, it will be necessary to provide for the building and finishing the state ho:1se.

Oup laws subject buildings and unimproved lands to taxation according to their real value. But in many towns, this kind of property is estimated greatly below what those who make the appraise. ment consider its actual value; by this means the taxes become unequal, both as it respects the proportion to towns and individuals; and they fall heavier on other property, and particularly on the poorer class of the people. To remedy this evil, permit me to recommend a revision of the law on this subject, defining more explicitly the duty of selectmen and assessort.

The law requires the cashier of each bank, on being requested, to inform the selectmen of the names of the stockholders living in the town to

Which they belong, and the amome of stook, in order that the owners may be taxed for the samme. This nomede of obtaining information is a: tended wi l difficulty and expence, and the practice under it operates uncrually, as the selectmen of some town: apply and tax the stockloderes, but others neglect it. I theref, re suggest, for your consideration, whe. ther more correct information would not he ublained, and at less expence, if the cashier was requircd (1) make out the name of each stocklowlder, his place of residence, and the amount of his stock standing on the books on the first day of A pril, an nually, and transmit the same to the secretary of state, who slomild cause it to be printed in the newspaper in whiclh the non-resident taxes are published, on or before such particular day in April, a. mally; and that the selectmen should tax each n rson living in their towns agreeably to such return.
A) tuxes are indispensably necessary to support governument, as every man in the community is bount! to contribute in propurtion to his taxable property, it is our duty io rendir them as cqual as the mature of lijngs will permit.

The senace of the United States have recently divected the stcretary of war, to report to them at Lieir next session, the laivs of each state relative to the miii la, protably with a view to revise the laws of the union upon that subject; and as the laws of ombgress must control those of the state, I submit the gurstion to your consideratiun, whether it will be requisite at this time to revise our militia laws, as propnsed at the last session.

Though we are now at peace with all the world, (and it is of vast importance to preserve it,) yet col silering the state and condition of Europe, their jew oisy of our growing importance in the commu. ity of nat ons, and the history of former times, we cainot rationally, expect to be altogether ex. empted from the evils of war, which have so frequently visited mal:kind. Sound policy therefore re. \(7^{\text {nirres us, in time of peace to prepare for war; and }}\) it is our duty at all times, carefully to attend to the instruction, discipline and equipment of the militia, which when well regulated is our sure dePeice, and in a great measure will supersede the necessii y of a large standing ariny in time of peace.
Sultier our constitution or laws, declare the tenure by whelh registers of probate shall hold their offices; nor the mode by which they shall be vendial, when they either become incipable, or neglie' performing their duty. I therefore recom mend oyetre c msideration, the propriety of passing a lav deffining the tenure of their office, and establiving the nather in which they may be removed therefom, whent the public intereat shall require it.

Gmushles, vherions and triviul prosechtions, are romenime conmenced and carried on in the name of the siste. Wiich nulbject the county where they ane prostaned to the payment of large Lills of rost. In wind of these, the prosechtor makes use of the inan firl ties state as ant engine to gratify hit ecwemge on tif acelivel, more than for the purpoie if collontios sid punishing those who lave viulated the loy. if liese prosecutions, judhese
 fulk mat whi hr cruartotof 11 appecars to me, thint the Erthadyas iflie hax mould be more effectumbly olnaiks Sit withony pas given to the superiur coits of juitloymer wir taly in allow the fill costs uawity iovef in all crimimal prosecut.ons, but to redece tion watl yum or allow lio consts al all, as
 and soder criceriad io unce ehtiet complainsuls
in such cases as they may corisider groundless, vex::inus, or trivi:.l.
fin a varieyy of cases, where penalties and forfeitures are annexed to the breach of particular stadules, authority is given to any perion to prosecute for the ssime; one inoisty of which is to be for the use of the prosecitor, and the other for the use of some county, town, or other corporate body. lustances have occurred, where the prosecutor has conpromised the suit with the defendants and thereby prevented the corporation from receiving its moiety. Prosecutions of this kind may be commenced by collusion between the prosecutor and defendant, and coutinued from term to term, till the right for any other person to commence a suit shall be barred by the statutes of limitation, and then the prosecution be disinissed. To remedy these evils, I recomamend that a law be passed subjectiug all persons who commence quitam prosecutions, and settle the same, or consent to their being dismissed, without the moiety due to the county, town or other corporate body being first secured, to be themselves liable to pay the same. To render this provision more effectual, it may be advisable to authorize the courts of law, where it shall appear that collusion exists hetween the plaintiff and defendant, to notify and permit the corporation which is entitled to the other moiety, to appear and carry on the prosectation.

The present mode of settling the maintenance of paupers, is attended with considerable delay and great expence. It merits the consideration of the legidature, whether our laws, on this subject. may not be so amended as to remedy, in some measure, those evils, and at the same time ensure justice to the parties litigant.
The United States require their officers to make accurate returns annually of the amount of salary and emoluments that they receive from their offices. If a similar return was required of certain officers acting under the authority of this state, I think its effects would be beneficial. It would not only tend to currect abuses, but afford useful information to the legislature in regulating the future compensation of those officers.
As Mr. Carrigain, acting minder the authority of the legislature, has recently firnished the state, at great expence, with a map of New Hampshire, which is not ouly elegant but splendid, permit me to suggest for your enquiry, whether we have made him such a compensation as is adequate to his services and expendi-ures; or such as will entitle us, in the language of the constitution, to be considered as the patrons of science and the usefut aris. F'roun a careful investigation of this snbject. Ithink it my duty to recommend the case to jour favorable consideration.
We commence our respective duties under cir. cumstances fuvorable to the fuithful discliarge of our important trusts. Ac peace with all nations, and enjoying without restraint the fruits of our own ind uistry, and the rich inheritance of our fathers' toils-knowled ge, freeclon and independence-we have it willin our power to command as great a portion of uational nol individual happiness as ceer fill to the lot of any state or nation. It is from Uie fatal eflicets of party spirit, depraving the morals wind perverting the understandings of the people chat we have most to fear, either for the stubility of our government or the larmony of its coumcils. With the exceptions of those interested individuals, who look rather to party than to their inerit or public services for preferment, atal who owe their clief importance to the angry phisions and pura
ty feuds which have too long distracted hicse si-. cs, the great body of the people seem disposed to judge of the proceedings of their government with candor and hberality. They feel the important iruth that moleration is wisdom: and though differing in their views and means of judsing, they are inclined to consider all honest politicions as having the public good for their polar star. We cannot rationally expect to extripate party spirit altogether; a portion of it seems requisite in a free government io excite public vigilance, but we may do much, \(2 s\) legislators and citizens to control and circumscribe its pernicions effects, and to banish from the community that illiberal and malignant temper, which ascribes the best actions to the worst inotives and influences us to impute an evil design to those from whom we differ, even where we cannot withhold our approbation from their measures. A dis. position the reverse of this ought to prevail Conscious of the purity of our intentions, we ought to consider others as equally honest, though they may be mistaken in their views. Such enlightened and liberal sentiments, tend to unite the people with their government, produce harmony in the public councils and dispatch in the public business.

In all our proceedings, let us cherish a spirit of moderation and harmony, of vigilance and fiugality, and be emtalous to advance the real interest of vir constituents, that we may effectually oftain the the end for which we were vested with authority.

WILLIAM PLUMER.
June 5, 1815.

\section*{Foreign Articles. england, \&c.}

It is observed, by the editor of the Columbian, that in about 60 years 1100 miles of canal have been cut in the British dominions. Some of these are "great and glorinus works."

The wife and five children of a man who lately emigrated to the United States from Ireland, being on board a vessel (passage paid, \&cc.) for the purpose of joining him, were turned ashore to starve, unprotected, because they could not produce a certifi. cate fiom the clergyman and resident magistrate that they were at liberty to emigrate!

Fhayce.
A merchant ship, of 300 tons, is fitting out at Havre de Grace fir Calcuita, which "makes a great noise in the papers." The French shipping revives very slowly.

\section*{seate.}

The ordinary rerenue of Spain is given at \(48 \mathrm{mil}-\) lions of dollars, and the amount derivable from all the colonies is estimated at 12 millions more; together 60 millions. But the latter has fallen off very much; the full amount is far below the cost of the peace establishment, and the people have no coufidence in the public securities. Hence the treasury is always without money.
A Madrid article of April 3, says-"Whole bands of robbers infest the neighborlood of this ciry. All the neighburing villages have troops stationed to prevent their depredations. Great exertions are made to prevent the evils which attend peace. Our bovernment has news from Mexico and Perlu, but nothing transpires. Orders are given for troops to be sent out."

At the date of our latest accounts from Cadiz, it was believed that Barcelona was in a state of insur-puction-that general Lacy was assassinated, and that the mob had mutilated ali the friars-unmannisg them.
italy.
We learn from Rome, that the pope and the Encrlish, in alliance, are interesting themselves for the excrcise of the Catholic religion in Turkey !
I is said the British have excited as great dis. contents in Sicily "as they have in India!"

We have a rumor of an intended "sacrilegious" attack upon the person of the pope. Particulars not stated.
A paragraph dated Naples, April 5, mentions that very interesting discoveries had lately been made at Pompeii. Near the temple, a rectangular public edifice, of 260 palins in length and 120 in bread:h, with a portico of 50 columns in the interior has been discovered, and in it several remarkable pieces of statuary and other works of art. It is hoped that this enclosure may prove a productive mine of objects of art.

\section*{netherlenns.}

Two thousand Quaker Ifoilanders were about to sail from Antwerp for Philadelphia. One ship with 350 of them had actually left that port destined as stated. These emigrants are probably wealthy.

1500 persons were also embarking at Amsterdam for the United States.
A vessel has arrived at New-York from Amsterdam with \(100,000 \$\) in specie and 288 pipes of gin.

\section*{swenes.}

The coasts of Sweden are closely watched to prevent the entrance of "unknown or suspicious persons" into the kingdom!

> AUSTRIA.

A very active correspondence is still carried on between the courts of Vienna and St. Petersburg. tunker.
Troops are marching from Constantinople-the fortresses of Romelia are supplying with men and provisions. This would lead us to suppose there is some probability of the long talked of war with Russia.

Ancona, April 6.-A vessel has arrived from Constantinople which gives us a very satisfactory account of the disposition of the Sublime Porte in regard to the Christians found in the provinces of the empire. They report an order addressed to the Pacha of Jerusalem, which is quite new in the annals of Ottoman policy. The vexations of this Pasha having excited just complaints on the part of the Christians, the religious orders deputed to Rome a proper person to make known the situation of the church in these countries. His holiness has had new's that his efforts for the peace of this church have been crowned with success, and that the Pacha had promised not ouly to protect the pilgrims, but to restore what had been extorted from them. The order was, "Hearken diligently, Pasha, it is thy master speaks to thee. The complaints of the people have reached my ear, and demand vengeance.-Thou bast abused thy au. thority to exact tribute of the Christians, beyond that which the treatics have fixer. Do what I order thee. As soon as thou receivest my command, instantly restore what thou hast extorted, lest my anger rise against thee. If thou doest delay to obey, expect the chastisement due to thee. IIumble thyself under the command, and say in thy heart that thy master is like God, he can have mercy and forgive thee. Praise, praise, praise be to God!"

\section*{CAMADA.}

The Boston Chronicle notices a new rap of Ca nadla, published by col. Bouchette, styling himself "surveyor general of Canada," which very modest-
ly takes in many millions of acres of valuable territory which we always thouglit belonged to the United States; wholly excluding us from any com munication with the river St. Jolin's. But the commissin ers under the treaty of Gilient are about to estabiish the lines.
Many vessels have recently arrived at Quebec. We have terrifying accounts of the dangers and sufferings encountered in their passage tip the guiph and river St . Lawrence, in consequence of meeting vast quantities of fluating ice, ald froun excessive cold. Some of these vessels were statimary in the ice on the \(14^{\prime} \mathrm{h}\) and 15 th of May! The Quebec editor gives it as his opinion that from the very unfavorable change of the iemperatire of Canada, it will be imprudent to sail for the St. Lawrence before the latter eud of April or the 1st of May!

\section*{west indyes.}

Several transports with treops have arrived at Barbadoes from Eugland, as it is said on a secret expedition.

It appears that many of the planters are retiring from the Bahama islands to St. Viucent, \&ic.

> mexico.

Certain communications from persons high in authority in Mexicn, intended for the use of Ferdimand's ministers, have been diverted from their destination by one of the patriot privateers. They are interesting as sliewing the progress of the revolution, and as leading us to its probable result. Either party is deticient of military supplies, both want energy, and the war drags heavily on. Yet, says a letter from the archbishop of Manochoan, "ulnost the whole population gravitates towards independence; und wit at last overturn us by its osm mere zoeighe" I dashing spirit like gemeral .Hinu (who is now about to take an active part in the affairs of Mexico) supported by a few men of energy and talents and tolerably stipplied with the muntions of war, would accomplish the revolution in a very few weeks.

It appears also by these despatches that there is a grea: falling off of the royal resources in Mexi-en-100,000 persons were formerly employed in the mines; now there are but 20,000 , and the coinage of the mint has of course decreased-yielding at present only six millions of dollars, per annum. The internal taxes do not yield one fifth of their former amotht; the tribute formerly paid to the king is refused; ty thes are no longer depended up-on-out of 50 dis ricts under an archbishop, 37 are in the hauds of the putriots. Much of the plate of the clurclies has been melted up and applied to the king's purposes, \&c.

Dr Robertsun says that the republican force of Mexico is cightsen thousund strong, well organized and disciplined-that they occupy the heart of Mexico, and have an extent of territory that contains a million of souls. That they have a congress regularly elected, after the manuer of that of the t'nited States, and want nothing but a supply of arms to give them immediate success.
sot'til amsmea.
The royal governor of Angustura, a place of con. siderable impuriance on the Ononoco, it appeturs hal plotied to deliver up the place to the pariots under l'ar, which was discovered six days before it was ripe for execntion. In constyuence, he was scized, and put in irons, to watt the decision of his fate hy Morillo. Several of his aocomplices had been put to death in a summary way.

In consequence of these events the royal general Morales with a considerable body of tronp-, achanced for the protection of Allgustiva, beselged by the
patricts. He attacked and defeated them; but they rallied again at the distance of six leagues, where it was said they were again attacked and beaten by Morales.

In the mean time the royal commander of fort Guiana (Saruti) having lieard of the arrival and success of Morales, sallied out and attacked the patriots under Cedana (second in cominand to Piar) in which he himself was taken prisoner with nearly the entire loss of all his men.
The Jamaica papers are filled with accounts of depredations committed under the Carthagenian flag; but speak well of the lbenos Ayrean com. Taylor. A ressel under this flag is said to be in the North sea. Among them they have nearly ami: ilated the commerce of Spain-which begi:is to be carried on chiefly in neutral bottoms.
We learn from Cadiz that the soldiers who lately enibarked at that port fur America, were literally forced away; and it was thought proDable that the half of them would join the patrints.
The patriot privateers have lately made some valuable captures off the Havana. It is also believed that they have captured three armed vessels which lately sailed from this port, among them one formerly called the Jacob Jonies, of Bosto", cariying 22 guns, on board of which it was thought there wis a viceroy for Mcxico and a bishop. We fear that this report is too good to be true.
We have a report that the people at Rio Iunerio have followed the lead of those of Permanibuco, and drove off the king of Portugal.

Mr. D.a Cruz, agent or minister from the republic of Pernambuco, has arrived at Washington city. It is understood that he cammot be received in an official capacity, though he will, no doubt, be treated. with respect as an individual.

\section*{CHRONICLE.}

The president's tour.- We shall not fullow the president stej) by step, and retail all the chit-chat stuff that appears in the papers abotit him-as irksome to the repubhican mind and manners of Mr. Monroe as to the people at large. We by no means find fault with the marks of respect paid to the chief magistrate on a tour of dutj, but think chere is more of pomp and parade givento it by the people than the titness of things reçuires. But as it belongs to this work to keep a surt of journal of his nfficial proceedings and to record the varions, addresses, offered to him in his tour, with his replies, we shall keep eopies of them, and occasionally insert some of them in regular succession.
O: the 9 th ingtant he arrived at the seat the vice. president on Staten-Istand, and entered the city of New lork on the 12 th . Oit the 14 th the cinharked in a steam-boat for West. Point. While at NewYork and in its neighborhond, the president examin. ed all the public works and visited mixit of the public institntions-and was every where treated with the respect due in hion as first citizen of the republic and as a gentleman.

But-as to the addrenveg offered to him, the Eisese Regisier loas the fullowing happy remarks:-"We have been pleased with every thing we have heard III the visit of the president of the Vhited Stutes, besiley the addresses. In this we are guided as much by his pleasure as uur own. We do not expect that he comes to us to read and write, bitt to sce us. We should doem it very absurd on a private visit to give a gentlenan a letter, and oblige hima to read and answer it, hefore we conversed with
him. Send to Waslrington as many addresses as you can, and let him read them there; but at your own house, like firiend of Northey, of Salem, only bit lim welcome."

The New York Gazette says-The steam frigate has been got in readiness to convey Mr. Monroe, the president, to the forlifications below-and we sure informed that she will start this morning up the Hudson, to meet, and take lim on board. The frigate is to be manned hy the brave tars at our navy yard, and a detachment of the marines.

Mr. Adums is expected to arrive from England and assume the dutits of the department of state, early in July next.
गizo-Hampshire election. Oficial-for governor, William Plumer 19,088; Janies Sheafe 12,029; Je remiah Mason 3,6u7; Jisiah Barllett 539; scattering 112. Plurality for Mr. Plumer over all the candidates, 2,801 .
The Rounoke. A Int of tobacen [ 40 hhds.] from Marseilles, a little town of North Carolina, situate on the river Das, a branch of the Roanoke, 300 miles from the sea-board, bas arrived al Norfolk, Fa. This is noticed as the "first fruits" of late internal improvements and enterprize in that quarter.

Error. In giving an account of the arrival of the valuable cattle presented by Mr. Coke to Messis. Patterson and Caton, and speaking of that distinguished gentleman, we designated him as the "richest and most particular farmer," iustead of saving he was the richest and most fractical farmer in England.

The great canal. Contracts are offered for constructing certain sections of the great canal, westward of Rome, N. Y.

Emigration. Among the foreign articles is some notice of a great einigration about to be made to the United States from Holland. Many persons al. so arrive from England and Ireland.

Exchange of lands. Gen. Jackson, gov. M'Minn, of Tennessee, and gen. Meriwether, of Georgia, are appointed commissioners to negociate with the Cherokees an exchange of their lands in Tennessee and Georgia for lands on the White river, beyond the Mississippi.

Cottcn. The southern printers lave adopted an excellent practice. They now publish the names of persons detected in selling stones and rubbish for cotton.

Charleston. The population of the resident inhabitants of the city of Charleston has just been ascertained, and is as follows:
\begin{tabular}{|c|c|}
\hline Wlite males & 5573 \\
\hline - females & 5656-11,229 \\
\hline Colored free males & 434 \\
\hline fernales & \(766-1,200\) \\
\hline Slaves & 11,515 \\
\hline Total & 23,944 \\
\hline
\end{tabular}

Died, at Genrgetown, Dist. Col. on the 18 h inst. the Rev. Leonurrl Neale, archbishop of Baltimore, and successor of the late Dr. Carroll, in the 71st year of his age.

Bank Fisherles. WVe understand, (says a Boston paper) that 55 eail of vessels have arrived ut Marblelıead this spring from the Grand Banks, averag ing 16,500 codfish; when cured for market ir supposed they will weigh 33,611 quintals, and accordjing to a fair calculation, will bring from 100,000 to 120,000 dollars.
Seneca and Susquelianna locks and canals.-It ap. pears that, at the request of the "Seneca and Susquehanna Lock Navigation Company" of New.York,

The Pennsylrania lesiclature, at its last session. March 11, pussed "an art to authorise the governor. to appoint commissionet's to explore the route of the intended canal for unitint the waters of the Senecal lake and Tinga river, in the state of NewYork."
These commissioners are obliged to "make report to him, to be laid before the next legislature. of the practicability, inportance and probable expence of making and rompleting the said canal, together with such other information as they may be able to obtain."
Gireat advantages are anticipated from the coms pletion of this plan, it being intended to unite the Seneca lake, by the Chemung and Susquehanua rivers, with the Cliesapeake.
"We have orly to add (says the Geneva Grzette) that after these locks and canals are constructed, and when those at the Seneca falls are completed, (the latter of which will be effected the ensuing season) an unimterrupted inland navigation will be open fiom Lake Onturio to the Chesapeake bay,"

Com. Bainbridge and captains Evans and Perry, are appointed by the president of the United States to examine and survey the harbor of Newport, with a view to a sile for a naval depot, lock yard, \&c.
The Promethets and Lynx are ready for sea, at Boaton, and ouly waiting a fair wind.
The American Academy of Fine Arts in Now. York, have purchased of colonel Trumbull, a collection of original paintings for 13,000 dollars.
The Greek ship Jerusalem, on her voyage from Smyrna to the-United States, lately foundered at sea. Her cargo in part consisted of 450 tons of quicksilver, which, bursting, so corroded the iron work that the water mished into the ship from every part, and she sunk off Cape Hatteras. Of the crew consisting of 36 men, all Greeks, only 5 were saved.

We observe notices of two deaths occavioned by the blunders of apothecaries-giving poison in. stead of physic.

From the Nequ-Orleans Gazette of May 7.
We announced to our readers on Monday that D.n Diego Morphy, late vice consul of his catholic majesty for Luisiana, had been summoned to appear before the court of the first district to answer for the disrespeciful and apparently contemptrous publigation to which we on that day alluded.* Mr. M. appeared in court, by his counsel, declined the jurisdiction of the conrt, alleging that \({ }_{c}\) in his consular character, he was amenable for offences under a certain grade, solely to the courts of the U.S.

His honor, Julge Lewis, overruled this objection, holding that it was the indispeusable duty and the indisputable right of every courl of record to sustain its authority from violation and its dignity from insult; that the class of offences, to which the consular privilege contended \(f r r\), extended, were offences against positive law, and not of the description embraced in the doctrine of contempts. Pieparatory to further investigation, the comrt requred of Mr Morphy to answer whether or not, he was the author of the publication in question. Upon his answering in the affirmative, he was required in confess or to disclaiin the supposed disrespict or contempt contained in his publication; he asked some time to consider, and was allowed until yesterday to answer the interrogatories. Upon being brought up, he declared under oath that he had no design, by his publication, to speak with disrespect or contempt of the court. Hereupon Mr. Morphy was discharged.

NHES' WEEKLY PEGISTER.
}

\section*{}

The article on "Political Ficonomy" that folluws, has so much occupical the attention of the editor for several days, as elmost to prevent him from attenching to any thing else: yet he has to reGret many interrup ions and incidents calculated to unhinge the mind of that denree of harmony which is so necessary to the proper accomplishment of unleriakings like this.

He respecifully invites a deliberate examination of the ficis stated and assumed-assured that an attention to them, whatever may be thought of their arrangement and application, will be useful to his counsry.

\section*{Political Economy-No. II.}

\section*{proposition the first.}
"OUR afiricultere cannot FUleisish a surples for EXPORT SUFFICIENT TO CLOTIIR ANBSUPTLYTRE PEOPLE OF TRE UNITHD BTATES; TO THE CORE OF SECH GOODS DEISG ADDED THE DUTIES AND CHARGES UPOY THEM, WHICK MUST BE PAID AS WELL \(\triangle S\) THE OHI( 1 SAL PCBCHASE MONEY."
The broad ground of this proposition admits the introduction of unme:ous facts, and involves the most impratant suhjects of rolitical econory. We shall treat of ihem as briefly as we can; but if they appear tedious to any one, let him turn to the close os the article where the results of our enquiries are collected and stated, pro and con

In the first place we have to calculate the value of the goods required to clothe and supply the people of the United States-and

In the second, after shewing the value of all our agricultural products, to attempt to ascertain the supplus we might have, if we were to abandon cer. *ain manufactures-and

Hy a comparison of the two, to demonstrate the proposition.

Of It is proper to observe, that we shall calculate the former at so much as it may be supposed to cost the farmer and planter-and the latter at the umount which it clearly brings to him-immediately, in both sases. The diffirence between the origiual cost or linal produci, is the profit and suppurt of the classes Liat do nut Jabor-ine merchants, iraders, lawyers, \&c. \&cc. and for the support of the general and state govermments. It is important that Uis should be recollected. 5

The present population of the United States, mre bliematically ascertained by the facts furnished in the several censuses, anounts to about \(9,300,000\) couls. This is rather below than above the real number; for it is in the very nature of things that any census of the United States, while the people are so thinly scaticred over so vast a tract of country, must be defective.

The present population may be thus designated :
White persons under 10 years old \(3,750,000\) over 10
\(3,800,000\)
Free person of culor, exclusive of in. dians
Slaves
Total,
300,000
\(1.350,001\)
9,200,000
For Xft.

Afier numerous calculations and many sppeals t? the upinions as well as the experience of whers, I have arrived at the following conclusions-that the manufactured goods (not made up into cluthinc) required to clothe the people of the United States, costs, or may be valued, thus-duties, \&c. included:
For every white person under 10 years old
S12 per unnumi.
\begin{tabular}{lr} 
& above 10 \\
- other free person (average) & 30 \\
Slave & (average) \\
\hline
\end{tabular}

I cannot believe that these estimates are unreasonable. The more I look at then the inore certain I feel that they are under the average cost. But arcepting them as data, we have the following results:
\begin{tabular}{rrr}
\(3,750,000\) persons at \(\$ 12\) & \(45,000,000\) \\
\(3,800,000\) & 30 & \(114,000,000\) \\
300000 & 20 & \(6,100,000\) \\
\(1,350,000\) & 10 & \(13,500,000\)
\end{tabular}

Cost of manufactured articles need-
ful to clotite the people of the
\(\$ 178,500,050\) United States,
There are in the United States more than a million of families of free persons, each of which consumes an average vaIte of more than 40 S per annum, in other manufactures; such as for beds and bedrling, table cloths and towels, carpets, \&e articles of ironmongery and hrass wares; china, queen's, earthen and glass wares; window glass, looke ing glasses, p:tper, \&c.

The new houses built every year and the old ones repaired, for ironmongery. window glass, painis, paper hanging, \&c. cannot cost less than S50 each for an average -say 200,000 at 50 S

Judging by the returns of the marslials in 1810 , which, though defective, gave a value to the product of our distilleries and breweries of more than \(16 \frac{1}{2}\) millions, and adding thereto the arnount of foreign liquors consumel, we cannot estimate the cust of our drinks at less thann

50 millions 18 s. of sugar, besides that which is made in the United States, (including the duty) at \(12 \frac{1}{3}\)

8 millions galis. molasses, as above, at 50

41 millions buah. salt, as above, at 60
15 inillions lbs. coffec, 25
32 millions lles ten, \(\quad 100\)
Minor articles-pepper and spices. inustard, foreign frui s, \&c. \&c.-S. S fir each family, less than 10 cents per week,

5,000.000
\(233,700,000\)
\(10,000,000\)
\(30,000,000\)

6,250,000
4,000,000
2,700,000
3,750,090
8,500,000

Add for the product of our furnaces and forgen, rolling and slitting mills, an. 1 otler factories and works in iron, (estimated in 1810 at nearly \(14 \frac{1}{2}\) mil.
and ammunition, and the value of the implements and tonls of our farmers, mallufacturer's and mechanics,

\section*{And we have the sum of}

S: \(10,000,000\)
Now, I am perfectly satisfied this vast amount is far below the cost, or value, of the things named or referred to; and I wish it strongly impressed on the mind of crery one, that we should have to pay that amom arnually to foreigners (if we could) or live very different, indeed, from what we now do, by mereiy refecting the following home manufaciures:

\section*{1. Spinving and weafing.}
2. Woaks in hos, except common blachismith's work.
3. Distilifvg and brewing.
4. Worrs in glass and clat-paprr and paikts -heaving to us all other mamfacturers or me-chanics-such as those who make and make-up leather, hatters, all that work in wood and in metals escept ison, all engaged in the building or equip. ping ships and vessels-in short, all, except those that belong to the six things just named, which seem to be those that some would rather wish to dispense with. But I venture to say there are few who ever supposed their value to be any thing like what it is-Thus:
Thie aggregate is
\(310,000,000\)
ledtuet-as the value of the foreign goods imported and consumed of the classes enumerated (and it camot exexceed this sum) to the original cost of the articles being added the duties, merchunts' profits, Éc.

And the value of the domestic ma-? nufactures will appear to be

80,000,000
\$230,000,000

I recquest the reader to stop and pause a little while to examine what 1 have stated. Let him pass before him a!l the documents within his reach, and, in the absence of those, figure for himself, and compare his c.lculations with mine. I see nothing ex travagant in the aggregate-indeed, it appears to me to result from very moderate estinates, malle when fucts were wanting. And the result is supported as strongly by the returns of the marshals in 1810, as returns so very defective as they were can sup, port any thing; especially by their enumerations of sfrindles and spinning wheels and loorns, and furnaces and forges and other works in iron, in those few states ur districts where attention was paid to collect their amount. And althongh, perhaps, our manuf:cturing estiblishmento are not now much more extensive, as to the work performed in them, than they were in 1810, yet it is notorious that householi mannfactures, (the sheet-anchor) have immensely increased since that period. Take the following sbsiract of a letter to the editor of the Registea fiom a Pennsylvania farmer, dated on the \(2 d\) instant, as evidence of what I say-for the case of this gentleman, living in one of the most populous parts of that state, and but a few miles from Baltimore, is the case of tens of thousands of his brother farmers. He says - his family consists of 8 persons, 7 of whom are above 10 years of age-his farm contains 250 acres. His whole diabbursements for foreign goods, for ciothing, for a year j'st past, for himself and bis family, was oilly eleren dollurs, yet his current expences for the year anounted io \(\$ 600\). sut in this period, after supplying himself and fa-
inily, he sold cloth made of his own wool, \&c. and spun by the women of his fimily, that brought him eichry ilulders, and has yet fine wool enough on hand to make \(\$ 400\) worth inore. He keeps a strict :c. count of all his receipts and disbursements, and the statement may be relied upon. IIe is incapable of saying what is not true. This plain unvarnished fact is worth a bushel of speculation. IIere is a famly entirely supplied with all its clothit s, and cloth, required for ther parposes, with a balance of 89 in hand of a surplus, chiefly through the wholesome employment of its women, whose labor would otherwise have been lost to it and the country.

Here it may be well to make a brief digression from the subject immediately beforc us. Some will be ready to say - "Certainly, no one zuould zuish to check or iestroy finmily mannfuctures." But these may, to a given extent, be checked, or destroyed, as easily as those of the greater establishments. It is the disposition of every one to receive a fair value fir the labor of his hands. The cominon laborer, whose regular wares, or fair earnings, are equal to one dollar per day, will do the next thing to starving himself rather than work for 50 cents a day. Nothing but pinching necessity will induce him to it; and if so induced, he will waste all the time that he can as a sort of a balance against the necessity. And-if through deep laid plans and immense sacrifices in foreign countries to send goods to the United States, (which are smuggled ashore and thus avoid the duly) we are inundated with such goods, and they are sold at 50 per cent. less than. their real worth, are not our household nanufactures affecterl? The gentleman whose letter I have noticed above, says that his wool on hand, enough to make \$ 400 worth of cloth, would have been made in:o cloth, "if there had been a demanul for it." The difference, then, between the value of the wool and the cloth was, somehow, lost to him and his country forever, during the last year. The females of this substantial farmer's family are no more compelled to spin than the "princess Charlotte" is; and they will not do it, over as much as is needfull to clothe the family, unless they are reasonably paid for it: the low price of the foreign article, or the prejudices of the people in favor of it, operiated, then, as an absolute loss of the value of a certain part of the labor of thinse females, which might, and would, in o:ker circumstances, have furnished a certain qiantity of gods for market. But we sitall speak again on this matter, for it is very important.

We shall now attempt an estimate of the value of all the agricultural products and capacities of the United SLates, by adding to the supposed consumption of the people the amount consumed in certain manufactures, the amount exported to fo. reigi: countries, and the amount of increase that might be produced by an increased quantity of la. bor for agriculture, by the destruction of the manu. fictures named. This is a vast field, indeed, in which we may easily lose ourselves; but we intend to advance with a great deal of caution.
It was.the opinion of Dr. Conper about three years ago, that the agricultural products of the United States were worth 640 millions of dollars-LSee Vol.VII. p. 237, Wemikif Register.] But with great respect for such high authority, I must venture an opinion, that that result came out of erroneous propositions, while some things were omitted that would have changed it materialiy. The doctor's. conclusions, after many calculations, were, that-

\section*{NILE S' WEEKLY REGISTER-POLITICAL ECONOMY.}

The grain required for one man per ann. was \(8 \frac{1}{2}\) bushels, at 12.5 cents, 365 lbs . of meat, at 1 lb . per day, at 6 cents 20.90 Whiskey or other drinks, equivalent to \(\quad 15.00\) Fuel, vegetables, pepper, salt, \&ic. 7.47

\section*{S55.}

A hard-working man may consume these quanti-ties-but I presume they are much greater than an average of the whole people will admit of; and there is nothing allowed for the support of horses and other animals, that do not form a part of our meats.

Iseanjour, who travelled through the United States in 1810, estimated the "general revenue" at ouly 850 millious-thus

Product of agriculeure,
200 millions
forests, mines and waters, 25
manlufactures,
100
fureign trade,
25

\section*{350}

This is ricliculous. The whole amount that he gives would hardly half clothe and feed the people of the U. States, as we shall see br and bye. He also estiinates the consumption as follows:
\(25,000,000\) of quintals of grain,

> 25,000,000 do potatoes,
\(200,5,0,900\) of pounds of butter,
\(1,500,000\) head of horned cattle,
2,000,000 do. sheep,
2,000,000 do. hogs,
\(50,000,000\) do. poultry, and
\(600,000,000\) bottles of wine, brandy and other liquors.
The whole value of real and personal property of the U. States, in 1805, he estimates at \(4,070,937,559\) doliars.
Having noticed those authorities, which differ nearly by a half, we shall now give a calculation in ourewon zoay, which will, probably, differ very much frem both.

My own family, I think, presents me with a fair medinm between the rich and the poor, for the goaste or use of the substantial necessaries of life. It consists of myself and my wife, 4 males between 16 and 20 years old, 2 fiom 14 to 15,1 of 10 and 1 of \(5 ; 2\) woinen and iny female child of 10 or 11in all 13. We use the very best wheat four (extra superfine) and buy the best pieces of the best meat; but every thing is prepared in the simplest way possible; and, in common, the whole family eats only of one dish of meat-we always have full sup. plics of fine vegetables, such as potutoes, turnips, parsnips or cabbages, and the like, and all eat just as much as they please, as most people do in the Linited States.

Ifind that we use of flour, per clay, 816 .
Vegetables, and other substitutes for or in licu of brend, pies, puddings, \&c.
of the value of
Meat, fresh or salt,
Butter and lard, 1tilus. equal to

\section*{With eggs, milk, \&c.}

If the amount of meats is thought too high, we may add to it the value of the fallore consumed in candles, (which is a part of the product of animals

\footnotetext{
-If the persons were fed on stale dry bread, only, perhaps the average would not amount to \}th. for each per day. But this is not the case in the Linited Stares, and I hope never will be.
}
(raised for the food of man) and the idea of its superabundance will be lessened.

I therefore conclucle that the people in general, adults and children, eat something as bresd stuff's equal to 1 lb . each per day, and of meats (an I fisth) incluting the relishes they generally have, with their coffee or milk in the towns and in the couvitry, morn. ing and evening, the quantity of \(\frac{3}{3} 6\). per day. And the amount for eich person, averaging grain, wheat, rye and cor", at 125 cents per bushel, and the mea: (or fish in lieu of it) at 6 cents per pound, will be about as follows:
\(7 \frac{1}{2}\) bushels of grain or other vegetables, of equal value, at 125 cents,*
281 lbs . of meat, at 6 cents, \(937 \frac{1}{2}\) 16.86
\(26.25 \frac{1}{2}\)
The fuel consumed, on the averace, is equal in 1 cord of wood fire every individual, including workshops, \&oc. and the drinks 1 have already est imnted at 30 millions for all the people of the United States. We shall use the data thus ascertained in tl:c recapitulation.
2. The next valitable product of acriculture is the fond of our horses! This will secm strange to many who have looked so much te forcign tratebut it is not the less true because they nev-r have thought of it. I do not say any thins about other kinds of stock, because the cattle and sheep, \& c. come into the quantity of our meats.
The ouly fact that we have to make an estimate upon of the number of horses in the United S.ates, is the return of the marshal of the district of ऐ~nnsylvania in 1810; who gives them at 255,993. I'his was, probably, far short of the real number in that state in that year; but Pennsylvania, frosi her local situation and habits, has a far greater proportion of horses, according to her population, than any other state; and rating the whole by her, we shonid have had no less lian 2,304,000 in 1810. Oiir bretioren of the easiern states wisely prefer oxen for their farming businesses, and those of the south chielly cultivate their fields with slaves-so that, al'hougita if we had taken Pennsylvaria as a stanchrd for the whole, allowing the horses to have increasel with the same rate as the people since 1810 , we sho:ld have had nearly three millions \((2,962,295\), we carnot admit that there are more than two, as given in a former estimate-see. W. R vol. IX. p. 241. Einch Lorse, on an average, will consume \(1 \frac{1}{2}\) tons of bay and 45 busliels of grain per annum, ( \(4 q^{(s .}\) pes day) on their equivalent?
3. Cotion lias the third gracle in value. This great staple has grown up within a very few years In \(1 ; 51\) We exported only 189,316 lis ; in 1792, 138,328 ibs.s in \(179.3,487,600^{\circ}\) 1hs.;-ten years afier, 1803 , we exported 41,10.5.623 16s ; in 1807, 64 mililions; in 1810, 93 millions; in 1815, 83 millinns,-and for the rear ending with September 1816 , nearly 82 millions, as follows:

We hate seen an anonymons estimate of the Whole crop of 1816 -whieli gives us 320,0 b batew as the whole quantity raised, viz.

\footnotetext{
-The gram is rated at Gothe. for the bushel-and from its product is deducted the loss and waste of its mamifactare intn four or ment.
}

The bale is not a determinate quantity. Hut we are told that it may be averaged at 320:bs. This estimate then would give us a product of only \(102,600,000 \mathrm{lbs}\). The average of the four years export before the war, viz. for \(1808,1809,1810\) and 1811, was about 55 millions; but in 1815 we expurted S3, and in 1816, 82 mitions. We know that the cultivalion of this commodity has been greatly extended; and if we can take 80 millions as the surpius quantity over the home consumption, the whole quanity raised can hardly be less than 120 or 130 inillions-it having been estimated that our factories could consume 27 millions, as they stood in 1315. These hisve somewhat declined, perhaps, but household manutactures, as before observed, h.ive greatly increased; and we shall put down the crop) of last year at 125 millions of pounds, of which 13 may have been sea islands,
4. Of Tobacco we exported in \(1815,85,337\) hhds. and in 1816, 69,241 hhds-the last valued at \(\$ 12,869,000\), or an average of 185 dollars per hhd. For the years \(1808,18{ }^{\prime} 9,1810\) aird 1811, the average was somewhat mo:e hail 45,000 hhids. The cultivalion was declining for several years before the war, buthas, since the peace, been far more rapidly ex-teriding-and we may accept 70,000 hhds. as the surplus quantity. The table before \(r\) ferred to estimates the whole crop of last year at 127,000 hisds. -valued as follows:
\(45, u(x)\) Virrinia, 30,000 Lnilis'na \& Kentucky 7,000 North-Carolina, -7,500 Sonth-Carolira, 7,500 Gicorgi:4,
30,000 Maryland,
\(\left.\begin{array}{ll}\text { y }\} \text { at } \$ 130 \\ \text { at } & 96 \\ & 90\end{array}\right\} \$ 14,562,000\)

This gives an average of only \(\$ 114\) per hhd- \(\$ 71\) less than the treasury estimate of last year. But the price of the article has decreased; and this may be a pretty fair estimate of the quantity produced. The export of manuficiured tobacco is not worth taking into the secount.
5. Suzar is becoming a very important item in our agricultire; and the time is close at hand when i: will nearly cease to be imported. Large tracts of land are continually brought into the cultivation of the cane. Mr. Darby tells us there are 250,000 acres in Louisima fit to produce it. We have reason to berieve there is a mich greater quantity than that; but 250,000 acres, worked by 83,333 hands, at one to three acres, calculated to produce \(1000 / b s\). per acre, would give us 250 millions of pounds !a quantity that we should not know what to do with. Besides, it succeeds well in Georgia and the most southerly parts of South Carolina. At present, it is the most profitable crop of the planter-Mr. Darby estimates the product, per hand, thus:

\footnotetext{
*This valuation is unt at such a righ rate as that made at the treasury depariment, allowing the bales to be of 300 ils. weight each, us it is probable they nere rated at.
}
\begin{tabular}{lll} 
Sugar & at 8 cents per ti.. & S 240 per hand \\
Cotton & 15 & 180 \\
Iadigo & 100 & 140 \\
Tobacco & \(\$ 10\) per cret. & 107 \\
lice & 6 per bbl & 84
\end{tabular}

We have no certain returns whereby to calculate the quantity of sugar and molasses made in the United States. I: 1810 , the marshals returned \(9,665,108 \mathrm{l} \mathrm{s}\). of maple sugar, and 9,671 hilhs. from the cane, 10 gether about 20 millions of poundswith 3,590 hlids. or 179,500 galls. molasses. The quantity of mapie sugar made has not, probably, increased; but it may be safe to say that Loouisiund now malies at least 30 millions from the cane.
6. Rice-the export last vear was 137,848 tierces, Valued at \(\$ 3,555,000, \$ 26\) per tierce, nearly. For the year 1809,' 10 , '11. and '12 the average annual export was about 115,000 tierces. The estin ate before referred to, gives the whole crop of 1816, as being onily 110,000 tierces, valued at \(\$ 3,600,000\). The quantity we think cannot be less than 150,000 . But as its home consumption comes in lieu of wheat, corn, and other grain, we shall consider it as already accounted for in the vegetable fiod we have supposed was consumed. The cultivation of rice appear's to be declining.
7. Sheep's zyool, hemp, flax and flaxseed, must make a large amount of value. Perhaps as ligh as 40 millions. But this is altigether "guess work."
8. The produce of the forest exported last year, such as skins and furs, all sorts of lumber and timber, naval stores, and pot and pearl ashes, was valued at \(\mathrm{S} 7,295,000\). This amount is considered as agricultural, because the labor required to prepare the articles for market is chiefly of the agriculturaliṣts.

Having thus passed through the chicf things in detail, we shall endeavor to ascertain the portion of labor that might be arlded to the business of agriculture by abstaining from the following manufactures:
1. Spinning and zveaving. 2. Works in iron, except common smith's work. 3. Distilling and Grewing. 4 I:) glless, clay, paper and paints. For these items take in all that we talk of abandoning to make out our proposition.
It may be estimated that one fifth of the whole population of the United States is capable bearing arms; of course, of performing a day's labor in the field. One-tenth of the whole, males over 45 and lads under 16, may be regarded as "half-hands"

We have \(7,850,000\) free persons and \(1,350,000\) slaves-
1 -5th of \(7,850,000\) is \(\quad 1,570,000\)
\(1-10\) th is \(785,000-\frac{1}{2}\) of which is 392,500
\(1-2\) of the whole number of slaves
675,000
Whole amount of day's labor
Bit not more than \(\frac{3}{4}\) of the people are engaged in agriculture-the other \(\ddagger\) are mechanics and manufacturers, seamen, fishermen and watermen-merchants, traders and shop-keepers, and other dealers, in town and country, civil and military officers and men, lawyers, doctors and clergymen, persons living on income, \&c.
The later classes (merchants, \&c.) may have in them unproductive labor to the amount of

200,000
And the days' labor performed is
2,437,500
The cotton manufacturing establiṣhments in 1815 were estimated capable to manufacture the worth

\section*{NILEs' WEEKLY REGISTER-POLITICAL ECONOMY.}
of \(24 \frac{1}{2}\) millions a year, including the cost of 27 in . lions of \(l b_{3}\). of cotton-and of emploving, in all their departments, 100,000 persous: 10,000 of whom were males ahove 17 years old, 21,0 to do under that age-the rest, \(66,4 \times 0\). women and female children. knowing the ayes of the brys employed in such
 old, only, we cannot eitimate t're day's labor in t?:e whole as equal in more than that of 16,000 hands, fit for agricultural services. But, is much of the work of those factories goes out in yarn, and is afterwards span by men, we shall rate them at 20,000, which is a large allowance.

The woole. invisfacturing establishments, in a report mude to congress [see vol. X. p. 82] were estimated to produce a value of 19 millions anuu ally, ilse raw material of which was worth 7 millions; anit to emplov co'stantiy 50,000 persons, and occasionally 50,000 more The average number may have been 60,000; neither the ages nor the sexes of Unose persons ure mentioned-bint, as the manufucture of wool is less adapted to the labor of women and clildren than that of cotton, we can suppose that the male spinners, weavers, dyers, fullers, slaearers, \&cc. \&e may have possessed a quantity of labor equal to that of 25,000 field hands.

Fionn these elements we may, perhaps, be able to get an idea of the whole quantity of labor that mizits be applied to agriculiure by a retirement from the inanufactures stated.

We have calculatral that it requires a value equal to \(\mathrm{S}(\mathrm{r} 3,510,00\) ) to elothe the people of the Ufited States, 10 which we must add 15 inillions for all the great variciy of stuffon needful to them in th ir fimity capacilies-torether 193,500,000.

Mr. 13 irgs, in his inestimable let!er to the chairman of the conjressional coinmittee on conmerce an I manuf.critres, Javtary, 1916, [see Weakly Re: G1-TERt, vol [i. 389] aicertained that !!te anount of gouls inporied an I consumed for cloiliner and of
 averare) was equal \(\ell 0\) Sj fir every person in the Unitid Sia:es, at their olficial value or original cosl If we were v judge by the inports of the year 1815 [see present vol. p 186] the same result would nearly appear-but there was an extra supply in 1815, for our manifactures lave done something since 1904 , and a more reasonable estimaie may beat 4 S pir head.-
\(9,20(0,0) 0\) persons at \(\$ 4^{\circ}\)
\(300,800,000\)
bufies, cliarges, merchants' profits,
\&c. 40 per cent
\(14,720,000\)
S61,52 1,000
Which, deducted from the whole cont of clothing and all sorts of cloths, leaves nearly 132 millions to be fornished by homs manutiac ures.

The work in the coiton establisimuents, at the ra'es stated, gives the great sum of 1225 fur each fiele! hand; so much of the labor being perforined by machinery, attended hy fermales and children whose labor would otherwise be lost. Deilucting ilse ardwe of the ravo maserial, ( 71 millions for the whole) we have Su62 1 fir every such hand. GIfirein sue see Whe real codvantage of mannfictwres-and it rellt mot anpear that we are very far from the orush, when it is known to be generatly believed thas the labor of one man, aided and assisted as he is by labor-saving machinery and by zoomen and chilitren, has been generally coll. sidered as equal to thas of four men employed in agisi

\footnotetext{
*T'nis would not be so great if lixury had not so much increased-we are now retiring a litile from it
}
cu!'ture. [l am, indeed, pleased on fial that what were chiefly sunpositione, or myoun ralcul:ions, are so nearly supported by ac! in whe liged fact: It inspires me witha confidence that I may be tolerably correct.]
On the same principles, the woolen manuf ct wring establishments afford us only 5 -60, aา 1 , del'citis the value of the raw material, nesrly \(\mathrm{S} j 00\) per liant, as abore. But the rate of profit is much freater in the household manufacture-; in which nearly all tho labor, except that of weaving, is performed hy women who otherwise might not labor to any prifit at all. Tiking the precerling estimates as clata and making due alioubance for the fuct last stated, I have calcula!ed and d's conclude, that the supply of 132 millions worth of cloths (of all sorts) marle by the people of the Uni'ed States to meet their own Vants, does not take from agriculture more than 102,000 liands, that might reasonably be expected to labor in it-viz. 50,000 for manufactures in co:ton, \&c. and 52.000 for ihose of wool; and they create a home market fur 45 inilhous of dollars worth of wool, cotton and H2x.

Our works in iron, other than common smith's work, in glass, paper and eartlen wares, and in the distilleries and breweries, prolucing an annual valise of 65 inillious of dollars, (the most of the business bei." perfo:me.l by mer) require about 51,000 able hands; which, including the cost of the rav inaterials and their waste, both of which is very great, the vast capital employed, high wages paid. with the tear and wear of costly machinery and apparatus; appears to me to be reasonable-being at the rate of \(\$ 1209\) per hand.

We lave \(t^{1}\) tus patiently waded through the chice points that strike us as being very important to :a lue consideration of the suluject before us, and shall proceed to our sumvary, and haste to conclude this long and laborious .". icle.

\section*{RECAPI: LLATION.}

We have secn that the cost of clothins and surplying the people of the United States, as stated, amouits to \(310,000,000\) ilollars, fer annism. It is needlesss to repeat the items which make up the this aggregrate.

61,000,(100
624,112,000

\section*{Deduct}

495,653,000
Annual balance
\$128,459,000
If there are any errors of great magnitude in the preceding, (and where so much depends upon opinion many will be of opinion, no doubt, that there are some, notwithstanding ous earnest endeavors to ascertain (ruth) I am confident that they are in fi.vor. of agriculture. The above balance must stand annually against us by ceasing to manufacture the few things named. It is for those that are opposed to manufactures to shew how that balance is to be paid. I say it is impossible, utterly impossmbe to pay it. But we shall have to recur to this matter again as we proceed to examine some of the rest of the propositions, and dismiss it for the present.

\section*{proposition the second.}

That if agriculture could farmish sueh surplus, the fo. reign market will not receive it one year is tenwiless at such rates and on such terms as zoould beggar us. Wheat, at 50 cents a bushel, delivered on our sea-board, for example, might, perhups, generalty find a mat ket-lut could wee raise it at chat price? This req̧uires only a very brief exposition. According to the preceding estimates we should have near!y \(\$ 18,000,000\) worth of agricultural products to spare*. There cannot be a steady foreign market for it-and the surplus would be so great as to low. er the price or value of the whole 50 per cent. Every thing zoould be a perfect drug in the narket. phopostrion the third.
That the fureign market is never to be relied uspon, and may be lost allogether by zvar, \(\mathcal{E}^{3} c\).
No argument is necessary to demonstrate this proposition. The fact must be evident to every one.
The 4th proposition is interesting, and with the 5 th, 6 th and 7 th, will make the subject of the next number.
than the amount stated-but the amounts given may be about the value they are of to the farmer.
\(\ddagger\) The free laborers assisted by horses and oxen, may earn more than this, but we must recollect that almost one third of the number of clays' work we have allowed to agriculture is performed by slaves. Sugar, Mr. Narby says, may produce to the planter \(240 \$\) per hand, cotton 184,-tobacco only 107 which it is presumed is an addition to the culture of their own bread stuffs, \&xc.
§These are added because the cost of their maintenance is calcuated, and because the value of their labor is estimated in the consumption of the people.
*To pay \(3 \frac{1}{2}, 000,000\) with, or exceedingly re. trench our present expences.

\section*{Declaration of Tndependence.}

Plilutulplyia, June 16 th 1817.
Messrs. William M'Corkle and Son,
Gentlemen-Several applications have been recent. Iy made to me to state the errors which 1 had ob. served, and often mentioned, in the puibications of the names of the members of the continental congress, who declared in fivor of the independence of Thre United States, on the fth of July, IFTO-i have

\title{
NILES' WEEKLY REGISTER-DECI.ARATION OF INDEPENDENCE. Д\%9
}
not at present sufficient liealth and leisure to epply severally to each application. There can be but one correct statement of facts: one public statement, therefore, through the press, will seve the purpose of the gentlemen who have made the request, und inay also give satisfaction to the minds of others, who have turned their thoughts upon the subject. If I am correct in my statement, it may be of use to future historians; if not, my eriors can be reaclily corrected. I wish, therefore, by means of your paper, to make the following statement of the facts within my knowledge, relative to the subject of cn quiry.

On Monday, the 1st day of July, 1776, the arguments in congress for and against the cleclaration of independence, having been exhausted, and the theasures fully considered, the congress resolved itself into a committee of the whole; the question was put by the chairman, and all the states voted in the affirnative, except Pennsilvanta, which was in the negative, and lletaxare, whel was eq:ally vided Pennsylvania at that time lige seven mel. bers, viz. Jonn Morton, 13 enjamin Franklin, Jame Wilson, John Dickinson, Hobert Moris, Thomas Willing, and Ciarles Humphreys. Ali were present on the first of July, and the three first named voted for the e'eclaration of indepesidence, the remining four against it. The state of Delaware had three memb is, Casar Rodney, George Re d , and m senf. George Read and I were present. I voted for it, George Read against it. When the -president resumed the chair, the chairman of the committee of the whole made his report, which was not acted upon till Thursday, the 4 th of July. In the mean tine I had written to press the attendance of Cassar Rodney, the third delegrate from Delaware, who appeared early on that day at the state house, in this place. When the congress assembled, the question was put up on the report of the conmittee of the whole, and approved by every state. Of the mem. bers from P'emsylvania, the three first, as before, voted in the affirmative, and the two last in the negative. Johan Dickinson and Robert Mo:ris were not present, and did not take their seats on that day. Cresar IRxtrey, for the state of I Clatvare, voted wi.h me in the affirmative, and George Read in the negra live.

Some morths after this, I saw printed publications of the names of those gentlemen, who had, as it was said, voled for the declaration of independence, and observec that my own name was omitted. I was not a litile surprised at, wor conld 1 accotnot for the omiso sion, because 1 knew that on the 241 h of June pre. ceding, the deputies from the committee of l'cunsyl vania, assembled in the provincial conference held at the Carpenter's Hall, Philadeiphia, which liad met on the 18 th , and chosen me their president, had utanimousty declared their wilingness to collcur in a vote of the cungress, declaring the United Colonies free and independent states, and had ordered their declaration ts be nyget, and their president to deliver it to congress, whict accordingts I did the day following; 1 knew also, that a regiment of associators, of which I was colonel, had, at the end of May hefore, unanimously inade the samefleclaration. These circumstances were memtined, the time 10 gentlemen of my acquaintance. The error remained uncorrected till the year 1is1, when I was appointed to pulblish the laws of Temasyivania, to which I prefised the declaration of indeprendence, and inserted my own name, with the names of my colleagues. Afterwards, in 1797, when the late A J Dullas, esq. then sectelary of the cominonwealth, wis appointed to publishi an cdition of laws,

01 comparing the names published as subscribed to the declaration of independence, he obs rvel a rariance, and the omission in some pub"icution, of the name of Thomas M'Ke:n; having prontared a eertificate from the secretory of state that the saufe of Thoons M'Kean was affixed in his own land writeff to the orixinal declaration of independence, though omited in the journais of congress, vir. Dallas then requested an explanation of this circumstance from me, and from iny answer to this application, the following extracts were taken and published by Mr. Dallas in the appendix to the first volume of the edition of the laws.
"For several years past I have been taught to think less unfavorable of scepticism than forinerly. So many things have been misrepresented, mistated and erroneousty printed (with sceming authenticity) under my own eje, as in my opinion to remler thuse who doubi of every thing, not altogether inexcusz. bie. The publication of the declaration of mitependence on the 4 th of July, 1776, as printed in the journals of congress, vol. 2, page 242 , \&cc. and also in the acts of most punlic bodids since, so far as respects the names of the delegites or deputics who made the declaration, has led to the above refiec tion. By the printed publications referreal 10 , it would appear as if the fify-five gentlement, whose names are there printed, and none nther, were on that day, personmily present in congress, and assent ing to the declaration; whereas the truth is other wise. The following gentlemen were not meinters on the 4 th of July, 1776 , namely, Matihew Thornton, Be:ijamin Rush, George Clyner, James Smith, George Taylor, and George Ross, esquires. The five last named were not chosen delegates until the 20 th of that month; the first, not until the 12 h day of Seplember following, nor did he take his seat in congress, until the 4 th of November, which was fout inonths afier. T'ie journals of congress, vol 3d, puge 277 and 442 , as well as those of the assembly of the state of Pennsplvania, pare 53, anit of the general assembly of New-Hampshive, establish these facts. Althoug', the six gentlemen nained, had been very active in the American callse, and soine of them, to my own kuowledge, warmly in favor nf its independence, previuss to the d.y on whith it was declared, yet I porsonally know that notic iot them were in congress on that day.
"Mudesty should not rob any man of his" jutse homur, when, by that honor, his invilesty camoi bu offended. My name is not in the prined jo mrnal of congress, as a party to the declara ion of indepets. dence, and this like an error in tlie first conco cetion, h.s vitiated most of the smbseģuent publicatiot n , atid yet he fact is, that I was then a meinber uf zongress for the state of Delaware, was personally present in congress, and voted in favor of the independeace on the 4 th day of July, 1776 , and sinned the declaration, after it had been er.grossed on p.archment, where my name, in my own hand writing will ap. pears. Henry Wisner of the state of N .-. York was also in congress and roted fior indepenitence
"I do not know how the miviatement in the print. ed jomrnals has happenca. The manuscript pullic junival, has no names anneved to the declaration of independence, imo has the secres jowmal; but it appears ty the later, that on the ij Ir day oflaly, 1776, tho congreas dirccted that it shoultl the eh. grossed on purchment, and signed by ryiry momber, and that it was so protuceit nit the \(2 d\) of Altgus', and signed. This is interlined in the secret jownal, in the hand writing of Charles Thamsos esq. the se. eretary. The present secretary of state of the Ubl. ied States, and inymelf, liave Jately inspected the
journals, and seen this. The journal was firnt print-1 ed by Mr. John Dunlap, in 1778 , and probably copies with the names then signed to it were printed in. August 1776, and that Mr. Dunlap printed the names from one of them."

Hour most obedient servant
THOS M'KEAN \({ }^{*}\)

\section*{The President's Tour.}

The president reached Trenton on the evening of the 7 th inst. where he was received by the municipal suthorities, volunteer companies, and a large concourse of nther citizens-the hells were rang, a fue de joie fired, \&c. The following extempore address was delivered to him by the recorder:
"The mayor and city council, and, through us, the citizens of Trenton, present to you, sir, their most anfeigned respects-congratulating you on your arrival, and give you a most cordial welcome to this city, the scene, sir, of some of the services you have rendered our country. * We most sincere. Iy wish you the enjoyment of health, a long life, and a prosperous administration."

To which the president spontaneously replied :
"I feel very sensibly this hind attention on the part of the authorities of the city of Trenton-the place where the hopes of the country were revived in the war of the revolution by a signal victory obtained by the troops under the command of general Washington, after a severe and disastrous campaign. I am well acquainted with the patriotism of the citizens of Trenton, and, indeed, of Jersey, for none suffered more, or displayed greater patriotism, in our revolutionary contest. I beg you to accept my beat wishes for your continued prosperity and happiness.".

At \(N\) 'erv.Brunswick, the president's arrival was announced by a discharge of camon, the ringing of beils, \&c. He was received by a very respectable committee of the citizens and escorted into the tov:n by the volunteer companies. He remained here only an hour, during which the patriotic people of that place vied with each other in tendering him the most respectful attentions.

On the evening of the 9th, the president arrived at the seat of the vice-president, on Staten island, under a salute from the batteries, the Saranac sloop of war, and the cutter. He spent the next day with the vice-president, and in visiting the military works in the vicinity, and on the 1lth entered the city of New-York, accompanied by the vice-president, general Swift, captains Evans and Biddle, of the navy, \&c. He landed at the Battery under a salute, and then reviewed the troups paraded on the occasion, \&c. \&cc. \&c. Suffice it to say, that every respectful and delicate attention was paid to him during his stay at New-York.

\section*{the mayon's andress}

To the President of the Urited States.
SIR-The mayor, aldermen and commonalty, of the city of New-York, beg leave to present to you their sincere congratulations on your arrival in this city.
It is with pride and pleasure that they see amongst
*The venerable writer of this article, died at Philadelphia on the \(24 t \mathrm{~h}\) instant. He was, we believe, the last surviving member of the "stamp act congress," held in 1765.
* Mr. Monroe received a wound at the battle of Trenton, in the revolutionary war, that confined him nearly nine weeks.
them the c ief magistrate of the nation, in the cav racity of a private citizen, reposing himself, with just confidence, on the affections of a geuerous penle, and are happy to embrace this opportmity, in b Half of themselves and their fellow-ritizns, to, express to him the high sense they entertain of his private virtues and piblic services.

Called by the voice of a nation of freemen to the first office in their power to bestow, you can possess no higher evirlence of their approbstion of your past conduct, and of their confidence in lliciable and faithful disclarge of the important duties isa signed to your present station. Nothing can add to the force of this testimony, founded, as it is, with unconmon unanimity on the sense of a frce and enlightenerl people.

We learn, with great satisfaction, that your present tour is connected with the object of carryian into effect the measures of general defence propos. ed by the congress of the Uni ed States, uth that you have deemed them of sufficient importarice to merit your personal attention. On this silhject, !ermit us to say, that our citizens feel a deep and lively interest. This state, from its local situation and extensive frontier, is peculiarly subject to become the theatre of war; and the city of New-York, while it affords the strongest temptation, is muc's exposed from its natural position to the attempts of a fureign enemy; although, in the late contest it has not actually been assailed, we may presume it maj; withont arrogance, be said, that the extran linary and spirited exertions of our citizens, powerfilly supported by the patriotic efforts of the people of this and a neighboring state, taught the enemy in believe that such an attempt could not be made with impunity. The wisdom of our government is display ed in the measures now undertaken to provide, in time of peace, the security required in war; and we feel the higinest confidence that, under you: auspices, that security will be afforded for every future emergency. The present happy condition of our country in general demands our highest gratitude to the Supreme Ruler of events, and opens to our view great and interesting prospects. In a state of profound peace, atter a contlict, in which the rights of the nation have been vindicated, and the honor of the American name been exalted, we see a great people united amongst themselves-devoted to a government of their own choice-j)ossessing a comitry as fertile as it is extensive-evincing a spirit of enterprise in the various employments of agriculture, commerce and mamuf.ctures, ardent in the pursui of science and in cultivating the arts which adom civilized society, and advancins in population, power and wealth, with a rapidity hitherto unexampled. The destinies of such a people, with the blessings of Providence, cannot be anticipated, and defy calculation,
It is your happiness, sir, to have oommenced your administration at a period thus propilious and interesting; and we have no doubt it will be your great ambition to bestow on those important objccis all the patronage in your power, and justify the high expectations which have been formed.
That the pleasing prospects we have indulged may be happily realized, and that your administration may, in all respects, effectually promote the best interests of the United States, and that you may long live to witness the prosperity of your country and enjoy the esteem of a virtuous people, is the ardent wish of those on whose behalf i have the honor to address you.

In behalf of the corporation of this city, I have

We honor to be, with semtiments of the lifrucs esteem, your obedient scrinnt,

\section*{J. \(\mathrm{RADCL} . \mathrm{FFF}\).}
the phesidentes avswea-
To the Mayor, Aldertien and Cummonably of the cit! of Vine \(T_{0} k\)
Feleov-citizess-In perfor anga duty, er joined on me by the constitution and laws of the United States, I camot express the satisfaction which I derive fiom the iniercourse to which it leads, with so many of \(m v\) fellow citizens-and from the opportunity it affords, to beluld! in person, the blews ings which an all-gracious Providence has extended to them. In executing the laws which congress have wisely adopted for the national defence, the Atlantic and intand fromtiers of this state, hy their exposed situation, are entitled to particular atien tion.-I am eware, too, that this populous and flourishing city, presents, in time of war, a strong temptation to the cupidity of an invading fies. It is in the spirit of the laws, witich I am called to execute, it is in the spirit of the people whom I represent, to provide amply for the securify of every part, according to the danger to which it is exposed. In performir.g this duty, 1 shall endeavor to he their fritiful organ.
The present prosperous condition of our country is, as you justly observe, the best prone of the excellence of our constitt ions, and of the wisd mn with which they have becn administered.

It affords, ton, a sniid groand on which to in. dalge the mosi favorable anticipations as to the future An enlightened people, educated in the principles of liberty and blessed with a free go-vernment-bold, vigorous and enterprising in the purseit of every just and howorable attinmenttanited by the strong ties of a common origin, of interest and affection-possessed of a vast and fertile tertiory-improving in asriculture, in the arts and manufactures-exteading their commerce to every sea-already powerful, and rapidly in. creasing in population, have every inducement and every means whereby to perpetuate these blessings, to the latest posterity.

The homorable termination of the late war, whereby the rights of the nation were vindicated, should not lull us into repose-the erents attending it show our vulnerable points, and it is in times of peace that we ought to provide by strong works for their defence. The gallarsty and gond conduct of our army, navy and inili ia, and the patriotism of our citizens, generally, so conspicuously displayed in that war, may always he relietlon. Aided by such works, our frontiers will be impuregnable.

Beroted to the principles of ur government fous my earliest youth, aud satisfied that the great bles. sings shic! we enjoy, are, under Divme l'muidence, imputable to that great cause, it will je tho ohject of my constant and zenlouts effiorts to give to those primeptes their best effect-should it by these et forlm, cuntribute in any clegree ti) the happincess of my f-llow-citizens, I sliull derive fiom it the highest gratification of whicl: my mind is misecptible.

JAHES MONROF:。
After the cercmonies of the add:css, the president received the visits of the Cincinnati-and at 5 o'clock sat down to dinner at his quarters with the vice-president, De Witt Clinton, Ifution King, \&ec. and his old companions in arins, gen. Stevens, col. Willes, and col. Platt, and oll:er gentlemen. In the evening the public buildings were illuminated.
The day following he visited the public works, institutions, \&c. In the evening, there was a spectal
m-tinin the socie\%y for the encouragement of Doriestic Mannfuctures, the president, (the vicepresident of the \(\mathbb{U} . S\). ) in the chair-Mr. Monroe Wis unanimously clected and, with much atten ior. rectived as a member. 'To an address from Mr. Tompkins on the occasion, he replied very promptIy and earnestly-" that he was sensible of the ho"10" colferred on him by this very resp. ctable society - As to its object, the promotion of domestic. m .nnf.ctures, he was heartily friendly to it, as to every other measure tha' les ened nur dependence an fireign nations for articles of necessity-In favoring manafactures, we befiriended the prosperity of the country with which they were intimately associnted, and frthered the grat mupose of the re-volution-independence. Such, he said were his opinions and disposition; but how fav it would be is his power to carry the wishes of the socicty into effect, depended on circumstances which no individual could assure himsolf of controling or regulating.
The society then proceeded with its business, on a report from the committee of currespondence. \&c.- Ifter which the president retired, \&e.
The following is a copy of the address of the state Cincinnati delivered to the president.
I'o Jimes . IM riror, president of the United Stater.
"Str-The New York snciety of Cincinnati, take this opportuaty, shen your impirtant duties, as c) ief inugistrate of the United States, lave prochred for this city the honor of a visit, to present to you the assurances of their resp ct and of their coritial disposition tosupport "i:h all their power the meal stres which tie wisdum of the governinent shall a lopt to promote the honor and welfare of our be. lised comertiy.
"Your presence, sir, recals thos patriotic emolions in which the society of Cincinnati originated. and an a dis inguished individual among the officers of the revolnionary war, of which the society iss comp serl, you are associated with the pleasing recollections, which we cherish of the result of that ardent strughle.
"We beg you to accept our sincere wishes for vour personal hippiness, and the assurance of our high esieum and consider.tion"
I'o which the president mate the following reply,
" The opportunity which my visit to this city, it the discharge of inportant public duties, his pre. vented of mecting the New Yo:k society of Cincinrati, with many of whom I was well requainted in ant revolution, affords me heart felt sa isfaction. It is impossible to meet any of those parriotic citizens, whose valuable ecrices were so intimately cont. nected with that great event, without recollections which it is equally jus: and honorable to cherish. In your support of all proper measures for the national defence, and advancement of the public welfare, I hive the utmost confidence. Those whose zeal and patriotisin were so fully trien, in That great struggle, will never fal to rally to the: standard of their country, in any emergency.

\section*{JAME.S MONIROE."}

Adhlress of De \({ }^{\text {Ditl Clinton, Eisq. to the president, on }}\) his induction into the institution of the Literury und Jhilonophical society.
".31n-As it has been the usage of this society to enrol anoug its members such characters as are distinguished for their virtues, their intellectual powers, and their literary attainments, it affords me great pleasure to inform you that youl have been unauimously admitted an honorary member-the highest honor in our power to bestow-and it is peculiarly gratifying to find that on this occasion
the bonor which is conferred is reflected on the institution.
"Viewing, in the course of your past life, the certain pledge of an able and patriotic administravion, we are fully persuaded that you will always keep steadily in view the great interests of literature and science, as inseparably identified with the lionor, the glory, and the prosperity of our country."

To which the president made an extempore reply, nearly in the following language.
"Sin-l cannot express the sensibility I feel upon this occasion.
"The high honor thus unanimously conferred, by the members of this respectable institution, will ever be cherished by me with grateful recollection; nor can I be insensible to the flattering manner in which you, sir, have communicated this expression of their kindness.
"I beg leave to assure you, and the members of this assuciation, that as fir as my influence may ex tend, is shal! be exerted in promoting the interests of science and literature, as among the most efficient means of preserving the integrity of our re piblican form of government, and the honor of ous country."

On the morning of the 14th he left New York in the steam boat for West Point. He appears to have won the bearts of the good people of the city by his republican plainness, ease and simplicity.

On the 18 th instant, having returned from West Point, he emburked on board the Steam Frigate, under the discharge of her cannon, to visit the fortifications below. This immense vessel stemmed the tide with great speed. After viewing the works, he proceeded 10 his late lodgings with the vice-president, and the next day visited Harlem Heights. fu all these excu:sions he was attended by the most distinguished citizens-and volunteer salates every where greeted him. When he visited the state arsenal, says the Columbian, "which is under the care of major M'Laughlin, he was received under a salute of 13 guns by tlec Veteran Jitillery Company, captain Chapman-I'his salute was fired from two 6-pounders, which, it is said, were taken-at Irenton, by a part of the corps under the command of colo. uel (then lieutenant) .limwoe. Afier a very minute inspection of the arms, \&c. Esc. in every part of the bni!ding, the president reviewed the corps of Vete2ran Artillery, and scemed greatly delighted at meeting so many revolutionary soldiers. On his depar. ture, captain Chapman saluted him with 13 guns more."

Among other resolutions of the corporation to honor him was the following:
"Mcsulved, That his excellency" be requested to fronor this corporation by sitting for his portrait, to be placed in the grallery of portraits belonging to the common council."

On the 2Gth, in company with several of the citizens, he left New-Jork in the steam-boat for Newlaven, where lie arrivel in the evening. The shore was thronged on his arrival; he was received by gov. Wolcolt, with his horse guturds, and by several independent companies of mititia, under f̀ederal salutes, and with the ringing of bells, and every demonstration of attention and respect, by the peo. ple of all parties. 'I he next day he was to review the troops, visil the gun-liactory, cullege, sce.

\footnotetext{
*They seem exceedingly fond of this word in NewYork. We meet it sometimes five or six times in twice as many lines, in some of the newspapers.
}

0 Great preparations for his reception are mak ing at the places that it is expected he will risit. Of this it may be said, vircs acquirit undo. The governor of Massaclusetis and the penple of Boslon, seem particularly zealous to reccirc sira in stile.

\section*{Battle of rrentor.}

Extract from the 1 st vol cha\%. S, pinge 129, of Hilkinson's .Memsirs.
"It was broard day, and the storm beat violently in our fices. The attack had cominenced on the left, a!d was immediately answered by colonel Stark in our front, who forced tle enemy's picket and pressed info the town; our column being close at his heels. The encmy made a momentary shew ef resistance by a wild and undirected fire from the windows of their quarters, which they abandone ed as we advanced, and made an attempt to form in the main street, which might have succeeded but for a six-gun battery opened by captain 'T. Furest, under the immediate order of general Washington, at the head ufKing's street, which annoyed the entmy in various directions; and the decision of capt. William Washington, who, seconded by lieuienant Jumes Monroc, (now president of the United States) led the advanced guard of the left columnn, perceiving that the encmy were endeavoring to form a battery, mushed forward, diove the artillerists from their guis, and took two fieces in the act of firing.
"These officers were \(b_{0}: h\) wounded in the charge; the captain in the wrist-the lieutenant through the shoulder. These particular acts of gallantry have never been noticed, and yet they could not have been too highly afpreciated; for if the enemy had got his artillery into operation, in a narrow street, it mighlit have checked our movement, and g,vell him time to form and reflect; and if he had retired across the bridge in his rear, and taken post, he zooula have placed a degle between iss, which, in our half. wuked, ha'f frozen condition, he ought to have defended against our ntmost efforts; and wee in turn might have been compelled to retreat, zohich soould have, been fatal to us."

\section*{Winged Gudgeons.}

This case is important to almost all persons inte. rested in machinery-which has induced tis to give it aplace.
L.AW CASE-KIRE ขs. WITHERS.

Jistrict court of United States for the district of Maryland, held the 5th June 1817 , judge Houston presiding. fien. Harper and I. Purviance esqus. for the petitioner, gen. Winder and T. Kell, esqs. for the respondent.

This was a case of application to vacate a patent obtained by the respondent, August 2t, 1813, for the exclusive right to the "cast iron wing-gudgeon," which has been generally used in all machinery where wooden axles or revolving shafis are requisite for performing the movements, and which, it is known, has been in common use in this coututry, as well as in Lurope, for half' a century past.

The validity of the patent was impeached, on the ground of usage, long before the patentee's supposed discovery of the invention.

By the decision of the court in this case, the patent of Withers is now confined to what he terms an improvement, by bevelling or slopings onc side to each wing of the edge nearest to the neck of the gudgeon so as to leave that cdge about half as thick on the innerpart adjoining the borly of the gutgrent
as it is on the nuter part connected with the bands which bind the gudgeon and shaft together; the other edge remaining of an uniform thickness.

He expressely abanduns all claim to the general principle of the wing sulgeon, as navally matle; cither with a bevel on both sicles of each wing running thinmer towards the neck of the gudgeon or with. out any bevel or variution in the thickness of the willgs.

The testimony of several experienced and respectable mill-wrighis and mechanics befure the court, wited in expressing the belief, that no benefit could arise from the allerged improvennent of Withers; and some of them expressed a belief that his alteration is injurous; in other words, that the improvement makes the common wing-gudgeort worse. It certainly makes the wing weaker, and consequently more liable to be broken off in driving the wedges; an accident whicis sometanes happens t) those of the usual form, notwitlistanding all the care that can be used in rlyiving.

Withers res!ed the merit of tis pretended improveinent on two points,
1st, "That the gudgeon made on this plan may, be fastened with four zved'ses instead of eight," which the common gudgeon requires. If this were true the advantage would be perfect! insig sificant. Every mill-wrig!st can judge how much or rather how littie would be saved in making a water wheel, by inserting only four wedges in the end of the s!aft insticad of eizhe.
2d, "That from the slope or bevel which the wing has towards the body of the gudgeon from the outer edge, the wedges in driving will tend downwards towards the boly of the gudgeon, and thus keep it more firmly fixed in its central position."
Whether the tending downwards of the wedges as thus described, wonld produce this effect, is far from being clear; but is quite certain that the effect may be casily and completely produced with the cominon gudgeon, without the aid of Wither's preteniled improvement. Any workman will see in a moment that if you wish to make a wedge tend downwards, in driving horizontally, all that you have 10 do is to bevel the werlge or make it thicker at one edge than at the other, and then place the thick edge downwards in driving, making at the same time, the opening into which it is to be driven wider below than above, which is most easily done by using a bevelled chisel to make the opening.

Conscquently it is manifest that the pretendeclimprovement is a mere alteration und not an improvement; and the act of congress expressly declares, tlint a mere "alteration in the furm or proportion of an instrument or machine, shall not be the foundation of a patent," and the patent of Withers is there. fure clearly vold. So he will find, should he ever attempt to enforce it by an action at law for its in. fringement.

But this it is confidently believed he will never do. He will content himself as lie has hilherto done, with getting paid for his pretended improve. ment, by susch persons as may ignoraully or incautiously consent to pay him, under the imprestion that his patent cmbraces, and rightfully embraces the wing.gulgeon, commonly in ure, In this man. ner he lias already gotien some money It is to be Iroped that afice the rocent proceeding in the district court he will thus get no mure.

Tine objec: of that procecling was to vacate his patent in a summary way, on the ground that it had bren oblainesi "ros refictomalg or by, filse surgestions."

The judge very strongly intimated his private opinion "that the improvement relied on by Withers was not useful, and consecquently not a pittentable improvement under the patent law." In other words, that it was a mere alteration, and not an irpprovement. But he thought that he coull not, under the summary proceeding decide on the points or pronounce the alleged impiovenent not to be useful; that being in his opinion the priper province of a jury.-lle also appeared to duubt whether the terms "obtained surreptitiously or by f.lsc shggestions," on which the summary proceeding was founded, and which the law uses in describing the cases in which proccedings may be employed, could apply to a case like this, where there was some alterition, and a machine before in use or pub. licly known, was not exictly copied.

His doubts on this subject was the stronger, inas. much as none of the witnesses had seen the grudgeon in use which Withers nozo clains, and they were consequently unable to pronounce positively, or from actual experience or observation on its inutility.

On these grounds the judfe dismissel the summary procceding, and left Withers to tiy the valili. ty of his patent, if he stould think fit, by actions at law, against such persons as may use his improve. ment without licence.

Ihis statement: inade to put the public on its gunra! against those misrepresentations of this da. cision by which it may be attempted to bolster up the pretended invention of 11 ithers, and 10 in . form millers, mill-wrig!tis, and other's colicenned, that it is not for the rounged gudgreon in common usc that he now states himself to have obtamed a pa. tent, but for an alteration believed to be mercly in form and wholly useless.
lf, however, those who understand the difference between his improved gudgerm and that in common use think fit to pay him for a licence to use his, it is their own affatir.

The object is to let all understand that his claim is founded wholly on this alieged improvement; and that his patent does not include the common wing gudgeon.

0 Note. - As a further evidence of the fraul practised under cover of the patent above mentioned, by Withers and his agents, in collectung of many who, from the ambiguity or indefinite terms of the specification of said patent, supposed it ty completely embrace the common sving gudyeon, that every mill more or less makes use of, and for w liveh they demanded and reccived paymeni of the pro. prietors, hereunto is subjoined an exiruct of a letter from Win. Thornton, lisq. superiutendant of the Patent Office, Washington, written on the 10 th of June, 1817, in answer to one which was written by Caleb Kirk, of IBrandywine, near Wilaington. Delaware, on the 7 th of the same month, for in. formation relative to the patent of Miclact With. ers.
"1'hough it would, at all times, give me minch setisfaction to be able to defend poor ingrenom jas tentecs from the numernus impositions of the pub. lic, yet being as much bound in conscience tu de. tend the public against diacet and wilful impositions of patentecs, I hesitate not io express my surprice that the patent of Michael Withers wis nut set a vide; for though the second secion of the pateut law (laws of the U.S vol. \(2, p, 20\), ) udnnits that patents may be taken out for improvemonts ia the proncifple of any machric, and tiat the proteutce shall, in such cases, be confined to the imjorovement, yet the same section cxpressly suys that "Eimply
changing the form, or the proportion of any machine or composition of matter in any degree, shal not be deemed a discovery;" and therefore it is presumed is not considered as patentable; or if patented not defensible.- The winged guilgeon, as made by Withers, has been in use for forty years; but to ob \(t\) in a patent he only bevels one erige of the wings instead of both.-This is no change in the priaciple. It is a small alteration by omission; in the same way three wings would be an alteration from four; and 99 cogs in a wheel an alteration from a 100 i but such alterations would not be considered in the pitent law as inventions. This alteration in the gudgeon is neither an invention nor improvement; and none but a gudgeon can purchase a patent right for such a gudgeon. At the utmost the decision mentioned to me can allow only the privilege of having any impositions practised under his patent, decided by juries; and can admit no power of selling more than the alteration, which nobody will buy.-- When his patent was first grauted, I ohjected to it, as a gross imposition (but there is no discretionary power in granting patents) and informed him there were about four thousand winged gudgeons in the public works at the navy yard, in this city. He went and saw them -bit was afraid to make any claim because he would have been published as an impostnr.-Mr William C. Newton, of Alexandria, his agent, knows all this, and much more.- He has, neverthe. less, charged and extorted money from many of the millers in various parts of the Enited States for the right to use the common zingeal gulgron, under Withers' patent, which is not sustainable in any court of justice; and if the patent now under consideration can only be supported in conseqquence ot deviation from the common gudgeons, he will, of course, be liable to a warrant or a suit to recover the money paid, in every case where he has thins frat dulently charged for the use of the common winged gudgeon-for this is expressly contrary to the letter and spirit of the lat-and this construction is applirable to the sale of all patent rights thus ob tained."

\section*{Hessian Fly-Lawler Wheat.}

At a meeting of the cultivators of the Lawler wheat, and others, at New Baltimore, on the 27 th day of May, 1817, it was on motion resolved, that in consegnence of the providential exemption, wifich this wheat has experienced in this and former year's from the ravarges of the Ifessian fly, in this neigh. borhood, a duty is imposed on the cultivators of it to endeavor to render this blessing as ditlinsed as possible. That-a principal means of effecting that object, will be to give publicity to the evidences of the fact: wherefore, it is also resolved, that it is proper" to appoint a committee to prepare such a statement of facts on the subject of the Lawler wheat, as are notoriously within the knowledge of the people of this neighborhood, and which may be substantiated by incontrovertable testimony, if required, together with such certificates of experiments of a special nature, as may be deemed worthy of notice; and that the said committee report the same to a meeting to be held on Saturday next the 32 st inst. at Luckland, Prince William cormty. Tise following gentlemen, to wit: John Love, Thomas Hunton, Gerrard Alexander, sen. George B. Pickett, Griffin Stith, Martin Maddux, and Owen Thomas, being named and present, consented to serve as a committee, and the meeting adjourned.

MARTIN MADDUX, Sec. WM. S MOONEY, Cl'k.

The ro mitpe to whom was assigned, by a meet. ing hell at New Balimore on the 27 th inst. the duly of preparing such a statemicut of facts, in relation to the kind of wheat called the Lawler wheat as are nutorionsly within the knowledge of the peosple of this neighborhoorl, ingether with special certificates of experiments made, in proofof this w'eat not beiag subject to iuj ury from the Hessian fly, have endeavored in the best manter the time limite ed would allow then, to peeforin that duty; an:l re-port-that the following facts are notmions in this neighborhoorl, and can be supported by the testimony of many respectable men, to wit: that this Wheat was introducel among us in the year 1810 , in a small quantity, by James Lawler, (since dead) and who stated, that he had procured it in Cliester county, in Pemnsylvania, where it was called Jones' white wheat, and was said not to suffer injury from the Hessian fly: That it has been propagated with some attention in this neighborhood, and in the course of its cultivation, including the present searson, has not been injured by the Hessian fly: That the present crop of it is ofluxuriant growth, in nraportion to the land, and promises an abundant harvest, while every other kind of wheat. is injured in a most serinis degree. It is a smontly headed white wheat, of tall growth, nearly on a medium be. liveen rye and the bearded wheats; later form three to six days than the golden beard, when sowed at : he sume time, and when the fly has not i: jured the beatded kind; but from thit circumstance this year, appears to be in an equal state of forwarduess with the best bearded wheat, it having met with no ubstacle to its growth, and the seasoa having been good. A peculiarity of gencral notoricy is, that of its appeatance of firing, to a very great degree, soon after the cominencenient of the spring growth; the loscr blades, which seem only to have been ittended to survive the winter, turn yellow and die, without affecing the stock. There has becin constantly found in it a few grains of a rel chatf wheat, the grain a deep red; this kind of wheat is subject to injury from tire fly, as experiments have shewr, The conimittee have thought proper to confine their repori to staiements of a genera: ilature, rather choosing to submit to the test of investigation, if d emed necessary by any one, their individual relations of more particular matters, belonging to the the subject, and therefore refer to such statements, torcther with those of others, who have presented ticesulis of their expriments amd observations.

\section*{JOHN LOVE, \\ THOMLS HUNTON, \\ GERKRAR1) ALKXANDER, sen) \\ GEOREGE 13. PTCKETT, \\ GRIFFIN STTTH, \\ MAIRIN MADDUX, \\ OWRN THOMAS.}

I have sowed the Lawler wheat for four years past on the Bueklimd tarm, aud have never known the cropinjured by the Hessian Sly: this year it has ant unusually healtiful and abundaut npliear-
ance. I have also sawed last fall of the bearded kind, and early ance. I have also sywed last fill of the bearded kind, and early
wheat, both of which are much injurd by the fly; the early whice whest in a less degree than the other, yet the injury to that is not less than one hatf the crop. I ans enabled to make a more aceurate estimate of the injury done the early wheat, from the circnmstance of che same ground liaving been two years ago in Lawler whent, appearing to be doubly as thick then, although there has been no exiausting crop since taken from the land, and it has rcecived two slrcsings of plaister, and the presrint year much no se propitious to the growth of plants than that; I reaped of
the Lawlre wheice twenty-five bushels to the acre, I do not think the Lawlre whect twenty-five bushels to the acre, I do not think the product this yearin the early wheat will exceed ten or twelve bushets, if what remains is harvested; but it is daily falling from the inflictions of the fly: I think I shall lose seven hundred bushels, by sowing 68 hushels of the May wheat last fall.
The first year I sowed the Lawler wheat, I reaped eleven for one, which was a full erop for the quality of the ground; fiom the land adjoining it in the same field I did not get more than three fep: ont; that year many crops were destroyedtly the rust aud ror, my
tawler wheat was not hurt. The nest year I sowo-d sev-nter-hy. Lushisls of it, and o:ie hundred and ninetyotive of other hionls. (watsing 270 mesbels.) I made mure for in the I.awler what than ail ilee \(r\) st. The thiml year ( s owevi of it nearly my whele eropl which iariupes buth on guantity and quality was thio best lever which in ripect both in guantity anil quality was thre best ever

 of lutuety bushols secdme, which wilf toet. if pres int inplearances mase \(r\) alizont, pradare ctoree fold more than the beariled.

The proiluct of the Lowler what is tluer, is al great I think as
 of live thousa ad bushols of it, zo a poond prolit. alour givi-ig a tarrel nure of su:prlin Hour for each one humlred lmalh. Is, ithan is eustonars for red what. IOHN LOVE.
In \(1 \times 14\) or 1813, I phatained we mushel and elarec preche of the
 th rush made twetty ote and one hali' hmshels of in reliantenble Wheat; "ly eropthat year was materiaily injured by the fly, exe pt the a sove suoali quastity. last \(y\) ar I conv-nrue -1 sowius ahout thi. 85 chal' S plesister, that is now the most promising part of my crop. and applars to be mtirdy pr mppt trone the fly? and although I haw t onnt oceasionaliy a fly in the wheat, obstriet ex amination I won lefi tuduast, whether it is conlined eatirely th the mixture wheh is generally found in the what; neither lins it ever bern iapurd sume by the rest. Nomerons instances and exprrinuchts masle by di!lerctit personat liear me, in several years past, are such as cunsirain me to b li we that the Lowler wh at is puovidmatially Iron soine cans: alinost if not entimly exernpt fro \(n\) the ravages

THOMAS HUNION.
Having sustai..ed, in common writh my, ncighbors, alnose the entire loss of ny growing crop of wheat frum the ravages of the fly, I was inducid to visit the neighborhourls of Haymark at ant Buchland, for the furpose of examming the fly prow wheat, kauwil in th s. parts of the country loy tho name of Lawlor whicat, and cultivated this year in considerable quantity, by Messrs, Juhn Lowe. Griffin Stith, Wm and I'hos. Huiton, and others; I was fully satisfid, upror viewink ther rispective fa:ins of these gentle men, thet this wionat is eltitl-d to the character of By-proof, the firlds of each of thom exhibiting the most abundant crops of what I have ever seen, kelow the Bultrin munntain, and unless som fil 10 dissuter shall b.fal ilwom, will probably yiek an av: rag; of froinfifiento twenty bushels perace-; it is proper to \(\mathrm{r}=\) TY . Hent cach of the larmis of the above gentletnem, except IFan. Huntoin If fonnid apverul of the other litutis of wheat, usually cultivated in Virginia-such as the golden bearded, purple struw, sul white wheaf, growing on syu- terins in the same field with the fly-proof ur Liwler whealf on others a fence or ratad only sepprating them, and in every initance, the fly had injured the former twry inat-rislly; while the latter or fly-proof was lelt unhinrt; I bave therfore nu liesitation in recommenting this wheat to the attention of every harmer in Virginia, to bre suwed ia preference of anyother; for myself, I am fully ennvined, uruler present cir cumbances, of diefutility of wwing any other hind known anong ins in this state.

GERNIR ALEKANDER, SAH. 1, Owen Thunas, do hereby e rtify, that in Die. 1811 . I was in derotioest that the Jones's white wheat was cultivaterd, and was cold thut since the intruluction of that what there, thery had not expe nenced anyimury from the llessan fly. I intended to havie brought mome of it to Virginia, but by liffirent ocenrmilecs was prevented; after ins return I found Mr. Jain sawl \(r\), of th- suine collity I lined ill, lind brought a sinall parvel in from the sanne place, and had orfild in; 1 got aeed of chat, und have sowed it for four year panat; it has wher been impurnd by the fly. I sowed : fort of iny eno of l.awler whent last tull int the first wo io in \(\$\) peent err; it is now the ber wheat I have, ill pruptirtun 10 the quality of th. lund inal hat uot bew as all injured by the fly: a part of iny crup lave ycar was injured ty the ruit, and I ano patiofind is was owngs 10 a particutar cause, wo some of it was not injural; and I do nom b-lieve that the Lawler what is niure subfiect to rust thon where kimis; 1 havesow dlavefllity whol emp of it. OWESN IHOMSAS.
I John Brown, of F Nituer edmioy, lo herrhy certify. that on the
 with threv of the purpie siraw, alld eawnet hin together, and sowent wauning wholiy of the dawier; that the purphom one whe wimust

 aljuinug it, which was numanel with aus wher. Ihave continurd ha suw of th Lawler hind, and bive not hat any of ing eruys of that kind iujurerl hy the fis. I eronind a pert of miy crup at Mr. Iave's imill Inte seasin, and got twaty yone barrels of flour to the himilred buth-ls, and flour of exerllemequalis. If found anoug the law ler
 peck it ont in the fall of 1814 a puth of that wheni, and sowid is hy

Th3, and have conti
 whed to cultiv te it erer sumer, sowing gonm mally wereral himdo, ant
 the Lawl r wheal ionl with eurkle wind elinut. \{th eave of which i

of the monntuin white wheat, and now find the latter very much injured by the fly, anl the lawler not at all inmert; and althouph the land which was fallowed is mueh richer than the com land, ic will unt make as much prer acre from the presetit appearance. Last year I had four hinds of whrat in the same field, und now I tind tio volunteer wheal, ouly whrre the Lawler wheat wiss suwn and beli-ve that th"- fly took the whole of the ofther volunteer whene lant liall, and did not touch the Lawler. JOHN HAMPTON.

May 31. 1817
1. Joseph Ball. of Fanquier eounty, hereby eertify, that in 1810, 1 plouglied in, in the moith of August, my stublle, a part of which was of the Lawler whent and a part of the purple straw, with ans intentiva to sow it again in whrut; that the wheat which came op in the purple straw stinbble was ilestroyed by the Hessian fly. bit that which canie up from the Lawler wheat stubble was not injurnd. linth these kind of wheat ca ne up about the last of tuguot or tirot or Septembrr, from this circumstance, and th = general ex prri nee I liave had in the cultivation of the Jawher whet I am cancinced it may be sowed at an earlier period, withont risk from the fly.

JOSEPH BALL
I have marle one erop of the Lawler wheat which was of ex. eflle \(1 t\) quality; but I thought the yield was not quite so great as that if sume other wheat. Th. Heasian fiy did not injure it in the sliyhtest degr.e. My present erop is chiefly of the Lawler whear, and very slighely iniureal hy the fly, as there can ouls here and there be found anl affected huncli after the strickest search, and my other wheat, the monntain white- and the Baltimore bearded, is so injured as not tu lrave roum to espect any thing like a half crop. I am of opinion that the Lawler wh-at will bear sowing early in September, withont danger of inaterial injury frum the fy. I will add, that my serd wheat was a little mixt, and the quantity of fy-injured is not 1 think, greater than the misture of other wheat.

ISAAC FOSTER.
May 28, 1817.
I obtaised fiom my neiplibor, James Lawler, in the fall of 1811,2 hal bushel of wheat, which he brought the seed of from Chester eminty. Pa. un acernint ol' its resisting the Messian Hy. I sowed it in Nuvember, n'al raisisl seven anil a hatt bushels, whieh I sowrd is 1512, and raisul o:me landred and tell, and have simce continued to sow said what; my crops last year ami this are entirely of that kind; 1 would sow int mh \(r\), being sativinetorily convinced, from experiment a dodservation, that the fly would not wfiect it. I be heve sain whoat is of suprrior quality tor any raised in this neigbborhoud for sunn- years; as a proof, Mr. Love gave me for ing last crop a barrel of thour, in the limudred bnsh-ls, more than for other Wheat, and toid me notwithstanding lis pholits wire more than they were in the rid wheat; als.o, I lately sent nine linghils and three peck a by measure, weighing at the mill ten bushels and twent y-six polluls, lad it ground firr family use, from which 1 get, after the commoll toll ithe tenth) was taken, four hundrid and fifiy-four ponnds eveellent flour. Said wheat has not berell injured since I raisul it by anyy disastur, except the second erop injured a little by rusi, as was my croll of other wheat the sance yenr.

WM. HUNTON.
Buckland, Kinslcy Mills, May 26.
Haviug been, during the last and present year, principal miller in Mr. Luve's nills, called Kinsley, I Inrelyy certity, that it have ; rounl, during the past season, upwards of five thousand bushele f the Lawler wheat, amil for the portion of it gromm 1 for others, have givell at the rate of 21 barrels of superfine flour for each 100 bushels and I am satisfied a better profit has been maile on that than the avirage of md whenc. ground at the rate of 80 barr ls of superfine flour to the 100 loushels, anul that it will virld as much finour as any other white wheat I huve ever ground; it having been mived with red Wheat as it exnir into the mill, I camut stute what was the product of the whole but I think it has exo eded 195 ibs of flour for four busle ls 20 l's. of wheat Mr. Wilians Hunton lately brought ten bushels and (winty-sir promuls, it wav purpared for family use, and partisularly well chean d, nut wet ssary to lhe servemel or fanned 1 ground it after taliugg coll, a tenth, and what revainied produced two berrels of 196 lbs e each, and 62 lbs of sulurrinm flours.

WM. FLORFEXCE.
Mr. Lowe hiving stated, that he has had the mor tification to hear that reports have been circulated that he intended to demand an exorbitant price, or exchaige, for his Lawler wheat : on his motion it was

IResulvedurnamimously, as the opinion of this mecting, thst it would be improper and might justly be decme I illiberal, in those whos lave beon so favored, as to be possessed of a species of wheat satisfaciorify shems to resint the lravages of the fly, io reyulro of such of their less fortunate fellow-citizens as sice deanimy of obtaining seed, a price for it be. yon! alr equal exclange, and a fair compensation in a lilitism, for the risk and truuble of retting out their cr(u)s in the summer scason; and that from the e conviderations the price required by any member of this mecting shall not exceed the ralue (when a price is agred un, or cxcluange, when exclange is made) of one buylicl and an lialf of common irlicat for one of lawler wheat.

MARTIN MADIUUX, Sec'r.
WM S. MOONEY, Clerk:

\section*{Foreign Articles.}
enelisn, 道c.
We late London dates of May 1. The distresses of the people still occupies the papers. The princess of Wales was expected at Paris.
I.ondon May 1.-We received yesterday the Paris papers of Sunday last. The following from ohe of them dated Madrid the \(14 \mathrm{th}_{\mathrm{t}}\) ult. serves to shew the impression upon the continent as to the negociations between this country and Spain, with relafion to Spanish Imerica:-"Our department for foreign affairs has been for some time much occupied. Important negociations with England are publicly talked of, and an arrangement is spoken of with our insurgent colonies, through the mediation of that power. It is also said that negociations are on foot respecting the Fioridas, and that we are to cede those countries to the United States, on receiving a suitable indemnity."
prasce.
Midame Kegnault de St. Jean d'Angely is saicl to be charged with holding correspondence with some of the esiles.
A military court assembled at Paris for the purpose of trying marshal Grouchy has declined to act, thinking themselves incompetent. An idea is held out that the difficulties as to his case may be re. moved.

> sPAIX.

We have many accounts of the disturbed state of Spain-but such is the case of the press tha+ the truth cannot be had. Gallicia is said to be in open insurrection.

Arrests are so numerous in most parts that the prisons and cas:les can no longer hold the loving subjects of the "adored" Ferdinand. Wouid that he were the tenant of the deepest dungeon he has !

Don Antonio, the uncle of Ferdinand, died abou: the 22 d of April last.

ITALT.
This country abounds with robbers and assassins. Picquets are placed along the great roads for the protection of travellers, to little purpose. Pestilence and almost famine prevail at Milan and the paris adjacent-373 persons died in one street in 24 hours. The disease is called febra apppheticha, considered highly contagious, and said to have had its origin in the bad living of the poor.

\section*{netherlanis.}

It was reported at Paris that the \(\mathcal{N a i n}\) Jaune, and the Liberal, two newspapers, had become objects of jcalousy to the allied powers, who had requested that they might be suppressed!
portceal.
We have a renewed report of a misunderstand. ing between Portugal and Spain. It is said that gireat warlike preparations for defence are making by the regency of the former. The king seems in a bad way-rebelled against in the country he honored by making a kingdom of, and threatened in his old possessions by his dear son in law, Ferdinancl.
flomina.
The governor of Pensacola has not yet permitted the provisions destined for the U. S. troops in the interior, to pass. He received 10 per cent. from the contractors for permission to land them, and demands 3 per cent. more as an export duty.
mexico.
Gen. Mina, with a supposed force of about 1000 men, landed at Soto la Marine, in Mrxico, 35 leagues north of Tampico, on the 22nd April-from whence he is said immediately to lave marched
for St. Auder, the capital of the province, being joined by 7 or 800 of the militia of the country. Strength to the urm that strikes for freentom. May complete success attend him, while he wars against Ferdinand and his monks.

Sovti AMEMTCA, \&c.
We have a report that . Monte rideo and rio Grande have been taken by a Buenos Ayrean army Accounts from IBahia (Brazil) say-"A native pricst had been detected and executed as a spy and emissary, a few days after being landed in the night, hear that place, fimon a vessel dispatched by the government of Pernambuco, Numerous letters ic inclividuals in that provice were taken, but being directed in cypher, and the priest refusing to name them, the secret died with him-his last words were, "I die for liberty, my country and her Independence."
If such a spirit is ahroad, the king of Portugal cannot lay it. Will the "holy alliancers" help him? They appear perfectly indifferent as to the fate of the colonies claimed by Ferdinand, and, indleed, seem rather to wish them emancipation than otherwise.

Some troops were to sail for Rio Janeiro from Pernimbuco on the 17 th of April, to suppress the "rebellion." Thes were only about 2000 in number.
Our last accounts from the Brazils speak of dis. affection at the capital, Kin Janeiro, where it was also understonod that the blockading sqitiadron "gave very little trouble" to the people of Pernambuco. The provisional government of this new repub. lic is composed of men of talents.
From the Oronoko.-By a vessel arrived at Salem -That on the 10th of March, the royalists, about 2000 strong, under Morales, who had proceeded from Angostura, to attack the patriots at a place called the Missions, 100 miles below Angostura, were totally defeated and cut to pieces, only six men escaper, including Morales, and 2 other onicers. All who were not kiiled on the field of battle were afterwards shot, and among them, Sheruty, formerly governo: of Angostura.
After the battle, the patriots under gen. Piar, approached Angostura, where they threw up a breast work, upon which the guns of the fort could not be brought to bear, and imniediately commenced firing upon the town within half musket shot, and the firing had been continued day and night. They had made several attacks upon the place, but without great loss on either side. One of the officers had gone for canmon, more effectually to attack the works.

The patriots had completely surrounded the place and the inhabitants and garrison were reduc. ed to the most wretched and pitiable condition for want of povisions. Great numbers had actually died of starvation. Horses, mules, jackasses, dogs, \&c. had been consumed, and the governor himself had actually paid 3 dollars for a Cat!
A great number of the inhabitants had left Angostura and fifteen hundred, principally women and clildren, in the most pitiable condition, sailed the same day the vessel left, in Spanish vessels. The men were not allowed to depart. Our informant thinks it impossible that the place could have held out more than two or three days after he left, unless relieved in some unexpected manner.

Guayana was still in possession of the royalists -it was strongly fortified, and no probability of its being taken except by starvation.
Fizzgerald, the governor of Angostura, who had been arrested and sent to Carracas, on suspicion of.

Teachery, had been ordered back, and was still in command of the place. The most sanguinary ineasures were adopted at Angostura in reçard to suspected persons. Eight men were shot at one time about the first of May, on susfricion of being fiiendly to the revolutionary cause.

The forces of the patriots were estimated at from foire to six t!ousand men, all inounted, and they had complete possession of the surrouading country.

The Tiger, of Salem, was the only American vessel at Angostura; slie curried out a small quantity of provisions, which were immediately taken possessinn of by the government.
a The citv is now reported as having surrenderel to ihe pairiots.
[Angostura, is a city in Snuth-Imerica, neally 400 miles up the river Oronokn. It is the only port of entry on the river. It stamels on a high point of lan!, and commands a beautiful and extensive prospect of the river and comntry. The place contains about 1000 houses, built of stone.

\section*{WOODBINF:-AG:AIS.}

St. Stephens, ( Miss. Ter.) May 23.-Our reatlers will be abte to judge when they read in this dhy's paper, the late talk of the arcli villain Woothine to the Creck Indiane, which has been the cause of the late murders committed on our unafiending cilizens of the fionfier, by the lower Crecks. The Talk alluded to, was handed us for publication by a genileman of veracity from frirt Jackson, who was called on by the thin Warrior to consult and return an answer. He informs us, that every word and deed of the Big Wartior, on this occasion, has been that of a parriot and a true friend to the Unitci Slates It is not our wish to unplicate the British govermment in this businese, but we would noly remark, that it would be well to watch more narrowly, the conduct of some of their agents, or rather that they select men for such imporiant stations of more honesty and truth than col . Wnod. bine.
[ Hitryon.
Copy of a Talk sen: from dice Dritioh agent in Finse Floridu, to the BIg Harrior, head clinef of the Creek nution of Indians.
When the English made peace with the Ame. ricans, they included the wiole of the Indian nativne, vi= (redk, Clinctaw, Chickasaw and Chem)-
kec; those nations were guaranteed is wr quei possession of their latads, and the Americans engased to give up such lands of the Indians as they liad taken possession of duri gr the war.

If they hive not done so, or if they have been making further encroachments, the chiefs have only to represent their complaints aud the ufg ession: of the America.s, to the governor of New.l'rovi dence, who will forward them o. England, or get them conveyed to the British mmister at Wasaming ton, who has orders from the king of England tu see that the rights of the nations above mentioned are protected, and the stipulations contained in the treaty, in their faror, are fathfully carried into execulion. The Americans have no wish io go to war with Great Britain; they will not, therefore, do any thing contrary to the treaty, and whav enerouchments have been made, must be withont the know: ledge of the chief of the American roverninent : and so soon as he is informed thereof by the Bri tish minister at Washington, he will order the American people who have taken possession of Indian lands, to draw back to their own possessions.

The Indian nations are all one great family; they possess lands their great forefathers handed down to them, and they ought to hand them down entire to their children. If they sell their land, what do they receive for it? Nothing that will last-it is wasted away in a few years. Whether, therefore; they sell or give it away, they are robbing their children of the inheritance they had a riglit to expect. As a great family they ought to live as such with each other : let the four nations join in bonds of brotherly love; let them smoke the pipe of peace; let the cultivation of their lands be their chief ob. ject during the spring and summer, and hunting their diversion during winter; and the produce of their labor will be bought by grood people, who will come and deal with them, when they know there is any thing to be purchased for goods or mo. mey.

If the Americans, or other nations, live near them, let them live in friendship with them, and keep up a good understanding; but on no account sell or give away any of their lands.

I recommend this as a friend of humanity and of sood order.

\section*{A. ARBUTHNOTT.*}

\section*{Okolokne, March 11, 1817.}

The head cliefs of the Upper Creek nation, have desired me, Oponey, to get the straight talk for them; what is written in the foregoing, I believe to be the true and straight talk, reccived from an Eng lishman, whu carried two depuies to New-Provi dence, and has returned with them to Okolokne.

I Oponey, lave been sent by you, the head chiefs of the Upper Creek nation, to see the Seminole In. dians; I have done so; they live quietly and peaceably, and wish to do so with all their red Breiliren in every part of the nation.

Opoy Hatcho has desired me to see those things; I have done so, and sce all quiet, and laid the talk I now send you, and shaken hands with the friend who gave it me.

That the friend I have met came over with goods, by desire of the chiefs of the Lower-towns, and is a true friend to the Indians. The various and untrue talks that you send me from time to time, must be made by some person, an enemy to all us Red Brethren, and ought not to be listeised to; lec

A. AR4U'IINOTV.

Himiss-. Irov Moust.
\(\therefore\) 天er-Orlcants, .1/ay \(7 .-\) The following letter will be read by the public with decp and scrious atten ti) \(n\)
Fxtronet of a letter from an indian agent at Natchitoches to the commanding otficer on that frontier, dated
Indiun agency, Niatchitoches, NTurch 25th, 1817.
Srh-Tlie enclosed exhibits the names, the num. ber of warriors, and the geogriplical position of the several Inclian iribes comected wit'? this agency, taken fiom the best source of informition I am able to obtain. Those marked thus* are supposed to be under the influence of Touling and the Caddo chief.

On his (the Caddochief's) return from St. Antonio, not long since, he delivered a speech to the Haines and Natchioches to the following effect:
"You recollect when our old friend Tooling told us not to permit the Americans and their Indians to come into this comntry, they would kill all our game. We were fools and did not believe him; now you see his words were true: the Americans and their Indians have killed all our deer and buffuloe, and it is diffir:ult to get meat for our families: I am just returned from St. Antonio, and my advice is, that you have your bous and arrows readly.
"Our old \(f\) silier, the king of Spain, will son be here and drive all ilie Americalls to their own country; and when any of their traders come among you, if you cannot get oods at your own prices, seize and carry ti em to St. Anonio."
Similar talks have been given on Red river, and some of our traders have been mal-treated: their licenses have been torn, and they were tireatened to be driven out of the country: 'The Indians said it vas Tooling's and the Caddo chief's orders to do so.

I have also seen a letter signed Morphy, who in said to be the Spanish consul at New Orleans, to the clief of the Appaches, inviting him to Havana without a moment's delay.

The simultaneous circumstances induce a belief that the Spaniards are attempting to engage the attention of the Indians for some future operations ir this quarter.

Mr. Crowinshield, in his incomparable vessel; Clenpatra's barge, was at Madeira on the 1st of May -from thence he was about to proceed to coast and visit the whole shores of the Mediterranean.

The repurt that \(\mathbf{M r}\). Webster had sold the copy, right of his spelling book to the Messrs Goodwins, of Hartford, (see page 240,) is not true.

Towns and villages jump up so suddenly in some parts of the United States that it is at times ne easy matter to know where they are by their names. We lave received the first number of a well looking newspaper publisherl at the "upper end of Independence street," in Perrypolis, which zve believe i.s in Pennsylvania, near Comelsville. It is not noted in any of our books as a town, or mentioned in the post office lists.

Erie. Pens. June 7. A considerable quantity of plaister of puris lias lately been brought across the iakesto \(t\) is piace. It is said the quality is superior.

\footnotetext{
* Chis enclosure, fur obvious reanons, it is deemed impsoper to publish at this moment.

\section*{( \(\mathrm{F} \% \mathrm{H}\) II)}

Eivivan scate, Nigust 27, 1790.
 spatin shomidd come to the decision of arms, froin a variety of circumstances (intividually unimportant and ineluvive, but very much the reverne when compared and combined) there is no doubt in my Wind, that Now-Otleans and the Sjanimh posta above it, of the Ahssit+ippi, will he amung the first at tempts of the furmer, ald that the reduction of them will be underiaken by a combined operation sroin (1) troit.

The erwequener of haviuns so furmidable and enterpriging a peupleas the Hritiols on both nur lank: and reat, with their navy in front, as they respect our western settlement, which miny be sedheed Ghereby, as they regacil the securily of the uniou
:nil its commerce with he West-Indies, are 100 ubvions to seesl enumersion.
What then should be the answer of the xecutive of tice United States to lord Dorchestir, in case he stouldapply foip pernissum to tharch irgopsthrough the ierringy of the said states from Detroit to the H1suissipppi?
What notice ought to be taken of the measure, if it should be undertaken withont leave, which is the most pi bable proceeding of the two?
Mr. Adams will oblige the President of the ruited Sta:es by giving his opinion in writing on ti.e above statement.

\section*{GEO. WASHINGTUN.}

\section*{Mr. Adame.}
(No. III.)
Omitted-being the rough draft of No. IV. (No IV.)
New-Y゙1иц, August 29, 1790.
Sin-That New-Orleaths, and the Spatish, posts on the Mississippi, will be among the first attempts of the Enghsh, in case of a war with Spain, appears very ponbable: and the a combined operation from I) (roit, would be convenient to that end cannot be doubted. The consequences, ol the west-rn setilements, on the commerce with the West-Indies, and on the general security and irsiquility of the A werican confed-ration, of having them in our rear, and on both our flanks, with thcir navy in front, are obvious. The incerest of the United States duly weigher, and their duty conscientiously considered, point out to them, in the case of such a wa", a neutrality as long as it nay be practicable. The people of these states would not willingly support a war, and the present government has not strength to command, nor enouyln of the general confidence of the nation to draw the men or moneyn cessary until the grounds, causes and necessity of it should become generally known and unisersally approved. A pacific characier, in uppusition to a warlike tem per, a spirit of conquest or a disposition to military enterprist, is of great importance to is to preserve it Furtpe: and therefire we should not engage even ina defensiv: war, untal the necestry of' I should become apparent, or at least, lill we have it it our power to make it manifest in Earope, as well us at bome.

In oriler to preserve an hones: neurality, or even the reputation of a dispositusn to it, the L'mted Sutes must avoid as muci as pussible, every real wron!: and even crery appeatjace of injury to cither party. T'o grant to lord Dorchester, in case he shoubd requet il, permiasuin to march ipoops through the territory of the United states, from Detruit to the Missisipippi, wouid not oilly lave an atpearance offersive 10 itie Spariards, of partiality to the English, but wobld he a real ing iny to spain. The answer; therefure, to his lordship stwuld be a refusal, in iefins cleal and decidrd, but gumeded Had dignified, in a manmer, wiven no power has more at cominand than the President of the United States. If a measure so darim, uffinsive and l.09. Whe, as the march of trecys itrough our ternitory D atlack a friend, shoult be hazanled by the Eagstisa, withalli lewie, or cepecially aftor a refusid, if
is not so e sy to answer the question-Whar notice ought to be iaken of it? The situation of our country is not like that of most of the nations in Eurmpe. They laave generally large numbers of inhatitints in narrow territories. We have small numbers cattered over vast regions. The country tirough which the Britons must pass from Detroit to the Mis-issippi is, I suppose, so thinly inhabited, and at such a distance from all the populuns settlements, that it would be impossible for the President of the United States to collect militia or march troops suf ficient to resist the enterprise. Af er the step sithll Dave been saken there are but (wo ways for us to pro-ceed-one is war and the other negociation. Spain nould, probably, remonstrate to the Piesiderit of the United States; but, whether she should or not, the President of the United States slould remon. strate to the king of Gireat Brilain. It would not be expected, I suppose, by our friends or enemies that the United States should declare war at once. Nations are nut-obliged to declare war for every injary, or even hostility. A tacit acquiescence under surl an outrofe, would be misinterpre:ed on all h.ands, by Spain as inmical to her, and by Britain as ille effect of we:Kncss, disunion and pusillanimity.

Negociation, then, is the only other alternative. Negociation, in the present state of things, is atrended with peculiar difficulties. As the king of Great Britain twice proposed to the United States an excharge of ministers, once through Mr. Hartley, and once throughl the duke of Dorset, and, when the Urited States agreed to the proposition, Atw from it, to send a niminister again to St. James', till that court explicitly promises to send one to America, is a lumiliation to which the United States ought never to submit. A remonstrance from sovereign to suvereigh cannot be sent but by anl ambay sador of some order or other: from minister of state to ninister of state it might be transmitted in many other ways. A remonstrance, in form of a letter, from the American minister of state 10 the duke of Leeds, or whoever may be secretary of state for foreign affairs, might be transinitted thro:gh an envoy, minister plenipotentiary or ambassador of the president of the United States, at Paris, Mdrid or the Hague, and through the British ambassador at either of those courts. The utmost lengils that can be now gone, with dignity, would be to send a minis er to the conri of London, with instructions to presen! his credentials, demand in audience, and mike his remonstrance, but to make no establishment, and demand his audience of leave and quii the kingiom in one, two or three months, if a ininister of eqtial degree was not ap pointed and actually sen: to the President of the United S'ates from the king of Great Britain. It is a misfortine that, in thes critical moments and circr:mstances, the United States have not a minister of large views, ma ure age, infirmation and juldgment, and strict integrity, at the court of Fiance, Spain, London and the Hague; early and authentic in elligence from those courts, may be of more importurice than the expence: But as the representatives of the peopie as well as of the legislatures, are of a different opimon, they lave made a very scanty provision for but a part of such a system. As it is, fiod know's where the men are to be found who are qualified for such missions and would undertake them. By an experience of ten years, which made me ioo uhhappy at the turne to be ever forgotten, i know that every artifice which can decenve, every temptation which can opcrate on hope or fear, ambi--ion or avarice, rride or vanity, the love of seciety,
pleastre or annusement, will be eraployed to divert and warp them from the true line of their duty, and the impretial lomor and interest of their coumtry. Tin the superior lights and informa ion derived frome office, the more sercne temper and profound jullsment of the President of tie United Slates, these crude an.1 hasty thoughts, concerning the point proposedl, are humbly subinitted, with every sentiinemt, \&c. \&c.

\section*{Political Economy-No. IIT.}
prophititios the fociath.
Tiat manufactures establish a st ady hume market that may be depended upon, athed huve been found every zwhere to give a stimulus to agriculture- in whichch ie zvill afpeneir that it is not alwurys the interest of indivilinults io purchase a torcign urticle bicause they cun get it for less money thun the domestic one costs. prapostition the fiftil.
That it is by manufuctures, only, that wee can bring into aperation the whule productive labor of our conntry; which is the true and only certuin source of weallh in amy one.
proposition tue sixta.
That certain manufuctures, now exceedingly depressed, such ta those of iron, fur instance, nust be suphported, being indispensable to our prol tical ind pen-dence-und that these maminf.uctures being annihiiated, cannot sulile ly be reetured, if wee shouid want them ever so muc/l
phoposition the seventil.
Thut the ligh price of labor. "s the phrase is. is no objection to mamufuc:uring - for all wise uationstro. hibit the amportation of [or lay hecavy duties uspon] many things ticey want, which they cunid \(\rho t\) jor iess money, from abroud then they make then, f., at home. Instance Enghilund, zohu refuses to receive the cottom goods of her own colonies in Asia.

We thimk we have very clearly shewn that it is imposssble for us, merely as an agriculural people, to clothe and supply ourselves in the confortable, and, to a certain exient, in the lusurious manner that we now do. With the most prosperous slate of things and at the very lighiest, and, indeed, exorbitant prices for the product of the soil, we seem to have the cupacity to raise a value of
- \$495,653,000

Of which we require, to subsist our. seives and our horses

314,612,000

\section*{Leaving a surplus of}

181,041,000
But our wants for clothing, \&cc. are equal to
\(310,000,000\)
And there would be an absolute an nual deficit of
\$128,959,000
This deficit, enormous as it is, under the circumstances supposed, would be immensely increasedif we required the import of 310 millions ins ead of 60 or 70 , and had for export the value of 180 instead of the 50 or 70 : the value of the imported goods, by the increased demand, might be raised 50 per cent., and that of those to be exporied be depressed at the same rate, by their increased sur. plus. Value is an arbitrary term as neeasured by money; for it depends altogether upon the plenty or searcity, or demand, of the article valued. Money may become clieap as well as any thing else witness the report that the governor of the besieged city of Angustura (see page 236) had given three dollurs for a cat, for food. In other circura-
atances, as many millions of cats as there are grains of sand on the sca shore, would not fetch one cent, as animals for the food of men.

I3 it hy bilancing labor, or: sublividing it between agriculture and manufactures, we overcome these other?ise instuperable difficulies-create a home market that takes off the surphis, and keeps down the price of imported commoditits to a reasonable amount.

This is easily shewn-
The whole armount of days' labor in the United States, that might be applied to agriculture, is estimatel at

2,437,000
Besides that of the unpronluctive elasses and whic! cannot be broushit into the commen siock

We say that there are now engaged in the mannfacture of cotlon, wool, flax and fron-in the distilleries and breweries, and in the works of glass, clay, and paper

154,000

\section*{As seamen, watermen, fisher-}
men, shipwrights, "ic.
100,000
Sappuse we add to those clasies

100,000
Anl, agreciag to make our own sugar and molasses, take from the other classes

50,000
404,000
Left for agriculturalists, mechanics and manuf.ccurers, other than those of
the few descriptinns riamed

We hive conceded that ihe labor of ayricultural ists, inclutling the value of their own fuod, \&c may be rated at \(\$ 233 \mathrm{p}\) r hand.
Then-
404,000 hands at 233 would be ecrial to
\$94,132,000
And they would manufacture or con-sume-

All the sheep's wool, flax, hemp, \&ic. valned ut
Manufacture-(including the l:abor of wo:nen, \&c.) \(45,000,000 \mathrm{lbs}\). ch 110
Muke sugar and molasses worlh
Ahdus: \(16,000,000\) bushels of grain for drinty

12,000,000
167,652,000
Which, deluctel from the \(8181,041,000\) worth of sirplus, would iminediately veduce it in about 14 millions-if so low was thought adviseable, and keet the world rather dependent on ths than make oursiclea denendent upon any part of it. Fior a fio reign market for the batance that we might have to spare would te commandel, instead of sought for.

Hors, then, is an instant ant completerelicf to agricutture-but even this, important as it is, is but a small pratt of the atvantages that we strouth de rive from this little insensulte chatre of our hatits. We thight be firmished with 12 包施s of whthe menufircured articles we w onld want, an! have an anijle balance to supply us with lituxries desired, the product of the sh pping in erest, and thic labor of oit invaluable sewnen being adted to the of the Tranuficturing classes.

The first section of the 4 th proposition \(i\), in my opinion, so entrely demonstrated as safily to bi bef where it is. The home mwher, ereatel by the simple transfer of a ceriain portion of labur cyial to that of \(150,000 \mathrm{han} / \mathrm{s}\), from the present pursnits of agriculture to another businega of agrisutute
and arditionally to manufactures, is sufficient to ge \({ }^{t}\) rid of a surpius that, without manufarteres, and this new proposed agriculture, it would be injosesible for ins to dispose of at all-and, therrfire, the amont, is really so much profit absolutely sained. It firtows then, with individuals as well as with the nation, that it may not be our ine erest 10 purchase the foreign article because of is lesser price than the domestic one-and for tie very hest of reasons. (a "Puldy's reason" I confess) becanse we conld not pay fir it 'T'e principle inay be elucilated oy the following case, which, thougli it may he an extreme one as applied to an individual, and appasentIy of small accoint, is exactly the stite in which ive, as a nation, would be placed without manufac tures.

Firmer A 50 or 60 miles distant from a markef -i. e. a bolly of consumers, not growers of grain and oller veretables-las a very fine kitchen warden in which he raises more eablages, beans, peas, \&c. than his f.atily can or will use, and they perish on their stalks. But B. a saddler, setlles in his neighborhood and says to him, "I will give you a sulelle every year, or make or mend harness for yout to its value, for tho surphus of your garden stuffs." "Nw," says farmer 4. "fire these shiff's ut Bu'timare, Plilatelphia, of Jieu. Tork would fetcle ine double the peice of a sadille- \(i\) is not a furi exchani, \(c\), and you shall not have them." "Well then," returns B. "I will raise tiem for in! yelf, or to without them,"-and the ve re ables peris. as before, or are not planted as they might be. A. car. ries his wheat to the city, and of its poceed, buys a saddle; the cost of which is es completely lost to him forever as if he had thrown the money into the river-for he might have ha.l as grood a one for that which protheerl him mo value at all.
It appears to me that this is somed doctrine, applicable to every country, as long as the value of a thing is determined by the quantity and denand for it. To a certain extent there is a demand fo- our ugriculiural products, and at limes fur more than we have to spare: but with Eirrope at pate, and blessed with her ususl crops, she may as well supply us as we supply her with b:mal-stuffs and nieats -and slie would do it, by the chisapuess of l..bar, if she were not so oppressel by the requisitions of her governments. And, incleed, and besides, so ercoucare and support their own arriculure, some of the nations will not receive sippilies of these on any terms-it is in canes of necessity, nuly, that they open their ports, whd thans prevant a fiir and regnlar compertition from us-withont which we coild have io chance uf inaking a prolit in the enct.

The 3 th propinsitzon is inamfiested in the fiets already sta' ed. By an ellice allen ion to agriculture we have a quantity of lahor suffici ut in 1 ise an mucerfuin valiue that ingy amount to 495,65, uno ot be less than fialf thit sum: bit hy mamicinion th a re.asumble exient we chilicr consume or conmoul a market fir agricultur..l producls of the cer. tran value of 400 millinns, sand create a vxile in suorls worth 250 usilions inore - a certala difference of at lenst 150 milians every your in our fa.
 miny remember i') bripin ies in the advantaris derived from labor antag intchitery, and frombringing invo operation the whole probdelize lator of the peuple.

The \(62 / 2\) prop-titian involves a subject of vast amb? vital importanee, and 1 exancilingly regret \(t\) ata whall lave to dismi is it willont a full expositim, whicio 1 must do fram the want of particuiar licla. The itm tiale it unch ciep:alan-almest seinedt

The establishments for making iron require a great athomut of capind, and years are necessary to get experienced workmen, and reduce su latge concerns to system. Destroy these works and di-perse we va. banen, ad when iln. day of calmity : a ves - when war is made upon us, we shall lanncut our foily too late No:lii g , perth pss, suffers so much byiesilet or want of use as works fir the mathufac aure rif imom-an imerruption of th ir bisiness altuos amomes to the ruin of those carrying it on.
Wic hare heard it stated that lie munfacture of iront in the countics of ifrontingstom and Ceatre, alone, in P'ellusy hania, has produced a walue of \(\$ 1,000,00 \mathrm{O}\) per annum, and ellployed, immedute'ly, atom 150 men, affording a hiving fr them and their fanilies; creating a most valuable home market for the fill. mer, and giving labor to hundreds of mechanics scattered round the neigliborlood! of the works, forming little villages and towns, wearing the nos' prosperous and happy :aprearances; and raising the value of the land, by the market affirded for its products, 50 to 100 per cent in cverv tew years.Thiese manuff ctures nimast be protected It is impossible for us to prosper withent iron works. They are a eine qua non to the preservation of our indepen. dence. Eivery branch of society is interested in them-they have an importance that comes bome to the doors of all men-and all men should unite to carry in'o the congress of the United States a due sense of thai imporlance. Labor is che per in Europe than with us, because our people live better and labor less-and we glory in it that they lave some of the comforts of life with leisure to enjoy them; and the duy upon the forcig: article must be increased, or wo one will follow so severe a bisiness here. Tuis briugs us to a consideration of the \(7 \%\) : proppsition.

It has yet been the policy of the United States neither to prohibit the import or export of any thing, is a permanemt regulation, and so far, perhaps, that policy has been a wise one. "But circumstances atter cases,"-and we have the unanimous sanction of all the a'utesmen of Europe that a contrary course is bestadap' ed to the situation of their several countries. Eugland, for instance, will not perni the export of woul, nor admit the isuport of cotton grods, even fiom her own colonies.* Lich of these regul.. tions is intemed to commerbalance the higher price of labor, (through it seems to be lozv enougth now) and to find employmen:: for her perple at home. rhiis kind of policy may certainiy be extended to an unreasonable length, and be less fitted for oull country than to any other-but who is prepared to Say that it may not be a correct one in cerlain coses? It is not the nominal price which a man pays for a thing thit deterniues its value to him. A bushel of whent is dearer at one cent, to one that cannot procure that cent, than to another as the equivalent of a day's labor which he has the power to exchange for it-jet the in'rinsic value of the wheat would be the same. It is the Abiury to pay that fies the ralue to the purch.aser, at in the case of the far: er and the ratdler jusi above slited. And it is point edly the interest of a free peop,le that the price of labor should be kept as high as possible-to preserve the greater eq alit! among the cilizen:s,

\footnotetext{
*A \(\mathrm{mi}_{\mathrm{on}}^{\mathrm{b}}\) petition \(;\) before the house of com mons f"om the L ", wlisl. firmers, to prohibi, aiso, the impory of roon. The value of the domestic article has decreased from 3 s. to 1 s. 6 d. per 1h. Bult so great is the disistess of the mnuufacturing classes that it was thought the prayer of the petition could not be scanted.
}
and keep up a spirit of intelligence, with a degree of independence, ith:ont which the uscful classes mast degenerate into herds of slwes. No loss is occasioned by the igh price of labur, if its product is proceted in a colurry; for it spreads itself thongh :ll ratka of socie' \(y\), and every body feels it, form the landlord, living on his r?ut-oll, to the miserable: chine sweeper

Ifu', to de.urn the the nufictures of io 0 and conclucle the present munber, sunply in say' at "come What will," in any event, and in "very crent, these m unufactures must be protected. If they si \(k\) they uink for years. The cost of purlit g them into oper.tio:: is too great, and the tine employed to set them a going too precious, to be hazarded by an uncortain police: Let it be iscertained at what prict: a ton of iron may be furnished, leaving to the workmen a lit le nore wages that are pait in thost o her braliches of businens, on account if the peruliar severity of them employment, and loy a 'lity upont the foreign commodity high enough to krep it from beng fairly sold under that price-competition will do the rest, and keep us from being ex. torted upron. This is as much the interest of the mere furmer as any borly else; for it makes a market or his grools, and keeps up the price of them by the demand.

\section*{Captains Heath and Perry.}

We have a pamphlet entitled, "Serions charges against captuinn Oliver•II Perry, of the United States navy, by John Ifeath, lute captain of the mariul corps" -and recently appointed consul at Teneriffe.
It is a rule absolute with me not to admit any thing of a pivivate or personal nature into the pages of the Weikly Registih, hough on one or two occasions 1 inadvertantly transgressed it. For several days 1 have had the question uader consideration, and am not yet able to resolve it, whether the contents of this pamphlet should be estimated as having a public or a private character. As the former, I "ould publish it though I had regarded those censured by it as demi-gods-as the latter, I would no give it a place if my own father were living and was the complainant.
The charges of captain Heath are really "serious," and severely affect the reputation of com. Chauncey and capt. Perry; the later as a tyrant, and the former as colniving at a nosi flagra:nt abuse of authority. According to the narrative, (which is well written, and sceins to be a plain statement of facts) c.ptain, \(\mathbf{P}\). wihtout provocation, and impelled by the fury of p.ssion, after the most insulting langungc, descended to strike cuptuin Heath, with his fist, in the cubin of the .Juru,* and then ordered him to be confined in his state-room, with a sennry ovel. lim, where lie was keppt from the middle of September untid the last of December, 1816, without trial, or being regularly charged with any offence, and then, :a 1 misoner, asked by corn. Chauncey for the clarges that lic intended to prefer against capt, \(\mathbf{P}\). It is, imleed, a nust strange listory-but it scems a court inaly ial was at last held, by which each of them wan sentenced to receive a private teprimand.
It is implossible that we can easily give up the licro of Eric to a censure like this-or readily suppose that c .m. Channcey and the gallant officers of

\footnotetext{

Fhe squadron in the Medi:errancan, sioull heorom farties in it through an unjust \(p\) rialit! fuc \(c\) ent. P. or a purill inimous fear of his retionti. But so it is thai, in sur uninon, th is pouph.let demaia d.ds a reply. If its facis are mis stated, it is essy to provthem erruneons-if w' crwise, they must make a "ss. riot.s" in prestion, i jure the service ver! considerably, and tend to prolluce a re-ac ionalgainst the naval establistiment. Hence it is a priblic (oncern); for "e people, in love of f pedon, "ill not tolerate tyranuy-be it commiled by whom it may.

\section*{Present state of England.}

It has lolig ppe rect to its, (tuic' some may have thought that we ourselves were much in the same w.v) as if an . Imerican newspaper could hardly be filled up, eitier wilh original or selected matier, without having something in it ahout Englend, other than articles of ordinary intelligence-as though we bad but little in our affairs to interest us. Lhave ardently wished that we could be brought to louk more at home: we have objects enough to command attention, and there are an infinity of things to du to accelerate the progress of the United States to a sure and solid independence.
It is universally admitted that we shall be a great nution. The anticipation is delightuful-but really, I stiould like to possess as much of the feeling that belongs to an assurance that the fuc! is so, as is possibie. Hence, I want to see an improved agriculsure, with an extension of domestic manufici urcsas udy of political economy and a race of statesmen supersicling that of politicians-the making of roat's, bridges and canals, wit, improvements of our numerous and immensely impurtant rivers and streams -an iacreased cultivation of the arts and scieices, and of learning in general; with the erection of permanent means for tefending our country, \&c. and a jealous care exercised to preserve the national independence and keep up tha: high toned spirit Which at presemt beloniss in the perpte at lirge. I woild that we should really feel as if we had home and a comintry-and be ready to claim, as the prouclest title that can be conferred upon us, a citizeuship of the United States.

Therefore, we have sometumes been rather dis. gusted with the eterual ding fong in our papers about Engtand, to the neglect of things that a thousand times more concerned us, and have done all that we could to give the current anoticer direction. But, notwithstanding all this, we ivould have given place to some very interesting letters on the present state of Ergland, just published in the Boston Chronicle and Patriot, if we had had roonn for them. However, their merit has secured for them a very general circulation, and they are in the hands of many of our readery
The state of the British empire is truly distress. ing. Misery walks abroad, and is to be met witl every where. Tine papers are filled with details of starvations and executions-distraints of the goveriment and robberies by indiviluals-and wiht reports about the poor and of accounts of donations to keep them from literally sturving in the streets and highuays. Take the following as a specimien of the contents of stro papers bef re us-
An account of starvations at Wapping and Munr. fields, where "thousands are reduced to ac'usl want." A report of the poor in the parishs of St. James's, visted and partially relieved by a commisec, amounting to 2,204 familics, or 7,672 persous. A statement that the funds of the pawn-brokers vere exhaugted, in consequence of every thing re-
in-ming unverterme !. Surrifives of property -a fine git linese, fir :ist.nce, sillil fire 3'. A preremptory orler of the g.vemment to recover the taxes, iniinedi.tely. The transphat of \(6 u\) perion's from thic enun.y of Tipperary, wuder the insurrection :cet. 1,1 further, as pariz inlarly regarding the state of Treland-an arcoutat of the exerution of Ann Pieit on ther two sons, for havieg gun powder in ticir pissession; of 18 inen being semtencell to the hangea! a ! 69 in tra sportatian, in a Sund-v, a: Dumda. है of 94 -tarving to death in the vicinity of Carrick. macross; of an entire fanily, einb:acing cight females, heing senterced to be iransporied, on sulpicinn of having had in the ir possession a gun; sumb of tire execution of 300 rioters at Dubliz.
These hast, howryer, appear in the Fivile, a paper published at New-Tork, and are made up froin private letters-the Brit ish press liaving ce.ssed to be a medium for giving the whole trath to the peo. 30.
-While on this s j.r. it may be well to :wid the following case-it is only one of ten thousand. hut it strikes the deeper by its detail. It is copied from the London Traveller of the 23ih of April.

\section*{ITSOLFEVT DFBTONS' COERT, APRIT, 26.}

The right hon. John earl of Morley, (late lord Boring lum) Thomes Kerswell.
The insolvent, in this case, was remanded on the last sitting of the court, by consent of the parties, it being argued by Mr. B. ssett, the contrisel, on the part of his lordship, that he had been finally remarided at the session at Exeter, for fraud and concealment of property: and as there was no expla. nation to the court how a dcbt of 181 . 10 s conld be pussibly uugmented to the sum of 3,500 . the c:- e stoud over to be tried on its merits only. It: Bassett stated to the court, that since the prismer was brought up, he had obtained an official clocument from the clerk of the quarter sessions at Exe1.r, proving that the prisoner wis fin, lly remanded by that enult on the 9 li nf January, 1816 .

Mr. Heath on the part of the insoivent (an old man, near 70 vears of ag", comtended that the cerlificate could not be proolucen, as it "as agreed, and the adjuctication of the court was, that the cise should be tried on its merits only; and a f.rmer remand had nothing to do wi.h the meri's of the case.
Mr B.assett handed the ecrtificate to Mr. Sergeath Runnington, who said, it being an oflicial document from an under court, it musi be received.

Mr. Heath-"."t cannot be received unles it is proved, and who can prove the hand writing of the clark?"

The court was about to decide that it eould not be received, when Mr. Jo in Sulland, \(5^{\prime}\) ewanl to the phintiff, addresse:l the court, and said, that he knew the hand-w riting. T/ e certificate being slown to him, be swore that it was signed by the clerk of seswions at Exeter.
Mr. Bissett put the certificate in as evidence, and contended that he, the insolvelt, hat ing been remanded by a court below, which had juristlic. tion, that the court could not possibly altes its adjultication.

Mr. Heath said, that if that were the law of the case, it would not matter to his client; but he was satisfied it were not, and read to the court a clanse ii the act 531 of the king, which empowered that roum to adjudicate upon a case which had been lieard in sessions. We then took another objection to the certificate being received, as it was not according to the act of parlianent. The document atated that "the insolvent was not entitled to the

When we see those things, and c morist them with the protligacy and contempt of the wretched ness of the poar chat prevails among those possuss ing the government-for in the same paper there is a statement of the prince regent's exuences, anoouning, in ore quarter, to \(£ 199,195 \quad 16 s\). 7 d(ne rly a millinen of dellars) besides t' e catablish.
be efi of act, and 'oth certify the same to the court of insolvent debtors." Such was contrary to the lettel of the act

Mr S rgeant Runnington said the objection was fatal to the recen ion of the ducument.

Mr. Besent then agreed to ko into the case.
Mr. Heith said, he would develope this case, aml slew to the court a chain of proceedings the the monst inquitums, ppressive, and inluman, that fal ther been pr.chsed, and he wouldsyy, exceed iter uty loing wer disclosed in that cotmt. The prisoier being examined stated, that he rented a farm at "ympton, Devons ire, which he heid by If an the list iwn veurs minder earl Morley. He 1 at lived on the firm thints sis yeuls, thinty four of which he rented it under all iml Calmary: Ahout Larly day, 1810, the eurl of Morley ptirchased the farn; his leise granted by the admiral expired at Lady-day, 1812. The earl of Morley apphed to him to comtinue on the from, and take the atjoining one, Whici lib agreed to do; but his rent was doubled At that time f-raing produce was very dear. He f: id lis lent fir tilo ycars, and several times ap j) it d the the to lower his rent or take the lease of his hatrds, which he refused to do. On the 29 th Sepif ther 1814, lie was in arrears half a year's rent. He miended at the rent day and piid 501. and in a Sirnight of el 20 l . more, which was 70 l towatels 15 J ; and le took his lease with him loping the e.rl would cancel if or lower the rent, as the produce was unsale..bie. About a week afier, a fair whs held for eatlle at Tavistock, about sixteen miles from his house. Hoset out early in the morning, with sis yearling bullocks, to the fair, and sold the to a de-l-r in catlle at the market price, f \(24 t \mathrm{Cu}\) of this stan he pard \(10 /\) to the plaintiff, and 5l. fir poor rates. The fair was held on Friday. O; the 'Sondily following he was absent at a neiglibor's, on a pony belonging to his daughter; and on his return hrome, he was informed that during his ab sence, a distress hart been put in his house by Mr . Iolland, his lordship's stedard. He, therefore, did not take the pony home, but left it at a neighbor's. All his effects were sold for 133l.; but his lordship was the principal purchaser, the other buyers were all his lordship's tenan's, and no one durst bid agrinst his hrdship. Mr. Yolland purchased part of his live stock, for about one third of their value. His lordship received, with the 70 l and the \(133 \%\) more than the rent due, but he claimed 18 l . 10 s . as due to him; and Mr. Yolland took forcible posses. sion of the farm, though his lease had eight years unexpired.

His property being all sold, his lordship applied to the inagistrate for a summons to serve on him, to appear hefore them, for taking and selling the six bullocks in a clandestine inanner, and 121 . the sup. posed value of the pony. The summons was served upon him when in bed. He being very ill at the time, took no notice of it or the niagisirides, as lie thought they had no power over him for selling his cattle fairly in an open market, and that no rent was due till the 25 th of March following. In a few days after a warrant was granted by the magistrates to apprehend him, and carry him to Bridewell, to be fept to haud labor for sis months without bail, un-
ment for his wandering wife and her date hiter, whicid the prople have hail to pay-and robilect that ti is misery has been brougit ham. Io Fingland by t'e misery that her rulers have inflict d? abroad;the uttermost parts of the earth being vexed by her missionaries of crime, penetrating tike the fiozen regoons of America, to make a triffic in the scalps of women, or the buruing plains of Asi, io spread
less he paid the annount of \(72 l\) which was diouble the price of the bullocks and the value of the pony. He could not pay the money, and he was dragsea out of his bed, bard as he was, and confined vix months in Bridewell at hard labor, and had nothing but bread and water dnming that time.
Mr. Heath.-"Was a distress in your house drering the 34 years you lived on the farm under the AImiral?"-"No."
Mt. Heath.-"Was you not considered, at the time the earl of Morley purchased the estates, a very respectable farmer?"- "I was considered the greatest,"- [Here the feelings of the old minn overpowered linis he burst into teurs.] - He coutinued: "I was considered not oluy tl e greatest, but one of the most respectable farmers in that neighborhood; and if I had not been distrained upor, and my rent had been lowered according to the produce of the farm, I should have been doing well; and iny wife would not then have been saved from the workhouse merely by the charity of friends. When my lerm of imprisonmeut expived, and as I was coming out of Briclewell, two sherifis' officers arrested me, at the suit of his lordship, for 18\%. 10s. the supposed balance of the lent, and dragged me to Exeter gaol. When miy three months expired, I applied under the insolvent act, for relief at the quarter sessions. The earl of Morley opposed my discharge. He stated that I had concealed some of in property, and wi hour any further examination I was remanded. I remained two months longer in prison, and seeing no hopes of being liberated, I got bail, and justified out of custorly, on the 12:h of January, 1816. In consequence of my not putting in a plea to the action, interlocutory judgnient was signed, and an execution was issued out against me. I therefore surrendered to prison on discliarge of my bail at the former suit of 181. 10s. and in Hilary term I was charged in execution at the suit of the earl of Morley, for the sum 3000l. clebt, and 15l. cost. I know of no claim the earl can have upon me, as no claim whatever has been made upon me but for 18l. 10 s ."

Mr. Heath.-"I am satisfied that no peer of England would ever have been concerned in such in. famous conduct."

Mr. Yolland being now called and examined, acknowledged that he did purchase some of the live s:ock when he destrained for the rent on the prisoner.

Mr. Bussett said, were the prisoner to be re. manded till the next sitting, he should be able to bring up witnesses that would put the case in a dif. ferent point of view.

Mr. Heath opposed the case being put off an hour longer:-His client had been imprisoned twelve months, which was quite long enough, at the suit of the plaintiff; for debt, and six months in Brideweil; but tha. was a case for subsequent consideration; such illegal conduct should not be practised with impunity.

Mr. Sergeant Runnington said, that he was extremely happy the case had been investigated. He should have been sorry had he been remanded on arcount merely of his former remand. Discharge3.

Tissention and gather up gold, mired wi h he blon' authority; much more must every man, who be. of men, our suul is seared against pity, and wee feel that the funishment is just. Those whu at present are the viccims of that accursed lust for domination, which has natle the cross of Eigland almost every where the sipnal of slaughter or oppression, are innocent, in part, as to the commission; but guilts, in omission, in permitting thense things to be. I i i them sutf r -ln: misery be heaped upon misery, grievance on grievance, and oppression upon op pressio , wati, by accumulated distress, vey sh.11 assume the in Higement of their own affirs, and slake off, as the vipers of the suman race, those tha: have been the conmon disturbers of the peace of the word- whis, fur a pick uf bermer skine, tave subjected whole f:ontiers to the tomahawk of the savage, and, for a birrel of rice, seen the natives of Hindosian strew the higa- ways will dead bodies, throug" a munop ly of their fond. Let them suffer, unti, they resulve to act-and when they resolve, nuay Gut give them unity and strengeth to banish to some new St. M:lenas the breels of kings, nobles and pries's that ot wut their substance, and make them iniserable tuols to carry misery to olhers. Amen!

\section*{A Memorial and Remonstrance,}
[dRaws by jacks midison, late puesidnert of the exired states,]
. Igainst the gener.al ais ssine int, presented to the gene. \(r z^{\prime}\) ussenb!! of Virginut, at the session for the zear of our Lord one thou an:l seven huidred und eightyfive.
To the hon. the general assembly
of the commorisventh of Ti-ginia.
We, th - ulbicribers, citiz ans of the said commonWead \(h\), h. wi g taken into serious consideration a bill, printed by order of the last session of the general assenbly, entilled, "A bill establishing a provision for te chers of the cliristian reibion;" and conceiving, thit the same, if finally armed wi h the sumetion of a law, will be a dangerous abise of power; are bound, as fuitliful members of a frce state, in remonstrate against it, and to declare the reasons by which we are determined We remnomstrate ag-iist the said bill,
Becuuse we hold it for a fundainental and unalienable tru'h, "that relighon, or the duty which we owe to the Creator, and t e maner of discharg. ing it, can be directed only by reason and comvic. tiou, not by force or violence." The religion, then, of every mata, inust be lof in the conviction and conscience of cvery man; and it is the right of every man to exerelse it as these masy dictate. This right is, in its nalure, an malienable right. It is unaliens. ble, because the opinions of incu, depending only on the evidence contemplated by their own minds, camnot follow the dictates of other men. It is un.alienable, also, beciuse what is here a right to. wards man, is a duty towards the Creator. It is the duty of every main to render to the Cireator such homage, and such ouly, as he believes to be acceplable to lim. This dity is precedent both in order and time, and in degree of obligation, to the claims of civil society. B foie a y man can be considered as a member of civil society, he must be consilered as a subject of the governor of the Unverse. And if a member of civil sociely, who enters in o any subordinate association, mustalways do it with a cese vation of the duty to the gener.al

\footnotetext{
- Neclaration of rights, article 16.
}
comes a member of any parlicular ciril societs, do is with a saving of his allegiance to the Universal Sovereisn. We m-intain, therefore, that in matiers of religion, no man's right is abric!ged by t'e institution of civil society; and that religion is wholly exempi fom its cognizance. Tiue it is that no other. rule exists, by which aty questinn which may divide society, can be ulimately determined, but by the will of a majority; but it is also true, that the majority may trespass on the rights of the minnrity:

Because if religion be exemp. from the authority of the suriety at large, still less can it be subject to that of the legislative body. The latter are but the creatures and vicegerenis of the firmer. Their juris.liction is hoth derivative and limited -lt is linited with regard to the eo-ordinate depariments; more necessarily, it is limited with regard to the constituents. The preservation of a free govern. ment requires, not mercly that the ineps and bounds which separate eac!! department of power, be invariably maintained; but more especially, that neither of them be suffered to overlap the great barrier which defends the rights of the people. The rulers, who are guitity of such an encroach. ment, exceed the commission from which they cierive their sutherity, and are syrants. The pedple who submit to it, are governed by law; made neither by themselves, nor by an authority deri ed from them, and are slaves.

Hecause it is proper in take alarm at the first experiment on our liberlies. We holl this prudent je:lousy to be the first duty of cilizens, and one of the noblest characteriarics of the late revolution. The firecacn of America dial not wait until usurped power had streugthened itself by exercise, and entangled the question in precedents. They saw all the consequences in the principle, and they avoided the consequences by denying the principle. We revere this lesson \(i\) moo mich, soon to forget it. Who does not see that the same authority, which can establish Christianity in exclusion of all other religions, may establish, with the same ease, any particular sect of Christians, in exclusion of all other sects; that the ssme authority, which can force a citizen to contribute three pence only of his properiy, for the support of any one establis!ment, may furce him to conform to any other establishment, in all cases whatsoever ?

Because the bill violates that equality which ought to be the basis of every law; and which is mure indispensable, in proportion as the validity or expeliency of any law is more liable to be im. peached. "If all men are by uature, equ lly free and independent," "all men are to be in considered as entering into society on equal conditions, as relinquishing no more, und, licrefore, retaining no less, one than another, of their mitural rights; above all, are they to be considered as retaining an "equal litle to the free exercise of religion accord. mb to the dictates of conscicuce." Whilat we assert for ourselves a freedom in embrace, to pro. fess, and ubserve the religion whict we believe to be of divine origin, we cannot deny an cqua! free. lom to those, whose minds have not yet yielded 10 the evilence which has convineed ins. If this frecdum be abused, it is an offence against Cod, nos against man. To, Goit, therctore, and not to man, must an account of it be rendered.

\footnotetext{
- Declaration of riglity, article 1.
tDecluration of rights, auticle 16.
}

As the bill rinates equality, he suhj ring sonte to peruliar burdens; so it violates the same princip.e, by eranting to nthers peculiar exemp ions Are the Q:Inkers and Wenonists the only sects who think a compulsive support of their religions (11) necessary and unwarrantable? Can their piet1 alone be entrusted with the care of public, worsh ip? Ought their religions to be endowed, above all o.hers, with extraordinary privileges, by which proselyies may he enticed from all others? We think too faverably of the justice antl gond sense of these denolninations, to believe that they either covet pre eminences over their fellow cilizens, or that they will be seducel by them from the common - opposition to the measure.

Because the bill implies, either that the civil magistrate is a comperent judge of religious truths, or that he miy employ religion as an engine of civil policy. The first is an arrogant pretension, f.lsified by the extraordinary opinion of rulers, in all ages, and throug hout the world: the second, an unhallowed perversion of the means of salvation.

Because t'e establishment proposed by the bill. is not requisite for the support of the Christian relicion. To say that it is, is a contradiction to the Christian religion itself; for every page of it disavows a dependence on the power of this world : it is a contradiction to fact, for it is knorn tha: this religion both existed and flourished, not only without the support of human laws, byt in spite of every opposition from them: and not only during the period of miraculous aill, but long after it had been left to its own evidence and the ordinary care of Providence : nay, it is a contradiction in terms; for a religion not invented by human policy, must have pre-existed and been supported, before it was estab ished by human policy: it is, moreover, to weaken is those, who profess this religion, a pious confi. dence in its innate excellence, and the patronage of its Author; and io foster in those, who still reject it, a suspicion that its friends are too conscious of its fallacies, 10 trust it to its own merits.
Because experience witnesses that ecclesiastical establichments, instead of maintsining the purity and efficacy of religion, have had a contrary operation. During almost fif een centuries has the legal establishment of Christianity been on trial. - What have been its fruits? More or less in all places, pride and indolence in the clergy; ignorance and servility in the laity; in both, superstition, bigotry, and persecution. Inquire of the teachers of Christianity for the ages in which it appeared in its great es: lustre; those of every sect point to the ages prior to its incorporation with civil policy. Propose a restoration of this primitive state, in which its teachers depended on the voluntary rewards of their flocks, many of them predict its downfal. On which sile ought their testimony to have the grea. est weight, when for, or when against their inzerest?
Because the establishment in question is not necessary for the support of civil goverament. If i be urged as necessary for the support of civil go verninent, only as it is a means of supporting religion, and if it be not necessary for the latter purpose, it cannot be necessary) for the former. If religion be not within the cognizance of civil government, how can its legal estanlishment be said to be necessary to civil governmen:? What influence, in fact, bave ecclesiastical establishments had on civil society? In some instances, they have been see to erect a spiritual tyrainy on the ruins of the civil authority; in more instances, have they been seen
tinntrint the thrane of political tyrann: in no in. tranc have tiey heen sefil "re guarthans ot the lie berties of the peonle- Rulers, whin wished io cubver the mublic l beriy, may have found an estahlished clergy convencit anvili, vies. A junt goverument, instituted to secure ud pernethate it a needs them not. Such a govermment will he best sumported by protecting every citiz \(n\) in the enjoymut of his religion, with the same equal hand which protects his persoll and property: by weither inv ading the equal rights of any sect, hor sutfering any sect to invale those of another.
Because the proposed est:blishment is a departure from the generons paicy which otlerumg an asylum to the persecuted and oppressed of every nation and religion, pramised a lustie on orr coun. "r'y, and an accession to the number of its citizens. What a melancholy mark is the bill of sucden degeneracy? Instead of hoiding forth an wsyitum to the perseculed, it is itself a signal of persecution. It degrades from the equal rank of citizens, al! those whose opinions in religion do not bend to those of the legisla ive authority. Distant as it may be, in its present form, from the inquisition, it differs from it only in degree: the one is the first step, the other the last, in the career of intolerance. The magnaninous sufferer under the cruel scourge in foreisn regions, must view the bill as a beacon on our coast, warning him to seek some other haven, where liberty and philanthropy in their due exient may offer a more certain repose for his troubles.
Because it will have a like tendency to hanish nur cilizens. The allurements presented by other situations, are every day thinning their number. To superadd a fiesh motive to emigration, by revoking the liberty which they now enjoy, would be the same species of folly, which has dishonored and depopulated flourishing kingdoms.
Because it will destroy that moderation and har mony, which the forbearance of our law to inter mellde with religion has produced among its se veral seats. Torrents of blond have been spilt in the old workd, by vain attempts of the secular aron to extinguish religious discord, by proserining all differences in religions opinion. Time has at length revealed the true remedy. Nvery relaxation of harrow and rigorous policy, wherever it has been tried, has been fuund to assuige the disease. The American theatre has exhibited proofs, that equal and and complete liberty, if it dues not wholly eradicate it, sufficiently destroys its malignart influence on the health and prosperity of the slate. If with the salutary effect of this system under our own eyes, we begin to contract the bounds of religious freedom, we know no name that will too severely reproach our folly. At least, let warning be taken at the first fruits of the threatened innovation. The very ap. pearance of the bill has transformed that "christian forbearance, love, and charity,"* which of late mus tually prevailed, into animosities and jealousies, which may not soon be appeased. What mischiefs may not be dreaded, should this enemy to the pubhic quiet be armed with force of law?
Because the policy of the bill is adverse to the diffision of the light of Christianity. The first iv ish of those, who ought to enjoy this precious gift, ought to be, that it may be imparted to the whole race of mankind. Compare the number of those, who have as yet received it, with the number still remaining under the dominion of false religions and how small is the former! Does the policy of

Becaute an at empt to enforce by legal sare \({ }^{\circ}\) ons, acts, obnximans to sin grest a por ion of ci izens, tends the enervale the laws in general, and to slack en the bants of soriety. If it be difficult to exe cute any law, which is nor generally deemed neces. sary nir salutary, what must be the case when it ideeined invali.t äd dangermis? And what may be the effect of so strikinys an example of imporency in the government on its general autiority?

Beczuse a measure of such singular magnitude and delic.cy, wught not in be inaposed withnu the elearesi evidence that it is called for by a majority of cilizens; ancl no satisfie. ory method is yet proposed by which the voice of the majority in this case may be deterained, or is infliefice secured. "The people of the respec tive conutics are, indced reques ed to signify their opinion, respecting the adoption of the bul, to the next seesion of assembly" B'tt Uic Fepresen'ation must he made equa, before the wice, \(e_{1}\) her of the represen! atives or of the coumties, tr:ll be that of the people. Our hope ic, that theith of ot the former, af or due consileratiom, will espouse the dangerults principle of the bill. Suould the event disappyont ins it will silli leave us in full conf lence, that a fair appeal to the latter will reverse the sentance aganst our liberties
Because, finaily, "slie equal ribth: of every citizen to the free excercise of !is relition according to the dictutes of is conscience." is held by the same tenure with all our uther rig its. If we recur to its origin, it is uqully the gif. of nature; it we weigh its importance, it cunnot be iess dear to us; if we consult the " lectaration of tliose rights which pertain to the good people of Virginia, as the basis and fimadation of goverumen!," it is enul. merated with equil solemning, or rather with siudied emphasis. Fe:thet thell we must say, that llie will of the tegistoure is the only meassire of their quthority; and that in the pienitude of this authorit!, they may swect away all our fundamental miths; or that they are bound to leave this rartuctiar right untonclie! and sacrem: citlier we musi say, That they may con'rol the freedon of the press; may abolish the trial by jury; may swallow up the executive and judiciary powers of the Siatf; nay, that they may amilitate our very right of suff uige, and erect thenselves into an independent aurl lieredi tary assembly; or we munt suy that thicy line mes autiority to cuact in'o. a law, the bill under conmi deration. We, the subscribers, say that the feneral assembly of this conmonuwe.allı liave no suci a au. thority; and that no effurt inay be omittel on our purt against so dangerous an unirpution, we oppose this remonstrance, carnestly pragning, is we we in duty bonnd, that the supreme la ig giver of the univense, by illuminating thone to whon it is addressed, may, on the one hand, turn their councils imm every act, which would affiront his holy prerogative, or violate the trust committed to thent; and on the other, guide them into every measure which may be wortiy of his blessing, may redound to their own praise, and may establish more firmly the 1 . berties, the property, and the happiness of wis commonw calth.

INSUL,T TO GOVER:OR IONES.

As many unfonaded repurts bave been circulated raspecting the insilt whir't was offered to govenor 1 mes on his lunling here, tie day precelling the last general election in this state, we think it proper to publish the following documents:

IIuse of R-presentatives, Jinie 12 1917.
Wheres., on the 6 it of May last, the dy preceding the lasi general election in this siute, a geoss insult was off re! 'n the c'ii \(f\) margiow \(r\) the of this state, hy music belonging to the United Siates trimps stationed in the liarbor of Newport:
Therefnee resolvent, thast a commithee be : ppointed to investigate and report the facts connected wi-1/ surlh innult: in order that such steps may be : ken by the general assembly, as will maintain - onor and dignit of the state.

R solved furtier. Th. t said enmmittee have powe er oo send for persons, and examine witnesse"; and that Eeplrainh B wen, Nathaniel Searl, and Lewis Roms:maniere, "ith suc.u as the hon. senate may add, be hat innimittee.

Voted, \&c-By order,
THOMAS BURGESS, clerk.
Iit the senate, read June 13, 1817, and concurred, as exp essed in the following words, viz. Where:ns it tus hem reparted, that an insult was publicly offered to his excellenicy, governor Jones, on the day precalng the s:ssioil of the general assembly in M1.y list:-Therefore resolved, iliat the hon. Edvard Wilenx, F.plrain Howen, Nathaniel Searl, Lew is Ronsmanjere, S.mnel Vinson and Steplien B. Cornell, be a committee to inquire into said report, and report to this avsembly, as soon as may be.

Voted per order,
SA wLEL EDDY, sec'ry.
In the honse of representatives-Read the same day and concurred.

By order,

\section*{THOMAS BURGESS, clerk.}

\section*{Refort of the joint committec.}

The commitree, uppointed by a resolution of the general assembly at the present sessinn, to inquire into the report of a public insult, said to have been offered to his excellency William Jones, on the day preceding the session of the general assembly in in May last, heg leave to report that application Was made, by sonc gentlemen of the town of Newport, to the cimmanding officer at fort Wolcott, for the music attactied in thit command to salute the governor clect on his arrival at Neuport, on the Ay prececting the layt anaual election-that the music was areordiagly arlered into town, and pla ce: 1 under the orders of cipt. Rubt. B. Crathsion, of the ariillery company - that the music were pla. ced at Banister's wharf, and on the approach of his excellency gov. Jones, were directed by said cap. Cranstoin to beat the retreat; which, in opinion of the withresses present, whom we have examined, was highly improper, and derogatory to the dignity and thic lionor of the s'ate. The committee have great pleasure in stating, that they have reccived a pollite aud gentlem inly letter from col. Towson, (the commanding officer at fort Wolcott, in which het expresses great regret that "any soldier under his command slould have been made the instrument of insult to any one; much more the hon. person who lina held the dignified station of governor of RhodeIsland: that if any blame could attach to the inusic, he would have them punished;-but that, he was
persuaded, they could not have been gutily of an! indecorum of the kind without orders."

All which is respectfully submitted,
(signed)
Fdiourd "itcox, Ste:́hien 13. Curne!l, Fiphraim Buzwen, Samuel Vinson, Niathuniel Searl, Lewvis Rousiauniere.
June 13, 1817.
Fort Wolcott, June 13, 1817.
Gentlemen-I have the honor to acknowledge the receipt of your letter of this morni 5 ; and :o inform yon, in answer to your inquiry, that a gentleman, who was introduced to me by major Watson, ap plicd for the music of the fort, for the purpose, as he stated, of paying respect to the goverinor elect.

As the music, attached to the company, is under the immediate cominand of lient. Wilkins, I weferred him to that officer; who informed me he sen! the nasic to Newport, under the command of a curperal with orders to report to Mr. Cranston, and reccive \(L\) is instructions I lave sent the cr poral for the purpose of examination by the honorahle cominittee, and lie will be able to give them fuller and more satisfictory information on the sub ject.

1 regret extremely, that any soldier under my command should have been made the instrument of insult to any one; much more the honorable person who las theld the dignified station of governor of Ihhod Islind.

If any blame could attach to the music, I would have them punished; but I am persuaded they would not have bsen guilty of any indecorum of the kin't, withont orders.

I have the hono: to be, gentlemen, your obedient servint,
N. TUWSON.

The hon. Edzelurd IFi'cux, Ephraim
Bowoen, Š: mu-l Vinson, Stephien \(\boldsymbol{B}\) Cornell,
1 Vathaniel Seurl, Lewis Rousmaniere.
Horse of Representatives, June 14, 1817.
Whereas by the report of commitiee of this general assembly it appears, that on the 6th day of May last, a grons insult was offered to his excellency William Jones, hon. governor and commander in clief of his state, by Robert B. Cranston, an offi. cer of the artillery company, of the town of Newfort:

Resolved, therefore, That his excellency the governor of this state be and he is herehy requested forthwith 'o iustitute a curt nartial upon the said Robert P. Cranston, upon such charges as may be preferred aganst him in the premises; and to sus. jend the said Cranston from his command, until the proceedings under said court martial may be had.

Voted per order,
THOMAS BURGESS, clerk.
In the senate-rearl and concurred. By order,

SAMUEL EDDY, Secretary.
On the preceding the Nezeport Mercury observes -"Considering the situation in which cap?. Cranston is now placed by the foregoi gresolution, which passed both branches of the legislature, without a dissenting voice, we deem it improper for us, at present, to make any remarks in regard to his conduct. It is, however, due to the artillery company, of which he is the ensign, to state, that no part of that company had any concern with the music, of which, it appears he voluntarily took charge for the purpose of paying military honors to the governor elect. Capt. Cranston was not on duty with any part of company, and did not act under the
orders of col. Champlin on that day. A detach. inent of the company was ordered out. It was commanded by inajor Randolph, was stationed at the head of Long Wharf, and fired the customar saluie on the approach of governor Jones."

Jack Ketch, who had officiated many years at the Old Bailey, lately died a natural death in the London hospital.
Desperation.-A late London paper says-It the Last Assizes, before baron Richards, Jïlliam Luff was tried for burglary ia the dwelling house of J . Turner, at Ketton; the offence was committed by Luff and another man, named Briggs (not yet taken) as long back as November, 1815; and lie evidence of Luff fully substantiated his guilt. The jury returned their verdict-saily; and the learied judge, in passing sentence, told him that if mercy were extended it could only be on the condition of his being sent away from this country. "I hope not, my lord," interrupted luff, with hardened boldness, "I would sooner be hanged." "You shall be punished as you deserve," continued the judge in an elevated tone, "and it is not for you to choose the mode." The learned judge then concluded the awful sentence, at the close of which the ruffian exclaimed, laughing, "Thank your lordship!" to the utter horror and disgust of all present.

\section*{fratce.}

Population.-The French Almanacs for 1817 give the following table of the population of Paris for 1815. Of 26,000 c!ildren (as nearly as possible) born every year in Paris, 10,000 only attain the age of 20 , and 6,800 attain the age of 45 . One fourth of the children born die within the first year, and one third never attain 2 years of age. Notwithstand. ing all the efforts of the French government in support of vaccination, deaths by small pox form a considerable item in this bill of mortality. The calculator proceeds to draw this inference, that if the whole population of France be 29 millions, the midd!e term of human beings, who attain the age
of 20 vears is 261,690 . Of the 22.642 childeren buriu in \(1815,13,630\) were born in wediock, and 8,982 out of vedlock, which seems in say, that morals are
to corrut therption in the ratio of about 13 to 8 , or t/al there are nearly two hone-t women for ane loost

We have received several proclamations, \&c. of the Portuguese government on the revolution of Pernambuco; but they are not worth inser:ing. Some vessels had arrived at Bahia which were turned off by the blockading squai'ron. As yet there appears no prospect of relucing the "rebeis." Some of the troops sent against them are sail to have jnined them.
- Ingustura has fallen into the hands of the patriots, and the spoil must have been immense. The vessels that were sent off by the governor were probably intercepted by a part of Biron's squadron stationed at the Oronoko for the purpose.

We have the official billetin of the patriots giving an account of their late splendid victory on the Oronoko. They succeeded in drawing the royalists from their entrenchments, when a most terrible battle succeeded-bayonet to bayonet, and sword to sword. The royalists fought like men wor:hy of a better cause, but were coinpletely ronted-they had 593 killed and left on the field, and 497 were made prisoners. The two Guayanas thus fell into the hanils of the patriots, and the \(y\) have also thereby apened a communication with New-Grenuda. In this decisive battle they had only 31 killed and 75 wounded. It is reported, however, that another royal furce was proceeding to the Oronoko to dispute the possession with Bolivar and Piar.
The following is given as "a list and situation of the republican armies of South America, in the pro. vinces of Veliczuela and Guayana :"
Gencral Simon Bolivar, at the liead of the main army, his head quarters at the Meza, before Angustura, besiering new and old Guayana, with the di visions under fenerals Piar, Arismendi, Certeno, Borinudez, Valdez-about 7000 men strong, infan. try and cavalry.

General Paes, with the armies of Lower Apure, abont 6000 strong, mosily cavalry.

Gencral Sarasa, at Chapana, in the province of Barcelona, rear of Caraccas, with 1500 cavally and about 600 infantry.
General Monagas, in the rear of B arcelona, with zou cavalry and 300 infantry.

General Marino, in the province of Cumana, with 2500 infantiry and 200 caraly.

Genemi Razas, at Maturin, with 700 cavalry and, ial it we sul is he"eby recommended to the peo.

200 infantry.

A list of vessels under the command of admiral Brion, with a compleunent of \(3,500 \mathrm{men}\), destined for the Uronoko-sailed from Carupana on the 6 U , of June 1817:-

Soops of war-Congress, Indio Libre.
Brigs-America, Libre, Conquestador, Valiente, Terrible, Formidable, Carpolican.
Hermaphirodite. Superbe.
Schooners-Centaur, Jupiter, firerrere, Brion, general Marino, Tartar, gen. Arismendi, Constitution, gen. Farasas, Condor, Venganza, Conesor.

Sloop Aurora.
Gun Boats-St. Anna, Una Sna Del Vaile, La Per1a, Devastadora, Felix, St. Joseph, Vengador, gen. Piar, Fulmillante, Invincible, Insurgente, Venganza. Admiral Brion is exerting himself very much to prevent piracy under the patriot flag.

A patrint privateer, or pirate, as the British West India papers call her, was lately wrecked on Cape Florida. An attempt was made to scize her and the crew, by the British authorities-which was partially effected; but some of them seized a stnall vessel, and escaped with 140,000 dollars in specie.
A proclamation has been issued by the:governor of the island of Trinidad, denouncing the severe penalty of banishment from the colony, and confiscation of property, sgainst all persons detected in transmitting arms, warlike stores, or money, to the independents of South America.

Lord Cochrane (says the Monring Chronicle) has sailed from England, with 300 officers, and \(\$ 100,000\) on board. His destination is not known; some people think he proceeds to Buenos Ayres, and others to Venezuela.

\section*{National Feeling.}

We are pleased, indeed, to notice the following paragraph in the answer of the house of representatives of Hessachusetts to the late address of the governor of the commonzvealth:
"With a few occasional and temporary exceptions of national prosperity and striking examples of virtue and patriotism, the histories of ollier cowtries exhibits their people sunk in ignorance, debased by slavery, oppressed by misfortunes, or stained by crimes; while that of OUR OWN presents the grateful and singular spectacle of a people, which during its whole existence of nearly two centuries, by its intelligence, its morals, its principles of freedom, and love of justice, has held on its course to opit. lence and power, unchecked by any signal calanity sad UNSUILIED BY ANY GROSS DFPAHTURE FROM NATIONAL RECCTITUDE."

\section*{Example and Precept.}

No less than four-fifths of the late general assem. bly of the state of Connecticut were entirely chothed in domestio manufactures-and the following was passed at their session just closed.
"Whereas the cotton and woolen fuctories estal). Yished in this state, to form and finish cloths from the raw material, are from causes, which are believed to be temporary, subjected to great inconvenience and embarrassment, and deserve as far as prac ticable, the relief and encouragement of this assembly,
Resolved, as the sense of this assembly, that the establishments in this state for the manufacture of cotton and woolen goods, are of a great public utili-ty-that the protection and extension thereof are connected with the best interests of the state, and
the of this state, to purchase and use (when they can be procired on terns equally arlvantageors) the woolen and coton fabricy of this countrg, in preference th those of freign countres; and that such establishments from time to time be encolle rared and necured by sich provisions of law, as their importance denamds.

A true copy of record-examined by
THOM IS DAY, Secretary."

\section*{Blunt but efiective Oratory.}
[The following is given hy Dr. Rastuey, as the address of Col. Cirmblavn, of the Nurth-Ciarolina militia, to his soldiers, previons in an attack made by the Americans upon a body of B:itish troops, commanded by col. Ferguson, at King's mountain, in the year 1780 . It appears that the Americans fought much in the same unpolished way as their commander harangued them. The consequence was, the total rout and surrender of the British troops.]
"my hative ferlotes,
"We have beat the tories, and we can beat them. They are all cowards. If they had the spirit of men, they would join with their fellow citizens in supporting the independence of their comentry. When engaged you are not to wait for the word of com. mand from me. I will show you my exarple how to fight. I can undertake no inore. Fivery man must consider himself an officer, and act from bis own judgment. Fire as quicla as you call. Whens you can do no better, get behind trees or ret"eat; but I beg of 'you not to run quite off. If we are repulsed, let us make a point to return, and renew the fight. Perhaps we may have better luck in the second attempt than the first. If any of you are afraid, such have leave to retire, and they are immediately requested to take themselves off:"

\section*{Ancient Fortifications and Tumuli.}

\section*{fhom the repubiticav anvocate.}

Ridgeway, New York, Jime 10, 1817.-These are so cenmon in this part of the country as to excite no great degree of curiosity-but the one before us possesses something of extranrdinary interest.
In the 14th township, 4th range of the Holland land cotrpany's lands, there is an ancient fort, situate in a large marsh or swamp, it covers about five acres of ground-large trees are standing upon it-the earth appears to have been brought from a distance, as its site is dry gravel and loam-without the embankments it is wet-from its situation it appears to have been the last resort. At the distance of about half a mile from it on the margin of the swamp, there has recently been discovered, on opening the earth, a large quantity of human bones of an unusual and large size; the thigh bone appears to be about two inches longer than a common sized man's-the jaw or chin bone will cover a larg man's chin, the skull bones appear of an enormous thickness, and the breast and lip bones are very large; on being exposed to the air, they moulder away.

The bodies appear to have been deposited there by their conquerors, as they were laid across each other in every direction; no appearance of bullets were discorerable about them.
North of the monntain or great slope, there is no appearance of ancient fortifications or tumuli-this appears to be a strong circymstance in favor of the idea that the mountain once rounded the shoses of lake Ontario.

\section*{"Placter of Paris"}

Te:cireg...i. or 1 - plaster of Pavis trade havintr becin pulishat whl the vear 181:" inserted in if 29 section instial of 1817 , we lave been permitel io pablis a the istructions annexed, recent If transmitied to ilse collector of this dastrict, by ti, comproller of the treasuly, for the information of all persons insercsted mstid trade.
 Tinafuck Depabtahint,
Cuspleuiler's Giffice Jutue 4, 1817
Sin-the governmeths of has ly'tandio majesty's pravees of Sew. Brunswick and Nova-Sco ia, on the conditent of \(N\) - A A meria, having made regulations in rctation to w.e trale of plaster of l'aris, by which th vesels if \(t\) e \(U\) ifted \(S t\) is are to ally exclud. e! 'rom a parthipa ion in that rade, the subjeci Wis tiken into consideration by cugress, and an act piasied an the 31 March las', to take effect from and flee the \(4 t_{1}\) day of July next, entitled "A" ac to regulate the rade in plaster of l'aris"-a c of of 1 ich is erclosed for your iaformation and goverument.
In will observe, from the terms of this act, that it is to cont inne in force five years from the 31 st d.uv of Jmuny, \(181 \tilde{z}_{;}\)except in relation, only? 10 sach furen.w ha, in or its dependeacies, as shall, prewi us y, withledw or dascontinue fis restrictions ( 1 ) Lat thade; in w' c!! evem, the president of the U lited siutes is auldrisal to declare that fact by lis pruclatation, whereupon the restrictions inpoed by the act now transmited, are, thencef irwa d, tu be i, operative ats to such nation, ore its deperdericies.

But, su \(\operatorname{long}\) as this act shall be in force, plaster of Paris, the prouluccion of any country, or its dependeacio, fro " which aise vessels of the Cuited Sta es are nut permiteal to brug the same article, om being imported in a fureign vessel, from any place whatever, is furfei ad, togethor, with the vessel, her sackel, apparel, \&c.

A colfinemt reliance is entertained that, by your vigilance, all attempts wheli may be made, in jour dishict, to evade the provisions of this law, will be detected, and the parties deall with accordingly

With due respect,
JOS. ANDERSON.

\section*{H. A. S. Dearborn, esq.}

AN ACT to regulate the trade in Mlaster of I'...ris.
Be it enacterl by the sunste und house of represen'asives of the L'itited Statrs of . Imeraca in congress as. sembled, That from and afier the forith day of July next, no plaster of I'aris, the production of any country, or its dependencies, from which the ves sels of the United Slates are mot pernitiod to brms the same article, shatl be mpported into the Uaitid States in any for if in vernel. And all plaster of l's ris impoited, or a 'empted to be impurted, into the Uaited s'ate, co it ary to the mintent an I meais i. \(g\) of this act, and tide vesont in which the sam may be imporiell, or uttciapted to be inported, th. gether widh the eargo, tackle, apparcl and furmitite. shall be finfeiled to the United states; and such plaster of l'aris, vessel and cargo, shall be liable to be seized, prosecuicd amd conilenumed, in like nanwer, and under die same regulutions, itstrictions, and provisions, as have beenheretufire established fir the recovery, collection, and distribition, and remission of forfeinures to the Uinted \(5: 2 \mathrm{ch}\), b! the ate eral revenue lails.

Ske. 2. नiod be uf further shacted, That his set shat! contive and be in torec fire : cits frum the thirty.
first day of January, one thousand eight hundred and seventeen : Providel, nevertheless, That if any foreign nation, or its dependencies, which have now in force regulations on the suhject of the irade in plas'er of P'aris, prohibiting the exportation thereot to certain ports of the United States, shall discontinue sach regulations, the president of the United States is herelyy authorised to declare that fact by his proclamation, and the restrictions imposed by this act shall from the date of such proclamation, cease and be discontinued in relation to the nation or its dependencies, discontinuing such regulations.
[.Approved March 3, 1817.]

\section*{Lupenella.}

The seed of this most valuable species of grass has been transmitted by our consul at Leghorn to the secretary of the treasury, which is thus spoken of in a letter from him to the acting governor of Georgia, -published in the Georgia Journal of the \(10 \mathrm{th}_{1}\) inst.
"I h ve lately received from our consul at Leghoru, in I'aly, a parcel of the Lupenella seed, which is represented as the finest grass cultivated in that colvitry, for the quantity and richness of the lay; the priference felt for it by all animals, and its fertilizang effects upon the land in which it is cultivated. In Italy it is sown in March and Oclober-it is cut with a sicle to avoid shaking of \({ }^{\circ}\) the blnssoms, botud up in bundles of 7 lbs , and fed to working horses without grain, as it is sufficiently nutritive of itself.
"Three years cultivation of this grass enriches the poorest land so much, that two successive and abundent crops of gjain ure produced : ithout manure \(T\) is is the account which I have received of it from Mr. Appleton, the consul.-As it succeeds in Italy, there is every reason to believe that it will succeed in Georgia. The quantity I have sent you to furnish several of our acquaintances with enough to put them in stock of it, and thereby multiply the chances of success. It is sown, I presume, broad cast, but drills will be more productive for seed. I am convinced that when sown for hay it ought to be sown thick, as a certain means of keeping the crab grass under. When it is mowed, it my run some risk of assault from this formidable adversary, but I ain persuaded it will be diminished by the thickness of the Lupenella."

\section*{Chinese Criminal Law.}

From the Boston Centinel.
Ma.Rusaell. A copy of the translations of extractis from the Clinese crimin.l code of laws (which are circulated among the Americans and English at (unton, \&ec.) has lately fallen in iny hands; and as it may afford some information respecting the cuss thme of that reinote and apparently benighted na: tion, you are requested to glve them a place.
Tinnabitions of extracts from the Chinesu criminal code of luazs.
1. A tamn w!ou kills another on the suspicion of thefi, shinll be strangled, according to the law gainst homicide committed in an affray
2 A man whofires at ano lier with a musket and kills Aim thereby, slall be beheaded as in cases of wilful murder: if the sufficer is wounded (but not murtally) the offcuder shall be sent into exile.
3. A nian who puts to death a criminal, who had been apprchended and made no resistance, shall be strangled accurding to the law agamst homicide. comaiticd in an aftray.
4. A man who falsely accuses an innocent person of theft (iil cases of greatest criminaliy) is guith of a capital offence; in all other cases the offenders, thether principal of accessories, shall be sent into exile.
5. A man who wounds another unintentionly, shall be tried according to law respecting blows given in an affray, and the punishment rendererd more or less severe, according to the degree of injury sustained.
6. A man who, intoxicated with liquor, commits outrages against the laws, shall be exiled to a desert comintry, there 10 remain in a state of servitude.

The firegoing are articles of the laws of the em. pire of China, aceording to which judgment is passed on persons offending against them, without al. lowing of any compromise or extenuation.

\section*{Literature.}
from thi sational antocate.
Inp orement in the Hehres lunguage. - A higlly interesti-g publicaiion has just been completed in France, which will serve to throw the greatest ligat on modern learning. Its title page is-
"The Hebrew langunge res ored, and the true sense of its words recovered and ascertained, by their radical anaiysis," \&ce. by Mr. Fabre d'Oiivet2 vols. 4 io.-Paris, 1813 and 1816.

In the first part of the work of this celehrated writer are found-1st. An introduction to the origin of speech, to the stuly of the languages leading to it, and to the views of the author in pursumg his plan 2d. A Hebrew graminar, grounded on new principles, and a mode subservient to the study of all languages. 3 d . A series of Hebrew ronts, con sidered in a new ligh., and intended to faciliate the understanding both of this language and the science of etymology. The second part opens with a preliminary discourse, and a tranślation in French, of the ten first chapters of the Sepher, (Gehesis) con taining the cosmogany of Moses. This translation is intended to corvolurate the principies established in the graminar and dictionary.

We shall here give a short account of the motives which determined Mr. d'Olivet to prosecute the execution of this important work. Ali learied men, who had examined the Hebrew language, and eadeavored to understand its genius, were perstaded, setting asile their various countries and religions, that it hal been lost for a long time, the words mate ruse of in the grammor and dictionuries, with which it is learned, being grounded on erroneous principles. Nearly 600 years before our era, the Jews, titemselves, understood no more the langutre of their ancestors, and had adopted one intermixed with those of neignboring nations. It is in this dialect, eailed Hebrew, to which, hereafter, were added some Gireek and Latin worls. The I'thater are written, as well as most of the books cunsidere: to be ancients, by the modern Jews. This loss of a language, so materially comected with the history of the earth, and in which so much information was accumalated, has exercised the sagracily of is great number of studinus ment, at different periods, among various na ions and religious sects. Many have attempted, by uncommon labor, to discover its origi nal principles, and through them re establisht i , as well as (f course) the right sense of the words Not only Christians, wit Jews, and even Mahome tans, rivalled in zeal for it: but in vain have ma:! among them spent their whole lives in the enter prize, as none could attain its forgotten principles,
ance the edifice which they sometimes raised, with s inousand struggles, for want of a gond foundation, crumbled doirn at the least touch. Tlie suthor will not hesita e to say that he knew, long before, the rock on which they all had been wrecked, and would not have ventured on a sea covered with the testironies of their misfortunes, if peculiar circumstances had not brought him again to the sulhect almost without percciving it. His studies were, at first, dir cted to annther nbject. A work on archenlory, cmbracing the whole history of the earth, fixed his atiention. When employed in deep researches about the pricipal language of Asia and Africa, he was led to examine the Hebrew he had studied in his youth, just after the manner it is generally learned that is, very imperfectly. This language, in erest ing under varions points of view, attracted the more his nntice on account of having not got acqusinted with it by the usual chamels, either of the Latin or Greek, but by languares that had more analogy with its origin. The uncommo:l path he hat taken, determined the irregular manner he adopted, to contemplate the same; and what many learmed men had in vain attempted to do, he accomplinhed. Without difficulty he disenvered the principles of the Hebrew, and rendered himself capable of ascertaining the sense of is terms, not through the knowledge of the Greek and Litin translations, most of which are erroneous, but by :ra intimate knowledge of its genius. looking, then, with an investigating eye, on the inestimable monument, transmitted to us by the Hebrews, that is, into the Srphfir of Moses, he saw in it many things, which, in relation to morality, and phalosophy particularly, might be vastly interesting for lumanity; and lie was of opinion that in this look, come out entire from the sanctuaries of Thebes and .Memphis, we possessed, without think. ing of it, all the sciences of ancient Esypt.
This discovery was for the autior a strong motive for making an attempt to restore the Hehrew language, which could facilitate their knowledges but he hard not that motive alone-for in agrecing with those who have employed their time on the matter, that Hebrew did not differ from the ancient Phenician langu:ge, respecting its radical form: what a vast light could not the possession of it trirow over the history of Europe, and over the origin of the idioms whic!, in succession of time, have, appeared in it! Every one knows that the Phenicians formerly dit for that part of the earth what we have recently done for America; that is, They colonized the whole extent of its coasts, civilred the savage nations inhabiting them, gave them laws, religion, and various arts; taught them how to build cities, to form regular socicties, and sowed in this way the seeds of those harvests of glory gathered afterwards by the Greeks and the Romars. it is on the language illustrated by these two nations, that have been formed all those spoken at this time in Europe; it is on their literature that all the literature of Europe has been established-and so there is neither public or private instruction without these two languages; no methodical mode of teaching but must be chiefly grounded on them.

These are the principal motives which have determined Mr. D'Olivet to write and publish the present work.

As the translation contained in the second part, mearioned at the begimniag of this accoum, cannot be analized, we shall confine ourselves to an extract fiom the preliminary discourse, that is, to the statenent of the anthor respecting the advantages whicla inust result from this tramslation.

Thanks to my publication of the Skpher, (ays Lazorence, hy order of the common council, in honot

Ir. d'Olivet,) Moses will no ingger be the shelf of reason, and the spectre of the physical science. In his cosmorany will no more be seen those disgusting cuntradictione of inconsistencies; those ridiculous pictures which afforded such dreadful weapons to his enemies. In him will no longer be seen a nar-row-minded being, supposing the Almighty, actuated only by the most confined views and passions, refasing to man his immortality, and never talking but of the soul seeding away with the blood; but a wise man, initiated in all the mysteries of nature uniting to the substantial and enlightened information which he had acquired in the sanctuaries of Thebes, the light of his own inspiration. If the natural philosopher consults him, he will find in this, his work, the accumulated observations of an inwumerable series of centwies, and all the experimental philosuphy of the Eg! plians condensed in few wonls-he will be able to compare his important natural philosoplyy to that of the moderns, and be enkbled to judge in what one resembles tue other, and whether it is superior or inferior to it. The meth. physician will have nothing to say in opposition, as natural philusoplyy is not born among us; but it is especia ly the philosopher who will discover in this book analı gies worthy of his curiosity. Were he to have a mind to it, this book will become in his hands a genuine criterion, atouchsione by which he will find, in any system of philosophy, whatsoever that sistem contains of good or evil: he will, in short, find in it the most correct and sublime thaughts of tire philosophers from Thales and Pythurgora to .Vezton and Kant. My notes will supply him in that re-pect with many dates; beside, in writing them, I constantly had under my eyes the four most authentic original versions; I quoted them when ne cessary; to the other versions I paid little attention, for it is known that none of them can be of any authority."

\section*{CHRONICLE.}

The Franklin 74, capt. Stewart, is rapidly fitting to sail immediaiely for the Mediterranean, to relieve the Washington.

The common council of New-York, on the 24th of March last, directed that 1 st, \(2 \mathrm{dl}, 3 \mathrm{~d}, 4 \mathrm{th}\) and wih streets, in the Bowery, should ihereafter be krown and designated as follows:

Isi street to be called Chrystie-street, in lionor of licut col Joln Clirystic, a cilizen of New. York, who died on the Niagara frontior during the late war, while in the serrice of the United Siates, \(22(1\) July, 1813.

2d-strect to be called Forguth atret, in honor of licut. col. Forsyth, of the U S. mife corps, and who died of a wound received in Lower Canada on the 38 h of June, 1813.
Sd-street to be called Fillvedge-strect, in honor of lieut. Vidredge, of New York, who was arrested in his hopeful career by the tomahawk of the savage, in Upper Canada, 7 (ih Julv, 1813.

4th street to be called . Itrm-stret, in homor of Wim. H. Allen, of the U. §. navy, and who died of a wotmel received on brard the stomp of war Argus. enkaged with the British slunp of war l'elican, ifi of Aurust, 1813.
6tli-street to be called Lu-llorm-street, in honor of tient Indlow, of the United States M:vy, who receired his death wound on board the U S. frigate Cliesapenke when elgaged with the British frigate Shanmon, 16 th Stpt 1813.
Strects have heretofure been detignatel pite anel
of general Pike and capt. Law ence, of the n::vy. Baltimore.-In our la'e waiks we were astonished at the many new and beautiful horses that we saw were erecting, in several parts of our ci \(y\). We are told that they amount to ahout eight hendred. The building of that vast pile, the Cutholic Cathedral church, is resume l and goes on with apirit; a large edifice, desiened for an Unitarian clurch, is going up rapielly a splentid church, called St Panl's, is just completed, and another cpiscop il cluurch is begun; and they have reached he second story, (besides the bascment) of the cer.tre building of that mighty fabric that is to be the Exchange. New streets are continually opening and paving, and in spite of "dull times" Bultimore, as it improvements, presents a most delightful and hig'ly interesting aspect.
The Niro-IIampshire State Prison seems to have about paid the expences of supporting tire institution. The receipts anil expences are stated as follows:

From June 1816 to June 1817.
Profits of labor including work on the
S4,054 06
Received from spectators
7522
Notes due the institution,
3,017 81
S7,147 09
Besides a considerable stock of manufactures, provisiuns, \&c. remaining on hand.
Hospital expences
15000
I terest on monies borrowed \(\quad 7481\)
Exipences of joiner's shep
18076
Provisions
2,385 92
Cloathing, \&ce. of conricts, guard, and
wages of watchmen
3.93992

Nero Inampishire. Six ballotings have beeln had in the legislature of New Hampshire to elect a senator in the place of Mr. Mason (fed.) resigned. The rep. candidate, Mr. Storer, had 87 votes, Mr. Sinith fed. 83-neither having a majority of the whole number of votes (188) the firther balloting was postponed io the ensuing week.

Oliv. It is stated that governor Cass is invested with quthority from government to purchase and so extinguish the ludian title to lands in the state of Ohio. The procedure will confer a signal service on this most rapidly growing state-a litule while since a willerness, ahl now cuntaining more than half a million of freemen.

The Iludson. We are, indeed, much pleased to see that the project for deepening the Ifudsom, so as in produce a permanent depth of racive feet to Albany, by the erection of piers to lessen the wilth of tle cliammel, at certain places, scems to be accepted as easy to accomplish. Regarding that no ble river as the great out-let and inlet of an incaleulible trade to be corried oul hy our intand seas, le ing ennected to them by a canal, we hope that no riasonable means will be sparel to. give it evary degree of improvement of which it is stasepptilile. The enminissoners of the great canal have borrow. ed \$200,000 fis 6 preceht. siock, issued at fay, in make a begis ning with.

Mintary. The corps of calleis, belonging in tis miliLary acadeny, West Paint, 2 UU strong, under cominand of cuitain Prritlge, and accompanicd by their elegant band, acricel at New: yo:k on the 2th bilt. on a vilit, or a short relaxalion from *ticis wital sludion, They virited tho theorre in
the evening, where the play was the "sel'; us tirs. 1. diers" and the afterpiece of the "Broken Sivord" This youthful band astonished and delighted the people by the precision and cterity of their move ments and firings. They were reviewed ly the go vemor elect of New- York, fen. Morton, \&cc.
The U.S. frigate Macedunion, st he navy yard in Charlestown, has undergone a thorough nverianl, and repair. She was found extremely def.c ive in her upper works; but is now one of the firmest aud most compact vessels of her ciass in \(t\) ie service.

The U. S. f:igate Congisss, brig Boxer und schr Firebrand, are cruising in the guiph of Mexico and West Iudia seas.
Westreald A certain Jeremiah Meade and his brother with their chillren and gr-and chilluen, s'irty in umber, la ely passed through Pitisburg on their way to Intiatho
Ilexamitric Inspections, for the vear eudirg June \(11-2 \mathrm{~J}, 935 \mathrm{bbls}\). of Hour, 6,575 half do. 72 bils. rye do. 60 half do. do.

Crimes. We observe a long detail in some of our papers, copied from the Brit ish journals, giving an account of a certain crime committer in the Isle of - Man, by a person of great wealth and fortune there. Inever see any thing of this sort published without recollecting the saying of the Greek philosopher, who, being in a vessel with pirates importuning the gods to protect them during a storm, advised them to hold their tongues, und, if passible, keep it from the knowledge of the gods that they were on boa d , lest the innocent might perish with the guilty. Verbum sat.

Alississippi and Alabamta. The division of the Mississippi territory appears to receive the public approbation. A convention is expected to form a constitution and accept of the bill for admitting the former into the union as one of the states. The Pittsburg G ze:te says that gen. Juckson is now superintending the erection of a national cannon and cannon ball foundery, on Shoal creek, Madison county, Mississippi territory. He has laid off 30,000 acres for the use of the establishment.

Hydrophotria. A case of this dreadful disease, in which the patient died in terrible agonies, occured in Baltimore a few days ago, supposed to be from the bite of a dog about twenty years before, and not then thought mad.

T'he president is procceding on his tour with every mark of respect-the last account we had of him he was at New-London. Details hereafter.

The story of the Gireek ship Jerusalem (mentioned in this paper) sinking in consequence of the corrosion of her iron by quicksilver, is now believed to be made up for the mere purpuse of siwindling the charitable.

Inteunal improtements. Diring the nine years of governor Suyder's a:lministrarion, \(1,710,082\) dol lars have been appropriuted in Pennsylvania to internal improvements.

Slocks. United States 6 per cents, at Baltimore, June 28, 102 \(\frac{1}{4}\) a \(102 \frac{1}{2}\). As the banks pay specie, this is the specie value.

Internal Niuvigutiun. We lately noiced a speedy prospect of an internal water commenication between lake Onturio and the Chesupeake bay-and by the Susquehatuah, quantities of goods are received at Baltimore every year from the western parts of the state of Now-York. We observe in a late Pitts. burg paper that lumber has arrived there also, brought down the Alleghany, from the same state. It is supposed that pot and pearl ashes, so important to the manufactories there, will soon foliow, with supplies of plaster of Paris, \&ic. What a coun-

Ir! are we blessed will-every way intersected witis sireatns to invi'e us 'o unim, by making it our interest to love one armotier.

Eimploumens fur shithping! In the absence of a better busintss, we have several cases of vessels, laden with sones, sce employed io d fratul the insurance offic s, by being surk at ses, with at: tempts to no..ke it ppear that they have vailiable carsoes on bourd, \&c.

Specie. Anoiluce iesuel has arrived al Chariestoz from Jun: ic , wi'l \(1 \cdot 0,000\) dollars.

Fish. Eieven fishing vesse salitived at Philadel. phia on the 26 li ult. With fur fares from the banks. This is a new braticl of industry, which we hope m. y be well rewaded.

A tu.o. Thumas Jeferson and James oltalison, expresil'ents of the United Sites, and Jumes ohonroe, our p"esent president, met ne'r Charloteville, Va ol the 5 th of Muy, tn assist in fixing a sie for a "Ceutral Colloge," under an aet of assembly What a spectacle! Wi ere ithond we luok for its fellow?

A cerain captain J hn Parker lately died in Massachusetts at the advanced age of one hundred a:id rwenty years.

Huil. There was a hail storm in Washiugton county, Md. on the 21 st inst. Which rlid great damage. The hail was generally of the size of a hulled wal. nut, and son \(e\) of the stones were four inches in circumference.

Stuges. By an advertisement of the postinastergeneral, \(\mathrm{i}^{\prime}\) appears, that after the expiration of the present contract, the nail is to be carried in stages from Pittsburg to Louisville in Kentucky, (a distance of four hundred and forty miles, in seven days.

A strazoberry has been plucked near Philadelphiathat measured four inches and an eighth in circumference.

\section*{emigration from the dilted states.}

From a Quebec paper.
Statement shewing the number of British subjects who lately left Great Britain and Ireland for the United States of America, and who received, between the 10 th of warch and 10th of May 1817, passports to entitle them to grants of land, fiom Juaie= Buchanan, his majesty's consul at NewYork, to priceed to British Nurth America, chief-. ly to Upper Canada.

NHLUS' WEEKIN REGISTMP.
}

\section*{Letters of Thomas McKean.}

\section*{Quincey, June 30, 181\%.}

Mr. Niles,
The n!lest statesman in North America is no more. Vixit.

Mackean, for whose services, and, indeed, for whose patronage, the two states of 'ennsylvania and Lelaware once contended, is numbered with his fathers.

I cannot express my feelings upon this event in any way, better, than by the publication of the inclosed letters:
1. June 13, 1812.
2. August 20, 1813 .
3. Augrst 28, 1813.
4. November \(15,1813\).
5. January, 1814.
6. Uctober \(15,1814\).
7. November 20, 1815.
8. June 17, 1817.
t pray you to print these letters in your Register. JOHN AlD.I.IS.
Jiditor of the Bultimore Heekly Register.
Philulelphia, June 13th, 1812.
Deale Sill-On my return from a tour to the state of Delaware, I found your kind letter of the 2 d instant, and thank you for this mark of esteem.

Our venerable friend Clinton lias gone before us, so has the illustrious Washington, eleven years arro; and I have nearly outlived all my early acquainsance. I remain the only surviving member of the first American congress, hold in the city of New. York in Ociober, 1765; and but three more, of whom vou are one, remain alive of the second, held in this city in September, 1774. It was my fite to be delegated to that trust annually during the revolu tionary war with Great Britain, until the prelimi. nary articles of peace were signed in 1782, which affurded me all opportunity of knowing every mem. ber of congress during the whole of that time; and I declare with pleasure and also with pride, that I embraced the political sentiments of none with inore satisfaction (being congenial with my own) than yours: nor do 1 recollect a single question in which we differed.
It is true, I was a friend so the revolution in France, from the assembly of the Nutables until the king was decapitated, which I deemed not only a very atrocious but a most absurd act. Afier the limited monarcly was abolished, 1 remained in a kind of apatly with regard to the leaders of the different parties, until I clearly percejeed shas nation was ineapable at thas time of being ruled by a popular govermment: and when the feoo and ufierwards un sudividual assumed a despotic sway over the:n, I thonglit them in a situatlon better than under the governinent of a mol), for I would prefer any kind of goverument io such a state, even tyranny to anarcliy. On this subject then, I do not conceive we diflered widely.

My dear sir, at this time of our lives, there can certainly be no question, as you observe, of honmer,
jprofits, rank or fame between us; I shook hand with the world three years ago, and we saill fare. well to eaclinoler; the toys and rattles of childliond would, in a fow years more, be plobably as suitable in me as office, honor or wealth; bilt (I thank (iorl) the faculties of my mind are as ye: litle if any thing impaired, and my affections and friendships are unshaken : I dn assure you that I venerate onte early friendship and am happy in a coutiunance of it.

Since my exemption irom official and professional duties, I have enjoyed a tranquility never (during a long protracted life) heretofore experienced, and my health and comforts are sufficient for a reasonable man.

Our country is at this moment in a critical situation; the resilt is in the woinh of fate; our systein of government, in persec, is the best in the world, but how it wils operate ist rour is doubtful; this, however, is likely to be soon put to the test, and I sivcerely regret it.

There is a cheerful air in your letter that evilences health, peace and a compctency, which that yout may long enjoy is the sincere wish and ardent prayer of, dear sir, your old friend and most obedient servant,

THO'S MckEAN.
Juin Anams, Fisquire,
Late President of the \(U\).S. of America.

\section*{Philudelphia, .9ngust \(20 t h, 1813\).}

Dear Sir-I can at length firnish you with a copy of the proceedings of the congress held a New. York in 1765 ; it is inclosed herewith. After diligent enquiry I had not been able to procure a single copy, either in mantuscript or print, done in the United States, but fortunately met one, puhlished by I. Almon, in London, in 1767, with a cullection of American tracls, in fuur octavo volimes, fiom which I caused the present one to be printed: it may be of some use to the historian at least."
'The maryuis de Casa Irujn, with my durghter, thei: children and servanta, made me a visit on his return fiom an einbassy to the prince regent of Porlncal, at Rin Janciro, in Braail, last June was a y ewr, and remained here until a few weeks agn, owing to the embargo, war, blockades, \&c. when they sailed for Carliz. The above circumstances, with otliers, will, I trust, be some apology from my long delay iil answering your last esteented letter.

In the congress of 1765 there were several conspicious characters : Mr. dames Otis appeared to lie to be the boldest and best speaker-I vuted for him as our presideut, but brigadier R:jgztes succeeded by one vote, owing to the number of the committoc from New York, as we voted individualIy: when the businews was finished, our prevident would not sign the petitions, and perempiorily refuscd in assign any leasons, until I pressed him so hatd that he at last suid, "it was against his conscience:" ou which word I rung the change so loud,
- The journals of this congrese, taken from the original M. S. S. of its clerk [.Jolin (otton, esq.] were publislied in the Weewhy Jingoretis, vol. IIJuly 1512.
that a plalu challenge was given by hin and accept-1 ed, in the prenence of the whole corps; but he departerl the pext merning before day witlout an adieu (o) at! of his brethren. He seemed to accord with what wis done during the session so fully and hearth!, that Ifr. U is told me frequently it gave him surnmae, as he onnfessed he suspected bis sincerity.

There was less fortitade in that body than in the succeeding congress of 1774 : indeed some of the members seemed as timed as if engaged in a traiterous conspuracy. Mr. Ogden, then speaker of the New-alisey assembly, following the example of the presiclent, d \({ }^{\circ}\) clined to sign the petitions, though warinly solicited by myself in private and also by my father-in-law, col. 13orden, his colleague: the consequence of my inentioning this fact, as \(1 \mathrm{re}-\) turned to Newcastle through New-Jersey, was to Mr. Ogden a burning in effigy in several of the counties, and his remuval from the office of speaker at the next meeting of the general assembly; and to me, menaces of another cliallenge. The great mass of the people were at that time zealous in the callse of Americia. Other incidents of that day are recollecterl, but they are of trivial import.

In the year 1778 , and afterwards until the prelininallies of peace were signed, the members of congress varied yearly in point of talents and exerions in f.vor of the revolution: they seemed to be considerably governed by the prospects before them, as they were promising or the contrary: how ever a great majority were sfaunch whigs at all times.

IV batever may be the fate of our government in the L'nited States, I decidedly think with you, for the reason you assign, that a democratic form in France, in the present age, was preposterous : \(I\) entertain the same opinion of the Spanish provinces in South America. The form established last year by the cortes of Spain is admirably adapted to the state of civilization in the peninsula - it is a capital performance, but will be attacked and resisted by the inquisitors, jesuits, monks, and all the bigots and peity tyrants.
It does not seem to me, that either of your successors enjoy niore ease than your predecessor. Mr. M Cison has paid too great a deference to the recommendations to office by low and designing men, who stood very much in need of recommen dations themselves, though excellent democrats, if they' were to be credited;-Mr. Jcfferson split on the same rock; many of their appointments have been exceedingly improper : though general Washington conferred offices on some tories, yet they were capable and only undeserving.
My paper is drawing to a close, so is my life; I am now in my eighticth year, therefore more than a year older than you. Had you not noticed the quiveration of your hand (an expressive word, though newly used) I slould not have discovered it-mine quivers very much when feverish or agitated by severe exercise; my cyes grow dirmmer, my liearing duller, and I have other symptoras of age; but why repeat grievances that caunot be redressed? May you not ouly continue to enjoy, but increase your lealth and o.ium cum dignitate with every other blessing.
Dear sir, your friend,

\section*{tho's Mckein.}

Hon. Johy Apams.
Fhiladelplia, Jiugust 28th, 1813.
Dear Sir-With sincerity I condole with yout on the death of your daughter; I had five children who have died, three of whom have been married and lefi a numerons offispring. By these evghts we have sus.
tained the deprivation of great comforts; but oat loss is their inctlible gain, they are in the bosom of the ir father and their Gicl. These are among the common calanities of life; resignation to the clispensations of Providence, and gratitude for all the blessirrgs left us are indispensable duties.
Your f.wor of the 31st last month would have becu acknowledged before now, but from a hope I entertained of giving you some account of the congress at Albany in 1754: however, after considerable enquiry, I tave been disappointed. I have a feint recollection, that it was appointed by the British ministry for the ostensible purpose of ascertaining the boundaries of the several colonies to the eastward of Delaware; but in reality to propose the least offensive plan for raising rarevenue in America. In 1739, Sir Willian Keith, a Scoich gentleman, who had been a lieutenant-governor of Pennsylvania, proposed such an assembly to the ministry; he also proposed the extension of the British stampdutics to the colonies. He was then, I believe, in the Fleet-prison. The hints he gave were embraced, the first in 1754, the second in 1764.
It has been Iong a matter of surprise to me, that no gentleman of talents and character lias undertaken to write a history of the former British colonies, now United States of America, at least from 1756 to 1806, a period of fifty very important years. Such a work would not only be a great benefit to posterity but also to the author-it would sell well.
To form an opinion that a maj, rity of the people of Pennsylvania were against the American revolution at its commencement, was not uncormmon, especially by strangers:, the mistake arose from the circumstance of a large majority of their representatives and civil officers being in the opposition. This state was first settled by a colony of Quakers, their proprietor and governor, William Penn, being at the head of the sect : they had the entire government or rule of Pennsylvania from 1682 until 1776, by the following means: The province was in the beginning divided into three counties, Philadelphia, Chester and Bucks, and when the three lower counties on Delaware (now state of Delaware) separated from them in 1700 , each county had eight members in the legislature, and the city having been incorporated and inhabited chiefly by that sect, was allowed two. Eight other counties were erected prior to the revolution, and were allowed, some two, some but one representative, so that in ail they had but ten; although, if they had founded whe representation according to the number of human beings in each district or county, the Quakers would liave been greatly overruled, even adding all the tories or enemies of the revolution to their number. The voice of the representatives was not the voice of the people, as is the case with the British parliannent; the three Quaker counties. having 24 members in assembly, made all the laws. They gave great trouble to the whigs, but they were kept under by fear as well as by superior numbers: from that day the people called Friends liave ceased to rule Pennsylvania; they foresaw the consequences of an equal representation, as it would affect themselves, and this was a principal cause of their aversion to a change in the form of our government as a body, thongh manyindividuals of their society differed with theill and became active and good citizens.
In the marriage of our children, their, not our happiness is to be chiefly consulted; I confess, my wish is to have them established in their native country.
On reflection, I cannot refer to a single instance of chisintecestgl pr evident friendship of Great Bri-
tain towards this country during the period you mention : every act which might bear such an aspect, has been performed for the interest of the administration alone, although coupled in some cases with that of their own island.

I shall be always pleased with your correspondence, and happy in contributing to your amusement. Your able talent for writing history, and your eminent public stations, induced a hope that we should be favored with an account of the transactions in America, for at least the last sixty years, from your pen.

\section*{THO'S McKEAN.}

Plitalelphia, November 15th 181 s.
Doar Sir-I have to thank you for the introduction of the Rev. Mr. Henry Coleman to my acquaintance, and am sorry lis other engagements deprived me of his company as often and in the manner I wished.

My last letter was (I perceive) dated in August instead of September; your's of that date, to which mine was an answer, bore the same date, and I sup. pose lay before me. Old age will discover itself whether we will or not.

The anecdote of Sir William Keith's proposal to the British ministry is to be found in the latter end of the 1st volume of American Tracts, printed by 1. Almon, in London, 1767: it had been published in London in 1739, and is titled "A proposal for " establishing by act of parliament the duties upon "s stampt paper and parchment in all the British "colonies." Part of the anecdote I had by tradition, and in a novel, "Peregrine Pickle;" for I have read and still read novels : these fabulous histories afford me not only amusement but pleasure, because they almost universally make vice detested and punished, and virtue triumphant, which is not the case of history of real life.

With respect to the histories of North America hitherto published I concur with you in opinion; they were not popular, because the authors were little known, and it was known, that they had not an opportunity of personal knowledge of the facts they related, and in several of them were mistaking: the authors seem to have paid too much attention io those whom they supposed would, from their reputation for wealth and influence, be most likely to promote the sale of thic books, or otherwise advanee their fortunes : this temptation is now done away; the favored charactersare all dead, and very few of their descendants at present in any way distinguished.
l lave briefly mentioned the situation of the prople of Pennsyivania at the time of the American revolution; the like shall now be done with pespect (o) Delaware. This small state was inhabited before l'ennylvania; it consists of only three counties, siz. Newcantle, Kent and Sussex; the last was set. thet by a few fimilies from \(S\) weden, more from Holland, but the great mass from Eingland; Fient was rearly in the same proportions; and Neweastle aras inhabited from Sweden, Holland, bat the great majority were from Ireland-there were a few from England and Scotland. II Neweastle, three.fifihs were at the time of the revolution Presbyteriant; in Kent about five cighths l'rotertant Episcopaliaus, and in Sussex two thials of the latter. The "Socicty in Loudon for l'ropagating the fiospel in Forcign l'arts," had about half a doren missionarice, perhapes more, in the state of Delaware, to some of whom they gave a salary of \(60 \%\). 10 others \(50 \%\) sterling a yeur; these ministers foresaw, that if Ameriif hecamre an intifpeadent state or tiation, theiesa.
laries would necessarily cease; it was their in erest therefore, to oppose the revolution, and they did oppose it, though with as much secrecy as practicable; they told theirhearers, many of Thom, especially in Sussex, were illiterate, ignorant and higotted, that it was a plan of the Preshyteriaus to get their religion established, that it originated in New.England and was fostered by the Presbyterians in every colony or province: a majority of this state were unquestionably against the iurlependence of America, but the most sensible of the Fpiscopalians, the Baptists and Quakers, and the Presbyterians, with very few exceptions, prevailed against them, as they believed they aronld be overpowered, with the help of the other colonies, if they resisted. I conld not avoid remarking. that I was chosea, unanimously, speaker of the house of representa tives of this state, when, of all the members present, here were but six, including myself, who were esteemed whigs.
That you may continue to enjoy health and every other blessing is the sincere prayer of, dear sir, your old friend,

The hon. Jonx Adams.

\section*{THO'S MCKEAN.}

Philadelphia, January, 1814.
Dear Sir-In ycur favor of the 26 th November last you say, "that you reatured to say, that alout a third of the people of the colonies were agaiwst the revolution." It required much reflection before I could fix my opinion on this subject, but an mature deliberation I conclude you are right, and that more than a third of influential characters were against it. The opposition consisted chiefly of the Friends or Quakers, the Menonists, the Protestant Episcopalians, whose clergy received salaries from the Society for propagating the gospel in foreign parts; and from the officers of the crown and proprietors of provinces, with their connexions, adding the timid and those who believed the colonies would be conquered, and that of enurse they would be safe in their persons and property from such conduct and also have a probsbility of obtaining office and distinction, and also the discorrtented and capricious of all grades.

I have not heard the specific stm of money Mr. C, J. Marshall received for his copy right of the life of Washington, nor have I been able to oblain any certain information concerning it; but if he obtained a sixth part of what gou mention, I think lie ought to be contented.

During my protracted life I neither have hat leisure or inclination to write a history, and at my present age it is out of the question. It is true, I have oftell been spoken to and even solicited by a great mally of iny learned acquaintance to undertake that of the American revolution, begiming at the year 1760 or before; among then Dr. Rush, your former correspondent, was not the least anxious.

Though I shall never wive a history, I will give you an historical fact respeeting the declaration of independence, whieh may amuse, if not surprise.

On the lat July, 1776, the question was taken in the commitlee of the whole of congress, whens Pennsylvania, represented by seveu inembers then prescht, voted arginst it- 4 io \(3 ;\) annong the majortty were Robert Morris and John Dickimson. Delaware (having only two present, uaincly, myself and Mr. Read) way divided: all the other states voting in favor of it. The report was delayed until the 4 th, and in the mean time I yent an express for Casar Rodncy, to Dover, in the county of Kient, in Delaware, at my private expence, Whami I mess as the
statc-honse doner on the \(\frac{4}{2}\) hh of July in lis buots; he resilen eighty miles from the city, and just arrived as cangres met Ilie question was taken, Delaware vote! in fivor ct inclependence; Pemsylvania, (here heing onlv five members present, Messrs. bickiasou and Morris absent) voted also for it; Messrs. Wilijg and Humphries were against it. Thus the thirteen states were unanimous in favor of in fependence. Notwithstanding this, in the printed public junroal of co gress fos 1776 , vol. 2 , it appears that the declarition of inr? pendence was de. clared on the 4 th of July 1776 , by the gentlemen whose names are there inselted; whereas no person signed it on that day, and amons the names there inserted, one gentleman, namely, George Read, Fsq. Was not in fivor of it; and seven were not in congress on that day, namely, Mess's. Morris, Rush, Clymer, Smith, Taylor and Ross, all of Peninglvania, and Mr Thornon of New-Hampshire; nor were the sis gentlemen last named, members of congress on ilie 4 ith of July. The five for Pennsyl. vania were appointed delegates by the convention of that state on the 20th July, and Mr. Thornton took lis seat in congress for the first time on the 4th November following : wlien the names of llenry Wisner of New-York, and Thomas M-kean of 1)e. laware, are not printed as snbscribers, though both were prescnt in congress on the \(41 h_{1}\) of July and vo'ed for independence.

Here filse colors are certainly hung ont; there is culpabi!ity somewhere : wha. I have heard as an explatiation is as fillows: When the declaration was voted, it was ordered to be engrossed on parch. ment and then signed, and that a few days after. wards aresulytion ras entered on the secret journal, tinat no per:on should have a seat in congress during that ye ir until he should have signed the declar:ation of independence. After the 4 th July I was not in congress for several months, having marched with a regiment of associators, as colonel, to support general Washington, until the flying camp of ten tlonsand men was comj:leted. When the associators were discharged, I relurned to Philadelphia, took my seat in congress and signed my name to the declaration on parchment. This transaction should be truly stated, and the then secret journa! should be inarle rublic. In the manuscrip' journal, Mr. Pickering, then secretary of state, and myself suw a frinted half shcet of paper, with the names of the members afterwards in the printed journals, stiched in. We eximined the parchment where my name is signed in my own hand-writing.

A glimmering of peace appears in the horizon may it \(b\) realized: but every preparation shoubd be made for a continuance of the wis. Winen the British arms have been successful, I have never found their rulers or ministers ctherwise than lauglity, rude, inperions,-may, insolent. They and their alies have this year been successful, both in the north and soutl) of Europe.

Mysight fades rery fast, thongh my writing may not discover it. Gud bless you. Your friend,

THO'S McKEAN.
His Excellency Jonn Ansms.

\section*{Philadelphia, October 15th, 1814.}

Dear sib-The communications of our plenipotentiries at Ghent give complete evidence of the temper and views of the British government respecting peace with the United States; they will emplatically uniee them. I liave always been of opinion that the administration of Ibritain intended to protrac the negociation until the result of the present campaign stould be known; but, antil now

I did not believe they meant to continue the wat longer. War, then, is the order of the day. We will never be Iritish colonies again. The loss of the lives of many thousands of our fellow-citizens and. of millius of treasure must be the consequence, but in times of peace death is not idle, and luxury and dissipation squander millions. When not half as numerous and not a tenth part so wealthy, we fouplit them, near furty years ago, with the assistance of five or six llousand troops from France, and the iversion orcasioned by the French navy, and we be \(t\) them. We are now so well prepared, and have had such recent proofs of skill and bravery, both on the ocean and on the land, that there is no reason to despair of success again.

The year ensuing will be the year of trial:-we shall then have as able and as brave officers and privales as we have ever had; nay, I will venture to say, superior by sea and land-and, when 1 refloct, that we can bring ten men into the field for the s me expence as our enemy can one, (for they will have in bring their forces three thousand miles at least before they can meet nis) there is reason to conclude our finances will liold out as long as theirs: especially when we consider they have been lately twenty years at war with another country, that commanded ali their energies.

An omnipotent and henevolent Providence may, by permitting new broils and contests in Europe, or by other means, firnish other employment for the British adminis ration, besides planning the destruc:ion or subjugation of an innocent people, fighting for their independence and just rights. On God let us rely; he has been and still is our general in chief:

I thought I had done with the world, having spent eighty years in it, but unexpected events have re. called my atiention to it for a short time.

The declaration of war appeared to me improvident and very wrong; but now there must be no retrospection; all our powers must be exercised on the present and the future.

In Philadelphia we are at last roused and preparing for defence and safety. There is an entire change of elective officers, both in this city and county, without a single exception.

This will be handed to you by the rev. Mr. Coleman, who makes but a sliort stay here: he has assured me of your good health. Having this opportunity, I could not refrain writing, and my niind being engrossed with the situation of our country, in obtaining and securing the happiness of which you and I have employed so masy years of our lives, at the risk of every thing valuable in this world, has forced from me a political epistle. Your worthy son being placed at the liead of the commissioners, of the United States, for negociating a peace, has hithcrio prevented me from engaging my pen to you abont the politics of the times.

May we live to see an honorable and successful termination of this second arduous contest for American liberty; and may you be as happy as I wish you.

Your friend,
THO'S McKEAN.
His excellency Joun Avams.
Jhiladelphia, November 20th, 1815.
Dear Sir - I can now answer th questions in your favor of the 30 th July last, viz. Who shall write the history of the Anerican revolution, \&c. ?

Major general James Wilkinson has written it. He commences with the battle of Bunker's or Breed's hill, st Buston, and concludes with the battle дear New.Orleans; on the Mississippis a period

कf forty years It will be published in three \(r\) lumes large 8vo, each rontsining about 500 pages The general, \(I\) am informed, confines himself to military trunsactions, with a reference to a very few of the civil. I knew him person lly near far y years ago, but have not seen or heard from lim for the last seven years : I think him above mediocritt. He has been in the army during the whole time, and is hetter qualified to give a description of its proceedings than any gentleman with whom I am acquainted.

This history has been written within the last se ven or eight months, at Germantown, about sis miles from this city; though 1 have not heard of the general being there until lately : he has kept him self quite relired and private.

I do not recollect any formal speeches, such as are made in the British parliament and our late C \(n\) resses. on liave been made \(i\) th revolutionary congress, though I was a inember for eight years, from 1774 until the preliminaries of peace were signed. We had no time to hear strch speeches; little fur deliberation: action was the order of the day. . The speech of Mr. Richard K. Lee, given by the Italian, the chevalier Botta, which I have read, may have been delivered, but I have no remembrance of it, though in congress, nor would it do any member much credit : I have no favorable opinion of the Chevalier, he appears to me a vain and presuming character to hive attempted such a history; perhaps the res angustx domi (poverty) impeiled Irim.
Although we may not in the United Slates have a Thucidydes, a Tacitus, Hume, Robertson or Gibbon, who have been reckoned the best historians in Greece, Rome or Gireat Bri ain, yet we have genthene of great talents and capable of writug the history of our revolution with at least as much refar 1 to truth as any of them lias exhibited.

With respect to general Wilkinson I recollect an aneedote: lie was in \(\mathbf{1 7 7 7}\) an aid to general Gates, and by him sent to congress at Yoiktown, in Penn sylvanis, with the di-patches, giving an account of the surrender of Sir John Burgoyne and the British army to the Imericans at Saratogas on the way he spent a day at Reading, about fify miles from Yorkrown, with a young lady firm Piiladelphia, whom he afterwards married. When the dispatches were read in congress, propositions were made for paying a proper compliment to the fayorite of general Gates who brought us such pleasing news. Gov. Samuel Adams, with a grave and solemn face, moved congress that the young genteman should be presented with "a pair of spurs."

What clanges in Europe have occurred since I had the pleasire of writing to youllast? Leewis 881 is agsio on the throne of France, the great Nap, leon at the bottom of the wheel, never to rise more, a prisoner for life. The Frencl nation miserable; Spu in has reeestablistied the tribumal of the I quisition and restored the Jesuits. The rulers of Pur. tugal void of common sense. South America in a state of npposition to the goverument of Sp ius, and in all apperance will soon be independent of it. W'atever is is right, said Mr. Pope, the first of poets and moralists

1 have nothing to do with politics, nor much with any thing else in this world, but I hear and listen. It is sund that James Minroe, secretury of state, John Armstrong, late socretary at war, Dewit Clin ton, late mayor of New- York, and perlups Rufis King, now a senator, will be proposed as catdidates for the next presidency. I do no think the prospect of either or any of them yery encouraging.

Mr. I.lum Q Adams has been n.med, but it not known wh ether this may not reate jalousy on injure him with the present alministration, w!lich his friends would lyy all means avoid.
My sheet is almost finislied. God bless you. Your old friend,

THO'S MCKEAN
His Excellency Jors Adays.

\section*{Philadelphia, June 17th, 1817.}

Dean Str-I am at present ohliged'to write to you bv another hand. The incl ised letter was sent tio me in May last, by your son Thomas B. Arlams, Eiq. with a request that I should return it mider cover to yous. I regret that owing to a mistake of his residence, I had not the pieasure of his companv at my table when he was last in this city. Miss Ruter his been so kind, 1 understand, as to expluin the circumstance to him.
It seems that the office of secretary of state, the talents of the candilates being equal, is the stepladder to the presidential chair, at 1 -ast it has been so in the cases of the three last presidents. Now as your son, the honorable John Quincy A lams, is appointed to that station, if he makes the best advantage of his situation, it is more than probable that he may be th: next president of the United States.
I shall selidon hereafter be able to write to you.
Please to pay my devoirs to your son, suld accept my most sincere wishes for your health and happiness. I am your old friend,
tho's mekean.

\section*{His Excellency Join Adars.}
P. S. I liave answered Mr. Ingersoll's request by a publication in the newspapers.*

\section*{Defeat of Sir Peter Parker.}

Bef,re I publistied the copy of the inscription on the monument of Sir P'eter P'arker, - pige 2451 addressed a note to col . Reed, (a revolutionary soldier and late a senator of the United States) who opposed and defeated the baronet, requesting any particulars of the affair that he might be pleaved to rominunicate in addition to those contained in his "fficial letter to general Chambers. In a very polite letter just received from hin, dated on the 3 d inst. lie apologizes for not answering my note sooner, and observes-
"It is to be regretted that on any occasion the friends of a gitlimt man should be so unmindful of what they owe to his memory and to trith, as to inscribe on his tombstone a palpable falselinod. That Sir Peter was a man of great gallantry there is no doubt; that he sought fame in every clime and bid f.ir to rival Nelson, is also true. It is not true that I had three times the number of the enemy's force-but it is certainly true that sir PC. ter had at least double my force. 1 is mot true that I was supportell by cavalry-there was not one man or officer belonging to cavalry ou the battle ground, or in the action, except captan Wilson." [ 11 - hien proceeds to state varions facts to shew that the enceny's force was double that of his own, on the testimuny of an intelligent genteman who was a prisoner on board the Menelaus, anil dimed every day
 object, furce, \&c. and who heard the roil callel before and afier the actuon, they apprehending uo lanioce froin him. "In a conversation," contmues col. Re. "between cap. Chambers and lifutenant Crease fud

\footnotetext{
- See page 278, present vol. W. IR;
}
the Menelaus] the latter insisted that we must have had 500 menl, and that we were covered by a masked battery-this monstrously magnifying vision of the lieutemant may account for the mistake inscribed on the tomb-stone as to numbers, cavalry, \&cc. A gentleman of intelligence, who was a moruing or two af:er the affair taken f:om lis habitation on the bay-shore by lieut. Crease and 200 men, stated that the enemy complained most vehemently of the effects of our bucksbot his information fully corroborates that before received, with the addition that the enemy had but thirty men who escaped unhurt, losing their weapons, \&c.
"I will now observe, that Sir Peter came up the bay with a squadron consisting of the frigate, a large schooner and a slonp. The schoorer was upset in a gale off Swan Point, crew saved except two. It is not likely that of this force he would have landed only 124 rank and file. We do know that while his squadron was in the waters of Sandy Point, he did cause Fort Madison to be reconnoitred, and that the night following he landed 300 men, got lost, was ashore the whole night, and only re-embarked at day-light-to this circumstance was the safety of Fort Madison, in all probability, owing. I wrote an account of this at the time. His landing on an unknown shore to attack a work he had little knowledge of, speaks for his character. Upon one of Sir Peter's people being asked, 'whether they did not consider the attack upon us as a hardy undertaking?' Le replied, 'Sir Peter never stopped to alculate danger when be had an object in riewthat he had frequently landed on the coasts of Eusope, and surprized and carried the works of his enemies in that quarter, and that he was adored by his crew.' He calculated on surprizing and carry. ing my camp, and although but a handful, it covered at that time the country he was acting upon under the burning orders of admiral Cochrane. His command brought out one day's provisions and all the prepured materials for communicating fire to buildings, \&cc.-these were left on the field and picked up by our people, the neighbors. Had he succeeded, no doubt the adjacent country would have present. ed a widely spread scene of ruin. Chestertown (not Georgetown \(\mathbb{X}\) Roads) was only seven miles distant and asine road. Whether that was within his range I cannot tell, though my information justified the belief that it was."

\section*{\({ }^{6}\) Difference of Opinion.'2}

Among the ablest, neatest and most respectable weekly newspapers that we see is the 'Telescope, published at Columbia, S. C. It is one of the few that we generally lay aside for a second lookingover; and in one of these we observe a well written article in reproof of such as are constantly clamoring about the "ingratitude of republics."-I never could see that a charge of ingratitude for services rendered belonged more to my country than to others, though it is not withont \(\sin\) in this respect. It is true, we have not the habit, and I hope never will, of building up the fortune of one man who happened to command, on the misery of tens of thousands of others commanded, that did their duty and'fulfilled every obligation as well as he; as is the practice in monarchies, to bolster themselves --but there is a more general diffusion of justice in our public measures. Yet the editor of the T'e'escope believes that we have neglected the "great and good deceased," and quotes a couple of artic? es relating to Gen. Greeve and Dr. Frankin.

The just and full share of celebrity" that belonge I io the former was no:, perhaps, rendered to him through the local situation and higher ground occ:1pied by Washingeos; and of him it may be right that the marble should speak to our children. But let not the stone that covers Funkins', aslies be touched!-nor permit the subline simplicity of its in cription to be lost by the stateliest production of. art. The world is filled with his name-eripnit fiumen calo, septirmque tyrannis; he is every where known and revered; and forbid it that an idle gazing at his mausoleum should usurp the place of a solemn admiration of his various talents and services when near the spot where his ashes repose. The man "that has a soul" will be filled with stronger and more delightful emotions on lookinf at the plain slab that'covers his remains, on which only appears

\section*{\(\left.\begin{array}{l}\text { Benjamin } \\ \text { Deborah }\end{array}\right\}\) Franklif,}
than in beholding a column high enough to out-cap the pyramids of Egypt, the names of whose builders are lost; but that of Franklin is immortal. Science and Philosophy have inscribed it in all their works -Liberty has proclaimed it to all nations, and History cousigns it to the reverence of ages.

\section*{Political "differences of opinion."}

The sentiments contained in the following extract of a letter to the editor from a gentleman of the bat in North-Carolina, are not less flattering to the one than honorable to the other.
"As you have given me an opportunity for writing to you, allow me as one of your readers, to thank you for the valuable information which your paper has afforded. You and I may not, perhaps, coincide in many of the doctrinal points of party politics. but, thank God, the time is going by when there is any necessity of recurring to these as tests of honesty and patriotism, or of considering them à the indispensible links of friendship and good neigh. borhood. For the good of our glorious forms of government, neither of us, probably, would wish to see the whole nation think alike, and follow, like mere automata, all sorts of public measures; but let us, if possible, make this necessary contest good natured, charitable and gentlemanly."

\section*{The Locust.}

A respectable old gentleman, who has seen and observed the locust at the different periods of their appearance, as noted below, has favored the editor of the Register with the following memoranda:

The locust appearen-
In 1749, in the month of May.
In 1766 , they came out of the ground from the 14th to the 17 th of May.

In 1783, they came out from the 16 th to the 19th of May.

In 1800, from the 19 th to the 26 th of May.
In 1817, they did not appear until the beginning of June; it is supposed the cold,., and wet weather retarded their progress.

They continue from four to six weeks, and are harmless, except to young and tender fruit trees or the twigs of older trees, wherein the female cleposits her eggs, which in a few days vivify, and the twig either breaks off, or the young locust emerges and fills to the ground, and makes its way into the earth, for another period of 17 years.

\section*{Domestic Manufactures.}
from the new-rork evenivg boist, of june 14.
The American Society for the encouragement of American manufactures, met last evening, in the assembly room, at city hotel.

Dauiel D. Tomkins, aresident of the society, took the chair, supported by the vice-president, col. Few, and John Ferguson, esq. The society being organizerl, James Monroe, president of the United States, was proposed as a membir, whereon, the presiding officer suggested that the usual form of ballot be dispensed with, and that James Monroe be received as a member; a motion to this effect was then made and carried unanimously-Messrs. Morris, Colden, and Peirson were appointed a committee to wait on the president of the United States, to inform him of his being elected, and to solicit the honor of his attendance at the meeting; to which he politely as. sented, and being inducted by the committee, took tris seat on the right of the presiding officer, who immediately rose and in an extempore and eloquent address, assured his excellency, of the high sense entertained by the society, of the honor he conferred, by assenting to become one of its members, which created a confidence, that he would do all which he consistently could, to promote the views with which the society was instituted.

To which, his excellency replied, with much eloquence and force, that he duly appreciated the objects of the institution, which were particularly dear to him, from their being intimately connected with the real independence of our country, and clos ed, with an assurance that he would use his efforts as far as the general interest of the country would permit, to promote the patriotic and laudable objects of the society.

James Madison, Thomas Jefferson, and John Adams, were then separately proposed as members and admitted unanimously: the usual form of ballot being, on motion, dispensed with.

The corresponding committee offered the follow. ing report, with an address from the pen of C. D. Colden, esq. which were severally read-After which, the president of the United States withdrew, and the society adjourned.

\section*{1REIPORT}

Of the corresponding committee of the socicty for the encouragement of domestic manufactures.
The corresponding committee, elected in persuance of the 3 d article of the constitution, for the cur rent year, respectfully report-

That immediately after the meeting of the society, held on the 31st of December, 1816, they took the speediest measures for carrying into effect the resolutions, respecting the printing and publishing the address then reported and adopted-They ac cordingly caused to be printed 5000 copies; one of which was transmitted to the president of the Unit. ed States, and one to each of the members of congress and heads of departments of the general government, and to the governors and members of the legislators of the states respectively, as for as the same was practicable.

Your committee, in further pursuance of the du. ties delegated to them, caused a memurial to be drawn up on bchalf of the society, addressed to the the congress of the United States, praying for the permanency of the duties imposed by the tariff; the prohibition of colton goods, manufactured beyond the cape of Good Hope; such revision and modifica. tion of the revenue laws, as might prevent smuggling, false invocies, and other frauds; for a duty of 10 per cent on auction sales, with the exeeptions
thercin stated: for a recommendation to the officers of the army and navy, and to al! civil officers, to be clothed in tmerican fabrics; that all public supplies for the army and navy night be of American manufacture; and for such other protection as might place our mercantile and manufacturing interests beyond the reach of foreign inflrence.
It is with pleasure and gratitude your committee have learned, that the war department has given an entire preference to domestic manufacture, and as much is confidently hoped from the department of the navy.

Your committee elected a delegate to proceed with the same to the seat of government.
Memorials of similar import, were drawn up by the merchants of this city, and by the citizens at large, respectively; and another member of your. committee was deputed by the merchants, wlio also appointed a citizen of New- Mork, then in the city of Washington, to co-operate with the delegates of this society, and cause the above named memorials to be laid before congress, with instructions to solicit and promote the objects of them, by their best endeavors.

The delegates, on their way to the seat of government, took occasion to explain to certain respectable and influential citizens of Philadelphis and B:Itimore, the objects, views, and motives of this society and the nature of their mission; and had the satisfaction, during the short period of one day in each of these cities, to witness the formation of kindred associations, whose proceedings have been long since made public, and which by their intelligence, patriotisu, capilal and character, have proved an inappreciable acquisition to the cause of do. mestic industry.

During their residence in the city of Washington, the said delegates, with the aid and co-operation of their colleague, made a similar and no less successful appeal to the citizens of Washington, Georgetown, and Alexandria; who at a meeting convened by puhlic notice, instituted and orgamizel, an association, entilled the Metropolitan Sociery-the proccedings of this association have also been made public, and their zeal, influence and respectability, have done much in rousing the spirit of inquiry and promoting the true interests of their country.

The delegates were heard with much atiention by the committee of commerce and manufactures of the house of representatives, to whom the above memorials were referred, and that committee reported in part by a bill, for the continuance of the existing duties upon importation as prayed; and referred the other matters inore immediasely couvected with the revenue to the secretary of the treasury: whose opinions, we think ourselves aushorised to state were in unison with the prayer of the memorial. ists. - And although the lateness of the session, and the mass of unfinished business, prevented the immediate attainment of the objects desired, yet the wisest and most experienced in and out of congress (the enlightened meinbers of the committee of the toouse included) vere of opinion, that nothing would be lost by the delay, as eiery day would offer new inanifestations of the public sentiment, and the circumstunces of the times be more fully developed, and operate as a law of necessity.
It may be important also to state the friendly in timation of the committee itself, that nothing would more conduce to furure success, than an mithentio collection of facts, tending to shew the value of the property embarked in domestic manufactures, the great portion of which was jeopardized by the causes set forth, and the loss and irrepairable injusy
the community \(m\) sast suffer from neglect and indif. * rence to so essential an interest. As that intiormation could be best collected and embodied by the active industry of this and other societies, we mention it as an additional stimulus to exertion and efforts, well combined and vigorously sustained, and we trust that all citizens, who prize the lasting independence of their country, who rejuice in its general and individual prosperity, will take pride and pleasure in slaaring so generous a task.

The *wo delegrates who proceeded together from this city, were gratiñed, in returning through the town of Lancaster, in Pennsylvania, to witness the formation of an association of citizens, possessed of every qualification to be useful;-talent, influence, and capital. They were there, as on the former occasions, invited to explain the views and tendency of their mission, and had the pleasure to find the principles of this institution approved, adopted, and jromptly acted upon by their respect. ed fellow-ciuzens.

Numerous societies have cotemperaneously, and in rapid succession, arisen throughout the union; many have announced themselves by publications full ot energy, and marked with intelligence. Regular coinmunications have been transmitted to us fiom the societies of Wilmington, in the state of Delaware; Middletown, Hartford and Litchfield, in Connecticut; Rome and other places, in the state of New.York: and we have full authority to say, that Ohio, Kentucky, New-Jersey, Virginia and Mississippi, will soon add their strength and weight to the common stock.

The most eminent journalists, without regard to political or party relations, have lent their unbought talents: and essays have appeared in their columns, which woukd do honor to any country or to any cause. The peiodical publications of most acknowledged merit, and extensive circulation, have likewise appropriated their labors to the service of their country, and as far as their sphere ortended, have put prejudice to flight, and igno. rance to shame.

A pamplilet lias been compiled by a judicious and masterly hand in the city of Philadelphia, from the report of the celebrated Alexander Hainilton, nade by that statesman in the year \(1790^{\circ}\), when secretary of the treasury, by order of the house of representatives: this p:tper has been eminently serviceable, inasmuch as it brings back the judgment of the reader, to the natural order of things, before the distorted and disjuinted relations of the civilized world had habituated mankind to disturbed and crooked views, and fallacious reliances upon ephemeral hopes and transient specula-tions.-It establishes principles pure and unerring; and has the merit not only of sage predictions, but of prophecies fulfilled.

It is impossible to notice all the valuable tracts that patriotic excitement has given birth to, within the short period siace our institution led the way-the address of the society of Middletown, in Connecticut, and the report of the committee of Pittsburgh, reprinted by order of the house of representatives, al'e documents deserving much attention; and it is to be wished, that a collection of the most of these valuable tracts, should be em. bodied and preserved-they are so muny pledges to the public, of the fuith and loyalty of the citizen.

The address of the society has been reprinted and circulated in such abundance, in so many dif. ferent forms, and noticed with so much favor, that zit is jompossible to retire from the froni of the bat-
tir, where we first appeared, without soine loss of character. It is our turn now, to lake the nevt step in the field of gencrons emulation, and we should meet, more thall half way, every overtire to correspondence and co-operation-We should acknuwledge our obligations for the comfictence re. posed in 115 , and for the lig.: and instruction reHected upun us.

So far your committee have traced their progress in the execution of their trust; so f:ur, our bark has adventured with a faroring gale; for althongh we lament that some of our fabrics inust suffer, within this year, irreparable loss; yet we trust, lhat the certainty, with which they may count upon the fostering care of the govermment, will in greneral restore courage, confidence, and credit, and enable the greater part to ride out the storm. The immense losses, at which our markets are glutted, cannot endure for many years, and little can he see, who does not read the rising prosperity of our manufactures, at no distant day, and with it, the power, happiness ants security of this high fivored land.

Your committee, considering the interests of commerce and manufactures as inseparable and identical, cannot close this report without noticing an evil wilich has grown to all alarming extent. The present system of auction sales of recent date, in this country, and an anomaly in lie history of commerce, has nearly exploded all rerrular business; and tise auctioneer, whose office was formierly sub ordinate to that of the merchant, is now ne:arly the only seller; and if subordinute to any, inerely t's at foreign principle. If any sales are now made by the regular trader, they are occasional and supplementary.

Commercial education orderly habits and sober pursuits, honor and good faith, too fatally yielit to gambling speculations and fraudulent contrivances. The benefits, if any, that result from this extraardinary monopoly, are dearly paid for by the ruin of a class, whose industay was the life of the com. munity and through them in a greater or less degree of the various and numerous descriptions of persons, who, without being commercial, depend upon commerce for their support-And if once the merchant disappears from the scene; if the source is once destroyed, the thousand channels which it fed become dry and fruitless, the proprietor, the mechanic, the artist, the laborer follow in the traill, and must seek elsewhere for subsistence.

Already has the public feeling remonstrat ed against this abuse; but the practice has still p re. valled. The established merchant it has been shewn, must ever be unable to compete with the stranger who is charged with no contribution to the public service, subjected to no rent or household expencliture, none of the costs or charges of a conmercial establishment, nor taxes, nor impositions for the support of government.

Vour committee therefore, refer this subject to the most serious attention of the society, that the most suitable means of investigation may be adopted to substantiate its truth and to procure relief. ADIIRESS.
All who believe that the happiness and independence of our country, are connected with the prosperity of our manufactures, must rejoice to see the chief magistrate of the nation honoring with his presence, a society instituted for their protection and encourarement. Knowing that the manufactures of the United States cannot in their infant state, resist the rivalship of foreigir nations without the patronage of the government, it is consoling ta find, that he, to whom the unanimous voice of a firef

\section*{NILES' WEEKLY REGISTER-LEGISLATURE OF NEW-HAMPSHIRE. 31 a}
people has committed the hiche.
unly consented to become a member of our institu. tion, but that he avails himstif of the first opportu. nity, of giving it the countenance and support of his attendance.

An incident like this may form a new era in the histrory of society. - In other countries the influeace of the magistrate is felt, only from the operation of his laws or through the instrumentality of his sub. ordinate agents: while on the other hand, he derives his iufumation through intermediate channels; but our happy constitulion, places the people and their otficers, in such relations io each other, that they may have a mutual and direct intercourse -and we now behold the first inagistrate of a great nation, seeking at its source, the information which will enable hims to know the wants and wishes of the country. A life devoted to the good of his country, gives us assurance, that it is only necessary to make him acguantel with what will promote its happiness, to instre all the support, which may be derived from his ligh station. It is nuw too late to question the advantages of manufactures; all history shews us how much tl:ey have contributed to the prosperity of every state, where they have been encouraged. Indeed, we find that in some instances, they have been the sonrces of all the wealth and power of a people. As they have prospered or declinelf, nations have risch or sunk. Evell weald, without manufactures an!! commerce, has ouly served in digrude a great community, by the introduction of that luxury, which was purchased with the produce of inexhaustible mines of gold. But it is not as they are sources of woalhh, that an Americ.an must feel the deepest interest in the fate of our manu-fictures- hiey more nearly concern us, as they are connected with our independence. For how shali we avoid the influence of foreisn nations, while we suffier ourselves to be atependent on them, not only for the huxuries but the necessrices of life! Can that untion feel independent, which has no reliance but upon foreign hands fur the fabrics which are to clothe her citizens? For manufactured materials which are necessary for the construction of their dwellings and for the tools with which they are to culusate their soil?
But such has been our situation, (unknown alinost 10 ourselves, tutil a jealousy of our prosperity frovoked a war, which barred us fiom the workshops of lingland; and then we fourd we were in some measure obliged to rely on a treasomable trade, to clothe the arinies, which inet her in the field of battle. The very powder which generated the thunder of our camon, was soinetinies British inanulacture, and the otriped-bunting may often have been from the sume loum with the Cross of Saint George, over which it so frequently waved iu triumpin.

Such a state of things, could not but awaken the spirit and enterprize of Americans. Amidst the agitations of war, while one part of the population was ranging itself under the military bamuers of our country, another devoted itself to her interest in another forin. Manufactures arose as if by ell-chantment-on every streain she formed for her. self spacious dwellings, and collected in thein many thousands, who in no uther way could contribute to the general weal. Those two young, or too old to bear arms, who had not strengit for agriculsural labors-the female whose dumestic services could be dispensed with in ber fanily, fuund here a means of individual gain, and of adding to the public prosperity. In a short three years, the proLuce of our looms rivalled foreign productions, and the nation with which we were contending, felt
more alarm from the prosress of our manufactures, than she did from the success of our arms. But peace came-while we were at war, the ware-houses of Eingland were filled with the produce of the labor, which a loss of inarket had enabled her to purchise at a depreciated price. The moment ine tercourse between the two countries was opened, tar hoarded stores were thrown upon us, and we were delugerl with the manufactures which had been waiting the event. They could be sold without profit, because the fortign manufacturer thought himself fortunate, if he could realize the capital Which he had been olsliged to expend, to support his establishment while there was no sale for wares.
But he was content to bear a loss, because, ir the words of an English statesman, "it was well worth while to incur a lass upun the first exportation, in order by the glut, to stifle in the cradle, those rising manufactires in the United States, which the war had forced into existence."-It would have been surprising indeed if our infant inanufactures, the establishment of which, had generally exhansted the capitals of those who emburked in them, could have sustained themselves under such circumstances, without any aid or support from the government, without any ineans of countervailing the effects of the sacrifices which foreigners. rere willing to make for their destruction.-How were they to maintain themselves? It was impossi-ble-many of them sunk-but we hope, to rise agsin. The altention of the government was too ariently directed, during the war, to other objects, 10 perceive the policy or necessity of that protection which the manufacturing interest did not then appear to want. But now, that peace will leave our legislators free to consider and provide for the reak independeuce, and permanens prosperity of our country, now, when we have at the head of our adininistration, a citizell, whose presence here this evening assures us of the interest he takes in the objects of our institution, we nay hope, that American manufactures will receive all the countenance and support that can be derived from the power of the government. Let that power be exerted only so far as to counteract the policy of foreign nations, and every American may be gratified in the pride of wearing the produce of the American soil, manufactured by American hands. Again slatl the surplus population of our great cities, and the feeble powers of women and children, find that means of useful and profitable employment, which mamufactures alone can afford them: 9 guin shall the patriotic and enterprising capitalist find advantage in devoting his means and mind to objects so calcu. lated to promote the prosperity and happiness of his country. And again shall forcign nations dread to see us rising to that real independence, which we never can in tiush enjoy, while we depend upon any but ourselves for the first necessaries of life. The Society beg leave to testify to the chicf magistrato of the nation, the high sense they entertain of the honor he has conferred upon them by his presence at this tune, and sincerely participate in the fectings, which liave been so universally manifested on lis visit to our city, and most cordially tender him Uleir best wishes fir his health and happiuess.

\section*{Legislature of New Hampshire.}
aghicultuhe and xanufactures.
In the house of represcntativer, June 26.
The committee to whom was referred so much of his excellency's message as relates to agriculture and domestic manufactures, made the following re. port:-

Foor committee ape deeply sensihle that agriculture and domestic manufactures must be our permanent sources of wealth and prosperity; that a proper attention to, and encouragement of, these objects are the only possible means of turring the balance of trade in our favor, and securing to our citizens that independence so necessary to us as individuals or as members of the community.

Your committec would beg leave to remark that while other sciences, and other arts, are receiving the most flattering enoouragement, both by legislative patronage and individual bountywe cannot indulge the mortifying reflection, that agriculture and domestic manufactures, so necessary to our existence as an independent nation, should be suffered to languish in obscurity, or be known only in habits sanctioned by tradition.
The greatest nations of antiquity bave given honorable testimony of their veneration for agricultural pursuits, and their history furnishes the brightest examples of its importance to mankind.

And whilo the labor of some of the nations of Europe, in modern times, has been employed in raising their country from the domains of the ocean, and in others contending with obstacles which nature seems to have designed as insurmountable to cultivation; we cannot but congratulate our fellowcitizens on the fertility of our soil-the ease and readiness with which improvements may be made -the sure and liappy rewards of industry, and the unbounded field which is here opened for the exercise of every agricultural experiment calculated to increase our knowledge, improve our wealth, and add to the stock of individual and social happiness.

I: selecting the means most likely to produce the great and obvious benefits resulting from an attention io \({ }^{\text {a }}\) these objects, your committee would respectfully suggest-that the members of the legislature, in their private capacity, as citizens of the different sections of the state, can, undoubtedly, do much by their example and influence for the improvement of arts so important to our vital interests.
Your committee would further recommend, that societies for the promotion of agriculture and domestic manufactures be established in those counties of the state where such societies have not already been instituted; that correspondence be cstablished between the societies of the several counties, and all proper exertions be made to collect and disseminate all useful information on the important subjects under their consideration.

And further that the sifm of one hundred dollars be appropriated to the use of the "Cheshicre agr?cultural society," for the putrpose of enabling said society to grant premiums for the best productions either of stock, grain, or such other articles as may be thought expedient; and that said society be requested to include the subject of domestic manufactures with the objects of their association. And that a society in each of the other counties in the state, which is, or may be established for the above purposes, receive from the treasury of this state the like sum of one hundred dollars, on application, after being duly organized as aforesaid.

Respectfufly submitted by
JOHN BROADHEAD,
For the committee.
Which report was accepted. [In senate, same day, read and concurred.]

\section*{'The President's 'Tour.}

Our regular account of the president's tour (pase 282) Left him on his arrival at New Haven. The following is an account of subsequent proceedings

Oin t.e 21st of June he reviewed the troops at New \(H_{i}\) ven, and recoived due military honors. In the afternoon he was visited by all the surviving revolutionary officers resident in that city, eighteen in number, and by the distinguished citizens general ly-after dianer, accompanied by gov. Wolcott, the tient. governor \&ic. he visited the places about the town deemed woithy of note. On Sundqy he attended divine service and in "the evening, the committee, in the name of their fellow ditizens, took leave of his excellency in a short address, expressing the high sense which they entertained of his visit with their sincere wishes for his individual prosperity, and his successful administration in his exalted station. The address was reciprocated in a manner honorably to the president and lighly gratifying to the committee."

In his visit to New Haven he seems to have won the hearts of the people-the editor of the Ilerald, in an account of it, says-"The dress of the president has been deservedly noticed in other papers for its neatnêss and republican simplicity. Hé wore a plain blue coat, a buff under dress, antd a hat and cockade of the revolutionary fashion. It comported with his rank, was adapied to the occasion, well calculated to excite in the minds of the people, the remembrance of the day which "tried linen's souls." It was not the sound of artillery, the ringing of bells, nor the splendid pricessionsalo e, foon which we are to judge of the feelings and sentiments of the people on this occasion-It was the general spirit of hilarity which appeared to manifest itself in every countenance, that evinced the pride and satisfaction with which the Americans paid the voluntary tribute of respect to the ruler of their own choice-to the magistrate of their own creation. The demon of party for a time departed, and gave place for a general burst of NATIONAL FEELING."
He reached Middletoron on Monday, at 9 o'clock, A. M. escorted by a company of cavaliry, and break-fasted-after which'lhe viewed the pistol, sword and rifte manufactories there, and proceeded to Weathersfield, where he was met by the military from Hariforld, \&c. and received with a national salute, and introduced into the place by a very great assemblage of citizens and soldiers, who escorted him over the bridge, which was elegantly ornamented with three lofty arches thrown over it, composed of evergreen and laurel-from the central one was suspended a label-"March 4, 1817."
The members of the corporation of the city visited the president immediately after he had arrived at his lodgings; and (in the absence of the mayor) John Morgan, esq. senior alderman, delivered the following address; to which the president gave "an appropriate extemporaneous answer."

\section*{To the President of the United States.}

Sir-The pleasing duty has devolved on us of presenting you the congratulations of the citizens of Hartford, on your arrival in this city. It is with sentiments of regard for private worth, no less than respect for official dignity, that the personal presence of the first magistrate of our nation is associated.
The endearing relation which subsists between the people of a fiee country, and their political father and guide, is peculiarly fitted to cherislı and ennoble these sentiments.

It is no less our happiness, sir, than yours, that vour adininistration has commenced at a period gilded by the recent exploits of our army and navy, and at the same time enjoying the tranquility and security of peace: when full scope is given to the enterprize, industry and skill of our citizens, in the employments of agriculture and manufactureswhen the pursuit of science, and the cultivation of the arts of civilized life, are encouraged by their appropriate rewards: and when the spirit of paryy, with its concomitant jealousies and misrepresentations, no longer "render alien to each other, those who ought to be bound together by fraternal affection." We anticipate in your administration, commencing under such auspices, and blessed with the smiles of HIM, "whose doininion is an everlasting dominion," a period of glory to our country and of honor to yourself.
The state of Connecticut, as she was among the first to adopt the constitution of the United States, so will she always be among its most tirm and zealous supporters.
The people of this state, while they cherish a high spirit of freedom, are from the force of our institutions and habits, distinguished also for their love of order and submission to the laws. - In pursuing a policy, which, as we confidently expect, will give the best effect to the principles of our government; establish commerce upon a permanent basis; render us strong and independent; confer on us a distinct and elevated national character; and secure to our country those high advantages, which seem destined for her by Providence-you may be assured of a hearty support.
May Heaven grant, sir, that your life may be long and happy; and that the freedom and independence of our country mas be perpetual.

JOHN MORGAN.
In belialf of the mayor, aldermen, common council and freemen of the city of Hartford.

Hartford, June 23, 1817.
To which the president made the following reply: To the Mayor, Aldermen and Common Council of the city of Ilarefurd.
"F'rllow-Citizens.-I beg you to accept mygrateful acknowledgments for the favorable sentiments which you have expressed towards me, and the kind and friendly manner in which you have received me. No one caro take more interest than I do, in the present prosperous and happy condition of cour country. llaving witnessed two wars, attended with eminent distress, and which made a severe trial of our institutions, I see, with the most heartfelt satisfaction, the happy consequences attending our excrtions, and which you have so justly described in the review you have taken of them. Blessed with peace; agriculture, the arts, and commerce flourishing: jealousies subsiding, and our bond of union daily gaining atrength, our situation is peculiarly happy, and the prospect of its long contieuance the most flatering. - In a state where the ars and sciences are so liappily cultivated, and which has evinced so strong an attachment to the cause of liberty, full confidence is entertained, that it will always be found among the most zealous supporters of that canse, and of our most excellent constitution."

When the ceremony of receiving the corporation had closed, the president and suit reviewed the troops, and visited the American Asylum for the lleaf and Dumb.
From Hartford he proceeded to Sprincfield, Mass. and arrived in the town escorted by 60 gentlemen in horselack, being met by ah artillery company
who saluted him, \&c. Here he received \({ }^{\circ}\) a brief but handsome address from a committee of the citizens. After which he inspected the public works of the United States. On his return to the inn, 410 children assembled from the several schonls in the village, passed in pracession before the door of the inn at which the president was standing to view them as they were passing. One of the cominittee said to the president, "We here present to your excellency the hopes of our country, and we are endeavoring to train them up in the nurture and admonition of the Lord, and in the pure principles of republican government,"-to which the president replied-"I am much pleased and gratified with their appearance, and I pray God to bless them and you, and carry your good design into effect."
After dining, the president left town, about four o'clock, P. M. on his way to New-London, escorted by about forty gentlemen, on horseback.
At Nezo-London, the president was handsomely received by the corporation and people; the former addressed him, to which he made a suitable reply, [we have not received a copy of the address]. After the ceremonies were over, he proceeded to business, visited the forts, examined the river Thames for several miles upwards, and embarked on board the U. S. brig Enterprize, under salutes from the forts and shipping, for Gardiner's Bay-from thence lte proceeded to the famous, town of Stonnington, where he was saluted from the two 18 pounders that so galled and mauled the enemy in the late war.

On the 30th of June he reached Newport, R, I. in the cutter Vigilant, from Stonnington. The bells were rung and salutes fired from Forts Wolcott and Adams, on board the cutters, and by detachments of artillery of the town. He was received with great attention and respect; wid proceeded to examine the Corts and the surrounding country, accompanied by governor Knight, col. Towson, \&c. \&c. On Sunday morning and evening he attended divine service -and on Monday, accompanied as before, proceed. ed to Bristol and Providence.
At Bristol, he stopped at the splendid mansion of George 1)" Wolf, and partook of refreshments "in a style and manver worthy the occasion." The en. trance of Mr. D'Wolf's house was strewed with roses, and the ladies showered them before and up. on the president on his departure. He reached Providence late in the evening, in the steam-boat; and was received by the committee of arrangement, the military, \&c. with salntes of artillery, \&c. \&c. and amidst the cheers of the people. An address was presented to him, but we have no copy of it or it should have a place here.
The next morning he received all that wished to be presented to hirn, and then proceeded to view the town, and visit the neighboring cotton mills. \&.c. At Pawtucket he was shewn; the first frame upon the Arkwright plan put in operation in this country; it has been running 27 years, and was erected by Mr. Slater, the present owner of the establishment. After which lie took a polite leave of his Rhode Isla:d friends, and passed into Massachusetts.
We have already mentioned that much preparation was made to reccive the president at Broston. His expected visit had been a subject of legislative discussion and provision, and the manner of his entry was laid down at a town mecting with the greatest nicety and precision. We thought first of detailing all those things at length; but, really, they are no: worth the room they would occupy.

On his arrival at Dedham, he was waited upou b! one of the governor's aids to bill him welcome in Mass:achusetts, and request him to accept of ar escort, \&c. Just after this he reviewed a regime:. of militia-on arriving at Roxbury he was saluted with a discharge of artillery, at different posts, and soon after by the gunsiof Fort Independence. A: Boston-neck he was met by the municipal authority. the grand committee of superintendance, squa lrois of cav iry, and a large body of citizens on horseback and in carriages, who formed a cavalcade according to previous arrangement, under the direction of marshals appointed for the occasion-cannon were firing during the whole time of the procession, at varions points. The streets were inmensely crowded-and the houses so filled that, as the lBos. ton Gazette says-
"You would have thought the very windows mov'd, To see him as he pass'd, so many, young and old, Through casements darted their desiring cyes."

Shortly after his arrival at his lodgings, the ad dress given below was delivered. At 5 o'clock he dined in company with president Adams, governor Brooks, the lieut. governor, major-gen. Dearborn, com. Bainbridge, general Miller, captains Hull and Perry, and a crowd of judges, \&c. \&c.

\section*{To the President of the United States.}

Sir-The citizens of Boston, by their committee appointed for that purpose, beg leave to offer you their cordial and respectful salutations, upon your arrival in this metropolis.

The visit, with which you are pleased to honor them, recalls to the recollection of many their interview with your illustrious predecessor, the father of his country, on a similar occasion. They semember with great satisfaction, the hope the confidence and the fond anticipation of national prosperity which his presence inspired; and it is now, sir, a subject of congratulation to you and themselves, that after thirty years of eventful experiment, during conflicts and revolutions, in the old world, which have threatened all, and subvert. ed many of its ancient governments, the constitution which was adopted under the auspices of that great man, has acquired vigor and maturity; and that in a season of profound peace, his successor is permitted, by the prosperous state of public affairs, to follow his example, in visiting the extensive country, over which he has recently been called to preside.

While this journey affords to many of your fellow citizens the opportunity and advantage of commencing with you a personal acquaintance, which is always desirable between a people and their ya: lers, they rejoice at the same time in the belief, that the local information relative to the great and various interests of the United States, which you will derive from actual observation, will facilitate your arrangements for their defence and security; and enable you to apply in practice, with additional confidence and success, those principles of an elevated and impartial policy, which you have been pleaser to promulgate, as the basis of your intended administration.

Called to the service of your country at an early period of life, and distinguished in the arduous struggle which obtained its independence; your subsequent occupations, in successive important offices and various departments, at home and abroad, have afforded you the means of becoming conver. sant with the foreign and domestic relations of the mation; and with these qualifications, you are now

\section*{raised to the highest dignity which can be confera} red by a free people.
These public claims to consideration and attention, from all descriptions of your fellow citizens, are cheerfully admitted by the citizens of lioston; who are also desirous of evincing their respect for the unblemished tenor of your private character, and their sense of the urbanity and hospitality which peculiarly characterized your deportment inwards all those of your count rymen, who, during 'he period of your foreign embassies, were so forunate as to come within the sphere of your civiliies and protection.
It is, therefore, with real satisfaction, that they receive you within the precincts of Boston; and tiey pray you to be assured of their earnest solicitude to contribute by all the means at their command, to your comfort and enjoyment during your residence in this town.

They also, confiding in the rectitude of your ina :entions, and rusting that the powers vested in you by the constitution, will be exercised with a sincere regard to the welfare of the people, whose precinus in erests are committed to your charge; avail themselves of this occasion to express their ardent hope that, the favorable circumstances which attend the commencement of your administration, may with the blessing of Heaven, under your guidance, concur to promote the advancemnent of our beloved country, to the highest possible condition of prosperity.
With these sentiments, they unite their best wishes, for your health and happiness; and that the course and close of your administration may entitle you to the gratitude and affections of your constituents, and the respect of posterity.

By order of the rommittee,
CHARLES BULFNNCH, Chairman.

\section*{The President's Answer.}

Fellow-Citizens-Tlie kind reception which you have givell me on the part of the citizens of Boston, and which their conduct has fully confirmed, has made a deep and lasting impression on my mind, which yon will have the gooduess to communicate to them.
As im person is more willing than I am, in the discharge of my duty, according to the fair exercise of my judgment, to take ex imple from the cunduct of the distinguished men who have preceded me, in this high trust, it is particularly gratifying to me, to have recalled, by this incident, to the memory of many who are now present, a like visit, from the illustrious commander of our revolution. ary army, who by many other important services, had so just a claim to the revered title of Father of his country.

It was natural, that the presence of a citizen, so respected and beloved, who had so eminently contributed to the establishment of this government, and to who its administration, in the commencement had been committed, should inspire an enlightened, a virtuous and free people, with unlimited confidence in its success; and it is a cause of general felicitation and joy to us all, to find, that thirty years successful experiment, have justified that confidence, and realized our most sanguine hopes in its favor. Yes, fellow citizens, we in. stituted a government for the benefit of all; a go. vernment which should secure to us the full en. joyment of our rights, religious and civil, and it has been so administered. Let us, then, unite, in grateful acknowledgements, to the Supreme Author of all our good, for extending to us so great a
blesuing. Lot us unite in fervent prayers that He will he gracions! pleased to continue that blessing, to us, and? to our la'est pos'erity.

I acrepted the trust, io whirhit have been called by iny fliow-citizens, with diffidenc , because I well knew the frailt; of human nature, and had oftell experienced my own deficiencies. I undertook this towr, with a view, and in the hope, of acquir. ing knowledse, which might enable ine to disclarge my varions and important desies, with greater advantage to my country, to which my whole mind and unwearied efforts shall always be directed. In pursuing objects so dear to us all, I rely with con. ficlence on the firm and generous support of my fel-low-citizens throughout our happy union.

JAMES MONROE.
It is though that 40 or 50,000 persons were engaged in welcoming the president to Bostonamong the rest were about 4000 children neatly dressed, and in a bodr, under charge of their nreceptors, \&c. They attracted the notice of Mr. Monroe, and beauty did all that it could (and how powerful is it!) to render the scene interesting. "The representative of eight millions of people" was received as kings never can be.

Farly the thest inorning the president viewed the town and its environs-he breakfasted with the "hero of Brownstown," gen. Miller, distinguished, also, by all that valor could do, on the Niggara, and at 8 o'clock embarked in one of the barges of the Independence 74, to view the works at Forts Independence and Warren, accompanied by a splendid suit -soldiers of other years and the glory of the present times. The due salutes, \&c. were fired. He returned at two o'clock and dined with gov. Brooks, at Medford. In the evening he visited the amphitleatre at Charlestown, welcomed by the cheers of the men and the waving of the handkerchiefs of the ladies. On the 4th of July he examined several specimens of inventions in the arts, and breakfasted Vith the conqueror of the Java, Bainbridge-then riewed many factories in the neighborhood, called apon Mr. Gore, went to the arsenal, and returned at noon.
On his return, the Cincinnati of Massachusetts were presented to him; when col. Tudor, vice-president of the society (the president, gov. Brooks, being on other public duty) presented to him the following address:
"Io Jumes . Monroe, IPresident of the United States.
Sir-Whinst meeting you as one of our most dig tinguished brothers, permit us especially to thank you for furnishing an opportunity of saluting another chief inagistrate of the United States taken from our ranks; and to offer you all the assurances of respect and affection which it becomes a society like onrs io present, and which we pray you to accept se flowing from hearts first united by the powerfill sympathies of common toils and dangers.
Althongh time is fast reducing our origimal associates, we trust hat whilst one remains, he will uever desert the sacred standard of frectom and his eormiry, or our sons forget the sacred duties theis sires liad sworn to discharge. We fonght to obtain security, self-government and political liappiness, and the man who can approve both the principles and the means, can never be indiflierent to the social desigus which such a warfure contemplated, for among those purposes were included the restoration of good humor, good manners, good neighborhood, political integrity, with a sparit of mild and manly patriotism.

We congratulate you as the highest representa. tive of our beloved country, that party animosities
has, on all sides, so fir subsided before the daystar of sound national policy; and we look with confidence to a wise and liberal administration of the presidency to produce its termination.

And now, sir, in bidding you a long farewel, for from our lessening numbers such another occasion can scarcely again occur, we join our best wishes, that when you sliall seek a retreat from the honorable fatigues of public energies, in which so large a portion of your life has been employed, that your retirement may be accompanied by the applause of the wise, and the concurrent blessings of a prosperous and united republican empire."

To this arldress the president made a very affectionate and fraternal verbal reply; in which he recognized the services and sacrifices of the defenders of the indepeadence of our country, and intimated that at a future time he would give them an answer in writing.

General Dearborn, and a committee, presented an address of the minority of the legislature to the president; to which also the president replied.

In the afternonn, the president visited the elegant and compléte military armouries in Faneuil Hall, and testified much satisfaction at their condition and completeness.

He afterwards dined with his brethren, the Cin. cinnati, in Concert HE:I.

At the dinner, which was prepared in great style, the following among other toasts were given:

By the governior-The day, and the recullections of the event and characters which this anniversary recalls-uniting all hearts.

By the president of the United States-The commonwealth of Mirsachusetto- Whose sons so eminently contributed to the independence we this day celebrate.

By the lieutenont-governor-The heroes of the re-volution-Their services claim and will receive the grateful acknowledgments of succeeding generations.

On the president's retiring the governor gaveThe Presideyt of the United States.
[Jine cheers.]
When the governor retired, his honor the lieut. governor gave-The governor of our commonwealth
[Nine cheers.]

\section*{Foreign Articles.}
anelant, \&e.
The poor taxes for England and Wales, amounted to eighe millions sterling ( \(35,520,000\) dollars)-and the hospitals, work houses \&c. to the sum of sir millions more-together \(\$ 62,160,000\)-an amount filly twice as large as we expend, (including the intercat and payments on accolut of the principal of our debis) to support our national and state governinents, including county rates for maintaining the poor, making roads, \&cc. \&c.-annually.

Americat 6 per cent. stocky at London, May 13, 104. British 3 per cents. 723.

The names of some persons arrested for high treason, are given in the British papers.

Arrests of persons suspected of heing suspicious continue in Fingland. Some of the "ytate prisoners" are about to be trict.

Silmouth's circular to the magistrates of Eugland has again been the subject of an animated drbate in parliament, and that's all. The majority look as much to the not of the minister as the drummer to the drum majur's cane, and obey it as quickly.
The wretched people of many districts in the counties of Suthertind, Caithness, Ross and Inver
ness, in Scotland, derive ' \({ }_{3}\) principle part of their subsistence from bleeding their cattle and boiling the blead into pudding!!"
.Several frigates, for a purpose not stated, are ordered to be fitted and manned.

A large fleet appears to be fitting out in England. The report is that the tyrant, the ungrateful, Ferdinand, has purchased the liberty-loving prirce regent and his ministers, to kill off as many as may be needful of the South Americans to reduce the rest to obedience. This is Italian murder on a large scale. May every man they send out for this purpose, die in agonies the moment he breathes the air of America: "Perish the invaders."
We have a correspondence between sir Richard Phillips, publisher of the Monthly Magazine, and earl Bathurst, relative to Bonaparte's writings. The former, having understood that the late emperor was engaged in writing the memoirs of his own life, asks leave, as a mere matter of business, to open a correspondence with him, through the department of state, to publish them-which the other "de clines" to grant or otherwise permit.

The following is the state of the woolen manafac. tory in Yorkshire, for 1816, as returned at Pontefract Faster sessions, 1817; narrow cloths milled, 3,650669 yards being \(2,990,190\) yards less than in 1815; hroad cloths milledl, 10,135,285 yards; being 259,171 yds. less than in 1815.
The plan of ministers to reduce the interest of money in the funds, is said to be, for every 100l. 5 per cent. to give one hundred consols, at \(72 l\). and 281. in money; but if the parties object to receive the 28l. in money, they may have an annuity of \(2 l\). per annum for life in lieu of it, sinking the capital of 281 . which will be \(3 l\). in consols and \(2 l\). annuity, making 51 . per cent. during his life. The ministers calculate by this arrangement a saving of above a million and a quarter to the public annually.

The army estimates for the current year, were proposed in the house of commons on the 12 th, by lord Palmerson. The proposed reduction, in point of numbers, during the current year, amounts to \(55,300 \mathrm{men}\); and the estimate of the army expences this year is \(1,800,000\) less than the estimate of the last year.

Several leal miners with their families have left Fingland for Canada. We may expect soon to hear of them in Missouri.
"Scarcely the hundredth part of an inch of rain," that could be measured, fell in England in the month of April.

The British ministry, to reward Mr. Canning for his "tadhesion," made him ambassador to P'ortugal, where there was no court, with a salary, \&cc. of \$8,380\% sterling per anniom. The purchase of his services has just been severely reprehonded in parliament.

A fellow lately sold his wife at public auction, in the market place, at Preston, for the sum of tzoo pence.

The Catholic question is again before parliament. The bill was read the second time, but the first clause, to admit Catholics into parliament, "on certain conditions," was lost. It is altogether nonsense. 'The government priests will shake the throne, if it passes, more severely than the prostrate Catholics can do, if they remain as they are.

From the British navy list for March, 1817.-Wiclozus' pensions-Of a flag officer, per annum 129.; admirals, 100 ; post captains, 80 a 90 ; commanders, 70 ; do. superan. 60 ; lieutenants, 50 ; master, 40 ; surgeon, 40; purser, 30 ; gunner, 25 , boatswain, 25; carpenters, 25; second masters, \&cc. 2\%, Widows
of a col. of marines, \({ }^{2} 90\); lieut. col. 70 ; major 60 ; cuptains, 55 ; 1 st lieut. \(40 ; 2 \mathrm{~d}\) do. 36 .
The board of admiralty intends to allow 68 senior commanders of the royal navy to retire with the rank of post captais. [It is curious to contrast the amount of these pensions with those of the pimps and panders of the court; where one great villain swallows up more of the public money than is allowed to the widows of 2 or 300 gallant men.]

Refinement \(s_{5}\), A man was lately killed in one of the boxing matches that the "nobility gentry and clergy" of Eingland get up to amuse themselves. The story of his death is told in all the pomp, "or slang, of the "science"

Power of Beanty.-The neighbourhood of Bethnal Green (says a London paper) has been thrown into confusion by what does not now, for the first time, disturb men's minds- female beanty. A young widow has, it seems, inken a public house there, which, before her fortunate entrance into it, had been deserted. By the attraction of her beauty she fills it from morning to night; and such is the discontent of those who are unable from their numbers to obtain admittance, that tumults have occurred in the street where she lives, and constables are stationed in it. This is stated to us a literal fact. Her age is about 27, and her beauty, it is said, deserves all ifs fame. The other publicans in the neighbourhood would be ruined, if it were not that the overflowing of her house tlls their benches. Thus London has its humble imitation of the Venus des mille colonnes, at Paris.
Execution-Saturday last, Allen, a considerable farmer in Cheshire, who was convicted at the last Chester Assizes of issuing forged bank notes, auffered the sentence of the law. He met. his death with extraordinary fortitude, but his sufferings seemed long continued, the muscular motion being terribly exerted for more than ten minutes. i great number of friends, his wife and eight ch.1dren altended, and took the body for interment at Waverinam. During the awful solemnity of fixing the rope round the neck of the unfortunate culprit, three pick pockets were detected in the execution of their profession, directly under the drop.-So much for example.
[Loulon paper, May 12.

\section*{frakce.}

The town of Mayence has suffered so much by errormous military exactions, and lodgment of troops, that out of 24,000 inhabitants, 8,000 are now paupers.

The middle and southern parts of France are sufo fering much for want of rain-for which public prayers are offering up.
The king, on the anniversary of his return to Pa ris, (May 3) howed himself to the people in an open carriage, accompanied by Ordinot, duke of Reggio.

Some arrests of suspected persons are still making in France.

The following are published as extracts of a letter from Mad. Regnault de St. Jean D'Angely to her husband, said to have been seized on the person of a Mr. Robert, who was about to embark for the United States:
"Aly Dear तriend-It is impossible that these miserable people can continue to exist. A revolution is inevitable. It will be terrible, but it will lead to good; and we must resign ourselves to the most painful operations for the recovery of health. Do not believe that my partiality misleads me. It is easy to see that 1 do not deceive myself. Ask M. de Robert; he will tell that if he could have anticipated thre effect of Germanicws, we shoule
perbaps have been delivered from these odious wretches. It will require ro very sreat effort to overtur: them, and they feel it. If they thought thersipives strong, this week would haveundeceived them

Bfinvernment is obliged to change the system of mildness which it has adopted and pursued fir the last six months. It is by that they expected to lull us asteep, and many persmis have said that they would do so; but things are not so bad. Those men are our executioners. They are the destroyers of our honor, of our glory, of our laurels, of our indus. try. No possible reconciliation can take place between them and France; and every body must suffer, becanse every body is hostile to them.

And that man whom we have lost by our own fautt, and given up to our most cruel enemies who have him in their power ! All my strength, all my courage fails me in this reflection, at once so painAll and so humiliating. He left us his son, and he knows that that son is the only true king of France. But he will deliver his father; our honor depends on it. How all those people, already so contemptible, will sink before the Colossus! do not believe that I am credulous, my dear friend. It is the sole occupation of my thoughts! but it is that of many others, who are perhaps more active. I will tell you no more; but believe me we are approaching a a most happy crisis. Return quickly, that you may judge more nearly."

A Paris paper of May 6, says. - Twenty-two French prisoners, soldiers of the ex-guard, have passed by Anvers on the 26 th ult. They came from the farthest part of Siberia, and state that there are yet many Frenchmen who are now on their return to their native land. This affords some ground for hope, for many fumilies, who have lost individual branches, that they may still be restored to them. RONAPARTE.
There is an idle report about the liberation of Napoleon, by the British, and of his sailing from St. Helena for Malta.

Italy.
The pope is said to be very ill. The frequent arrival of couriers at Rome give rise to conjectures that something important is in agitation.

The revenue of the pope, before the revolution, amounted to about nine millions of crowns-at present it is only about three, and the pubtic debt amounts to 120 millions.

There is a report that the emperor of Austria has tak en possession of Rome-probably to pay himself.

An article from Rome, published in a London paper, says-"We ate assured that the prince regent (of Eingland) ar.d the emperor of Russia have made known to his holiness their desire of concurring with him in extending the empire of our holy religion. It is believed that his holiness, in virtne of an article in the treaty of holy alliance, will be restored to the possession of various donations which belonged to the holy see in different countries. it is certain that under Ciristian princes, the work of religion cannot be abandoned to chance" ! !!

\section*{germazy.}

Some political disturbances have occurrel in Wirtemburg. The diet of Frankfort has resumed its sittings.
The son of Napoleon has received of his grandfather, the emperor of Austria, the regiment that became vacant on the death of general Lindenau.

кETHETLA*リs.
Loulan, Afray 12. A Flanders mail arrived last aight, but the only article deserving notice (and that on account of its impuitence) is the substance
of a memorial presented to the king by some of the Catholic bishops, against the regulations issued by authority of government, for conducting education in the universities. These4nemorialits have the arrogance still to maintain that the interest of the state and of the church (meaning themselves) are the same, and require the application of the same principles !

\section*{SWITZERLAND}

A London paper of the 8th of Hay says-The ace counts from Switzerland continue' to be of the most distressing nature. In the eastern cantons there is almost a famine. Yurich is endeavoring to get corn from Genoa and Venice-Uri from Italy; Fribourg has adopted severe measures against forestallers and regraters; Basle has prohibited the making of white bread; Zug has prohibited the exportation of butter, and Schwitz the exportation of hay. Under these circumstances, emigration assumes a more alarming activity.

\section*{SWEDEF AKD DENMARK,}

It is reported, have very serious differences. The latter has been much abused, and we wish she had the power to right herself-and especially of regaining Norway, which the "legitimates" despoiled her of.
sritish are building

The British are bnilding 2 ships of the line, and 2 frigates to carry 64 guns each, at Bombay. africa.
We yesterday received (says the New-York Gazette) a Gibraltar paper of the 10th of May, in which it is asserted, that the Tunisian Bashaw has been notified, by capt Forrest of the British frigate Astre . in the name of the prince regent, that he may go to war with whomsoever he may think proper, provided he comply with the article relative to the abo. lition of slavery.

\section*{FLORIDA.}

It is now stated that Amelia island was 80 be taken possession of by Sir Gregor Mc Gregor, on the 2nd inst. The Spanish force there does not exceed 50 men. 0 Later accounts assure us that it is taken. It will be very advantageous to the patriots. "Spanisu" america.
The following is given as the probable population. of what used to be known by the general name of Spanish America:

\section*{South.}

New-Grenada and Venezuela \(3,500,000\) persons.

Peru,
Buenos Ayres and Chili,
1,700,000
3,800,000
\(\xrightarrow{9,000,000}\)
Mexico,
New-Mexico,
Yucatan.
3,000,000

Yucatan.
8,00,000
Guatimala,
1,600,000
Forida,
1,800,000
10,000
8,010,000
\(17,010,000\)
Total population

It is intimated that the Iritish have a powerful ment of Buenos Ayres. If so-is is all over with them. unless the factian is ilestroyed.

The touch of Iritain, sure as the lightning blasts the tree that it strikes, destroys that of liberty.
"Il is asserted," observes the Baltimore J'atrior, "on good authority, that the government of (ireat Britain lave beoome possessed of an extensive tract of land on theriver La Plata; which they have fortified at great labor and expence; that their property at that ptace anmonts to the enormous sum
of enghty millions of dollars; and that their agents and subtle tools are dispersed throughout Peru, Chili, Haraguay, \&c. large sums have also been expended in erecting splendid buildings at Buenos Ayres; and every precaition has been taken by these cinissaries, not only to purchase the compliance of the supreme director with their views, but to conciliate the favor of the members of the executive junta, by frequent entertainments, and other insidious means.

BRITISH AMEMCA.
From the . Montreal Iferald.-Although the Gazette published at Sacketts-Harbour, does not notice the fact, it is nevertheless true, that governor Gore, on his way to England, was saluted from the guns of the fort on his arrival at the harbor. Such marks of respect, always deserve notice in public prints, as they tend to conciliate passions and to secure a reciprocity of favorable sentiments.

Buffilo, July 1.-All the British government vessels on lakes Erie and Gatario are ordered to be scuttled and sunk, and their crews to return to England. There will also, it is said, be but one regiment of troops stationed at all the posts above Kingston. These measures, it is presum d, result from the general system of retrencinnent of governmental expences, which the ministry have been compelled by the ceaseless clamors of the people to adopt, and not from any new expedition on font, or meditated danger from any other quarter than at home.

\section*{CHRONICLE.}

Jolin Quircy Adams is coming home in the ship Washington, for New-York.

The Siusquehannuh. The transport of produce on this noble river is vastly increased eyely year. From the 29th of March last, when the boat navigation commenced, to the 26 th of June, ult. there passed into the canal that runs through the town of York-Haven, 261 boats, whose cargoes, in part, consisted of 94,500 bush. wheat, some rye, corn, buck wheat, oats, flaxseed, and cloverseed, 8320 bbls flour: 474 do. whiskey, with some pork, butter, iron, leather, \&c. making an aggregate value of 8340,000 : which is supposed to be only about one fifth of the value of the produce that was floated down the bed of the river in the same time. The boats return laden with other sorts of merchandize suited to the wants of the rich and ex. tensive country that is watered by this stream

The Red River.-A letter from Natchitoches describes the Red River as one of the most remark. able the writer had ever known. In ascending it, in December last, during a rain of 31 hours, the river rose 31 feet. For 500 miles above Natchi. tocbes it is narrow and deep, above that distance it is wider and more shallow.
The 4th of July was to be celebrated, at Argyle, Washington county, N Y. by the opening of a sub . terraneous canal, of 400 teet, dug through a hill, and of the average of 30 feet below the surface.

A meeting was to be held at Warren, in the state of Ohio, on the same day, to take into consideration the propriety of petitioning the iegislature of that state on the subject of opening and connecting the nevigable waters of Lake Erie with those of the river Ohio. This may easily be done.

The anniversary of American independence lias been duly observed in all parts of the United States so far as we have lieard, by military processions, civic feasts, \&c. So let it be, until the sun "grows dim with age, and nature sinkș in years."

The British are making great exertions to pror mote and encourage emigrations to Canada-affording all the facilities in their power.
De Vİtt Clinton, Esq. as governor, and John Tayler, Fiscl. as lieutenant-governor of the state of NewYork, took the oaths of ofice and entered upon their
respective duties, on the respective duties, on the 1 st inst.
Mr. Storer, rep. has been elected a senator of the United States fiom New-Hampshire, vice Mr. Mason, fed. resigned.
The U. S. bris of war Saranac, capt. Elton, inder sailing orders, on the 2ad inst. at 1 P. M. in coming out from the navy-yard, New-York, the wind being light from the N. WV. went aslore on the rocks between the navr-yard and Jackson's stores, and on the falling of the tide bilged and filled with water. Her guns and stores were inmediakely got out, and the vessel stripped. She has been got off the rocks with the assistance of lighters. Damages not very important.

\section*{DIVISION ORDER.}

Adjetant-grnerat's office,
II. Q. Division of the South,
Nashville, April'22, 1817.
Tbe commanding general considers it due to the principles of subordination, which ought and must exist in an army, to prohibit the .. obedience of any order emanating from the department of war, to officers of this division, who have reported and been assigned to duty, unless coming through him as the proper organ of communication. The object of this order is to prevent the recurrence of a circumstance which'removed an important officer from the division without the knowledge of the commanding general, and indeed when he supposed that officer engaged in his official duties, and anticipated hour. ly the feceipt of his official reports on a subject of great importance to his command; also to prevent the topographical reports from being made public through the medium of the newspapers, as was done in the case alluded to, thereby enabling the enemy to obtain the benefit of all our topographical researches as soon as the general commanding, who is responsible for the division. Superior officers having commarids assigned them are held responsible to the government for the character and conduct of that command; and it might as well be justified in an officer senior in command to give orders to a guard on duty, without passing that order through the officer of that guard, as that the department of war should countermand the arrangements of commanding generals without giving their order through the proper channel. To acquiesce in swch a course, would be a tame surrender of military rights and etiquelte; and at once subvert the established principles of subordination and good order. Obedience to the lawful commands of superior officers is constitutionally and mprally required: but there is a chain of communication that binds the military compact, which if broken opens the door to disobedience and disrespect, and gives loose to the turbulent spirits who are ever ready to excite mutiny. All physicians able to perform duty, who are absent on furlough, will forthwith ifpair to their respective posts. Commanding officely of regiments and corps are ordered to report spee \({ }^{4}\) cially all officers absent from duty on the 30th of June next, and their cause of absence. The army is too small to tolerate idlers, and they will be dis* missed the scrvice.

By order of Maj. Gen. Jackson.
(Signed)
ROBERT BUTLER, Adjutant Genera?

\section*{NILES' WHEKLY REGISTER.}

No. 21 of Vol. XII.]
BALTIMORE, SATLKDAY, JULY 19, 1817.
[WHOLE No. \(3 \%\)
Hac plim meminisse jurahit.-Vimen

A gentleman of great taste and accuricy, a merchant of this city, his furnished us with a highly interesting statement of arrivals in the several parts of the linierl States, for the year 1816. We are satisfied that it is as correct as, from the nature of things, it can easily be: affording a valuable icem in the statistics of our contitry. See page 324.
Judge Living ton's opinion resperting the bankrupt law, was intended fir this paper. It shall appeur in uer next. The law cases inserted in the Weakly Registran are usffil, not to gentl mien of the bar nuly-but may improve and instruct the people at large in matters of geat monient to thein.

Tlt is leligh ful to see the moris "national chasacter," "roti atal feeling," and the like, coming into comeron use;-and it is, indeed, a luxury to the editor of this paper to belirve, that he, as much as any man, has contributed to bring it about.-A prisle of country is a bulwark of safety. Let us cherish it-it is the cheapest, as well as the best, defence of the republic

\section*{Interual Improvements.}

North Carolina seems roused to a seise of he: many natural a:Ivantages. The clearing of the obstructions to the navigation of the Rounoke and Cape Fear rivers, at present occupies the attention of wome of her statesmen, and with every prospect of success tha bothmadertakingt. We have heretofore noticed the fowner, and now have before us a report of the president and directors of the "C.pe fear Navifa ion Company" to the stockholders, whici warrants a hope that that noble river, for a grest divtance into the interior, may casily be made navigable fir the craf: usually empioyed; in which they have mude very consilerable progress.
The e urse of the river has been chiefly obstruct. ed by immense nimbers of lors and trees de posited in its bel, ond forming sand banks anl shoals, unail the origi alal channel was nearly filled up. Vast quantities of these hase been reinsed, "same of the almost as heary as stome by their tong sultmersion," by a very "simple inethod," that "requires only the steady operation of labor," and it is founs! that the clsanmel is immerliately deepened, the sand then giving way to he current. The removal of the logs alme, it is heheren!, will effect all the dosirtd inmproment from Wiluning un to Fayettevitle

This state owes mire to Archisulit I). Wri phy, esq. than to any, perinps, of her many enig'tenei cituzens. Uis name, throngh his reports to the ie gislature, sis. is faniliar to mrreatera, but he his nuw many atsociales in his merilorings labors. A the late celebration of the 4 ho iof July, it Fisyetie ville, by all pirties, te untice with pleasure that a just tribute was paal 6 his worth, "ta tbe success ful pronoter of inlull navigation," and with a wish that "hat state maght lelig't weltem and how him, as he had beretitel and honwel the people." Thope that the grow in of such witn may be encou. raged-one of then is wirth a turousand gabbling politici ns: and I ruly rejouce to see that they are sotaing mio fashing, in many party of the union.

\section*{PROPOSITIOX THE EIGHTH.}

That shrppisg asd cummence is recessamy both to
 TO THE SAFETY OF THE UNitra States.
The shipping and com nerce here mentioned is to be understoind is appertaming to our intercnurse with foreigners. Hut the internal and coasting trade is im'rensely more valuable.
The tonn rre of the United States, on the 3lst of D cember, 1815, the latest return that has been published, amornted to \(1,368,127\) tons-the grea'. es: :omage that belongs to any nation in the world, Gireat 13ritain excepied-and our seainen and half seames may amount to nearly or about 100,000 men. The value of the veasels may be estimated at 60 millions of dollars, a.d the annual earnings of the seamen, including a!l the costs and profits belonfo ing to the w'role bisiness, at S Sju dillars for earh, or 80 milio's a year. Their emplayment creates a great home-market fur provisions, timber, cor lage, \&ic. \&sc. \({ }^{3}\)
" Home market" I wish that the importance of this was better uriderstond, and appreciated as it nught to be by the people of the United States. Every body inay see it, yet most are insensible of its advantages. Lenils are improved and property rises in value-and thes think not of the why or wherefore. I well know a district of comintry in a neighb:ring state in which, by the ertension of one mannfactory and the est iblishment of one (ur \(t\) ivo) new ones, the land, for several miles roind, has ireh. led its price within the short period "f abous einht years-and numerous fields that w re considered "worn ont," sre now, therng's an inviguraled agriculiure, covered with t'e most luxurious prolisc. tions. This effect is wanlly, or at least chiefly, caused by the market cstablished at the farmer's dune -a place whereat he call alwavs raise a litle ino. ney if he has any thing to sell, withont ir,uble. A neighboring miller's bill for flour furmished the people at one of these establishments, averaces 2000 dolkars a ye2r-and every thing else is in pro. pir:i im.

I do ust reonllect thit I ever menioned a conversation that I had at I Innapolis aight or ten years th, with a sage memtier if the legist,ture wf the state, before a rown fill of comyant-t'he le;isla. tor was compliniog of the cuthlsiale of business that was presental co t'ic a-nembly from Balfimore; 'o which I reflied that the fatit io a it that bndy, fir neplecting, or r-fining, to grait powers in the cil irital to its prosressive st'ale of impeny in 7if, by w'rich it ouglit to be cnabselt regulate its a ci affairn. He said that this might be so-but "any how,-l wish if were sunk in tho basin." This was not a policical effervescence-he was only tired of making laws to lay ont new slrents, \&\%? in Biltimore. I bowerl, and thanked tlie gebtleman in lie name of any fellow ci'izens for his gootness towards them.

Af:er a while, I suddenly turned, and asked the legislutor if be bad wny land, and what he valued it

Foreign trade is at piesent very dull. By the ta numerous at sea. In a few years more, if peace lasts bles inserted in subsequent pages it appears that we in Europe, we cannot expect any part in the carry. are rivalled by foreigners in our own ports, and in ing trade, and, perhaps, this is as well; but our ships. the itansport of our own commodities. Experience tencher-we ought no more to suffer foreigners to underwork us in shipping than in manufactures, and for the same reasons. But the defence of our country is immediately connected with the prosperity of out shipping antl fisheries-as these dectine our means of supporting a navy fails. Ships, of themselve, are as incfficient to protect us as the tre es of which they may be composed. Napo?eon harl three fine squadrons rotling in port, while our few frigates, more closely watched by the same enemy, were scentilir every sea. If we had hid those ships, the late wa: woul 1 have borne a very different char acter; an I the trilent might have trembled in the hands of the "mistress of the sea." 1 am not aware of our eapacity to man a nisval force by voluntary enlistments, and we never can resort to any other means, though impressment for the sea-service is, I beliere, used by every other maritime nation: but the capacity is great, seeing that 300 able seamen are conoidered amply sufticient for a ship of the line, the rest of her crew being made up of ordinary seamell, landsmen and boys. This force has risen up from an extensive and long prosperous commerce; and, for the want of it, is now declining as rapidly as it rose. Powerful efforts should be male to prevent it from sinking telow its natural level : we have had more foreign trade than was our just share; but it is now a matter of much in terest to take care that we have not less than that share. The reduction of the British navy has cast many thousand seamen on the merchant's service, and their wages are very low. Holland, France, \&c. \&c. are reviving-and their ships are already
at? He was surprised with the question and an swered, hesitatingly, that he had, and named a price that he supposed it would fetcin. I then enquired what it was worth twenty years before-he turned and twisted the question as thongh he suspected sumething, but at length stated a sum less than a third of the amount, first given. What was the cause of this great rise of value?-I supposed he had richly manured his fieldsis built a fine barn, and a new dwelling house, within the twenty years-No,-neither; the lands were poorer and the buildin:; worse now, by their tear and wear, than they were at the formel period. But, said I, there is no effect without a cause -what is the cause of the greater value of your land. Why-it was the rise of property, said the law maker. This is an effect -but I want you to tell me the cause. "Causecanse," said he, confusedly, and with a blank and Indicous countenance, "I don't know any cause." I'll tell you-it is a market for your products-a place at which you can always get money for any thing and to any amount, great or small, that yout have to scll; it is that Baltimore which you wish suak into the basin. The man looked wildly for a momell'-the light of truth seemed too great for t:im; he faintly confessed that he believed it was so, and a peal of laughter completed his discomfiture.

But, and notwithstanding the home market is of such mighty importance, and so many times greater than the fureign, still the latter, to a very considerable extent, fixes the value upon or determines the prices, of most things that any of us have to spare; extending even, perhaps, to establish the price of a day's labor Hence, it is essential to the interests of akl ranks and descriptions of people.
ing trade, and, periaps, this is as well; but our ships.
should be protected so as to give to them a decided? preference in carrying our own commodities and in stuplying us with those that we want for our own uses from abroad. Independent of the profitable em. ployment thus afforded and the home market thereby created, it is by this only that we can expect to keep up a naval force; and it is now generally agreed that we ought to have a respectable establishment, "sufficient to defend itself and us." If the present power to support it is lost, years must elapse before it can be regained. Seamen canmot be made in a day-and their habits are such that they are easily scattered and lost to their country, by the want of employment under its flag. We might here pay a tribute of praise to those of the United States-but we cannot add any thing to their fame. Their renown has reached every part of the world. They are invaluable, and contribute more, perhaps, to the national strength and prosperity, than any other class not more numerous; and we ought to guard their interests as the apple of our eye.
We shall conclude this article with a table shew. ing the tomage of the United States for the several years from 1793 to 1815 inchusive, (except 1814) which will be very convenient for reference, and some remarks or comparisons with that of Gireat Britain.

The gross tonnage belonging to all the ports of the British empire (except Ireland) was, in
\begin{tabular}{cc}
1803 & \(2,108,990\) tons \\
1812 & \(2,421,695^{*}\) \\
Ireland, in 1812, only & 57,103
\end{tabular}
*Notwithstanding this aggregate, it appears that no more than 1,579,715 tons of British vessels were entered inward in the same year from all parts of the world, inchuling their repeated voyages-which takes in all from Ireland, Guernsey, Jersey, \&c. In the same year there cleared, ontwards, in like manner, \(1,507,353\) tons. Fither of these is rather oveir the average for 10 years.

If there is any thing that ought to he supremely hared, -it is the present inf.morrs tr.ffic that is catried on in several of the middle states, and especially i: Jlaryland, in negroes, for the Georgia and Louisiana markets. I hluth for the honor of the art of printing when I see advertisements published in the newspapers, openly avowing the trade, and soI citing business, with the indifference of de.ilers in horses.
But, not content with violating every tie deemed sacred in society-of separating husband from wife and the muther from her children, and Iransporting these miscrable beings to a strange land, inanacled like felons, and in every way treated as if they had no mo:e feeling than stocks or stones, wretclies are not wanting to seize on free persons and carry them off and soll them for slaves-and, unhappily, there are planters base enough to purchase men without an encuuiry as to the manner in which they were obtained. We recently noticed the punishment of two monsters in the state of Delazuare, for kidnapping. If that of death was ever meritorionsly inflicted, these merr ought to have suffered it-for it was their practice to break into the houses of free blacks at night and carry them onf, with every ag. gravation that cruelty criuld add to the grand nf. fence against the law. The like, pertaps, daily occurs in . Maryland, and it has happened even in \(\mathcal{N i}\) is. York, where certain persons guilty of it have also been saught and imprisoned for trial. But in the tates south of Delaware, such is tho general nature of the laws, tending to secure a property in the blacks rather than their rights, that it is extremely difficult, if not dangerons, to do much in their be half, and they are lefi pretty much to the mercy of the dealers in men. The trate has greally increascd within the last two or three years; during \(h\) hich it is thought that twenty thonsand have been intro. duced intu Georgis alone. We are surprized that the legislature of that state has not done something efficient is prevent a measure s? pregosant with evif; one would have thought that policy, of ilself, would have pointal out the impropricty of than miting the slaver; and have furbidden a hazand of the safe. ty of the whole to gratify the cupidity of a few. In? deed, something ought in be done to bre.t up thi trade-humanity is not alone interested in it: safcty is also involved. Who cuult blame the kidnapped negro for secking his liberty at any cusi, and at every sacrifice? liet us take the casc ourscives.We camot now easily get rid of the slaves-but it is no less our duty than our interest to take care that the crits attending them be met insercasent.

\section*{Susep-the Indiam.}

Bangor, (ile.) June 23.-At the supreme i: dicial court which was holden at Castine last week, P'oal Susep, an Indian of the P'enobscot tribe, was indicted and trind for the murder of William Knight, late of this town, The prisnner was bronglit :o the bar on Thurshay in the court-house, but so great was the crowd of spectators, the court ad. journed to the mecting-loouse, and there, after most of the day had been spent in a patient iavestigation of all the circumstances of this mhappy event, tive cause was ably argued by the lemod counsel for the prisoner, the hon. Messrs. Mellen and Willisunson, who had been appointed to this arduous task by the court, and by Mr. Solicitor-General Davis, on the part of the government. After which the court, as is usual in capital triais, askel tie prisoner if he had any thing further to say in his defence, who replied that John Neptune would say something for him. This man, though not the pisesent chief of the tribe, is distinguished for good sense and information, and cam. forwar : io the forum with the ease and assurance of a Ciesnen \(H\) is speech was not brilliant, but impressive -he all:cded to several murders committed on the tribe by our people, which load escaped purishment, and particularly named the case of livermore who was convicted and sentences! to death for the mirder of an Indian, but is now in the state prison under a commutation of punishment by the executive; and said he and his brethern were willing livernore should be released from his imprison:nent, in case Susep should be acquitted- Me aiso expatiated largely on the importance of living in peace and amity with our neighbors-said it was the sincere wish of his tribe, as well as the Ruoddy and st. John's Indians, to be on good terms with the Ansericans, since we were all brethern of the same great tamily; and reminded the audience that this life at best was short and transitory The jury afier retiring a short time returned a verdict of "NoT GUIIITY of murder, but guilty of MAN SLAUGH. TER." The sentence was one year's imprisonment in the county gao!.
The facts constituting the offonce in this case were, hat Susep in a state of intoxication and in a siolent passion, had with none or a very slight provocation, stabbed kinght to the heart wi ha a Intating knife. He was arrested on the spot, and committch to gaol nearly a year ago.
About thirty of the iribe, ameng whora was susep's wite and relations, attended the trial and behaved with the utinnst decorun.

Brow viville, Pa. Jime 25-Cibrious RobberySome line sirice, a horse thicf stole a harse near Steubearille, Otion, in the following manier-1) ir ing the night, lie went to the ti-ht atjoming the mansion hoase, in which were two homen-ome a young horse, dificuit on nifch, and the other a: old one, easily cathlat- While he was netempting to eatch the young horse the owicr awoke, anllis. teuing, heard a mall say to himself, "siance I can't exteh your, Tl tuke the nld one." The owner knowing that with the yeumg horse be coull nveriake the thief, permilicat him to pronest. As soon ins he was gonc, the owner caught the young thuse, a dd went directly; priperly armed, in pirsuh of lise Whief. O:a oberving that he was purned, lie left the horse and ran into a deveried cabin be the mond side. The dwner tid his nug, and followed the thief into the cabin, whohad by this time cimbed es the top of the chi nney; jumping down, he ran th the young horse, untiel and mormted him, and was clear nff before the owner reterned frum the cabils

\section*{Carver's Purchase.}
from the ontamio repository.
The infornation contrined in the following letter from .Micah Brooks, esq. member of congress from Ontario county, to a gentleman in Batavia, Genesee county, will gratify all who may feel an interest in "Carver's Purchuse"

Washington, January 7, 1817.
Drar Sir-I received your letter of the 26th De cember last, requestung information concerning the title of capt. Carver, to a large tract of land ahout the fulls of St Anthony on the Mississippi river. It appears that Carver, or his lieirs, claim by virtue of a purc'ase made by him from the Indians and afterwards recognised by the king of Great B"i tsin; and that of course, by compact, this government are bound to recognize his right to the purchase.
The principle is correct, that all grants made by the British government to individuals, previous to a certain date, are to be recogniz d by our government; and if the facts stated in favor of Capver's claim was true, his claim is god. But, if his pur. chase was never recognized by the king, and was made in defiance of the king's ordinance, surely such a claim cannot be recognized by this government.

The facts in this case I will give you, which I take from documents in possession of this government. On the 7 th of October, 1763, a proclamation was issued by the king of Great Britain, prohibiting a purchase from any Indian or indian tribe, except purchases made for and in beha'f of the government only; and to be made at a public meeting of the In. dians, convened on the ground; which meeting shall be ordered and conducted by the goviriment of she colony. It appears that Cirver spent the winter of \(1776-7\) at or ahout the falls of St. Anthony on the Mississippi-that lie was the only white man at the time in the country, and that if any purchase was made by him, instead of its being allowed or recognized by the king of Great Britain, it was in clirect violation of an ordinance of that government, as will appear by comparing the dates of t!is transaction. The Indians ar: now in pos-
savisi of that country, and deny any sale having been male; and the United States claim the preenp ive right; so that any attempt to take posses10.1 of this tract under a pu-chase from Carver, vould be resisted both by the Unitet States and the I II ians.
The sellers and purchasers of this land ought to be undeccived.

Yours, very respectfully.
MICAH BROOKS.

\section*{Mississippi and Alabama.}

Nisgiville, June 10.-We are gratified in being able to state that the division of this territory made by the last congress is very generally approved of by the perple. The election for the convention to frame a state constitution took place in the western part last week, where in most cases gentlemen of respectable talents were expected to be elected, It is anticipated it will not be very long before the people of the eastern section will also be permitted to elect a convention. It will settle faster than any new country ever did. Gen. Coffee is now surveying one hundred townships adjoining Matlison county, lying on both sides of the Muscle Sinals, which is believed to be the flower of the Alabama territory, and has recently been laid off into three counties. All west of Madison county, north of Tennessee river, and south of the state of Tenuessee is made one county, and is called Elk connty, the seat of justice for which is at fort II ampton. All south of Tennessee river, east of the Clinckasaw boundary line, north of the highlands that divide the waters of the Tennessee from the waters of the Mobile, and west of the Cherokee boundary line, is made another county, called Blount county, the seat of justice of which is at Milton's Bluff. All south of Bount county, to the east of Tombigbee river, to the north of Clark connty, and west of the highlands that divide the waters of the Alabama from the waters of the Tombigbee, is made another county, called Sevier county, the seat of justice of which is at the falls of the Biack Warrior. \({ }^{\circ}\). These counties are settling very fast, and by the time the land can be sold, will contain a dense population. I) is expect ded the sale of those lands will coine on at Huntsville, in Nor next, and they will sell higher per acre than any public land ever offered by the United States. It is supposed the hundred townshipi now surveying will produce nine millions of dollars, when sold; but from the short time alo lowed by law, to keep the office open, it is apprehended hat only a sinall part can be exposed to sale this fall. The consequence of which will be that many who are now vesting their finds in scrip, expecting to purchase lands, whll be disappointed in their calculations; as they will probably have to wait until another law is passed to continue the sales.

\section*{Important Law Case to Merchants. \\ }

James Owings vs. Prier .1. Kiurthaus.
This case came before the court of appeals for \(0^{\circ}\) the western sloore of Maryland, on an appeal from the court of chancery.

\footnotetext{
- This is the highest point of navigation of the waters of Mobile, is surrounded by good land, tur:" is only 70 miles from Huntsville, of crourse we may soon expect to see a large thriving town at this place.
[Clarion.
}

It is b-lieved that the decision of the court has orer rulec two long and well established principles of commercial law-and since, by the decision of the bighest rribunal of the state, it has now become the law of the laint, we have decmed it important to shtain a stort but substantial statement of the case tor publiction.

John M, Minor, of the city of Baltimore, shipped a quantity of merchandize on board the schooner Fagle, fr Cumana and a market, consigned tadames ()wings, the appellant, as supereargo on board the vessel. and received bills of lading therefor, dated 9th January, 1807.

On the 1 luh, the day following, a contract of coparinemship in the cargo was entered into i.a writing ly Miner and Owings, and at the same time a verlial agreement was alleged to have been made between them, that Owings should retain the cargo sud procreds until all advances and engagements an=de ly him on account of the cargo, as well as any private debt due by winor to lim, should be satisficd

Hash these agrecments were private, and made after the cargn had been shipped in Miners's name, and all the paipers made out so representing it, and after the vescat was cleared out.
On the 13th the vessel sailed with Owings on board, ostensibly as supercargo, and without any alteration of invoice, bill of lading, \&c. the whole of whic! papers were by Owings permitted to ren ain willout objection in the hands of Minor.
Soon after the vessel sailed, Minor obtained in. surance in his nw: name.
With th:e bill of lading, invoice, and policies of insurance in his hands, Minor applied to Karthaus, the appeliee, to loan him his promissory notes for \(S 4,600\), and oflered him an assignment of the policy, bill of lading, and invoice as security. Karthaus accordingly loaned him his notes to that amount, and rercived an assignment as proposed, by blank intorsements. Shortly afterwards, Minor absconded from his craclitors, and Karthays paid the notes.

Owings sold the cargo at Laguira and shipped a return cargo, and took bills of lading for it as shipped on aceotht ant risk of Minor solely, and the iranifest was conformable thereto. On the return of the vessel io Baltimore, Owings having learned thatMinor had abscontled, aliered the bills of lading and manifest so as to make the shipment to himself and Asinor juintly.

It was contended on the part of Karthaus, first, that the contract of co-partnership and the verbal agrcement for Owings to retain were, under the circumstances, fraudulent as related to Karthans, who confided in documents voluniarily left in Minor's hands by Uwings, which represented the ca:go to be the whore property of Minor, Owings appuared only as supercargo; and, secondly, that if not fratudu. lent and the partnership and contract were real and bona fide-that yet Minor hiad the power, as a copartuer, to pledge or sell the goods, and having so done in his partncrship character, the endorsements in blank being Jolin M. Minor alld company, Kart. haus had, at least, an equitable licn on the goods, superior to that of Owings, upon the general principle that either partuer can sell or pledge partnership goods on partnership account so as to bind bis parther.

But the court overruled both points and decided that the contract of co-partnership and the verbal agreement hetween Owings and Minor gave Cowing an equitable lien on the goods for his advances ond engagements, which over reachrd the assignment som him to Karihans.

\section*{'The President's Tour.}

To notice the procecdings at .Vezo-1.oudmi, \&c we have to make a retrospect. At New-London the following address was presented:

To the Prenident of the United S'ates.
The mayor, aldermen and common council of the city of New-London, in behalf of the corporatior, with high respect for his exalted station, em. brace this occasion to welcome the president of the United States on his safe arrival in this place.
A visit from the chief magistrate of a nation, so respectable and important in the scale of political existence as the United States, to this portion of the union, is an occurrence interesting to the patriot, and highly gratifying to the feelings of this commumity-an occurrence, which, as individuals, we shall remember, and which the corporation will record.
It affords us consolation, that your administration has commenced :t a period, farorable for inpurove. ment; for the establishment of a national-of an American character. A period when the storms of: war have passed, and the days of peace commenc-ed-when party spirit is assuaged, and a spirit of mutual charity and forbearance nationally prevails.
That the president of the United States, in common with his fellow-citizens, is enjoying that state of peace which his own agency and energy so essen. tially produced, is to us a source of pleasing reflection and consideration.
We trust that we may be indulged in the pleasing contemplation that we possess our habitations in safety-that our shores are free from alarms, and that the waters of our harbor are relieved from tl:e presence of a threatening and hostile fleet.
With great satisfaction we once more behold, in the chief magistrate of the United States, a man, who in his youth, had an agency in achieving, with his sword, the independence, and establishing the pillars of that government, of which he is now the head, and which is the pride of America, and the wonder of the world.

From the high stations you have held, and honor. ably sustained; from the eminent services you have rendered our country, we have a happy assurance, under Divine Providence, of an honorable and prosa perous administration; and that, under the auspi. ces of your government, we shall be a united and happy people.

Nothing can give us more satisfaction, than a cona sideration of the parental view and extensive sur. vey which the president is taking of the northern section of that country, which is happily united under a goverument of energy and frecdom; and of which, by the choice of a great and enlightened people, he is now the political head.

Be pleased, sir, to accept our sincere wishes that your life inay be prolonged and happy; that your administration may be prosperous and blessed.That your journey may be pleasant; and that you may, in health and safety, be returued to the bosom of your family, and all your endearing and domes tic relations, with happiness and satisfaction.

JEREMIAH BRAINARD, Mayor.
the pnesiderat's nibly.
To the NHayor, Rldermen and Comanon Council nf the cily of \(\lambda\) evw- I,ondon.
Fellaw-ctrizens-In making a toin through the eastern states, with a vicw to public defence, New fondon had a strong claim to attention; avd in vi. siting it I liave been much gratified by the ver: friendly receg vion which has keen given tome.

Aware of the favorable circumstances unler which I have commenced the duties of the hig! trust to which I have been appointed by iny fellowcitizens, it will be my zealous endeavor to derive from them, in the admisistration of the government all the advantages which they can afford. It is only niaking adequate preparation for war, now that we are blessed with peace, that we call hope to avert that calamity in future. It is only by a vigorous prosecution of the war, when it becomes inevitable, that its evils cin be mitigated, and an honorable peace be soon restored.

I: the pursuit of great national objects it is equally the interest and the duty of the whole American people to unite.-Mappy in a government which secures to us the full enjoyment of all our civil and religious rights, we have every inducement to unite in its support. Wilh such union, we have nothing io dread fiom foreign powers.

For the kind interest which yoa take in my welfare, I beg you to accept of my warmest thanks, and to be assured of the sincerity with which I reciprocate it, in favor of the cilizens of New-London and its vicinity.

JAMES MONROL.
Afier inspecting the site and works of Fort Trumbull, he proceeded across the barbor to Gioton, to visit Fo:t Griswold, that memorable spot, which a band of volunteer militia defended, when assaulted by the British, September \(6 t h\), 1780-and where a large number were sacrificed after the surrender.
He entered the furt with his suite, the naval and military officers present, and several distinguished citizens. It the fort, at his request, some of the surviving heroes, who so valiamly defended it, in the revolutionary war, were introduced to the president. The scene now became truly interesting. Aficr a lapse of so many years, Fort Griswold and the hill on which it stands, becomes again distinguished in the annals of our country. There we be'old the nation's chief, and at his side the hoary veteran, who on that spot, thirty seven years having since passed, stood as a volunteer in defence of his country atd his home; and, after surrendering to a superinf force, was wounded and left for dead.

Mr. Park Avery, and his brother Mr. Ebenezer Avery, of (inoton, b)th upwards of 70 years of age, were among the few present. Their scars were too conspicuons to perinit them to esc:pe the particular notice and kiad attention of president Monroe. Pasi scenes crowded on his recoulection, and when under the impulse of the monemt, he laid his hands on the traces of their wounds, these venerable patriots realized that their country blessed then, white her chief gratefully noticed the scars which bore honorable testimony to their valor, and their sufferings in her defence.

Mr. Monroc, in reply to the Middletorm address, observes,
"If I were a spectator only, instead of party in this scene, I should be deeply affected by it. There can be no spectacle more interesting to a generous mind, than that of a free and virsuous people, receiving with unfeigned demonstrations of respect and confilence, a chicf magistrate, deriving his office from their voluntary sulliages.
"Aware of the great importance of the establishment of actequate works for territorial und maritime defesce, it is my object to give full efficet to the provivions mude by law, for those purposes. Stould my ciforts obtain the approbation of my country, atal contibuec ill sergree to pronote harmony

Contimuation of proceedirgs at Brstom, E'c. On the 5t.h, he visitet the first victor in the Cons::suition, capt. Hull, at Charlestown, and breakfusted with him. A spaci us arch was thrown over Charles. towin square, in the centre of which appeared'June 17, 1775.'
the memorable day of the fight at Bunker's Mill. He then examined the nary yard, and visited the ship Independence, elegantly decorated with the flags of various nations. He afterwards returneal to Charlestown, and reviewed a body of ronp; the e assembied. Then he ascended the memor.ble toll, where, in 1775 , the lardy yeomanry of Massachusetts so bravely withstood the ass.alts of superion. battalions of dissiplined veterans. Here, near the monument erecled to the memory of Wannex, he reviewed about 1,700 men, artillery, cavalry and infantry.

In the afternown he attended the sacred Oratorio, siven by the Handel Haydn Society.

Among the private visits of the president at 13 oston, \&ce. we notice the following: To president Adans, govemor Brooki, Messrs. Gere, Otis, Per. kins and Lyman-and the ladies of Witlimn Gray, esq. general Dearboru and captain Hlull, and of Messrs. Otis and Blake. At Mrs. Warbom's he renewed lis acquain-ance with the widow of the late vice-president Gerry-Mrs. Gray's reception is spoken of being very magnificent. The Pat:iot ob-serves-"The easy und affable manacrs of the president charm all hearts; and make him as great a favorite with the ladies, for his urbanity and politeness, as he is with the other sex for those hish and commanding powers of mind, which have produced for him his present exalted situation." He also paid paid a friendly visit to the widow of If in-cock-president of the congress that dechired these states indepenlent.

On the 7 th of July the president visited the Uiniversity at Cambridge, where, after an address and reply, the degree of Doctor of Laws was conferred upon him. After which he viewed the library and philosophical chainber, \&ic. then withessed the mas. nocurres of the Harvard Washington corps, and partook of a collation with the presilent of the University: At one oclock he reviewed the first division of Massachusetts militia, accompanied by the governor; but left the ground earlv to dine with the vencrable president Adams, at Quincy.
The following address was presented to the president on the tih of July.

To the J'resident of the Triates! Statec.
Silt-The recent session of the legisla ure of Massuchuselts being closed previously to your arrival in Boston, the republican inembers of both branches are deprived of the pleasure of persona. \(/ 2\) paying their respects to the president of the Umited States. Those members, therefure, who were present at the adjourmment, logether with a number of their brelliren of Bonto:i, liave deputed us to offer you their congratulations on yomr artival, and to express their hioth regards for jour utticial and personal churacier.
We are liuppy, sir, in having this opportunity not only of expressing our sincere congratulaciolis oun your election to the chief inagistracy of the United States, by so taige a m-jorily of the clectors, but to bear this public testimony of our es imation of the services rendered your couniry, in the varo'ss stations in which gou liave herclofore officiate 1 in Rurope and America. These are sila thatat thit the neen yay yor ons a
tions, jou will be anrious to maintain the 1 riti 1 d. pris plos of the constitution with unabated ardor.

Tre patriot who has unifurmly supported the ho:v: of lis country in its varions conflicts, is ever e'v lled to the applause of his fellow citiz n: Fully is presed with this sentiment, we gratefully ac\(k\) vowledge your unremitted exertions in vindicating our national and commercial claims, when the \(i\) medinte calls of the country rendered the services of ox: most enligitened statesmen urgent and indispensable. We antiripate with pleasure the blessings arising to the United States from the wisdom and rec!itule of your atiministration, more particuiarly in patronising suci! institutions as will exiend the useful branclies of science and literature, and promote the agricultural, manufacturing and comireercial interes's of yuur constituents.

We wish you every blessing, both national and domestic, and trust that your name will be recorded if the Ainerican annals with the same respectful veneration sis distinguishes the characters of your illustrious predecessors \(\mathbf{2}_{2}\) Washington, Abams, Jkfpirson and Madison.

May you pursue your journey under the care of a benign Providence, happy in the retlection that the personal stfety of the chief magistrate of a republian government, requires no other protection than What arises from the affections of his fellow cilizens.

In behalf of our brethren and fellow citizens, we most cordially bid you welcome to the metropolis of Massachuselis.

\section*{HENRY DEARBORN. BENJ AMIN A USIIN, WILLIAM LIT'TLF, RUSSELL STURGIS, \\ Committee. JACOB RHOADES, JOHN BRAZER, VILLIAM INGALLS}

To this address the president returned a brief reply and intimated that he should make a full reply in writing.

On passing through Charlestown he was welcomed by the following address.-
"We liave the honor, sir, in behalf of the inhabitants of Charlestown, respectfilly to welcome you to this ancient settlement, which has once fallen a sacrifice to freedom; and still retains some vestiges of the revolutionary war, in which you engaged, at an early period of life.

We cheerfully unite with our countrymen, in the expressions of esteem and confidence to which your illustrious character and station entitle you, and we rejoice that whilst your administration has commenced under such auspicious circumstances, we can anticipate its progress, with public approbation, and its termination, with renown to yourself, and prosperity to the nation."

To. which the president replied:
"It is highly gratifying to me to meet the committee of Chariestown, upon a theatre so interesting to the United States.

It is impossible to appreach Bunker Hill, were the war of the revolution commenced, with so much honor to the nation, without being deeply affected. The blood spilt here roused the whole American people, and united them in a common cause in defence of their rights-That union will never be broken.

Be pleased to accept my thanks for your kind attention on this interesting occasion."

At the university of Cambridge, the audience being seated, president Krrkiand, addressed the distinguished visitor in the following animated and congratulatory addresg.
sull-ilie iresi:dent and fellows of Harl ard cok lege are hapj!y in an opportumity of presenting thei: respectfal salintaions to the chief magistrute of the nation. It is peenii...ly grat eful to us that a visit to the university has not been found inconsistent with those ohjects of public conrern, which elngare the. attention of the president of the United Siates in the course of his itinelary progress.

We take satisfaction in this notice of orr semina ry, as evincing your estimation of liber:al studies, and your interest in the education and character of American youth. Our academic functions cannot fil to derive dignity and efiect from the countenance of the civil authorities, and our pupils to find incitements to excellence in fll the demonstrations. of sympathy in their pursuits and destination, given by those who fill exalted stations.

We bid you welcome, sir, to an establishment. coeval with the foundation of the state, and the object of public and individual favor through inany successive generations. While, however, its connection with the history of past times, and the numbe: of sons, which, in the lapse of nearly two centuries, it was annually dismissed from its care, are circumstances which naturally excite a degree of interest, we are sensible that antiquity alone though venerable, is an inadequate basis of respect from men of intelligence and reflection. We would iope that the cherished seminary has other and stronger claims to complacent regard from every friend to the best interests of man, every patron of intellectual and moral excellence.

With the rudiments of good literature and the elements of science, it las been the constant and elevated aim in this institution to inspire the minds of youth with those principles of virtue and piety, with those manly sentiments, and with that pure love of truth and duty, which are the most valued ingredients of character, and, which are best calcu. lated to form the man and the citizen.

By pursuing such a course this ancient school has sought to preserve in close alliance the internsts of religion and learning, of faith and charity, of liberty and order.
Desiring to train those who are under our charge for the whole public and for mankind, wa deem it an essential part of our office to endeavor to tem. per the prejudices and feelings incident to particular attacliments and geographical divisions; to exhibit the evidence and authority of our common faith, with a due moderation in respect to peculiarities of opinion and mode; and to encourage free inquiries into the nature, the value, the dangers and the preservatives of our republican institutions; with a just reserve upon those controverted questions which tend to inflame the spirit of party.

We present to your view, sir, that portion of the youth of our country now resident within these walls; and are happy to bear testimony to the many. pledges they give of their regard to the interesiing objects of literary pursuits, and to those attainments on which their future usefulness must depend.

May they, and all the sons of this University, ever cherish those generous affections, and aim at those solid acquirements, which shall bind and endear them to their country, and render them apploved instrupents in advancing the interest and honor of our nation, and strengthening and protecting its precious institutions.

In these indications of the purposes of public education, we are persuaded, Sir, that we refer to sbjects which you deem worthy of high regard.
- We congratulate you on the auspicious circuma

Ftances which attend the commencement of : ull: ad:ninistration. Accept our whishes and prayers for its happy course and issuc: and imiulge the ex pression of our desire, that whilst you, by the favor of hewen upon the exercise of the appronriate duties of your high station, ohtain the happiness of seeing the assoriated coumunities, orer whiet, you preside safe and prosperulis, it may be our privilrge by fileli \(y\) and zeal in our allotted spinere, unler the siniles of the sume good Providence, in coroperate in the work of patriotism, bs diffising the light of kunwledge and the saving i.ffluence of religion and morals.

Jily \(7,1817\). JOHV T. KIRKLAND"
Tile reply, of the president was energctic, elo. quent and sa isfaceory-at the clase of which lie said the should embrace another opportunity to return a more fill and formal answer in writing.
O) the furenana of the eight of July he left Bose ton fir Marblelieided and Salem.

W W'e hare devoted more time and room to an accornt of Mr. Monme's visit to lunston than many may think it deserves \(B \cdot{ }^{t}\) if it does not interest nom it my be useful for refernce. The Chronicle and Patriot n'serves - "Phe visir of the Presitlent seems whollv \(t\), hive allived the storins of party People nor meet in the sime room who woulit be fore scarcely pass the signe s'reet-an? move \({ }^{\prime \prime}\) concert, where before the most juring discord was the consequence of an accilental reverunter. W . ho e it uill so remain. If no other effect is producell hy the prasident's visit, this alone will be an ample remu"eration to hin for his journey. By mak ine people hetter acquainted with each other, the thousand prejudiees and animosinies previnusly ex isting tre mbhed off. It is found that cilizens in opposite partieqareno so tunworthy of reciprocal re. spect as before 'liev vere thang'ul to be, and that each have qualifications wirl entile them to the esteem of the other The spirit of exclusive self love wears away, and interciurse with each ot ex shews even to prejudiced minds, that the virulence of party spirit which has been imputed to them is not so sirong or immovable as had beell suspected This harmony is the harkinger of a better order of things, and we trust is will continute beyoud the cause which produced it. While the red rose and the white one is the ornament if the same bosow, wo hope it will be an antilote to that spirit of arro fance and presumpion which prevents them from growing on the same stock"

In the oulier p: pers we sce notices of the president, in perfect iarmony wi:h the precedins-

The Boston Grazetse savs- "In every place througl. which the president has pasaed, in his eastern tour. the people have most generously, and withont distinction of party, manifested that reepect towards lim, and paid him those civic und military lıonors. which his distinguished merit as a patrios and chief magintrate, has justly entitled him to, from his fel-low-citizens"
The Boston Centsuel calls the present the "eras of grood feelings," and observes-"during the present jubilee may persons have met at festive boamls, in pleasant converse, whom pariy politics had long severed. We recur with pleasure o all the circum. stances which attended the demonstrations of good feelings.

The dinner given by the venerable ex-president ADams, consisted of nearly forty covers-was aro ranged with noble simplicity anl unaffected ele gance, and embraced as guests eminent men of all political patties. Tho accomplished and execllent fady of the ex-president did the honors, seated be-
twee: , prevident of the United States and the governor of tie commonv eail.. Resides these per-? sonages, and iheir respertive sutits, there were among the guesta, his honor It. gov. Phillips, chief iustice Parker, julges Davis and Adams, marshal Prince, and Mr. Bure, district at'orney; maj. gen. Crane, tl e ge: eral- Dearborn, Humplureys and Miller; tire cominniores Bainbridge, Hull, and Perry; Hon. William Griy, II. G. Oris, James Lioyd, and Josia Quincy: W. N. B w Iston, esq. presilent Kirk land, reverend Messrs. Whitney and Coleman; Mra Staw, to whom the republic of letters is greatly indebied for the estahlishment of the Athenxum, and olliers whose names we could not learn."

Affer complimenting that excellent officer, gen. Swift, of the engineers, the Centinel speaks of the president's visil, as "an event which has a more direct tendency than any other, without any violation of principles, 10 remove the prejudices, and harmonize feelings, annihilate dissentions, and make us indeed ore people: for we have the sweet consolation (a 5 alm that will heal and cicatrise all wounds) te rest assured that the president will be president, not of a party, but of a great and powerful nation.
"Should these brief articles ever be perused in a foreign land, le the reader know, that they are not the adulatory or idle cimpliment of a fer cerurtly s) cophants; but the voiof of truth pronounced with emphisis by milions of bold and independent freemen, who, liowever they may differ in opinion on nimor puints of policy, feel they have a common conntry to lovie and drjend.
"During the president's excursion among the beavtiful islands in Boston bay, 10 explore with a inilitary eye t! e p oints of defence, anc? to exainime the reasons for establishing a great maritime depot at the n:wy y rd, there was one proud moment for sice'ching a ficture wortlyy the hand of a master.
"It was when the commander in clief of the land and naval forces of United A sieries, standing on the tof \(v\) liead of Long I.land, which overlooks the whole pieturesque and deligi.'f(ıl A ch pelagn, general Swift unfolded on the ground before him, a spacious map of the liarbor, and with a sollier's impulsr, indicuted with his sword's point the fort ifications which had been erected under lis orrlers; While the gallant Mula, Haivaridos and Perar, expldined the course and deptlis of the channels through which their slips had borne them triumplant from the ocean.
"As appendages to these primary and prominent figures, the group might include the reab likenesses of herues and patriots whose services to their country can never be forgotien."
Mr. Topliff, kecper of the Merchants' Hall, says -"Prer since the president arrived here, business has in a great measure been suspended. Party f-eling and animosities have been laid uside, and the prople have universally discovered a dispositıon to du every thing in their power to render his visit agreeable and happy. But one great national feeling has animated every class of our citizans-in fact, they never appeared, and certainly never conducted more like true Americans, than on this occasion.The presiclent must have been highly gratified with thevitention slinwu, and the citizens equally so in having the opportunity"

Indeed, the president's stay at Boston was a round? of amuscmant and pleasure. The fondness of the people of that town for shew was indulged to the utmost extent, and all partics seemed really sumprised at their mecting and being so happy together; - for in luoston, party had drawn a line between good neighborhpod The ladies' entertainments were
very spiendid-200, and upwards, being present at some of them.

I few sarron politicians have felt offended at the proceedngs at Boston; or, seem rather angry with Afr, Monror for giving up to them as he did. I am not one of these. I do not like such pomp and parade as has been exkibited-but I believe it will co a great deal of good in the present instance; and \(h_{\text {-ve }}\) buch effect io raise up a nutionul feciing, ou the suins of party prejudice.
There was also much ceremony and shew at Su-lem-but the nurrasive inust be postponed-At lio nest . Marbleliead the president was received with great respect by the fathers of the town and the people.

By the order of the governor, the major-generals of their several divisions, with their suits, will incet the president at the boundaries of their districts; and accompany him through them. This attention will be in addition to the escort of cavalry which is to escort Liin every mile he travels in Massachu setts, including Maine.

\section*{Foreign Articles. \\ staie papers.}

Difference between Spain and Portugal,
"The conduct of the government of Brazil, in inyading the Spanish possessions on the river Plate, has occupied the attention of Europe as much on account of the act itself, as on account of the period at which it was done. All nations were collvinced that the profoundest peace was necessary to heal the deep wounds which had been the consequence of so many, years of war and revolution. fet this was the moment which the court of Brazil chose to invade the territories of its neighbor. The Sp.nish government on this occasion acted with the greatest prudence and moderation-and the allied powers afforded a fresh proof of their generous ideas and pacific intentions. The following note from the ministers of Austria, France, Great-Britain, Prussia and Russia, delivered to the marguis de Aguiar, his most faithful majesty's minister for furcign affairs, is a document perfectly well calculated to tranquilize the public mind, and to incluce a hope that the court of 13 razil, adopting those principles of legitimacy and justice upon which the present system of the world is founded, will avoid compromitting herself with the allied powers. The good faith and diguified character of his chatholic majesty are must apparent upon this occasion. The decisive language of the ministers from which the following note has proceeded, will prove the opinion of their respective sovereigns in favor of Spain-and that their relations with her are as fixed and solid as they can be between powers the most intimately connected.
Note from the ministers of the mediating cont to the marquis D'A Aguiur, secretary of state for foreign affuirs to his mast faithful majesty. The occupation of a part of the Spanish posses, sions on the river Plate by the Porluguese troops of Brazil, was no soonerknown in Lurope, than it was the ohject of official and simultaneous steps taken by the cabinet of Madrid, with the courts of Yienna, Paris, London, Berlin and St. Petersbing, in order to protest solembly aguinst this occupation, and in claim their sunrort aratust sich sm aggreśy....

Perhaps the court of Madrid might have though" herself entitled to recur at once to the means of defence which Providence has placed in her hands, and to repel force by force. But gruided by a spirit of wisdom and moderation, she was desifus first of employing the means of negroctation and perstasion, and she preferred, notwithstandiag the clisadvantage that might result to her possessions beyond the sea, addressing lierself to the five undermentioned powers, in order to an amicable arljustment of her differences with the court of Brazil, and to avoid a rupture, the consequences of which might be equally disastrous to the two countries, and might disturb the repose of both hemispheres.

So noble a resolution could not but meet with the entire approbation of the cabinets to which the court of Spain has addressed herself, and animated with the desire of preventing the fatal consequences that might result from the prescat state of affairs, the courts of Austria, France, Great Britain, Prussia and Russia, equally the friends of Portugal and Spain, after having taken into consideration the just claims of the latter power, have charged the undersigned to make known to the cabinet of his most faithful :najesty -

That they have uccepted the mediation demanded of them by Spain.

That they have seen with real pain, and not with. out surprise, that at the very moment when a douhle marriage seemed to bind more closely the family ties already existing between the houses of Braganza and Buurbon, and when such an alliance was to render the relations between the two countries more intimate and more friendly, Portugal has invaded the Spanish possessions on the river Plate, and invaded them without any explanation whatever, and without any previous declaration.
That the principles of equity and justice which direct the councils of the five courts, and the firm resolution they have adopted to preserve, as much as is in their power, the peace of the world, purchased by such great sacrifices, have determined them to take cognizance and part in this affair, in the intention of terminating it in the most equitable manner, and most conformable to the mode of maintaining the general tranquility.

That the said courts do not dissemble that a difference between Portugal and Spain might disturb that peace and occasion a war in Europe, which might not only be disastrous to the two countries, but; incompatible with the interests and the tranquility of other powers.

That in consequence they have resolved to make known to the government of his most faithfil inajesty, their sentiments on this subject, to invite him to furnish sufficient explanations upon his views, to take the most prompt and proper measures to dissipate the just alarms which his invasion of the American possessions of Spain has already caused in Furope, and to satisfy the rights claimed by the latter power, as well as these principles of justice and impartiality which guide the mediators. A reefusal to yield to such just demands would lave no doubt with respect to the real intentions of the court of Rio Janeiro. The disastrous effects that might result to the two hemispheres would be imputed entirely to Portugal; and Span, after having seell all Europe applaud her wise and moderate conduct, wauld find in the justice of her cause, and in the support of her allies, sufficient means of redressing her complaints.

The undersigned in acquittine themselver ne the

Lis excellency the morquis d'Aguiar, the assurance of their higi consideration.

\section*{(Signed) \\ VINCEN P, \\ menelife, \\ STUART, \\ GOLTZ, \\ POZ\%U DI IBORGHO. \\ \section*{LUCTES BOYAPAKTE.}}

Genera, April 25 . I send you a copy of the doeument which contsins the determination of the allied puwers, to preve t the escape of Lucien honaparte to the United States of America, and those ulierior plans which the discontented refugees propose for the prrpose of making of A nevica a theatre of revolutionary ideas, and a new field for ambition and intrigue. Tlie principles of justice, order and legitimacy that govern the powers of Firrope, will always disconcert the machinations of the seditious to disturb the peace, and will oppose a barrirr to their spirit of rapine, and their plans of usurpation. The first and most effictcious information of this business was derived from the zeal and activity of the Spanish government, well informed of these plots by exact accounts redrived both in Europe and America. Thus Spain deserves the confidence of all governments and the approbation of the people.

The following document will be read with much interest:

\section*{Pants,}

Protocol of the conference of the 1.1 th of . March.
Present the minister of Austria, duke de Richelieu, duke of Wellington, Sir Charles Stuart, the Prussian minister, the minister of Russia.
The conference having been opened this day with their excellencies the dukes of Richelieu and Wellington, to take into consideration the demand made by Lucien Bonaparte for passports to conduct one of his sois to the United States, and the Austrian minister having again laid down the three questions proposed at the protocol of the 2 d inst. reiative to the same object, it has heen agreed-
1. That North America having received a great number of malcontents and Erench refugees, the presence of Lucien Bonaparte in the United States would be still more dangerous than it is in Europe, where he can be better watched, and that in consequence it is to be desired that the passports he has asked for should be refused.
2. That in order to cleprive lim of all possible motives for soliciting the said passports, it wonld be equally desirable to refinse them to his son Charles, whose journey seems to be only a pretest for ule plans of the father-
3. That the news received by different means and from different countries, particularly from Ns. ples, leave no doubt of the inirigues and dangerous relationy which Lucien Bonapartckeeps up in Itals -and considering that Rome is, perlaps, of all cities that in which syperintencience is the most difficult to be excrcised, and is exercised with less severity, and that lie may, notwithstanding the refisal of passports, find means of ileceiving the vigilance of the Doman governmem, ant of escaping in proceed to Arnerica: it would be desirable that another abode be assigned hiun than Fome and the Roman states, hy the higa allied powers, and that he should be further remared from the cosils, ill order to render the plans of escape which he may meditaic more difficult.
This opinion being common to all the members of the conference, it has been resnlverl to consign it in the putocol of the day, is onder ithat is may bel
ande known to the four courts, and may produce a determination on their part wpon this subject. (Signed)

Talma, the celebrated French tragedian, is on a visit to England. Kean, the English tragedian, is engaged to visit the United States.

Scottish Petitions.
We have seen copies of some of the petitions from Scotland, lately presented to parliament and to the prince regent. The following is sufficient to shew their manner and spirit :
fetition to the prince begent.
To his royal highness, George, prince of Wrales, regent of the united kingeloms of Great Britain an!l I.eland, the humble aldress and petition of the hin'gesses and inlabitants of the tozen of hilmamork.
May it please your royal highmess, we, his majesty's dutiful and loyal subjects, beg leave to represent to your royal highness our distresses and our grievances, to point out to you the causes of them, and respectfully to suggest the adoption of those measures which we conceive to be the only remedy.

We can no longer conceal that we, and the great body of our fellow-citizens around us, (as far as our knowledge extends,) are suffering under the most unprecedented distress and unaccustomed privations, from a general stagnation in every branch of trade, and the consequent want of employment which hath reduced many families (lately in a state of comfort) to the extreme of poverty and wretchedness; and although shades of difference may be found amidst such a wide spread population, yet so universal is the evil, that every class of the community is sinking under its irresistible pressure, without any prospect of amelioration.
We ascribe all the evils which we suffer chicfly to our enormous burdens-to that excessive taxation which missesnothing under Heaven, and which cxtends, in many instances, to 3,4 , and even to 500 per centum on the prime cost of many different commodities. By such immoderate imposts, of long e:sdurance, and incessantly repeated, have the capitals of all classes been sapped, drained or exhausted. Bankruptcy follows bankruptcy in melancholy train. The circulating medium (our national coin,) hath evaporated in subsidies, and is succeeded by paper as a substitute. The natural and inevitable consequence of all which is, that our agriculture languishes, our manufactures decline, and our commerce expires. The ingenious artizan, the adventurous sailor, and the active and industrious laborer, 4 kre now seen half fed, half clad, and idly roaining on the brink of despair.
- We wish not to trouble your royal highness with the painfil! detail of all the complicated calamities which beset us on every side; but our duty obliges. But wave enquered and gained dieic eve object
pope to all his former splendor, and the inquisition to all its racks and fiery horrors, be religion? 1) they oall it teligion-their having forced three bigoted catholic princes back upon the people, who despised them, with all the nummeries of popery; or pullialing, with palp.ble untruths, the massacres at Nistnes, and the chains and dungeons which assailed the Spanist pairiuts? -Or was it religion which prompted them to coalesce with papists alone, and to war with every protestant state, to force them into their mad crusade? We would likewise ask tisem, can sucial order, or the social relatinus, subsist betwixt the arbitrary princes whem we have forcibly restored, and their unwilling sub. jects? Is it the status quo-the state prior to the war, to suuction robbery in the gross, yet punish it in detail? Was restoring all to the "state before the war," to extinguis! the ancient republics of Pulaud. Holland, Venice and Genoa, alter having indluced theiraid by solemn promises of such restoration, to our indeliable distronor? As to our "indemnification for the past," who is there so ignorant as not to k.on. \(\%\), that it may be crammed into the cavity of a nuishell, \(y=t\) not burst it. And with regard to our "security for the छuture," we are sorry in think, that afier all the expenditure of men and money, it is fully as problematical as it was twenty. three jears ago. We have here deemed it necessary; sir, to undeceive you, by telling you those things in order to do away the false coloring with which ministers constantly endeavor to gild their measures, to deceive and mislead the nation, and avert blane for their mad career.

Suc't is our condition, that we can no longer sup port our aggravated burdens with such diminished resources; and fo most inmbly suggest to your royal highness, that we know of moremedy, nor means of preventing a recurrence of the dreadful evils which we, as a nation, suffer, and the grievance we complain of, than by a thorough reformation of the abuses which led to them, and restoring to the people their undoubted right of freely, equally, and annually electing their own representatives, in the commons house of parliament; this will infuse a hope of better limes in their bosoms, which will calm their apprehensions-allay the severity of their sufferings-ensure their loyalty and uffection, and prevent those calamities which the nation cannot Gail to be involved in, by an infatuated adherence to the present system of corruption and extravsgance.

May it therefore please your royal highness, to call your parliament together as soon as practicable; and wa most earnestly pray that rou will have she goodness to recommend to their immediate attention and consideration these important concerns and the adoption of measures for abolisliag all useless places, pensions and sinecures; the reduction of our present enormous military eatablishiment; making every practicable rectuctiun in the public expenditure, ald restoring to the people their constitution and imprescriptible rights of amtually choosing their uwn representatives in parliament.

We have a detail of gen. Mina's proceedingsso far they are fortunate. He landecl, as has been been observed, at Soto la Marina, on the 19th April -the royal troops fled, and he was joined by 400 men of the country. He left a garrison and marched for Nezu St. Intero, the capital of the district, containing 5000 inhabitants, where he was received with acclamations, and immediately recruited 400 men more 1 He established a local force and dis. tributed 2000 stand of arms among the people, who brought him immediately 6000 fine horses, with which he mounted his whole force and left the surplus horses in depot. He was just about to march in search of the royalists. "The district of New St. Andero, (says these accounts) borders on the sea cuast and extends north to the Rin del Norte; the town is on the southern extremity of the dis: trict, and forms part of the ancient intendancy of St. Loulis de Potosi-the mines of St. Louis de P'otosi, Catorci, and Sicelecas, are under the same inteudancy; and since the revolt, the prolucts have been conveyed part to Tampico, part by St. Andero and Soto la Marima, and by sea to Vera Cruz, as the interior communication has been interrupted. The mines of Catorci, alone, progdice annually five millions of clollars."
proclamatiox.
Xazer . Mina, general in chief of the auxiliary army of the Mexican Republic.
Spaniards, soldiers of Ring Fordinand. If fascination has made you the instruments of the passions of a wicked monarch or his agents, one of rour countrymen, who has consecrated the most valua. ble part of his life to the good of his country, arrives to liberate ynu, without any other interest than that of the glory of promoting the cause of truth and justice
Ferdinand V11. notwithstanding the sacrifices which Spaniards have made for him, oppresses Spain more cruelly than the French did when they invated it; the men who most labored for the restoration and liberty of this ungrateful wretch, are now loaded with chains in dungeons, or fly from his Fuelty. Serving then such a prince, yoit serve the tyrant of your nation, and by aiding his agents in the new worlt, you degrade yourselves to the rank of execulioners of a people, the innocent victims of a greater cruelty than that which the Spanish people suffered, on account of the same princi ples, at the most glorious epoch of their history.
.Imericans, soldiers of king Ferdinand.-If force keepy you in slavery, and compels you to pursue your brethern, it is time that you should be de. livered from such a shameful situation; a single effort will now be sufficient in delive: you from the yoke under which you are bowed down; and to elevate you to the dignity of men, of which you have been deprived for these three centuries. Unite yourselves with us, who have come to give you li berty, and with ro other view than the glory which follows great actions. The precious soil which you possess, should not eternally remain the patrimony of despotism and rapacity; do not oppose the career of your destiny; if you were to distecgard this opportunity, you would aim only to frustrate the views of Providence, which now grants yout the proper momeat to exchange subjection and misery for independence and prosperity. What sad experience has ancient Spain undergone-and what sad lessons have you received f:om bad Spaniards, who, to the disgrace of the food, have come here to subjugate you, or to enrich themselves at the expence of your degradation.

If there are any among you who make common cause with hem io oppose us, through apprehen. sien, interest, or ambition, abandon them; detest and even destroy them: they are worse than thro tyramical chiefs with whom they are united, while they are so degenerate as to sacrifice their most sacred duties to such disgraceful passions.

Spanish ond Imerican wotthers.-l.eave stich vile chiefs and repair with us to the camp of glory, where waves the bright standard of liberty; you shall be happy by ceniributing to the liberty of this country: the laurel that shall encircle jour brows, acquired in tefence of our just cause, will be an imperishable reward, superior to the treasures of the universe.

Head quarters, Soto la Marina, 18th May, 1817.
JAVIIR MiNN.
General commanding the auxiliary army of
the .llarican repuilale.

\section*{CHRONICLF:。}

\section*{INDIN AFFAIRS.}

Milledrewille, Juve 24 - The annered documents furnilh arthentic unformation reppecting the present state of our affairs with the Inchians below: and, also the partitulars of a hic suceconfil attack
on two of their marauding parties, by a small detachment of volunteer militia. The f:equent irruptions of hese savages into our territory for some months back have excited rery general alarm among the defenceless inliabitants of our sonthern frontier, many of whom have abandoned their homes and fled to the interior for safety. T!:e executive of Genrgia unwilling to rely any longer on the promised assistance of the national government, which has probably been delayed by the peculiar situation of the war department, has issned orders to general Floyd, requiring him to call into service, from any part of his division, a sufficient force to ensure the protection of the frontier seltlements exposed to danger and the efiectual chastisement of all future marauding parties of Indians. From the late insidious attempts of the Spanish govern. ment to stir up the western savages against us, we lave a right to attribute the persceering hostility of the Florida Indians to some such inproper interference. The artillery company from Ciarieston, which was stated to have been stupped at Creek Agency, has, we learn, descended Flint river, 'and arrived at Fort Scott.
Extract of a communication from general Floyd, commanding the 1 st division of Georgist militia, to the execurive of this state, clated.

St. Marr's, 5 th June.
"Your letter of the 29th April affords ample proof of your prompt attention th the unsetlled and perilous situation of the southern frontier, bordering on the savages-and I yield checrfully to both inclination and duty in apprizing yout of such occurrences in this quarter, as maj. have a tendency to involve the interest and public welfare of the state.
"A copy of major Bailey's report to me of a late affair with the Indlians is forwarded to you. The misconduct of evil dispnsed persons on hoth sides, has produced a state of things worse than open War with our red neighbors, which requires a reciprocity of rigorous ineasures for the restoration of order and tranguility to the respeciive frontiers.
"I have just reccived information of a party of Indians having, on the 30th ult. entered the neigh. borhood, and in open day light took the catile from Rollinson's pen. Such is the state of alarm, that many families have broken up."

Alajor Bailey's reporit to gen. Fpoul.

> Chmue: cocotr, 2sth May:
"I decen it expedient in inform tou, Hat on the 20th instant I left Trader's Hill, accompanied by twenty four volunteers, int pursuit of cattle lately driven off from this frontier by a party of Indians. We took their trail, and followed it to where the Haccasooka path crosses the Suannalı river. When about a mile from the riser, on the 221, betwee-1 seven and cight o'clock, P. M. We saw the light of Ifire, which we made for, and Goun.l it to procerl from an Indian camp of from 5 to 8 men, who we had no doubt, were a party fitted nut to do mis. chief, and then on their way for the frontier setile. ment. We attacked them at 11 n'clock the sime evening, killed one man, and wounded othere, who were assisted off by their comrades. At this cam?. Ye got three horses and two guns. On the morning of the 2 id we fell in withan lndian tratl, which we fillowed a circuitona route, bearng for the bir tand of St. Mary's-at 9 o'clock, I'. MI. of the 214 h . we came up with them at a camp on the waters of St. Mary's liver, and altacked them at day break the next morning, killed two, and wounded severai. There were 12 or 15 in numher Heat we mot: Lhe
guns and sixteen horser, \(t w\), of which velwis io to our citiz ns. I am happy in state that nol ove of our party received any injury"
Exitract of a letter from the .Igent for Indian affiars to the acting governor of the stute, thated the luth instant.
Last night a runner from low down Yint river brought me a letter containing the fillo ving in Zormation:-"It seems a small parcel of the Uysehee red people who reside on the Chatalıonciree river, a tribe that has always been friendly to our government, and never one of them has been known to join the red stick party, were on a hunting excursion near the water of St.Mary's river, when in the night by moonlight a party of white people rushed upon them, killed one man, and wounded the other fuur badly-drove off all their horses, took their guns, and every thing else they could carry off from the camp. The four wounded men are now lying very bad, about sixty miles below here, not being able to proceed to their town on Chatahoocliee. It is not known whether it was done by the white peo. ple that reside in the Spanish government, or in our own goverument.
It is very desirable to ascertain whether the mischief was done by the penple of Greorgia, or by those of East Florida. If by the latter, retaliation may je averted from our people by a timely representation of that fact to the chiefs of the town to which the injured party belong. The chiefs of the nation are to meet at fort Hawkins the first of next month, which will afford a fair opportmity of making explanation, if in the mean time you can ascertain the aggressors.-Journal.

The Bank of the United States has declared a dividend of four per cent. on the stock paid in agreeably to their charter-and they are said to have a surplus of profits of about 200,000 dollars more.

Fourth of July. It is known to many that a superb bridge is now erecting over the Susquehannah river, at a place calied Rock Run-over which is to pass the main road between the cities of Philadelphia and Baltimore. On the 4th instant the chief stockholders and their ladies, about 15 ) in number, met at the romantic spot, and after viewing the work, delighted with the prospect of its early finish, partook of an elegant entertainment.

At a place called Ellington, in Connecticut, the people celebrated the day by drawing stone to enclose their burying ground- 53 ox teams were em ployed, and a great deal of work was done by the willing laborers.

Another! A gallant youth Wm. A. Lee, a lieut. of the navy was lately killed in a duel. He was in his 21st year.

Gen. Strong, of the Vermont militia, has been presented with the sword voted to him by the legislature of New-York, in ample form. Particulars in our next.

Captain Perry, it appears, is abont to retire from the command of the Java-on which the officers of that ship presented to him a most flattering address. It was signed by all the officers except the purser and surgeon, who were absent at the time the address was drawn up.

The brundury commissioners are on the lines between the United States and Canada, in pursuance of their duties.
Emisration. Very many passengers are ariving in vessels from Europe; in one of them 409 persons, none over 30 years of age, have reached Philadel. phia from Amsterdam.
A number of French emigrants ase about to form
a settiement near the confluence of the Alabanis and Tombiybe. Cummissioners to select a spot have arrived at Mobile.

T'he \(S \cdot 666\) th. It is noticel that for the first time in Louisiana, the storekeeper's of St. Francisvilie on Sutidy the 13 th of June last, refused to do any business or sell a singie commodity.

The number of chilibren returned by the assessors of the city and county of Philadelphia, to be schooled hy the comity commissioners, is, 3,092.

The Congress frigate was about to sail for Port ant Prince-as it is said for the phrpose of demanding satisfaction in respect in an American seaman mut to death there, some time ago.
Rafiel sazwing.- At the steain saw mill of Messrs. Stewart and Hill, in Baltimone, there is a circular saw, about four feet in diameter, chiefly calculated for cutting veneers. It runs through a log seven feet long and 21 inches thick, with ease, in less than two minules-and two mimites ninre are sufcient to place the \(\log\) in a proper pusition for ano. ther cut. Eight veneers are cut out of one solid inch. Arter the log is pit on the carriage, the whole business of sawing is attended to by two boys.
Stean boats. It is remarked, and the remark is worthy of serious consideration, that thes:eam boats on the Hudson have been running ten years with. out a single person being injured by thesm. Here is a valuable assurance of their safe \(y\).

Died, at Baltimore, on the 31st. ult. in the 75t4 year of his age, Henry Juckron, esq. a gentleman well known in the histo:y of the struggles of Ireland for firedom, and father in law to Oliver Boad. He was a most respectable and a goo. 1 man, and a real friend of the human race.

Lieutenant Hoffman, of the navv. A number of citiz-n* of Dichess coun \(v, N\). Y. of which Mr, H. is a native, have presenied to him a service of plate in testimony of their sense of his gallantry and good conduct in three naval victories over the British, in the late war-which he very courteously received.
Liberality. A citizen of Massachusetts has made a donation of \(\$ 20,000\) to the General Hospital of that state.
Plaster of Paris-Notwithstanding the legislature of St. Johns, New Brınswick, have prohibited, altogetier after the first of July inst. the exportalion of plaster of Paris from that province, we are inclined to think, from what we see published in the New-Brunswick papers, that there is no great probability of there being a scarcity of that article in our market. At present plaster is not allowed to be brought away in any vesuels except Britislı bottoms. In consequence of which, it is sta!ed in the above mentioned papers, that the town of St. Andrews has become the ceutre of an American conspiracy to evade the laws of that conntry and bring the public authority into contempt: that in. stead of the inhabitants aiding the revenue officer of that port in detecting and preventing the sinuggling of plaster, all assistance is wholly denied to him; that he dare not go in the night to prevent its being takell away; and even in the day time the smugglevs set him and his authority at defiance. His boat has been taken from him and made use of to carry the plaster off to wharves which the Americans are said to have erected on that island. From these facts it may be fairly inferred, that in despite of his majesty's collector, a tolerable supply of that: article is likely to find its way to our ports.

\section*{Navy of the United States.}

The following is coppied from tae Aational Intelligencer, hecause it seems chiefly to have originated from an article that appeared in the Weethy Thegioter of the 31 s : of May last-ant for the pl prose of oliering sume remarks upon it. The Cditors of the Intelligencer introblace the efsay iy ubativing - "The writ r of the following es say lias the merit of having opened a question which possesses interest enough to excite atteni i m, even at a moment wheil indiffererice to the political interests of the United States prevails to too great a degree. Ond as the subject is, we are not familiarized to the bold and enlarged view which he las taken of it. Perhaps many of our readers, whilst they acknuwledge with is the furce of Cato's reasonimp, will with us eforse their assent to his conclusion in regared to the necebsary extent of the Imerican havy. Fut the gucstion cannot be too maturely consiifred what policy in this respect the repubic is to pursue-and we are glatl to see the mind of at least one intelligent man duly alive to its importance"

\section*{A NAVY.}

Is it understond to what extent in rearing a navy those called to the councils of ottr country conceive themseives impelled by public opinion? The presi!eht's inaugural address does indeed breathe a Roman spirit for the support of the rigits and fronor of our country, as well as salutary warning. that we should be "disregarding the faithful adnow. nitinus of experience, if we did not expect dantgers from abroat, allempts to oversel our kovern. iti-nt, to break unr uilion, and demolith us as a क्यt+n"" but it dues not clearly anunnce, that the oniy really efficient means to render ulontive all such uttempte, and secure ultimate tranquility, is to have tie most pozeryiol nuzy in the zorid. Most wrilers who have essay ed upor this suhject, seem, from some motive, to feel themselves under a neces. nity to apeak with sume caution, and to limiz a 112 vy for the Uni' ed States according to their fancits Por iny jart, I must make free to say, that I hoid minch prospective limitations as idte, and the reason. ing for it is as so much labur lont to the writers. Finture legislators and gencrations will reghlate this affair in their own way; and it is only for us profitiong from the experience of the pist, 10 lyy ? fotudation to meet the probable future, and bes promotise of the interests and the glory of unr descemitants. It has been sonewhere written that a man may carve out his own destinies: apply this to thations, and if une now joung childireth to not sce the United States a leadiugg a controling power over
the whole Anerican continemt, and an influential in dis ing power to F impe, it must he because the policy of their fath ers hati eirnae msly , haped the -ourse of their destinies. We shall justly inerit this reproach, uniess it be the fundameutal policy in bend all the encryies of the nation to the ady ncement of a navy in the the ratio of the grow. ing rescources-in thirty years a pop lation of twellif millions, in siziy or seventy years forly mill inns, and so in progression. Is our comintry, hen, either lo crouch in \& petty islant, or still coiti, ue o it it ble throngh inglorious defensive warfares, of vialated rights? Such must be the case, unless sone more efficient neaport be forged to strike V. This. - han an at my, portifications and mili ing the, fum the necensity of the case, miast form the a liztering measures of llerince; but will in a degree, be sipe:seded when our enintry's navy shafl be so power fill as to luok the mavy of any nation into awe; so powerful, as to render an attempt at invasion a fo. lom hope, so powerfill, as to give due weirit to the peremptory languare, "that you shali no 1 inger mus. ter the crew of a liankee merchantman upor the high seas, for the purpose of taking chi att thine you are pleased to call your own sujjecs." Wits such a navy, nur vuccessin\% will no haur a:no ch them the base-begraten, the lick-spitule whateoniogy of limtisin longucs, "ilat the thing is inste in it. self:"

No mat: can be so cleaf to the wnice of histony. or so bland to the evellts of his own tines, as iw Hatler himself with any rational expec ation of en. joying more that sho: truces from indir ilies an ! spoliations, until our country passesses shita nav!. Bat at the same time, it is not (s) be disguisel, thit in the progress of creating such a navy, oh.r cosuary will have many arduous conflicis to sustan, eve' io maintain the advance that is mate. Such cart be shown to have been the uniform spirit by whici the political course of (ireat Britain his bech directerd, muler every change of \(x\) thininstration, fis: more than a century past, that it becomen ha raily certain that she will atir heaven and earih to pre vent the wwy of any nalioa irm becuming form, d..ble to her nwu. The arcal a ieatum nos for the in nedrate decision of the pubpie uf the tnitad States se-mis to be, whether lliey will dewhinio.
 upron the conflice for the dumanim of the ncean, ir petmanenitly acyuieare in that upecies of vassal ase bey lase felt for the lave twenty years. Ther is in other alternatwe for us if the fion er, wh isse the emplatio langhage of the great Purioic Henry, "we mas fight". If tie tatier, proce ed liut
 tifin be a remperifol one. "I \& enty sinh uf the the and the requivite mumber of frir tes," (is the 13 :lit. more Weckly 18 gister of 11 in 31 , propuisia, ) woul! 1 give umbrage, bing war upan ul, and aval bit li ile as all instr ingot of Acfoce or allunyanen If wo ild bo foulded, that more must be provi 'el against the cext war. Our pressit force secms sulh itil iu werawe the liarborys stated and will hot brili, war upron ns, proviled we submi, with a gosid grace, in be impreand and plumdered at pleasure. The at arsital de Belisgle, a miwister to Lovis bue fifteenth, W
has said, that "France has often attempted to create a navy, and as often been arrested in her progress by the Britons. They lave seized our ships in full peace, and have not waited for war to commit their lostilities upon the sca It is, that the cabine' of St. James would much rather pass for unjust, han ruin any hazard of losing the superiority of thet" nary. A king of England would som be dethrone. if he vas to be obstinstely faichrul to lis treaties of peace with France. It is understrod, that a treaty shail mo longer subsist than whilist France irbears to buile ship." The events which inave passed in review, as it were, before our own eyes, thar verify the justness, of this delineation of the Bratish claracte: by the Frenci- minister, would feem a long catalogue. Only look at the seizure of ti.e Sjpanish treasure ships; the attack upon Co pering gell; the seizure of the Danish fieet: all done in "full peace." Tl e system of inpressment itse.f, as exereised, towards us, grows out of the very s...me prircipic, that the superiority of the British nasy isust be maint ained pher fas el nefias, by all n:cins whatever, jus or unjust. Fank es are good seation, to be found every where, and are a never falling resource for the supply of his ma.jesty's ships, when in want of men. It is only to feign mis. takes, and all goes well-wi'h the "Boston stamp." How cones it tiat the mistakes could not be discovered before, as well as after the breaking out of the war between Great Britain and the United States? Was there any additional evidence of Americarisin or Yarkeeism given after the commencement of the war, to the pious ministry or honest captains of his majesty's ships, that sn wrought upon their tender consciences, they could no: find in their hearts to compel brother to s:a, b: orther; but, in order to make due atonement for their cwn previous wrongful act most magnan imously rlisriarged them-to prison? Thus treating as the lawful captives of war, those whom they had cap? tured in peace, and who would not have been in their power, by their ozun confession, without their own previous unlawful act. (Sce Mr. Beasly's correspondence in L.ondon.)
Truth is not calumny. There are injuries that may be furgiven, but ought not to be forgotten. I have not brought forward these transactions with suy view of now exciting angry feelings. Loug may the two nation continue in their now apparent friend Iy harmony. But no man is justly censurable for warning his countrymen to provide against the future, by recurring to examples of the past. There is nothing that augurs the smallest charige of system in the British councils. She has hitherto, it is believed, refused to arrange upon the subject of impressment. The prince regeni's proclamation, im. mediat:ely af.er the affiair of the frigates Chesapeake and Leopard, remains in full force; and only awsits the signal to be again and again put into execution. Yet a little while and a reneival of all those out rakes and chicaneries, too sickening to be enumerat. ed. They are consigned in the annals of the age, and must go down to our successors for retribution. It is for us to shape the course of their destinies.

The cost ot such a navy must be of no considera. tion. Dullars and cents must not be put in the ba. lance against national rights and honor, has been often said. Let not my countrymen be appalled at at the magnitude of British debt. It is an error to impute more than a very inconsiderable portion of St to her navz; and if the navy bad credit for all the wealth it has brought into the nation, legally and il legally, that portion: would be greatly diminished. It is to an unexampled extravagant internal admi-
nistration; to the vast armies maintained and stiisidised in her continental wars; to the wars themselves, is to be imputed the gigantic size of her debt. A powerful navy to the Unite I S:..tes : oold ahnost wholiy supersede ant riny, forufications, and militia; and, above all, be a preventative finaily to wars, ualess we ton becone ambitionts and mad af. ter foreiga conquest. Besides, it ..ould be the only indissol:able cement to the union of the states. \(\therefore\) imore Ifatfored conventions would be heard of.
History furnishes many examples of despotic usurpations through the instrumentality of armies. Nome is recollected through the meanis of navies alone. A navy cannot long enfurce the maintenance of itseif like an army. It caniot serve as a body guard to a tyrant. Delendula est Curthago. The thunder must be hurled upon the coast of tie ar. gressor:

CATO.
REMARKS ON TUE ABOVF.
Notwithstanding the introductory remarks of the editors of the Natimal Iatelligencer, to be respected as an index to the character of the writer; 10 us anonymous, it was unt easy to conci de whether the article was from the pen of a friend to the navy or not. It is trie, that the author very ably urges many facts exccerlingly well calculated to rouse the prouil feelings of an American, and excite a spirit to resist a repetition of the wrongs we suffered so long and so patiently, anterior to the late war, from abracl;-yet bis views are so "bold and enlaryed" as to seem alrost as well designed to alarm us for safety, at home. But, we have concluded (and whether our conclusion is worth any thing or not, is "another affair") that "Cato" is a friend of the navy, and so we shall treat him in nur remarks; believing, however, that his prospects are neither suited to the means nor the zrishics of the present generationand "future generations," to rise his own language, "will regulate this affiair for themselves."
We do not regret that such ideas are spread before the people-where reason is free to combat er:or, good must resull from the discussion of a question of such mighty importance. The general opinion seems to have been that a navy for the Uni ed States should have a defensive character"Cat:" "would make it defensive by giving it a puwer to be offensive - "to hurl its thunder on the coast of the aggressor"-pointing to Great Britain as being most likely to molest us; and, indeed, as the only nation that has seamen enough to do us great harm on the ocean.
"Cato's" opinion that the raising of a respectable (not "respectful") naval force would give umbrige to England, is warranted by the uniform practice of the government of that country; and f certainly believe that the building of twenty suips of the line in the United States would be considered by it as a "just cause" for war-but it is not so easy to sulppose that they would deem it capperiont to wage it. The loss of a naval battle at sea, bet. .een fleets of heavy ships, would sink the national spirit much more than tiue fight of .Mount St. Jolin exalted it; and in the present state of things probably cause a revolution. They managed to gel over their defeats in the late war with us pretty well, by systematized deception and flagrant falseliond; but this would not do if such a fleet as that wherewith Nelson so easily mauled the unskilful French and Spaniards at Trafilgar, were beaten. Such an event, as the lightning of heaven fives the rugged oak and causes all creatures near it to shrink with terror and disinay, would pull down a miaistry and fill the people with consternation; and that minister who did not
cnlculate on this as a prossibility (we having the ships proposed) world deserve to lose his head for treason against common selise. It was clearly ascertained that out of their "thous.and vessels of war," the Britis's had wone able to catch natl fight our firigates; and they are not now to be informed that they are in the same dile:nmatas to our ships of the line. It is the universal opinion of those who ought to know, that out 74 's may aroid or figit, barring accidents, \(27 y\) ships that float. It is true, Great Bitain might take pattera by thein as she did of our frigales; but still she wants, and must want tuder lier system of impressment, high spirited fivewen to put them upon an equality with our's. I, therefore, conclude, that athough the building of the se strips by the United Siates would offend Gireat Jritain, she would hardly think it expedient to resent the uffont!

The inritish are intullerably jealous of our commerce and commercinl means. Vivery body recollects what a terible fitight they appeared to be in last summer, when it was mported thati Naples was to cede tin isiand of Ioranpecdosn to us, for a naval post in the . liediscrraneun. They liave lately had a like rumor that we were to thave one sumewhere in the Baltic. This modest people, wlio have ports and stations every where, bave imputed to us something like hostility for our commerce on our own rivers. "The designs of the . Imericars on the Olio and .Mississippi, are every clay more appurent," said a minis tevial writer, "finn inig the embers" of the late war. But still, we think, they would hazard too much in wantouly compelling us to fight them again. Another war would be carried oil very differently from the last, and totally sever the bonds tint unite us to them by their maveractures-and woell do tiey knowo it. But and if it shall so happen, their jealouss and envy making them blind to their interest, we believe that the naval foree proposed would be suf ficient to cause our coasts to be respected, as well as occasionally to alarm some of those of their most valuable colosics, and thus distract their attention and affird fill opportunity for our frigates and lighter vessels, public and private, to root up their commerce, on which they so much dopend for every thing: for we totally reject the itea that an Ame ricen Ieet of iwenty satl of the line is to be kept blockaded oy ary furce that (ireat Britain can send and inaintain on our coast for that pirpose. Such a fieet would go ont; and, like our frigates, having seariooin, fo where it pleased, with power and in ealculuble effect. Shere would be more of dropping one stip in the Clesapeake, another in the Nolaware, und a third off Sandy Honk, to seal up our ports. If, with the failt prospect of gain that she late war affurded, and the great risk of person and properiy that attended the business, we eap. turei not less that troo thousand five houdred Hritush vessels in i:s short period, maty of whic!, nowever, were last to \(u\) v by recapture, or the hece sity of dententing them to pevent their falling into the enemy's hands, -low great woulat be the annoyance under the new urder of thmgn? We should hercly have less then 1.50 sivit privateers ulways at sanif artumen contil be got to math them.

Nothits is further fiom our with than io limit the pooer of the repubicic to redress its wrimgs-buta semedy may be as bal as a oiseuse. We do not ini.
 "Cato" aims at, would cast luw, but becauno inc fir ar that if at eles inot lead w lite prastration of feecedon at hom a, it mught, at iexht, reater us uports ahtoal. We habe alw js whught that the pelition "sbul us

Iofiered to Deity. With a navy so powerful, we should seck oit for colonies; and, indecd, they would appear to be necessary to it-we slould want stations for our ships in the West, and, perhaps, even ia the Eiast Indies, to "protect our trade," anel so forth; and, inch by inch advancing, become fettered with alliances and im nediatcly concernell in all the affairs of the old worid, to the total subversion of the present purity and simplicity of government and manners. We would rather tilat our own country was surrounded by a wall of brass, as higth and as broad as the mightiest of the snnw-covered Ancles, than behold her stretcling her armis over the earth and sca, like E: :gland, to rake the ashes, as it were, of the wiso v's cottage for the little bit of gold that composed the ear ornaments of its late iahabitint, imnolated by avarice. When that dap comes, our country will have lost her freedom-the Lillers of the soil will not then beita lords-the batLot \(b n x\) will have lost its virtue; und misery have taken the place of the present ease and independence of the pesple. Every thing will he made to bend to the wis!les of a few, and a.l the mennnesses and crimes of commerce will be superadded. Wituess England and Moltunt-what is it they have not traded in, and supp,orted, by their navy, that they could make money by ? The lives of mer have been things of catculation with them as much as loggslreals of molasses. Witness alio the conduct of onir owa merchants-before the war, they (as a body) Wo lid have conschted to have paid a trinute to Eiglind, under her orders in council for levging it, for liberty to navigate the high scas; and after war was declared they were base enough to seek protection under 13 ritish licenses, and extensively become smigglers and dealers in goonds known to be smuge gled. The often told story of the Dutch trampliing on the cross at Japan for liberty to deal there, is a perfect type of the spiris of trade, whose satellites are cruclity, perjury an l forgery. How strange is it, that men apparently honest and correct in cheir dealings with individuals, feel no compunction at such things if committed in the rony of tradeagainst governments or a people at large! We suppose their ariblunetic teaches them that a crime may be so much subdivided as to pass for nothing! I have no doubt that many mainbers of the E.iglis! E.ast Iadia company were taking the sacrame it with the apparent sanctity of angels, while Wurren Histingo or lord Clive were depojatating India of thirty mil. lions of harmless and inofle nsive men, women and children, in subservicace of their commercial veas. The merchants have influence enough, the ughl the ir command of the foating wealth of the coubtry, as wee well knozo by ruefitl experimere; and of all classes they are the list whose inflenee shombl be iner as od-as it would be by the establishment of a nay commensurate with "Cato's" ileas. "f every nipe cles of sectarian power, miy heaven defenl tis against that of traders! flue \(\%\), y iq isith: is oul. iy another natie for another thing, in proluce a onane general effect. A Ad the last, perhaps, is the icart inischievons of the two, becau e more lifuted is to its -bjects
But the preceding may be considered as mere matters of apinion l.at us procec 1 to the root of the uffair Shi;s may be biblt in freat numbery, but lias "Csto" thought they monit be also nuann ' \(4^{2}\) ?
 13. Phineury elinemors? I very inuch qlestion our eiproly y \(\quad\) to man, in tins wiog, "lle \(1 w\) hity slips of :the line all I req" tile aumaer of "thates" propased. Tie facti, that in the lite war thare often was a

for them fom the ships on the sea-buat to those on Il.- ikkes it is life pract:ce, I believe, in all oflice conentsies where there is a navy, to impress seinnica for it, il time of war-but a man might as well atlempl to eoupty lake Superion with a horn spoon as tointrodnce it here, in the present disposi in thal state of the people.

In our last number on "Political Economy" we supposed thist the seamen and half seamen of the United States might amount to 100,000 men: And, while we bear in mind that, througis a decrease of comineref they also are rapidly decreasing, we shall admit it as the number that may be counted upon. I feel satisfied that the allowance is a large one; for it gives us one liand to about every thirteen tons of all our vessels, every way employed or unemployed.

I wenty ships of the line and the requisite number of f"igates and snialler vessels would require seamen and ordinary seamen about as follows :
For \(2074^{\prime}\) s including petty officers 600 each 12,000
\[
2044 \text { gun frigutes } 400
\]

2018 ǧun sluryps of war 150
other vessels and flotillas, boats and
barges, on the lakes and elsewhere

The privateers, under the protection of such a fleet, wuild empioy not less than 12,000 menmaking a total for military purposes of 37,000 . A force that camot be raised by volmotary enlistments; for the cuasting, bay and river trade would employ, even in time of war, (protected as above) not less tham 30,600 , and the merchants require a large number. Is cither of these three pursuits would af ford highcr wiges than the United States could give to man their ships, and when we recollect also the charms of veriety to the sailor, we must con clude that our present means are inadequate to sup port the force just mentioned; and they will become less so, if we do not keep a sharp look out to revive our commerce. Our seamen are constitutionally brave and patriotic; but it is really counting a great deal on these to suppose that one of ever! three mon would freely embark and continue in the military service of his country. It cannot be count. ed upon-the most sanguine camot hope for it.

We lave thus, by matters of opinion and some things of fact, endeavored to maintain the ground we touk, as politically and morally the ultimate extent, to which we, at this time, ought to desire or expect to "liniting" our vicws by the nature of things It would appear rather to do good by giving us a point to look at.

\section*{Internal Navigation, \&c.}

The fourtho of July was celebrated at Utica, N, Y by commeming the excuration lhat is to mite the great lukes unith the Atlumic. On this interes inifg occasion the following uldress was delivered by J. Hathaway, esq.
"I Pellnow- Citizcns-We have assembled to commence the excavation of the Erie callal. This work, when accomplished, will connect our western inland seas with the Allantic ocean. It will diffuse the benefits of internal navigution cier a surface of vast extelli, blessect with a salubrious climate and luxuriant soil, embracing a ract of comery capable of sustaining more human beings than wereever accommodated by why work of the kind. By this great higi.way, unborn millions will easily transport their surplus productions to the shores of the Atlantic,
procure their supplics, and hold a useful and prd. fitable intcrcourse with all the inaritime nations of the earth. The cxpence and lahor of this great undertaking bear no prourortio: to its utility Nature has kindly afforded every facility; we lave all the moral and physical means within our reach and control. Let us then proceed to the work, animated by the prospect of its speedy accomplishment, and cheered with the anticipated benedictions of a grate. ful posterity."

Judge Ik chardson then broke the earth with a spade, and the laborers, amidst the acclamation's of the people and the discharges of artillery, com. menced the mighty work.

They then had a procession, oration and feast.
It appears that the first object of the coinmission. ers will be to perfect and open a communication from Schenecrlaty (and of course the city of NewYork) to the Seneca lake. The western inland lock navigation company have already done much for this-they have removed rocks and trees from the beds of streams, straitenerl Wood creek by one half the length of its old channel, and dug two siort canals and erected excellent locks, "faced with hewn stone, that may be pronounced stupendous works, which would do honor to any country in Europe." Thus they entered the Oneida lake and thence up the Onondaga river, \&c. into the "lot of lakes," Onondaga, Cayuga, Seneca, \&cc. \&ec. in that country. In 1812 it was estimated that 1500 tons of goods prassed annually through these locks - what must be the quantity now, seeing that immense tracts of land about these lakes, then covered with their native forests, are reduced to cultivation and teem with inhabitants? But though much has been done, much remains to do to complete this navigation, which the comnissioners of the great canal will soon effect. It seeins, however, that in pursuance of the whole plan, they will cut a canal clirect from I'tica to Salina, 69 miles, and so shorten the navigation by, perhaps, that distance, as we judge by the map. A water level between these two places may be maintained, and the cost is estimated at only 8000 dollars per mile. To conceive the importance of these things we must look at the map and see what a great inland navigation they will open-and success in them, which appears certain, will afford as well vigor as funds, to progress gradually towards lake Erie, and finish the great and glorious undertaking, by such routes and in such manner as experience shall dictate.

Lake Erie. A writer in the Albany Argus informs us of a very important harbor, just discovered, exactly halt way between Buffalo anct Firie, 45 miles from each. It is called Dunkirk. The form of the bay is nearly a semicircle, with a capacious channel toward: the west headland of 12 feet depth, and on the east of 10 feet. Within the ledge is a spacious basin capable of containing 100 sail of vessels with fiom 12 to 13 feet water, and grood anchorage.

A \(10 \% 11\) is laid off liere and will soon become 2 considerable place; as besides its advantages for the laketrade and the value of its harbor, the Casadago lake lies about 8 miles south of it, the waters of which are navigable for boats of five tons burthen, communicating with the Canawongo branch of the Alleghany river, learling to Pittsburg.
"To perfet the navisation, some obstructions of trees at the ontlet of the lake require to be remov. ed, whirin can be effected at a trifling expence. The west piomonitory being faced with high perpendicular rocks, washed at therr base with the waters of the lake, is remarkably well situated for works of defence, and as a commanding site for a light-house

II proof of the rising importance of this harioor, 60 essential to the safe navigation of take Erie, we give this fact, that the last Chautauque Gazette de. tails a list of ten vessels w'rich arriven at, and of shree which sailed from, Dunkirk, during the week precerling the 30th June."

The Ilabama. The natural advantages of this country are daily developed. Cotton will be a great staple, and it can be carried by water from fort Claiborne to New.Orleans, for four dollars per bale. But the stopping place will soon be at Mobile, which probably will be a large city. In consequence of the great emigration, provisions have been very high-corn \(\mathrm{S}^{5}\) per bushel! On the 26 h of April it was selling at 2!, and flour at \(\$ 20\) per bbl. at fort Claiborne.

Cincinnati, Ohio, July 4. Singulur arrival. Arrived at this port on Monday inorning last, ( 30 th June) a small schooner-huilt boat of about six tons burthen, 30 days from Rome, on the Mohawk river, state of leiw. York! The boat was conducted by captain Dean and four Indians;-passengers, two squaws and an Indian boy. It was a handsome model, painted in neat style, with two masts, and sails, and an appropriate Hag. They sailed hence on the afternoon of the same day fow the Wabash; their avowed object is to enter lands on behalf of their tribe, and then to ascend the Wabash to its source, cross over with their boat to the Mi.mi, and return by the way of take Erie. This boat left Iome on the first of June, passed into lake Ontari, by way of Wood creek, Oneida lake and Oswego river, and after navigating the greater part of the south. ern coast of that lake, was conveyed round the falls of Niagara on wheels, eleven miles; then by the way of Butfalo, scross the end of lake Eirie to the mouth of Cataragus creek, and n p it to a portage of eight miles and an half across to the head waters of the Alleghany river. It arrived at this place, after pass. ing two portages amounting to nineteen and a half miles! During this time they were detained nearly len days by head winds and rains.

These descendants of the forest, now wearing the babiliments and appearance of civilization and industry, manifested in their deportment that ingenuousness and dignity of inind which have character ised, in many instances, the savage of the forest, improved in a considerable degree by the hand of civilization. While gratifying the curiosity of several of our citizens, by taking them on board, and with a gentle breeze, sailing a oonsiderable distance up and across the river, the following characteristic and rppropriate tonsis were given hy one of the Indians, accompanied by the firing of his gun :while on the Kentucky side, "The patriotisin and bravery of Kentucky," -while on the Ulio side"Free trade and no slavery"

\section*{President's Tour.}

The Salem Giaselle represents the president's entry into \(13 n s t o n\) as equalling in splendor "an ancient Ruman triumplı."

The president, during his stay at Newport, visited the hon. William Eillery, one of the four surviv. ing patriots of the revolution who signed the de. elaration of independence.
The bridge at Milton was fincifilly decorated with green branches-over it an arch with the inscription, "Welcome illustrious chief." Here a great ernwid of people received the presillent with acclamations, whilst the artillery amounced his apt proach, with a national salute.

At \(I, y n n\), afier being received with military ho.
nors, he was conducted to the hotel, whene many ladies and gentlemen, previons! ssmbl .l, were presented to him. As he lefi l:e l:0. 1, a very laree number of the inhabitants of hoth sexrs arti of all ages, drew up in two lines on the common, farning a lane extending from the hotel in the ilifetinghouse, through which, with his excelle:er :rovernor Brooks, and their respective swie, priccird by the committee of arrangements, he pised Ac lighted on foot, and then ascended his carrige an. I continued his journey.
Whilst at the hotel, the following atdress was read and then presented to the president hy the chairman of the committee, scompanied by a brief historical statement of the manufactures of the town.

May it please your excellency-The commitee appointed for that purpose respectfilly tender you the congratulations of the citizens of Lynn, upow your arrival at this ancient town.

It is with sentiments of patriotic pride and heartfelt pleasure that the in!abitants of Lymn enjov his opportunity of beholding among them the chief ma. gis rate of the union.
Elevated to your hig's and :innomable office by the suffrage of a free prople, in conformity with the princip!es of our excellent constitution, it is nul less the duty, than it is: he hanpy privilege of this people to pay their voluntarily respects to the man of their choice.

Whist under foreign governments, the people are oftentimes obliged by royll manlates, to pay reluctant honors to their rulers, \(i^{t}\) is the singular fortune of Americans that they are free to act for themselves, and that in paying honors to the men of their choice, they are to acknowledre no other mandate than thit of freedom.
Impressed by such cousiterations, the inhabitants of Lynn, known as a manufacturing pcople from the early settlement of the town, heartily congmatulate yout on the present peacefil and prosperous state of the country, and fondly indulge the linpe that the blessings of liberty will be preserved, and that the arts, commerce and manufacture of the nation will be fostered and protected by your administration recently commenced under circunstances so auspicious.

Wishing your excellency a long continuance of health and happiness, we have the homor to be, with sentiments of the bighest respect, your ohedient sorvants,
18. W TREVETTT,

\section*{Chairman of the canmittee.}

To which the president made an extemporaneotis reply to the following effect:
The kiad reception given me by the citizens of bynn, has my hearty thank9.

It affis ds the pleasure that they so justly appreciate the primeiples of our excellent ennstitition.

It will be my faithful endencors su 10 conduct my adminivtration, as to realize their expectations; anit the best reward of my exertions in the office lately conferred on me, will be the approbacion of my fol. low citizens.

At Sitrm he was received in great ntile, and wel. comed by the select men to that "alacient inwr," in company with gorernor Branks an I a aplendid es. eert, civil and military. Ammg the disting ished person ges who surmunded hini ierec the secretary of the navy, general Bearhorn, Willin t,rut esq. jutge Soory, generals Swift and Vimar, of the aro Iny, and llainbrilge and Perrs, of llar nary. Whata tre arrivel at the lines of Salem, lie lete hiv are. riage and proceeled on homseback with the caval. cade If fine arch wha throwit over tac berdgr, dress
ed will \(\mathrm{A}_{\mathrm{ag}}\). The streets were filled with people and the windows thronged with "females in a pleasing unifurm;" all was life and animation. At the hend of E.ssex street the caralcade stopped and the president dismountel and proceeded on fout in procession, urider a contirued salute of artillery, to the lodgings provided for biin. A thousand children, neatly dressed, formed a part of the line through whichi he passed. In f-ont of the house an address vas delivered, to which he returned a short extem. peraneous reply. After refreshments, he attended a military review, which was handsomely conductca. Returaing to his lodgings, he dined with many grests he lad invite!, and then visited the Town Hai!, which had beendecorated with great taste and splendor, with festouns of oak, connected with Lands of gold, \&c. by the ladies -500 of whom werc present, with whon he mix d in mutual delight, a band of music enlivening the scene. He was seated in a chair from MountVernon, marked with the name af Washingtons The room was embellishect with portriils of cissinguished claracters, and lighted tep by a thousind variegated lamps, which numerous mirrors reffected with grest effect. The ceremonies and amusements of the evening were concludel by a display of fire works.
On Wednesday the president visited the fort, and the Asylum for the Indigent; after which he partonk of a collation with a large party at Mr. Silsbee's, the representative in congress. He then visited Fort Pickering, the Museum of the Salem East India Murine Society, and the A thenæum, and called on B:njamin Pickman, jumr, esq. A large party dined with the president at the secretary of the navy's. After dinner the children from the Female Orphan Asy!um were presenited to him; and in the evening he honored with his presence a brilliant assembly at judge Story's.

Un tilurs lay the presilent proceeded to the seat of col. Thorndike, in Beverly, wiere he breakfasted, and a large number of ladies and gentlemen of the town were introduced to lim. On entering the town he was saluted by a discharge of art:llery. O. lis return he left his public quarters, and re moved to the hotise of the seceretiry. In the evening a 1 . rge and brilliant party visited him.
Among the ofter private families visited by the president during his stay in Salem, were those of captuin Stephen White, capt. Joseph Peabody, and Nathaniel. Bowditch, esq. the distinguished mathe matician.
"In th:e interview with the citizens of Salem (says the Register) the president engaged all liearts. The most brilliant circles were formed around him, and the rising generation received every token of his friendship with sure records on their hearts of that affection he displayed before them. The president, in the constant attention he paid to the importunate wishes of the citizens, discovered no syinptoun of fatigue, and gave no notice of the hours which were to limit our pleasures. The same cheerfulness, freedom, and presence of mind, appeared through all the services which each day required of him, and we were more reluctant at parting with him at the last hour, than we could have been at any one which precedel. When we see the entire face of sociery clanged, all hearts united in a lasting friendship, and sutisfaction every where proclaimed, we are astonished at an event, which our best hopes for human nature did not allow us to contemplate even for ages yet to come."

He passed Friday chiefly in a retired manner, attending to various matters of business. He left the sown the next mozning (July 12) ai 7 o'clock, being
taken leave of by the conmittee of arrangements in a very respectful mimuer, to whom he expresset thinself highly gratilied by the attentions that hall been shewia to nim. Besides the cavulry, he was escorted by a company of uruckmen, dressed in white frocks, who volunteeved their services on the occasion, in token of their respect for the chict malgistrate, and their respectful recollection of his visit. The scene was novel and produced a higlly agree:ble effect.
He arrived at Iporich, at \(90^{\prime}\) clock for bre:lsfast. Here, also, he wist rectived in form. The bridse was decorat d , and a band of music nenr i. play ed n .tional airs as ho passed. Hiving refres! ed himself, and received the visits of the people, escorted by a restiment of cavalry and great cavalcade of other citizens, he set out for Newheryport.
We are compelled to stop our journal for the present and suffer also several addresses and replies to lie over for ournext. At our iast account, the president having visited Portsmotith and Portland, was on his way to lake Champltiin.
The president's ansurver to the adiliress from the corporas tion of Harvard university.
Sur-1 an druply impressed with the distinguish. ed attention with which the president and fellows of Harvard Univervity have been pleased to honor me on my preseint visit. Nothing is more interestto my own mind, and nothing can be mose importallt to our common country, than the cultivation of science and liberal literature:-The principal sup. post of a free government is to be derived from the sotud morals and intelligence of the people; and the more extensive the means of educ:ition, the more confidently may we rely on the preservation of our public livertics. Whatever doubt may once have been entertained upon the subject of stability of a republican government, and of its capacity to promote the public interests, the progress of our own, must now have satisfiel the most sceptical mind, and awakened the strongest coaviction of its encrey and excellence.
The vencrabie university, over which you preside, lias long been a great ornament of our country. it seems exceedingly well adapted, in it o"ganization, to give the best instruction. It has nurtured in its bnsom many of those, who by their patriotism, their piety and their learning have couferred lasting benefits on mankind. Most sincerely do 1 wish that it may continue to be a public blessing, and, under the smiles of Providence increase in usefulness.
An institution, which endeavors wo rear Annerican youth in the pure love of truth and duty, and while it enlightens their minds by ingenuous and liberal studies, endesvors to waken a love of country, to sotten local prejudices, and to inoulcate christian faith and charity, cannot but acquire, as it deserves, the comfidence of the wise and good.
You do justice, therefore, to my feelings in believing, that such an institution must possess my highest regard, and that I shall always take a lively in. terest in its prosperity.

JAMES MONHOE.

\section*{To the Rev. presidemt Kerklund.}

Answer of the president of the United States to the address of the minority of the legislature of Mas. sachusetts, \&\&c.
To IIenry Deurborn, Benjumin Austin, Thomas Metrille, Willium Little, Russell Sturrgis, Juhn Brazer, Tacob Rhoades, and Mititimn Ingalls, Esquires.
I have received with great satisfaction the very friendiy welcome which jou have given me on the part of some of the membors of the legislature of

Massachusets, and of others, citizens of Boston, who had depu.ed you, to ofler ine their congratulations on my arrival in this metropolis.
Conscio 1 s of having exe:ted iny best faculties with unwearie: zeal, to support the rinhts and adrance the prosperity of \(m y\) fellos citizens, in the vain's impoitant tras's wiht which I have been honored by my country, the app:ubation which you have expressed at my coslduct, is very gratifying to mie.
It has been my underiating effort, in every situstion which I have been plised, to promote, to the utmost of my abilities, the success of our republican government. I have pursucd this policy, from a tho:ough conviction, that the prosperity of the whole Ainerican people, depended on the success of the experiment which they have been called to make. All impartial persons now bear testimo ny of the extraordinary blensings widh which we have been favored. Wiell satisfied 1 am , that these tlesvings are to be impuied to the excellence of our government, and to lie wisdom and purity with whinn it has been alministerch
Believing that there is not a section of our union nor a citiz n , who is no! \(i\) terested in the succes, of our gover ment, I indulge a strong hope, that th \(y\) will all unite in fu-ure, in the measures necessary to secure it. For thiss very important change, I con iled the circunstance of the present epoci peculiarly fivorable. Tae success and unesampled prosperity with which we have hitherto been bles sed, must have dispelled the doubis of all who had before honestly entertained any, of the puacticabili. ty of our system, and from these a firm athl inoiorat ble co-operation may fairly be expected. Our union has a!so icquired, of late, in:ch strength. The proufs which have been afforded, of the great alvantages communicated by it, to every part, and the ruin which would incvitably and promptly over. whelm, even the parts most favored, if it should be broken, seem to have carried conviction home to the bosums of the most unbelieving. On the means necessary to secure success, and to advance with in creased rapidity, the growth and prosperity of our comiry, there secms now to be but litlle, if aity, difference of upinion.

It is on these gromuds that I indtulge a strong hope and even entertain great confidence, hat our principal dangers ani. difficultues have passed, and that the character of our denberations, and the course of t,ie government itself, will become more harmo. niotis and happy than it has heretofore been.

Sotisfied as 1 sm , that the mion of the whole community, in s'upport of republican sivermment, by all wise ath proper incasures, will effecmally se. cure it from dinger, that union is an object to which I look with the utmost solicitude. I consider it iny duty to promute it, on the principles and for the purposes stated; and highly gratified shall 1 be, if it can be obtained. In frankly avowing this motive, lowe to the integrity of my views to state, that as the support of our republican governinent is my soie object, and in which I consider the whole community equally interested, my conduct will be invariably directed to that end. In secking to ac complish so great an ubject, I shall be careful to avoid such measures as may by any possibility sacrifice it.
J. MIES MONROE.

Answer of the president to the address of the Cincinnati.
To his excellency governor Brooks, presadent of the Cincinnats of Alasenctiueste.
SIR - The aticstignatp addrese of wy krothers of

The Cincinnati, awakens in my mind the mosi grateful emotions. No approbation can be more dear to me, than that of those with whom I have had the honor to share the common toils and perils of the war of our inlependence. We were embarked in the same sacred cause of liberty, and we have lived to enjoy the reward of onr cominna labars. Menr of our compar ions in arms fell in the field before otur independence was achieved, and many, less fom thate than ourselves, lived not to witness the perfect fulfilment of their hopes in the prosperity and happiness of our country. You do but jartice lo yourscives in claiming the confidence of mur cumitry, that you call never desert the stanlard of frechom. Youl fisught to obtain it, in times when man's hearts and principles were severely tried; and your piblic sacrifi-es and honorable actions are the best pledticto of your sincere and devoted sttachment to our cxcellent constitution. May your children never for. get the sacreal duties devolved on then, to prevertic the inheritance so gallantly aequired by their f.ther:. May they cultirate the same manly patsiv: is \(n\). the \(\sin\) lisinteres ed friendship, and lue s?ne political intervi:y, which has distinguished !ort, and that unite in perpetuating that social corcord and public virtue on which the firture prosperi.y of oul country must so essentially depend. I feel most deeply the truth of the melancholy suggestion, that we shal! probably meet no more.- While, howerer, we remain in lifé, 1 shall continue to hope for jour comintenance and support so far as my public con. duct may entitle me to your colfidence; and i. bidding you farewell, I pray a kind Privilence bong to preserve jour valuable lives for the homn arto benefit of our country.

JAMES MONTOR:T

London, yune 5. We have received the Paris papers to the \(2 d\) inst. They contain no domestic news of ally interest. Spain, in her difficulties, has had recourse to a new systen of finance, which is well calculated to prodrice a "evolution. It corsists of the seizure of ecclesiastical property, and a reduction of benefices to such a point, that an income of 20,000 reals (about 2901.) will be their maximum. The next is a property tax; and the third, which is meanit to gratify the populace, and array them argainst the other classes, is the abolition of customhouses in the interior, or what we should call excise offices.
Amusements are suspended and prayers offering up, in consequence of the approaching accouchemenk. of the queen!

\section*{wirtemberg.}

Stutgard, May 15.- Prince Paul of Wirtemburg has addressed a letter to the privy council of the king, dated Hanau, 24th April 1817.
"Governments (says the prince) like individuals ought to be instructed by the experience of the age, when that of their ancestors is lost upon them. After three ages of existence the constitution of the hereditary states had been overturned by force; and after ten years of inquietude its place was sup;
plied by a constitntion which gives security to no rights, and least of all, to the ancient rights of the country. Cusioms and oaths !ave been alike violated every thing has been sacriticed to the interest of the monient. The forn er government, in ? ?e cource of \(i\) 's regrocistious ha l recognized the rights of the people; bist the present gorernment laas taken a position that diapenses with that re(1)ghi ion. I: will find, however, from the opposiion of the states, that this must be eventually impracticable, and that the ancient constitutional righ's form the only anchor upon wlich the confidence of the people repnses. A cons itution which is founded upon the interest of the government - lone cannot pos*ibly have any guarantee for is existence If, after the adoption of the constitu. tinnal act, differences arise between the states and the govermment, the government being always the interpetes of its own work, will it. not be at the \(s\) me time both t!a judge and party? Who are thes t!at lisve advised this work? S'rangers;-men who have no interest in the welfare of the country or of the royal family-men whose heads are filled with the vain theories of clesputism, which have been alopied and even pablicly announeed without having beon communicated to the presumptive hem of the cr wh. To a constitution so framed and su adop'en, I must inevitably refuse my consent; atid I declare as the first of the male line, I necver will recognize any other consitmion save that which, !:a! h have been fieely and lesra!ly agreed to by the assembly of the stiates.

If, however, the independence and liberty of the states do sont, in giving its consent to the constitulion, experience any of the shackels which it has beers sougl:t to improse upon them; if the states, in SHal:ant eing the princip)! e of right from whence it set out in the commencemelit of its negociations, agree with the government upon the constitution, I sl all where to it on my part, because individual rights ought to gicld to the public good.

A copy of this letter will be despatched to the assembly of the states, in order that they may know the dispositions of the undersigned.

\section*{Hrince PAUL, of Wirtemburg.}

To this letter, the privy council of the king replied in substance as fullows:
"Shutgard, May 20.-The letter of your royal highness relative to the new project of the constifution, contains accusations of so serious a nature, as well against the late king as against the present governinent, that we regard an answer to thatletter as s great sacritice, which we make to the explers co:nmand of his majesty the reigning king." 'I!'se reply then proceeds to state, with re. g.urd to the chalgre of the recognition of the rights of the people having been dispensed with, that the priveiple was exp:essly recognized und acted up. on ly the king when lie laid clown as a basis for the new constitution, not only the work commenced by lis late father, but also all the part's ot the antcient constiluti u which wresestill applicable. The rights and liberties of the states were not it says in any degree compromised by the manner in which that assenbly acceped the constitution. The re. ply concludes with observing, that the rouncil dis not expect a renewsl of that species of interfrence which had been formerly exercised by members of the royal family, under the dile of cotirst of the male line" and of "heirs presmmplive," nud whici teuded so frequently (o) produce dissentions be freer. the king and siates. The present king , declares will not suffer an interference so injurious
to the righis of the crown, and the relation betweesi the members and the head of the royal family, will in future be regulated in a more precise manner.
netherlasis.
It is said that regulations have been aropted in the Netherlands to prevent emigrations from Germany to America. Its object uppears only to be to prevent them from becoming chargeable on the peuple.

The Journal of Ghent states a report, that the concordat is happily concluded between his majesty the king, and his holiness the pope.

Magnificent monuments of ancient splendor still continue in be discovered in searching the ruins of Pompeii. Behind the temple which was lately noliced, a public building has bern found, built at riglit angles, 260 Xeapulitan palms long, and 120 broad, and starrounaled in the interior by a portico of 50 columans. It is urnamented with beautiful paintings, some of which are very valuable; as, among olliers, one which represuls a warrior precipitated from a car drawn by a fiery horses. The paveinent is a Mosaic, formed in pari of small white and colored stones, and in a part, of large slabs of marble of various colors. Several inscriptions have becu traced, that ascertained the use of this inomument. Oue of them indicates that the right luminum abatruendorum, (a right established by the Roman bavs preventing, in certain cases, neighboring proniclors from having lights or pruspects over the -nutigunus estates) harl been purchased at the price ) several thousand senterces. 'This discovery has shorded new riches to sctilpture-several statues five been found. I Veuur, five palins ligh, and a flermubhrodife may be placed among the finest spe-
cimens of the Greek chissel that have come down to us. Several dis:inguished :urtists think that in this Venus they have discovered one worthy to dispute preeminence with the Fenus de .Medicis. This opinion, insp:red perhaps by the pleasure of discovery, may be before long discussed, as these preci. ous inoniments of sculpure are to be transported to the Musse Bourbon. In the same place lave been found two arms of bronze, adorned with bracezets. The Cinevalier Ardite, who directs the search, hopes to be enabled in a short time, to expose the whole extent of l'ompeii, which will probably be a unine fruitiod in objects of the fine arts-French paft. The other Tunisian cursair that lad been in the British channel, was captured. But both of them, after being conducted out of the narrove seas, were veleased. It is British lazo that ships of war shull not bozer on their coasts. It is calculated to excite interesting reffections that they themscives have not observed this rule to others.

A Tunisian cruiser was near Corunna on the 9th of Ming. 'Two vessels had been seen on fire off' there. WEST INDIES.
The grand powder ingazine, at Portau Prince, was strack with lishtning on the 19th of June, and blew up-it contained \(108,000 \mathrm{lhs}\) of powder, which of course did great damage. And on the 27 th , an officer in a tit of intoxication and anger, blew up the magazine at Fort Bisseton [Port au Printe] which contained \(28,000 \mathrm{lbs}\) powder. In this last the otlizer was the only person killed. Nore than half the louses in Port au Prince require nev roofs.
law-case.-Jumuica, Iune 13-Soon after the arsival at this port of the Venezulian government schr. Candor, capt. Philipe Eistevez, a repleven was issued :granst her ly the afgents of her original owners, who were Spanitr subjects residing in the Havana, and from whom she was captured by the Independents; a motion having been made in the grand court to discontinue the repleven, it came on to be argued on Saturday last:

The court considered this matter in three points of view-

1st, How far they cauld permit the plaintiffs to proceed, in a British court of justice, for the reco very and to settle the ownership of a vessel, which, by iheir own confession, was, at the moment it was seized by the Venezulians, engaged in a traffic which ir directly in the tecth of the abolition acts of Great Britain.

2d, Whe Uler the court wiy permit itself to be calied upon to decide a great political question, between Great Britain and the subjects of another country, in a state of civil war among themselves, when the lbritish government itself is maintaining the most marked neutrality towards both the contending parties.

Sd, Whether the Candor, coming in a public cha. racter from Venezuela, not orily with despatches for the admiral on this station, but with despatches to be forwarded from him to our government at home, which might be of the utmost importance to the mother country, was not entitled rather to the protection of the court than to be considered as subject to be detained by its process, and that particularly at the instance of the subjects of Spain.
The court, without deciding on the first point,
and saying they could not meddle with the secont, determined that the Candor came in a character Which entitled lier, by the laws of nations, to protection from civil process, and consequen!ly that this repleven was improperly brought: The court, therefore, decided the repleven to be iliscontinued, and the vessel to be given to the defeminnt in the same state as when the repleven was executed.

\section*{hitish america.}

Hulifax:, July 2.- The following circular letter, published by order of his excellency the lieutensnigovemor, has been addressed to the several collectors of his majesty's customs, as well as to the several collectors of light duties at the different po:ts in this province:
(cincelan.)
Secretury's Office, Hitifux, June 24, 1517.
Rear-admiral sir David Milne having communicated to his excellency the lieutenant governor, that the American government had decimed to recede to the propositions which have been made to them by his majesty's goveriment, for the propose of end cavoring to frame some arrangement, by which the citizens of the United States of America might be pernitted to a participation of the fisheries within the limits of the British jurisdiction, I lave it in command from his excellency the licut. governor, to apprise you, that American fishermen are not permitted to frequent the harbors, bays or creeks, of this province, unless clriven into thein by actual distress; and I have to desire that you, on no account, ask or receive any light inoney, anchorage, or any other fees whatsoever, from vessels belonging to American subjects.

1 have the lionor to be, sir, your most obedient servant,

Reprat 1) Gionge, secretary.

county, Geo. are abantoning their homes for fear of the Indians. The neglect to establith a military post on that frontier is lomelly complained of The Semisole I dians are remarkable for their ferocity

Geveral Jucrsoy The life of His distinguished officer is publis' ed. We have not yet seen the work; but a Vinginia paperno icing it, says-"there is one circumstance mentioned, of which we do not recollect previonsly to have seen any notice; on the propriety or consti utionality of which the reader will make his own comments Jackson had heard that the legislature of Louisiana, then in session at New-Orieans, meditated the offer of a caditulation with the Britis!. He ordered rovernor Claiborne, should such a determination be manifested, immediately to "a"rest the members and hold them subject to his further orters :" and the governor; in consequence, placed an armed force at the door of the ripitol, and prevented the members from meet ing."

The Oizo. The depth of water, opposite Cincin. nati, in the Otio, was abo'it fifiy fuet, on the 30 th of June. The river was higher then than it bad been known for years so late in the season.
o The establishment of a powerful company to prosecute the fir trade to the "White Capped Mountains, and along Jefferson's, Mulison's, and Gallatin's rivers," is strongly recummender in a St. Louis paper. It would prob: his be a proficable speculation, and of considerable political impo:tance.

A remarkable circunsturice !appened on the 30 th ult. on the Genesee river, about ten miles from this place. A part of the lan I upon the north bank has fallen into and across the river so as completely to change the course of the stream, which was at this place about eigity yards wide. The laml an the south side of the river was level for some sistancr; on the north there rose a very high and steep hill, conmencing about 20 or 30 leet fiom the edgre of the bank. Along the inter:nediate space a road pissed, the level of which was not more than six or eight feet above that of the water. I I the afiernoon of the day above mentioned about half an acre of the bank fell into the river. About half past ten n'ciock at night the people in the neishborhond were suddenly alarmed by a tremendous noise from the hill, accomparicat by a jarring of the houses. Upon going iminediately out they discovered huge masses of the mountam tumbling from above into the riv \(r, \sim n \cdot l\) dahing tie wa'er's to a great height. Aboun 15 acres of the surface is supposed to lave fallen. The cavity left in the hill is of a circular form, the b.ck part of which presents a precipice nearly perpendicular of about 150 feet in height. Several of the trees which stood on the side of the mountain yet remain in an erect posture, having been carried down in that position on masses of the earth; the tops of others are buried in the ruins, while their roots are raised into the air. The current of the river being completely obstructed, it has risell above the opposite bank, and is now forming a new channel for a considerable distance.
[Gen. F'armer.
TO THE PEOPLE OF THE UNITED STATES
The board of managers of the American Colonization Society being about to enter upon the prosecu tion of the great object of the institution, ber le we to address their countrymen upon this important subj ct.

The first duty to be performed is to obtain un guestionable information upon several most essential
puints, which will not only enable the society to pursue it's future measures with certainty, but may also justify the government in affording it's co. operation in a way most conducive to the success of the object in view.-To effect this we have perceived the necessity of ebgaging a competent person to visit the settlement of Sierra Leone and other ports of the continent of Africa, and probably also to spend some time in Eingland.

For these and other purposes, it becomes immediately necessary that the sociefy should call upon it's friends and ascertain what extent of funds may be expected.

The board do not think it necessary to comment upon the many and obvious benefits that may result from the labors they are engaged in.

The love of our own couniry, and benevolence to the cause of our suffering fellow men, conspire to offer the most persuasive motives. To these are in be added the far higher and more animating inducements of being the instruments of a gracious Providence in dispensing the light of Christian hope and joy over a benighted and important portion of the earth.
The board therefore call with confidence upon their countrymen and fellow Christians for that liberal aid to their designs, in reliance upon which this association was formed.

\section*{BLSH. W.ASHINGTON, Pres't.}

\section*{Important Law Intelligence.}

We have been furnished with a copy of the opinion delivered by judge Livingston, at the late circuit court of the United States, held in this city, in the case of - ddams and Adams vs. Slorey, by which the following important points are decided:
I. That the act of the legislature of this state of the 3 rd of A pril, 1811, is an insolvent, and not a bankrup stans.
II. That if a bankrupt law, it would not be void, the several states having a right to pass such laws, notwithstanding the power granted to the gencral govermment of establishing an uniforms system of bankruptey.
III. That insolvent laws, although they may affect pre-existing debts, are not ławs "impuiring the obligation of contracts," within the ineaning of the constitutign.
IV. That a discharge under the insolvent law of the 3rd of April, 1811, of a person residing within this state, may be pleaded to an action brought by a citizen of Massachusetts, al. though the debt was contracted in Boston, and payable there.
The opinion delivered on these points follows:
Cincuit Count op tie Uniten Statesfoh the distriet of New Yofk.
Benjamin . Idams and C'aleb Adlams versins
Augustus Storey.
R. H. Sedgrwick, of counsel for plaintiffs.

Fay and Einnet, of counsel for defendant.
Mr. Justice Livingesten. This is an action brought on several promissory notes made or in. dorsed by the defendant, then residing in Boston, to the plaintiffs, who were then and are yet residents of the same place. The notes are also made payable in Boston, and were dated prior to the pas. sing of the insolvent law hereinafter mentioned.
The defendant pleaded the general issue, and on the trial offered in evillence, pursuant io a notice given for that purpose, a discharge by the recorder of the city of New-York, dated the 13th Nov. 1811,

Which Was granted in virtue of an act of the legis. latur of the siat oi New-Yo.k, entitled "An act the the beneft of itso!vent debtors and their crediturn," fusei the ord of I Aprii of the same yeur.

To tie realing of illis disclaurge, the plaintifts sbjecied-but it vassamited. A verilict, howe. ref, was laken by consent for the plriniiff, subject on the opi-...in of the court o: a case to be made by the protis. If the disch trge was impmoperty aimitted, jurgment is to be entered on ilie verAict is it now stands-but if the discharge shall be thonght a good bar to the action, the present wrdict is 10 be set asirle, amila verdict and juig. ment thereon entr-red for the defendant. The de. fendant, at the time of obtaining his discharge, te anlel and yet resides in the city of New-York.

Few questions have ever been agritated, in any court of the United States, since the formation of the federal government, of more extensive consequence, or of inore delicacy than those which are now io be decided. When the binding force of an uct of the legislature of any state is drawn into - luestion for its supposcil repugnancy to she fede. it co is itution, althongh no court can enterıain any dinds of its right to pronounce it invalnd, yet it is no) more than becoming \(t 0\) proceed with caution, aud with more than orlinary deliberation. Pre. sumptions will ever exist in fivor of the law, for it will not readily be suppused that any state legislature, who are as much buund by the constitution, and are uuder the same solemn sanctions as the judges of those courts, to regard it, lave cither mistaken its meaning, or knowingly transcended their own powers. If, then, by any fair and reasonable interpretation, where the case is as at all doubiful, the law can be reconciled with the constitution, it oughit to be done, and a ountrury course pursued only, where the incompatibility is so great as to render it extremely disincult to give the latter effect, without violating sume provisiun of the former.

The plairiill's counsel in support of the verdict, say, that the discharge which was given in evidence can be mo bar to the action. They cuntend,

1st. Thist the the staiute of New. York, under which it was obtained, is a binkrupt law, and as such is void for its repugnancy to the constitution of the United States; and this powition is supported by the broad assertion that every law which dis cliarges the person and property, as well future, as in pusession of the debtor, is a bankrupt law. But to this ditinition the court doos not assent, for this would be to confoumi at ouce almost all the distinctions between thesc laws, which have been known and recognized in Eingland, from which country we borruw the temn, froul the first introduction of the systern there, in the reif.f of Henry the eighth, down to the present time: distinctions which must have been tamisar to matly of the mombers of the convention that made the constifution. It is hut becallse the e laws may, in some respects, produce the sanie eflects, that they ure not to be distin. guithed from each other. Lis England the bankrupt ayston has been eonfined exclusively to'raders wn! erelitors of trader; whereas the insolvent laws of thus country cimbrace every class of debtors. It is if no imputtunce whether the detot lias been contracied in the way of trade or not, fior a person in come within the parview of an in olvent hw. So es. clisively have bankrupt laws oprated on traikrs, that it may well be doubted whether an act of con gres st jecting to such a law every description of berons within the Unitad Sintes, would comport with the splrit of the powers vested in them in relation to this subject. Hut it is not only in the per.
sons, who are the objects of these laws, that a difference exists, but their keneral and most important provisions are essentially dissimilar Under a bankrupt law, the debtor is at once by operation of law, as soon as he has committed an act of bankruptcy, divested of all his property, which is transferred to assignees in trust for his creditors. All dispositions by the bankript himself after this are void-an insolvent, on the contrary, retains the management of his own estate, however he may misbehare towards his creilicors at large, and it is rarely, uvless on his own application, vested in others. It is of no importance how many acts he may commis, which under a bankrupt system would enable his creditors to take from him the control of his pruperty, they can seldom act upon him compulsively under the provisions of an insolvent law, if he be obstinate or dishonest, until he has given what preference be thinks proper, and is become so poor as to be scarcely worth pursuing. Under the one system the creditors are actors, and under the other the debtor himself originates the proceedings; and if, as is sometines the case, his creditors may do it, even then lis consent is generally indispensable under the provisions of an insolvent system. Other differences, in almost every stage of proceeding, might easily be pointed out, but they are so familiar to the profession, that a bare inspection of the act under which this discharge was obtained, will leave no doubt on the mind of any one to which class it belongs. "The title proclains it to be an act for the benefit of insolvent dehtors, and their creditors." The first section gives power to the insolvent him. self, who is imprisoned on any civil process issuing under the authority of this state, to present the petition to a proper officer, praying that his estatc may be assigned and he discharged from his debts. The residue of the act is principally made up of directions as to the proceedings which are to be observed afier the presenting of such petition, until the final discharge of the debtor, all of which dif. fer greatly from the proceedings which take place on the issiing of a coinmission of bankruptcy. The fourth section declares that such "discharge sball extend to all debts due from linn at the timie of the assignment, or contracted for before that time, though payabie afterwards." If this be not an in. solvent liw, the coutrt is at a loss to say to what act His appellation can apply.
the opinion which lus been expressed on this point would seem to prechude tlie necessity of enquiring how far this law interferes with the authority givell tu congress to "establish uniform laws on the subject of baukruptcies"-but, as the view which has been laken of the act of this state may be thunght incorrect, the court has no objection to consiler it, as though it were a bankrupt law.

The power to pass laws of this character, it is sail, is exclusively vested in congress, and whether they en reise it or not, no state can have a bankrupt law of its own. As a consulidation of the different si.utes into one national sovereiguty was neither ef. fecterl, nor iniended to be eflected by the constitu. tiun, it has always been conceded that the state goveruments relained sumuch of the power, which they before had, as was nut lyy that instrunient ex. clusively delegaical to the Luited Siztes. It is now indeed one of the amendments to the constitution. that the powers not granted to the Uni ed States by the constilution, nor prohibited by it to llie states, are reserved to the ataiks renpectively or to the people. It is agrced. that suchexclusive alienation of state sovtr gnty call onig exist in three caseswhere, by its terms, it is so-ur where a power is cun.
ferred on the federal government, and the states are prolibited foom exercising a similar auth rity -or where ak authority is gr..nl cd to the former, in whic! the exercise of a like powe: on the part nf the different states would be ahsolutely and total Iy contradiciory and ve pugnant. It is not preteid ed that the grant of the pawer under consideration is exclusive in its terms-or that there is an express prohibition on the states from exercising a like anthority-but it is supposed that such exer cise wou!d he so totally inccusistent with the one granted in the guvermment of the union, as to be recess.arily corrprehended in the third class of ex clusive delegation. If it be really so, chat the pas sing of a barkropt law by a state, to operate, as it necessarily must, within its own linits, be absolute ly incompatible with the power vested an congress, it would be conceded at once, that such an act would amount to a violation of the constitution of the United State3 and be void. Let us see whethes the consel have succeeded in establishing this po. sition.

It must be allowed by all, that at the time of making the constitution, each state had a right to pass insolvent and bankrupt laws. As it was clesirbhie, in a country so extensive as the United States, and every part of which was more or less commercial, that the laws relating to bankrupis shou!d be uniform, so also it was an object of great importance that none of the larger commercial states should at any time be without some code on this subject. A system of the first kind, that is one which should be uniform throughout the union, could not well be brought about but by delegating the power of rendering it so to congress. Great dificulties however would lay in the way of a sta. tute, whose provisions should pervade the United States; and as these must have been forescen, the states might be willing and desirous of retaining the right of passing laws of this nature until congress could agree on a general plan. Nor can the cont perceive any contradiction, absurdity or repugnancy in these several powers existing at the same time in the general and in the state govern-ments-in such subordination however, that the exercise of the authority vested in the former should, for the time, suspend all exercise of the power which resided in the latier, and operate as a repeal of any laws which might bave been previousiy passed by the several states. It is an umi. form rule which congress are to preveribe. But if they furnish nake, how is it an interference for each state io legislate for itself? Neither the terms ror spirit of the instrument are thus disturbed. I seens designed!y to have been left optional with the "entral government to exercise this power, that if the embarrassments which lay in the way were insurmountable or very great, they might omit to do it, and thus leave the states to take care of thearselves. If it had been iatended immediately to divest the states of all power on this subjeci, and to compel congress to act, the terms of the articles would have been much more imperative \(t\) ':. n we find them, and probably it would have been accompanied with a prohibition on the states. No writer on this part of the constitution has gone farther than to say that the power of naturalization is exclusive-because if congress have a right to ordain a general rule, the states can have no right to prescribe a distiact rule. This construction is sup. posed to follow, not from any inconsistancy there would be in each state passing a maturalization act for itgelf, if congress did not bring into action the power delegated to them, but from the inconve-
:ience to which it might subject some of the staies, hy imposing upon them as citizens, obnoxious forigners, who might become naturalized in another staie, without any prcvious residence, or without any regard to character, by the mere formality of taking anl oath of allegiance.
If the argument ab inconverienti applics to the casc of naturalization, it has no bearing on that of bankinpley; fo:, in this case, each state would be lerislating principally for its own citizens, and o lier states could not he injured by any system it might adopt. But this cons:ruction, even in the case of naturalization, where the argument in favor of an exclusive power is much stronger than in that of bankrupicy, has not only been strongly controverted, but is opposed by a judicial decision entitlad to lio litcle respect It is the case of Collet rid Collet, in the circuit conrt of Yennsylvania, in which the three judgres, one of whom hall been a member of the federal convention, deciled, after whlemn argument, that the federal states still enjoy
i. cancurrent right with congress on this subject, 'iwhich, however, cannnot, they say, be exercised so as to contravene any rule which congress, in their wisdom, may establish." The most strenuous. advocates for the exclusive exercise of every unqualified power granted to the general govemuent, seem not unwilling to admit the se veral staies a participation of such power, if it can be exerted consistently with, or without derogating from the express grant to congress. It has not been shown how a bankrupt act, passed by a particular state, can interfere with the exercise of a power residing elsewhere, 10 promulgate a uniform law for all the states. If similar powers had been granted to the governmenc of the union, respectiug the descent of real estates, the recording of deeds or the celebration of marriages-will it be said that the several states must have remained without any laws to govern the transmission of landed property, or that no deed could be acknowledged or recorded, nor a valid marriage solenmized, although congress might for years omit to prescribe rules on these sub. jects? The object of this grant could have beenno other than to place some where a power to correct the mischiefs which might arise from the different states passing on the same subject, not only dissimilar laws, but such as might be unequal in their opera ion on the citizens of other states. This end of the grant will he sufficiently and eflectually attained if, when the evil arises, congress bring in. to action the authority vested in them. From them only can a uniform system emanate; but systems, greatly varying it is true, all of which, however, may be salutury, may be established without any derogation from or interference with a right residing elsewhere to introduce uxiformity on the same subject. Nay, foom these very provisious, however discordant, might be selected materials for the one which it was committed to the general government to form. Neither can the passing of such laws by the states be regurded as a resumpion of power by them, in which case, it is said, they should produce an express grant of it . This argument proceeds on the p"esumption of a previous relinquishment on the part of the states of all right to interfere in this matter, and is thus taking for granted what is the wholequestion in controversy; for unless such transfer las been made, which is not admitted, no reassignnient of it by the generad goverminent can be necesiary. No court of the \(U\). Sates will be suspected of feeinis any dis oosition to commenance ercroachments by the state legislature on the legitimate authority of the governinent
of the Union: but in cases of doubt, and where the limits of separation are not very distinctly marked, and especi:illy where the powers exercised leave in full force and unimpaired throse given to the general government, the trançulity and harmony of the Union will be better prescrivel by allowing to the stutes a reasonable share of legislation on the subjert in dispute, than by strenuously insisting on a total exclusion. Congress, themselves, must have enter. tained 211 opinion that the different states have this right in the present case; for on no other principle can we acco:nt for their lewving the United States so long without a uniform system of bankrupicy. Gireat and pressiag as the call for such a system has been, the obstucl-s in the way of one that shall be uniform, and in that shape agreeable to all the states, continue to be so numerous, that but ditule hope is now indulged that any will be soon astopied-but great and serious as these dificulties may be, is would shant be the duty of congreas to disregard them, if there existed in where else a puwer to correct the mischiefs which must necessorily be teli in many of the states from the now-usel of this atithority. The inference whith has been drawn at the bar from this silence or inaction of congress does not appear correct. I is considered as equivalent :o an expression on their part of their sense against the wistlon and policy of all bankrupt laws, and that none ought to exist any where. Keeping in view the power which congress have, on this subject, it is more natural to interpret such silence into a declaration of their opinion of the inexpediency at present of any uniform rystem, and that the sever:H states still retain the power which has been contended for, and can therefore take care of themsclves. This would not be so great an imputation on their wisdom, as in suppose lhey call entertain an opinion in opposition to the sense of the whole world, that in a commercial state, such laws are mischievous or unnecessary. The opinion of the court, therefore, is, that this law, if a bankrupt law, would not on that account be foid.

Another enastitutional objection is made to the defence which is set up in this canse. The law under which this discharge was obtained, having pased subsequent to the date of the notes on which the action is brought, is supposed to "impair she obligation of contracts," and therefore to be void, either in the whole, or ao far as it may extend to debis incurred previous to the passage of it.

There is not perliaps in the constitution any article of more ambignons import, or which has oclasioned and will emntinue to uccasion more discustion and disagreement, than the one under which the present ditficulty arises, or the application of which to the cases which occur, will be atteuded with more perplexity and embarrassment. laws may be passed w'uich so palpably trespass on this article as to leave no doubt on the mind of any man; others again will be of no guestionable a character as in render it not very casy to form a satisfactory opinion concerning them. All the other restraints on the separate meabers of the confsderacy contuined ilt this section of the constitution are conceived in terms so clear and intedligible, that rarely wall any hesitation exist as to what will amount to violutions of them; but in decide whe ther a law impairs the obligation of a contract will generally be a task of some intricacy, and it will not be surprising if, in the disclarge of ion \(^{\circ}\), great diversity of opinion will arise. This hal been treatell as a very plain case by both parties. By
of a lave impairing the obiigation of contracts that can well be imagined-while the defenilant contends that it is quite as certain that insolvent laws were never intended to be embraced by this provision of the constitution. The later is the opinion of the court; but instead of regarciing it, witit the defendan's counsel, as a question of little or no difficulty, the court has not come to this conc'usion, but, after much hesitatiou, owing not only to its intrinsic difficilly, but because it is nell kiown that the mont respectable upiniona to the contrary have been expressed elsewhere, the court will proceed to assign its reasons for the juch grment which it has formed.
To areive at the true meaning of any article of doubiful import in the constitution, a belter mode cannot be adopted than the course which is generally purs:ed tor the interpretation and understandi: es of ordian'y remedial statntes: That is, to recur to the situation and history of the country at the time; to its contemporaneous exposition, if it has receiveci any; and to the general understandine of the co nmunity, especially if such understanding shall lave bcenlong acquiesced in by all the states and all the courts of the union. Keeping in view these rules, let us inquire what were the kind of laws to which this prohibition was principally designed to extenil. There can be no doubt that by it was intended to be corrected some, if not all, of the evils which had crept into the system of legislation of many of the states, and had excited a considerable aların for the security of private rights. In many parts of the tanion all confitence in public faith was excinguished. This laad been occasioned by frequent interferences on the part of some of the legislatures in matters which were not believed to full within their ordinary and legitimate sphere of action. By recurring to the history of the times, and the reasous assigned by the frients of the constitution fur the insertion of this article, much useful information will be ob,aines? and we shall be at no loss in discover to what species of haws it was then thought that the interdiction was principally suppoied in extemal.Duriag a long and arduous struggle for independance, much individual misery and disiress were unavoidably produced. Driven from their homes, and cut off in many cases from their ordinary pur. suits, the resources of many were either exhansted or so much impaired as to induce the legislator on various occasions to listen to the pressing calls which were made uport them to devise some mode for their relief. Yarions expedients were accordingly resort ed to, and the practice of interferiug hetween creditor and debtor became so very extensive and so inconsidcrate, as in many instances to place the forme entirely at the r. -rcy of the latier, and thint too under laws which were apparently introduced with no other view than that of affording to the debtor a temporary relinf from the pressure occos oated by the then simation of the country. Bills of eredit, and paper moncy were insucd, and hy legislativa anction were substitused fire gild and silver in the discharge of drbs. Credions in some piaces were liabie, without anty ardvertic procce ling on their part. In be cited hy tieir lebiors, and to liave the sums dae to them toudered in a currescy whose deprecia. tion at the time product Ite riost "laring injus. fice. On their refueal in submit to this mockery of justice, the publac securities, wheh had been thas aflered, sif ha be deposied with some pablic ofticer, and the crediton wat torever barred from any recovers. In othes caecs payments were anthoriz. to be made by ir tatments. In same stares the in-
terest which had accrued during the war or a part of it was remitted, while elsewhere not only a paper currency of no value, but almost every species of property, was made a legal tender, and no stipulatimon ho vever solemn, to pay in the precious metals, afforded any security to the creditor. The courts of justice in many of the states had been closed al together, and the creditors thus withheld, at least for a time, from every appeal to the liws of his co'mtry, while his debtor might be squandering the property out of w'ich his demand ourhit to have been satiified. Geographical limits had alsu been resorted to, for the purpose of introducing the inost udious discriminations between creditors themselves. For those who resided within the Reitish line, and those who were without those precincts, distinct remedies were prescribed, and the scales of justice so unequally gralluated, that while the batter might recover the whole of their dennands, the former, if they sued, where commpelled to receive public certificates of one description or other, of so litule value as scarcely to indemnify them for the costs of suit which they were ohliged to payVery preat liberties had also been taken with British creditors, many of whom complained, and too justly, of the impediments which continued to be thrown in their way even after the return of peace. These frequent interpositions, in privaie concerns, during a period of great public and private suffering, and for many of which the condition of the country and the great object at stake, might seem to offer some apology; became so commion, so intolerable, and so inveterate, in many places, that it became no tasy matier, even afier the resturation of peace and the acquisition of our independance, to lay them aside. There will therefore be in the statute-books of several of the states, after the termination of the war, many provisions of the same meddling and obnoxious character, which either changed the nature of con'racts, or suspended the payment of them, or authorized it in a way contrary to the plain engage ment and meaning of the parties.
By lavs of this description, which had become too dangerous and nppressive to be any longer borne, very extensive and great uneasiness was produced, and against them was raised a corresponding and almost universal exprersion of indignation and regret. Accordingly to all the objections made against the prolibition on the part of the states, to pass laws impairing the obligation of contracts, we find the friends of the constitution every where, and again and again urging the necessity of it, in order to put an end to the evils which hatl flown from acls of the kind which have been mentioned, and which had, after the rovolution, been extended by designing and influential men, to many other eases so as to encrense, instead of diminishing the alarm which had been excited. To such ac's we find them constantly ascribing the dec:ty of commerce, the ruin of public credit, and the almost entire extinction of comifidence between mondividuals, and pressing with veliemence the aduption of this article as one of vital importance, and as the only guard and preventive against the promulgation by fut:ure legislatures of similar acts in derogation of private rights, however great the eniergency might be deemed.-But on no one occasion do we hear of any complaints against the power of passing insolvent laws; this practice had not arisen out of the calamities of war; it was brought with the first American colonists from the mother collutry; it was adopted, in one furm or other, by all the British colonies in North Americs, without an ex ception that has been discovered as to any one
which now composes a part of the United States. It must have originated wherever we find tice practice of it, and perliaps it is not hazar ling tow much to say that it is universal, not only from a conviction that the encorragement of trade required it, and so are the recitals to many of the acts; but, from those indelible principles, which are implant ed in the breast of every man, and which proclain, in a language not to be misunderstood, that ill every country, where imprisonment for debt is allowed, there must and ought to reside a power somewhere, of compelling creditors to abandon their hold of the borly of a debtor, whon shall fairly and under such restrictions as the law may provide make a complete surrender of his proferty, to be divided arnongst those whose debts some unexpected turn of fortune has renclered him unable to pay. In such cases, his future acquisitions, although here there may exist some diversity of opinion, should also be his own, or he will be restored to lis freedon and fannily, not oully willont property, but without credit, and in many c.ises with such a heavy load of unextinguished debt and so many liens on but future acquisitions as must stifle every exertion to make any. His freedom, in such cases, will be a mockery, nor will such a state of servitude to his creditors often prove of any service to them; for. si: king under a burden from which he sees no pros? pect of relieving himself, his anbition and eflorts will be limited to the gaining of a bare maintenance for himself and family, knowing that neither he nor they can ever be benefitted by any surplus. But Whatever considerations may have first called into practice a power of this kind, it is sufficient for our present purpose, that we find it in use in perhapps every state of the union, under some modification or other, at the time of the adoption of the constitution, and that the laws passed on this subject very generally, if not universally, provided not only for fiture cases of insolvency, but for those whicis existed at the time. If this be so, and that it was so to a very great extent is not denied, it must have been known to the friends of the constitution, who exeried themselves in favor of its adoption; and yet no arguments drawn from that source are to be found in the debates of any of the conventions, in favor of the prohibition. Nor is it recollected that those who were hostile to its adoption, ever objected to this feature of it, because of its liability to such construction, and yet such objections would have been heard f:om more quarters than one, if it. had then been thonght susceptible of the interpretation which the court is now expected to apply to it. It may also be observed, that if it had been thought necessary at that time of day to tie up the hands of future legislatures in relation to this imatter, it would have been more natural to have committed to congress a power of establishing a uniform system of insolvency as well as of bankruptcy. or to have transferred to the general goverument an unqualified and express power in the premises: for it cannot be credited that a people who bad been so long accustomed to laws of this kind, would have consented to deprive the state legislatures of the power of passing them, without at the same time delegating to that of the union some control 0 V Ir the same subject. Dissatisfaction may have existerl and been expressed at the abuses; which ware conimitted under the sauction of such laws, for not more effectually pretecting creditors againsrthe frauds of their debtors, and such dissatisffictions is often heard at the present day; but never was the right or proprie:y of an interference in this way called in question.

\section*{NILES' WEEKLY REGISTERE.}

\section*{}

To the practice of ilie states antecedent to and at the eport of arloption of the constitution, and to the silence on this head of those whose attentirm was Airectly called to this article, may br arlded the ininterrupled and undisputed usage of all or most If the states from that day down to the present time. Yet, after the lapse of near thirty years, Auriag which time scarcely a clacm or intermission is to be discovered in the issage of the state where the court is now holding, it is called upon to pronounce all its insolvent laws, so for at least as they operate on past debrs, and all discharges under them of sueli debts, as repugnant to the constitution, and therefore void. Without adverting to the seslons ecnsequences of such a decision, with which -he court hes nothing to do, how, it may be asked, is the uniform practice which has heen mentioned to be asosunted for, but from a general and universal understanding that such practice was no depar-- ure from any of the obligations which one state had contracted with the nthers? Call we believe that before time was allowed to organize the general gio. vernment, and white the instrument of its formation was undefgcing the examination and criticisms of able and industrious adversarics, any state coutd have passed law's of this character, trot only without ammataversion, but execute them without any ob. jction fro:n a numerous class of citizens who are in general not the most inattentive to or ignorant of their rights? Would not a clamor on the part of crectitors have been heard from one extremity of the of the umion to the other, against such usurpation of power if it had been viewed in that light? And if the legislatures of the several states could not have been brought back to a sense of duty by remonstran. ces against the exercise of such a right, would not applications have been made to the courts of justice, to arrest by their decisions the progress of such gross and freguent violation of the const itution? But not only have these laws been passed without a contitutional difficulty being ever ougtested by any member of the legislature, at the time; but frequently as they must have been brought to the notice of the conrts of the different states, and some times of the federal judiciary, it is not until very recently that the present objection has been heard of. Tongress, too, in the only bankrupt law which they ever banted, introduced a provision, that it should not "repual or anmal the lawa of any state, then in force or which might liereafier be enacied for the relief of insolvent debtors"-inany, if not all of which shen in force, will on examinution be fonnd to be retrospective. Fither, then, these lawy are not within the prohbition, or if they are, and the terms of it are so ubscure as to have hitherto eluded the research of so many who must have had an interest in its diucovery, it is the very cane in which a court ought to rely tor its trie sense in a general practice which has been wo long ambinited to. It has beensaid that a practical construction is of inf importance when a question arises on public acts of so important and solemn a nature as a written compact betweell several independent states. The instrument, \(1 t\) is said, shoult speak for itself. Ihn if there be any thigg in this remark, a decision of
the suprime court of the linted States ont the ef fict of a praciles in fixing the meaning of the const iention, would not permit the conirt io listen to it. In the case refrred to, a usage of only ten on twelve years, and which had noce been interrupted by an aot of enngress, was deened to settle a question, in Which was involved the very indepardence of an imporfant and co-ordinate member of the ferleral government, and that too in opposition to what, many will think, as prohably did the jurdges them. selves who decided it, the plain and obvious letter and spirit of the constitution.

But aside from this contemporaneous, and unirec sal expression of publie and private sentimens ind this subject, the court is not very certain that it would have regarded a lave of this nature if the question were of eariier date, as "impairing the ob. lig.ation of contracts."
This ohjeclintige-s only to such of these lans as affect anlocedent coniracis. It may very safely be assumet, that mnst, if nnt all of the inscitrent laws ill this conntry, fall within this description, and an interposition by the legislature in this way seems absolutely necessary, if not inevitable, wherever imprisomnent for debt is allowed. Such laws can. not therefore be regurded as contrary to the first principles of the social compact, or opposed to those sound and wholesome rules of leprislation which were intended to be preserved pure and in violate by those who made the constitution. A power to pass such laws necessarily results from an anlecedent state of things, and fiom the existence of \({ }^{\circ}\) asystem, which, if left to itself, without occasional controls on the part of the legislature, would produce permanent iudividual distress and ruin, and to an extent, highly injurious, not only to the state itself, but to the very parties, who might, in the moment of passion or diappointment, resort to it as a mean of coercion :- This attribute of sovercignty, for as such it is regarded by the court, it was better that the state should retain, than to hiave re linquished to the federal government. By the for mer it would be exercised within a less extended aphere, and of conrse with not so much danyer of injury to the paries concerned, as if the samedut had been performed by the congress of the United States. If then the pussing of laws affecting in thit way, past as well as future, dobts has been in use wilhin this state ever since its indepondence, and for many years while a colony, and if such practice has not onily been ucquiesced in but was absolutel) necessary, may it not be fairly presumed that every: entract within this state, or to be enforeed here, is made under a fill knowled, of such practice. which must now be deemed a perfect right; and. that this being known and understond by both parties at the time, the creditor has no right to complais, if his clebtor shall one day be liberated by vir. tue of an insolvent law which may be in force at the time of the contract, or which may be afterwards pasved, not from the obligation or payment of the tebt, but from personal confinement, on conditiors of makiug payment as far as he is able? The court: has proceeded on a belief that most if not all of the states has been in the habit of extending thein

\subsection*{3.54 NILES' WEEKLY REGISTER-SATURDAY, AUGUST' \(2,1817\).}
insolvent latrs to all debis withont any regard to the time of contracting them. 'lime has not been afforded diring a very busy term to examine the statules of the different states, even if they liad been within reach of the court, to see if there were anyexceptions. There may be some difference in liese laws, as to the mode of proceeding, and in the effect of a discharge obtained under them. In sume cases the debtor is alone the actor in obtain. ing it. In others a part of lis creditors unite with lim; by some again the person only is exonerated, cither from all lis creditors, or fiom those who have sued him. By others all future acquisitions as well as the boaly are paced out of the reach of the crediturs; b:li the principle on which they proceed is the sane in all, that is, a right in the legrislature to relieve insolvent febtors from inprisonment by s rme gereral law. The degree of iuterference is of ro inportance as it affects this question. Every \(k i \alpha l\) of interference, however limited in degree, mwst, on the pri ciple in which the plaintiffs rely, be + violation of the constitution. If these laws had been of the odious character which is now attacl ed to them, is it not probable that at least some one state would have checked the further enacting of them by an article in the bill of rights prefixed to its constitulion ? No such limitation, however, is to be foxmd, nor any expression bearing on the subjec: Refuring those who may wish to pursue the enquiry for the laws of the other states on this subject to their several statute books, the court will only notice some of those which have been passed bi the colony and by the state of New-York. In \(17 \% 5\) a general act for the relief of insolvent debtors wa passed. In May, 1761, another passed requirinct the assent of three forrths of the creditors in value, which expired in 1770. From that time until 1784110 general system was in force, but niany acts were nccasionally passed for the relief individuals. In 1784, a general system was again adopted similar to the one which had expired in 1770 . In 1788 , another general insolvent law passed. This was revived in 1801. In April, 1811, the law passed theler which the present discharge was obtained, which permitted the debtor alone to petition, with. out the concurtence of any creditor. In 1812, the last law was repealed, and the consent of three fourths of the creditors again required. In 1813 the system now in force was adopted, which requires the cooperation of two thirds instead of three fourths of the creditors. By not one of these l.ws are debts previonsly contracted, excepted from its operation. Let it also be remembered, that frequently as the attention of the council of revision of this state, colnposed of the governor, chancellor and judges of the supreme court, has been called to this subject, this objection has never oc. curred to them, walchful and able as they ever hive. been to discover and check every aberration in the legislature from a correct and constitutional course of duty. But if it be on account of their relation bask, that insolvent laus are regarded as impairing the ubligation of contracts, hankrupt lows are liable to the cameo jection; and s eh was the character of the only nne whish congress ever passed. Now, al though there be no constitutional restraint in terms on that borly from passing la "s interfering with privaie contracts, it is not to be presumed liey wonld knowingly give their sanc:ions to any act of this kind. Nor, even in passinco a brikrupt law, would they liave done it in a firm liable 10 so serious an imputtion, if they inad belicved 1 ley were impairing the obligition of contracis, specially as that power might have been excrcised free from every objec-
tion of this nature. It is some proof that law's of this description are not regarded by congress as any violation of contract, merely on account of their retrospective influence. The contract in truth remains in full force, while payment thereof by the po: licy and humanity of most civilized nations inust in case of misfortune be souglit for out of the estate of the debtor, who, as well as his finture property, is in general released.

After all that has been said, the court considers this question as one of considerable difficul'y, and regrees that it has not yet received a decision at Waslington, which would produce umifurnity of judgment at least in the courts of tive Unised States. But if these constitutional objections are removed it is alledred that the contract being macie and being payable, in Boston, cannot be affected by any discharge obtained under the laws of the state of New. York. Under this head of argument the court has been reminded of a rule, which it is presumed, when properly understood, will be acknowledged by every one; that is, that the lex loci conticuctus must be resorted to in order to ascertain the meaning of every agreement made abroad. This does not proceed from mere comity or courtesy towards other nations, but from the immutable principles of justice, which would be violated by ap. plying to a foreign contract, when deciding on its obligation, and affect any other law than that of the place where it was made-for how palpably unjust would it be for this court to pronounce void a bond executed at Canton and payable there, because by it should be reserved a greater interest, which inight be lawful there, than seven per cent. per annum; which would render it usurious in this state? This is the meaning of the rule, and it is a salutary and just one. But out of it liave arisen some dicta, which are ripening very fast into decisions of the most mischierous tendency, and between which and the rule itself it is difficult to perceive any connection. It has been said that the nature and validity of a contract must be settled by the law of the place where it was made, so also, it cannot be affected by any discharge of the debior under the bankrupt or insolvent laws of the place where he resides or of the country to which the belongs, or in other words, that a contract made in a forcign state, and with a view to its code, can only be discharged pursuant to, that is, as the rule is now ap. plied, under the bankrupt laws of such state. Accordingly, suits have recently been maintained against bankrupts and insolvents, whenever they have been arrested, by process out of the court of any other state than the one in which they became so. Titus a eilizen of Pennsylvania has not been permitted to ste in New York a debtor who may re. side, and have been liberated under a law of the latter state, but if he can be found in Massachusetts, or elsewhere, his certificate it is said will be of no avail, provided the contract were made in Philadelphia, or elsewhere in the commonwealth of Pennsylvania. This is not exactly the case here, but as these decisions are supposed to have a considerable bearing on it, the court will be expected to express an opinion on them It has no hesitation in saying, that it considers thein as forming a part of a class of cases, which, it will one day be lamented, shonld ever have found their way in to the commercial cole of this country. They appear to proceed on a misapprehension of the rights of indepenrlent nations-but principally on \(a\) mistake in applying the lex loci contractus, as well to the remedy as to the construction ind validity of the agrecment, contrary to all the adjudged cases on
ih is head. They maintain that a debtor can never under any circumstances, be discharged against the will of his fireign creditors, if his contracts with them be made where they reside, and with a view to the laws of their country, by any pooceedings under the insolvent laws of the state of which the debtor is a member, but only by a certificate obtainerl pursuant to the bankrupt system, if any such there be, of the several countries in which his creditors may happen to reside. If the rule be not laid down preciscly in these terms, such are its import and effect, and such or somet?ing like it is the practice which is very fast intmolucing itself, under the sanction of it. If this be so, how is an American merchant, who may be indebted in'several countries abroad, in case of misfortune, ever to get disentangled from his debts. No proceedings under the bankrupt laws of the United States, if there be any, nor in conforinity with the insolvent provisions of his own state, can do him any good. If he remains in his own country, trusting to the validity of such proceedings, perpetual imprisonment must be lis doom, if his foreign creditors shall be as unrele't. ing as this rule is well calculated to reuder them; for no power there, it is said, can relieve himagainst this class of demand, but upon full payment of them, without a violation of the contract made abroad, or a disregard of the comity, due from one nation to another; according to this doctrine he has no al. ternative lefi but that of going to the different countries where he may be indebted, and there submitting to the proceedings established for the relief of unfortunate traders. And yet it is not perceived bow his foreign creditors will be gainers by exposing him to so great a hardship, for if he shall commence his career of insolvency, as he naturally will do, in his own state, the assignment of his estate matle there, will leave nothing for the creditors abroad, it being admitted, that by it the whole of his property, wherever it may he, will pass. In like marner, a debtor who slaall fail, and have creditors of this description in different parts of the union, will have to make a tour of the United Stutes, before lie can comraence business again, in order to seck relief under the insolvent systein of each state. Is it not more reasonable to suppose, as the case most undoubtedly is, that every contract, whereever made, must proceed on an expectation, that the partics shall perform it according to the terms, if licy are able, but if there shall be an inability in either to fulfil his part of the agreement, that then the other party shall be placed on as gool, lut not on a better footing, as to any remedy which lie may seck for its breach or non-performance, as those who may reside in the country of the debtor. This, in case of insolvency, I should regard ns a performance of the contract, secundum legem loci coneractus, unles it were shown, that some ditierent atipulation in the event of insulvency laal heen entered into, which in not pretended, and probably never did form a part of any contract, where no specific security was taken; and if it did, would hardly be enforced to the prejnetice of other ereditore. If a remedy agninet the person of an inent. vent debtor be alowel to his crelaturs abroad which is devird to a domestic creslitor, what is it but to give the former a prifermee over the lotils. which nether justice will sabction, nor the lemet in any case expect. Da this subject I hind an oppor tunily of expressing an opmion roany ycars amo, in one of the catecs which hat nuw been cited. To that opinion 1 adlucre, and shall adhere until a dif. ferent rule shall be presented by a tribunal wh.ch Hias a right in control and dircet the jud jancits of
this court. I then stated that a surrender of all a bankrupt's effects, under the law's of the state in which lie permanently resided, ought to operate as a discharge from his creditors in every part of the world; and I will now add, without smy regard to the court or country in which the action against him may be prosecuting : whatever fuult may be found with this oplinion, I am mistaken if wit not be found in conform with the sentiments and prac. tice of commercial men, and to be for the beicfit of trade, that it should be so. Merchants generally believe, that if their debtors abroad, no matter how the debt was contracted, or when payable, he regularly discharged by the bankrupt or any other law of the state in which they reside, and lis estate being divided among all lis rreditors, they are exonerated every where. The r le so ofien cited from Huberus and Casaregris, has :10 application 10 sucls a case. When the litter sjotaks of contracts territorial and exterritorial, it is most manifest that he means nothing more than that a contract male in one country, is not to be construed by the laws of another. Now, the difficulty is to find out what the lex loci contractus has to do with the case of a future insolvency, or how the law of ne country can differ from tisat of another in this respect. It is presumed to bo law every where, that a man is to pay according to lis contract, but if he be unable to pay any where, what thei has the lex loci to do wihh the case? Is it part of that law, or is it any part of the contract express or implied, that no government upon earth shall be allowed to interfere for his protection in case of misfortune and insolvency; or, if it does, that such protection shall not extend beyond the limits of the state in which he lives, and not even there, as is contencled in this case? Is it not for the adv ntage of foreign creditors, and will it not comport better with the interest of all parties, that when an insolvency occurs, they slaall be placed on an equal footing with domes. tic creditors? It may be ruinous to the debtor, but of what advantage will it be to his absent creditor, to have him consigued to a prison cluring life without any right to a participation on his part, in the property in the liands of his assignees; for it has not yet been pretenteal, althoush this misthe as well be proved by the lex loci, that the sreditors abroad has a right 10 a dividend of his estaie, and to the bo! \(\%\) of the clebtor in the bargain. If care be not taken the great solhcitude which has recently heen discovered for crediturs in other countries, will produce decisions, if such have not already been made, which in case of hankruptey will do them mure harm tion good. The truth is, all that amity, good fath, the contract of the parties, und the lex loci, if it lins ary thing to do wit, the question, can requiry is that their interests and rightas si 11 mot he posponf. ed, or in other words, that they sliall be as well taken care of is those of notice crecitors. Vet the cour' of kin g's inenclo, in S nith and Buchanan, went oi the eale grouta of the lex loci, when it decrced on the incfocieney of a ditcharge in Uaryland against He clam of a licitimi ereditur. "It is imposable," suyn lord K-mywo "That a contract made in one cielmary is io lie gosmat hy the laws of unoth r." It is also reanalkel in this case, that it minit as well be contended, that if the state of Marylatidhad eflact - that wis delus due fromits own sulyjecta, to the antjectio of E. land, stiould be pail, the E, नhish ere!nor weull he weunt by it A law of thio kind would not tuva been emfirceal by any c ourt of this colvity, lint betvern the iniquity and injus ice of ancli intriubt, anl one which pliced the British on a level vith the Anerican creditor, this cuast per-
eeives no, resemblance: while the nne is culculatcd io exctiethe just indignation of any man, the other is vell en ithel f" universal approbation. If in all is provinions it dident resemble the bankrupt laws of E: ugy nist, ils efiect il producing an equal dovision Uf the insolven:'s estate was the saine, it ought not (6) pase usinoticed, ihat at the very moment of rendering this \(j\) drement, the court adnirts that an as signm on under the act of Maryland, would vest the properiy of the bankiupt, wherever it miglit be, in his assigrees. If so, it would seem to follow, that the debtor himself ought to be discharged; for if the law takes foum him, and against his consent, his proper:y every where and secures it cven from the pursuli of a foreign credior, why should it not be allowed to offer a protection equally extensive to his person ? Or why shonld he be placed in the very awkward situation of being liable to imprisomment abroad, when in that very country he mey have more than property enough to satisfy the demands of his foreign credi'or, bit which has been placed out of his reach by an ascienment previously made under the laws ut his own state? Aud it may here be remarkel, that the miversal effect which is given in such assignments is not among the least of the olvantages which foreigu creditors derive from the barkrupt or insolvent laws of the country where Their debturs reside. It preventa the creditors near him, and who will be first apprised of his misforfunes, and of the nature and situation of his property, from laying attachment on many parts of it, on the prejulice of those at a distance. This case wil! be dismissed with only ont other observation. 'The \(\pi\) archants of the United States have never supposed that they can proceed in their own courts against British bankrupts, if found here, merely becarve the debt may have been contrarted and payable on this side of the Atlantic; they receive and are sat isfred with the dividerd made in England; but shall any hereafter make the attempt and succeed it is to be hoped that the court which shall sustain so novel a pretension, will have more courtesy than to compare the bankrupt laws of England, which ore perhaps as perfect as such a system can well be, with an act of partiament, which prohibit to Ame. can citi\%eas the recovery of their just demands against lsuitish subjects. In the case of Van Rangh and Van Arsdaln in the supreme court of this state, we are only told that the question harl been'decided ien years before, but what the case referred to was, or on what fround the decision was placed, does not appear. In Smith and Smith, however, the court reters to the decision in East, and assigns the same reason that is there given, and which has already been remarked on.

But this tornt is desired and expected to advance one step beyond all the decisions which have yet been made on this subject. Hitherfo, an unfor. tunate debor, even if he harl lieard of the few cases which have been mentioncd, might think himself safe if he wónld but confine himself within the limits of his own state. Here he might confidently expect protection against the pursuit of every creditor withou: regard to his place of resi. Clence, or to the spot where the contract was to be performed. Bu even this security from imprisonment it is now desired to be withdrawn from him, and this course of conduct is pressed on the court, not on the footing of a series of adjudgred cases from which there might be no escape, for none such are produced; not bcause it will accord with thie general sense of the commercial world, for that it is believed is directly opposed to it. Not because of any odious discriminations which are found in
the insolvent law of this state, between territoria and extra territorial creditors, for they are placed on a perfect equality. Not because the interests of commerce will be advanced by it, for in such a state of things none but men of the most enterprising charac'er, will dare to engage in it. Nor yet be cause other countries practise on this rale, for no. thing resembling it is pretendel to be in use in any other part of the globe Nor is if to be believed, that the court of king's bench itself, notwithstanding the solitary case which has been produced as to a clischarge abroad, would disregard a plea of bankruptcy by a British clebtor, against the claim of any foreign creditor, whatever might be the plea of con tract or of payment. The court baving already expressed its opinion on the inapplicability of the lex loci contractus to all cases of this kind, will only add that this rule has performed its office, as 2 construction is given to the contract, according to such law; but in case of inabilty, a new state of things occurs, the anly proper rule to govern which is, that care be taken to enforce an equal and fair distribution of an estate, under the laws of the country in which the debior has his residence. Insolvent laws have been hardly and not very earnestly considered by plaintiff's counsel, to laws authorizing the payment of a debt with one cent in the dollar, and in a way and at a time different from the agreement of the parties. They do no such thing; they afford a sanction to no injustice-they violate no law human or divine; they leave the obligation of parties in full force-they create no inability, now interfere between one who is able to pay, and his creditors, but when such inability intervenes, they tep in and take care, or at least such is their object, that a complete surrender of the debtor's estate shall be made for the benefit of all his creditors; and when this is done, they compel the latter to observe towards him that mercy and forbearance which, in similar circumstances, they would wish and expect to have extended to themselves.

It seemed to be admitted on the argument, that if foreign creditors had been named in this act, they would have been barred. The court thinks them as much bound by the general and comprehensive terms of this act, as if they had been specially designated. Enough has atready been done in their favor without clothing them with a prerogative not yet heard of, that of being exempt from every law, unless particularly named; nor is this the ground on which these decisions go. It is that a state las no right to pass laws to discharge its insolvent sub. ject from debts due abroad. But if the court has erred in the principles which it has adopted, or in the application of them to foreign creditors in ge neral, the plaintiffs have no right to complain, for when a cilizen of Massachusetts, where they reside, is imprisonserl, at the suit of a citizen of this or any other state, he can, under the laws of that common. weulth, obtain his discharge, as to his person at least, without the creditor's consent, and such dis. charge is regarvled, as it ought to be, binding or all the courts of that state.

Sitting, therefore, in the state which passed the insolvent act in question, and to which no constitutional objection appears, this court is not sensible that it departs firm a single adjudged case in England, or in this state, when it decides on the uni versal validity of a discharge obtained under it.

Upon the whole, this court is of opinion that the act of the 3 d of A pril, 1811 , is an insolvent and not a bankrupt law; that if it be of the latter descripLion, the several states have a right to pass bankrupt laws for themselves until congress shall esta-

Shish a uniform system on the subject: that an insolvent act extending to past as well as future debts "s not a law "impairing the obligation of contracts," within the meaning of the constitution: and that a federal court, sitting within this state, is bound to support a discharge under such law against the claim of a foreign creditor, although the debt due to him may have been contracted and made payable \(2 t\) his place of residence.

The present verdict must, therefore, be set aside, and a verdict and judgment entered for the defendant.

0 F For two or three years past, by direction of the "seventr-six association," of Charleston, S. C. the editor of the Weekly Jegister has been favored, in a very flattering manner, with a copy of the annual orations delivered before it on the 4 th of July. That on the late anniversary, pronounced by Benjamin Elliott, esq. has been received-and, it is well observed by the highly respectable cominittee presenting it, that "the energy with which this production upholds the republican cause, and the eloquence with which itillustrates its principles, give it, as we conceive, strong claims to your perusal and that of every other patriotic American." Hear. tily subscribing to this opinjon, we shall endeavor, as soon as relieved of our present heavy engagemeuts, to give it a place in this paper, for its more general circulation.
the totr of the president.
Several of our friends have very good humoredly queried, whether the plain republican character of the Weekly legoister was not rather compromitted by the space allowed in its pages to accounts of the furms and ceremonies attending the "President's tour," \&c. The editor thinks it is not: a belief that clicse things belong to the history of the inanners an' feelings of the times, and an assurance that they will be frequently referred to hereafter for varions useful or amusing purposes, led him to give them so much in detail. His own views of things are entirely repugnant to the pompous proceedings of bis eastern brethren: so much so, that understand ing. Mr. Monnor was on a tour of business, with a pointed intimation that he wished to avoid any mark of public respect from the people as he passed along, -he, valuing the services of the president and sielding obedience to his wishes, carefully kept himself from every place where it might be expect. ed to meet him, during his stay in Baltimore. It seems impossible that, encompassed with a crow.d -at every hour intruded upon, and beset at every thirn and corner by an idly gazing multitude, Mr. . Monroe can either perform his public duties so easily; or enjoy himself as a private gentleman would do, under other circumstances-and it was these united considerations led us to the procedure just stated; nor can we conceive a situation more un pleasant than that of man's not having a moment at his own dispoeal. These things are mentioned to shew, that, in recording the events of his tour, we do not approve them-and that that disappro. bation arises from our wishes for the public ser vice, with the private convenience, of the president of the United States. Besides-there is danger in pomp and parade. "Caution is the parent of secu. rity."

\section*{Banks and Bank Notes.}

The editor of the Weemly Renister is not ignorant that among the directors of our banking instituGons there are many of the best, most honorab!e
an 1 most honest men living; and that many such establishments are, or are d signed to bc, "couducted or, their original principle. But he is not less iuformed, and the fact is notorious in everv body, that excessive banking lias opened a door to systematic speculation and deliberate fratud unparalleled, perhaps, in any comery-which strikes chiefly, if not eutirsly, at the poor and needy, the strugyling and laborious classes of ociety. To the former description of persons the editor respectfully offers his homage; calling upon then to interpose their wealth and inhuence to protect labor from the vultures what are preying upon it-for the other description, he wishes voluntary repent:unce, or coerced justice-promising them his best endeators to effect the one or the other.
As honest a man as ever lived may be unaible to pay his debts. But nolionest man, so situated, will live profligately, and spend double the amount that he ought to do.
To apply this proposition to a fact that has just came under my obserkation, tending to shew the speculating conduct of some of our banking institutions: I see an advertisement in a public newspaper, that a certain bank has declaped a dividend of five fer cent, for the last six months, which bank does not homor its notes, the same being 7 or 8 per cent. below a specie value, or the notes of another bank in the same place: the latter, with honorable efforts to meet its engagements, having made a very small dividend, if any at all, for some time past. I do not know which is most to be admiredthe impudence of the bank in thus proclaimi:ng its oun shame, or the patience of tire poople in submitting to so gross an imposition. There is every reascus to believe that this bauk might have met its engagements, if it had been as zealuus for its own honor as to make a profit by its business. It is un. derstond to hold a considerable amount of the U.S. stocks, which are convertible into specie at sil hour's notice, for at least porr, though purchased at 10 or 12 or 20 per cent below it: best, by holding on to this, while the people demean theurselves by not refusing their depreciated paper, they make a dorsble interest-and this is too severe a temptation for their virtue to withstand! Really, really, there is a degree of assurance in it that shocks ine. In such a state of things, why is not the dividend, or profits, applied to a payment of the debis of the bank-why is not the U. S. stock sold to liquidate them?

Now, let us take it an the other side: If this bank holds the faper of individuals, whose notions of mere convenience or designs w make a profit hy it, will not permit them to retire is due season, according so specific engagement, as well as shair firomise expressed on the fuce of it-what would the bavih do? The directors, assembled in august conclave. would instantly pronounce the makers of such paper dishonest, as well as impudent, and direct the sheriff, on judgmeat obtained, to seize upon and sell the very beds of such contumacions persons!-Yes-and I say they would do what is right. I hase nu pity for a man that suffers cowvemence to stand
- The attention of all is requested to this expres. sion, marked in itulic. The iruth is, that there are very few of the banks, that, through some cunning lirectors or cutenfficers, are not, more or lebs, inath a medium of epeculation and imporition on the public. I know somne queer things which a regar 1 to my infurmants furbids a present publication of:
in the way between lim and the payment of his debt* due. But-this "rule works both ways"the misfortune is, that the men able to exact justice, plain simple justice, of the banks, are so generally parties to their sfeculations. I say "specula tions," because the people are not yet prepared to heas the right name that such conduct deserves. But they will too soon be prepared.
Another exceedingly convenient method las been adop ed to fleece the people. A bank, at "Ozol Creek." \(\dagger\) for instance, employs an engraver and a \(p a\) -per-maker, (who are now very important persons in the making of banks) and issues a number of notes, pryable or redecmable in some city, or at some p) ce, where a large part of the business of the piople about the saul Owl Creck, for instance, as afore said, is centered. For a while, these notes are faillfitlly paid or redeemed, being cautiously given Ont, and obtain the entire confidence of the people. This first part of the scheme being accomplished, immense issues of such bills are suddenly made, aia loareel by the directors to each other. The farmer confidently sells his produce, and the mechanic cheerfully gives his labor for ihem. And then, they are nut faid or redeemed os promised, and dow th they go-"seven amb a half 10 ten per cent betozo fiur and are bought up at that depreciation by the very persons who put them first into circulation to meet \(t\). .ir own engagements at the bank, at par. The dificreace is clear profit-for the interest paid to the bank for the use of its notes, is returned to the bor:owers, as stockholders, in dividend. I kn , w a person that by one of these operations lost 120 dollars; an amount probably greater than the profit he made on the article for which he received the notes. I cannot see why counterfeit notes, to the amount of that loss, might not as well have been imposed upon him. Nay, it were better that it had been so; for if lie could not have recovered the money of the person deceiving him, he might, perhaps, have caught him and punished him as he de3 rved.

I:vlependent of these legizimate frauds, the people suffer excessively by other spleculators who also lake the liberty of making bank notes. The country is full of counterfeits, or of bank notes of places where there are no banks; and we can hardly take up a newspaper without seeing some caution on the suhject, or an account of some "notarious" villain detecterl, \&c. This latter evil has its birth chiefly in the former one, and will advance puri passu with it: and they are more nearly of a kindred quality than many have thought of. The manner and operation is different, yet the effect is the same. But, by the first, one man rides in his coach-and, by the second, another saws stone in the penitentiary. Hundreds of men have been hung in England, \(\ddagger\)
*It may be right for a man to avoid a sacrifice of his property to pay his debts. But he that will not sell any mercantable thing that he has, at a fair price, to pay them, cannot be fanked as honest.
fIt is said there is a bank somewhere called the "Owl Creek Bank." They are so numerous and so casily made at present, that they are "hard run" to get names for them!
\(\neq\) The natives of England generally call their country Ilengland. Some very learned nien suppose this to be a corruption of the word Hasr-land-which it appears to deserve from the frequent hansings of the people. There are more persous, probably, put to death for crimes agrainst the civil law in the united kingdoins, than in all the rest of Europe and formerica.
whose aggregate depredations on the public have mot equalled those of many individuals of our banklirecting speculutors.

There is no real scarcity of sperie to justify the refusal of some banks to pay it, and of most to deal it ought as though it were their heart's blood. Very large quantities of it are received from all partsMexico and South America, England, France, Hol. land, Germany, Italy and Turkey, with the West Indies, \&c. contribute to our stock. It is the opinion of many, and I think it is a fact, that there never before was so much gold and silver in the United States as there is now-perhaps by one third or an half of the whole quantity; but the banking mania, with the speculations that have followed it, has given to the precious metals more value than they used to have. At a majority of the banks who nominally affect to honor their notes, they look upon a man as a sort of an enemy who asks them to pay a clebt of ten dollars. It is this foolish and niggardly practice that keeps a specie circulation scarce-and it is to such banks that we are indebted for all the inconvenience that arises from its real or supposed greater value. If they paid it out freely and by common consent, they would receive more of it than they would pay out, except of small pieces for change. But here is the secret-deposits of specie bring them no interest-the United States' stock do; and the public right or convenience is laughed at when it comes in contact with the profit of the stockholders. I have heard of a bank that prefers paying interest to another for a greater amount than its capital and trust to the chapter of accidents to reduce it, rather than part with its U.S. stock, at par. This is a part of the new system of things; if a person, ten years ago, had said that such an event could happen to a respectable institution, the people would have called him a fool.

Every body knows that these things are so-and every body, in the neighborhood of banks whose notes have not a specie value, writhes under their oppressive operation; yet such is the terror of these institutions, so great their hold and influence on the public mind and feeling, that they go on, bankrupts as they are, with a high hand, and laugh at the petty obligations of honor and of luzv, which they so rigidly exact of others! This is true. "We have fallen on evil times," indeed-can we think that there is a conspiracy among the rich to oppress the poor, and reduce them to subordination.? Alas! it looks too much like it. The spirit of a people, that Great Britain in two wars, with all her armies and navies, could not break down, yields to the influence of old rags, and submits, without a struggle, to a grievance of far greater magnitude than the imposition of a paltry tax of \(2 d\). per \(l b\). upon tea! The truth is, and the length and the breadth of the matter is this, that public opinion, aided by the lazv, must reduce the influence of the banks, or the banks will reduce a great and mighty people to the condition of the inhabitants of Sparta-in which were two classes, Spartans and IIeluts.

I have a large fund of facts belonging to these things that would make some bank directors open their eyes with astonishment; and they shall be brought forward, from a sense of public duty, if \(I\) find the pcople able to bear them. Let the maxim that I have always endeavored 10 impress on my readers be observed-a villainy is a villainy, be it committed by whom, and when, and where it may. Person, time or place, does not alter the nature of things. England had no more right to kill or imprison the "legitimate kings," of Asia, than Bonaparte had to serve others of Europe in the same way.

What portion of the people are interested in the dividends of the barks, to any considerable extent? Mardly one in a thousand. Who, that is in business of any sort, is not interested in their good conduct? Nine hundred and ninety-nine in a thousand. Are so many to be sacrificed for the benefit of the few? 13 anks were instituted for the public grood, but what is their general operation? Why-while Mr speculating in the funds and giving luxurious dininers, \&cc. might get 50,100 or 200,000 clollars finm several banks, and of several of them, perhaps, at a time, some two or three hundred regular traders or hard-working mechanics, were deprived of the little accommodations they had had to make room fur the mammoth. And thus, to a greater or lesser degree, it is every where. Such vast sums of money have lately been made by dealings in stocks, shaving bank- noces, \&c. that many want to dabble in them. How convenient then is it to have the direction of a bank, which may now be called a money-making machine! The ides of a bank used to be as of somell:ing safe and steady, rigidly honest and highly respect-able-what is the idea of it now? -as of a thing to grind down the poor.

\section*{Emigration.}
.2ccount of emigrants from fureign countries arriving in the Uniued States-collected from the shipping
 fur two weeks, ending yesterday morning, . Iug. 1.
Tables like the following are calculated to interest the political enquirer They afford data on which more extensive calculations can be made, and are useful to the historian and others. Tinis list was commenced on Friday, the 18th of July, without any regard to, or idea of, what it would produce, and kept up from day to day \(3 s\) we received our newspapers by the mails. But of tentimes, when there are only a few passengers, they are not noticed, and some that were mentioned may have escaped our notice. The amount is, probably, about five. sixths of all who arrived in the fortnight.

Fable tells us that Suturn devoured his own children, by a contract, arising from jealousy or the love of self-rule. It is thus that mauy European nations act. They had rather that their people should perish at bome, than suffer them to emigrate, and, possibly, strengthen the power and add to the resources of another country. The degree of suffering must ever be very great to rouse a courage suffi. cient to cause many to leave the tombs of their ancestors and fly to a strange land from whence they never expect to return; but to this, and all the strong ties that unite with it, many regulasons are added to check it, or renlor it impossible. It reguires a little fortume for a man and lis family to leave the British donninions, at this time. Vessels areseverely limited as to the number of passengers they may carry, and the cost of a passage is proportionably dear. It is virtually prohbited to the poor, and denied absolutely to mechanics and manufacturers. On the continent, also, measures have been taken to circumscribe emigration; but still it is powerful, and will increase. We have roorn enough yet; let them come. The tree of liberty we have planed is for the healing of the people of all nations that will come under its sliade: not self ish, for our henefit only. But the emigrants shoutd press into the interior-in the present state of the times we semm ton tlick on the inaratine frontir already-within, there is ample and profiuble en. ployinent for all, in alinost any branch of business; and stratgers slimuld he encouraged :oseck it there

France,

By looking over the ship new's to make out the preceding, we have re.ason tosuppose that the number will be considerably greater for the next two weeks. Many from Holland being immediately expected.
It is worthy of remark, that some of these botlies of passengers have reached the United S'ates, via the British possessions. Perhaps, to avoid the exact scrutiny that might have been made if they liad taken their passages direct.

\section*{President's Tour.}

The president entered Newburyport, escorted by the covil and military officers forming a great cavalcade, amidst discharges of cannon in.I the hiso 7.2s of the people. At Bartlet inall he passad under a civic arch, tastefilly decorated with fluwers, and through an avenue of the youth of hoth exes, arranged in order, anounting to 18i0; aenty dres. sod, and full of heald and animsion. A a g of old times was displayed at the court house. Ont atighting at the hotel, he was greeted by the shouls of the inultitude. Afier these platudits hid sub-iled the chairman of the comunitlee rose and addresser?, the president as follows:
Sis-The citiz hs of Newburyport, hy their committee, beg leave to present thru sincire rropects to the chief magistrate of the Uniteld Sintrs.

Having been called by a free and imelligent peno ple, to preside over their mast import ant ene cros. it musi be peculiarly grateful to your fre ings, at the commencennent of yotr anduous dutiss it be inade more particularly' acyuluinied with t cirlocal interents, and in receive their respectfitl in \(\frac{1}{2}\) affor. tionate salutations. It is ins luse plassurs u us than happy for the nation, that we defire tie latione

\footnotetext{

thas Yt. Aid wo. thia Lubes, in the District of Maitse.
}
of this interview, from the practical operation on that inaxim of your illustrious predecessior, the father of his couniry, in his last affectionate adhless to his f 11 w citizens, that "timety disbursemen's to th pren.re for danger. froquently preven: nuct gre ster dishursements to repel it." A numerous an wealtioy population, stretching along an extensivi sea-co st, presen's to a foreign enemy many alluritig objects of st!ack; and the present perioto peac and public tranquilitv appears peculiarlv favorable fo: your patriotic effirts for our independence and security.

Enjoying as we do the blessings of a free govern ment, our att,chment cannat be the less ardent, \(w^{\text {lipn }}\) administered by one, who took so honorabie and active a part in those mensures by whic' it was obtained. We trust, that under your adininistration, by the smiles of a kind Providence, a spirjt of peace will he generally diffused, the verierable snd pious institutions of our fathers preserved, and the citizens mere their appropriate rewards, in the labors of ag-iculture, manufactures and commerce, and in exten !ing the sciences and the rrts.

Accept, sir, ollt best wislies, that you may be prospered is the important objec s of your journey, and a. the close of your labors receive a consolation, the mos: dear 10 a patriot, in the happiness and prospewi:y of the country.

To zohich the Puesinesit was pleased to reply, in su stance. as fullows:

Tinat he received with great sensibility the atten. ticns of the citizens of Newburyport-that his principal object, in making this tour, was to see the situ tion of the people, in different patts of the coun. try, and the entrance and harbors of the principal towns, and to acquires such inform tion as would enabi himthe betier to discharge the duties of his office - itht in is journey he lal \(l\) been highly gratified with the prosperous condition of the penple, and that theirsituations were far inore happy than that of uny other in any part of the world-and that we. could not be sufficiently thankfiul to that bountifil Providence which had confered upon us such distinguished blessirgs. The president concluded wi h desiring, that his grateful sentiments for the the kind :nd respecifill inanner, in which he had been received by the ci, izens, might be communicated to them.

A' dinner, Gen. Swift annourced the following as t'e president's toast-Hafpiness and prosperity to the anhubitunts of Ne tewburyport
After dining, having expressed a wish to dis. pense with the escort of cavalry, he sat out for Portsmouth, which he reached the same evening; stopping at Amesbury an hour to view the valuable factories there. At Newburyport, the \(H\). rald, spe:k ing of the new feelings that the visit of the president gave rise to, observes - "The public mind though long employed upon narrow and contracted systems of politics, was now directed into another channel. Convinced of the incalculable advantages to be de. rived froin the liberal encouragement of liberal feelings, it continued no ionger to turn from that course, in which its influence would be most effectual; but freed from every unworthy fetter, it indiscriminately embraced "all as federalists-all as republicnns."
"Did we record every incident with minuteness and precision, we should exceed the limits of our paper. Suffice it to say, that every circumstanct alvikened grateful emotions-nothing occurred to damp the general joy, for all appeared to be "musing prai-e, and looking lively gratitude."
As a contrast to the preceding and to other arti-
cles of like pleasing chazacter wheh we have cu pied from the liston papers-we insert the following from the Allonny Giazette, as a finishied specimeit of "t'le sublime and beau ifil" -
"We have of ien hear. some considerable surprize manifented that the Yankees of Conneclicut ant the Bostonians siould be so very over earnest to show their regaril fir presich nt Moinroe II is well known, as we lave before mentioned, that the state. of Connecticut and Matss chusents, have a considerable claim againt the freneral governunent for expeaces incurred during our "second war for independence," which yet remains in force:-But it is much eassier to tell a story than to write an essay. 1 pious Irish catholic who had tuken his station before the mist of an Indiaman, was put in great consternation by a tempest that rose soon after he had put to sea. In this dilemina lie endeavored to propitiate the virgin by promising to light a taper before her shrine that would be larger than their inain-mast, if she would siffer him once more to set his foot on dry land. His coinrade cautioned him that he never would be able to fulfill his en. gagement. "Be azy, my honey," says he, "don't you see that I am oniy coaxins' the hinsy!"
"With respect to the above claims of Massachusetts and Connecticul, although they have been re. fused, yet we venture to predlict, that within two years, they will be paid by the general government \(t\) the utmost farthing:" [They zvill not.]
On his way to Portsmouth, the president was met at Greenland by a cavalcacle of citizens and an escort of cavalry, and entered the town under a discharge of artillery, with the ringing of belis, \&c. The children from thic diffirent scliools, in neat unifurns, o the amount of 1000 , lined 2 part of thre avenue throngh wisich he passed. In M. .rket street lie pas. sed under an arch, tastefully formed by the ladies. It Frost's hotel the address was delivered to him -The Portsmouth regiment then passed in revisw and paid him a marching salute; after which the citizens waited upon and were introduced to lim. :iov. Plumer's sickness prevented his attendance. 0 - Suliday, the 13 th, after clurch, he visited the widow of the patriot Langidon, and on Monday inspected the navy yard, forts, \&ec: and received an address from the associated mechanics, \&c. and left town early the next moruing.

To the presillent of the United States.
Sir-The presence of the chief \(m\). gistrate select-: ed for eminent vir ues and public service, to preside. over and direct the conncils of a great nation, must plways exciie feelings of the highest interest. The inlabitants of the town of Por'smouth, remote from He seat of the general government, can expect few pportunities of witnes ing sucli a gratifying scene. We therefore eagerly embrace this fortunate occasion to present our ardent and sincere congratulacions.
Engaged chiefly in the business of commerce and navigation, we know our destinies are, in a peculiar manner, depencient on hie measures of that government, to which the protection of those important njjects is exclusively confided. These enterprizintr pursuits; which have always been greatly contributory to the general welfure, are now suffering under a temporary depression. But we liave elltire confiden:ce, that the wisdom and justice of goovernment, will extend to them all the protection and support, that shall be in its power.
To superintend and conduct the national concerns has always, in free governments, been the favorite e.mployment of the best and greatest men. By no fother means can an individual of distinguished ta,

Lents so emiriently promote the public gond. The ment of tirear chnice and of their high respect for succes*ful perforinance of such duties must, at all the man who has been called by the voluntary sufimes, cousitute a sure cloim is the grasitude of a generous people. This, Sir, is the ardnous and hor rable scrvice, which ir entrusted to you, by the ci izens of the United Stales.
sensible how greaty the national prosperity deneuls on the due adini istr: lunu of the gavernment, we recall to our recollection, with much satisfaction, the fumerous pledrges of attachment to the nublic interest firmished by the history of your Dist life. It is our earnest and confilent hope that your administralion, by perfecting our vaicahle inshtutions, and by uniting public sentiment, and wisely directing it in proper national objects, may fulfil the present happy anticipations, and thus es 'ablis'i on a firm basis your own and your country's h. ppomess, honor and ghory
J. MAsON, in beha'f of the

Intibitants of the town of Portsmousth. To James Itonrae, President of the United Situtes. Sir-lll beh ilf of the Suciety of Associated Me chanics and Nanufacturers of the state New-Hampthi:e, we sisk lewe to present you their respectfil salutations, and to express with unfeignert cordiality the satisfaction they derive from the visi with which you are pleased to honor this metropolis.

They are not unmindful that your nunerous off. cial aroc, tions require your first attention, and mus necessarily render your present tour through The country, xitemely arduous; consechently, the (12) fequent recurrence of formal addresses may becone irksome, and even painful; yet they have presumed it not incumpatible with duty or with the rules of propriety, to aval themselves of the present opportunity of expressing their public regard for the man in whom seven millions of people have reposed the highest degree of public confilence, anl to whom they are inclebted for the most innportant services

We notice with peculiar satisfaction the attention which the arts and manuf.ctirres of our country have received from you, and view it as the harbin. ser of increasing prapperity, and as a mean of per. perinating our independence.

Accept, sir, our sincere wishes for your future health and happiness, and our assurances that no portion of the community can feel a more lively interest in your persmual welfare than do the Asso fhated Mechanics of New-Hampshire.

> Alsuer Greenlcaf,
> Willicun Simes,
> Nishl. B. . Iurch, Sohn Burley IIill, Havid C. Foster,

TTo both of these addresses the president made "silitable replics"-not yet received.]
Leaving Portsmonth lie was hatidsomely received at Kittery, York, Kemebink, Wells and Saco. Arches of ever-grectis, fligs and music and cavalo cades and cheering, were every where displayed. At Kennebunk, afier refreshments, the cligirman of the commitiee of atrangements, in the presence of a vast crowd of citizens, delivered to him the fut lowing

\section*{A DuHN.ss:}

Sht-The commitlee designated by the inhabitants of kennebunk and its vicinity bid your welsonne to Maine, and purticularly that fart of it in which they reside. - The nuvel spectacle of seeing among them the chief magistrate of the union, excites sensations of no ordinary class; and equall; arivicive of their strong attachongt to the govern.
frages of the people to preside over it destinies.
In this visit, sir, our citizens discern your paternal solicitude to m.ke yourself acquainted with the varions sections of the country and the people, wha inluabit them, and we are charged to assure your that they have a deep interest in the progress and happy termination of you. journey.
We congratulate you, sir, upon the present peace. ful state of our couniry, and that your administralion of the governmen' commences under circumstances, so pleasant to yourself; and auspicious to them-and we assure you that our citizens have the fullest confidence, that the best interest of the peo. ple will be promoted; and their prayers to heaven are, that, at some future period, when you shall retire from your present elevated situation, yote may receive the acchatations of the whole people, natle h.appy, unider an ardministration marked for its ruisdom, its millhuess and spirit of conciliation.

\section*{G. W. WALLINGSFORD,}
in behalf of the committee.
The fiollowing (says the bioston Centinel) from an aquthentic source, is given as a correct report of the answer of the president to the address:
"мй. сиathman,
Sir-I ask you, and the gentlemen associated with you. to comimunicate to the citizens of Kennebunk and its vicinity, my thanks for the friendly reception which they give me, and for those testimoniey of respect which they are pleased to manifest for the chief magistrate of the United Ssates. Be pleased to assure them that, on this as well as on other similar nccasions, 1 a m unable to express my emations. To behold a free, an enligh'ened and a high. minded penple paying a spontaneous tribute of respect and affection to the man who is elevated to the chicf magistracy of a nation, is in itself an imposing spectacle. To that individual. such a scene, you may well believe must possess a character of peculiar and appropriate interest-I hive never befure been so much affected. Such distinguished attentinis, such unexpected effusions of regard, as I experience from my fellow ci:izens. do indeed siuk into my heart. They make the fcel, if possible, a deeper sense of my obligations to devote all my faculties io their service.
It was my wish in the first instance, while on this tour to bave deroted my attention exclusively to those public and national objects which I had in view. But furding that this arrangement did not comport with the feelings of my fellow-citizens, I rehnquished it. Indeed, when I fomma a disponition so generally manifesting itself, to improve the occasion for a personal intcrview of the people with the citisen whom their voluntary suffrages hat elevated to the highest office in their gift, and through him to exhibit the homage which they feel for the goverument itself, sud the high value which they entertuin for its republiciol forin, I cheerfully yi lded to their wishes. Nor can I ever regret, thai I have thus afforded myself so many opportunities of seeing and fecting how inuch we are ne people - how strongly the ties, by which we are cmited, do in fact bind us together; low much we possess, im reality, a community, not only of interest, but of sympathy and affection. I am the more led to thake this remark becanse you are pleased to express a coufident hope that a spirit of mutual co.. cifiation may be oure of the blessings which may result from my admmistration.- This, indeed, wouli be an eminent blconing, and I pray it may be realized The United States are certainly the mos: en! igh'me:
cd people on earth. We are rapidly advaucing i:r the road to national pre-eminence. Nothing hut union is wanting to make us a great people. The present time affords the happiest presages that this union is fast consummating. It cannot be otherwise. I daily see greater proofs of it. The further I advance in my progress through the country, the more I perceive that we are all Americans-that we coinpose but one f.mily-that our republican institutions will be suppor:ed and perpetuated by the unted zeal and pitriotism of all. Nothing could give me sreater sittisf.ction than to bebold a perYect union among ourselres-an union which, as I before obscrvec!, is all we can want to make us powerful and respected-an union, also, which is uecessary to restore to social intercourse its former clarnis, and to render our bappiness, as a nation, unmixed and complete. To promote this desirable result, requires no compromise of principle; and I promise to give to it my continued attention and my best endeavors. For the good of our common country I feel that I am bound constantly to act. So far as integrity and zeal are concerned, I can confidently say that I shall not be found wanting; and if I shall fail in the discharge of duty, it shall be from want of judgment. I also hope that I slaall be enabled actually to improve all the opportunities, which the station to which I have been called s!tall afford me, to advance the interest, the hanor, and the felicity of our beloved country.

Be pleased, sir, to communicate to the citizens whom yo: and your associates represent, my best wishes for their individual prosperity and happiness."

He then took up his journey for a little way on foot-passed the bridge highly decorated, and through a long avenue of ladies and gentlemen and children-the "star-spangled banner" frequently greeting the eye. When he entered his carriage, the people bade him adieu with lond plaudits.

Proceeding to Portland he crossed the bridge, ormamented with green branches and flowers, numerously attended-the "fag of our nation" joyously floating among them. A live eagle flapped her wings in front, and was released to her native region. The Portland fegiment was reviewed by him; and the children, 1500 in number, paradedthe females strewing flowers before him. There were fire works and illuminations in the evening. The next day he visited Forts Scammel and Preble, received the visits of the citizens, waited upon the widow of com . Preble, and spent the evening with a large party. at Mr. Clap's. While at Portland, a ca'f was exhibited to the president, one year old, that weighed \(13001 / \mathrm{s}\). PHOVIDENCE ADDRESS.
To the President of the United States.
Sir-The citizens of Providence beg leave to offer to you their sincerre and cordial congratulations upan your arrival in their town. With the most sensible pleasure, they again see among them the first magistrate of the union, under a constitution, the adoption of which they so earnestly desired, to which they are so devotedly attached, and from the operation of whlich they luve derived so many advantages; and liave the honor of presenting their respectful address to you within their own municipal jurisdiction, as they have before had the satisfaction of doing to two of your illustrious predecessors.

The time and circumstances of your visit to this part of the United States are such as to excite in every mind the most gratifying and patriotic sentiments. A great and free people, in the full enjoyment of peace and good government, unani-
nousiy dosowing upon their chief magistrate, in tis progress through the country, the unsought and spontaneous expressions of their good will and confidence, offers unequivocal evidence of general happiness and freedom, and is a spectacle which no country in the world except our own can now exhibit.
The proofs which you every where receive of the respect and conficleace of the people, and of their reverence for our republican institutions, must be to your own inind a source of the lighest satisfaction, and a rich reward for all your ariluous labors in the public service. May youl long continue to receive these rewards, so grateful to your heart and so honorable to your character, and to witness the increasing prosperity of the republic, to zwhiose service, in the field aud in the cabinet, both, your youth and your mature age have been so Eatururuly and so successfelley devoted.
We have the loonor to be, with the highest respect, in behalf of the citizens of the town of Providence, your most obedient and very humble servants,

> William Richmoild, Oliver Earle, Richmond Rullock, Stephen Tillinghast, Stanford Neivell, Richard Jackson, jun. Thomas P. Ives, James Burrill, jun. James Fenner. Elward Burrington, Samuel G. Arnold, Jeremiah B. Hozvell, Caleb Earle, Willium Church, John Carlile,

Gentlenen-I receive with great satisfaction, the address which the citizens of Providence, through their committee, have been pleased to communicate to me. The pleasure of my journey ha's been greatly enlianced by the uniform kindness and promptitude with which the objects of my visit have been seconded by my fellow-citizens. Every where in our country the reflecting mind cannot fail to observe the blessings of a free government. Living under a constitution which secures equal civil, religious and political rights to all, it is a great consolation in administering it, that the people have formed so just an estimate of its value, and from ratiqnal conviction and not from blind prejudices are sincerely devoted to its preservation.

I hope that this just confidence in the stability of our government may continue to increase; and if it does, it cannot fail to produce the happiest effects, by encouraging a love of our country, and an honest zeal to promote its best and permanent interests. Happy shall I be, if my exertions in the public service sliall be so far successful, that they may assist the industry and enterprize of my fellowcitizens in increasing the general prosperity.

JAMES MONROE.
To the committee of the tozon? of Providence.
The following is a copy of the address of the com. mittee of the town of Newport, R. I. to the president of the United States, with the answer of the president to the same:

To the President of the United States.
Sin-The cominittee of the town of Newport, come to express the satisfaction felt by them and
sheir fellow citizens ai your arrival here, in the progress of your tour to survey the condition of your country, in relation to its military and uaval defence.

Our means are adequate, and a state of peace is propitious to the attainment of the important object you have in view.

In manifesting so deep an interest in this great national concern, you enter auspiciously upon the hish duties, which have devolved upon you, as the chief ingistrate of the nation

In riewing the general state of our country, we trust, you have hal, and will continue in have, occasion to observe the beneficial effects of our fice for:n of government, on the variou* interests and general happiness of your fellow citizens; and thas this view will add new force to your love of col 15 sy , and new incentives to the excrion of your talents, to extend the influence of the national councils, in advancing the mational prosperity.
\(\left.\begin{array}{l}\text { Chris. G. Champlin, } \\ \text { Benjamin Hazard, } \\ \text { S:ephen T. Northam, } \\ \text { Thomas G. Pitman, } \\ \text { Samuel Virnon, } \\ \text { Asher Robbins, }\end{array}\right\}\)

\section*{Vewliort, June 23, 1817}
presidenc's asswer.
Geathemes-I return my siucere thanks to the inhabitants of Newport for the kind manner in which, through the committee, they have expressed their approbation of my present visit. It is my ansious desire to promote the permanent interests of our common country; and to enable me to accomplish this with more success, I have deemed it important to examine the principal places adapted to inilitary and naval defence.

In the progress of my journey I have received great satisfaction in witnessing the happy effects of a free government, in promoting the moral, physical, and intellectual strength of our country.

We may justly be proud of our situation, since all classes of citizens are secure in the enjoyment of their civil, religious and political rights; and may, by their own industry and enterprize, acquire a competent share of all the recessaries and comforts of life.

JAMES MONROE.
To the committee of the town of Newport.
[The president probably reached Plattsburg about the 24 l uli. to which place we expect to follow his progress in our next.]

Brevet of his holiness to the Senior and Canons of the C'utherlral of Constance, Germany.

\section*{PIUS P. P. VII.}

To our beloved sons! Health-
Your epistle to us of the 18th of last month, with which yout communicated to us the decease of the archbishop of Ratisbonne and head of the administration of the church of Constance, and at the same time, the transfer of the office of the capitulary vical to the baron, Ignace Henry of Wessemberg, has caused great pain to us. You cannot be ignorant of it being very well known, that for the most important reasons, the said baron, Ignace Henfy of Wessemburg, has incurred our deep displea-
sure, insomuch as to render it incumbent on us i.p. dismiss him from the trust of a general vicar, which he before held. How has it then happened, that forgetting the reverence due to us and the holy see, you have elected that very man capitularly vicar whom we could not retain in a station of much less dignity and trust, that of general vicar? And "ot satisfied with this violence, you have dared to forward a request to us for a sanction of this your election.

To this request, however derogatory to the hols see it may be, we shall answer in mildness and sincerity. That not only do we absolutely refuse to sanction the election of the said baron Ignace Henry, of Wessemberg, as a capitulary vicar, and protest against it; but that we do at the same time protest against and refinse to acknowledge Antony Reiniger, as his substitute: and our pleasure is, that neither shall our ecclesiastical courts acknowledge the one nor the other in the stations to which you have chosen them, nor shall we take any notice whatsoever of any writings sent on by them. Therefore, in virtue of the sacred trust confided to us by Almighty God for the whole church, we therefore command you, laying aside the aforesaid spurious election of the said baron of Wegsemburg, to elect a capitulary vicar of a gooul reputation from amongst the members of the catholic church, one competent to know and execute exactly and steadily the duties of the office to him confided.

This letter may grieve you, but may it lead to the grief of wepentance, so that youmar be led to yield ohedience to the holy church, and therefore give to us speedily that reiief from our ansiety for you, which has preyed upon us so much; and that there may be an immediate removal of the evit which yon have committed.
In the full expectation thereof, we bestow on you with tenderness our apostolic benediction
Bane at Rome, on the 15 th March, of the year of Grace 181テ, and of our Papacy 18.
gortugak.
A most formidable plot against "legitimacy" has been detected at Lisbon, which had for its purpose to cast off the house of Braganza, and elevate the young duke of Cardival to the throne. Many persons of high standing appear to have been concerned in this scheme, which was designed to have been acted upon on the 5th of June, being the feast of Corpus Christi; and a part of it said to have been to have murdered all the English. But marshal Beresford heard of the plot, and, before they were aware of it, seized the conspirators in their beds, and so fir the thing was ended. The city remained tranquil under the care the troops, and the trial of the "traitors" was soon to commence.
\(0 \xi\) It is intimated that the plot was got up by general Beresford, himself, that he might put down some persons that he hated or feared, and possess a more despotic power in the affairs of Portugal. "plots" are among the arts of able politicians to effect their purposes.
nethrild nos.
About the middle of May it was proposed in the Ghent and Brussels papers to establish throughout Flanders an anti-British society, every member of which was required to make oath, that he would not buy, wear, or use, any article of British produce, or of the growth of British colonies. Their motto, Nihit Anglicanum-their model, the Holy alliance formed by the continental sovereigns for the support of legitimacy.
Commerce is very dull in Holland. It will be a long time before the Dutch recover, themselves, so as

IS be again curniers fur Furope, sc. if ever they do. The shipping of Fincland and of the United Siates must first decline inuch below their present rank and importance.

The state of the poo: appears to be as miserable in flanders as any where else, being nearly in a state of starvation.

Attest-Bersardo Segin.
Approved,
GREGOR MACGIREGOR. proclamation:
Grçor MacGregor, brigadier-general of the armies of the United Provinces of New-Grenada and Venezuela, and general-in-chief of the armies for the two Floridas, commissioned by the supreme directors of Mexico, South-A nerica, \&c.
T'o the inhubitants of the Island of Amelia-Your brethren of Mexico, Buenos Ayres, New-Grenada and Venezuela, who are so gloriously engaged in fighting for that inestimable gift which nature has bestowed upon her children, and which all civilized nations have endeavored to secure by social com-pacis-desirous that all the sons of Columbia should participate in that imprescriptible right-have confided to me the command of the land and naval forces.

Peaceable inhabitants of Ameliz, do not apprehead any danger or oppression from the troops which are now in possession of your Island, either for your persons, property or religion; however various the climes in which they may have received their birth, they are nevertheless your brethren and friends. Their first object will be to protect your rights; your property will be held sacred and inviol ble; and every thing done to promote you real interests, by co-operating with you in carrying into ef fect the virtuous desires of our constiulients; thereby becoming the instruments for the commence. ment of a national emancipzion. Unite your forces with our's until America shall be placed by her high destinies to that rank amort the natims, that the Most High has appoiated. A country by its extent and fertility, offering the greatest resources of wealth and happiness.

The moment is important. Let it not escape without having commenced the great work of delivering Columbia from that tyranny which has been exercised in all parts, and which, \(o\) continue its power, has kept the people in the most degrading ignorance, depriving them of the advantares resulting from a free intercourse with other nations; and of that prosperity which the arts and sciences produce when un ler the protection of wholesome laws, which you will be enabled properly to appreciate, only when you will have become a free people.

Yout who, ill-actvised, have abandoned your horres, whatever may have been the place of your birtli, your political or religious opinions, return without delay, and resume your wonted occupations. Deprecate the evil counsels your enemies may disse.
"ina'e among you. Listen to the voice of honor to the promises of a sincere and disinterested friend. and return to the fulfilment of those duties which nalure has imposed upon you. He, who will not swear to mainfain that independence which has been derlared, will be allowed six months to settle his Af:irs, to sell or remove his property without mo-I-station, and enjoy all the advantages which the laws grant in such cases.

Friends or enemies of our present system of emancipation, whoever you be, what I say unto you is the language of truth; it is the only language becoining a man of honor, and as such I swear to adhere religionsly to the tenor of this proclamation.

Daterl at head quarters, A nelia Island, June 30 th, 1817.

GREGOR MACGREGOR.
Jph. de Yubarmen, secretury.
Gregor Mac Gregor, general of brigade to the armies of :he United Provinces of New-Grenada and Venezuela, and femeral in chief of that destined to both the Floridas, with commission from the supreme governments of Mexico and South Ame. rica, \&c.
Soldiers and Sailors-The 29th of June wild be fo:ever inemorable in the annals of the independencc of South America. On that day, a body of brave men, animated by a noble zeal for the happiness of markind, advanced within musket shot of the guns of Fernandina, and awed the enemy into immediate capitulation, notwithstanding his very favorable position. This will be an everlasting proof of what the sons of freedom call achieve whell fighting, in a a great and glorious carise, against a government which has trampled on all the natural and essential rights which descend from Gud to man. In the name of the independent goveruments of SouthAmerica, which I have the honor to represent, I thank you for this first proof of your ardor and devotion to her cause; and I trust that, impelled by the same noble principles, you will soon be able to free the whole of the Floridas from tyranny and op. pression. Then shall I hope to lead you to the continent of South America to gather fresh laurels in freedom's cause. Your names will be transmitted to the latest posterity as the first who formed a solid basis for the emancipation of those delightful and fiuitful regions, now in a great part groaning under the oppl ssive hand of Spanish despotism. The children of \(S\) onti;-Arierica will re-echo your atames in their songs; yorr heroic deeds will be handed down to succeeding generations, and will cover yourselves and your latest posterity with a never-fading wreath of glory. The path of honor is now open before you. Let those who distingnish themselves look foirward with confidence to promotion and preferment. To perpetuate the memory of your valor, I have decreed, and do decree, a shield of honor, to be worn on the left arm of every indurdual wno has assisted or co-operated in the reduc ion of the Island of A melia; this shield will be round, of the diameter of four inches, made of red cloth, vit.I lhis device, "Vencedores de. Analia, 29th of June, de 1817, 7 y 1 ," surrounded by a wreath of lanrel and oak leaves, einbroidered in gold for the officers, in yellow si'k for the men. The colors of the corps of national artillery, the first squadron of cavalry, and the regiment of Columbia will have the same device embroidered on the right angle of the colors. Long live the conquerors of Amelia!

Dated at head quarters, San Fernandina, 1 st July,
1817,7 \& 1 . GREGOR MACGREGOR
Ju. de Yalbarbety, secrelary.

\section*{Honor to the Dead.}
"BaLtimohe graves to hert isvaprrs, to her de. fenders a moxument."- Com. Portect's toust.
"Dulci et c!ecorv'n est pro putria mori."
Oi Monday last, "The fihst Mecianical Vulunteras," one of the companies attached to the fifth regiment, erected on the spot where the advanced partyinder major Heitu was engaged with the British forces, a MONUMENT to the memor, of A ROUS. la Ruxdale, one of the members, who fell in that skirmish. The company, headed by their commander, coptain B. C. Hozurd, marched from town at an early hour; and having been joined on the ground, at 11 o'clock, by col. Meath, lieut. cet. Burry, major Stewart, and several other officers of the regiment, the ceremony of putting up the monument was then commenced, and in a very short time completed, under the direction of Mr. 'Towson (lieutenamt of the company)-ludeed much cominendation is due to this gentleman (and no less to colonel Small, who assisted in the design) for the style and good taste in which the monument is executed. He has aime? at simplicity and neatness, and he has not beeln dissppointer.

The monument is a pyramil of white stone abont four feet high, resting on a well proportinned pellestal, which bears the fou: following inscriptions:

\section*{[O.1 the side fucing the roud]}

How beautiful is death, when earned by virtue.
[ \(1 \cdot n\) the oppssite side.]
SACRED TO THE MEMORY OF AQUIIA.A RANDALL,
Who clied, in bravely defending his country and his home,
Dn the memorable 12 th of September, 1814, Aged 24 years.
[ \(\mathrm{O}_{n}\) the side up the roarl.]
THE FIKST MECHANICAL VOLUNTEERS, Commanded by Capt. B. C. Howard, In the 5 th Regiment, M. M
HAVE LRECTED THIS MUNUMENT, As a tribute of their respect for mis mamoliy of
 [O:t the sitice dozon the rond.] in Th: skilimasi
WHICH OCC:URRE:D AT THIS SPOT, Between the adranced party under
- Mujor Itichard \(\mathrm{K}^{-}\)Ifenth,

Of the Fiftl Regiment, M. M. And the fromt of thit British column, MAJOR-GENERAL ROSS,
Commanter of the 13 ctish forces,

Ilaving compieted the necessary labors of the oniertaking, the company wae then drawn up in front of the monument; the officers of the regument altending by invitation were posied in front of the company, and captain Howaty delivereal, in a modoti but inpressive innmer, the address, an imper. fect ketels of which fillows.
The address vias remarkably appropriate-It is indeed to be regretted, that in yiclding to the regirest for publication, esptain lloward has net bein able ts collect frow a faling menam, the whole address, as he delivered it. Hint there is enough left to challenge praise : not only for the jultointis selection of topies, but also for the beauly ant puri ty of his languspe

After fiting tree vollies over the montument, the compary was thismissal to pastake of a baidsume collation.

\section*{SKRTCH OF CAPTAIS HOWARD'S ADDRYSS.}

My Friends and Felloto Soldiers-We are assembled on this day for the purpose of completing a design that we have long entertained. It is to perform one of those duties that can happen but solrom in the course of an individual's life, for wars, thank heaven, in our conntry, are nos so frequent as to call upon us ofen to lionor the memories of those who fall in her defence. But when it does occur, it is a duty for the performance of which we are bound by more than ordinary ties. We owe something to those who are desd-something to those who are yet unborn. So stinngly do I feel this, that my iunagination at this moment fles for: ward to the future, and my memory back to the past. I can picture \(t 0\) myself the sensations of those who in far distant days will contemplate this monument, while busy memory bring before me the scene which was exhibited liere, and the melancholy even: which has caused out assemblage at this spoot. Let us turn our attention for a moment to the year 1814, when a black and portegtons cloud seemed tireatening to burst upon our country; when it had been vauntingly declared that all assailable places were to be laid waste, and outr city rich with the gif's of commerce, and stre.g with the sinews of war, stond high on the list of proscription-But the spivit of the nation was roused, and the torch of military entheusiasin was lit at the flome of the consuming capitol. There the list of proscription stopped. With the points of our swords, we erased from it the name of Baltimore, and Latimore was sived.-And whom had we to oppose? not a miserable rabble fighting for their rations alone; not an irregulare and undisciplined enemy, but troops that had scattered the srmies of France to the right and to the left in their march through Spain; troops inured to carnage and war, and flushed with thinking they had tamed the American pride at that ilt-fated, unfortunate Bladensbarg - Can we look back upon this contest with any less feeling than pride? Was there any thing in our conduct that should make us avoid recurring to that period? No-Thank Heaven, there was mot-here we stood, and here we acted our parts-Here we all shared one common danger, and trough the ball that bore the message of death as it sang through tise air, tock only one from among us; yet wh.0 is there might not have shartd the same fate? who is there that might not have been that one? It well beeomes us there fore to join heart and land in placing some dura: ble memorial on a spot so consecrated as this. This monument which we are now erecting, will stand as a solemn expression of the feelings of us ull, as a solemn determination, that though the life of Rundull was rudely and unsimely destroyed, his name shall not perist, from the face of alie carth.

Our city, 1 am proud to say, has evinced no hackwardiess, wis cold reluctance, to linor the nemaries of those who fell in her defurce. She has planed in her boom an ornament to her beanty, and a menument of her gratitule. She lias crecied in the midat of her buly streets an edifice whase toweri gr column is doined to bear the names of thote whese lives were offiret! up to tave hes from the hostile tral! ad etire milnight eerrors of an exasperated and imgnverouble fore Not a unveilar cat pata without stopping to admire the gratilute of 1 -litimore in hor detenders. But 1 ofing that the -jon, whim in invidc clatsic by the eflim on of thanl, the pot where the ling line howl moppillel by the -ystematic advances of an experigncil and dieiplureal fine, han been sutfered lio remain unnoticest it is Lere where her cis:
ens stind arrayed in soldiers' grab, that honors 1) a soldier's memo:y should have been paid. To mark the spot be then our care. Let our monument arise, in lismility proportioned to our number, compared with the collected mass. Let the hame of liandall be recorded on imperishable stone, on the spot where his life-blood streamed upon the giround. I scruple not to say, that though the lofty column does not rise above the tops of the nei shbouring trees; though plain and unadorned with magnifieent and expensive sculpture; the monument which we have this day erected is a proud, a noble, a splendid tribute to his memory. Whn is there liere, whose heart would not beat faster, whose pulse would not throb quicker, at the prospect of such a roonument as this. For myself I coukl almost change places with him; I do believe that his death atmed for many a sin, if many a sin he had committed. To defend our country has ever been conpidered one of the highest, holiest duties that man has to perforn; religions bigotry nav tell us, that war is unlawful and a crime; hut the honest, unperverted feelings of the human heart will always refuse to believe it. What-has Providence blessed us with a noble conntiy, enriched with all the blessings of civilization and enlightened by the animating principles of liberty, only to surrender it up to the first invader? Shall we not keep what God has given us? He who suffiers the fiery death of the yarrior, whose soul has burst, not crept forth from its teneme 11 of clay in such a cause as that, has well performed his part in life. The lamp of life, if it be not sudelenly extinguished will waste slowly away; better to be extinguished In the midst of its brightness and leave the memory of its brilliancy behind it, than glimmer for years in the socket.
Near this spot another monument was earned, though ten thousand swords would leap from their cabbards to prevent it from being placed there. It was here that the haurghty general who declared he did not care if it rained militia, atoned with his life for his rash opinion. It was here that they mained such a tempest upon his head as beat him to the ground. There let his memory-rest for us. If his government have done, what it is said they have, they have not only insulted the feelings of the I nerican nation, but imprinted a foul and shameful spot on the memory of him they wished to honor. To assert that Ross was slain at Washington is as monstrotis and inexcusable as to engraft upon his cont of arms the broken flag of the United States. How cifferent is it with us. 'Truth, simple as the store and pure as the color that glitters in the day, breathes in every word and action. The honors we pay are those we think due. No more. With that sublime attribute of heaven, truth, engafted upon them, they can be looked upon with more pride by those who give them and the friends of him on whom they are bestowed, than the most pompous and lordly testimonials, framed to feed national vanity at the expence of history and fact.
My friends-I have done-We commit this monument to destiny and time.

\section*{CHRONICLE.}

Plaster of Paris. A letter trom Livec, Maine, intimates that by soine improvements of roads and water oommunications, we can be supplied with Plater of Paris as abundantly and nearly as low from our own territory as from that of the British. Let these roads, \&c. be made, and the impurt of the oferign commodity become a matter of revenue.

This wouid be fair play, and further would secure to us the many advantages arising from the carrying of so weighty a commodity in the employinent of our onvn seamen.

We frequently hear from our squadron in the Mediterranean-all well.

The harrest. We learn from every quarter of our country of the most proluctive harvest perlitips ever known in the United States; and a much increased quantity of grain was planted. The price of flour in liurope keeps up. See "Foreign Articles."
A Spanish ship with a valuable cargo, bearing the character of a prize to a Buenos Ayrean privateer called the .1tugero, has been detained by a revenue cutter in the Chesapeake, and sent into Norfolk. She was bound to Baltinore. Several circumstances of a mysterious nature led to the seizure.

Great canal. - It is expected that 16 miles of the great canal in New York will be completed in the present year.

Interior tradr. - From a Louisville, Ǩy. pxper of July 7-Arrived at Shippingport, steam boat Franklin, 36 days from New-Orleans (having been detained 14 days) a distance of 1510 miles, with a freight that will clear 6,500 .

Indian treaty. Governor Gass and gen. Mc.Arthur are shortly to hold a treaty with the Inclians at Fort Meigs, with a view of purchasing lands of them, to facilitate the intercourse between the state of Ohis and territory of Michigan.

Avothen treaty. - Fram the Khoxville Gazetie of \(J_{u l y} 1 \%\). We are enabled so state, on anthority entitled to the fullest credit, that on the 8 th inst. governor M•Minn and generals Jacksoll and Meriwe. ther, commissioners on the part of the Uniced States, effected a treaty with the Cherokee Indians, (by way of exchange) for a small tract of country on the north side of Tennessee river within the limits of this state, including little more than Sequatchee valley; and all the land south of Chatahonchee river, in the state of Georgia. It is expressly stipulated in this treaty, that the census of the whole nation be taken in the month of June next, with a view to ascertain the gross number of those on the Arkansas and White rivers, including all those on the east side of the Mississippi, who, on taking the enumeration, shall express a wish to remove thither-and that after the enumeration is taken, the Cherokee nation shall cede to the United States such portion of their country as those on the Arkansas and White rivers, together with all those who wish to remove, are justly entitled to from their numbers; for which the United States are to give them an equal portion of land on the Arkansas and White rivers-the bounds of which are designated in the present treaty.

Those that make their election to remove, are to be furnished with boats and supplies necessary to to their removal, at the expence of the United States: each individual of the poor Indians to be furnished. with a rifle gun, a blanket and kettle, or steel trap. There will be reserves of 640 acres allowed to the heads of families in the portion of country given up to the United States, should the individual claiming it reside thereon until his or her death, which will descend to their posterity in fee simple; but should they leave their reservations during their life time, such lands will become the property of the government. A reasonable compensation is to be made to those Indians who leave plantations, for their improvements,

Subscribers, expecting in be called npun by the tgent, have felt cusy on the ruatter; the agent has neglected, or had too much business of his nwal \(\omega\) perform, the purt the touk upan bimsclf to obligg? me, and I bave sufficer?

\section*{NUES' WEEKLY REGISTER-SATURDAY, AUGUST 9, \(181 \%\).}
such orisht to be, I would abancion the great objont of squaring up my affairs, ratlier than be guilty \(n\). an act so ingrateful. When this is done, 1 shat shain entreat their good sfavice, and trust that they will render it as heretufore. This resulation is not designed to apply to the receipt of newo sub. ocriber, except that their money must be forusurlsd in arlvance.

The rule as to payment in advance will be enforc. eil, at every hazand. After the 4 th \(0.6+1\) n number of the next volume, as the distance of the eubseriber's residence may justify, the pher shall not the firwarded to any one that neglects to comply with th is requisition. I cannot berieve that ifis urrea. intable-and though everv honorable effort witl be made io ex'end the circulation and exsit the ch:trat ter of this work by a less livided and less dis tracied attention o its legitimate corcerns, and av. ry suppert will be thenkfuty received-it is Wished whe understcol, that the guid pro que cancots oblogration, and puts the subscrit) \(r\) and the e. itor culy on a par. The idea has been encuur-ge. 1 . by the voliutary opinions of nen most estermed . tiep ple of the United statee, that the Wemely Recistran is fully worth the price asked for \(i\)-but everv one will judge und act for hinself; and here\(\mathrm{cm} . \mathrm{let}\) it rise to greater usefulness or altogether casc io be. It is mere thonghtlessness that gives so much trouble to publishers-gentlemen that whil pay 10 or 20,000 dollsps, on a simple notice that is is ilu a, suffer themselves to be dumed for a paitry sum due to their printer-not reflecting on the waste of time and derangement of business caused to both parties by it.

The following, then, are the terms on which this paper will be published-

It must alreazs be paid fin in atircta:ce-and the at. sunce for the year ending in 1818, with the arrears due, if any there are, is required to be remitted direct to the editor, at his risk, Ejc. as aforesaid, by mail, that the pust business may i.e sel:led up zvith accurucy and wi hiout further elelay The notes ar bills of almost any chartered bunk ne: rest to the resilence of a subscriber, will be re. retved in prayment. Ind thut every gentleman may Anore hory his account stunds on the books of the office, he will ford within this shiee isomet hut g io she tiv him the year, or years, as the case muy b., apparently die to September 1818, or to such other tine woithin that year as it may extend to.* \(03130 t\) in too many instances, by the receipt of monies fyom ageints without directions to whose credit it should pass, the anoount that seems due may be wonlig. yet the procreding will cause an enguiry io be instituted which will produce a satisfaciory explanation-and, in the mean time, the sum really due may be forwarded as above.
The general index and volume of revolutionART SPEECHEs, \&c. are sooll expected to be ready for the press. The editor ventures to promise that the former will meet the pubinc wishes; for patience, itself, is impressed into cur service to render it an easy and certain reference to every thing desired to be found. It will make a large volume, and the price of it, in sheets, cannot be less than three rollars. As to the other, we cannot speak so cumfidently: by the letters of the late gov. \(\mathbf{1 1 6}\) Kean to president Hidams, published a few day's ayc, it appears that it was not the practice to m ke set-speeches in the old congresses as it is in the Fesent, and much of the

\footnotetext{
* Er ep Shoe iefivered in Baltimore-where subscribers will be waited upon.
}

Da rivic eflusions of those memorable days ate lost. Yet, manv fragments have been gattered up, and there is, per!aps, few men in the United States bett-r prepared to under'ake this plensing work then invelf. If we fail in collecing a sufficiency of revol:ctionary mutter in make a volume, there are other stores of rich things to resort to, and we flatter nurseives of an ahility to give general satisfic. tion: to do which, we expent the assi tave of a leamed gentlemsin, whose zeal for the work is only to be equalled by the indef tigibitity of "is e 2 . racter, and the labor that he cill hestow t., give value to the compilation. The price of this v blame will also be three dollars, in sheets.

It is important to asnertain the probabler umbel of those works that will be required. They are 'no heavy, and we have not the furds to commence tiem on chance. Gentlemen wishing either, or bot' of them, will, therefore, forward the pii of them, with their regular subscriptions- for oficr they are put to press, especially the general index, no one can calculate upon a copy unless so secured Considerable loss has resulted fiom the manulu i: what the supplements to thee several rolumies ficice teen lisposed of; and the number to be printed of inse Weighty rolumes shall be inade to correspuid with the subscribers obtained and the complée \(x\) ts of of the Register yet remaining on hand. -which. la, ler to one will expect us to break for his accommada. tion.
Une other remark and we have done. For the present, and for two months hence, until the said complete sets are fully ascertained and laid by, any gentleman desiring certain volumes to compleie his own set, may have them, at the subsciption price. But after that time, no volumes will he soll separately, except such as there may happen to be an extra number of.

\section*{Enstport Custon-house Bonds.}
[Our realers will recollect that at the tinte of the captere of Eastport, (Moose Island) during the late Irar, certain bonds for duties due the United States to the amount of \(\$ 50 \mathrm{~m}\). \(\$ 60,000\). fell into the hands of the British, through the treachery of mite of those misguided Americans whose sympathies were all with the enemy. Payment of these bonds was attempted to be enforced by the captors through the court of vice-admiralty at Halifax. The following correspondence explains the very satisfactory close to which this part of the transaction has been brought. Resides the interest arising out of the facts here dis. closed, which more immediately relates to the obligors, there is one of more general anrl we might add of a more important nature while the steps which have been token by our own government shows the care with which it watches over and protects the rights of its citizens, the re. sult shorvs the fairness with which the Pritish government seems at present disposed to \(c\). nduct towards us.
[Eastern Arg7ts.
(cory.) Department of state, July 15, 1817.
Sin-I have the honor to enclose the copy of a letter from lord Castlereagh to Mr. Adams, just re. ceived from the latter at this office, stating that orders had been given for suspending all firther proceedings in the case of Mr. Baxter's appeal, and for relieving the other obligors with him from all possihe operation of the deciee of condemnation passed by the Vice-Admiralty court of Halifax, in relation i. cartian bonds seized at Mouse Island during the Jate wrads.

\section*{NILES' WEERLY REGISTER-PRESIDFNTVS TOUR}
it gisca me great pleasure thas io make known ting forit the discovery of the mineral, the comps
to youl for the information of the parties concerned, the satisfuctory result of the steps which were taken by this departinent in consequence of your letter of the 17 h of September 1816.

I have the honor to be, very respectfully, sir, your obedient servant,

\section*{RICH URD RUSII, ucting secretary.}

\section*{William P. Preble arquire, \\ Altorney of the Unitad Shites for \\ the District of .haine.}
(copr.)
The undersimed, his majesty's principal secre. bary of state for foreign aft irs, has the honor 10 acquaint Mr. Arlams, ill ref rence to the note which the inilersigned had the honar to receive from bim on the 17U: Janu ry lash, respecting certain bonds aciz. I during the lace war at itouse listand, that oracro have been given for the inmediate suspensions of all further proceedings aky inss Mr. Baster, an well is fir relieving, as suggested by Mr. Adsms in his nove, the other obligo:s from any possible ofteration atainst them of the decret of condemnit tion passed by the Vicr-Ac'miralty court of Halifax.
The uidersigad regrets that such a delay has interver ed between the receipt of \(1::\) Adams' note and the present reply, bit has the honor to acquaint him that his m-jesty's advocate general was anxions to obtain all tile infornation in lis power reapecting he ransaction, and likewise to haye a persona! eoiference with the captors or their agent before he give in lis repurt of the merits of the cisc.
The undersigned avails himself of this opportunity to renew to Mr. Adams the assurance of his high consideration.
(Sif:ed) CISTLEREAGH.
Fonsign Office, May 21, 1817.

\section*{President's Tour.}

CrotOTES AYD Scarps-und progress of his journey he late visit of the Palsinest to the Intie. peridmice 74 , com. Baskarmat., with that attention to the intereats of t! nse under his command which so surongly charac:erizes him, on presenting his officers, leiainer' acting midshiponim King, while he m नitioned his escape alane in un oper boat fiom Bermila-[for an necount of which, see Weeele

The in Buaton hutelligencer relates the follow. ing, in speakiog of the presidemts sour: -

A tifichl, Vermint, he visited the "Irubitution of the Shaken communtty" to use their own phraseo. log), or itimore familiar langunge the Shaking Ras. kers. He was received will the simplicity that dis tingtinthes that sect The cider came furth from the primeipal loonse in the setteinent and addres. sed the pr'sident, "I Joiepth Goourich welcome James Monroe to our habitation." The presictent exturined the inalitution and cheir mannfactures, was also welcomed by the women, and hiving re. mained about an hour, he retired very much pleas. ed with hiv visit.
At Strafford, the president, at the inviation of col. Binney, examined the extensive manntactory of e-pperas owned by genticinen in Ifoston, in whine behalf col. Binney had been delegated to make the invitation, al 1 explain the extent ald uti. lity of the cstablishment. Tlus vias chone to the entire sativaction of the Prcsilemt, butily wetwal abservatipn and in a ririten cominuricatpr, set-
mencement and progress of the manifacture, a:1 the happy results to the country, rendering it inde pendent of Europe for an esscntial article of grice ral use. The president was pleased to express his satisfaction on the developement of such an impor:ant natur:s resource of the nation
The Boston Cendinel observes-In the places which the president, in his tour makes any st:" lis first attention is given to ohjecis of national it fehce; but his nex is devoted to the various mant facturing establishments. On this subject we ari assured, he has expressed not only his detight, bu* his surprise at their extent and improvement. Iit mehtioned, we are told, at Wullham, that a f \(=\) stich establishments as he there saw wriuld bi siftrient to supply the United States whth cuttol fabrics.

We ouglat to add, that the superb apartment: provided for the president's accommorlation in the Fixclange Cotfee House, were from our तwh whir hu ses. That the inglyly finished Piano-Forte whict decorated the drawnig room, was from the nimsice? establishment in Milk-stree:; and that the e time service of gluss ware used at the sumptuous dime given on the day of the presiden's arrival hery was m nufactured at the Boston glass-house. I.. attentiun of the president was arrested by the be.d. ty and ponderusity of this ware; and on learning it origin, he expressed much gratificution.
"Sinail things speak lomd tru!lis." Wie slath t:m: onit tomention, that previous to the arrival of the president here, the penple of the tow..s on the ro he was expected to pass, turned onl and remment every impectiment, so that not a pebble should ... struct a journey which all believed to be well-ial. ed, m. we.l intended, and which, white it incre:es the knowledre of the visitor will subserve tha best interests of the visited.

The Ceninel also says, "WVe deem the follor. ing anecdete worthy of record-In the widow oit = tate president Wheeluck, the president founch al fair coniforter who dressed the wound which he ry ceived in the memorable battle of Trenton in 1:T? As they had not before seen each other sitice the periorl, the emotons which the interview oceastw. sd may be beller conceived than described."
At York; Mr, Monroe was wailed upon by venerable judge Sewall, of the United S ates it trict cuurt, now in lis \(82: \mathrm{ad}\) year, who deliverces the adilreas.
At Brdueford he was accompanied by a cavalon the thr ugh the village, towards s'.co, where he past e" unler an arch over the bridgf, amidst disc'iat in of artillery, and the huzzas of the pecple-and inceived an auldreas firom the selectmen. He then \%:" cueded to Sicu-burough, where an arch crowsur; thigh way decurated with roses, bure the inscrif "unical we stand." At IVoodstocto the bridgo v, urnamented with ,incteen archey of evergreen ..nl flowers, festooned with taste, and each bean the name of a stale; and on a twentict? were rill. teen stars. He ..ligbted frum the carriage sor \(\boldsymbol{1}^{\circ}\) thater them. At Jorthand there \(f\) is anuch pay, it mill cercinony, as has already been montionce. : Aingish whuly in the harbor were decorated orial Nags and in the evening wath lamps. The illutar.. dion was very' general and splendid. As Mir. CLy'er party where lie spent the eveniny, 300 persons wire present. At jbithe Thatchet's, where lise breathoned, 11, a. Samuel Clats, in the gyth yoor if his orit.
 with the simplicity of a chtistian and nfice iom or a

felings were evidently toucheer, especi-lly when the giod nl? inan rose, and with all the dignity of :in ancient patriaich pronounced his parting blessine. -

It \(\Pi_{\text {over }}\) N: If. he was addressed on belalf of Whis people, and spent the evening at the scat of IViviam Ilake, es 7 . At c'oncord he was haulsomely received by the stlectmen and a committee of the citizers, with a dicplay of troops, clischarges of artillery, \&c. After refreshments, the address was presinted to him on a stage erected for the purpose, amidst the acclamations of the people. At Tinner, he gave ior his toas:-"the town of Concord -may it inhajitants continue to flourish and prospas.: He was very generally visited-judge Wal ker, 80 yeans chld, paid liis respects to him. He took an excursion on beard a pleasure boat, decorated, \&co. for the occasion, and called the \(P\) 'resident, or ned by J. Langdon Sullivan, esq. on the Merrimack, and cxamined the locks and passed through them, \&e. He retumed by land, and spent the cyeningat col Keri's-atended divine service thenert day (Suralay the 20 th of July) and left the place the following nowning, greeted with musie and the hiszzas of the pepuliace.

\section*{FOlर'ITANi) ATHRFRAS}

\section*{ISay it please the presitens of the linited Situles.}

Tlie committee of arrangemems wait on you, sir, in behalf of the citizens of Porland, on your arrival in this town, to tender you the lomage due to the clicf magistrate of a free republic.
A vi-it, for the first time, to this place, of a personage of such, high distinction, who has so recently been fected, under such favorable auspices, to wioht the destinies of a great people, will he expectad to excice no ordinary sensalron, We see in jour elevation to the chief magstarcy, a fellow-citizth of Sreat esperience in the policy of nations, and one whose life has been spent in the service of his niWive comiry. We liave ever been among those who have deemed experience to be the only correct source of F litical wisdom, and have never ceased to place a highe? value upon its precepts, than upon the thico"ite of imagination.
Four tour through the union evinces how highly yols wheciate the knowledge, derived firm your osw utselvation, above the uncertain intelligence, collectid fion oller sources. And the earty peria.d of your peesidentinl term, at which this tour is ommeniec, ausurs auspiciously to the great inte. yeat of via' crimmon country. May all your efforts in pramicte the hinnor and advance the prosperity of ine ri. tion, be duly appreciated by an eulighrened - 5.1 gratein! people.

Here, sir, yyu behold a town once a victin to the War of that revolution, in which you conimenced mour patriotic career What you now see is but the Plenix from its ashes, reainimated and invigorated hy the vivifying isfluence of the federal con. stiturin. To the fostering care of the general government, 10 its protecticn and encouragenent of commercial interests, we are indebted for the pros perity we have enjoyed, and on its fiture protection and encouragement must we rely, for the accornplishment of our best hopes.
Perimit us, sir, to bid you welcome; to present you withethe respect ful salutations of our fellow citizens. May your visit, hore, afford you some p.rtion of that satisfaction is imparts to others. And be assured tiat in all your exertions to promote the puiblic welfare, you will be aided and supported by the patrio tigem of this section of the union.

Under your administration, may our civil, reflgious, and literary institutions be protected and etrcouraged; commerce, agriculture and manufact ures fostered and promoted, and that freedom and independ ance which, in the field, you labored to achieve, Ulefended and preserved.
That your hands may be strengthened, and your heart encouraged, in the discharge of the high dutics of your office, we would coinmend you io the favor of that Being who is the fountain of all power and wisdom, with our ardent aspirations to Him that your life may be long and happy; that the union of these states, our republicau form of govern. ment, and the prosperity of our beloved country, may be perpetual.

\section*{In belardf of the committee of arrangements, \\ ISAAC ADAMS, Chairman.}

The answer of the president was full and affectionate. He repeated the leading objects of his tour, aniong which was an examination into the state of conmerce;-Tha: in pursumg these objects lic had every where mef the most respectful attentions, and fricncly reception; and particularly so in Portland. He spoke of the great importance of commerce, as it respected the conmtry at large, and this section of the union in purticular, and that to'encourathe it, with other institetions, and to preserve and nantain the union, indejecndence, freedom and prosperity of the nation, would be his constant endeavors.

\section*{AIDRESS OF THE CLfegy.}

To the presitient of the United States.
\(\mathrm{S}_{1 \mathrm{n}}\)-The ministers of the Lord Jesus Christ of difllerent denominations, in Portland and vicinity, anid the congratulations of their fellow-citizens, would \(110: 5\), in a body, tender their respectriil and christian salutations: Opening to you their bosoms, revered sir, and imploring on yon the divine presence, guidance and support, as the father of a great and happy people: That you may liave, in cont inutince, a prosperous joursey, by the will of God, through the northern and western parts of these United States, a safe return to the capital, and to the bosom of your family: That the morning of your presidency, \(b\) a morning without clouds, whici has thrown such a lustre upon our public affairs, and occasioned such surprising harmony in the public feelings, may indeed be as the slining light, which slineth more and more unto the perfect day.
And when, sir, your hands are heavy under the weight of a nation's cares, be assured the intercession of cur closets, and of our altars, (aninated by the grateful remenlsance of your presence amongst us) sliall be niways going up, to the mercy-scat in your belaalf: That throughy our instrumentality thie beallt; of the Lord our Ciorl may be upon us, and liis glory appear to our children. And having seryed your gencration according to the will of God, in a grod oll age, and full of days, and of hortiors, may yoit be gathered nnto the illustrious fathers, who rest from their priblic labors, and enter with thear into heavenly glory.
'The president's reply, as near as can be recollected.
Gentemen-Amiong the numerous tokens of respect, which li:es been shown me by my fellow-citizens, during riy present tour, undertaken to advance the public interest, I have received none more grateful than the one I now receive fiom you, the ministers of our Lord and Saviour. Be assure that the kind sentiments of your affectionate address, especially those which reigurd my person, are warmly reciprocater

S proper reverence for our Maker, and indeed seligion in general, leaving all men, lowever, feee to act agreeable to the dictates of their own cons. sciences, will ever meet my approbation and sup tort.

I am sensible, gentlemen, that I cannot do justice 10 your address, in this summary reply, I must therefore conclude by repeating to you the assurance of my great satisfaction in receiving this tes. timony of your regard, and by requesting you to ac. cept my thanks for your respectful and christiar salutation.

Addreases were also delivered to him while at Bort. land, by deputies from the towns of Bath, Wiscassett, Brunswick and Topsham, inviting lim to continue his tour further eastward, to which he made the following reply:
Fellow-Citizess-I beg you to be assured, that it would afford me great and sincere pleasure, to proceed to the towns which you represent, and even to Castire, if imperious circumstances did not prevent it. I undertonk this lour, to acquire information, by personal inspection, of our principal harbors, of the entrances into them, of the state of tise public works, and of the points at which it might be proper to erect others, and it was my object to embrace in it the Atlanic coast, to the extent mentioned, and the inland frontier, as far as Detroit. I wow find, notwithstanding the exertions which I have made, that if I proceed further to the castward, I shall be compelled to abandon all the western part of my contemplated tour, or be tlorown out the lakes at an unfavorable season; and shall likewise be detained from the seat of froFernment, longer than a due regard, for other in. portant national interests, will permit. I regret, therefire, to be compelled by these considerations, to terminaie my inus, eastward, herc; considerations, which will, I doubt not, have their due weight, with you, and my other fellow-citizens of the district of Maine.

I ain happy to meet liere deputies, from so many of the cowns, in the eastward, because, from you, I shall receive much information, touching your local interests, which will be uscful. I shall pay io it, the utmost attention in my power.

I am aware, that the prosperity of the towns in this district, and may extend the remark to the United States, depends on the prosperous state of their commerce. Nothing is more just, than that our trale with forcign jowers, should be placed, in every branch, on a fonting of reciprocal and equal advantage. - It gives me pleanure to state, That this important interest, has already received tie convideration of the national councils, and that I have no doubt, it will continue to be duly attended to until it is placed on a just, and satis. factory footing.

On all the great concerns, of this highly favored and happy nation, there is but one eommon interest. We are all equally interested in preserving our present republican government and institutions, in their utmost purity; we are all equally interested, in adopting suitable measures of defence, land, and naval; and in the proper protection and encouragement of our commerces and it is highly gratifying to me, to witness, in the whole extent of my tour, that great harmony of opinion prevails, an all these important points.

JAMES MONROE:

\section*{Marme. Anmess.}

To the president of the United States. Exa-As catizens of Maine we take the Jiberty to
meet the clief magistrate of the nir \({ }^{*}\) m, on his en. tering our district, and to pay him narpe pants-lc being the first time a presilent of th l lil rat states has visited this section of the comm: ry, \(i\) is a cource of peculiar satisfaction to meet all? ?rm the whose private virtue and public alminiolrail) have been so much and so justiy admirid Ly the people of Maine.

Permit us, sir, for ourselves \(a n, 1\) untr friends, \(t\), congratulate you on your election as president: to bid you a cordial welcome to this part of the union; to tender you our services to alleviate the fatigues of your journey, and our wishes and exertions that all your labors for the people may be received with gratitude and crowned with success. - Through the wisdom of yourself and your co-patriots, the patrio. tism of the people and the favor of lieaven, you have the singular felicity to receive the voluntary homage of the nation, and to wiusess its peace, prosperity, freedom and happiness.

Ihis joirney, like the journey of you: lif, is commenced and pursued for the prablic goon.
like that, its fatigues have been endured with patience, its obstacles overcome with perseverance, its storms encountered with firmness, and its re. fueshing sunslines relished with eqlianimity and gratitude-In each, as you have arlvanced, you have acquired addi:jonallonor, reverence and love In your future piogress in both may your healiti be jreserved, your countr's prosperity and glory se. cured and the affictions, confilence and uniois of the people, increased and comfirmed.

And when these respective journies shall be end ed and you return home, may you at the close of the one be reccived in health and happiness to the embraces of an affectionate family, and of the n! he: to the fuvor and frextion of Him , who will never fail to reward the sreat and the gool.

The president made an extemporaneous rejlly, and cxpressed "the high gratification" he folt "in being thus met and received by gentlemen, for whose private virtues ant public claracter he entertained so much respect."

\section*{concord anmress}

To the President of the Unitent Suttes.
Srr-l'ermit us, as the organ of the citizens of Concord, to express the ligh satisfaction we feel in beloolding the president of the United States in ous village, and in having an opportunity to present you our most respectful acknowledgeinents for this distinguislied honor.

All hearts, sir, bid you welcome--W'e deem it a peculiarly happy curcumstance, that in divcharging the important duty of examming the works of de. fence on our exterior lines, you wisness universal cagerness and cordiality in the silitations youre. ceve in every place you visit. Upon tha auspicio is occasion party feelings are buried, amd buried we would bope forever. A rew era we trust is cmmmencing. The leading measures of the gerocial government accord remarkably with the view and principles of all parties; and your private as we!! as pyblic character furnj̧il us a plalge, that yoos
will endeavor to make your adminisitition \(\times\) blisbily to our country. And we pray God to grant yon success, and have you under his holy keeping.

Accept, sir, our best wishes that your present four may be eminentiv useful to the nation, bott in uflurding themsecu"ity arsainst their chemies and brion amolisst themelves.

THOMAS IV. THOMPSON.
Julv 18, 1817. for the committee.
To this address the president midle an extem. goraneous reply of some length.
guvernon pleven's dxytien to the flesispent. Aew-Hampshire, execuiave dipartment,

Џepling, Jtlx, 18, 1817. Diar Sir- \(I\) i is to me a subject of much regret, that i: \(y\) your tour through New.Hanpshire, I have been unable to pay you that respeciful attention, and those personal civilities, whicin I cunsider due both 10 your private cha acter, and official station. Y'u were verbally informed, while at Portsinouth, of my severe indisposition; and I am now obliged to add, that I am still confined to my elamber and bed by an attack of the typlus fever, which has not yel, If ar, reached its crisis. This unfortunate event has deprived me of the satisfaction of a per somal intervitw with you; and prevented me from foceiving a visit at this place, with which I bad flattered iny self yorl would have honored mre.

A militiry escort having been called out by the furemors of some of the states, to accompany you through those parts of the commtry, I was desirons that the same tribute of respect should be paid yout on your passage through New-Hampobire. The power to cald out such an escort seemed at first wiew incident to the nature of my office as coymander in chinef of the militia; yet so acourately is this command defieed, and so cautiously restristed, by the prudence, or the jealousy, of our state constitution, that I have authority at no time to order out the militia, except for certuia known objects particularly designated in the constitution and by the laws enacted under it. I have though proper to make this statement, both in justice in inyself, and to the state over which I presike-a state which yields to none in the union, citber io attachment to the general government, or in respect to the distinguished individual, who, with its full consent and approbation has been araised in the first office in the gifi of the nation.

This letter will be delivered to you by the secretiry of state. Had my health permitted, I should have taken great pleasure in waiting upon you in per, on during the time you rematined in this state, and in suggesting some objects of inquiry, which might perhaps have merited your attention in this part of our common country. But in my present eondition I can only add my sincere congratula tions, and my best wishes fur the successy of your adininistration, which has commenced under circumstances peculiarly favorable to yourself and to olir beloved country.
I have Uhe honor to be with the highest personal respect and esteem,

Hear sir, your most obedient, humble servant,
WHLLIM PLUMEER.
James Monnoe, President of the
United Slates, nozo at C'aracord, N: II.
atorhe president, having visited several places in Vermont, embarked on board one of the stean boats on lake Champlain, and examined its posts and memorable places-visited Plattsbuigh, reached Ogdensburg on the 29th of July, and was expected at Sackett's Harbor on the 1st August. He had been joined by maj. gen. Brown.

\section*{Foreign Articles.}

\section*{T begilanh, \&e.}

Wastoń, sen. Preston, Tuistlewood and Hooper, were arraigned for high treakon, at the courc of King's Bench, on the 9 th of June. The irials appear to have much excited the public attention. Subscriptions, by a placard publicly posted up, were reguested and readily obtamed in rep \(y\) flic expense of the defence. Great jomp and ceremuny has been nbserved on the nccasion.
"rhe captain of the yeoman, or gentlemen jailcrs, and the lieutenant of the tower," says a Liundon paper, were placed by the side of Watson at the bir.

Heing arraigned, the attorney-general mored, that the prisoners, as they insisied on the right of challenging jurors, should be tried separatel!; to which lord Ellenborough assented.
The indictment consists of four counts and a great inany specifications;
1. For compassin's ant imagining to put the kiing 10 death.
2. For compassing and imagining to depose tho King.
3. For levying war against the king, on the 2d. Dec. 1816, at the parislr of St. James, Clerkenwell, \&c.
4. For conspiring to levy war against the king, in order to compel him to change his measures.
It will be recollected that a British sloop of war, called the Tay, laden with 800,000 dollars, was lost on the coast of Mexico, some time ago. The vessel was surrendered to the Spaniards as a prize, and the officers gave up themselves, and their crew as prisoners of zoar. A court marthal, investigating the subject, has justified the officers in their conduct, deciding that the only way they had to prevent the flag from being insulled was to strike it, \&c. on accoint of the treacherous and outrageous conduct of the Spaniards. The subject was before parliament, \& Castlereagh stated that the proper remonstrances had been made to the Spanish government in respect to it.

We have long accounts of the riots of the people of treland, for want of bread, of the attacks upon places where flour, \&cc. was deposited, and the defence by the military, and the like. In some of these affrays certain persons were killed. The saying that "hunger will break through stone woalls," has been literally fulfilled, in several cases. Many have been arrested to answer their crimes.
A motion was made in the house of commons on the 10th of June for a list of the number of persons and their names, ages and places of confine. ment, under the suspension of the habeas corpus act, and lost-the vote stood 104 to 53 -majority for ministers 51 .
A proposition to prohibit the export of corn to France, liad been before parliament. Lurd Castlereagh opposed it, considering it unnecessary, as the difficulties of that country were nearly overthe rye harvest being about to commence.
In Nottinghamshire the riots have heen pretty formidable- the people cried out for a "revolution." But the military checked them and apprehended 30 miserable wretches. l'art of Yorkshipe, Leicestershire, Derbyshire and Cheshire are exceedingly agitated by mobs. The lurds lieutenants have been ordercd instantly to repair to them. Many are arrested.

HoUSE OF LORDS.-June 12.
Report of the committee of secrecy-Further suspet. sion of the habeas corpura..... को in

The earl of Harmowby presente! - tint irom the conmittee of secrecy, which was read by the readin clerk at the table.
The repart began by stating, that the committee had taten into their serious consideration the paper refered to \(i\) the princeregent's inessage, an! il eyfeel it their duty to state, that it appearerd Forit the evidence tefore them, that the practices, meetiors and co ubinations, alluded to in their former rejura, still centinned in various parts of the connty, having for its wiject the overthrow of the constitution and yoverment, and the destruction of the es ahlishe! system of order and tranquility. The evidencef(tion which they founded their opinion, was in part đerived frum persons implicated in these tranactions, anil frum individuals who had participated in them, witb the vie.* of m.king communications on the subject to the magistrates or to the 6-cretary of state. With resoect to these latter persons, t:e com nittee \(t\) inugho it righ: to state in some instannes they luad urged on other individuals to acts of violence, instead of merely watchine that they dil-Making, however, eve:y allowance for the exaçerations which had thu arisen, the committee had evidence before them of the accuracy of which there was no doubt, that the dis. affection to a consilerable extent prevailed in the manuficturing district in the norithern parts of the k"Igdom. It was undonbtedly true, that in some of these listricts there exisied considerable dis-tress-bat it was equally true that the distress which 2ctually existed was used ss an instrument in the ha.ads of che desiyning, rather than operating as a cause of the disaffection, it being the fact, that in inang districts where equal, if not greater distress exted, the people evinced the greatestloy. وly, patienceand resignation.
The committee had found that since the last report the praciices at 1 inchester had been contifued, and that a inceting was sunmoned to be heid there on the 3 d day of March, which was numerously at ended, and at which the most inf am matory langunge was used. It was proposed and agreed to at this meeting, to hold another meeting on the 10th of March, and it was recommended that 10 out of every 20 assembled on tise liste: day, should be in readiness to proceed to London, for the pretended purpose of presenting a petitus to the prince regent, with which view they were: provide themselves with blankets, shoes, \&c. The meeting war hel. 1 , an? attended by fom 10 to 12,000 persons, notwill:standing some of the ring'edders had bren previ usly arrested, nul the project of proccelling to l.millo was uiteapied to be cer riel ïto effect; but the deluded individuals were 8 oppelf lurough the activity of the tnagistrates at different shourt dist-mees, and compelled to retrice their zeps. It appearal it was held out th them that they woild be joined on their road by large bodies from difflent towns, so that by we tinie they arleaiced towards Lodon, they would be 10000 ) rong. The grossess delusions were in fac held vul to the persons assembled upun the occisi on, nur conll the project uself be considered in any other light than as directed agrainat the pub lic trauquility, which must necessarily have theen considerably endangered by the attempt of a considerably borly of men to ailvanice in the manner propowed to 1 avidon.
Afer this period, it appeared that the additional power entrusted to the guveriment had some effect, and thas nutuerons nieetings were not atceapted to be held, but secret metings were attempted in remote places; and though some soci-
eties weit rucen up. and stme public houses would not receive them, they contrived to assemble in other inouses in a lonely situation. At some of these incetings the most indivguisel lanyu..ge was used; it was no longer Parlimentary Reform that was il up as a pretext, but Reroturion was openly advocaterl; the individuals attempted to be influenced were called upon to provide arms (though the conmittee liad beei unable to truce any arrangement male for the ace.ual nrozuring of arns,) and it was evell held out, that persons i:2 ofice, and others obnoxious io them, ought to be got rid of. A general rising was contempl. ted in A pril, but from some circuinstances it was put of :ill June. In the mean time, nuinerous mee' ings in consequence of the additional power nlareal in the hands of government not being ileemed act. visable, a system of delegation was establishied, and persons calling themselves delegates assembled at different places. It was beld out, that it would not be advisable to commit much to writing, and yhat the names of the leaders should be as mich as possible conce.led. These persons calling themselves delegates, repeatedly assemble 1 an. 1 kept up an extensive corresponilence. An a-scinhly of these delegates was hel 1 at a town in Yo hashire, early in May, at which it was determined that a gencel rising should take place on the loth of June. No:tinghan was to be the liead quarters of the insur. gents. They were to obrain arms by plundering the barracks and other depots, and io march in a large body to London. It appeared that the corm spirators hadd even gune the length of conternplate ing the destruction of lanchester, for the pur: pose of adding to the disconient, by throwing a great number of persons oist of employ. Thesignal was to be given by a rocket belly fired: upon which the manufactories and other buillings were to be ilestroyed. The project was frustrated by the uctivity of the magistrates; and it appeared that the project of tlie general rising had been frustrat. ed; but there were some districts in which the par. ties had determined on risinf, wotwithst andme the determination of this meeting of delegates; and the evidence hefore the commitiee upon this subject had been corroborated by the inforination reccived within these few days, of bodies of men beling in .rms within the district to which the practices at? Iuseri to were ci iefly confized.
The conmitice, in taking this view of certain purts of the criuntry, which were uif irtunately ioo wa h supported ly the evidence and docil nenis before thein, felt it their duty to state, chat in othee I suters chere was a general feeling; of loyaliy and - aedment to the government; and that, even in the disturbed districts, the greater part of the peowe were loyaily atiarhed to the government, The m-gistrates had displayed the grextest activity in fruserating the projects of the doaflected, and ciey were powerfilly ai lad by the losi-1 part of the population. Tie magistrates, however, were of epinion, that the most effectual means of putting down the disafficied, and frustrating their projects, had arisen out of the alditional powres pliceal in tho hands of governmentiand the commillee ware of on:nim, upon the whole view of the case, that iin onder to frustrate effiectually the project of the disifiect. ed, it was absol:trely necessary to cont imue thic ajditional powers vesterl in the hands of covernment, the ordmary haws being insufficient for that p'rls pose.
The earl of Harrowby mored that the report do lie on the table, and be printed, which was urder. ed.

The earl of Liverpool gave notice, that if the printel copies of the report were read to-morrow, which be expected, it was the intention of a noble friend of bis (Lord Sidmouth) to bring in a bill, for continuing the act for enabling the government to detain in custady persons on suspicion of treason (Habeas Corpus Suspension.) In case the bill was presented to-morrow, it was intended to move the second reading to-morrow.

Lerd Castlereagh in a debate in the honse of commons, May 9, stated that in the "political arrangement," as he called the system of robbery and spoliation at Vienna, "the question of religion was wholly abandoned." He declared to the house, "that not one roord was uttered about it."

\section*{prance.}

A woman, dressed in black and holding a white crucifix, has been taken up at Paris and committed to the care of the prefect of the police, for marching through the streets "to confirm the revelations of the archangel Raphael, concerning the reformation of religion in France," and crying out-"Repent! refient! - woe to Putis-woe to France!"

\section*{ATMICA.}

Mr. Shaler, our consit general, is on a tour of duty through the Barbary consulates.
The grand seignor has paid many high compli. ments to the dey of Algiers, for the firmness and energy he displayed in the late attacks of the "infidels"-among other things, he has presented him with a captain's dress, which is considered as the greatest mark of honor. He has also given him a frigate and a ship of 400 tons, laden with munitions of war. There were great rejoicings at Algiers in consequence of these events. The dey's fleet now consists of 1 frigrate, 2 sloops of war, 3 18-gun brigs, 1 18-gun schoonej; and one sloop of war on the stocks, \&cc.

BRAZIL
We have intelligence from Brazil to the 17 th of June. Though Pernambuco is in the hands of the royalists, and Martins and some other chiefs have been taken and shot, it seems that a patriot army was probabdy in force in the interior, and may serve as a rallying point for the disaffected, with whom Brazil abounds. A general insurrection appears to have bsen intended, which prematurely broke out at Pernambuco, and in consequence many arrests are making in all parts. These ideas are strengthened by the fact that the royal forces at Pernambuco have been greatly augmented since the submission of the place. Several vessels have been sent into Buthitt for a violation of blockarle.

There were 71 state prisoners at Bahia; most of whom, it was supposed, would be put to death.

\section*{florina.}

A New lork paper says that A'Gregor has issued a quantity of scrip, made payable by the delivery of lands in Florida to the holders at the rate of 50 cents per acre, if he should come into possession of it, or to be paid in cash with interest; on which he is said to have raised upwards of 200,000 dollars.

Mr. Ifubbard, sheriff of the city and county of New York, we learn by the papers of that place, having most honorably adjusted the affairs of his office, resigued the same, and lefit the city in a vessel that he himself had fitted out, to join M'Gregor.

Accounts from Amelia island to the 20th ult. in. Form us that McGregor then remained there orsanizing and augmenting his forces, and in set\&ling the executive and judicial departments of his *inquest. He is said to have conducted himself with
great mildness and propricy, and his great object seens at present ta be to secure the possession of the island as a rendezwous for the many vessels sail. ing under the patriot flag. The following is another of his proclamations.
Gregor Mar Gregur, general of brigade of the arimies of the united provinces of \(\mathcal{N}\) erv Grmadd and lonezuela, and general und chief of the army destined egrains: the Florillas, duly cominissioned by the sutpreme vovernments of Mexico and South Americn, Efc. Efc. Inhabitants of the north and zvestern districts of Eiast Flovida!
The evacuation of Fort San Nichalas by the Sp:nish forces on the four th of this mandu, has placed the adjacent territory under the control and proteetion of the independent government. I loie no time in assuring you of the enjoymenc of yuur civil liberty, the preservation of your rights, and the protec. tion of your property. I would extend to all those peacefal citizens living in or adjoining the waters of the St. Mary's and St. John's rivers, and the isl. ands and country intervening, all the arlvantagess to be derived from the third and fourth articles of the capitulation of the 29th June, on the surrender of this place-a full protection of their lives and property.
Let not a fear of rapine and spoil drive into opposition or disturb the well disposed inhabitants of Florida. Other and more glorious motives impei those who fight in the cause of liberty. Continue in evince your friendly disposition by remaining quiet. Iy at your homes, in the exercise of your domestic employments, and such conduct will insure its re-wards-Join not the ranks of our enemies, nor aid them against us, or you will be met in the spirit ot hostility, and your persons and property must share their fate. Rely on the assurances of candor and truth-do not compel us to oppose as foes, whom we would embrace at brothers.

Meal-quarters, Femandinti, July 12, 1817, 7 and 1. Ginger MacGiregor.

Tlis question, which sprarg from the 33 Cl section of the act of congress of the 24 h Sept. 1789 ; from limited riews anil respectfill doubes, has risen to stemn decisions, ant excited so much attention as to be likely to agitate en gress, and toattract the nn tice and warm the feelings of the people. It wonld s-arcely afford a sufficiency of interest to awaken the alteilion, or bear usp the mind throught the tedio s, and appirenty rusged paths of constitutional a fanneipal law, merety to ascertain, whether the petty and inferior julici. I oficers of a state might be called on 10 lend their aid, and be used for the humble purposes of preparawory, incipient, or ancil. liary i'l tice, were it not that it inv lves this great qu sima, in which it will be at ance porceiver!, some of thon inost valuahle principAes of our constitution are embraced-which principles, to be understood as they ought, require to be traced to their several sources, laid down with accirracy, and exlibited in the farest and! stmongest lights:

Whet?er a court, or a justice of the peace of a state call be culled on, and used in expound and enfor e the criminal law of the general government, has been a question offell agitated and much discussed in congress, in the courts of jnstice, and be. fore the people, bit never furally put to rest. In congress, apparently from motives of expfdiency, a decisiou seems to have been waved; in the federal courts principles have been laid down, and opi nions incidentally expressed which would exclide congress fiom such a power; and in some of the courts of Virginia, \(\mathrm{O}^{\prime}\) io and Maryland, sulemn ar!judicatsons lave been given against the right; thite in some of those of l'ennsylvania and SouthCarolina contrary determinations have been had. The fature and the importance of the case of Almeida, connected as lie was with the cause of fieedom in Spalish America, which in all its furms is so interes ing to the people of the United States, brought this great question again before a court of justice, after it had apparently slumbered in forgeifulncss for some years, and presented it in a more regulated and ciblaged form: slowed it in some new lights, and f: se it a currency it had ne. ser before obtainert.

This, like most puiticul questions of any magnitude, brenns already fol liave aronsed and cnlisted the intere 13, the feara and the pascions of the courtending purties; who, instead of unclertaking a pafient examination, or severe scrutay into the nature, meauing and objects of our constitution, of of boro rowing light from past exanple and experience, suffer their minds to tre fitted with apprehensions and prejudices, and their attention to te directed, with rude clamor, exclutively so theconsequenees of excludiug congress fiom the exercise of sucl: a right, as imaginary as they are intented to be alarming. It is asecried, that "without the aid of the ministerial oflicers of the states, to have the laws of the United Slates effectually executed against u

\footnotetext{
- Hcfore the reader proceeds with this investiga. tion it will be best, or indeed necessary, that he slinuld turn back to pages 114, 271 and 264 of this volume, and read, with attention, the opmitons of Judges IBland and Hanson, in Almeida's cal e, and alsn tlat of Julge Cheres, in lundes'eath
}
few offenclers, iprobabiy not one hundred in a year in all the states) it woulc! be necessary to appoint and scatter orer their vast ter-itory many thousands of justices of the peace, coroners, constablec, \&ce" -that the introduction of a patronage so vast ant voracious would devour, at a meal, all the useful influence and valuable checks and halances of the states; that to wink at contradictions, to pass by confusion, and to endearor to pacify the most provoking collisions by inculcating confidence, swect and humble conffience, is "gond law am'l better policy \({ }^{3}\); or, with the most alluring and courtly accents, it is denied "that jealousy is inculcuted by a true understanding of the constitutions of the states -that it is necessary to the preservation of state rights; or that it can conduce to mational happiness, or national greatness; that it may make us busy about some little factious privileges which are in no danger-but that a regulated liberty, under the protection of stable institstions, will be best and longest secured to us, by regraring the government of the union in a spirit full of confidence-1n a tem: perdevnid of jealothsy."

Fitirely in calm the feelings, remove the prejuc dices, and direct the enquiries of every one into the proper channel is nnt to be expecied. IBut, I flater myself, that I may be enabled to contribute something towards a dispassinnate and correct exposition of our constitution in this respect. And, howerer tedions, ungrateful and burren, portions of the ground over which we shall travel, and which we shall find it necessary to explore, may be in apper.rance, yet it will be seen and recallected that they are connected with, and parts of the land of frecdom A ud whoever would wish to form a correct estimate of our admirable constitution, of its stuength, durability and beauty, must not confine limself to a general yiew; but mast enter and examine each apartment, notice the materials, closely inspect the manner in which they are cemented, and theu contem. plate the whole grand edifice together.

I shall, therefore, find it necessary to enquire. what is meant by judicial power? because the yuestion itself first arose from that source-and, as it has been contended, that "the judicial power of the United States," spoken of by the constitution, has something in it peculiar to ifsclf, it will be proper tos see whether those peculiarities really exist, and what they are. As in the expositi n of the constitution it will be necessary to lay duwn a standard of interpretation, and to avfertsin whence it may be derived, it will be uteful to turu asile, for a mo. ment, to bestow a few reflections on the question, whether the common lay of lingland is in force in the Vinited Stutes as such? or whether they can be said to have a common law, and what is is uaturel And, since there is a difference of opmion as to wha is the true nature of judicial power, it will be welt to enguire, whether there are not similar restric. tions, w ith regard to legislative and executive or ministerial power, to those which render it incompatible with the constitution in transfer any of the judicial power of the union to the officers of the siaten? - And, by way of fortifying the principles so established, I shall gatlier togellier some of the past examples and expericnce, with the opinions of a few exinent men upon the subject, so as to satiafy every impartial person low much less dangerous it is to resint the little additional influence of a few inferior judicial officers, than to avert, or overcome those rancorous onllision, athl the paralyzing effects which always do ald will incritably arisc, from a reliance ou requistions, and from a dependency on. state oiticere, as agents, to execute thelaws of the
ation-snd, finally, to shew, that unless the judienary of the union is completely organized, it is impossible the constitution can operate as it was intended, move in its proper sphere, or according to its true principles.

As to the first enquiry, What is meant by judicial priver?

It will be necessary to trace, with the most mimute and perspicuous accuracy; the nature of judjcial power in various directions, as well when exercisert by the lowest as by the highest officer of the government; for, Heither name of office uor forms of evidence, nor degree of cri:ne or criminality, nor value have any thing to do with the abstract natime and character of judicial power. It is deemed best, in the first place, to ascertain what is the idea uniformly and universally annexed to such power by the common law; not that a doubt is entertained, that the ilea of judicial power, according to any other code, will be found essentially different from titat of the coinmon law; but, as the language of that code is more familiar to us than any other, and abounds more in intelligible examples, the idea of this power cam be more fully and distinctly ilhas. trated and explained by it than by any other.

The capucily, uuthority, or discretion to chetermine on Gny matter, which is in some form or zway the subject of litigation and controversy, is juticial power; and he who exercises such authority, performs a judicial act But it would be taking the definition too large to say, that erery act, where the judgment is at all exercised, is a judicial act; for a judicial aot is supposed to be done pendente lite of some sort or otiter-3. Burr, 1262. Athough all judgments are said to be those of the law, and that the magistrate can render none other than those which the law vill allow, yet the idea of a deģree of discretion, and of a right to exercise the judgment to some extent, is always annexed to judicial power; for although the judgment does not depend upon the arbitrary caprice of the judge, but on the settled and invariable principles of law, yet what that judg. ment shall be is the result of deliberation and study -and, therefore, the judicial discretion extends only to the application of the rules of law to the facts and circumstarices of each case-3. Black. Com. 305. To declare what shall be the rule is a legislstive act; but to apply the rule to the case is a judicial act. And this power of applying the rules of law to cases presented for determination carrics with it other incidental powers-as the right to judge of the competency, pertinency, and credibility of evidence; and also the rigit to call for tesimony in the best and most authentic form; 10 issue summons for witnesses, \&sc. But, in all criminal prosecutions, and in most civil cases, this power of deciding is divirled between the judge and the jury; the one ceterinizes the competency and pertinency, and the other the credibility of evidence; yet in both, by the jury, who, in criminal cases, may decide on law and f.cl, 110 less than the judge, who is, most generally, confined to the mere law, the determination is a judicial act in all its character, features, and consequences. This capacity to exercise the judgment for the purpose of removing doubts and deciding on matters which are affirmed on the one purt and denied, or presumed to be denied, on the other, is always accompanied with a pe:sonal confidence and trusi; therefore, no judicial power, lawever small, can be, in whole or part, transferred, assigned over, or delegated, by the officer who has been clothed with it to another.Cald. 31-6. Mod. 87. Another of the consequences Qowing from the incommunicable ature of judicial
rower is, that it cannot be exercised in the pame a? the principal, by tleputy, in any case whatsoev. \(\because\). Jucob. L. 1) verb. deputy. And, as this power camot be exercised by any other than the individual to whom it is granted, so neither can it be exerted upon any other subjects than those to which it is extended; or within any other territorial limits than thinse prescribed in the grant of such pover - 3 . \(B\) acc. Abr. 798. All acts of jud ment required of two or more nersons must be done toyetber; because they should counsel with each nther- 5. T. R. 38,380 -8. T. R. 454-8. Eis: 327 . And as the revi:ing authority of the supreme judicial power relates altogether to julicial acts, the superior court will not, in any case, remove the proceedings of an officer, before it for that purpoce, when the oflicer does not proceed judicially; but i- entrusted with a dis cretionsry power in matters of revenue, compensstion for services, pensions, and the like.-Cald 509 -Sayer 6-2 Nall 410, note.

These principles may be regarded as the tests by which it may be at once ascertained, whether an act be truly judicial or ntherwise; b•t, by contrasting them with those relative to ministerial power, we shall thereby obtain a more perfect idea of both.

Where an officer is invested with discretionary power, whic! does not enable him in any way to determine a controverted matter; as where a man acts as an attorney or agent, or as a collector of the revenue merely, his official acts are ministerid and not judicial. In all cases relative to the adminis. tration of justice, where the manner and form of acting is prescribed, or the officer acts in obedience to a court or judge, his act is ministerial-as the clerk of a court, or a sheriff; or a constable, \&c. in executing process. In some cases a mere ministerial power may be assigned over, transferred or delegated, by the officer ho!ding it, to annther. Almost all ministerial acts may be performed by dleputy in the name of the principal. Some minis'erial acts may be performed beyond the territorial limits assignel to the officer invested with such powerCro. Car. 213 . As there is no discretionary authority to determine any controversy, in any form whatever, annesed to a mere ministerial power, it is, therefore, a general rule that the officer, who is invested with such power only, cannot administer an oath; becanse to do so is a judicial act-11. Stute Trials, 317 Where an nitineer, tiae general character of whose office and oflicial duties are ju licial, is directed to do a certain act, according to a certain prescribed form, by which he is cleprived of all manner of discretion to act in any other way than the manner laid down, the performance of sueli act is ministerial and not judicial. So, where the manner in whieh an officer should act is fully prescribed by law, and he has no judicial power, he may be siecifcally conmanded by mandamus or otherwise to do the act so prescribed-4. Bac. . Abr. tit. mund. mus, [D.]

Some few examples and cases will place these general rules and principles in a very strong and clear point of view.

The appointing of over-seers of the poor of a parish, by the justices of the pcace, according to the provisions of the statute, 43 Eliz. c. 2, is held to be a judicial act; because, they should confer together for the purpose of a communication on the subject matier on which they are to determine; and an apt peal lies from their judgment-3. T. R. 38-2. Eust 244. So the assenting to the indenture of a parish apprentice by justices, according to the same staa tute, is held to ben a judicial 2ct-3. 'T, \(R_{;}\). 380 .
3. T. R.454. So the making orders concerning the, closextit) way or other, vet he will not be cont: poins' ries, by the over-seers of the poor, are held |munded ts perform a judicial act in a specifc and to b judicial acts-Cu'd. 30-6. Mo\%.87-but the mere allowance of the rates, by two jussices of the peace, in the form prescribed by the atutute, is held to be a ministerial aci-1. Sira. 393. So the examination of a mother, and an order of filiation, in a case of bis urdy, is held to be a judicial act-6. Morl. 18J-2 Bia 1017. The authority given by the statilt of 1 Juc. 1, c. 15, to the commissioners of bankrupts to issue their walrant, under certain circunstances, to arrest and bring a witness before them, is held to be a judicial power; becanse they ought to hotit counsel together, and the order for such wirrant must be the act of their joint judg. ment-8. Eust 319. Likewise, the authority given th justices of the peace to hear and determine on an application for the benefic of an insolvent act, is he 1 to be a judicial power-2 Shozo. 74. And, also, the authority given by the statute of 6 . Gea 1, c. 21, is receive an information and inske a determination upon a seizure, under the revenue law, is held to be a judicial power; and, therefore, the superior comrt would not direct in what specific way such determiration should be made, but merely that it should be maile -1. Stra. 530.

B 11 , on tite other hand, in the rogistering and recreding of a meeting-house, under the statute called the inleration act, the court of quarter-sessions acis ministerially and not judicia!ly; because, when the specific forms prescribed by the statute are eompleted, the court has no discretion lefi-1 B/a. DU6. So an orler of the connty court, cone erning a conpensation to be allowed to an attornev fo:" gervices reudered, was held not to be a judicial proceeding. there being, 43 it wonld seent, no lis pendens-Cald. 309. The judicial power of a jus tine of the peace is circumiscribed to the county wherein the is appoited a justice; therefore, lie cannot issue lis warrm: in appethend a felon in any other coulty wan that within whici he is a justice; bcear eth is aing of such a warrant is a julicial arts mit may tak the examination of an offender, o of the \(\because\) lle esses against lim, in any other coun'y 20, in as in that on whel he beiongs: because the s.llate hiving prescribed the manner and for:m of sidh frimutiots, he is, in fict, nothing more than the omnth stenographer to t k - down what the accused o, te wineso whall declare; and, consp. quenily, is in surh purposes, \({ }^{1}\), is arts are marely ministerial-2. Hates, P.C.50,51-3. Buc. \(96-798\) - Cro. Cur. 213.

The nature of the act is not all affected by the ELneral char cier of the nfficer thy whom it is nerformed, as nuy be shown in a great variely of ittalics. The judizment mintered by the judres of a court, af er liearing and irial, in a civil or criminal case, is a judicial act of the most nbvious kind; ant is, therefore, acknowledised in lie such by eserv one. But if, in the course of a trial, a p..rty slonuld offer any testimon! which is objected io, and is, in consequence thereof, rejected hy the jul ger, the statute provides that, in such case, the party may immediately and correctly reduce such proffired testimnny to writing, in the form of a bill of exerprions, and require the judge to put his seal to itIn which cuse, the dusy being specifically prewerih. eft, the judge has no díiscretion; the act, so requir ed in be done, is, therefore, not ju licial but minis terial; and if the judgerefises, he may be compel. ted tus seal the excention by a writ from the supe rinr court-2. Fise 427. For although an inferior officer may be commanded to perform his official dukes generally, so that the party may have his case
desimnized manner-4. Bac. . 23 br 509.
Julkes and justices of the peace are, chiefly, ju icial officers; yet many of their acts are wholly ministerial-as in the instances where certain cis of the l-gislature authorise these officers to take the acknowlejgment of deeds, ard prescribe the eno lire form and manner in which such acknowledgment sh.ll be made, so that they have no discre. tion; it has been held that the taking of all acknow. ledgnent. in such case, is a ministerial act-3. \(H\). and \(: 1 F H .432\). The sheriff is considered as the principal ministerial officer of the courts of justice, and at present his duties are almost exclusively ministerial; but anciently he held a court and was the chief judge thereof; and even now, in many instances, he acts judicially-as in executing writs of enquiry, writs of ad quod damaum, and the like; and, therefore, in such cases lie cannot act by deputy; for, like all other judicial duty, that of the sherifi's must be performed in person-1. Blac: Com. 343. The cluties of a coroner are also of a mixed nature. When he calls an inquest orer the body of a deceased human creature, to ascertain by what means the death was occasioned, he sits as 2 judse, and acts judicially; but in all cases wherc the sheriff is interested, or in any way legally dis. qualified, the coroner is his substitute, and acts as the principal ministerial officer of justice -1 Blac. Com. 348 A constable is sometimes said to be ex. chusively a misisterial officer; yet it seens to be adnilted that there are instances in which even he :uay act judicially; and when he does so act, it is licld to bo clear, that the duty must be peformerd in per-in and no: by deputy-3. Burr. 1259-2. T R. 406 - Culd 294.

13y the common law there were a great variety of officers, who were recognized as keepers, guardialis, or conservators of tie peace, from the king to the constable. And their acts, as such, were, almoct all of them, minisicrial; because, they were, oftener than otherwise, duties to be perforined according to some established and prescribed form. Bil, when a court of record, (for such a court was, at common law, a conservator of the peace,) or a judge, or a shcriff, or a coroner, in certain cases, 2 Hale P. C. 107, awarded process to ap. prehend an offender, and compelled him in givo security to keep the peace, it was deemed a judi. cial act; because, such conservator was called ujon to exercise a discretion, and to form a judgment according to law; and, therefore, it was held, that the act was done in virtue of his judicial capacity3 Hiul. Just. 96. 2 Hale. P. C. 105; but, a constible could not award process to apprehend an offender; because, notwithstanding lie is, by the common law, a conscrvator of the peace, he cannot administer an oaih; ant, conscquently, has not the juchcial power ilecessary for sush purpose, Cald. 294. 2 Hile. P. C. 105.

A court is a place, where justice is judicially administered,-Co. Lett. 58,-and when cither a sherifl or coroner sits in his julicial capacity, he is said to hold a court; for such a scene is, us often as otherwise, spoken of as the sherifi's or the coroner's court. So, of justices of the peace, it is said, that the ordinary course of prociedings is in their sessions, which are of two kinds, priviete or public, the former of which is ordinarily fur the dek. patch of comusry busiuess, about ale-houses, poor \&c. the public sessions are of two kinds, the gene. ral quarter sessions, and the gencral sessions, that are not quarter scesions, 2 Male 1'. C. 48, 19.

And regularly all cour's ard persous, thet lar judicial poovere by the common ' \(a \cup\), or by acts of purs - haut for the conocriation of the preace, lume powert grant wearrants for wresing of felons; but such a. are simply ministerial and have no jurisliction, as constables, camot issuc warrants for that purpoise but must do their office alone, or with others cal. ted to their assistance, 2 II le P C. 105. And this judicial power whether execuied by the chief finstice of the nation, or an humble justice of the peace is an act of precisely the same na ure: it is one of those preparatory julicial acts necessary and proper to be exercised by some judge or other in erder to ensure an observance of the law, and in bring offenders to justice. It is, therefore, one of the common law juuticial pozers, and duties of all jidges and justices of the peace, 1 Hale. P. C. 579. 582-2 Ilthe. P. C. 107. 109

A partial quatation from Sullivan's lectures has, bowever, been adrluced to prove, that the deternination of a magistrate on the sufficiency of the evidence and grounds on which a warrant may or may not be issurd is a ministerin! and not a judicinl act. The whole paragraph, when taken fogether, howerer, clearly shews the reverse "JF"rst, then, says the author, for makin: mitumus a good warrant, it is previously necpssary, that there should be an information on oath, before a maçistrate aving lawfur authority, that the party hath commit fed an offence; or at least of some prasitiv fact, that carries with it a sirone nad viokert pressump fion, that he hath so dore: Next, then, the mittim? must contain the offence in certain, that it may ap. pear whether the offence charged is such an one as justifies the taking, whether it is halable, or such as the law requires the detention in prison. A warrant without the canse expressed, is a void one, anl imprisorment on it illegai, and so it was ad judged in Charles the first's reign, though done by the secretaries of s!ate, by the king's authority. with the advice of his cotincil; thisilly, the war Fant must not only contain a la ful cause, but have
 ed by lar*; not until the party committing doth farther order, for that would be to make the magistiate, who is only ministerial, jullicial, as to the point of the liberty of the sulyject; from whence mivit redound great mischief to the party on one hand, or to the king and public on the nther, by letting an offender escape." Sull Lect. 511.

The author is here speaking, not of the nature of the act of the magistrate in granting, or refirsing a warvant, but of the foundation, contents and quali. ties of a warrant to arrest and the mittimus to de tain a person acctised, for tria?. Ant, it is evident, he means merely io say. that when the m:gistrate has decided, the accused may be arrested and detained fur trial, his discretion shall then cease, he shall derife on nothing more, he shall not adjudge, that the prisoner be detained during his pleasure, or during any given time; for, that would be to render judgment, to pass sentence as to the manner, form, duration, and object of the detention, which, being accurately prescribed by law, cannot be departed from; to do so, therefore, as the author observes, "would be to make the magistrate, who is only ministerial, judicial as to the point of the liberty of the subject." Whence, it is evident, great mischief might redound; because, if the magistrate were invested with any discretion as to the form, manner, and duration of the imprisonment of the accused, he might, on the one band, detain him in a different way, or for a longer time than was necessary to bring him to trial, or,

In the other, the accused might be detained in sust T manner, or, fire so short a time as virually to auv. thorise an escape Hence, the correctness of the povision of the law, as laid down, that where it 1as been judicially decided, that a person shall shall he arrested and detained for trial, the magis. rate shall have no farther discretion; but, in the lancuage of the law, shall direct, that he be safely kerpt until delivered by larv. And, thercfore, the execirtion of the warrant and the delention of the accused, subsequent in the judgment, that he ought in lie arrested and detained, are ministerial not juricial acts. It is clear, therefore, that this paraHaph, so far as it has any bearing upon the queslion, rather fortifies and corroborates than militates argainst what has been hitherto advanced upon this subject.
There is, however, a passage in Hawkins, and I helieve the only one to be found in any law book, in Which even a supposition is hazarded, thast in granting a wartant a justice of the peace proceeds ra. ther more ministerially than gudicimlly-"An.l, per. hnps, says the author, there may be this difforence between the warrant of a justice of peace for such causes, which he has not authority in hear and deermine as judge without the concurrence of others, and such warrant for an offerce, which he may so determine without the enacurreuce of any other, that in the firmer case, inasmuch as he ratiocr propeeds minisusurally than jurlimerily, if he act corruptiy, he is liable to an action at the shit of the party as well as 10 an infermation at the suit of the king? But in the latter case he is punishable ouly at the suit of the king, for that vegularly no man is liable ta un action for what he disth as judge." 2 Ilazok. I'. C. ch. 13, s. 20.
But when the amthonities, on which the perhafis in this section is sustained, are examined, it will be found intterly destitute of foundation. Tho Whole is rested upon the case of Windham vrs. Clere, as reported in Cro. Eliz. 130, and in 1 L.eonard 187, which was an action on the case against a magistrate for corruptly issuing a warrant against the plaintiff, and carsing him to be arrested for felony, when in truth there was no accusation made whereon to ground such warrant to arrest, to the sreat scanifal and damage of the plaintiff, \&c. wherefore, he brought his suit-and it was held, that an action on the case would well lie for such injury.This case then affords no clirect support to the text of Hawkins. But, as it would seem, that an action. ufon the case against a magistrate for illegally granting a warrant, whereby the party was arrested and so injured, could only be sustained upon the ground, that he had proceeded ministerially and not judicially, therefore, the principle of law suggested by Hatwkins, i, correct only so far, and no farther, than this case of Windham vrs. Clere, can be deemed good law in that point of view.
But, from the account of this case, as reported in Leonard, it was not an action on the case to recover damages arising from the fulse imprisonment, but those only which arose from the slander of the charge contained in the warrant; the trespass seems to have been waved-and the judges are made to say by Leonard, that "if a man be accused to a justice of peace for felony, for which he directs his warrant to arrest him, although the accusation be false, the justice of the peace is excused; but if the party in truth was not accused before the justice, it is otherwise." This is correct, and the justice would be excused upon the ground, and none other, that he had acted judicially in granting such warrant. In this point of view, and to this extent
this case is sound law. But upon the nther ground,
that an action outhe case would lie against a justice fin malicimsly isung a warmat and causing a person to be arrested and insprisoned, who was in trulh not accuserl, shil su incideutally establishing the pri ciple sugrested in the text of Hawkins, the court of king's bench, in the case of Nurgan wos. Huglies, 2 I. R 22.5, say, that this case of Windham or. (lere, camnt be law; that if it were, it woull confumd all legal principles, which bave governed cases of this kind; and that it did not ap. perr ever in have been acted under. This section of llawkina in which it is so very cautiously and Wifficmily idrafocent as a primeiple, that perkaps the justice in frranting a warrant proceeds rather ministurinlly thas Judiciu'ly, is, then, a conjecture of the puiliors utterly without foundation.

13ut, admitting, that the discretionsry exercise of suthority with which a judge or justice is invested, for the purpose of determining on the sufficiency or insufficiency of the evidence and grounds for issuing a warrant to apprehent a perso:n, who may be accused inf the perpetration of an! offence, be a judicial act according to the principles of the comnon law: yet, it is sail, that however near such an act may in i.s nature resemble judicial authority, it cambot beconsidercil is an cruanation, or a porion, however sma!l, of of the nature of that judi. cial power, which formas one great branch of ge. yernment. And, that the federal constitution, by Enc pirase in the thinl article, "I'he jualicial power of the Cruzed Siutes," means "to speak of trial, jucigment: emphatically of the acministration of fuslice, and wot the litle functions, and functionaries, which are merely incipient and ancillary to this great essential wer, which are inseparably ivcident to it, und can with tupropricty be called inplied power." Is the judicial power of the sommon law, and of the constitution the same thing, or different in their natures; and if they differ, then, in what respect-and how far does die discrepance extend? But, if the common law of Jingland be the common law of the United States, as has been contended by some, then there is an end at once of this question; trecause, as has been shewn, the nuture aurt princioles of juclicial power are laid down by that law, with greut precision and accuricy as to all cases, and as to ilis, of a magistrate's warrunt, fully and unequivocally.

To avcertain what is the true meaning of the constitution, the Finglishathorities are sometimes as feely resorted io, and as contidently relied on, es if the question wore to be decided in West. miuster لlall. It is proper, however, to listen in in urucion from whutever quarter it may be offor. ed, and it is commendable oo borow light and information, wherever it can be had. 1sut, is the emmion l.w of Engyland in force in the Unitiod Sthts as such ly it been adopted by the conzt. fution allogether, or in part? wal if sor, how inuch? or, are we permited to bok into the common law of thingtand as we lark intn the Institutes of dusti mian fo: instructin merely, but sot ta read it as the sumoritative voice of the lew os this land)The e are fitations of the greateot moinent; they at ore time hrak the union, uml there we nome, whi h every intelligent fisend of lie country would mure aficeridy whil ta bear of being comvectly sit. then Tire uniliy of a ferspucuous uiderntaviding; upail thas sitbocet is mbuifested continualls nond in a grtat variety of ways. In the discission tif the yurstim now under consideration, concciong it to Le necessary to ascertain the nature of judicial pow. ef, te prancindes Lave been ezplored and ancer-
tained according to the common law; but, are w to regard that exposition as the authoritative doc trines of the code of th.e Jnited States, or the mere illustrations, brouglat from s foreign system, which cast mucli light ispon the principles of our own.These reflections have suggested the propriety of suspending the inventigation of the nature of judi. cial power, as a branch of the government, until we have bestowed some consideration upon the question, how far the common law of Fingland is to be regarded as autlinrity in the United States.

Whether the common law of England is the common law of the U'nited States as such, has been so fully discussed by those, who have undertaken. to cunsider and answer the assertion, that "the common lavo of this contutry remains the same, as it was befo e the revulution." And it has been so clearly and conclusively sliewn, that the common law of Engi band in mass cannot be considered as the common law of the general goverument, that it is deemed wholly unnecessary to re-exatime the subject in that point of view. 1 Thuck. Blec. app. note \(E-4\) Niles' W. K. 109- The United Spates vrs Fluker \& Morgan, in the Niational Intelliscencer of 20th February 18127 Cranci, 32-1 Grallison 499-1 Wheaton.

But, on the otler haud, are we, therefore, coms pelled to admit, that the United States can have no common law facir ozon? Must all the law of the United Statos as such, flow from the positive legeslative frorivions aud adoptions of Congress? Is there no indiun between the arloption of the Euglish common law in gmess, and the rejection of every thing but the acts of Congress? Aind if there be a medium, where, or how slatl tlie line be drawn? It has been repeatedly said, that the con. stitution of the United States contains many words and plirases, which can only be explained, or understood by having recoturse to the common law of Fingland; and that, to obtain a correct and clear idea of its meaning, is is proper to refer to the bouks of the common law-But, when we have so ascertained its meaning, it would. seem to be the opinion of some, that we must there stop short, and wholly reject every portion of that law, which was found so necessary to the true exposition of the instrument itself; while others contend, that thuse words and plirases of the constitution, prove the existence of the common law, and that it is appealed to for the constructiou and interpretation of its powers; and, therefore, that the common law must have been thus incidentally acopted-1 Gallizon 488.

But, we are not informed to what extent it is thus indirectly adapted; and, indeed, from the nammer in which this incidental adoption is spoken of, it womld seem to be infonded, that, in all cases where the laws of Ule United States were deficient, recourse inght be hatl to the liugli-h system, to supply such deficiency; whicli woukl, in effect. anount to the same thing as a declaration, that the commun law in genersl slould be in force in the Unitell States in all cases; except where it was inanifestly incompatible with the constitution or was ubrogatel by acts of Congress. But to prove the exisbence of a culc of laws, or that it is recog. masd by the cantitution, or appealed to for the cxplanation of rume of its phrases, duer not prove the 6 molaplion, or the inlruduction of any entire pars of such code of foreign law; tur dots it furin ls any criterion wherchy 10 regulate tic atoption of sisch of tioss prosiftie instituti ne and customs. Int spocificuly allud if so, in ich inigh be thought necessary fur the pieservation of le governmentas for instance, it is said, that the commen lafin in.
stitution of primogeniture in the succession to es tates is adverse to the nature of our goverument, yet there is nothing in the cxistence of the common law's being constitutionally recognized, or appealed to for elucidation, that would, in itself, direct the rejeection of the doctrine of primoceniture, and the adoption of the special custom of gavalkind in its stead.

When we speak of the common law, \(i^{\text {t }}\) is univer sally und 'rstnod, that a portion of the legal code of England is alluded to and desiguated; because, no part of the laws of any other nation is distinguished by that particular name. But if we at'end to the description, which the english lawyers give of their comman law, it will appear to be of two kinds, and that the code of erery civilized nation contains a similar portion of law. The common or unwrit. ten law of England is formed, it is saicl, in part of customs and immemorial usages; as who shall suc. ceed as heir to the ancestor, what is the ceremory requisite fur passing a freehold, what estate avd how much the wife shall have for her dower, trial by jury; the full age of persons, and many other such matters, which are considered as the express and positive usares or common law of the land. This part of the cominon law is local, and peculiar in its nature to England. Every nation, however, bas its peculiar usages; and, therefore, in that sense a common law of its own. The people of the States of United America brought with them, or adopted the greater part of those positive english cus oms and usages. And there are many instan ces of one nation's introducing or borrowing from another this species of common law. It would be difficult, however, to prove ar comprehend how the who! s , or any, entire branch of this kind of english common law had been simply transferred into the United States by the federal constitution. But several portions of this species of the common law, or the customs and usages of England have been specifically referred to, and rendered necessary to the understanding and efficacy of our constitution; and, consequemily, so far, and to that extent tiose portions are adopted, but no farther.

The other kind of common law is formed of those principles, which flow as inevitable consequences from some customary, statutory, or constitutional provision; or those principles suggested by circumstances, and the nature and reason of the thing itself. This sort of law, although it forms a part of what is called the common law of Eugland, yet is not peculiar to that code. Its rules and precepts are the same in all civilized nations. It is formed, not according to the pecuLiar doctrines of the common law, but from the dictates of sound sense and justice, common to civilized man. It is natural lazv and natural reason applied by the courts of justice to the purposes of the society to which they belong. And it appears by every book of reports of decisions of Westmi ster Hall, that the English courts are contin. wally sdopting this natural law, and applying it to the various novel cases, that are produced by the changes in the state of society, and the fluctuations of human affairs. A cursory comparative survey of the codes of different nations would furnish a multitude of instances of this catholic or universal species of law. It is according to the principles of this species of law, that the rules which govern in cases of bailment and common carriers, are found to be nearly the same in the code of ancient Rome, Greece, and Jidea, of En. gland, continental Europe, Mindosian and ChinaTanes on Baibinent, and Jeveny's Law of Carriers.

Rowon nd experience unite in teaching thiy Trcies of law in every nation. The rule of pro. ceeding is defined by the solution of new cases! the principles of which being recorded and reported, for the scrutiny of further experience, are hus gradually formed into useful guides for future sonduct in judicial aff.irs. It is thus, slowly and sirely, and rationally, that this portion of the code of every nation is furmed. The great hody of the Roman law was formed chiefly in this way. And as the civil and c non laws hive their canons, decrees and decretal determinations extant in writing; so those laws of England, not comprised under acts of parliment, are to be found in records, in reports of judicial decisions, and in tractates of tearned men. In both codes the ermors or the vices of the Prator or the Judge expired with his office, and such masims alone as had been appror. ed by reason and practice were copied hy those who succeedled-Hales Ifist. Com. I, 23. Gibbon's D. and \(F\). ch. 44. For the law would be a strange science indeed if it were decided upon prererler ts only. Precedents serve to illustrate principles, and to give them a fixed cortinty. But the law which is exclu: ive of statu'es and positive instio tutions, depends upon principles; and these principles run through all the cases accorling as the particular circumstances of each have been fornd to fall within the one or other of them-Corop. 39. 3 T. R. 63. 2 Lir. Raym. 957. The Institutes of Justinian and the Code Napoleon, stampt with the name and authority of powerful E.mperors, like the commentaries of Blackstone, which have no al. lowance but that of common opinion, are little nore than a methorlised and condensed digest of those scattered usages and judicial decisions, the principles of which are drawn from the great foune tains of natural reason and natural laze.
In this sense and accordig to those notions then, the United States have a common law-not that of England, or of Rome, or of France, but the common law of the United States-and the common law of this republic connists of all those usages of En. gland, or the legal principles of other codes specifically refered to, and which are necessary to expound and give effect and operation to the constitution itself; together with that body of natural reason and natural law, necessary to the political, and municipal welfare of the society, and which are not controlled or altered by the positive provisions of the statutory and fundamental laws of the federal goveriment.
The United States exlibits the extranrdinary spectacle of an entirely new and original frame of government, having been called into existence by the unbiased will, and voluntary impulse of a fiee and independent people. It is universally allowed as a general rule, that when any portion of a nation segregates itself from the mother country; and settles in an unmhabited region, it carrics with it all the laws by which it was previously governed. 1 Thuck. Blac. 108. Because, since socie'y must have some rules and principles of justice, by which to regulate the concerus of its members, and the ir intercourse with each other, those in existence dt the lime cannot be presumed to be abrogated hy the mere act of separacion, but must be cortinred in force, so far as circumitances will allow, and until abolished by positive enactments; and, for these reasons, as it irould scen, it has been held, that even a moving and unsettled portion of socie. \(t y\), such as an army, must, in the aissence of otier municipal law; be govermed by that of the country from which it emanated-10 East. 288,
with recrard to the United States, however, the facts and the circumstances are exactly the reverse; instead of a segregation of one portion of society from another, there has been an aggregation of many distinct-societies into a larger one; and in stead of enquiring what laws have been discontinued or abolisthed by the separation it must be ass certained what laws have been directly or indirectly adopted or are necessary and cornmon to the uninn. The case is entirely novel; it is altogether unique: it has no precedent nor parallel. Hence the difficulty of ascertaining, what may be truly consilered as embraced by the code of such an agegregasion, the code of each coirponent society of which, is knowin to be, in many respects, essentially different from every other of the confederation, Ih this new and extraordinary case, there seems to be no nther mode of solving the difficul. ty, but by having recourse, in the first place, to the languge of the compact of union, thence to ascertain, whether any and what are those positive rules and insstitutions, that have been adopted; and in the next place to deduce those principles of hiii, common to all civihized society, that is of natural , eason and nastural law, which are necessary andt essentia? and which may be considered as common to the uninn at the time of its formation.
On entering upon the esamination of the various provisions of the constitution for the purpose of ascertaining what has been adopted from foreign ebdes, it will be perceived that the most important as well as the most controverted are those relative to the judicial clepartment of the government. The constitution provides for the establishment of courts of justice; it specifies the objects, the subjects, and the controtersics of which they shall have juris diction; and it speaks in distinct terms of three modes in which those conrts may exercise their ju. dicial functions over the cases so placed under their jurisdintion. It is cleclared, "that the judicial power of the United States shall be vested in one supreme court, and in such inferior courts as the con. gress may; from time to time, ordain and establish." If the censtitution had said rothing more than thiss, concerning the juclicial power of the U. Siates, it is clear that the manner of organizing such courts, the appointment of the judges, the tenure by which they should hold their offices, the objects and extent of their jurisdiction, as well as the manmer and frim in which their judicial powers should be exer. cised, mist be piescribed and declared by statt. tory prorivions, before such uribunals could act in any way whaleer. But the constitution lias pro sided for the appointment of the judges, the temure by which they shall hold their offices, snd in enumerating and describing the objeots, subjects and controversirs to which the julicial power slath extend, it addls these expressions, tescriptive of the mamer in which such ju licial power shall be exer cised, "all cases of law and equity," and "all cases of admiralty, and maritime jursadithon"- ind in the serenth amendment declares, that "in muits at commos luzv, where the value in controversy shall exceed twenty dollars, the right of trial by jury shall be preserved, and no fact tried by jury shall be otherwise ree.examined in any court of thic United States, than accorreding to the rives of the common lare."
It is manifest, that these phirases of the constitution are used for the purpose of designating the form and mannes in which judicial functions may be exercised, which are totally difterent from the priciciples of law applicable to the case itsclf-a sear:an may sue for his wages at enmmonlaw, or is the admiralty court; and if be should wist to op.
tain evdidence of the contract from the defendans himself, or there should be any thing peculiar in its nature, which the rigid forms of the common lave capnot reach, he may apply to a court of equity for relief. But whatever may be the judicial forms he may nise, or of the forum to which he may apply Trr relief, the mature of his case and the principles. of justice by which, it should be governed remaia the same. The principles of law and justice applicable to a case have, \(2 t\) all times and in all nations. been lield to be essentially distinct from, and whot ly unaffiected by the forms of judicial proceeding. by which those principles of justice moy be carricd into effect-and in the wide extent of the commercial connexions and operat ions of modern times. it is by no ineans uncommon to observe the principles of commercial law recognized to be precisely, the same, by various nations, yet operating and enforced by the greatest variety and diversity of judicial forms and proceedings.
These clauses and phrases of the constitutior. then, not only enumerate the kind of objects, subjects and controversies, to which the jurisdiction of the union shall extent, but their peculiar expressiona also clesignate the forms and manner in which the jurisdiction shalt be exercised, by the rules of tie common law, in equety, or accoriling to the forms and practice of cases of admirally and maritime jurisdiction. When the constitution gives jurisdiction of a controversy and speaks of that jurisdiction being exercised, as "in a suit at common law," tha inference is inevitable; it is essentially necessary to a fair understanding of the constitution, its operation and efficacy, that such jurisdiction sl:ould be exercised in that way and no other-and, consequently, all the forms and modes of proceceding of thaz common law, so spoken of, as descriptive of the exercise of judicial functions, must by the clearest implication be held to be adopted, so far as it is necessary 10 administer justice in the cases in which such jurisdiction is given The tuplied atloption of the common law, in this way and to this extent, is as strong as if the constitution had directly declared, that the courts shoult in sucla casea exercise their yuristliction according to the courre of the common lazo and none othes.
The same may be said of cases of eqnity, and of ad niralty and maritime juriscliction. And the manner in which the constitution spenks of these throe moles of proceedings in contrasi, and in describing the judicial power of the United States, streng thens and confirms the argument in favor of the implied adoption of so much of each of those three modes of procecelings as is necessary to give effect to He jurdicial authority of the government. And the uniform interpretation of these plyases of thie cone stitution has been, that they were intended to vefer 10, and recognize three distinct and known forms of judicial proceeding, as well as to describe and illustrate the nature and extent of the jucricial power of the United States.
It is a rule of the english commen law relative to the interpretation of statutes, that if a s:atute make use of a word the meaning of which is well known at the common law, the word shall be understood in the sanie sense it was understond at the comium luw. The sound sense of this rule is an obviens, that its painciple laas been repeacelly urged and almitied as a تule of coistruction caplic ble, as well to our conatitution, as to all other instruments. Hence, it seems to be generally a! reed, that when the constitution uses worls kiown only to a particular code of haws, such words wheld carry with bera lice same sense, forec, and operation, as fis is
circumstances will allow, that they have according to the conde of laus to which they are peculiar.
The thisc: section of the third artical of the consti zution declares, that "the trial of all crimes, except ia cases of impeachment, shall be by, jury;" the 5 th amendment provides, that "no person shall be held in answer for a capital, or otherwise infamous crimes, unless in a preseatiment or indictment of a grand jury; the sixth amendment provides, that "in all criminal prosecutions, the accused shall enjoy the richt to aspeedy und public trial, by an impurtial jur'u of the state and district wherein the crima shall have been committed;" and the seventh amendment provides, that "in suits at common lazv, where the value in controversy shall exceed twenty dollars, the right of trial by jury slall be preserved."
This form of trial by jury, here spoken of, prevails in every state in the union; all of them liave adopted it from the English common law; and in all, with the exception of some few unimportant statutory modifications, it is altogether regulated by the rules of that law. It follows, therefore that it inust be the trial by jury according to the course of the English common law, which is spoken of in these clauses of the constitution-and this form of trial being thus specifically adcpted, it must be used in the administration of justice in all the cases desig-nated-and conseq'ently, after a court was completely organized pursuant to the provisions of the constitution, the first enquiry naturally would be, supposing congress to have made no provision upon the subicct, how it should proceed to. grant this form of trial by an impartial jurry, which it is declared the party shall enjoy and which shall be presoyved in all cases?
Thw first step would be to cause the jury to be canvenced in the most proper manner, and by an officer who was altor ether impartial. By the common law, the jurv must come from the neighborhood where the offence was perpetrated, or the litigated matter arose, and be selected and summoned by the sheriff, as the chief ministerial officer of the court --which sherilf, by the cominon law, was elected by the people of the county within which the fact intended to be tried was alledged to have happened. Pint the U. States as such, have no counties; and the marshall, who is the chief ministerial officer of their courts, is appointed by the president. The jury, therefore, as is expressly provided by the coustituwon in criminal prosecutions, must come from the state or district wherein the crime shall have been committed, and in all other cases from the body of the district placed within the jurisciction of the court: and be selected and summmed by the mar. shat-2. Dall. 341, 345, 382. By the cominon law the jury, in order to be impartial, must be selected and summuled by the coroner, in case the sheriff was interested; or by an Filisor in case they should both of them be legally disqualified-as the constitution specifically requires an impurtial jury, the court must, therefure, fullow the common law, ani appoint an Elisor where its regular ministerial off. cer is presumed to be under too strong a bias to be intrusted to make a selection of an impartial jury -and the court must also adopt all the doctrine of of challenges, which is founded in the very reason and nature of the institution itself, 4. Dull. 4.14, as well as all the other regulations relative to the rights and duties of juries and the nature of verdicts.
But this form of jury trial, although so often and distinctly spoken of, as necessary to be adopted for the better administration of justice, yet it caunot be intradpced exactly according to the common law
forms and principles, in all cases whatever, owing tn the state of our society and the positive provisions of our constitutions-as in the case of a :writ of risht; in which case, when the mice was ioined upon the mere right, such issue could only be tried, ac.cording to the conrse of the conumon law, by the grand ussize, which must consist of four knights of the county, in which the controversy was to be tried, girt zoith sithords, and twelve other jurors, in all sixteen jurors or recoznitors-3. Wiis. 420, 541. But as there were very few or no titled personages in any of the colanies before the revolution, the Eaglish comamon law, in this respect could not be execul. led; and therefore, it is believed, never was intro. duced into any of them-Killy's repore, 74 . Such a form of trial is now, however, clearly incompatible with that provision of the constitution which declares, that "no tille of nobility shall be granted by the United States"
The ninth section of the first article of the constitution provides, that "the privilege of the writ of hatbeas corppus shall not be suspended, unless, when, in cases of rebellion or invision, the public safety, may require it." Here is another instance of one of those technical phrases of the English system, which has been frequently addnced to prove the adoption of the common law. By that law all the judges of the superior courts, recognized as the main judicial branches of the roverrment, might in court, or in vacation, grant such writ of hubecas corpu. as is liere alluded to-3. Bict. Abr. \(4: 3\), , note.There conld, therefore, be no difficulty in adopting a form of writ suited to the purpose; in giving the power to issue and use it to that analogous class of jndlicial officers, who are specifically made a branch of our goverument by the constiution; aud in applying to stich process all those rational principles of the common law, which experience has shewn to be necessary to its utility and efficacy. But with regard to the writ of habens corpuns, the trial by jury, and all other cases of the introduction of the pusitive institutions of the coinmon law, they canmot be al. lowed any farther than they may be necessary to give effiect and operation to those parts of the cunstitution, in which, they are spoken of and referred to, or than inay be perfectly compatible with the whole of our civil and political system.
But, the constitution contaius words and phrases, which, must, evidently, be expounded by a much more comprelensive view of law, than that of the mere municipal code of any nation whatever. Those provisions relative to cases of auhniralty and maritime jurisdiction, cannot be limited exclusively to the adoption of the english principles on that subject; because, cases of adninalty and maratime jurisdiction are every where governed by the law of nations; the constitution, therefore, as to such matters, must be construe.t to extend to, and embrace those painciples of national law incident to the subjects spoken of - And by the ni. "ha sestion of the first article it is declared, that "no title of nobility shall be granted by the United States." The phrase, title of nobility, is as well known to the common law, as that of Ilubeus Corpus, trial by jury, or any other such expiessiont, but, to limit its meaning to that species of noblicy recognized by the English system alune, wourd be compleiely to evade, and entircly to prosurate its genuine spirit-The manifest scope and object of this clause, when takell in connexion with the whole, is to prohibit titles and thecr incidents of all descriptions as established in any age or nation whatever. It must, then, be proumed, th it by such passages of the constitution as these, alk

those le ral principles, rules and regulations, from whaterer source they may be derived, are intin. Whateder source thay inay be derived, are intin. and operation of such clanses when taken with and operation of such clanses to the subject inatter spoken of and in connexion with our circumstances and political institutions.

By the eighth section of the first article it is provided, that "the congress shall have power to exercise exclusive legislation over all places purchased by the consent of the legislature of the state in which the same shall be, for the erection of forts, magazines, arsentis, dock wirts, and nther neetful baildings." And by the thimel sec tion of the fourth articie "the coneress shatl have zower to dispose of, and make all needful retles and power to dispose of, and make all needful relles and pertydelmging to the United States," Whent such
places as are liere spoken of, are ceded to the pertyelonging to the United States," Whensuch Cnited Stales, it would seem; that tliey carry with them under the jurisciction of their new sovereign, upon the general princtples which govem in such rases, all those municipal lawre, which were in force at the time of sucin cession within such places. This was held to be the casc in the territory, now forming the states of Tennensee, (Hhic, and lndiana, and the territory on the Mississippi: and I prestrme would be hetd to be the case also, in Fort Mcllenry, Springfield and other arsenals or plaecs within which the United States have obtaited by cension the right to exclusive legislation-And, consequently, that the mode of transferring estates, the right of inheritance, and succession to estates real and persmal, and the like, woutd be governed by thoge laws in force, at that place and at the time, When the cession was made; so far as such municipal regulations can be adopted, and until they are aliered by congress. But, the want of Tustires of the peace and some otber oflices ant! offi cers in such places will render it impossible, to ex ecute sume of the municipal laws of the state in any way, and perhaps, therefore, they cannot for that reason, be considered ss adopted: such as the authenticating or recording of deeds for the transfer of property or the bringing of stiiss by warrant for the recovery of small debis, \&c.

As to those principles of law, foundeci on matural season or dedueed from positive institutions, and the circumstances and nuture of things, they arc so ulvous in themsclves that one or two examples will be sufficient to illustrate their nature and application. Whell a statute prolibits a thing withont im. posiag ary penalty, the injured party may have his action, ur the violator of such law may be prosecuted and punished by tiae and imprisonment-6. Bac. 2\%r. 392. And where sir act is prohibited turder a penalty, but nothing is said about the disprosition of such penally, when recovered, like all forleitures or property which has no designated owner, it shall be paid into the treasury and betong to the stateStara. 828. Thesc are principles of common veaton, 2s well as of Finglish common law, growing out of the positive provisions of the statute law, taken in cormection with the circumstances, and the nature of government. They are, thereforc, as entircly applicable to the United States as to Creat Britian or
YUJ. XU.
to any other nation. The breach of a law should be pinished in some way; the posilive provisions of the constitution require, that the trial and conviction should be by jury according to the course of the common law; and they pronibit the imposition of excessive fines, or the infliction of criel and unusual punishments. From the nature of hings and according to the spirst of the collstitution, therefo:e, and not because the English common law so clirects, the punishment, where none other is prescribed, can only be by fine and impriconmentAnd as to tho nther case, it is a universal rule, that where a thing is forfeitert, and no individual owner of the firfilitire is pointed out, it must belong to the state-And this mule is not the more or legs the law of the United States hecmase it is a rute of the Emglish enmmon lam: but it is the law of then union, because it is the unequivocal dictate of sound sense.

If the various puvisions of our limited ennstitn. tion be thus carefully examined and persued, it will be found to have thms, from rarions sources and in dit:ferent ways, provided a code of laws lilly enmmen. surate to all its legitimate ends and objects.

Having by this investixatin. shewn, hiat the man. ner and form in which the jucicial power of the \(U\) states is to be exercised, in criminal cares, masit be accortling to the course of the commnt law, it follows as an inevitableconsequence that a judiciat att, in the sense af the constitution in such cases, must be substantially and essentially the garae as a judicial act on che sense of the compon tave; and, there. fore, that the granting of a weurrunt to arrest a felon is a jurlicial act wosthin the meaning of the cosisturtion. But lest any doubt should still be entertainen, whether this species af preparatory! vilicia! cot was intended to be embraced uniter the general expres. sion, "the judicial poover of the United wrotes" it will ston, "the judicial poover of the United ir tes," it will spoken of; and what ivas undersinod to be the ex. spoken of; and what ivas undersionol to jo the ex-
act boundaries of judicial power, convilered as a constituent branch of govermment, by these respec. constituent branch of govermment, by these respec.
table political and legal writers, with whom, and thonse legal controversies with which the framers ©. our consitution were moot anners:ant.

The broud dis:inction between judicial and ministerial or ex-cutive power, in the alminitration of justice, has been well indesstond and cletrly of justice, has bectl well mindentond and clerly
reoognized in the codes of all rivilizeth nations; the distinct nutures of the duties of th I'ratorsanci the distinct nutures of the duties of th Pifferoramcithe
lifetor, of ancient Home, were as ciffirent and as well understoor us unose of a Judge and a Nheriff at this day. Jurlicial and ministerasl or execurive powers and daties have been rarinualy united in the same officer, but never confiunded with eac!s other. The great utility of separating ilirm altogether, however, and placjis them in different hands, as a division of power reguisite for the prohands, as a division of power requisite for the pro-
tection of civil and political liberty, is an improvement in political science of moderid date; one which ment in political science of moderndate, one which any country, but this of the United States. Nionany country, but this of the United States. Non-
tesquicu fancied he saw such a disision of power distinctly traced in the E. glish constitution; adoptdistinctly traced in the E, glish constitution; adopt-
ed it as a political axiom, explained its value, and gave it currency among civilized mations. This. s-nse.

A visina of poiver was recomized and incu-porated in 0 all the constitutions of the Einiteil States that were forred inmediately after the declaration of indepen!ence. It Was af:erwards e:grafte! i ito the onnstitution of the United States; and from the \(w\) : ins of the "Fecteralist," sath other politic.al es, way of that time, it appears !1at the judicial power, snomen of in the constitution of the genersl Fovemment, is deduced from that which wasin terstond by the politinal and lega! writera of Eingland as ane of the nu-mbers or the instraments of the Jinglish constithitun.
It is renark. h!t, however, that mest of the writers on tibat constifyion, entin erate the three constibuent twanches of that goverminemt as consistine of the kinc, the lords, and ti:e commons; they ail cieserias the jur licial suthority as a pift of the exso culive or regal brancla; as a storliviston of one or

 timaded of a A.,.matisn sud disunction of Chosses anal nol tion apaits or m the sivision of the font:s, modes and mi:tvibles ef action. The A:nerican primary poli ic 1 olecins ani balanges are serivel from the division, not of mas into clus*es, brit of power into the modes by! which it ope ates-as the le islative, the jodinial, an! iife exenutive. Those of the English constiation are artific:al, incongruous, and the peryetual source of j-alousy and strife; tione of the United States are rational, natural, and peaceful in all their opestitions.

But, since it is clear, that the julicial power, as a brancl of ile American government, was derived fro.n th.e Eng!ish notion of judicial power, considered as a porion of the executive banch of that govemment, it will kecide the question now under discussion, to ascertain with precision, what whe meant by such judirin! notion -and whetier the inc.plent ten.! a ritlin: ju'rcial act of a jus.ice of the peace, in deciding on the propriey of \(s\) antigg a warant to arrest a person ace'seci of a breaclo of law, iss a pertion of that judicial power?

C hif, Biackstone, Delaline, and other writers on the Enslish lay and constithion, af er describing t!e juilicial power as a purt of he execu'iv. brancl: of the guvernment, state that every porion of the execulive oflice of the chief marisirate, called the judicial mow \(\in\), tias beell completely and en irely clelergated to a distinct set of courts and officers, 3wto are, in one w:y or other, independent of the king :nd responsible for their conduct-2. Inst. 71 -1 Bluc. Com. 266-De'olme 233. They lay greai sires unon the advantages resulting from this cots] triansfer of jadicial power to a disunct order of officers; paricularly as relates to the personal securi \(y\) and liberty of the citizen, in the administration of crixin al justice. And, when treating in detail of crimmal prosecutions, they point out the varions, forms and methods by which truth and impartiality mity be attained, so as effectually to secure the citizela from unreasonable arrests, imprisonment, persec "tion, and oppression.
"We are now, says Blackstone, to consider the regular and ordinary method of proceeding in the courts of criminal jurisdiction; which may be distributed under twelve general heads, following each other i.a a progressive order-viz. 1. Arrest; 2. Commitment and bail; 3. Prosecution; 4. Process; 5. Arfaigminent, andi its incidents," \&c. And, speaking of the arrest, he says "that a justice of peace hath peaver to issue a warrant to apprehend a persob tuccused of felony; though not yet indicted; and he may also issue a warrar to apprehend a person sus.
prected of inlony, though the original suspicion be not in hinself, but in the party that prays his warrant; becarusc he is a competent jutlga of the prob cioiity aficred to him of such suspicion. But in mill cases it is fitiong to eximine, upon oath, the party \(z^{\prime} \mathrm{q}^{\prime} \mathrm{i}\) ang a warratit, as we 11 as to ascertain that ther is : : e.ony ore other crime comantied, withoat w? ich ri, warrant should be granted, as also to prove 心! atel probahility of suspecting the party, agminse w. m the warrant is prayed. This warrant ought in biunder the houd and seal of the justice; should se forth the lime and place of making, athl the cause for whinch it is made, and should be directed to the constable or other peace officer, (or it may be in ans private person by name) riquirug nim to bring the party cither, generally, befure any justice of the peace for the cminty, or only before the justice who graned it; the varrant in the latter case boisg called a sprcial warrant. A general warrant - appreland all persons suspectel, without namin? 1. p.rxicularlv describins any person in spectal, is illeged utd voist for its tricertailty; for it is the haty dy the wregistrase, and oughe not to be ieft to the -fficer, to jiml e of the ground of suspicion-4. Blac. (itan 2 i0, 2915 .
w.We ate now, says Delolme, to treat of an niticle Which, though it'does n:ot in England, aitl indece shozaid not in any stute, mitle part of t!e plozums zolich are froperiy canstitutionei, that is, of the reciprocal rights by meants if wilich thic por:ers that conciar to form the govemiment constantly bad ance erach otise", y/ee essentially interests the sechrit! of indiriduals, an, d. is the isoue, the constitution itscif; I mean to speak of climinati justice. Bu1, previsus to all exposition of the laws of Eemriand on this head, it is necessary to desire the reader's attention to certian considera-tions"-bouk 1, ch. 12. "Ifter itaving offeredt the renter, says the author, in the precediug clopter suct ire eral consilerations as ithougit necessary, in orter 10 convey a juster idea of 'tite pirit of crimina jucheature in Eingland, and of the idvantages pecular to it, I now proceed to exthbit the particulars. When a person is charged with it errme, the thugistrate, who is called in Lugland a justice of the perice, issues a warrant to appreliend him; but this warrant can be no more than an orfler for bung ing the party befure himi: he must then lear hini, and take down in writing his answers, logether with the different informations. If it appears on this ex. amination, either that the crime, laid to the charge of the person who is brought before the justice, was not committerl, or that there is no just ground to suspect him of it, he must be set absolutely at liberty; if the contral'y results from the examination, the party accused must give bail for his appearance to answer the clarge-uuless in capital cases-for then he inust, for safer custorly, be really committed to prison, in order to take his trial at the next sessions."-11. 1, ch. 1.3.
"I come now, says Itale, to consider of arrests of felons, or persons suspected of felony, by warrant of precept-namiely, not of precepts that issue upons matter of recorl, as upon appeals or indictinetits, which regularly are to be by writ, but such zvarrauts nis are prepiaratury to \(i t\), or for constrvatio:l of the peace. Aind heren regularly all courts and persons, thut hiwe jutlicial foroer by the common lazv, or by ac: of purliument for the conservato., of the peace, liave power to grant üarrants fur arresti,ng of felons; but such as are simply ministerial and have no jurisdiction, as constables, cannot issue warrants for that purpose, but must do their office either alone or with others called to their assistance."-2. Hale'a I. C. 105.

And where a person ha! b.en arrestel a it morisoned by a "arrant, meder the kinh's own hand, he was reie sal: beomuse it na. hen!, that the whole
 bun delegaterl to whers, he eould not grant such

This is not the case of an appoint nent. Tho m givirates of the state are not, b; the act of coll . grews, conatituted whicert of the tinited Statesthary ate merely awthorized to do a crrtasn acs." An "flice is Itfined to be, "ilut furction, by virinc wheivnf, a man li thi some emploginent in the atfuirs of ato:loer, as of tho ling or aiother permoni" - Juceb
S. in. irn; afice. It seems to be dithicult to distivaliah betweel iltat which is thus defined is be an ofire arn? the heing "merely authorized to clo certoin ucts" The ruthor of the 81 st mmber of the Perlenutist, who was himself a distinguished men. her of that convention which formed the constitu tion, appears to liave been strongly impressed with ; briief tiat the being thus "metrely authorized to do certain ate" would aniount to un appointunent, which there were some very sibstaitial reasoris should no: be made. But why, it is asked, (syys he) might not the same purpose hare been accomplished by the instrumen ality of the state courts? This admits of ciffierent answers- Though the fitners and competency of these conirts should be allowed in the utn cst latitude, yet the substance of the power in questive may stili be regarded as a necessury pari of the plan, if it were only to authorize the national legishuure to commit to then the cognizance of causes arising ont of the mational constitution. To ennfer upon the atisting courts of the several states the pazeer of delerminnms such cantsee, zoould pertaf's
 caulse zith tin l.F. iswer. Hini ought mot a more dillect and explicit provision to have been made in formon of the ciate cunts? Thare ure, in my opinion,

"That it is not, howerer, an appointment in the sense of the enmatitution will, it is said, be proved by reference th the tindisputed practice of some of the state governments."
-Ky the constitution of Sonth Carolina, justices of the peace shall be meminated by the senate and house of representatives, jomily, and comonissioned by the gevernor-Yet the clerks of the courts, the wardins of the city of Charleston, and many other officers of the stato, are vested by acts of the legis. latime wiin the porecrs of justices of the peace. The like case probably occurs almost in every state of the union, and the argument of inconstitutionality, which we are now examining, will equally apply to them all."

There is not the least doubt, that this case does actually orc:r in every state of the union; and there is as little doabt, that it is perfectly correct and con-stitutional-And this is the case cited to prove, that the legisinture of out sorerrignty may constitutionally transler its jurlicin' power to the officers of another soorreign:tu' Before the fotal dissimilarity of these two cases are c-3ibited in contrast, it will be proper to set down a few undisputed fundamental princi-ples-All the finerican constitutions are predicated upon the separation of the departments of power; all of them prescribe the manner in which their several officers slall be appointed; not one of them au. Clorizes an urpuintment to be made in the foum of a mere legislative aci: The legislatures of each staie of the uniun has the power either ascording to the constitution or otherwise to establish courts of justice, and to autiorize such courts to appoint their own oflicers, clerks, \&c. And the legislature of each state a!so lias the power to create and establish bodies politic and corporate zeith the assent of those to be incorporated, and may invest such corporation with the power to make bye laws, and to appoint an elect its own cfficers, who are to exccute the municipal laws of the state and the bye laws of the corporation withim its own boundaries. Ill thes. officer derive their power from the same surcrewniz yet hicy are ngither those who made nor the anere cuents of those who made the law; they are clothed with power by muans different from those of the legislators, and this the reparation of ponver is preserved; and also the political clieck to the
thuse of power intended to spring out of such s \% paration.
In the case of the transfer of power by act of corgress to the officer of a state, such person has no other legal existence as an affice of the anion, than that which is fiven him by the law in which his power and person are both disignated; he is, therefore, (iffi, inted by the luzv, officially created and commissioned by it-Th the one case, the rule is laid down as prescribed by the constitution, and the officer is appoincal according to a mode also prescribed either directly or indirectly, by the same constitution; but in the oiher case, the rule is laid down, and the nerson, who shall execute it, is designated by an of fieial descrip ion, which is nhknown to the constitution and laws of that sovereignty, zotiose legistatize roles he is artharizell to exccute. The legislature may create an office, and the right of appointing the officer will vest in the executive, or in the manner declared by the constitution; or it may create a corporation, with the assent of those to be incorporated, and prescribe the manner in which the corporators stall elect or appoint the in oflicers; and it may lay down rnles hy which each class of offeers shall be governed in the administ:a eion of justice, or in the conservilion of the peace, liut the legislature cannot, constitutionally pass a law declaring, that such and such persuns, desigrating them by name, places of resideace, professions, trades, or commissions, (held under other sovereignties) shall exccute such 1aw. In this respect their can be no difference between saying, that John, Thomas, ac. shall exechte the law, and declaring that all those men who hold such a commission in such a state shall execule the laws of the union; because, the determination on, or the execution of the legislative rules of the soveregguty is not in such case refered to the judicial or -xecutive power of the saine sovereignty; but to persons designated by the legislature, and who derive their autlority wholly from its acts; and who are not commissioned as those are, who, alone, the constitution declares, shall be intrusted with its judicial or executive power. Each constitution of the union has three separate clepartments of power; to each legis. lative body, there is assigned a julliciary, who shall apply, and an executive, who shall execute the laws promulged by such legiblative body: and, therefore, to permit those laws to operate by any other means than those constitutionally disignated agents, is to suffer its best proncipless and primary checks and balances to be totally abolished.
But the great principles contended for, as will be seen by adverting to the conestion propounder as the text to these observations, are not confined to mere judiciat powers and oficers, it embraces all, legislative and exerutize as well as judicial power They are, thut "crery Sovernment ought to possess the micans of execrtiver its oren provisions, by its ayon anctharity; that the pearce of the zuhale, ought not to be left. at the disposal of a part; that the general government must carry its agency to the persuns of the citazen; tha: it must stand in need of 20 intermediate legislations, but inust itself be empozvered to emplay the arm of the ordinary mugistrate to execute its orun resolutions; that it must have been the intention of the fiamers of the government of the union, that it should be provilled zvith powers fully conmensurute to those sreat objects; and also, that those fiawers shontla be so clistrithittea among its own ageuts, us to enable it to act from itse! \(b y\) it.e. own motion: cun:' :"o? thronght the instrumentality of any other andef ndent srvereignty."
- The authority of a justice of the peace to grant 2 warrant to arrest, it is asserted, is a ministerial or executive act.-Let it be conceded, that it unques

\section*{NLLES' WEERLY REGISTER-NATIONAL QUFSTION.}

Lionably is so-And what them? The ground is comewhat different, the scene is shifted-But is any thing gained? Change only a few words, and all the argument against the transfer of jullicial power to a state officer, instead of being answered or weakened, rises again with renewed and added strength. The first section of the secoud article of the constitution declares, that "the executive power shall be vested in a president of the United States of America," and the same article then proceeds to describe in what the executive power shall consist, \&c. Here then is the executive power of the United States. The congress have no rizht to prescribe where this executive power shall or shall not vest; they may create executive offices and duties; but they must be filled and discharged in the manner prescribed by the constitution, and in no other way. And so we may proceed step by step to apply all the arguments that have been advaluced respecting the judicial power to this of the executave.
And the same kind of argument may be used against the capacity of congress to transfer its legislative powers to the legistative functionaries of one of the states, or any other sovereignty; for the first section of the first article of the constitution having declared, that "sall legislative powers herein pranted, shall be vested in a congress. of the United States, which \(s^{1}\) all consist of a senate and house of representalives, \({ }^{2}\) comgress can have no more right to anthorize the legisiature of a state to morke latos for the union than it has to authorize any state officer to ex. er-ist judicial functions, wr to erracme the luzo of the gereral gowernneent; for and in the na:me of the United States.

The denying to congress the right to invest the justices of the peace of the states with power to execute the laws of the union hixs been considered as leading to consequences the most alarming: as Sikely to innolve the mation in expences the most enorinous; and, in addition to the patronage of the executive already too strongs, as arming that branch with one, that will he altorether irresistible. It is asserted, that "witbout the aid of the ministesial olficers of the states, to have the lan's of the United states effectually executed against a few offienders, (probably net one tumdred in a year in all the states,) it would be necessary to appoint and scatter over the vast taritory mumy thousanis of justices of the peace, coroners, constables, \&c.. The attempt to exectie the frovo. er, would be ue impracticable as it zoovid be ridicis. fous." There appears to be no reason to doubt the sincerity of such an assertion. In reply to a fancy so buoiant it would, lowever, be altogether idle to offer any thing like fact, calculation or argument.Yet one cannot, but wish, that the patriotic mind may somewhere find relief, from the terrible forboCings with which such melancholy dights are too apt to fill it.

I have always been a decided adrocate fur confin. ing the powers of the general government strictly within the limits assigned to them. The federal government was, most certainly and obviously iniended to be a system complete within itwelf, and in all its parts. Its power in all respecth, Hiose over the militia excepted, where it acts not from itself, but by the instrumentality of the states, are amply commensurate to all its objects. But in order, that its benefits should be fully understood and felt, it should be completely organized in each of its branches, in its judicial, no less than in its executive, its senate and house of representatives. Strange however as it may seem, it is nevertheless true, that al. though this government was formed fir the expreas
purpese of relieving the natin, from all reliance on the governments of the states, nilf fom lhat neceq sity of resurtinr to their apenny in any eases twhatever, yet the judicial power ef the union has hitherto been but par tially organiz - 1 mol ithe \(\mathrm{j}=\) 'iciaries of the slates have, of chnice, heen ilsed as the only instriments for executing a great no. jon w the law's of the nation. It is believell, that tiere is no positisu of which the history of these states will firnish mare ample, conclusive, and unanswerable pronfs, lisam that "the necessry dependence, practically, of the general governinent on the states, in maniv parti culars, is one of the points in which its weakness has been most obvionsrand most lamented."
AVe are not without the most impressive ceaps ples of how much may be effected by more precenlens, whether of the use, the abuse, or the ahsolute neglect of the provisions of a constitution. If, buw. ever, example and precerlent have exhikitert in a strong point of view the uses of oar constitutian; that it is capable of a simplicity, and facility of nperation far superior to what was expected; that it possesises energies commensurate to the most peril. ous seasons, and! excellencies intinitely superior to any form of government ever befire known; if the experinental dovelopment of its perfections has drawn about it the attachment and warmest =fiec. tions of the peop!e; the sacred and untrein5 or-cles of experience hace also exhibited some of jts weak. nesses and failings, in a very melancholy point of view. Tisey prove, incontestibly, that however the infiuerice of the general government may require to be constantly watched in some respects, to preve' \(t\) our inestimable institutions from falling into an in. evitable and slow decay, yet that in its conflicts with those of the states immediate and genersa dissolu. tion and ruiu present themselves, as certain ant unavoidable. Fixperience has shewn, that in thuse cases where the gremeral government had the means, and could, and did resort to the same mechods of executing the powers, with which it was inves'ed, that are possessed and exercised by the governments of the several states, the opposition frum disorderly, vefractory and sedition's in liviluals was easily overemne, and harmony soon restared; but where a confict arose between the sover ment of the union and a state, the powers of the nation were paralized, the subversion of the whole was threat. ened, and there seemed to be only the andifl alternative left of "substitutivig violence in the place of Lato, or the destructive coercio: of the sword in the place of the mild and salutary eqencinn of the maristracy." Since precedent and example are so powerful in developing and exporndigg, in fortifying and uncl mining written constitutizons, a:d in estaslis! ing uuwritten ones, they shoukl be recillected and looked into with the most careful retention.

A frequent recurrence in,firs' principles, also, is recommended by sume of the most sare political writers, and has been adopted as a fundamental axiom by some of the roastututions of the states. To rely on state officers, whi) are no way responsible to the general govertunert, for the execution of the laws of the United States wonld be a depurture from the first principles of the national constitution; and "would be, as has been said, to restore the theory, principles and practice of the old articles of confederation; the evits of which,
- By the constitution of Virginias the exscutive it required to appoint a secretury; yet 1 as sch office has existed in that state since the death of the ors in office at the for-n stion of the constitution, is bapponed during the revolution.
in this \(r\) spect, particulurly, among many ohers, \(t^{\text {h }}\) is censtilution was intended to remove." The. evils here alluded to seem to have been, in a grea part, forgotten, or to be now considered as merely im ogimary. It will be well, therefore, to recur to the actual his:ory of our counsry and enumerate some of them. This enumeration I shall extract literaily from the papers called the Federalist, w'rere they may be found sery perspicuously dis ployed and ably elucilated.
"The great and radical vice, says the Federalist, in the cosistruc ion of the existing confeder.tion, is in the \(p\) inciple of legislation for state goverume:ts, i. Deir corporate or collection infuctizes, and as com\& listingrisheal from the individuats of whom they consis:. Thught this principle toes not run through all the powers delegated to the union; yet it perv.des and governs those on which the efficacy of the eest deperds. Thrie is an erisential difference bet seen a mire non-compliance and a divect ard ac. tive resistunce. If the interposition of the state 1 - ri lature be necessury to give effect to a measure of the union, they have only not to act, or to act eva azely, and the measure is defeated. This neglect of ruty may be tiisguised under affecied but unsubstantial provisions, so as not to appear, and, of couse, not to excite any slar'l in the people for the safety of the constitution. The state leaders may cven make a merit of their surreptitious inva sions of i , , on the ground of some tempority convenience, "xemption or advantage."
"The next most pidpable defect of the existing eonfederation, is the total want of a sanction to its laws. The United States, as now composed, have no power to exact obedience, or to punish disobedi.ence to their resolutions, either by pecuniary mulcts, by a suspension or divestiture of privileges, or by any other constitutional micans. There is no express drlegration of authority to them to use force against delinquent members. The want of such a right inwolyes, no doult, a striking absurdity. The \(U_{i}: i t e d\) States afford the extraordinary spectacle of a gove nanent desitute, even of the shadow, of consti:ntional power to enforce the execution of its own laws"
"The prine:ple of regulating the contributions of the siates to the common 'reasury, by quotas, is another fundamental error in the confederation. I's repryma.iy to an adecuate supply of the national exigncies has ulready been pointed out, and has sufficuentiy appeared from the trial which has been made of it. I speak of it now solely with a view to equality among the states. Those who have been accustorted to contemplate the circumstances, which produce and constitute national wealth, mus: be satisfied that there is no common standard ol baromiter by which the degrees of it can be ascertained."
"In addition to the defects of the existing federal system, before enumerated, the want of a power dorenulate commere, i, y all partics, tlowed to be of the number. I: is indeed evident, on the most superficial view, that there is no object, either as it respects the interests of trade or finance, that more strongly demands a federal superintendance."
"The power of raising armies, by the most obvious construction of the articles of the confederation, is merely a power of making requisitions upon the staies for quotas of men. This practice, in the course f the lite riar, was found replete with obstructions a vigorous, and to an economical system of defence. fyave birth to a competition between the states, wich created: kind of auction for men. In order 4. Uunish the quotas required of them they outbin!
ach other, till bounties grew to an enormous an: insupport lile size. The hope of a still furlher increase, affurded an inducement to those who were disposed to serve to procrastirate their enlistnent, and disinclined them from enguging for any considerable periods. Hence slow and scanty levies of men, in the most crivical mergen: ics of our aftairs -short er listments at all umparalleled expencecontimul flucteation in the tronpe, ruinous to their disciplite, and subjecting the p:thlic safety frequently to the perioons crisic of a disbanded trmy. Hence, also, thosc oppressive expedients for raising mell, which were upon several occasions practised, and which no hing but the enthusiasm of liberty woald have induced the people to endure."
"A citcuinstaice, which crowns the defects \(n\) the confederation, remains yet to be mentioned The want of a judiciary porver-Laws are a dead leter, will.out conts to expoun! and define their true meaning and opertion. The treaties of the United Siates, to have any force at all, must be considered as part of the law of the la d. Their true import, as fur as respects individuals, must, like all other laws be ascertained by judicial de-terminations-To produce uniformi \(y\) in these determinations, tiley onght to be submitted in the last resort, to one sifpreme tribunal-And this tribunal ought to be instituted under the same sutho, rity, which forms the treaties themselves. These ingredients are both indispensable."
"The result of these observations to an intelligent mind must be clearly this, that if it be pos. sible at any rate to construct a federal government capable of regulating the common conceris, and preserving the general tranquility, it must be founded, as to the objects commitied to its care, Hpon the reverse of the principles contended for by the opponents of the proposed constitution. It must carry its agency to the persons of the citizeus. It must stand in need of no intermedrate legislations; but must itself be empowered to employ the arm of the ordinary magistrate to expente its own resolutions The majesty of the natanal artthority must be manifested through the median of the courts of justice. The government of the union, like that of each state, must be abic to auld:cess itself innmediutely to the hopes and fear's of individuals; und to attract to its support, those passions, which have the strongest influence upon the hatman heart. It must, in short, possess all the means, and have a right to resort to all the methods, of executings the pozvers woth which it is intruster,, that are possessed ant? exercis. ed by the governments of the particular states."

From the first moment the American people took up arms against the despotic encroachments upon their rights by the British king, there was but one common opinion among them as to the importance, utility and necessity of union. The war of the revolution not only suggested a union to the states, its nature and exigencies actually effected a complete one, in fact, long before its principles were reduced to certainty by a solemn compact.The nature and extent of the powers, which were thus tacitly, and from necessity vested in congress, have been several times elaborately discussed before judges, who had been themselves active and distinguished agents in the establishment of \(\Lambda\) merican liberty; and it has been uniformly held, that the powers of congress antecedent to the articles of confederation, which was sent to the states for ratification on the 17 th November, 1777 , and finally acceded to by Maryland on the 1st of March, 1781, must neeessarily be supposed to have been co-exten. sive with the great objects which America then lade
in view, and that the articles of confed en inin munt be cortsidered as the specification, affirmation or confrmation of those pee-existi:g powers-2: Dall. 16n-3. Dall. 54.
That the goverment of the union should liave exclusively the perwers of peace and war, the reguLation of ei! foreigur relati : 5 and comin:on concerns, and also the power to repel and io punishonfences and cribecs aleaist the rution wes ayreed on all hands: but whe:her thinse p.wers should be exercise. by a roverwinent actin! as a confederation upon stait governmenss, ur as a consoliditial govern. ment act ing 'p pu individuals, was a question which the rivalship, or the just jealnusies, of the states whuld unt, imatil some time after the revolution, allow to be is fully understond as it really mierited. Exp rience of the evils, that have beer. just enuniemter, has, however, determined in fivor of the Jutt re, and tle resul has heen the adoption of the prestn: cons itu : ion. I khall now close these abseivalions upon this important question with esibitiog some few instances, which as incont stibly prove the nece sity of a completcily organizeld nation al juliciary, is contenuplated by the present constitulion, invested with powery co-extewsive with be jurisdiction of the general goverinieat, as that of anv n!leer provision of that instument by whic': the raverament of the union is ensbled in act as an inde en 'ent consolidated sovereignty.

By the first section of the ninth arsicle of confelleration, which has bean considered as a mere affirmance of the pre exis'insy *icitly concerted powers of coneress, it is nrivided, that "the U States, in congress assembled, shall have the sole and exclusive right and power, of establishimg ruiss for ceriliting in all cares, what cuptures on liced o. water stan! te lege!, and in what munt er prize Laken by lan or nawl forcts in the service of the Trineed S.ates stall be divided or appron:iated; of gran ing letters of narque and reprishl in times of prace; appoiativg enerts for the trisi of pir cios and flionies cominatted oll the high sees si and esta. blishing rourts for recciving and determining final. ly a"pe is in all cases of capures; penvilat that no meraber of congress shall be nupoinced a j dodse of the said contre." B3, His article, it will be scen, that co trens wele jiveuted with the power to establish, but one kind of riburbls, ank! those courts if anpeals merels. They had the rignt ta lay dotat rules of jodicature for the gorcrumicmi of ali own, in all cases of prizes, or as i' is exprens 4 , "of cestrblasiong mís for deciline in at cases awtat cajp. :Irt? on land or sater shatl be loga'," \&e. But all th judicial power af e ngress nat the fa tion were to he enecuited lirongh the malium, instrywarisality, an age cy of tribumale estabishied by, aud responsible only to the several states
Congress recommended, and the states did or ganize such tribunals, as recommeluled, for the trial of all cases of admirally acel maritimn juis. diction. But sumio of the states chove to ptuvide for the trial of matters of fact by jury in all such cases On appeals from courts, so organized, in R'oote Ialand ant in Ponngivania, the congression. al court of appeais reversed the judrments of the sta:c courts forvided on a veredits, thus disregrarding the logislative provision of thove states relative to the (rial by jury in suc) cases; and remanded the casen with ordern to procect to timal jwhts ment and exceutionas direcied The state couris refisel to obery, so as to becoine the instrumenia of overuling a legislative act of their olvin states. The court of apiealy mosued an injunction. Th
state cors still reiused obedience The nationa! court it rat-ned them, and haid an account of th ir refractory enntwe before congress. Coakriss atopted some spirited resolutions and conciluded by iaviting the stites to a conference on the subject of the contumacious conduet of their courts. The 5 ates supterted their ribunals and tonally disere. girded the resolutions of congress, which "con* sined a course of re soni.g so cojisne and conclusive," and als, their invitation to a conference. Thins the laws and powers of the union, for the zeant of a jutticiary of its oron, by winet! it could act insmediately upon the indivilual, w's entirely pros. trated; anct, actually, in thes. cases, rectu:i ed in that degraded situation uutil it was uplifted and crecuted by the just and superier cnersy of the: jrdicial establithment of the present constian: ion. And some time in the spring of \(179 ?\), cuptain Truxton of the Comstellation frignte, semt in D d K . Read, one of the aldermen of the burovigh of Norron \(k\) in Virginia, a man, "Iion he sadl ac. knowlediged himself one of the mulineets on ingird the Hermionc, a British frigate; the nia: , Hat cnismitted to jail, sil ject to the ordicr nit the Britush consul, by hum 1aikell out, sellt to Janaicu, and there exccuted.
This subice was communicated to the legibla. lure of VIrginia hy Mr: Mourone, llow presstitent of the United States, then goverung of that slate, on the 18 t ) le centher 1800 in a mesy fe follows "Sonetime ir April last, suan he, I wis ahosad to a respectable crizen of Norfolk, that a ma nien of that borough had rece ived dimm the capth i: of the Conncellation, a fingat of the taite! sinto, an person said to bye one uf (h: inntateery on burd is Britarnic majesty's surp the Hermione, fath:r commited the simit persoin to jai, nitb an oiko
the jailos to surrender him to the British consul, on his, application; that lie was surrendered accordingly to the said consul, who sent him to a Britis island where he was exccuted. A conduct so -xtriorlinary as that alledys could not otherwise than excite the astonishment of the executive. Fivery man within the jurisdictiqn of the state, is, under certain exceptions, amenable to its l.ws and entitled to its protection. If he cammits an offence ap:inst the sovereignty, or other rights of the United States, he is amenable to their government and taws for the iufriaction. But the act which was denounced did not appear to proceal fro 3, or be sancti.ned by the authority of thaw gremnent. To designate a man wiithin the juristlicrion of a state as ore nut entitkel to its protection, or that of the Unitech' States, to diveest him of such proteciion, and surrender him to a foreign pooser, to be ren: abroad tried, condernned and executed, by the sentence of a fineign tribunal, are important acts of sovereignty, in which the character and agency of the chief. putblic functionaries should he seen, and for which they are hitghly responsible. But nothing of tha: kind appeared in the present instance. No respectful, thou;h strict anal. sis, by the competent authority, of the respective claims to jurisliction between the - tate and the United States, with respect to the fugitive who sought an asylum here; no circumspect examination of treaties between the United St es and a foreign power, which ought to precede an act derogating "in some respects from the national sovereignty, were heard of. The magistrate zoho acted zoas not even an officer of the federal goverlment, but of this state, in zohich light, he zwas in a peculiar derree responsible to its authority. The act was strictiy that of the magisirate lisimself. As, how..ver, this communication compromitted the character of a consul of a foreign power, and an officer of the United States, as well as that of a magistrale of this commonwealth, the executive was careful to observe in the part it took, the utmost deference to the rights of those who were to be affected by it." Nuttional Intelligencer 15 Dcc. 180J-an!l 9ih Jun. 1801.
This case, it will be recollected, is strongly analogous, though not altogether similar to that of Jonathan 12 ubins, about which so much was said both in and put of Congress. 'It is not, however, alddaced to revive the recollection of the principles discussed in Robbins' case; but to bring into view that very particular in which they chiefly dif. fer. Rosbiins was delivered over by an order of one of the Judges of the United States; in this case the man was delivered over by a magistrate of a state. In the one case "the character and agency of the chief public functioharies of the nation were seen, and for which they are highly respons:ble. But nothinf of that, kind appeared in the present instance." And fron the expressions of the Governor, that, "the magistrate whio cicted zuas not even an officer of the fedleral governinent, but of this state, in whichit light, he was in a peculiar degree responsible to its authority: The act roas strictly that of the .nagistrate limseif:" -it is very strong. Iy intimated as his opinion, that the judicial offi. d.) of the state had no anthority to ex sound or to execute the laws of the United States in any case fivil or criminal. But whatever might have been fis opinion, there can be no doubt about that of the Legislature of Virginia rpon this point; for, in cosequence of this communication, on the 21st of Jandary 1801, they passed tie following law forbidang their makistrates from exxercising a similar authrity in future.

It was enacted "that any person who shall here. after, of his own free will and accord, or by the: persuasion of, or combination with any forrigut agent, or any other person, being an alien, or aritizen of this commonivealth, or of any other of the United Slites, deliver up or surrender, or callse to be delivered up or surrendered, either by his ownh authovity, ur uuder co;our of any office whintever, held, or cluimed ty be held, under the unthority of this commonzoealth, any citizen of this commonweal hh, and entitled to the protection of the laws thereof, dur. ing his residence therein, to be transported beyond ses, or elsewhere without the Uniited States, shall on conviction of every such offence," be sentenced to the penitentiary for a terin not less than one, no: more than ten years-and by the second section it is enacted, that if the person transported shall be executed, then the person by whism he was delivel. ed over shall be deemed a felon and un conviction suffer deuth.
This great question as to the right of Congreas to invest state officers with a portion of the judicial power of the union was once argitated in Congress; and, as it would seem, rather waved than decided in any way-what was then said upon the subject may be found in the National Lutelligencen from the 5 tha to the 19th January 1801.
As to the necessity of scattering over the vast territory of the United States "many thousands of justices of the peace, coro:ers, constables," "c. I will make a few remarks before I close-1 deen it the constitutional right and duty of Congress to increase the number of judicial and executive officers so as to make the judiciary of the United States, in all respects, co-extensive with its ju-risdiction-And, thus to complete the organization of the national judicirry, 1 deem it essentially necessary, as the cheapest, safest, and surest means of preventing those angry and ruinous collisions between the governments of the union and the states, which will inevitably increase in number and frequency with the increase and condensation of the population of the nation-The necessity for the great multiplicity of justices of peace in the states\% is evidently occasioned by the number and variety of petty municipal regulations, which they are required, daily and even hourly, to execute; but the jurisdiction of the United States is neither so various nor multifarious; it is confined chiefly to foreign affairs. It would, therefore, be sufficient, that such inferior judicial officers should be placed most convenient to where such cases were most likely to arise. No state would perhaps require a greater number of judicial officers in proportion to its population than Maryland. Let ils then suppose two United States justices stitioned in Baltimore, and one in each of the other counties of the state, except that in which the district judge resided, in all but nineteen-More would not, I am sure, in the opinion of any one, be necessary. As to the expence; the justices of Ma. ryland receive neither fee nor salary in criminal cases, and but small fees in civil matters. 1 do not see why respectable citizens might not be found willing to act as justices of the union upon the same terms. The utility, or rather indispensable necessity for magistrates, invested with jurisdiction both civil and criminal in small matters which arise within the Forts and other places, where the authority of the United States is exclusive, is obvious and altogether unanswerable; for if there are such things as political axioms, the propriety of the judicial power of a government being co-extensịye with its legislative, may be ranked among the
number. In such a saturarvartennion of the judi cjary of theration, I see no hits mulastrons or terrif. ing, either as 'o paro: anc or expenditare.

Upon the whole, it sloes rippear to me , ias the Bongress canrot, constitutionaliy, confer any po:tion of the tegishative, jutheial, it esective power of the tunimo:1 Ant of (the pmbic funcetionaries of
 force the laws of the antion; and, that, if Congress ware even altope! 10 A . st, yet as it might, in is tome of dic greateat peril, umlar the influence or whthrity of the state, be nerlected, divobeyed or protibited, the execution of such power, could ant, hor ralgit: int to be relied on; because, the isett would be whally irresponsible, and boith in the neglest and the exccution the inost provokigs and dasgermas coilsions misht be excited between the government of the union and those of the siaer. THiLOPORICK BLAND.

Thowgh tie illur has not immedi..tely sufficed Jivtle late firsti \(t\), some account of which is given below, it has, in inany ways, teaced to derange the business of the lizorsorea for the weck, and preventad the desired a tention to several things-not neslecter?, but of "ecessity delayed.

\section*{The late Freshet at Baltimore.}

It is me easy matter to sit down quietly and give a tranquil acconint of the scenes thitought which we hat past ; for the mind is yet comtinally divert et from the cont regtadrity of narrative by some parlicular incident that excited feeling, on the awful occasion.
(), Friday mipht, the 8 th inst. the rain descended with excec.'ing violence-it was almosi an inces. sant and Encreming torrent, or dempe of water, matil about 1 o'closk, P. M. on Saturday. By this time, Jones' talls, or Jones' Creek, which rums throngh :he city of 13 . Itimore, and divides that part faniliplly called "Old Town" from the rest, liac! swelled to great height. This stream is about 14 miles lant, with a very rapid descent; passes llrough a litly country, and affords, perhaps, more mill sexts than almost any one of its length in the United States, nearly all of which are very higlaly improved. In general, it may he any where forded withont reachintr above a lorse's knee, and within the built parts of the city is confinced by ntune walls, built on piles, by houses on its banks, or wharfed, tw a space of 60 feet wide, abuve Mar. ketsirfet bridge, but of mome greater wirlth below to the basin. At 1 w'clock, the wooden-bridge, at Centre-street, (the highest on the stream within the newly extended city linits) way lified from its abu inents and happils d-posited in a garden below. Wany of the mill-danil above, had, by this time, been swept away, and their accimulated waters vere alded \(w\) the torrent. 'Tine nist bridge, a' Bath-strect, also of woonl, shared the fate of the
thormer, but passed, in an undivided body, down the stream and lodged against the atone bridige at liay. strect. Here it instantly collected an immense mass of floating timber, parts of houses, z. . and formed a complete dam. The water then spread over the low gromids west of the Falls, and impetuously passed down Fish-street to Harrison and Frederick. streets; then part of the city called the "Meadow" being overflowed to the depith of 10 to 15 fect . The greatent force of the tarrent in this part tell against the brick-houses near the intersection of the south side of fiay with Fretarick and Harrison-atreets,
and esperi.lly in the latter, where some frame lunid. ings were in a moment swept off, and those of hrick harclly resisted the force of the stream, their foundations being near moted up. Harrison is a very wide street, extending northwardly from what is called the "market-space," or place where the principal masket house of the city is Incaterl, and af forded vent for an immense quantity of water, in inany places mure than six feet deep, and of such power at the head of the market-house as to renter it unsafe for man or horse to cross it-though, except for about half an hour, when the flood was s: its greatest height, it was foeded by car's loaded with people-but a coach, in atternpting it, was swep: off and lod ged against the posts at the market, the horses very narrowly escaping.-Market-stree \({ }^{\text {r }}\) bridge, built of stone, and not being dammed as that at Giay-street was, and protected by the diversion that the damming of the latter cansed, stood the current, which passed under it with the rapidity of ar arrow, awfully sublime. Before this, the two light font-bridges, between Market and George-street (or Peters') bridges, had given way-and Georgeitree: brilye, of woot, old and designed to have been speedily supplied by one of stone, soon sharet? the same fate; it leriged, crosswise, against the stone biidge be Pratt-street, and son formed another complete dam. The water then took an additiona! rise, but rather momentary, of about three feet in less than three quarters of a minute, and a large quantity of property, until yet but partially injured, was sacrificed. This was the lowest bridge on the Falls, and the water, after pissing it, spreat over the low grounds in its course to the basin, and did but little comparative damage. Of all the bridges on the Falls, that at Market-street ouly is mingured.Yhose at Gay and I'ratt-streets are so much injured that they can only be passed on font in safety, and will require to be rebuilt -me arch, at least, of each.
It is utterly impossible to embody on paper the scene that this deluge presented. Houses, forses, cattle, with inany swine-carts, drays and other carriages, with, perhaps, thousands of cords of wood, and iminense qtiantities of heavy timber of all sorts and descriptions, and some entire treas. with a multiturde of arlicles of household furniture and mechanical iadustry, hogsheads and bar rels of whiskey, flour, \&cc. Sc. and, on two or thred oecavions, human beings, ere seen mingled in tremendous confusion, davhing axainst each other, and impe!led w:!h ir:esistable force! Women and chitdren, in the upper stories of their houses, were sending forth their shlricks, and calling for assistance from their fiail fillow men, gallantly risking their lives to rescue them, but without much success until afier the flood wats at its greatest height, which was at about \(30^{\circ}\) clock. When we recollect the awful force of the water, and measure the depth that it had, we are humbled with a sense of gratitude that so few persons were lost-not yet ascer. tained, but, probably, not exceeding six in the whule. The compaceness of the houses, though it raised the water, broke the power of the current and protected them; else, us at Dr. White's late extelisive distillery, which first met its force, every feeble building must have been swept away, and with them their inhabitants. It iw a blessing, ins. deed that it did not come upon us in the "nigh:e scason." To the loss of property we should have had to add that of hundreds of lives; for it came on so suddenly that many who slept on the first floor of their houses must have drowned in thejbeds; and others, in attempting to save them, np: seeing the danger, would bave perisbed!
\(\mathbf{I}\) : is impossible to go into a detail of individual los es. The city corporation hats sustained a da \(m\) e of from 80 to 100,000 dollirs- the works of the water company are extensively injured-the entire loss, wi:hin the city, may, perhapz, amoun: to a million anil a half of holars. Bat this is, and muet be, chiefly a "guess."
The mayor of the city, George Stiles, esq. has displact all the energy nil promptitude for which his chancter has so ling been remarkable, to reduce tho estant of our catamity; in which he has heen f thintly supp rej he the rest of the city offieens an oil rs. I! !as at ? \({ }^{3}\) el t nuy misfortune, that lie w, whiv \(j\) ist pern ering ferm a ickices that made

 man annceasion like than nutent, The cominath-
 b) reques, int haty sictoynd ie prisare of all boatem: I vegels, untiltheywere examedi; for there wore wretrbes enongh ready in prey "p n the misfortunes of the perple, and mike luful prize of w': iskey and other liquors, Hour, and the many othor valuable things that were bronght down the Fills. Immedinte mea ures were also taken io cle r the bed of the stream, ant collect the frasment of property for the rims owners; and to re lies the streets of the mud that had beendepusit. el in them, (i: some plices two fie deep, ) repair the shatter \({ }^{\text {d }}\) privenents, \&e. Une wontlers when he sees what has bsen dowe in eo shout a time, anil se canmol but feel grateful for the wisdom and energy of the recestres every were pirstued to lessen the calamity, and prevent uny effents it might I ave on the health. of the city, at is seasou so liable to disease.
We may, prohaps, hereafter, in conler moments, when thic acutoress oi feling for the suffering: of othere is a little blunted by time, and the ravages of the flond are lese hidenis than they are :ow, give a more detailed arcount of this visitation; which has also swept away, or virtually destroyed, the several stome bridges on Hariford Run, which serves as a natural drain for the mo:e eastern and? yet not much buit upon part of the city. But that a better idea of the fresliet may be had at a distance and to serve for fiture reference at home, we lave, with line and mrie scertainel what was the depth of the wa+r at the several places as mentioned below; promising that the excess water of the Fills passed ibmughone of the thick. es built parts of the city, for the distance of al most hilf a mile.
The lieigh of the Fills above their ordinary level, depended so much on accidental circumstances, that it is impossible to fix a medium. Opposite the jail, it was about 24 feet, being confined between high grounds; just above fiy street bridge, having fomad a passare through Fish street, \&c. it was 16 feet, 2 inches; adjacent to (above) Market street bridge, 10 feet, 7 inches; adjacent (and below) that bridge, 10 feet 3 inches; iminediately above Pratt street bridge, 10 to 11 fect. These are the points at about which the water seems to have stood for a considerable time-the damming of it at Gay street, and Pratt street, gave it a stidden rise of a greater clenomination; but it forced its way through the houses, streets, icc. and sought its level by more widely extending its surface. Before sundown nearly all the streets were drained of their water.

There is much doubt and considerable dispute, whether the late freshet was so great as that suffered 32 years ago. We, of ourselves, know nothing of the latter; but from all that we hear, are inclined to believe that a greater quantity of water came down then than on Saturday last; but that this freshet was higher in sevcral places (owing to the encroacliments upon the water course and other obstructions of the stream) by \(3 \frac{1}{2}\) or 4 feet than the former-but, possibly, lower in others, more immpdiately on the banks of the Falls. It is hardly prac. ticable to fix an average gauge for water rushing forward with such rapidity, and meeting with so

\section*{Floнiвa.}

We have a report that the royalisis have nitackMcfiregor at 1 melia with a grent deal of spinit, At our last accounts the patriot flag was still fiying, and the fighting had ceased. Further particu. lars unknown.
- The ship Margaret left the port of New York on Sunday last, bousid to A miefia lsland; but was over. taken and carried back by the revenue cuiter, Cap). tain Cahoone. The Margaret had nil board several persons, who embarked with the intention of join. ing tle patriots uncier General .Mc Gregor-also mrinitions of war, it is supposed for his troops The culter flecd several times at the Margaret be. fi) \(c\) she love ino.

A lecter from Amelia island dated the agth July s.y.s. ")he of our privateers has sent in a prizet birig ladrn with siggar and coffice, and with tweniy tix thousan d dollars in specie." M'Gregor appears to be waiting for reinforccrents. The no
counts sill to be from the island are contradictor: and inconclusive.

\section*{BHAZIL.}

It would appear that the patriots of Brazil are still in frice, commanding the interior. The people of Parsiba, so leagues north of Pernanbucn, have joined the revolutionary cause; and at this port a vessel lately arrived with 3000 stand of arms, sc. which were paid for in specie.

\section*{EH?ONICLA.}

The president had arrivel at Sackett's Harhor and was snon exp-ted at Buffalo, where the U. S. schooners Porcupine and Gient had arrived to bear him up lake Frie. A committee of arrangeme:nt hald been appointer to receive him in form, at Buffalo which he probzbly reached about the 8th or 10th init. The particulars of his tour slall ibe restmed, and continuel.

Aa*al. -Commodores Rodgers and Decatur, at New- Tork, have made arrangements for iminediately commencing the building of a ship of the line and two frigates, at the navy yard there. It is confilently stated, that they will also make sinilar artengements a: Portsmonth, Boston and Philadelphia, for bailding a 7 t and a frigate at e:ch-the line of bartle ship building at Washington is rapidly progressing, the materials for a fuigate are collecting, and a 7.4 has been commenced at Norfink.
It would appear that the nine slips of the line, twelve frigates and three steam batteries, authorized by law, will be completed with all desirable speed, -and it is expected that the cost will not exceed the 8 millions appropristed. The frames of all those vessels will be of live oak. When they *re built, our navy will consist of

12 ships of the line,
19 frigates,
4 steam batterics,
8 slonps of war;
with a number of smaller vessels, besides the fleets on the lakes.

We have in commission-
3 slips of the line,
3 frigates,
7 sloops of war;
and several small vessels surveying the coast, \&c.
The clestination of the Franklin 74 is said to be changed-she still lies in the Delaware, and was intencled for the Mediterranean.

The ship John Idams is immediately to be fitted at New-York.

The sloops Ontario and Saranac yet lay off New York, completely fitted for sea, waiting orders.-
The Congress frigate has been at Yort au Prince, where caplain Morris and his officers were treated with the greatest respect by Petion. The absence of our consul is said to have prevented any definitive neguciations on the object of her visit. She lefi there on the 27 th of Juiy to settle some affiars with king Henry, at the Cape.
From the apparent bustle, as to naval matters, it has been hinted that "something might be brew. ing." The whole secret, we expect is this-the law is passed for building these vessels; the treasury is futl of money; it is the people's desire to have a respoctable navy, and its erection at this time will give employment to thousands of ship carpenters, \&s. that are suffering for the want of it, through the present stagnation of commerce, and it may never occur again that they can be built so cheap. Thus all things are fitted to each other, and opportunity is seized by the forelock,

Nural force on the laken It as been publisiter, that the Britis', are dismmeting their vessels upon the lakes. lais, we learn from goot amthority, is in pursuance of a motual understuding hetween the American and British governments, that neither power shall retai more than two revenue cutters, of two guns \(\epsilon\) ch, on either lake, in service: ond that six months notice sliali be given by either, of an inisention to augment this forae.
In this arra.igement the interes:s of the two 5overnments are mutually pronoted-anil many occasions of coilision and icalousy avoited. It swes a great expence to both; and is, besides. an evilence of conficlence and good will which it is the interest of both to promole.-.l.g grs.
Specic is pouring in from all quartere, The Britisl frigate Inconstant, sir James Yeo, from Jamaica, via llavana, with \(2,250,000\) dollars on bnard, stopped at New York on the 6th instant, to 1 ind 405,000 for the U.S. Bank, and \(50,000 \mathrm{f}\). r individhals-the balance for England. A ves el has juit wrtiverl at Boston, from Lisbon, witl, 84,000 fur the U S. bank, and: 34,000 for individuals: the U. States ship Alert braught 75,000 for the bank of the U.S. We also notice arrivals with specie, on private account, from C:mpeachy, and many parts of the West-Indies, Mexico and South-Americ:, from Madeir:, Amsterdam, Havie de Grace, Cork, Liverpool, \&c. \&c. in all not less than twenty or twenty-five in the last two weeks. If there should happen to be a short crop in Europe, we shall, from the extiberance of our's, give a great additional force to the current. The emigrants, also, bring much with them.
John Quii.cy . Aldams, esq. arrived at New. York from Loidon, on the Gih inst. He has been teat ell "ith a sump uol:s public dinner, at Ta "many Hall.
The Uuited Siates' armory at Harpor's Ferry employs two hundred and fifty or sixty persons.20,000 stands of arms, complete, are Ilenosi eer, ready for servive, and a great number is in different stages of progress.
. Accidents and crimes.-Whether it is because the printers want matter and eagerly seize upon things as news which hitherto they disregarded, or whether there are more accidents and crimes than there used to be, is hard to say-butt the fact is, we never heard of so many houses destroyed by fire, so many people drowned or otherwise accidentully killed; so many suicides, and so many robberies, as we hear of now.
The new steain boat Tirginia, plies as a packet between Baltimore and Norfolk. The distance hetween those places is 210 miles. It is expected her passages will average less than 23 hours. Tie Virginia is a very large and staunch boat, elegantly fitted, and cost \(\$ 55,000\)

Wheat.-A Mr. William Buck, of Lancaster, Pa. is said to have reaped sixty bushels and three pecks of wheat, weighing 66 lbs per bushel, from onc acre of ground!

Exchunge, At Nevo-York Aueg 9. Piiladelphia, Baitimore, Bank of Columbia, and Riclumond bank notes, par. Boston \(\frac{1}{2}\) dis. Rr.ode Island notes, 1 oo 3 dis. Connecticut, par, a 1 per cent. dis. New Lampshire \(1 \frac{1}{2}\) to 2 dis. New Jersey, par to \(\frac{3}{4}\) dis. Delaware notes, 2 a 10 , do. \section*{ivmas afbains.}

We learn from our inuthern papers, that the as. semblage of the Crevks at fort Hawlkins, in July; amounted io between fourtecn and fifteen lanisared and many were piecented from attending by the inconvenience of teaving their crops at that im. protant period of the senson. The concluet of the Indians at this comeil, it is said, was marked with great propricly and decorum. The principal chiefs sined every day with general Mitchell, the United States' agent, and in the afternoon executed the points which had been previonsly discussed and de ided upo' il council.

At this inceting, we-are informed that the Unit States' agentliad sudficient induence to prevail on
the curncil to abrorate their arcient laty of retaiiation, whic! permitted a murde: in be sarisfied by taking the life a re'ation of the inurderer, if the principal could not be full di; a dhave thus forbidderi the practice of indiscriminate revenge. Oa this point they hove passed a written law. The agent also procured their consent to the cession of a pricce of tand w! ich shuts them out entirely from a part of nir frontier and sectires tlre citizens from the danger of Indion agzressions. The day the United Siaies' I gent left them an unfortunate affair occurred The Indians havine roceived a cone. siderable suin of money from the Uni:ed States, some of the younger warriors determined to have a fro io, brfore they went home. A principal warriou, otie whon wos next in command to M'Intosh, in the scrvice under general Jackson, among othiers got Jrunk and killed his own nephew The chiofs im. meriately convened, and after ascertaining the fact of the innriler, they ordered the perpetrator to be instantly taken and executed, whish was done in less thain an hour after the murder had been commilied.

Indian Speech,-The following speech of Slafecian Ba:an:Tt, a half breed Oreek Indian, was deiivered a s!nrt time past before a national assembly of the chiefs:-It eviaces a picific dioposition which should be en rished-b; our givernment.-Geo. Irgus.
"My Conntrymen-find made us all, both red and white Americans, to live on one island. Since the Nmighty has said we should live together, why did we join the people who came from ber ond the salt-water? Why did we joi: the British? Let us raise our children to the end that food created them. We can live wihout the red-coats or their help. Let us, then, raise our corn and eat it. When Goil gave us this land, he said we should rest our bones upon it-so he said to all those to whom he guve land.
"I think there is but ane God; and that that Gool is just-if we walk strict is this, he will save us in the neit world. The cold water which he gave us still runs-so are the paths fur the government of the conduct of good men still here. Foolith as I am. my little understanking tells me, when I sce thes: things, that they are fond's works.
"When the white people first came among une the Great Spirit had forbid our mixture we did mix-and to avoid the pain of separating the hus. bard from his wife, the father from his children. and the brother from his sister, he has continued the course of the mixed blood in our reins. We must remain in this siluation, becanse God is upon the top of us, and directs it to be so. Gen. Washington accuired a war-name above the rest of menbut the mixture of our blourl, and the accession of a part of our strength in his, added not a li:tle to it. You all know, my countrymen, who know any thing of the unfortunate hisinry of our country, how slow was his progreas when opposed by the strong and undivided urms of our fathers, and low raphl it han heen smee Whiskry and Calico have divided us.- We arc all one people."

\section*{NILES' WHEKLY REGISTER.}

A strplement of eight pages, to dispose of a quantity of miscellaneous matter (frequently postponer!, was intended for the present number, but firsidden by circumstances, On closing this volume the editor felt justified in saying something aboutt himself-see "Address and Remarks," and was willing to make an indemnity for the space occupisd by it.

It was the editor's design, to have published the concluding number on "Pourical ficonomx," in this volume. Other avocations, of a less pleasant but more pressing nature, have prevented it. Perhapp, as the preceding numbers are complete as far as they go, the delay may be advantageous, by enabling him to give a more extended and a better view of the subjects that have so much interested his readers.

The observations on Banks and Bank notes are not concluded. Some have thought them severe, butall acknowledge them to be just; and it is a pleasure in add, they have done good. The evils complained of bave been lessened by them.

The second letter on the "Public Lands" thongh our obliging correspondent regrets the dryness of its detail, will be found interesting to those concerned in then: as well as for its history of the things that belong to them in tire section of our country described.

A rarr.- "Cato" has favored the public with another essay in the Niational Intelligencer. He chiefly mallutains the propriety of his furmer views of the s11,ject, re-urges his arguments, and deprecates the probability of the evils that some have spprehended from the adoption of them; but does no (wuch the inain point-the manning of such a force as he wishes us to have. He sarcastically thank the editor of the "Werker Rearstra" for havirip "condescended" to treat him as a "real isitad of the nary" -This does not seem quite fair. What riglit had we to know "Cator" He was (1) ay a bonymous-we had to form our ovinion from what oxa immediately befure us; we presented his ©.tas Enithe in precedcuce to any remarks upon it. "Can" is certainly positician enough io know, that thit which inay really be a proper and prudential toharure, can be defeated as weil by pushing it too fir, as by holding it lack. But, if it can give the writer any satisfaction, the editor will movt freely acknowleilge a perfect conviction that he in truly what he profisucy o be-a "real friend of the navy." In tois acknow ledgment there is no recession from the grount ve took-dut, differing as much as we do it (ap.an)n, we are axsured that there is no dif. ference in prociple between us. And the history of natims convinces ins, that the sovereignty of the ocean wiil mot re-aing pomathett.y with ling taind.

It is a get fica ion to be told, fir the first time, within a few days \(p+a l\), thet the force proposed in our essay is the wimotuem of lie present views of sothe of our inos tiviencel and intelligent naval office-s: in compretent to all the great purposes that we ought to hope for from a navy.

Voz. Xll.

\section*{Editorial Address and Remarks.}

We have arrived at the end of the 6th yeu of our work. The 12 th volume of the Weekir liegistex is herewith completed, except the title pare and inclex, to be issued as heretufore.
This publication has acquired a body that now speaks for itself. Its matter and manner have been judged by the people. It has ontlived the fate predicted for it, by many of the best friends of the editor; and, whatever may be its future lot, it has established a new era, if the phrase is not too pompous for the occasion, in the printing businces. not only in regand to its regular and extensive collection of documenta and facts, in so many departments of useful knowledge, but in passing throughle the warmest perind of politics, and most warnily engaged in them, without a solitary personal at-tack-a descent to remarks upon men, so much easier to an editor than the support of principles; except in the case of Cock-burn, perhaps, and two or three others, -whose outrages on every thing that was laudable, placed them under the bann of all the worthy. But ever in regard to these, as well as in respect to all else that has been inserted in this volumnious work, the editor can lay his hand upon his heart and declare, that he never has given a thing for a fact that he did not serionsly believe was one; and he may further observe, that apparent facts were ganerally examined with much caution before they were received as such.

When these barbarisins were going on by the Cockburns, and when the Disgraceful Convention was in preparation to be held, or was holding, - the editor was frequently told by very many persons who negatively sanctioned them, that the Registen was too warm; that so much politics injured it, \&c. Perhaps, the latter may have been true-bit they might as well have reguested a man in a Fever to kecp himself coul, as to have advised me to a different course from that which was pursued. With all my heart, and soul, and mind, and strength, I obeyed the dictate of Wasuivotor, to "frown indignant" on the desperate "attempt;" and am flattered with a belief that I did my share as well to expose its wickedness us its folly. L.et the prospective facts stated in my essays at thit time be compared with what has really happenet, and misht take some credit in myself for "a spirit of propliecy." But these days have pass, never, I beheve, wo rehirn-and i proud sational chabaotik is growing ollt of the shreds of party. On most of the great measures of policy we are no" more unit. ed than any people in the world; questions involving conflicts of opinion will, and, perhaps, ought. co exist amongat us; but. I trust, that oul differen. ces will more and more become as the differences of friends and gentlemen, having a common object. Some there are that must at all times be dabcling in hot water-but the little inflience and ability that I have, shall be exer'ed to sink these, and the whole office.seekling tribe, in splendid views of our extensive, happy and (about to be,) mighty republic.

We liave Innd "enough and to spare"-we anjoy as grear a portion of happineas as cati casily fall to the lot of a nation. It depends on ourselves whe;

1her we continue in the possession of it or not. The base on which it must rest is an enlightrned pulicy, foumded upou potitical economy; a science that ieaches us to produce great results from ap. pirent trifies, and extends equally from the smaliest to the most importint sources of poiver in a jeuple. I do not mean a mere power for war; I give it a wider runge, and mean the power on frosper in evary lesitimatic undertaking. Bur his science is mi erable neglecied. Genilemen will give me what crecit fior the assertion they please, -but I truly confers, I have felt myself humbled at tho hig \({ }^{-1}\) ):ai es 'sestoweil upon my small efforts in it; \(\dagger\) whicla
\(\dagger\) Is, in whatever concenis the e liourship of the Wh.ики.y lingistan, I ann especially zealous to be re farded as "a matter-of-fact-man," as a distuguish--al rentleman, on a public occasion, was pieased to Fa! I me, I take the liberty to offer the folloviris ex frict fiom a long editorial article in a very respectwble nowspaper, the "Western Herald," published st Stenbenville, Ohin. It is but a small part of the spontaneous praise of the editor of that paper, who is untroun to me, personally er by private correspoaldeve, though it seems that we have, without knowin it, mutually esteemed one another. The scxt of his remarks is a short editnrial paragraph in which I assumed some share of the credit of bring ine the words "national character" and "national fe iing into common use- (see the Register of the 1.1 it.) and, an first glancing at it, I felt a little alammen lest that assumption might have been thonght indelicate by a man whose good cpinion I woull desire th have, and yet I felt justified to myself in what I had done. For, though the "oyster knife" wit, or "hair splitting" criticisms, of such folks as the editor of the Albuny Gazette and the late editor of the Virgmia Putriot,* raise a broad smile for a seconl of time, there are some whose reprehension would make me unhappy for a week, Whough so lonc used to being bandied in the papers. But the editor of the Merald not only does not reprelsend me, but gives me infinitely more credit in this and in other respects than my vanity ever aimed at loping to receive, from any man, much is to deserve. After speaking of the es. says on "Political Economy" which, under vari. ous heads, have appeared in this work, he says-
"A man might read Adam Smith's wealth of nations till doomsday, before he could get half as much light on the subject of the ecomomy of nations, as Mr, Niles has furnislied with in the last two years. 3y localizing the partieular branches of his subject, he has matured and prepared the mind of the jeader to take a "viez of the whole ground." -Mr . Niles has not only done "as much "as any man" in developing the best mode of maturing and making the most of our resources, but in our opinion he has done vastly more than any ten, or we might say more than any 100 men, whatever may be their standing in the nation, and, so far from Mr. Niles having rated his labors too highly; he has not valued them equal to the high estimation in which they are lield by the public.

\footnotetext{
This man once raised a fair laugh. He wrote and published about three columns to prove that \(I\) was a fool;-and, in his very next paper, in a column and a half, made it out that Mr. Jefferson ":as one also!-If he had known how moderate my pretensions are to the character of a scholar, he would hardly have taken so much trouble with me. I am no scbolar-to make myself clearly understood s anl that I aim \(a^{1}\)
}

Iave also caused me deeply to regret a want of tia. lents to develope its multifirious branches, as I would-as well as a want of suflicient ease and retireHent for refection, to give if even the views, thrst I wight.-The truth, how ver, is-that very many wish to read in the manner that they sleep; without the trothle of thinking of what they are doing:-and I have always been satisficd, that thoingh the laborious statistical articles in this work are must creditable to it in the opinion of many, some would rather occasionally see accounts of ghosts and "horrid murlers," with narratives of crim con. shewing as "clow
"The subject of political economy, which Mr. Niles has cxamined, required much research. The labor of the mind, and of such a mind as Mr Niles', has been productive of much good to the nation und to the millions of which it is composed. A mental labor, like Mr. Niles', is worthy, every way worthy, of its due reward. He possesses a mind of great compass, and embraces at a glance, the means and the aggregate of a nation's wealth. He views the minutix and the fragments of man's inHustry scattered over the various climate and soil of every state. He combines the substance and the indinstry of all, and presents to the nation a view of its whole mass of weal h. He does more: he exposes the prejudices and the folly of an enlighiened people, in an enlightenealaze, in consuming the manufactures of foreign nations, to the manifest injury of our own. He presents you also, with the picture of a nation about to regenerate itself, by saving its substance, simply by the introduction and protection of "home mannifactures." He has convinced every man among us who was devoted to England and her manufactures, (and they were not a few) that it is more profitable for us to make our straw bonnets, our boots, shoes, our cotton, our linen, our cloth, \&c. here than in England. And so much is the public mind improved (and greatly by his means) that it would now be deemed tedious, and trifling with a man's time, to offer an argument to prove that we can grow rich and accumulate capital by manufacturing so much as to supply our own wants and even the wants of others, and that we must inevitably grow boor, yes poor indeed, by foolishly importing manufactures from foreign countries, substitutes for which can be made better and cheaper at home. The home feeling on this subject is now good-only keep it alive, and it will do every thing for us as a naiion."
[At the conclusion of the whole, he offers the following proposition. The question is partially answered already, (in an extended view) in the second number of our seises on "Political Econony" recently published, but may be very happily introduced, so as to como loome to every man's fire sicle, in the concluding essay, not yet finished \(\dagger\) and I ac. cede to the request with the same frankness that it was made. I will attempt to shew the important "difference" desired by Mr. Hilson-net, however, with the hope of giving it so much force as he would cause some to expect from me.]
"A word to Mr. Niles. We would propose to you, to present the public with a picture or a statement of two different settlements of ten thousand acres each, with a given population, shewing the difference in their advancement to wealth and the accumelation of stock. The first settlement we may suppose to be located on the Atlantic seaboard, and
†A very friendly writer in the Plattsburg Republican, will find a grateful acknowlegement for anc a liberal use of, the statistical facts afforded by him, in this essay.

Lorenzo raised the devil," and the like. But they do not suit iny huinor, hough the introduction of them misht not injure my pocket, and a pair of sharp scissors become the great editorial instru. ment instead of a goose quill, 10 the relief both of borly and mind-and cannot have a place in this work, while it is under my charge. It is very certain that my first object is to make money; but literary raen (descending even to my own walks) as well as statesmen and soldiers, have a thitst for what the world calls glory, and as warmly pursue it -a passion that, properly regulated, is the grand timulus to noble actions;-and my second abject, bardly less ardently diesired han the former, is to lie tire masker or compiler of a work to become a since quen no:2 to complete a mbatur. A few years hence will shew the extent to which I have suc-\(r\)-eded. And here it seems a proper time to saythat the work is my own With the exception of abont a dozen current articles, long or short, in the Ist and 2 ned volumes, and about as much in the luth and 11th, (all which were written from outlines furnished by inyself) every thing else of an ediiorial character is the product of my own personal labor, unas isted in any way by any one socver.

In reviewing the vast field occupied y the Reorster for the six years of its publication, I do mot see any thing that I heartily repent myself of, excopt some dumin's notices. Would they vere all blotted out!-Bus usey were wrung from me by an excess of peouniary suffering, not originating in this wark, but which ougit long since to liave been relieved by i:. Nothing of the sort will, probably, occur hereafter; as well from the result of experience that they do no good, as in there being no necess:ty for thein, by the new arrangement requiring payinerit for the Regloten in advance. Ir ison
may be called the inglo. Anerican province, to raise agricultaral prodiacts only, and io purchase every manitfucturel article that they used from foreign commeries. The other settlement we would locate on the banks of the Ohio, and call it the Economical Republic - to raise, produce, and manufacture, every thing they might eat, drink, wear, or in any wise uie, and scli thesr surpliss articles of agriculture and manufactures for cazh.
"The question then would be-"sphas would be the difierence in the accumulation of caphat on ore year, between the Inglo-American fiozince and the Economical repullici"
"Mr. Niles witly equal to such an estimate as this. Slould the decline muking it, we must, as we are strongly impressed with the importarce of present. ing such a picture to the public, attempt it. But the sutject being familiar to Mr. Niles, and every way in congent with his habils and reflections, we soubt not lic will accede to our proposition. Such a comparion will have a goosl tendency-it will dhew us how we onght to live-it will shew us how to grow rich-it will shew the mution the way to wealth-it will make the principle of liome cconony familiar to every village, town and city, in the \(U\). States-it will present a butd and inpuosing view of the gnod fruits of home feeling, of lome industry, and of home economy: and if thereais a Brisish Oiol lurking any where near, with his eyes still covered with the film of prejudice, present hiun with his picture, and he must cither fly off to his mative or congenial soil, or acknowlerlge that his predelic. fons are stronger than facti."
- A story of a drunken lowband an I a strimpes vife, just now takiug its round in the papers. A single mail brings io is fivand siv conine nf: A

This principle the wonk vill stivo of fall. It is a rightful and reasonable one, and will be cont. tended for at every cost. If it cannot wihstand the first slock which inattention, pure inattention, to the requisition, may give to it-fur many may neglect a compliance with the terms and of course cease to receive it, and some perhaps even feel offended by the procedure, I cannot help it.That which is esteemed full value is offered for the moncy required; but every one has an undoubt. erd right to hold a different opınion, and will act for himself. After using every fair and honorable means to keep up this work, on my part, it will remain with the public to say, whether it shall be printed for unany years by me and my sons and suc. cessors, or expire in a few. I cannot preterd an indifference to the result of this proposition, though convinced that the same industry and application in other prrsuits might be quite as productive of pecuniary profit-for it is my "liobby." And, to the real friends of the Weskle Remistin 1 have respectfully to say, that their efforts are "impressed" or "conscripted" to bear it against the pressure of the moment, by extending its circulation in their several neighborhoods, lest it may suffier through the inattention just spoken of. The favorite plurase, "that his majesty wants men and must have them," just as well applies to ns, in having punctual sub-scribers-"his majesty" could no more carry ou his wars without the former, than we publish the Re. aister without the latter. A id we will further remark in conclusion, that the instructions which may be given for cooking a beef-steak, as \(f\) :." things of the greatest moment, suits us precis?, : it is this-"If 'iwere done, 'twere soell 'tivere weild done, quick-ly."

On this occasion, making a period, as it were, in our editorial labor's, the present volume being designed to complete a series of the work to a cer. tain extent, as explained in our number of the 9th inst. the edlitor, perhaps, may be justified in inserting the following extracts from three letters rcceived during the week, nowher of which were designed for or expected to be published, and the names of the writers camot be mentioned, however flattering it might be to his vanity to give them. It is sufficient to say that they are flo'll ger. t!emen that have fillat, or do now fill. some of the v ey highest legal situations in the gift of tive United States or of sume of the states, eminent for their literary acquirencuts. The honest truth is, that he is proud of stich things; nor does hesee any thing th, be found fault with in the confersion of it. A man's repitation is as much a part of his stock in tracle as his money, and sometimes worth a great deal more; and he has as much riaht 10 make an honorable use of \(i t\).

\section*{1}
"The Registor really contains such an extent anis variety of infiormation, oll every siliject interesting to the politician, professiomal gentlemen, or inan of business, that it has superseded with ine all the other periodical publicaio w of this comatry. May it contunue to prosper and flourish."

\section*{11.}
"I consider it [the Weekly Reginter] a publication highly usefuif for the political, staistucul, and judioial information, which it en itains; and in other respeces it certainly sinpesses anly other similar journal, wi li whicli I am acrụinted. Its strong and ardent patrivtivm, and us firm Aincricart principles and tuacherenss, canmet b 1 i give \(1 t\) a still. ingher claim with thise who sinderely love their emenery-To thal counmondation your work is fair-

Iy entitled even from those who may not subscribe to all the opinions which yous entertain. To myself, personally, it has an additional value from the opifion, and decisions upon legal questions, which you have so judiciously placed in it."

\section*{III.}
"1 find much to please, and instruct me in read ing the volumns of the legister, which I often look into in my hours of leisure; and I feel grateful for your labours which have selected, arranged, and preserved such a mass of useful matter in a per. spicturts and permanent form."
"I ou have my best wishes for an increase of profitable patronage, and success in your editorial labours."
L. The late Mr. Dallas, author of the famous "Esposition of the causer and character of the war" with Creat Britain, openly and repeatedly mentioned the services this work had done him, in that well executed undertaking.

The Kecister is now as a part of the out-fit of our foreggin ministers, and is at every priacipal cour: in Europe. I have sold either five or six sets to our government.

And, 1 am told that a copy has been obtained by the emperor of Russia, "the magnanimous Alexander" who has "graciously been pleased to say, that he received more light through it of the real condtion of the United States than from every other suurce.

\section*{Glauces at Europe.}
\(\|_{u}\) \& : :ppears to be the only country in Europe where the state of man is improving. It is true, there was more room for it in this great empire, perhaps, thian any where else, a very large part of the population being semi barbarians and absolute slaves. Alexunder is, withont doubt, the wisest and most politic, as well as the best sovereign in the world, (fur they are generally half-ideots or drunken sots) thougli not the least ambitious; and deserves great credit for his successful exertions to ameliorate the condition of the numerous and various peopic that inhabit his widely-extended empire, as yet much belaind the neighboring countries in a knowledge of the sciences and useful arts. The views of this prince are truly gigantic; and he will, certanly, be the arbiter of the old world, if the present state of things is permitted to go on. With one foot placed on the Baltic, ready wo be advanced to the atlintic when occasion fits it, he washes the wher in the \(P\) acific, and stretches his arms from the puie towards the Mediterranecn. Already, emphatically entitled to be called the ruler of nations, and having blotted polcind from the map, he persuades tise Grand Turk out of some of his funest provinces as introductory to a future seat at Constantinople, holds Prussia, Deninark and Szeeden, and several German states as his satellites, alarms Lus. twia, inimdes upon Persiu, and threatens even the distant empire of China. In France, too, he ruies, and Spain and Italy bow to his iufluence. He protects the arts, encourages agricultpre and extends commerce. The black Sea is covered with the Russian flag, which now visits all nations, and the Caspian will soon be thronged with their ships. The disordered state of Earope has thrown into his country many thousands of the most enlightened and most useful of her citizens; and he, instead of feaming, has cherished thera, to chasten society, and, in a thou sand ways, a.ld to the resources of his empire.Liberal ideas must more and more prevail, and the reasantry receive emancipation by degrees-at pre-
sent the bulk of them are merc elares, and, in the parts distant from the capital, with no more rights than cattle. The great military force of liussia has been raised exactly as a man would select certain oxen from his herd for the butcher's knife; yet Alezander, on one or two occasions, descended to talk about the conscriptions of France! Russia has also a considerable number of ships of war, some of which are said to be very fine vessels; bit will not, prohably, become a great maritime power until it pleases the emperor to extinguish. Dermark and Stueden and drive the T'urks into Asia; events that, probably, may soon come to pass, and then his means and conveniences for a large navy will be very ample. More politic than Napoleon, we sec that Alexunder has fully as enlurged views-and, in truth, it appears quite as necessary that kings, as individuals, should have a master: and, when he has consolidated and organized his late acquisitions, we shall see whether it is better that they [the kings] should be gov: merl at St. Petersburg than at Paris.
The finances of Russia, in common with those of Europe, at large, are however much disordered, and the public credit must be at a low ebb; for, by a late ukase, the commissioners of the sinking fund are nuthorized to give a bonus of 20 per cent. for monies lent, with 6 per cent. interest on the whole capital thus created. It was almost as bad in the United States during the late war, when a vast conspiracy was in full operation to bankrupt the goverument; but it did not last long-and, being at peace, our 6 per cent. stocks are above par. But many of the British loans have been raised on as destructive terms, in time of war.

England is in a peculiar and very interesting state. She has neither external nor internal war, yet she is not at peace- [see the speech of the chancellor of the exchequer on the budget; ] but with peace abroad, has a quasi war at home, and is compelled still to keep up a vast regular military force to assist the "loyal" militia of the kingdom. With her great exports and the vast product of her manufacturing industry, rich colunies and numerous advantages, the people are unable to pay the taxes levied upon themi, and these taxes, if collected, are inadequate to her expenditure! The permanens contributions of the people cannot fall much short of 100 millions a year; say 60 millions for payment of interest on the national debt and support of government, 15 to the various herd of commissioners and tax-gatherers, spies and pensioners, 16 in poorrates and at least 15 in what are called "private charities," but which, in fact, are nearly as much extorted as any thing else, and a long list of et ceterus. In the present year, the government will really borrow not less thin 20 millions, ( 100 millions of collars) and next year as much more, with the interest ond this, must be horrowed, if the present state of things continues. The habeas conpus act, once the boast and glory of England, is further suspended, and the infamously famous letters de catchet of old france, are virtually in use. The whole country is infested by spies and informers-villains of the darkest cast who urge the people to riol and disorder to earn the wages of ministers, as is broadly, yet strangely, confessed in the report of the committee of the house of lords, recommending a coninuance of the suspending act, and as has been repeatedly stated, and never denied, in parliament." "Sham-plots" are

Extract from the report. - "This intelligence must be considered as resting in many of its purts upon the depositions and communications of persons who either are themselves more or less implicated in
a part of the system; without them the arm of government mist fail, and the leeches cease to suck the blond of the laboring poor. These are the words of trut'/ and soberness-literal facts, of common notoriety: and some, in the house of commons, have openly said that certain tumultuous meetings of the people, as they are called, were for a fourth part composed of spies, urging them to extremes. A wretch, that passes by the name of Oliver, was detected in some treasonable act, and about to be com mitted, but instantly released by instructions from London! The people liave found that in fighting for the "liberties of Europe," (the phrase under which all the J.hn Bulls cloaked their own schemes of do. mination,) they have perfectly enslaved themselves; and the boors of Russia are hardly less degraded than the laboring classes in England-one-fifilio the peuple are paupers, dependent on the "public bounty" for potatnes enough to keep soul and body together. The secret service money of England, openly acknowledged, or drawn from the "droits of admi. rally" without saving ne word about it, amounts to a greater sum than the whole cost of the govern. ment of the United States, including the interest on the national debt; and the payment of the persons employed there to manage the debt and collect the revenue, amounts to three times as much as we have in pay! France had her hastile; but every English county jail is one nuw. Misery increases as it goes on-the taxes are equal to the whole rental of the kingdom-lie wholesome middle ch iss is disappearing or has disappeared; late respectable men are literal beggars, and the whole wealth of the nation is collected into the hands of the worthless, sipeculating, stock-jobbing few; who, in luxury, look down and taugh at a starving multitude. With an entire evidence of the fact that England is ton populous for a peace establishment, so many obstructions are laid in the way of emigration as, in fact, to deny it
these criminal transactions, but who have apparent
ly eng.ged in them, but with the view of obtaining information, and imparting it io the maristrates or to the secretary of state."

Sir Francis Burdett roundly charged the ministors with manufacturing the treason themselves. The spies, it appears, marle much use of the name of this rentleman to get the canfidence of the people, and sir Francis enquired if they were instructed so to do-Iord Cavereagh admitted that they were so instrucsed. What a state of society is here! Whn can wish it continued?

We liave a particular account of the detection of one of these spies in Ireland. The wretch was the chief evidence at the Lifford assizes against several permons charged with offences that, if they had been guilty of, would liave cansed them to have been transported, at least. The presiding judge happened to be an independent man, who loved justice innre than the king's service; and, in the evamination of the fellow it appeared, by his own reluctant confession, that lie was employed by a justice of the peace to entrap and ensnare the un-wary-to serve in which lie acknowlerged that he had taken no less than five false oaths which he had meant to break; that he had been present at the burning of a honse, withont using any means to prevent it, thinking it sume enough for him to communicate the crime when it was committed, \&c. \&c. The principal in this business, the justice of the freare, was a in ijor I'Arcy; who, it appeared, had a tribe of such scoundrels in lis pay. The persons charged were instantly acquitted on the preceding ficts being known.
to those who have the most neerl of it, from a jealousy lest they might inci!antaily swell the population of another power-rather than which they would have them to perish at iome!-To play a lit:le longer on the public fecting, a committee of the house of commons have intimat d that a reduction of the interest on the lebt would be expedient-but this is nonsense; thr people never will be relieved of it but by managing the affair theinselves; and happily, ninc-tenths of the loss that might thereby be incurred would fall upon those who dishonesily, or without value given for it, aequired the property. The poor mall kirg, perhaps, holds a million or two, fur an ins'ance; so it passes through the immense mass of nuivances, in state and church. Almost everv part of the country seems agitated; but if the penple have any fixed design they are without method, and only make bad worse by a s!ıew of resistance.

What is to be the end of this systen-or when it shall eud, we knownot; but it seems as if it must have an end, and we camnot be sorry that the worst government in the world should fall.

France, that lately dictated to the continent, is now bearded by all the old "legitimates;" a foreign army in her territory dictates the law to the king, and ex:acts tribute by the bayonet. The imbecite Bonrbons are restored, and all that belongs to her as a great nation has retired, or reposes for a new upportunity to come forth. With the exception of some inobs crying for bread, France seeins quiet; but we must rather believe it is the quiet of neces. sity than of content. The guvernment is burrowing large sums of moncy.

Spain, with an ungrateful fool for her kirr, suffers much. She is every way miserable-withouthonor and without means. Poverty prevades the whole country. IIer public debt is about 60 per cent we believe, under par, and there seems to be little pros. pect of paying the interest or princip.al of it. The king would borrow much money, but none will trust the traitor.
In Austria, and Gevmany gencrally, together with Prussia and in the Netherlands, much private distress and public difficulty prevails. In Siwitserland, also, and northern Ituly, there is great suffering for want of food-mere necessaries of life. The financcs of all are deranged; and it would appear, that no government in Europe possesses res uurces equal to its expenditures, though all are at peace! Nor is there more than one or two in which the people have, or can get, enough to eat by their labor! Such are the fruits of legitimacy. What a contrast to the state of our own republic!

\section*{The Black Sea.}

The Niational Adrocate exhibits the importance of the trade of the Black Sea, and urgen it to American enterprize. From the improvements recen:ly made on its banks and of those of the rivers that empty into it, by the enlightencal pulicy
the Russian government, the chief prort, Oilessa, bas become the granary of that quarter of the world. In the last year, no less than 1360 ships cleared at this part, 846 of which were large wessels; viz. 407 Russian, 258 Euglish, 101 A istrian, 25 Erench, 23 'Turkish, 15 Swedes-not one of the United States. Ta:!garock, at the head of the sea of Asoph, is also a very important place, and is the great depo: of the over-land trade with China, \&c. Nicoleff and Cherson are also represented to be improving very rapilly, and carry on a very handsome commerce. The neighborhood of the Black Sea will probably become anong the thost important and interesting of all the countries in the Iussian monarcly, having great advantages of soil and climate, and watered by several great rivers. The Tuks command the entrance-but it is thought they would not deny it to the American flag, if it were asked, as whatever relations we have had with them have been friendly; and indoed, they will be little dispused to quarrel with Alexander; who, if not checked, will himself very snon command it; he has full as much ambition, with more policy, perhaps, than Nupoleon, as is seen from his stretching his immense power in every direction, though he rules a territory far greater in surface than all Europe. If his present designs should not extend to a driving of the Turks beyond the Dardennalles, it will at least be exerted to support the commerce of this highly favored part of his dominions, and the Turks will hardls refuse egress and ingreess, as he wishes to have it.

\section*{Cannon Foundery.}

The New York papers gives us a very interesting account of a new and extensive camon foundery, lat ely established by l'eter Townsend, esq on Chamber Creek, near Newburg. Ninety tons of cannon, the first ever manufactured in the state of New York, after undergoing a thorough examination by M.jor Databa and Lieutenants Simason and Thomas, were proyed in a very severe manner, and the whole quantity passed the ordeal. The charges We:ce as flllows, the first for the 18 's, the other for he 24 pounders-

Puwder.
1 st . Charge, 9 lb .2 Balls 18 lb . each, and 2 Wads . 21. do. 8 do. 2 do. 18 do. do. 2 do. 31. do. 61: 3 do. 18 da. do, 3 do. 1 st . Charge, 12 lb .2 balls, each 24 lb .2 Wads. \(2 \mathrm{~d} . \quad\) do. 10 do .2 do. do. 24 lb .2 do, 33 . do. 8 do. 3 do. do. 24 lb .3 do.

Fach cartridge, balls and wads ranmed home.
"The beauty and smoothes is of the bores of the cannon, seemed to give to M.jor Dalaba great and unexpected pleasure, they are free from honeycomb, and present to the eye a surface of the most beantifui smoothness and polish. The cannon are made from the celebrated Sterling pig iron, long known as of distinguished strength. After full proof by mijor ID laba of all the cannon, Mr. Townsend signified to the m jor, a wish that he would break one of the 18 pounders, if powder and ball could do it. M jor Dilaba then ordered one of the eighteens to be charged with 18 pounds of powder, a large oakum wad, which filled the gun to the centre of he trunyons, iwo eighteen pound balls were added and a large hard wad, all driven hard and home, a maich was then applied, and no other effect produced than a violent report and a great recoil!
"Mr. Townsend in the course of conversation ob. served, that lie intended shortly to make some light

12 pounders of iron for field service, of which the weight will be less than the French, English, o: American brass guns of the sanc calibre."
The lieutenants who assisted in the examination and proof, received a inilitary education at West Point. They pointed the guns, and in 150 discharges never once missed the ohjects they ained atWhich were, first, emply barie!'s, 2d, a joisi, und 3d, a croro bar. A perfection hardly to have been ex. pected. The distance 150 yards.

\section*{The Public Lands. \\ LET「TER II}

Chilicnothe, August 4th, 1817.
dear sir-An unustal press of business has hii therto prevented me from continuing the series of letters, concerning "the western country," which Was commenced in the No. of your "Weekly Rugisler" for the 12 th of April last-(see vol. 12, p. 97.) And it is partly by way of relasation from more arduous employment, that I nozo take up my pen to give you, as promised in my hist, "some account of the several systems of the public surveys, and of the land offices established for the sale of public lands in the states of Ohio and Indiana, and the territories of Michigan, Illinois and Missouri.".
The first body of public lands which was surveyed, is that which is now called "the Oid Seven Runges," lying in the eastern part of this state. This system of surveys was made in pursuance of an ordinance of congress of 20:h M1 y 1785 . It cominences on the N. W. side of the Ohioriver, where the western line of the state of Pemsylvania crosses it; and is bounded on the north by a line run due west from that point to the distance of forty two miles; on the west by a line drawn thence due south to the Oiio river; and on the south and east by the Ohio river. This tract is laid off into seven ranges of townships, which ranges are run parallel with the aforesad said state line, and are designated by numbers, progressively, westward from it. The townships are numbered, progressively likewise, from south to north, commencing with the first fractional townr ship on the Ohio. In all the townships in the old seven ranges, the sections are numbered nor thwardly in successive tiers, commencing at the S. E. coriner of the township, as in the following example:-
\begin{tabular}{|c|c|c|c|c|c|}
\hline 36 & 30 & 24 & 18 & 12 & 6 \\
\hline 35 & 29 & 23 & 17 & 11 & 5 \\
\hline 34 & 23 & 22 & 16 & 10 & 4 \\
\hline 33 & 27 & 21 & 15 & 9 & 3 \\
\hline 32 & 26 & 20 & 14 & 8 & 2 \\
\hline 31 & 25 & 19 & 13 & 7 & 1 \\
\hline
\end{tabular}

The next system of surveys, in order, is the "Unit" ed States military tract." It is situated westward of the seven ranges, and is bounded as follows.Beginning at the N. W. corner of the seven ranges of townships, and running thence fifty miles, due south, along the western boundary of said ranges; thence due west to the main branch of the Scioto ri-
ver; thence up the main branch of the said river, to to the Litcle Miami river. The sections are numthe piace where the Indian bombly crosses the bered in the same manner that they are in the "old same; thence along the said boundary line to the seven rat.ges."

Tuscarawas branch of the M1okinguni river, at the crossing place above fort Lawrence; thence up said rwer to the point where a line run due west from the place of beginning will intersect said river; thence along the line so run to the place of begim ning. This tract was appropriated by act of con gress, passed 1 ti June 1796, for saitsfyins land war. rants granted for military services in the United Ststes army. It was laid off and surveyed into townships of five miles square, and located by the holdeis of warrants, aprreeably to the rule prescribed by the law. The ranges in this district are desig. nated by progressive numbers from the eastern boundary, westward; and the townships are numbered in like manner, from the southern boundary towards the north. In pursuance of the act of congress of the 1st of March, 1800, the secretary of he treasury designated, by 10 , fifiy ytarte:townships of the land remaining unlocated, to gether with the unlocated fractional quarter townships, to be "reserved for satisfying warrants granted to individuals for their military services." Those quarter townships and fractional quarters, have been subdivided intu lots of one limmdred acres each, the greater part of which have been located. The remainder of the lands in this district have been surveyed into sections of 640 acres, and offer ed for sale as other public lands are. Each township, thercfore, contains only 25 sections, which are thus numbered:-
\begin{tabular}{|c|c|c|c|c|}
\hline 5 & 4 & 3 & 2 & 1 \\
\hline 6 & 7 & 8 & 9 & 10 \\
\hline 15 & 14 & 13 & 12 & 11 \\
\hline 16 & 17 & 18 & 19 & 20 \\
\hline 25 & 24 & 23 & 22 & 21 \\
\hline
\end{tabular}

The lands lying west of the old seven ranges, east of the Scioto, mul south of the military tract, have been surveyed into ranges and townships in the man ner in which the seven ranges have been; the ran ges being numbered west ward in continuation there of, and the townships northward from the Ohio.The sections, however, are numbered on the plan now pursued; an example of which was given in my last letter. The surveys have been continued in like manner through the lands lying north of the old seven ranges, and the military tract, to the south. ern line of the "Connecticui IV estem Iheservation," on the 41 st degree of north latitude.
l'roceeding westward, the third system of public surveys, is the tract lying between the Great and Lithle Miami rivers. This iract was surveyed shortly after the "seven ranges," and partaken of its errors in an accmmulated degree. The ranges, contrary to all other public surveys, are run east and west, and are degignated by numbers progressively northwaril from the Olno river to the Indim boundary. The towuships are numbered castwardly from the Gireat

\footnotetext{
"See Weekly Leeg. rul. 12, page 98.
}

The foam system of survess in order, is that which lies botweca the Great Miami liver, ont the east, and the old Indian boundary line, rumning fiom the mouth of Kentucky river to Fort Recovery, o: the west. For the survey of this thintrict, the state line between Oin and Indiana, wholl is fun due worth from the month of the Gireat M!iami riv r, is constituted the "first princif'al merilita";" and the ranges are run parallel with, and numbered from it, east wardly to the Great Miami, ond westwardly to the Indian boundary line. The old plan of mumberiag the townships nurthrardly fiom che (o)io, or son:l ern boundary, is continued in this dist-ict also. The sections are numbered in the manuer at piesent pursued, and describet in the letter before refer. ed to.
When the old "Vincennes tract," (so called) it the state of Indiana, was about to be surveyed, it became necersary to change the mode of \(n i m\). hering the ranges and townslips, because the tract lay in the interior of the territory, unconnected with any other public lands; and liad no uatural or pe.t. manent boundary from which the surveys could comanence; and because (anticipating tie acquisition and survey of the Indian Iurds separatims this tract from prior cessions) it would have becn im. practicable to pursue the old plan without carryins into those subsequent surveys a confusion and perplexity, which it was very prudent and destrable to avoid. A plan of survey was therefore devised by that valuable officer, colonel Munsfield, the then surveyor general of the U. S. which not only woid. ed this perplexity and confusion, but remedied the defects of the old system, which experience anct reflection had pointed out to be considerable This plan is the same that is described in ny list (sce Weckly Rugister vol. 12. page 97 ) and is the sa:ne that is pursued in all the public survess cince executed under the direction of the survesor gene ral. A standard line, designated as the "Sicome principal meridian," was run through the eastern end of the "Vincennes tract," which meridi-n being continued south, in the survey of subsequent cessions, struck the Ohio about three iniles betow the mouth of Little Blue river. " \(\Lambda\) basedine," "te right angles from the meredian, has been rum eastwarlly to the westem line of "charles' Eramt," ant, passing the northeasterly line of said grant, it stikes the Ohio river ahout it mile above the must casterly corner thereuf. Cuntimed west from the same point on the meridian, the base line eroptes the Wabash river about three miles above its jinction. with White river; and, crossing the fourteentla range west of the second principal ineradiw, jasses into the next syatem of ratges athd inwns!ips. Fiona the second principul ineridian, the ranges have beet laid off parallel lierewith, enulimardy to the old Indian bonadary running from the inouth of lien lucky river to Fort 1 i covery, and to the state line of Olio; and woitroardy to the western line of the fourtecnth range, west, and the Wabssh river sou Uh of whore it crosses said western line: the ranges are numbered eastward and westward from the principal incrislant; and the townshipls are num bered northward and sonthward from the base-line. This extensive system embraces all the public lands in the staie of Indiana, cxopt the small strip lying east of the last mentioned Iu lien boundary line. It also embraces so much of the teratury of Illinois as lies east of the western buundary of the fourtcenth range west.

The \(82 x+h\) system of public surveys, is that wherein a standard line run nortl, fi:m لue confluence of the Ohio and Mississippi rwers, is constiuted the thard principal .Meridian." The base-line belong. ing 10 the last described system, is continued through this, from the 14 th ringe west of the 2nd principal meridian. The base line cross 's the Jirl principal meridian at about 61 miles, and strikes the Mississi,pi at 121, about 8 or 10 miles below St. Lonis, in Missouri Ter. and abuut 30 milss be. low the mouth of the Nissouri river. In this sys-\(t-m\), the ranecs and townships are numbered, prog"esaivedy, from the meridian and the base line respectivel, in the manner described in the last system; the 11 h range east of the Siod priucipal me. ridian is clased on the 14 th west of the 2nd.

The seventh system is unconnected with any other, and was formed for the survey of the army Womty lairds appropriated by congress in Illinois Ter. This system of surveys lies between the Mis. sissippi and Ullmois rivers, and commences at their junction: tron which point a standard line has beeld rish mosth, called the fourth "principal meridion." The course of the Illinois rivel at its junction with the Mississippi, is nearly east, the meridian therefore immediatcly crosses it, and continues on the same side to the end of 72 miles, when it recrosses to the western side. From this point, the base Jine is run west to the Mississippi, about 52 miles distant. Ahout \(2,500,000\) acres have been surveyed in this district for military bounties.
Therighth system is for the survey of the public lands in the territory of the Missouri. A standard line, the "fijth priucipal meridian," has been run north from the month of the Arkansas river, which meridian crosses the base line at 51 miles; the Missouri river at 318 miles, about 35 mites west of St. Louis, and strikes the Mississippi riser a few miles above the mouth of the Illinois The base line is sun west from the mouth of the St. Francis river, and crosses the meridian at about 27 miles; and strikes the Arkansas river at about 85 miles. Between the Arkansas and St. Francis rivers, there has been two million acres of army bounty lands appropriated and surveyed. One million and a half more, has, I believe, been surveyed in the vicinity of St. Louis, on both sides of the Missouri river. Throminh this extensive tract, the ranges and townships are desiguated by progressive numbers, from the above describel principal meridian and baseline, respectively.

The ninth, and last system of public surveys which remains to be described, is that formed for the sur. vey of the territory of Michigan. When the two millions of acres of army bounty lands, appropriated in this territory, was directed to be surveyed, it was intended to have it laid off adjoining the western boundary of the cession by the treaty of Detroit, of November 17th, 1807. With this view a standard line, called the "principal meri wian for Michigan territory." was run north from Fort Defiance 114 miles; which meridian, so far as it goes, is also the western boundary of the cession aforesaid. At the distance of 78 miles on this line, a base-line was run east through the cession, whioh base-line passed eight miles north of Detroit, and at 77 miles from the meridian, terminated on the border of Lake St. Clair, seven miles above its outlet into Detroit river. The military district aforesaid was laid off in eight ranges, east of the principal meridian, and extending six townships on each side of the base line. But a considerable portion of the western part of the district proving to be unfit for cultivation, by reason of swamps and small lakes, govern.
ment directed a suspension, and finally a robin: quishment of the surveys; aml, in liet therenf, two million of acres were appropriated in the terrion. ries of Illinois and lissouri. All the lands ly inm hetween the inilitary district and the east ern boundary of the territory, were subsequently directed to be survejed, and is now nearly completed. 'This Wact extends from near the mouth of the river Raisin, on Lake Erie, to the nutlet of Lake IUron, ordering on the river and lake St. Clair, Detroit river and Lake Erie; and embraces a fine tract of country, containing nearly a million and a half acres The surveyor-general expects in have the whole district completed in time to be brought into mirket during the ensuing autumn; and is now making every exertion for that purpose.
There are in the state of 0hio, two large tracts of land, to the soil of which the Tnited Stules have no claim. Fivst-The lands lying between the little Miami and the Scioto rivers, reserved by the state of Virginia for satisfying military land warrants, granted to the "Virginia troops on the continental establishment." Second-The "Connecticut western reservation," lying in the northeast quarter of the state, bounded on the south by a line drawn from the western line of the state of Pemnsylvania, on the 4.1 st degree of north latitude; and on the west by a line run northwardly, parallel with, and at a distance of 120 miles from the aforesaid state line. Those tracts have been surveyed and located conformably to laws and regulations adopted by the states, respectively, which claim them.

An account of the several land offices, which \(I\) proposed to give in this communication, would swell it to too great a length; I must, therefore, reserve that subject for my next.
Yours, \&c.
S. W

Mr. H. Nress, Editor of the Weekly Register.
High blood-"legitimacy."
"During the troubles in the reign of Charles I. a country girl came to London, in search of a place as a serviant maid, but not succeerling, she applied herself to carrying out beer from a brew-house, and was one of those called tub zomen. The brewer, observing a well looking girl in this low occupation, took her into his own family as a servant, and after a while married her; but he died while she was yet a young woman, and left a large fortune. The business of the brewery was dropped; and the young woman was recommended to Mr. Hyde, as a gentleman of skill in the law, to settle her husband's affairs. Hyde (who was afterwards the Earl of Clarendon) finding the widow's furtune very considerable, married her. Of this marriage there was no other issue than a daughter, who was afterwards the wife of James II: and mother of Mary and Anne, Queens of England."
Here, on the sure side, is the boastad blood of the "illustrious family of Brunswick;" crossed, however, by many, legally and illegally, since the "low-lived creature," a "tub woman," gave birth to queens of England, else it had depreciated to mere ideocity-which, indeed, it is not very far from, as it is.

The bill for further suspending the habeas corpres had passed the house of commons, and, no doubt, would be passed by the lords.

Wheat and other grain, and flour suffered a severe fall about the 23 d of June, on the promising
prospects of a cond harvest. Ftour, at Liverpool, Julv 1,70 to 73 s . per bbl. and declining.

Money never was so plenty amoang the monied men in E.gland as at this time. The floating wealth of the nation is in the hands of a very few speculators and others, and the increasing misery of the people adds to their stock.

The flosting debt, or exchequer bills [treasury notesl of Eingland, amounts to 52,897,200l. upwards of two hundred and thirty four millions of dollars. Another issue of 12 millions of pounds, more, must be made to meet the current or actual ex-p-nces of the present year This debt, is not noticed in the "budget." In the "hands-full of millions" it is no importance!-Nor does the budget say any thing of the interest of the public debt, which is, or is to be, otherwise provided for.
Fom the late finance report it appears, that the British government have on hand the following amount of gumpowder and small arms:
furpowder, bl!s. 294.000 cost \(£ 1,470,000\) \(\begin{array}{ll}\mathrm{M} \text { Hiskets, } & 818,000 \\ 1,757,800\end{array}\) Kifles, \(\quad 4,000\) Carbines, \(\quad 36,000\)

10,500
64,000
Tolal gunpowder and small arms,
£3,302,300
From the twenty third to the twenty sixth June, the mean temperature in London and \(\mathbf{W}\) restminster, had been 83 and 84 in the shacle, and from 108 to 110 in exposed sitnations. The intense heat had beell fatal in an unprecerlented degree to that useful animal, the liorse. Not less than twelve fine machine horses dropped between Hyde Park and Hounslow.

Gen. Thornton, in the British house of commons, asked leave to bring in a bill to abolish the disgraceful practice of publicly whipping women as a punishment The proposition wots receized with reiteraced bursts of laughter, and he had some difficulty to get his motion second. "The English are a flogged nation," says Cobbett.
The wretched and nearly naked populace of Bublin have raised several riots, requiring the aid of the military. The pors people seized loads of potatoes in the streets and devoured them raw!Amorg the most active in reducing them to order, we observe the name of the supremely infamous major Sirr, who with the guard of lancers gallantly charged the miscrable rabble, while they were eating their spoils! "Tranquility" had been restored.
The people of Dublin were ordered by the mayor to remain in their respective houses from \(90^{\prime}\) clock at night until six in the morning, by proclamation.

The state of Ireland is very alarming. "From the north to the south or the west," says the fubblin Evening P'ost, "and at home, there is not a single county in which disturbances have not occurred, but they are serious, indced, in Munster, Kerry, Clare, Waterford, Cork, but above all, Limerick, lave been the scenes of tumult and outrage, such ws were never before experiencud in those districts."

Three British frigates were about in sail for South America to strengthen the force out that sta. tion.

Reac erageily. A late London paper says-Last night, while the tragedy of Jane Shore was perform. ing at our theatre, the part of Dumont by Mr. Cummins, the highly respectable veteran had just repeated the benedictory words,
a Be witne wh for me, ye celestual hosts,
"Such mercy, and such pardon, as my soul
"A ceords to thee, and begs of heaver, to shew thee,
" May such befal me at my latest hour, \({ }^{\text {" }}\) When he fell down on the stage, and instantly expired

An incident similar to this occurred to an actor named Palnier some years ago. He was performing in the "Stranger"-His own domestic circumstances so closely resembled those of the character he was sustaining, that when he had, with exquisite feeling, repeated the exclamation,
"O God! there is another and a better world!"
His sensibility was overpowered; he fell on the stage. and expired in sight of the audience.
house of commons-jusf. 20.
The Budget. - The chancellor of the exchequer moved the order of the day for the house resolv. ing itself into a committee of ways and means.

Mr. Tierney suggested the propriety of postponing the committee at that late hour.
The chancellor of the exchequer observed that after the statement of the income and expenditure of the country had been fixed for that night, it would be necessary, in order to prevent the circulation of unfounded rumors, that the house should go into a committee. - The house then resolved itself into a committec. - The chancellor of the exchequer was sorry that it was necessary, at so late an hour to bring the subject before the house, but indulged the hope that no material measure he had to propose to the committee would meet with opprsition., The house would also come better preparel for the discussion than upon similar occasions by means of the different reports of the committee of finance. These reports would spare him much labor, as to them he intended to refer; and more aitention would probably be paid to printed incuments of that nature than to any necessary hurried statements that he might make. His labor would be also much diminished by the consolidation of the revenues of Great Britain and Ireland. Much Iabor had been employed to reconcile the accounts of the two countries, as vould appear afterwards. It had been so arranged in virtue of the consolidation of the English and Irish exchequers, that fiom the 5th of last January they started with a new consolidated account of the revenue of the united king gom. In one part of the revenue only, there was to be regretted a deficit of 20 per cent. but this could not be wondered at in an agricultural country like Irelaud at the conclusion of a war which had impoverished its natural resources. Notwithstanding these pain. ful circumstances, the house would be gratified in hearing, that the ineans by which the current demands of the year were to be met, were neither bur thensome nor objectionable. The supplies of the year were estimated as follows:

\section*{strplisa.}

Army (including \(£ 1,500,000\), for extra-
ordinaries, and exclusive of troops in France)
£9,030,000
Navy (exclusive of grant for the redac.

\(9,000,000\)
1,500,000
2,511,537

Before Easter, no less than \(44,200,000\), had been applied to equalize the bank of Ireland, which still insisted on an interest of five per cent; but as the Jrish exchequer bills would not become due till January next, it was the intention of government to remedy this evil. He had no doubt at the same time, that the bank of England would reduce their interest as the bills became due. There still remained \(19,000,000\) to be provided for, which he proposed to do by exchequer bills-a mode which every circumstance liad convinced him was most beneficial to the public. He has tried to reduce the exchequer hills, and had succeeded in reducing it to the amount of three hundred thousand pounds a year without the least difficully. From the 24th of February he had disposed of twenty-seven million pounds sterling of exchequer bills, and more than eight months remained for the disposal of the other 24 millions. It was upon these considerations that he recommended the measure with the greatest confidence as one not likely to reduce the credit of the country, and which, in point of fact, would not produce the least inconvenience. Without now going to the extent of what might be offered to the house, it was no slight satisfaction for them to reflect that the public securities had improved to the amount of 20 per cent. on the whole capital of the country. Exchequer bills, which were lately at \(43-4\) and \(51-4\) per cent. were now reduced to \(33-4\) per cent. interest, with 12 shillings premium. This improvement of the state of public credit shewed that the resources of the country were reviving.

There was another topic to which he was anxinus to call the attention of the house, and this was the resumption of cash payments by the bank. When he recollected how he had been mocked and twit. ted on this subject not longer than two years ago, and he believed the house had not forgotten it-(Laughs)-he had some reason to pride himself on what had now taken place. The difficulty in fact
was to prevail on the public to take guineas, thourd the bank was ready to supply them.-(Laughis) That resumption har', however, heen carried to a consolatory extent, and he hoped, would be comMeved by July, 1818. So far as this resumption had gone, it had been accemplished without giving the least shock to public credit (Cries of Hear!)-so that the value of our paper and our specie were alike unimpaired. As to the public debt, their committee had not reported with regard to it; but, notwithstanding the failure of his own anticipations, this also had been reduced 400,0001 . beyoul what was promised.-Nor was this the only satisfaciory circumstuce cor nected with the pub. lic revenue: for since the 1st day of October, 181 G , \(132,000,000\) of cupital stock had been paid off in the market.-These sums were taken out of the stock market, so that every day dininished their amount, and, in all probability, the suin so redeemed would amount to \(120,000,000\), by the time of next year's budget. He felt not only sanruine, but confident as to the progiessive improvement of the revenue, though he could not, under all circumstances, pretend to predict the exact period when such an inprovement might be expected-(Laugh.) -This amelioration was connected with that of the continent, who suffered more than we possibly could. We had a slare of calamity, though a small share, while the continental countries were struggling for subsistence, and therefore could not benit. fit us. Should it please Divine Providence to blesa the nations with a plentiful harvest, and the pcople were grateful for it, then he had no doubt there would arise fresh demands for our articles, com. merce would be increased, and the resources of the country soon be replenished. It was no slight satisfaction to him that he had to congratulate the house on the improvement of public credit, the resumption of cash payments, and the reduction of the national debt. He trusted that he should hear no further of those dangerous remedies for public difficulties which had been suggested in that house; that no proposition would be made to reduce the interest of the national debt, or commit a breach of public faith. (Repeated cheering).-He slaould have no accasion to resort to parliament for the interest on the new exchequer bills, and he felt fall confidence in the state of the country.

At the suggestion of Mr. Tierney, and after some conversation, the chancellor of the exchequer con. sented to put off the report of the committee till Tuesday next.

The several resolutions were then put and agreed to, and the report ordered to be received on Tues. day next.
Adjourned at twelve o'clock.
Ad cuptandum-In consequence of the retrenchment in the expences of the prince regent, a quantity of Madeira wine had been sent out to Kingston (Jain.) in the ship Globe, and was to be sold for the prince's benefit.
france.
The withdrawal of a second fifth of the "army of occupation" is spoken of. A Russian fleet of 8 sail of the line, 1 frigate and a brig has arrived at Calais for the purpose of carrying off 10,000 troops.

The famous count lavalette is reported to have arrived at New York, during the last week.

The French frigate Euryclice has arrived at New York, from Martinique, on a visit. She has for some time been stationed in the West Indies.

The bishop of Orleans, and forty Catholic priests, were to sail from France in a frigate, the end of June, for the Mississippi.

\section*{THE BONAPHERES.}
the fuliowing queer article is copied from a Lon Jon paper of the 26 th of June-
"Phe Dutch Mail of yesperday supplies the following account of the ex king of Spain's colony In the United Siates:-"Josepli Bonaparte is build. ing a town near Baliimore, which none but French are permitted to inhabit. It is capable of containing for the present 12,000 inhabitants. The art of the most sublime architecture is employed to embellish the etifices. Thus it should seem, that the lrench refugecs rennunce the hope of ever returning to the continent of Europe, since they spend their whole furtunes in fixing themselves in so magnificent a manner in America."

Insepls Bonaparte is so quiet and inoffensive, and really so unimportant a character in the United States, that not one in a thousand of the people troubles himself with thinking whether he is liere or \(n\) t. I donnt certaisly know where he resides; but believe it is somewhere in New-Jersey-and the last account 1 had of him was that he was cultivating cabbages and po atous, in elegant retire. ment, much respected by the neighboring people, for his mild and friendly qualities. But as to the "town," we never before heard of it.

Sincethe above was written, we see it stated that Mr. Bonaparte lives at a place called Point Breeze, on the Delaware, near Bondentown, N. J.a beautiful farm, which he has expended much mo. ney to improve. It is said he intends to take up his winter's residence in Philadelphia.

SPAIN.
The late destruction of the naval arsenal near Cacliz, is imputed to design to prevent the fitting out of vessels against the patriots. It is a severe loss to Spain.

It is stated that the secret reason for permitting the importation of negroes into Cuba, is to secure its allegiance, by alarming the people for their own safety!
italy.
It is mentioned that the Confederates, upon the solicitation of Fingland, have determined to deprive the young Napoleon of his mother's principality in Lombardy, and to bestow it, upon the death of Maria Inuisa, upon Spain.

Niuples, June, 2.-Important explanations are said to be passing between this court and the cabinet of Petersburg, supposed to relate to the difiercnces between the United States and us.

We are sorry to learn that suveral vessels have been met with abandoned at sea, in consequence of the attacks of the l3arbary pirates, who are more audacious than ever.

\section*{OERMAKI, \&c.}

So great are the oppressions of the midalling classes, and so severe the privations of the poor, that it would seem as if half the population of some of the Cierman states, and Switzerland, would cast itself on the shores of the United Staten, if it could. Many who appeared in casy circumstanceq, were preparing to embark. The passage of emigrants for the United States is refuncel through the Prussian dominions unless they are furnished with pasports, waich are granted only on certain conclisions.

The entertainment given by the l'ortugucse am bassador at Vienna on the occasion of the late marriage, cost a million of florios-upwards of 360,000 dollars.

russia.
From a Kussian listory; published a few years since:

St. Petersburg. June 4th-In the matricular book of the inhabitants of the county called Trooiska, remitted this year, (1782.) into the chancery of the town of Moskowa, there is made mention of a pea. sunt, named Pheador Vaciliz, (Theolore Bas. lides,) 75 years old, who was married but twice, and lias a very numerous fumily. His first wife lay in 27 times; she was brought forth of four children at a time, at four births; of three at a time at seven births; and of twins at 16 births; so that in all she brought forth 69 children. His second wife gave light to 18 children in eight deliverances, to two in six, and to three in two deliveries, so that in 35 labors of his two wives, that peasant became the father of 87 children, of whom 73 are now living."

The Paris papers record a noble act of the em. peror of IRussia:-A German clergyman at St. Petersburg had procured a subscription of 3000 roubles for the distrcssed inhabitants of the S wiss Canton of Glaris, whose wretchedness is extreme. The list of subscrihers boing shown to the em. peror, he enrolled limself among thein for the sum of 100,000 roubles; juscribing his name with his own hand, as, if to slonv the cordiality of the deed, and ordering that the morey should be paid im. mediately. This contribution is from his own pursc; there is no fund in Russia, out of which it can be paid, without effecting him.

FLOMIDA.
Our latest accounts from MacGregor, at Amelic. are vagne and unimportant. It is stated that his almiralty judge has already left him. The expe. dition will probably soon have an end, and amount to nothing. But the reports are so varions that we know not what to believe. The battle said to liave taken place at Amelia was a mere exercise of the troops.

\section*{"granisu" america.}

It appears certain that the royalists have captur ed Margaretta. The people fought them like lions, and the design seems to be to exterminate all Uie inhabitants of the island. Many have been put 10 death.

Guayara is said to be entirely relieved of the royalists by a late victory of Merina over Morillo, in which the latter suffered a complete defeat. \&c.

The sovereign congress of the United Provinces, of La Plata met on the 12th of Mlay. In this body are said to be some mell of distinguished talents, and mucli good is expected of them. The l3uenos Ayreans are still skirmishing with the royalisis of Peru, yet tnconquered. Four very richly lalen Spanisli ressels have been captured by the parriots at Valparaiso. Several stout and weit fitted ships were about to sail from Buenos Ayres to cruize in the Atlantic and Pacific nceans.

The following summary, from the 13 eston llaily Alvertiser, being the principal contents of 13 reno Ayres papers reccived there, as late as the 21 t! all May, is useful to shew the general state of tiling in this quarier of the world-

Auxiliary army of Pern-lunlietin No. 19, 1,atel at the II. Q. in F'recman, April 9, fives an account of operations from March 20 , to the date. The royalists in Jujui remained closely besieged. Thei troops date not set a fout beyond their entrencli ments, their communicatiuns with the interior are so insecure that strong convoys are necessary. 'Ihey lose men, arms, and beasts every day. On the

\section*{4. 2} NILES' WEEKI.Y REGISTEIL-SATURDAY, ALGUST \(20,1815\).

29th of March there arrived at II. \(Q .142\) deserters and prisoners, and to-d.yy 31 , besides 81 on threir way. Varch 25 , the royalists entered the town of Oran, where they pluniered houses and churches, and lost 80 inen and (6) horses. By the different parties of guwrillas 36 men have been killed and more than 300 anmats tikn P.rries under lieut. col. Torre, commandants Corritti and Corte, and majors Saravia, Zerda, Manrin and others carry on hostilities with great furmess and succesc, and not a day passes but they kill some, and brites in deserters and prisoners.
Bullation No. 20, is dated April 30, and gives a narrative of operations fyom the 10 th to the date On the 15 th the royalist gen Simm, by a rapid and bold movement took possession of the town of Salta. His army however lias beell constantly harassed by the parties under the different partizan chiefs, and sustained constant lasses.

Rullotivz .Vo. 21, dated Muy 1, gives an account of the capture of the town of Farija, by a party of the republican troops under col. Madrid, in which he took 264 prisoners, 400 mnskets and a considerable quantity of munitions of wat:
A subsequent paper contains a despatch from Wanuel Belgrano, general of the auxiliary army of Peru, dated at Tiacuman, May 3, which states that the enemy have not decived the advantage which they expecterl froon the possession of Salta; that they have carried on hostilities with grea: activity and fury, sacrificing their men, and that they lose many by desertion. This despatch is accompanied by a number of letters from Don Wurtin Guemes, governor and commandant of the province of Salta. In one of these lie estimates the enemy's force whirh entered Salta at 2,500 men, and those remaining at Jujui at 600, besides 4 or 500 employed in conveying baggage \&c. He gives the details of numerots trifling advantages gained by him, but it is apparent that on the whole, the army of Peru had for the last month been rather losing than gaining ground.
In Chili, the royalist piwer seems to be less formidable. On the 4 th of April a pirty of 6 or 700 royalists attacked the republican advanced posts at Carapaligue, but were repulsed with the loss of 10 men killed and 10 made prisoners and deserters. - The republican loss was 4 killed and 7 wounded. On the 22d of April, brig. gen. Seignior Don Bernado O'lliggins, had left col. Do: Hilarion de la Quintana in command of St. Jaro, and proceeded as far as Talca, with 800 men to drive out the remainder of the royalists from the province of Conception.

April 14. - San Martin, captain general of the army of the Andes, who was then at Buenos Ayres, addressed to the supreme director of state, a letter giving a particular notice of the officers who distinguished themselves in the great battle of Charabuco, on the 12th of February.

April 15.-An order was issued by Pucyrredon, the supreme director of state, conferring certain honors on San Martin, "to whose indefatigable zeal and military skill the country owes the greater part of the glory of that day," and oin the officers and men of the army.

The Gazette of April 26, contains a list of about eighty distinguished citizens of Chili who had been confined as prisoners at the Island of Juan Fernandez, but who, in consequence of the late siccesses of the republicans, had been released and restored to their friends.

Other accounts.-The patriots were aiming at \(P\) o. 30si-but do not appear to have reached it.

The passage of San Martin's army over the Andes was a great indertaking- 100 men were employed to clear the road of the drifts of snow. This gene. ral appears to be not only a very brave and able conmander, but alss an honest mau and a sincere patriot, as well as generous and himane.

A detachment of 500 Portuguese, from Monte Vider, in search of provisions, were attacked by one of Artigas' parties and put to the sword. Artigas was on the heights commanding Monte Video.
One of the first measures of the Chilian patriot government was to send away the bishop and clergy, who had meddled in the afliirs of the country:Well done.

Troops were collecting at Chili, and contracts for ships made, for an expedition against Lima. Prisoners were brought into Buenos Ayres daily from Lima, who principally entered into the patriot service.

A Portugizese frigate has lately captured an Independent ship of 20 guns, off Uporto, after a severe battle.

\section*{Domestic Manafactures.}

\section*{American society for the encouragement of domessic Manufactures.}

It will be recollected that on the 13 th of Jtune last, the American sociory for the encouragement of domestic manufactures in Now York un nin ously clected John Auaus, Thomas Ibrfinson, and Jambs Mamsov, meinbers thereof, and directed their secretary to apprize them of the circumstance by letter. 'he following is a copy of the secretary's letter, and the answers thereto-

New. York 14th .Jıne, 1817.
Sir-The American society for the enconragement of domestis manufactures, instituted in this city, sensible of the zeal you have unifirmly clisplayed, in the promotion of every object, connected with the welfare and independence of our country, had the honor to elect you a member at their last mecting, convened on the 13 th inst. for the purpose of initiating into the society, James Monroe, president of the United States.
It would afford the the highest gratification to announce to the society, your assent to become one of its members.

> I have honor to be, sir, With respect and consideration, Your obed't servt.
D. LYNCH, Junt

Quincey, June 23, 1817.
Sin-I have received the letter you did me the honor of writing to me on the 14th of this month, announcing to me my election by the American society for the encouragement of domestic manufactures instituted in New-York, as a member-an homor made more illustrious by the presence of the president of the United States.

Ee pleased, sir, to present my respects to the society and my thanks for the honor they have done me-and to assure them if the best wishes of a man at 81 years of age can promote the wise purposes of their institution, I shall be a useful memberFor, according to my superficial view of political economy in civilized society, next to agriculture, which is the first and most splendid, manufactures are the second, and navigation the third. With agriculture, manufactures and navigation, all the commerce which can be necessary or useful to the happiness of a nation will be secured.
Accept my thanks for the civility with which you

Tave communicated the vote of the society to their and your friend,

\section*{JOHN ADAMS.}
n. Lynch, jun. esq. secretary of the American society for the encouragement of domestic manufactures.

\section*{Monticello, June 26, 1817.}

Sin-I am thankful for the honor clone me by an association with the American society for the en cour zement of domestic m:sufaciures, instituted in New-York. - The listory of the last 20 years has bell \& sufficient lesson for us all to depend for necessarier on ourselves alone: and I hope that 20 ywars more will place the Ainerican hemisphere inader a system of its own essentially peaceable and industrious, and not needing to extract its comforts out of the eternal fires raging in the old world-The efforts of the members of your institution being necessarily engaged in their respeotive vicinages, 1 consider myself, by their choice, as but a link of union between the promoters there and here of the same pa'riotic objects. Praying you in present to the society my just acknowledg. ment for this mark of attention, I tender to yourself the assurance of my great respect and consideration.

\section*{THOMAS JEFFERSON.}

\section*{Mr. Lynch.}

Montpei.ier, June 27, 1817.
Sin- 1 have received your letter of the 18 th inst. iuforming me that the American society for the encourageinent of domestic manufactures, have been pleased to elect me one of its members.

Although I approve the policy of leaving to the sagacity of individuals, and to the impulse of private in'erest, the application of industr; and capital, I am equally persuaded that in this as in other cases there are exceptions to the general rule which do not impair the principle of it.-Among these exceptions is the policy of encouraging domestic manufactures, within certain limits, and in reference to certion articles.

Without entering into a detailed view of the subject, if may be remarked, that every prudent nation will wish to be independent of other nations, for the necessary articles of food, of raiment and of defence-and particular considerations applicable to the Linited states, seem to strengthen the inotives to this independence.

Desides the articles falling under the above description, there may be others, for mamufacturing which natural aclvantages exint, which require temporary interpasitions of bringing thein into regular and sum:esstill activity.

Where the fund of industry is acyuired from whroad, and unt withetrakn, nor withheld from other domestic corploymests, the case speakt for itself.

I will owity add, that among the artules of conztimption and tise, the preference in many chses, is itecided intrely by fushion or liabit. is fiar as equality, and slill more, where a real superiority is thated in the articles manufactured at home, ail must be sensible, that it is politic and patriotic to encourage a preferetrit of them as affording a more certain surce of supply for every cluse, and a more certain market for the surplus prosucts of the \({ }^{2}\) gricultural clase.
With these sertiments, 1 beg vas to make my ackunwtedgrnents for the mark of divtioctimion canfirred on lite, and which I accept from respect for the sociriy, and for its objects, rather than fiom any hopre of being usflutay thember. To youreelf; I teoder my friendly respects.

JAMES MADISON.

\section*{Anectotes.}

The following aneciotes are copied from the Phis ladelphia True American, for which they were communicated by a gentleman who was in England at the time of their occurrence:
At an annual meeting of a bible society in Fingland, during the late war, the Rev. Dr. Romeyn was present, and with several speakers addressed the assembly. When Dr. R. informed the audience that he was an American, get, notwithstanding the hostility between the two countries, felicitated himself that he coukd meet Englishmen, engaged in an interesting enterprize, with the affection of charity and cliristian love, he was hissed, and rudely interrupted, especially when he alluded to bis native country.

Very recently the queen of England beld a lecee. when the foreign ministers and distanguished officers were received. From sixty to one hundred thousand people went up to witness the cavalcade, which was numerous and \(m: g n i f i c e n t\). The Russian, Spanish and other foreign ministers proceeded in most splendid carriages, attended by many outriders, \&c. Thus far the procession was reecived by the populace without the manifestation of any other passion than that of curinsity. At length, however, Mr Jimin Q. Adams, minister of the United States, arrived in a tleat plain carriage, atterded by one out rider, and one footman. At the moment he was discriminated is the line by the populace, twenty thousand hats flew into the air; and as many obstreperous voices greeted the distinguislied American statesmen and negociator. Afier his carriage passed the procession advanced without notice from the populace, until the arrival of the princess Char. lotte, who was received with lond cheers. So much for the war, and the treaty of Ghent.

\section*{Marshals of France.}

\section*{from the hoiton centimel.}

Frequent errors are made in print and conversation on the subject of the marshals of France, whose deeds of arms for the last iwenty five years filled the world with astonishment and alarm; and whose names had become among all classes as familiar as those of household deities. To give some information, if not amusement, we have collected the following particulars respecting those renowned soldiers. We believe it is not generally known, that ALL this corps of marshals alive (ssve four only) are now in France: and that all of them (with, perhaps, the exception oftwo) are full in the confidence of louts \(18 \mathrm{th}_{\text {; }}\) sthetaining under him the highest offi-ces:-And further, that he has no other marshals in his service, than those who were first created by Homaparte.

The following are now in France and rank in the order in which they are ennmerated:-
1. Marshal Victor, (duke of Belluno) military governor of the 16 th division, president of the elec. toral coltege of the laire and Clier, major.general of the \(\mathrm{inng}^{\prime}\) s house holl, firand Cross of St Louis. and une of the wituesses, for the ariny, of the mar. rime of the duke of Berri.
2 Jean Baptiste Jourdan, born in 1762 , military governur if the 7 th division.
3. Pierre Angereat, (duke of Castiglione) Sern in 1757-a pecruf France, and governor of the 1:th militury divition.
4. Eíward Adolphus Cex imil Joseplı Mortier, (duke of Trevise) beni in 1 T68-miliari governor of the 16 th division
5. Louis-Nictulas Lavolity, (prince of Eckmuht,
an 3 duke of Auerstadt) born 1776-Recognized as marshal of France, but has no command, and resides at L.ouriers.
6. Charles Oudinot, (duke of Reggio) born in 2765-A cousallor of state and privy counsellor, and m jor general of the king's houschold; governor of the 2 d military division; president of the departmert of the Meuse; Grand Cross of the order of \(\mathrm{S}^{\circ}\) Louis; commonder of the gremadiers and chasseurs of the king's guard, and commandant of the national guarls of Paris.
7. E. J. J. A. Macdonald, (duke of Tarentum) born in Ledan, in 1765-A privy counsellor and peer of France; major-general of the king's howse. hold; a military govemor of a division; and Grand Cross of the order of St . Louis.
8. Augustus F. L. V. Marmont, (duke of Ragusa) born in 1774-a peer of France; major-general of the king's household, and Grand Cross of the order of St. Louls.
9. Louis-Gabriel Suchet, (duke of Albufera) born in 1769- Ile was one of Louis's peers, but liaving accerfed a seat in Bonaparte's house, he was unpeer. ed in: 1816; but has since been appointed military govanor of the 9th division.

10 Marshal Gouvion St. Cyr, secretary of state for the marine and colonies, a peer, and privy counsellor; a military governor, and Grand Cross of the urder of St . Louis.
11. Francis Charles Kellerman, (duke of Vilmy) born in 1735, (the elclest of the marshals)-Was uapeered by Louis 18th in 1815; but appointed military governor of the 5th division; Grand Cordor of the royal legion of t.onor.
12. Joseph Lefevre, (duke of Dantzic) born in 1756-He too accepted a peerage fiom Bonaparte on his return from Eiba; and was, therefore, expelled by Louis. He has no command.
13. Marshal count Perignon, a peer of France; governor of a military division, and Grand Cross of the order of St. Louis.
14. Marshal count Serrurier, governor of the -oyal hotel of invalids, and one of the peers of France

Note.
Of the balance of the marshals, it is knozun, tiat Niey, Bertheir, Lasnes, Bessieres, Junot, and Massena, are deceused.- Bernadotte is in Siveden; Soult, Grouchy, aud Suzary, in exile; Brune is in France, but nod recognized as a marshal.

\section*{French Muscum.}

Paris, spril 20.-The musenm of paintings and antiquities newly opened, has become again a great place of resort and enjoyment to the Parisians, as ivell as to strangers visiting the city. Master-peices of art, of the Italian, French, and Flemish schools, vere scattered through different castles of the kingdom. They have now been collected and fill up with those Ieft by the allies and others lately bought by the king from forcign princes, that wide chasm which was made by the allies, when they carried off so large a number of pieces of art, either to themselves or to the pope and Italian princes.

The Museum contains at present, if not quite the same value in master-peices as heretofore, at least the same number. Splendor proportioned to the taste of the exhibition in the majestic gallery of the Lourre, makes grod the remainder. The number of paintings of all schools amounts to upwards i, 110 -no great matier's name is missing. 'There
are 13 paintings of Raphael, 9 of \(L\). de Iinci, \(2 U\) of Fitian, 10 of Corregio, 6 of Tintoret, 10 of P. Feronese, 28 of the Caraccis, 6 of Julio Romano, 23 of Guido, 14 of Dominichino, 17 of albuno, \&cc. again 17 of Vandyke, 41 of Rubens, 15 of Rembrandl, 6 of IIol. bein, and many others by German masters, hesides the whole addition of the French scbool itself, viz. the I'oussin's, the Lesiuvir's, the L.cbrun's, the Vernet's, \&c. - without thus collection of paintings, the 16 saloons of anticpue statues, distinguish them. selves by the brilliant display of 350 antique str. tues, busts, bas re'icfs, tombs and monuments of antiquity This last cullection was, as every one knows, the invaluable property of the prince of Borshese, purchased by Bomaparte for the very same museum, which always was and yet is its chief ornament. consisting of the Gladiator, Jason, the old Matron, several Muses, the Centaur, Minerra, Hergules, Marsais, Hermaphrodite, \&c. But before the Italian master pieces were carried as a booty to Paris, France possessed in the royad palaces and garden celebrated pieces of antique statues; for example, the exquisite majestic statue of Diana, of Fountainbleau. And she now occupies the place where her divine brother Apollo of Belvidere formerly stood, and it is asserted that slie was made by the same Grecian artist Praxueles, and like him she attracts every eye the same way as lie formerly did.

Our museum was, and after all is, the first museum of Europe. We shall have yet a considerable addition of statues and busts of kings, ministers, and sages, In what is to be called the "JIusee Frun" coise," preserved for the last twenty four years by that name in the ancient monastry called the Petit Augustines, which objects were saved at the time of vandalis:n and devastation in France, out of the churches and abbeys, and brought thither, which very valuable and memorable collection, will occupy soine more saloons of the museum.

\section*{A. cancer cured.}

From the Middlesex, (Mass.) Gazette.
Hracut, April 9.
Sin-Considering it a duty incumbent on each individual of society, to do all in his power to promote. the health, prosperity and happiness of all his fellow citizens, I will state to you the commencement, progress and cure of a most distressing disease, which has occurred in my own family. If you think it worthy of a place in your paper, I have no objection to its being made public; and will afford me great consolation to learn, that the application which wrought the cure, has had the same -fficacious operation upon others in similar circumstances.
About seven years since, my wife was seized with a cancer on her ankle, which increased with consjderable rapidity, and was attended with pain; it continued sorely to affect her for nine months, during which time no pains were spared to obtain the best advice from those well versed in medicine and surgery. It was twice attempted to eradicate it by the applifation of vegetable caustics; and many other applications were unsuccessfully made. The limb became weak, and at times, much swollen. She had in a measure lost her appetite; and her whole system seemed on the decline. The sore was deep and broad. In this situation we commenced the application which produced the cire. The principal ingredient is an evergreen plant, which is to be four.d in all the northern states, in woodlands which pro-1 duce a mixture of oak and pine timber. It is by different people called ever-bitter-sweet-wintergreen rheumatism plant, \&c.; the botanical namen \(\hat{i}\)
the plant is pyrola. We made a strong decoction, by boiling the pyrola in pure water, placed in a vessel containing corsiderable quantity of pulverized roll sulphur, and ponred the decoction upon it, boiling hot. Mrs. Varnum took a small quantity of the diecoction, internally, two or three times in a day; bathed the defective part and parts adjacent to it several times in a day, and kept a cloth wet with it constantly on the ankle. She took about an: ounce of common medicinal salts, every second day: the decuction was renewed as occasion pequired. We commenced this system of operation about the mid dle of a pril, 1815, and purstied it with unremitting care and attention, without variation. In a very few days from the cominenceinent of the operation, the pa'ient began to realise the benefici.l effects of it : her appetite was restored; her pain Was gradually eradicated: she rapidly gained strength, both in body and limb; so that in less than six. weeks the defective ankle was entirely heilei and so:med, and her liealth and strength completely restorcal. It is now almost two years since this apparent cure was effected; and we have the greatest consolation of learning from her, that she has not felt a single twinge of the disorder since 4hat period, we do therefore confidently hope, it will never return.
Mis. Varnum now enjoys remarkable good health for a person of her age. Some people may object in making a thorough experiment, in cases similar to Mrs. Varnum's, on account of the simplicity and novelty of the prescription.-But however simple and novel it may appear, and however inefficient it may prove with others, Mrs. Varnum and myself, with our family, have abundant reasons to rejoice and bless the Supreme \(A\)-biter of events, for the won. derful effect which through the beneficence of Di the I'rovidence, it has had in her case.-And I am sanguine in the belief, that if early and undeviating experiments of the kind be made, they will prove efficacious in most, if not all cancer cases.
I am sir, with respect, your obedient servant,

> J. B. VARNUM.
foom the acroha.
IMr. Duane.-As you have published general Var. num's accout of the valuable properties of the furoba in the curre of a cancer, you will probably liave no abjection to inform the public, that pyrola is a generic term, comprising several different spe. cies of plants, and that the species which he refers to, is she parola umbellate, known in Pennsylvania and Delaware, by the name of phipresazoca. It may be disting:ished from the pyrola maculata, or spottell pyrola, by the leaves be ing uniformly green, and broadest near the extremity, white the leaves of the latter kind are variegated with whitish stripes, and are widest near the foot stuck.
Having now in my posecsion a specimen of the lant which was given to the hy general Varnum al Waslington, I can vouch for the correctness of the above statement.
This noble plant, (oalled by the ancient natives, the king of plants) lias also been found surprisingly efficacions in the radical cure of crofula.

Avices.

\section*{CHRONICLE.}

The president of the United States embarked in the U S. brig Jones, at Sackett's Harbor, on wie 6th inst. for the liead of the lake.
The president arrived at Fort Niagnra mu the sth inst. which he impected and reviewed the troops. sic. He went up the river as far us the Falls, ote
lodgred nith judge Porter. He reached Buffalo on The 9 th, and, bemg received according to the arrangements made, embarked in the evening in the U. S. schooner Purcupine, lieut. Packett, for Detroit.

On Saturdasy last there were seven southern mails tue at Washington city So great a number in ar. rears were never known befure. The interruption was caused by the late extensive hurricane.
Some American sailors at St. Croix liad a fracas with a part of the crew of a Danish government brig, and, as their custom is, handled their opponents pietty roughly and came off conquerors. A second rencontre tonk place which was provoked by the Danes: on which the govermar interfered, "and to quiet the claniors of the plaintiffs," ordered one of the Americans to receive twenty fire lashes. which were inflicted upon him. The affair will hardly pass unnoticed, but as yet we have no official statement of its facts.

Narcal.-A letter from an officer in the Mediterranean says, that the old "War' Queen," (the frigate United States) having been complectely repaired, is fitted to perform any service, and is one of the finest and fastest sailing ships in the world.
Lieut. Cumningliam, in the U. S. scho iner Firetraukl, has returned to the Balize from Vera Cruz, where he was received very politely, and succeed. ed in his object; which was to bring home for trial a certain person charged with piracy aml murder. Passing Barrataria, lieut. C. took possession of a small vessel, manned by 8 men, with a swivel and 25 muskets, supposed to have been fitted out for some piratical expedition.

The brig Mary, has arrived at New York from Jamaica, with 200,000 dollars in specie.
Died, at Charleston on the Gith inst. therev. Thisodore Deshon, protestant episcopal bishop of South Carolina. He was mucl beloved by his flock, and respected by the people of evcry denomination.

Bied-recently at Xew York, after a lingering illness, Charlotte, the wife of capt. Joseph Bainbridge, of the U. S. navy, aged 27 years.
Kïlnafping. - One of the kidnappers lately caught in New-York, has beensent for three years to the penitentiary. No fine was inflicted, becruse the negroes, set free by his conviction, had cost several thousand dollars.
The Delaw..ie papers have a long account of a negro's selling his own mother, aged 60 years, to one of the knots of traders in human fiesli that infest the lower parts of that state. The villain had been permitted to purcliase her at a nominal price through charitable motives, with an understanding that she would be free. He got sixty cillars for lier. The traders instantly made known the transuction to excite the interference of the humanc, and modestly asked 200 dollars for the old woman, and would prubably get it.

British conanlate at Acto. Orteans, Tune 19.
difan ala-1 am desired by our ininister at Whshing ton, the hion. Mr. Bagot, to take the earliest on. portunity of expressing his acknowledgrnents for your prompt interference in the case of the Ilamilton, whic reby the remainder of the crew of that vessel were rescrical from imminent danger, and a \(\ln\) rge amumut of British property from destruc. tiom.
I embrace this occasion in ennvey to you the as. surance of the esteem and regarid with which I have the honar to remaia, denr sir, your inost cobedicut servallt,
J.a D DAVIDSON

American Hine-The Indiana Resister, publiched at Vevay, informs us that the Vineyards in the vicinity of that place, have the brightest prospert of rowarding the labors of the vine dressers. The luscions fruit is in great perfection; and it is cultivated extensively by the Swiss settlers-whose r.umbers will probably be greatly increased by the late emigrations. It is pleasing to learn that these cultivaturs of the vine on the Ohio, find it a very profitable bisiness.

But the following extract of a letter to the editor, from another point on the Ohio, is not encou. raging.
"My vine is improving, and your bottle will certainly come by the first safe opportunity.
"Since the latter end of May, we have bad rain almost every day, and our grapes (that weathered the frost) are rotting very fast. I still expected to save about 100 gallons, but the weather continues wet and scéms to get worse and worse-I am afiaid there will be none left-it appears as if the elements have conspired against us since we planted the vine;-or else the god Bacchus, unlike the king of Portugal, is determined not to transplant his empire from Europe to America."

Fast sailing. - The ship Pacific reached the frish coast from New. York in 12 \(\frac{1}{2}\) days, at the rate of 216 miles per day, for an average.

Charleston.-From what we see in the public papers, there is reason to believe that a destructive fever is raging at Charleston. It seems chiefly to attack strangers; for whose relief the city corporation has appropriated \(\$ 5000\), as well as appointed a committee to receive the voluntary contributions of the people. A proposition is offered to remove all such to Ifaddrell's Point, where every provision will be made for their accommodation; the commander of the harbor having tendered the barracks for the purpose.
Frughtfill fish. There is a story in the Silcm pa. pers, and it seems us if it might be true, about a thonstrous fish that has frequently shewed itself at Cloucester. It appears to be of the serpent kind, "like a string of gallon kegs, 100 feet long." Maty people, with muskets, harporons, \&ic. had went vitt to take it, but without effect. One man dis. charged a musket at its head, at the distance of orly 30 feet. Its motions are exceedingly quick -its heud is of the size of that of \(n\) hoise, and white. We may expect particulars.

Compliment.-At the dinner in honor to Mr. Aclams, at New- York, * one of the guests, Mr. Fearon, of Lomdon, ruse in his tum, and addressed the compathy as follows:
"As several gentemen lave volunteered songs, I would beg leave to offer a sentiment which I am sure will meet the hearty concurrence of all present; but pueviuus to whin I desme to express the high satisfaction which this day's entertainment
*The room in which the dimer was given was handsomely decorated. In the centre was an elegant circle of oak leaves, roses and flags, the whole representing with much effect our happy union, and from the centre of whicl, as from her native woods, appeared our eagle bearing in her beak this impres. sive scroll.
"Columbis, great republic, thou art blest
"While empires druop and roonarchs sink to rest."
Among the guests were governor Clinton and the mayor of New. York, \&c. The company consisted of about 200 gentlemen of the greatest respectability.
has afforded me. Though a native of Gireat Britain) and but a few days in the United Sates, I am fir the first time in my life in a fiee country, surrounded by free-men; and when I lonk at the iuscription which decorates your Fagle, I rejoice that I have been destined to see this day. A great number of the enlightened portion of my countrymen advocate your cause-admire your principles. And thnugh we have unfortunately been engaged in a war, I tiust the result nas taught wisdoin to both parties.
"In your political insticutions, you have sef a noble example, which, if followed throughout the world, will rescue mankind from the dominion of those tyrants who jeer at the destruction which they produce-
"Like the muon beams on the blasted heath,
"Mocking its desolation."
Gentlemen, in conclusion, I beg to express the delight which I feel, and propose to your as a toast, "Irav the United States be an example to the world; and may civil and religious liberty cover the earth as the waters do the claannels of the deep."

GASH Masses of Native nurtir averican copper. From the . Nezv-York Gazette.
The native copper found around lake superior, has been tong a theme of conversation. ()n one oocasion, a company was formed in England, with a large monied capital, to work the mines. On another, an agent was to liave been sent there by order of congress, to explure for copper:

It appears by certain late intelligence received through Dr. Francis Le ßarron, apothecary general of the \(\mathbb{U}\). State,, that a larger body of this virgin in tal, perhaps than any an the world, is now lying in the bed of the Oaatanagan river, a stream ruaning into lake Superior, from the south. It is reported to measure, in girth, or circumference, twelve feet at one end, and fourteen feet at the other. As far as a judgment can be formed, the mass is compact througliout, and of singular purity.

The specimen which Dr. Le Barron gave to Dr. Mitchell, was accompanied by a curious Map of the Western half of lake Superior, drawn by a youth of the Chippewa tribe. On this are delineated the Onatanagan, and the place where the native copper exists; as are also all the memorable streams, bays, and islands, to the Ford du Lac, or bottom of the lake.
```

[^0]:    * Simetere :raa a native of (ienoa, who had settled in Philadelprian, an! was the person who laid the foundation of the malable muscum now belonginen in Mr. P'ale.
